This prospectus supplement relates to an effective registration statement under the Securities Act of 1933, but is not complete and may be changed. This prospectus supplement is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Subject to Completion, dated April 11, 2018

PRELIMINARY PROSPECTUS SUPPLEMENT

(to Prospectus dated June 16, 2017)

OFS Capital Corporation

\$43,750,000

% Notes due 2025

OFS Capital Corporation, a Delaware corporation, is a closed-end, externally managed, non-diversified management investment company that has elected to be treated as a business development company under the Investment Company Act of 1940, as amended (the "1940 Act"). Our investment objective is to provide our stockholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments.

We are managed by OFS Capital Management, LLC. OFS Capital Services, LLC provides the administrative services necessary for us to operate.

We are offering \$ _____ million in aggregate principal amount of _____ % notes due 2025, which we refer to as the Notes. The

Notes will mature on _____, 2025. We will pay interest on the Notes on January 31, April 30, July 31 and October 31 each year, beginning July 31, 2018. We may redeem the Notes in whole or in part at any time or from time to time on or after _____, at the redemption price of 100% of the aggregate principal amount thereof plus accrued and unpaid interest

as discussed under the section titled "Description of the Notes — Optional Redemption" in this prospectus supplement. The Notes will be issued in minimum denominations of \$25 and integral multiples of \$25 in excess thereof.

The Notes will be our direct unsecured obligations and rank pari passu, which means equal in right of payment, with all outstanding and future unsecured indebtedness issued by us. Because the Notes will not be secured by any of our assets, they will be effectively subordinated to all of our existing and future secured unsubordinated indebtedness (or any indebtedness that is initially unsecured as to which we subsequently grant a security interest), to the extent of the value of the assets securing such indebtedness, including, without limitation, borrowings under our senior secured revolving credit facility with Pacific Western Bank, or PWB, as amended (the "PWB Credit Facility"), of which we had \$38.2 million outstanding as of April 9, 2018. The Notes will be structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, including OFS SBIC I LP ("SBIC I LP"), since the Notes will be obligations exclusively of OFS Capital Corporation and not of any of our subsidiaries. As of April 9, 2018, our subsidiaries had total indebtedness outstanding of \$149.9 million. None of our subsidiaries is a guarantor of the Notes and the Notes will not be required to be guaranteed by any subsidiary we may acquire or create in the future. For further discussion, see the section titled "Description of the Notes" in this prospectus supplement.

The Notes will also rank pari passu with, or equal to, our general liabilities (total liabilities, less debt). In total, these general liabilities were \$4.6 million as of December 31, 2017. We currently do not have outstanding debt that is subordinated to the Notes and do not currently intend to issue indebtedness that expressly provides that it is subordinated to the Notes. Therefore, the Notes will not be senior to any of our indebtedness or obligations.

We intend to list the Notes on The Nasdaq Global Select Market, and we expect trading to commence thereon within 30 days of the original issue date under the trading symbol "OFSL". The Notes are expected to trade "flat." This means that purchasers will not pay, and sellers will not receive, any accrued and unpaid interest on the Notes that is not included in the trading price. Currently, there is no public market for the Notes, and there can be no assurance that one

will develop.

This prospectus supplement and the accompanying prospectus contain important information about us that a prospective investor should know before investing in the Notes. Please read this prospectus supplement and the accompanying prospectus before investing and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission (“SEC”). The information is available free of charge, and security holders may make inquiries by contacting us at OFS Capital Corporation, 10 South Wacker Drive, Suite 2500, Chicago, Illinois 60606, or by calling us collect at (847) 734-2000 or on our website at www.ofscapital.com. The SEC maintains a website at www.sec.gov where such information is available without charge. Information contained on our website is not incorporated by reference into this prospectus supplement and the accompanying prospectus, and you should not consider information contained on our website to be part of this prospectus supplement and the accompanying prospectus.

Investing in our Notes involves a high degree of risk, including the risk of leverage. Before buying any Notes, you should read the discussion of the material risks of investing in us in “Risk Factors” beginning on page S-20 of this prospectus supplement and page 1 of the accompanying prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Note	Total
Public offering price	\$	\$
Underwriting discount (sales load and commissions)	\$	\$
Proceeds, before expenses, to us (1)	\$	\$

(1)

We estimate that we will incur approximately \$350,000 in offering expenses in connection with this offering.

The underwriters may also purchase up to an additional \$ total aggregate principal amount of Notes offered by this prospectus supplement and the accompanying prospectus, solely to cover over-allotments, if any, on or before April 30, 2018. If the underwriters exercise this option in full, the total public offering price will be \$, the total underwriting discount (sales load and commissions) paid by us will be \$, and total proceeds, before expenses, will be \$.

THE NOTES ARE NOT DEPOSITS OR OTHER OBLIGATIONS OF A BANK AND ARE NOT INSURED BY THE FEDERAL DEPOSIT INSURANCE CORPORATION OR ANY OTHER GOVERNMENT AGENCY.

Delivery of the Notes in book-entry form only through The Depository Trust Company, known as DTC, will be made on or about , 2018.

ABOUT THIS PROSPECTUS SUPPLEMENT

This document is in two parts. The first part is this prospectus supplement, which describes the terms of this offering of the Notes and also adds to and updates information contained in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information and disclosure. To the extent the information contained in this prospectus supplement differs from the information contained in the accompanying prospectus, the information in this prospectus supplement shall control. You should read this prospectus supplement and the accompanying prospectus together with the additional information described under the headings “Available Information,” “Prospectus Supplement Summary,” and “Risk Factors” before investing in the Notes.

You should rely only on the information contained in this prospectus supplement and the accompanying prospectus. Neither we nor the underwriters have authorized any other person to provide you with different information from that contained in this prospectus supplement or the accompanying prospectus. If anyone provides you with different or inconsistent information, you should not rely on it. This prospectus supplement and the accompanying prospectus do not constitute an offer to sell, or a solicitation of an offer to buy, any Notes by any person in any jurisdiction where it is unlawful for that person to make such an offer or solicitation or to any person in any jurisdiction to whom it is unlawful to make such an offer or solicitation. The information contained in this prospectus supplement and the accompanying prospectus is complete and accurate only as of their respective dates, regardless of the time of their delivery or sale of the Notes. This prospectus supplement supersedes the accompanying prospectus to the extent it contains information different from or additional to the information in that prospectus.

TABLE OF CONTENTS

PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights some of the information in this prospectus supplement and the accompanying prospectus. It is not complete and may not contain all of the information that you may want to consider before investing in our securities. You should read the entire prospectus supplement and the accompanying prospectus carefully, including “Risk Factors” sections included in the prospectus supplement and accompanying prospectus. Throughout this prospectus supplement and the accompanying prospectus, we refer to OFS Capital Corporation and its consolidated subsidiaries as the “Company,” “we,” “us” or “our;” OFS Capital Management, LLC as “OFS Advisor” or the “Advisor;” and Capital Services, LLC as “OFS Services” or the “Administrator.”

OFS Capital Corporation

We are an externally managed, closed-end, non-diversified management investment company and have elected to be treated as a business development company (“BDC”) under the 1940 Act, which imposes certain investment restrictions on our portfolio. Our investment objective is to provide our stockholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments. Our investment strategy focuses primarily on investments in middle-market companies in the United States. We use the term “middle-market” to refer to companies that may exhibit one or more of the following characteristics: number of employees between 150 and 2,000; revenues between \$15 million and \$300 million; annual earnings before interest, taxes, depreciation and amortization (“EBITDA”), between \$3 million and \$50 million; generally, private companies owned by private equity firms or owners/operators; and enterprise value between \$10 million and \$500 million. For additional information about how we define the middle-market, see “The Company — Investment Criteria/Guidelines” in the accompanying prospectus.

As of December 31, 2017, we held debt and equity investments in 37 portfolio companies with an aggregate fair value of \$277.5 million. As of December 31, 2017, 70% of our investment portfolio was comprised of senior secured loans, 18% of subordinated loans and 11% of equity investments, at fair value.

Our investment strategy focuses primarily on middle-market companies in the United States, including senior secured loans, which includes first-lien, second-lien and unitranche loans, as well as subordinated loans and, to a lesser extent, warrants and other equity securities. We also may invest up to 30% of our portfolio in opportunistic investments of portfolio companies not otherwise eligible under BDC regulations. Specifically, as part of this 30% basket, we may consider investments in investment funds that are operating pursuant to certain exceptions to the 1940 Act and in advisers to similar investment funds, as well as in debt of middle-market companies located outside of the United States and debt and equity of public companies that do not meet the definition of eligible portfolio companies because their market capitalization of publicly traded equity securities exceeds the levels provided for in the 1940 Act.

We execute our investment strategy, in part, through SBIC I LP, a licensee under the U.S. Small Business Administration (“SBA”) Small Business Investment Company (“SBIC”) program. The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA leverage funding is subject to SBIC I LP’s payment of certain fees to the SBA, and the ability of SBIC I LP to draw on the leverage commitment is subject to its compliance with SBA regulations and policies, including an audit by the SBA. For additional information regarding the regulation of SBIC I LP, see “Regulation — Small Business Investment Company Regulations” in the accompanying prospectus.

On a stand-alone basis, SBIC I LP held approximately \$251.6 million and \$247.5 million in assets, or approximately 70% and 81% of our total consolidated assets at December 31, 2017 and December 31, 2016, respectively.

Our investment activities are managed by OFS Advisor and supervised by our board of directors, a majority of whom are independent of us, OFS Advisor and its affiliates. Under the investment advisory agreement between us and OFS Advisor (the “Investment Advisory Agreement”), we have agreed to pay OFS Advisor an annual base management fee based on the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed funds and including assets owned

TABLE OF CONTENTS

by any consolidated entity) as well as an incentive fee based on our investment performance. We have elected to exclude from the base management fee calculation any base management fee that would be owed in respect of the intangible asset and goodwill resulting from our acquisitions of the remaining ownership interests in SBIC I LP and SBIC I GP, LLC (“SBIC I GP”) on December 4, 2013 (“SBIC Acquisition”). OFS Advisor also serves as the investment adviser to collateralized loan obligation (“CLO”) funds and other assets, including Hancock Park Corporate Income, Inc. (“HPCI”), a non-traded BDC with an investment strategy similar to ours. OFS Advisor will seek to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy.

We have also entered into an administration agreement (“Administration Agreement”) with OFS Services. Under our Administration Agreement, we have agreed to reimburse OFS Services for our allocable portion (subject to the review and approval of our independent directors) of overhead and other expenses incurred by OFS Services in performing its obligations under the Administration Agreement.

As a BDC, we must not acquire any assets other than “qualifying assets” specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Qualifying assets include investments in “eligible portfolio companies.” Under the relevant SEC rules, the term “eligible portfolio company” includes all private companies, companies whose securities are not listed on a national securities exchange, and certain public companies that have listed their securities on a national securities exchange and have a market capitalization of less than \$250 million, in each case organized in the United States. We are permitted to borrow money from time to time within the levels permitted by the 1940 Act (which generally allows us to incur leverage for up to 50% of our asset base, or 66²/₃% if certain conditions are met). We may borrow money when the terms and conditions available are favorable to do so and are aligned with our investment strategy and portfolio composition. The use of borrowed funds or the proceeds of preferred stock to make investments would have its own specific benefits and risks, and all of the costs of borrowing funds or issuing preferred stock would be borne by holders of our common stock.

We have elected to be treated for tax purposes as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (“Code”). To continue to qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements. Pursuant to this election, we generally will not have to pay corporate-level taxes on any income we distribute to our stockholders.

As a BDC, we are required to meet a coverage ratio of the value of total assets to senior securities, which include all of our borrowings and any preferred stock we may issue in the future, of at least 200% (or 150% if certain requirements are met). The Company received exemptive relief from the SEC effective November 26, 2013, which allows us to exclude our SBA guaranteed debentures from the definition of senior securities in the statutory asset coverage ratio under the 1940 Act.

The 1940 Act generally prohibits BDCs from making certain negotiated co-investments with certain affiliates absent an order from the SEC permitting the BDC to do so. On October 12, 2016, we received exemptive relief from the SEC to permit us to co-invest in portfolio companies with certain other funds managed by OFS Advisor (“Affiliated Funds”) in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the “Order”). Pursuant to the Order, we are generally permitted to co-invest with Affiliated Funds if a “required majority” (as defined in Section 57(o) of the 1940 Act) of our directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

TABLE OF CONTENTS

Organizational Structure

About OFS and Our Advisor

OFS (which refers to the collective activities and operations of Orchard First Source Asset Management, LLC (“OFSAM”) and its subsidiaries and certain affiliates) is a full-service provider of capital and leveraged finance solutions to U.S. corporations. As of December 31, 2017, OFS had 45 full-time employees. OFS is headquartered in Chicago, Illinois and also has offices in New York, New York and Los Angeles, California.

Our investment activities are managed by OFS Advisor, our investment adviser. OFS Advisor is responsible for sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. OFS Advisor is a registered investment adviser under the Investment Advisers Act of 1940 (the “Advisers Act”) and a wholly-owned subsidiary of OFSAM.

Our relationship with OFS Advisor is governed by and dependent on the Investment Advisory Agreement and may be subject to conflicts of interest. OFS Advisor provides us with advisory services in exchange for a base management fee and incentive fee; see “Management and Other Agreements — Investment Advisory Agreement” in the accompanying prospectus. The base management fee is based on our total assets (other than cash and cash equivalents, and the intangible asset and goodwill resulting from the SBIC Acquisition; but including assets purchased with borrowed funds, and assets owned by any consolidated entity) and, therefore, OFS Advisor will benefit when we incur debt or use leverage. Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interest associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors periodically review OFS Advisor’s services and fees as well as its portfolio management decisions and portfolio performance.

OFS Advisor has entered into a Staffing Agreement (the “Staffing Agreement”) with Orchard First Source Capital, Inc. (“OFSC”), a wholly-owned subsidiary of OFSAM. Under the Staffing Agreement, OFSC makes experienced investment professionals available to OFS Advisor and provides access to the senior investment personnel of OFS and its affiliates. The Staffing Agreement provides OFS Advisor with access to deal flow generated by OFS and its affiliates in the ordinary course of their businesses and

S-3

TABLE OF CONTENTS

commits the members of OFS Advisor’s investment committee to serve in that capacity. As our investment adviser, OFS Advisor is obligated to allocate investment opportunities among us and any other clients fairly and equitably over time in accordance with its allocation policy.

OFS Advisor capitalizes on the deal origination and sourcing, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of OFS’s professionals. The senior management team of OFS, including Bilal Rashid, Jeff Cerny and Mark Hauser, provides services to OFS Advisor. These managers have developed a broad network of contacts within the investment community and possess an average of over 20 years of experience investing in debt and equity securities of middle-market companies. In addition, these managers have extensive experience investing in assets that constitute our primary focus and have expertise in investing across all levels of the capital structure of middle-market companies. See “Portfolio Management” in the accompanying prospectus for additional information regarding our portfolio managers.

Our Administrator

We do not have any direct employees, and our day-to-day investment operations are managed by OFS Advisor. We have a chief executive officer, chief financial officer, chief compliance officer, chief accounting officer, corporate secretary and, to the extent necessary, our board of directors may elect to appoint additional officers going forward. Our officers are employees of OFSC, an affiliate of OFS Advisor, and a portion of the compensation paid to our officers is paid by us pursuant to the Administration Agreement. All of our executive officers are also officers of OFS Advisor.

OFS Services, an affiliate of OFS Advisor, provides the administrative services necessary for us to operate. OFS Services furnishes us with office facilities and equipment, necessary software licenses and subscriptions and clerical, bookkeeping and recordkeeping services at such facilities. OFS Services oversees our financial reporting as well as prepares our reports to stockholders and all other reports and materials required to be filed with the SEC or any other regulatory authority. OFS Services also manages the determination and publication of our net asset value and the preparation and filing of our tax returns and generally monitors the payment of our expenses and the performance of administrative and professional services rendered to us by others. OFS Services may retain third parties to assist in providing administrative services to us. To the extent that OFS Services outsources any of its functions, we will pay the fees associated with such functions at cost, on a direct basis.

Market Opportunity

Our investment strategy is focused primarily on investments in middle-market companies in the United States. We find the middle-market attractive for the following reasons:

Large Target Market. According to the U.S. Census Bureau in its 2012 economic census, there were approximately 197,000 companies in the United States with annual revenues between \$10 million and \$2.5 billion, compared with approximately 1,300 companies with revenues greater than \$2.5 billion. We believe that these middle-market companies represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have historically constituted the vast bulk of OFS’s portfolio companies since its inception and constituted the vast bulk of our portfolio as of December 31, 2017. We believe that this market segment will continue to produce significant investment opportunities for us.

Specialized Lending Requirements with High Barriers to Entry. We believe that several factors render many U.S. financial institutions ill-suited to lend to U.S. middle-market companies. For example, based on the experience of our management team, lending to private middle-market companies in the United States (a) is generally more labor-intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information for such companies, (b) requires due diligence and underwriting practices consistent with the demands and economic limitations of the middle-market and (c) may also require more extensive ongoing monitoring by the lender. As a result, middle-market companies historically have been served by a limited segment of the lending community. As a result of the unique challenges facing lenders to middle-market companies, we believe that there are high barriers to entry that a new lender must overcome.

S-4

TABLE OF CONTENTS

Robust Demand for Debt Capital. We believe that private equity firms have significant committed but uncalled capital, a large portion of which is still available for investment in the United States. Subject to market conditions, we expect the large amount of unfunded buyout commitments will drive demand for leveraged buyouts over the next several years, which should, in turn, create leveraged lending opportunities for us.

Competitive Strengths and Core Competencies

Deep Management Team Experienced in All Phases of Investment Cycle and Across All Levels of the Capital Structure. We are managed by OFS Advisor, which has access through the Staffing Agreement with OFSC to the resources and expertise of OFS's investment professionals. As of December 31, 2017, OFS's credit and investment professionals (including all investment committee members) employed by OFSC had an average of over 15 years of investment experience with strong institutional backgrounds.

Significant Investment Capacity. The net proceeds of equity and debt offerings and borrowing capacity under our credit facilities will provide us with a substantial amount of capital available for deployment into new investment opportunities in our targeted asset class.

Scalable Infrastructure Supporting the Entire Investment Cycle. We believe that our loan acquisition, origination and sourcing, underwriting, administration and management platform is highly scalable (that is, it can be expanded on a cost-efficient basis within a timeframe that meets the demands of business growth). Our platform extends beyond origination and sourcing and includes a regimented credit monitoring system. We believe that our careful approach, which involves ongoing review and analysis by an experienced team of professionals, should enable us to identify problems early and to assist borrowers before they face difficult liquidity constraints.

Extensive Loan Sourcing Capabilities. OFS Advisor gives us access to the deal flow of OFS. We believe OFS's 20-year history as a middle-market lending platform and its market position make it a leading lender to many sponsors and other deal sources, especially in the currently under-served lending environment, and we have extensive relationships with potential borrowers and other lenders.

Structuring with a High Level of Service and Operational Orientation. We provide client-specific and creative financing structures to our portfolio companies. Based on our experience in lending to and investing in middle-market companies, we believe that the middle-market companies we target, as well as sponsor groups we may pursue, require a higher level of service, creativity and knowledge than has historically been provided by other service providers more accustomed to participating in commodity-like loan transactions.

Rigorous Credit Analysis and Approval Procedures. OFS Advisor utilizes the established, disciplined investment process of OFS for reviewing lending opportunities, structuring transactions and monitoring investments. Using OFS's disciplined approach to lending, OFS Advisor seeks to minimize credit losses through effective underwriting, comprehensive due diligence investigations, structuring and, where appropriate, the implementation of restrictive debt covenants.

Structure of Investments

We anticipate that our loan portfolio will continue to contain investments of the following types with the following characteristics:

Senior Secured First-Lien Loans. First-lien senior secured loans comprise, and will continue to comprise, a significant portion of our investment portfolio. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans (in certain cases, subject to a payment waterfall). The collateral takes the form of first-priority liens on specified assets of the portfolio company borrower and, typically, first-priority pledges of the ownership interests in the borrower. Our first lien loans may provide for moderate loan amortization in the early years of the loan, with the majority of the amortization deferred until loan maturity. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in the financial statements included elsewhere in this prospectus supplement.

S-5

TABLE OF CONTENTS

Senior Secured Unitranche Loans. Unitranche loans are loans that combine both senior and subordinated debt into one loan under which the borrower pays a single blended interest rate that is intended to reflect the relative risk of the secured and unsecured components. We typically structure our unitranche loans as senior secured loans. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans. This collateral takes the form of first-priority liens on the assets of a portfolio company and, typically, first-priority pledges of the ownership interests in the company. We believe that unitranche lending represents a significant growth opportunity for us, offering the borrower the convenience of dealing with one lender, which may result in a higher blended rate of interest to us than we might realize in a traditional multi-tranche structure. Unitranche loans typically provide for moderate loan amortization in the initial years of the facility, with the majority of the amortization deferred until loan maturity. Unitranche loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. In many cases, we will be the sole lender, or we, together with our affiliates, will be the sole lender, of unitranche loans, which can afford us additional influence with a borrower in terms of monitoring and, if necessary, remediation in the event of under performance. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in the financial statements included elsewhere in this prospectus supplement.

Senior Secured Second-lien Loans. Second-lien senior secured loans obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of such loans. This collateral typically takes the form of second-priority liens on the assets of a portfolio company, and we may enter into an inter-creditor agreement with the holders of the portfolio company's first-lien senior secured debt. These loans typically provide for no contractual loan amortization in the initial years of the facility, with all amortization deferred until loan maturity. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in the financial statements included elsewhere in this prospectus supplement.

Subordinated ("Mezzanine") Loans. These investments are typically structured as unsecured, subordinated loans that typically provide for relatively high, fixed interest rates that provide us with significant current interest income. These loans typically will have interest-only payments (often representing a combination of cash pay and payment-in-kind ("PIK") interest) in the early years, with amortization of principal deferred to maturity. Mezzanine loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. Mezzanine investments are generally more volatile than secured loans and may involve a greater risk of loss of principal. Mezzanine loans often include a PIK feature (meaning a feature allowing for the payment of interest in the form of additional principal amount of the loan instead of in cash), which effectively operates as negative amortization of loan principal, thereby increasing credit risk exposure over the life of the loan. These loans are categorized as Subordinated Loans in our consolidated schedule of investments included in the financial statements included elsewhere in this prospectus supplement.

Equity Securities. Equity securities typically consist of either a direct minority equity investment in common or membership/partnership interests or preferred stock of a portfolio company and are typically not control-oriented investments. Our preferred equity investments typically contain a fixed dividend yield based on the par value of the equity security. Preferred equity dividends may be paid in cash at a stipulated date, usually quarterly and are participating and/or cumulative. We may structure such equity investments to include provisions protecting our rights as a minority-interest holder, as well as a "put," or right to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and "piggyback" registration rights, which grants us the right to register our equity interest when either the portfolio company or another investor in the portfolio company files a registration statement with the SEC to issue securities. Our equity investments typically are made in connection with debt investments to the same portfolio companies. These securities are categorized as Preferred Equity or Common Equity in our consolidated schedule of investments included in the financial statements included elsewhere in this prospectus supplement.

TABLE OF CONTENTS

Warrants. In some cases, we may receive nominally priced warrants to buy a minority equity interest in the portfolio company in connection with a loan. As a result, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure such warrants to include provisions protecting our rights as a minority-interest holder, as well as a put to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and “piggyback” registration rights. These securities are categorized as Warrants in our consolidated schedule of investments included in the financial statements included elsewhere in this prospectus supplement.

General Structuring Considerations. We tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its operating results. We seek to limit the downside potential of our investments by:

- selecting investments that we believe have a very low probability of loss;
- requiring a total return on our investments (including both interest and potential equity appreciation) that we believe will compensate us appropriately for credit risk; and
- negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with the preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or rights to a seat on the board of directors under some circumstances.

We expect to hold most of our investments to maturity or repayment, but we may sell some of our investments earlier if a liquidity event occurs, such as a sale, recapitalization or worsening of the credit quality of the portfolio company.

Investments

We pursue an investment strategy focused primarily on investments in middle-market companies in the United States. We focus on investments in loans, in which OFS Advisor’s investment professionals have expertise, including investments in first-lien, unitranche, second-lien, and mezzanine loans and, to a lesser extent, on warrants and other equity securities. We seek to create a diverse portfolio by making investments in the securities of middle-market companies that we expect to range generally from \$3.0 million to \$25.0 million each, although we expect this investment size will vary proportionately with the size of our capital base.

Competition

Our primary competitors include public and private funds, other BDCs, commercial and investment banks, commercial finance companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical, and marketing resources than we do. Some competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Further, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC, or to the distribution and other requirements we must satisfy to maintain our RIC status.

We expect to continue to use the expertise of the investment professionals of OFS and its affiliates to which we have access, to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we expect that the relationships of the senior members of OFS and its affiliates will enable us to learn about, and compete effectively for, financing opportunities with attractive middle-market companies in the industries in which we seek to invest. For additional information

S-7

TABLE OF CONTENTS

concerning the competitive risks we face, see “Risk Factors — Risks Related to Our Business and Structure — We operate highly competitive market for investment opportunities, which could reduce returns and result in losses” in the accompanying prospectus.

Conflicts of Interests

Subject to certain 1940 Act restrictions on co-investments with affiliates, OFS Advisor will offer us the right to participate in investment opportunities that it determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors. Such offers will be subject to the exception that, in accordance with OFS Advisor’s allocation policy, we might not participate in each individual opportunity but will, on an overall basis, be entitled to participate fairly and equitably with other entities managed by OFS Advisor and its affiliates.

To the extent that we compete with entities managed by OFS Advisor or any of its affiliates for a particular investment opportunity, OFS Advisor will allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (a) its internal allocation policy, (b) the requirements of the Advisers Act, and (c) certain restrictions under the 1940 Act and rules thereunder regarding co-investments with affiliates. OFS Advisor’s allocation policy is intended to ensure that we may generally share fairly and equitably with other investment funds or other investment vehicles managed by OFS Advisor or its affiliates in investment opportunities that OFS Advisor determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors, particularly those involving a security with limited supply or involving differing classes of securities of the same issuer that may be suitable for us and such other investment funds or other investment vehicles. Under this allocation policy, if two or more investment vehicles with similar or overlapping investment strategies are in their investment periods, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

- investment guidelines and/or restrictions, if any, set forth in the applicable organizational, offering or similar documents for the investment vehicles;
- risk and return profile of the investment vehicles;
- suitability/priority of a particular investment for the investment vehicles;
- if applicable, the targeted position size of the investment for the investment vehicles;
- level of available cash for investment with respect to the investment vehicles;
- total amount of funds committed to the investment vehicles; and
- the age of the investment vehicles and the remaining term of their respective investment periods, if any.

In situations where co-investment with such other accounts is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, OFS Advisor will need to decide which account will proceed with the investment. The decision by OFS Advisor to allocate an opportunity to another entity could cause us to forego an investment opportunity that we otherwise would have made. See “Related-Party Transactions and Certain Relationships” in the accompanying prospectus.

General Information

Our principal executive offices are located at 10 S. Wacker Drive, Suite 2500, Chicago, IL, 60606, and our telephone number is (847) 734-2000. Information contained in our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus, and you should not consider that information to be part of this prospectus supplement or the accompanying prospectus.

We file annual, quarterly and current periodic reports, proxy statements and other information with the SEC under the Securities Exchange Act of 1934, as amended, which we refer to as the Exchange Act. This information is available at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549.

S-8

TABLE OF CONTENTS

You may obtain information about the operation of the SEC's public reference room by calling the SEC at (800) SEC-0330. In addition, the SEC maintains an Internet website, at www.sec.gov, that contains reports, proxy and information statements, and other information regarding issuers, including us, who file documents electronically with the SEC.

Risks

Investing in our securities may be speculative and involves certain risks relating to our structure and our investment objective that you should consider before deciding whether to invest. See "Risk Factors" beginning on page S-20 of this prospectus supplement and "Risk Factors" beginning on page 16 of the accompanying prospectus for a more detailed discussion of material risks you should carefully consider before deciding to invest in our securities.

Recent Developments

On February 12, 2018, the Board declared a special distribution of \$0.37 per share payable on March 29, 2018 to stockholders of record as of March 22, 2018. In addition, on February 27, 2018, the Company's Board declared a distribution of \$0.34 per share for the first quarter of 2018, payable on March 29, 2018 to stockholders of record as of March 22, 2018.

TABLE OF CONTENTS

SPECIFIC TERMS OF THE NOTES AND THE OFFERING

This summary sets forth certain terms of the Notes that we are offering pursuant to this prospectus supplement and the accompanying prospectus. This section and the “Description of the Notes” section in this prospectus supplement outline the specific legal and financial terms of the Notes. You should read this section of the prospectus supplement together with the section titled “Description of the Notes” beginning on page S-52 of this prospectus supplement and the more general description of the Notes in the section titled “Description of Our Debt Securities” beginning on page 130 of the accompanying prospectus before investing in the Notes. Capitalized terms used in this prospectus supplement and not otherwise defined have the meanings ascribed to them in the accompanying prospectus or in the indenture governing the Notes.

Issuer

OFS Capital Corporation

Title of the securities

% Notes due 2025

Initial aggregate principal amount being offered

\$

Over-allotment option

The underwriters may also purchase from us up to an additional \$ million aggregate principal amount of Notes offered by this prospectus supplement and the accompanying prospectus on or before April 30, 2018.

Initial public offering price

% of the aggregate principal amount

Principal payable at maturity

100% of the aggregate principal amount; the principal amount of each Note will be payable on its stated maturity date at the office of the trustee, paying agent, and security registrar for the Notes or at such other office as we may designate.

Type of note

Fixed-rate note

Listing

We intend to list the Notes on The Nasdaq Global Select Market within 30 days of the original issue date under the trading symbol “OFSL”.

Interest rate

% per year

Day count basis

360-day year of twelve 30-day months

Original issue date

, 2018

Stated maturity date

, 2025

Date interest starts accruing interest

, 2018

Interest payment dates

Every January 31, April 30, July 31 and October 31, commencing July 31, 2018. If an interest payment date falls on a non-business day, the applicable interest payment will be made on the next business day and no additional interest will accrue as a result of such delayed payment.

Interest periods

The initial interest period will be the period from and including , 2018, to, but excluding, the initial interest payment date, and the subsequent interest periods will be the periods from and including an interest payment date to, but excluding, the next interest payment date or the stated maturity date, as the case may be.

Regular record dates for interest payments

Every January 15, April 15, July 15 and October 15, commencing July 15, 2018.

S-10

TABLE OF CONTENTS

Specified currency

U.S. Dollars

Place of payment

The City of New York and/or such other places that may be specified in the indenture or a notice to holders.

Ranking of notes

The Notes will be our direct unsecured obligations and will rank:

- pari passu, or equal, with any future unsecured, unsubordinated indebtedness;

- senior to any of our future indebtedness that expressly provides it is subordinated to the Notes;

- effectively subordinated to all of our existing and future secured indebtedness (including indebtedness that is initially unsecured in respect of which we subsequently grant a security interest), to the extent of the value of the assets securing such indebtedness, including, without limitation, borrowings under the PWB Credit Facility, of which \$38.2 million was outstanding as of April 9, 2018; and

- structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, including the SBA-guaranteed debentures issued by SBIC I LP, which, as of April 9, 2018, had total indebtedness outstanding of \$149.9 million.

Effective subordination means that in any liquidation, dissolution, bankruptcy or other similar proceeding, the holders of any of our existing or future secured indebtedness and the secured indebtedness of our subsidiaries may assert rights against the assets pledged to secure that indebtedness in order to receive full payment of their indebtedness before the assets may be used to pay other creditors. Structural subordination means that creditors of a parent entity are subordinate to creditors of a subsidiary entity with respect to the subsidiary's assets.

Denominations

We will issue the Notes in denominations of \$25 and integral multiples of \$25 in excess thereof.

Business day

Each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in the City of New York or another place of payment are authorized or obligated by law or executive order to close.

Optional redemption

The Notes may be redeemed in whole or in part at any time or from time to time at our option on or after _____ upon not less than 30 days nor more than 60 days written notice by mail prior to the date fixed for redemption thereof, at a redemption price of 100% of the outstanding principal amount of the Notes plus accrued and unpaid interest payments otherwise payable for the then-current quarterly interest period accrued to, but excluding, the date fixed for redemption.

You may be prevented from exchanging or transferring the Notes when they are subject to redemption. In case any Notes are to be redeemed in part only, the redemption notice will provide that, upon surrender of such Note, you will receive, without a charge, a new Note or Notes of authorized denominations representing the principal amount of your remaining unredeemed Notes.

S-11

TABLE OF CONTENTS

Any exercise of our option to redeem the Notes will be done in compliance with the 1940 Act.

If we redeem only some of the Notes, the trustee or DTC, as applicable, will determine the method for selection of the particular Notes to be redeemed, in accordance with the indenture governing the Notes and in accordance with the rules of any national securities exchange or quotation system on which the Notes are listed. Unless we default in payment of the redemption price, on and after the date of redemption, interest will cease to accrue on the Notes called for redemption.

Sinking fund

The Notes will not be subject to any sinking fund.

Repayment at option of holders

Holders will not have the option to have the Notes repaid prior to the stated maturity date.

Defeasance

The Notes are subject to defeasance by us. “Defeasance” means that, by depositing with a trustee an amount of cash and/or government securities sufficient to pay all principal and interest, if any, on the Notes when due and satisfying any additional conditions required under the indenture relating to the Notes, we will be deemed to have been discharged from our obligations under the Notes. See “Description of the Notes — Defeasance” in this prospectus supplement.

Covenant defeasance

The Notes are subject to covenant defeasance by us. In the event of a “covenant defeasance,” upon depositing such funds and satisfying conditions similar to those for defeasance we would be released from certain covenants under the indenture relating to the Notes. The consequences to the holders of the Notes would be that, while they would no longer benefit from certain covenants under the indenture, and while the Notes could not be accelerated for any reason, the holders of the Notes nonetheless could look to the Company for repayment of the Notes if there were a shortfall in the funds deposited with the trustee or the trustee is prevented from making a payment. See “Description of the Notes — Defeasance” in this prospectus supplement.

Form of notes

The Notes will be represented by global securities that will be deposited and registered in the name of DTC or its nominee. This means that, except in limited circumstances, you will not receive certificates for the Notes. Beneficial interests in the Notes will be represented through book-entry accounts of financial institutions acting on behalf of beneficial owners as direct and indirect participants in DTC. Investors may elect to hold interests in the Notes through either DTC, if they are a participant, or indirectly through organizations that are participants in DTC.

Trustee, paying agent, and security registrar

U.S. Bank National Association

Other covenants

In addition to any covenants described elsewhere in this prospectus supplement or the accompanying prospectus, the following covenants will apply to the Notes:

-

We agree that for the period of time during which Notes are outstanding, we will not violate

TABLE OF CONTENTS

Section 18(a)(1)(A) as modified by such provisions of Section 61(a) as may be applicable to the Company from time to time of the 1940 Act or any successor provisions, whether or not we continue to be subject to such provisions of the 1940 Act, but giving effect, in either case, to any exemptive relief granted to us by the SEC.

These provisions generally prohibit us from incurring additional borrowings, including through the issuance of additional debt securities, unless our asset coverage, as defined in the 1940 Act, equals at least 200% (or 150% if certain requirements are met) after such borrowings. See “Risk Factors — Risks Related to the Notes — Recent legislation may allow us to incur additional leverage” in this prospectus supplement;

- We agree that for the period of time during which Notes are Outstanding, the Company will not declare any dividend (except a dividend payable in stock of the issuer), or declare any other distribution, upon a class of the capital stock of the Company, or purchase any such capital stock, unless, in every such case, at the time of the declaration of any such dividend or distribution, or at the time of any such purchase, the Company has an asset coverage (as defined in the 1940 Act) of at least the threshold specified in Section 18(a)(1)(B) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to the Company from time to time or any successor provisions thereto of the 1940 Act, as such obligation may be amended or superseded, after deducting the amount of such dividend, distribution or purchase price, as the case may be, and in each case giving effect to (i) any exemptive relief granted to the Company by the Commission, and (ii) any SEC no-action relief granted by the Commission to another BDC (or to the Company if it determines to seek such similar no-action or other relief) permitting the BDC to declare any cash dividend or distribution notwithstanding the prohibition contained in Section 18(a)(1)(B) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to the Company from time to time, as such obligation may be amended or superseded, in order to maintain such BDC’s status as a regulated investment company under Subchapter M of the Code; and

- If, at any time, we are not subject to the reporting requirements of Sections 13 or 15(d) of the Securities Exchange Act of 1934 (the “Exchange Act”), to file any periodic reports with the SEC, we agree to furnish to holders of the Notes and the trustee, for the period of time during which the Notes are outstanding, our audited annual consolidated financial statements, within 90 days of our fiscal year end, and unaudited interim consolidated financial statements, within 45 days of our fiscal quarter end (other than our fourth fiscal quarter). All such financial statements will be prepared, in all material respects, in accordance with applicable Generally

TABLE OF CONTENTS

Accepted Accounting Principles in the United States of America, or U.S. GAAP.

Events of default

You will have rights if an Event of Default occurs with respect to the Notes and is not cured.

The term “Event of Default” in respect of the Notes means any of the following:

- We do not pay the principal of any Note when due and payable at maturity;
- We do not pay interest on any Note when due and payable, and such default is not cured within 30 days of its due date;
- We remain in breach of any other covenant in respect of the Notes for 60 days after we receive a written notice of default stating we are in breach (the notice must be sent by either the trustee or holders of at least 25% of the principal amount of the outstanding Notes);
- We file for bankruptcy or certain other events of bankruptcy, insolvency or reorganization occur and remain undischarged or unstayed for a period of 60 days; or
- On the last business day of each of twenty-four consecutive calendar months, the Notes have an asset coverage of less than 100%, giving effect to any exemptive relief granted to us by the SEC.

Further issuances

We have the ability to issue additional debt securities under the indenture with terms different from the Notes and, without the consent of the holders of the Notes, to reopen the Notes and issue additional Notes. If we issue additional debt securities, these additional debt securities could have a lien or other security interest greater than that accorded to the holders of the Notes, which are unsecured.

Use of proceeds

We estimate that the net proceeds we will receive from the sale of the Notes will be approximately \$ million (or approximately \$ million if the underwriters exercise their over-allotment option in full) based on a public offering price of \$ per Note, after deducting the underwriting discount of \$ (or approximately \$ if the underwriters exercise their over-allotment option) payable by us and estimated offering expenses of approximately \$350,000 payable by us. We may change the size of this offering based on demand and market conditions.

We intend to use the net proceeds from this offering to fund investments in debt and equity securities in accordance with our investment objective and for other general corporate purposes.

We also intend to use a portion of the net proceeds from this offering to repay outstanding indebtedness under the PWB Credit Facility. As of April 9, 2018, we had \$38.2 million of indebtedness outstanding under the PWB Credit Facility, which bore interest at a rate of 5.50% as of such date. The PWB Credit Facility matures on January 31, 2020.

S-14

TABLE OF CONTENTS

Governing law

The Notes and the indenture will be governed by and construed in accordance with the laws of the State of New York.

Global clearance and settlement procedures

Interests in the Notes will trade in DTC's Same Day Funds Settlement System, and any permitted secondary market trading activity in such Notes will, therefore, be required by DTC to be settled in immediately available funds. None of the Company, the trustee or the paying agent will have any responsibility for the performance by DTC or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

Number of portfolio companies at period end	37	41	39	62	58

(1)

The determination of the tax attributes of our distributions is made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of our distributions for a full year. The return of capital portion of these distributions for the years ended December 31, 2017, 2016, 2015, 2014, and 2013, was \$0, \$0.09, \$0.23, \$0.72, and \$0.40, respectively.

(2)

On January 1, 2016, we adopted Accounting Standards Update (“ASU”) 2015-03 which requires that debt issuance costs related to a recognized debt liability to be presented on the balance sheet as a direct deduction from the carrying amount of the debt liability rather than as an asset. Adoption of ASU 2015-03 requires the changes to be applied retrospectively.

(3)

The weighted average yield on our performing debt investments is computed as (a) the annual stated accruing interest on our debt investments at the balance sheet date, plus the annualized accretion of loan origination fees, original issue discount, market discount or premium, and loan amendment fees divided by (b) amortized cost of our debt investments, excluding assets in non-accrual status as of the balance sheet date.

(4)

The weighted average yield on our total debt investments is computed as (a) the annual stated accruing interest on our debt investments at the balance sheet date, plus the annualized accretion of loan origination fees, original issue discount, market discount or premium, and loan amendment fees divided by (b) amortized cost of our debt investments, including debt investments in non-accrual status as of the balance sheet date.

(5)

The weighted average yield on total investments is computed as (a) the annual stated accruing interest on our debt investments at the balance sheet date, plus the annualized accretion of loan origination fees, original issue discount, market discount or premium, and loan amendment fees, plus the cash effective yield on our performing preferred

equity investments divided by (b) amortized cost of our total investment portfolio, including debt investments in non-accrual status basis as of the balance sheet date.

(6)

The weighted average yield of our investments is not the same as a return on investment for our stockholders but, rather, the gross investment income from our investment portfolio before the payment of all of our fees and expenses. There can be no assurance that the weighted average yield will remain at its current level.

(2)

Based on shares outstanding at the end of the respective period.

RATIO OF EARNINGS TO FIXED CHARGES

The following table contains our ratio of earnings to fixed charges for the periods indicated, computed as set forth below. You should read these ratios of earnings to fixed charges in connection with our consolidated financial statements, including the notes to those statements, included in this prospectus supplement and the accompanying prospectus.

	For the Year Ended December 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013
Earnings to Fixed Charges(1)	2.36	3.61	3.52	2.58	2.42

For purposes of computing the ratios of earnings to fixed charges, earnings represent net increase in net assets resulting from operations plus (or minus) income tax expense (benefit) including excise tax expense plus fixed charges. Fixed charges include interest and credit facility fees expense and amortization of debt issuance costs.

(1)

Earnings include net realized and unrealized gains or losses. Net realized and unrealized gains or losses can vary substantially from period to period.

TABLE OF CONTENTS

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

In addition to factors identified elsewhere in this prospectus supplement and the accompanying prospectus, including the “Risks Factors” section of this prospectus supplement and the “Risk Factors” section of the accompanying prospectus, the following factors, among others, could cause actual results to differ materially from forward-looking statements or historical performance:

- our ability and experience operating a BDC or an SBIC, or maintaining our tax treatment as a RIC under Subchapter M of the Code;
- our dependence on key personnel;
- our ability to maintain or develop referral relationships;
- our ability to replicate historical results;
- the ability of OFS Advisor to identify, invest in and monitor companies that meet our investment criteria;
- actual and potential conflicts of interest with OFS Advisor and other affiliates of OFSAM;
- constraint on investment due to access to material nonpublic information;
- restrictions on our ability to enter into transactions with our affiliates;
- limitations on the amount of SBA-guaranteed debentures that may be issued by an SBIC;
- our ability to comply with SBA regulations and requirements;
- the use of borrowed money to finance a portion of our investments;
- competition for investment opportunities;
- the ability of SBIC I LP to make distributions enabling us to meet RIC requirements;
- our ability to raise debt or equity capital as a BDC;
- the timing, form and amount of any distributions from our portfolio companies;

- the impact of a protracted decline in the liquidity of credit markets on our business;
- the general economy and its impact on the industries in which we invest;
- uncertain valuations of our portfolio investments; and
- the effect of new or modified laws or regulations governing our operations.

This prospectus supplement and the accompanying prospectus, and other statements that we may make, may contain forward-looking statements with respect to future financial or business performance, strategies or expectations.

Forward-looking statements are typically identified by words or phrases such as “trend,” “opportunity,” “pipeline,” “believe,” “comfortable,” “expect,” “anticipate,” “current,” “intention,” “estimate,” “position,” “assume,” “potential,” “outlook,” “continue,” “maintain,” “sustain,” “seek,” “achieve” and similar expressions, or future or conditional verbs such as “will,” “would,” “should,” “could,” “may” or similar expressions.

Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made, and we assume no duty to and do not undertake to update forward-looking statements. These forward-looking statements do not meet the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act or Section 21E of the Exchange Act. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

S-19

TABLE OF CONTENTS

RISK FACTORS

Investing in the Notes involves a number of significant risks. In addition to the other information contained in this prospectus supplement and the accompanying prospectus, you should consider carefully the following information before making an investment. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us might also impair our operations and performance. If any of the following events occur, our business, financial condition and results of operations could be materially and adversely affected. In such case, our net asset value could decline, and you may lose all or part of your investment.

Risks Related to the Notes

The Notes will be unsecured and therefore will be effectively subordinated to any secured indebtedness we have currently incurred or may incur in the future and will rank pari passu with, or equal to, all outstanding and future unsecured indebtedness issued by us and our general liabilities.

The Notes will not be secured by any of our assets or any of the assets of any of our subsidiaries. As a result, the Notes will be effectively subordinated to any secured indebtedness we or our subsidiaries have outstanding as of the date of this prospectus supplement (including the PWB Credit Facility) or that we or our subsidiaries may incur in the future (or any indebtedness that is initially unsecured as to which we subsequently grant a security interest) to the extent of the value of the assets securing such indebtedness. In any liquidation, dissolution, bankruptcy or other similar proceeding, the holders of any of our secured indebtedness or secured indebtedness of our subsidiaries may assert rights against the assets pledged to secure that indebtedness in order to receive full payment of their indebtedness before the assets may be used to pay other creditors, including the holders of the Notes. As of April 9, 2018, we had \$38.2 million in outstanding indebtedness under the PWB Credit Facility. The indebtedness under the PWB Credit Facility is effectively senior to the Notes to the extent of the value of the assets securing such indebtedness.

The Notes will be structurally subordinated to the indebtedness and other liabilities of our subsidiaries.

The Notes will be obligations exclusively of OFS Capital Corporation, and not of any of our subsidiaries. None of our subsidiaries will be a guarantor of the Notes, and the Notes will not be required to be guaranteed by any subsidiary we may acquire or create in the future. Any assets of our subsidiaries will not be directly available to satisfy the claims of our creditors, including holders of the Notes. Except to the extent we are a creditor with recognized claims against our subsidiaries, all claims of creditors of our subsidiaries will have priority over our equity interests in such entities (and therefore the claims of our creditors, including holders of the Notes) with respect to the assets of such entities. Even if we are recognized as a creditor of one or more of these entities, our claims would still be effectively subordinated to any security interests in the assets of any such entity and to any indebtedness or other liabilities of any such entity senior to our claims. Consequently, the Notes will be structurally subordinated to all indebtedness and other liabilities, including trade payables, of any of our existing or future subsidiaries, including SBIC I LP. As of April 9, 2018, our subsidiaries had total indebtedness outstanding of \$149.9 million. Certain of these entities currently serve as guarantors under the PWB Credit Facility, and in the future our subsidiaries may incur substantial additional indebtedness, all of which is and would be structurally senior to the Notes.

The indenture under which the Notes will be issued contains limited protection for holders of the Notes.

The indenture under which the Notes will be issued offers limited protection to holders of the Notes. The terms of the indenture and the Notes do not restrict our or any of our subsidiaries' ability to engage in, or otherwise be a party to, a variety of corporate transactions, circumstances or events that could have a material adverse impact on your investment in the Notes. In particular, the terms of the indenture and the Notes will not place any restrictions on our or our subsidiaries' ability to:

- issue securities or otherwise incur additional indebtedness or other obligations, including (1) any indebtedness or other obligations that would be equal in right of payment to the Notes, (2) any indebtedness or other obligations that would be secured and therefore rank effectively senior in right of payment to the Notes to the extent of the values of the assets securing such debt,

TABLE OF CONTENTS

(3) indebtedness of ours that is guaranteed by one or more of our subsidiaries and which therefore is structurally senior to the Notes and (4) securities, indebtedness or obligations issued or incurred by our subsidiaries that would be senior to our equity interests in those entities and therefore rank structurally senior to the Notes with respect to the assets of our subsidiaries, in each case other than an incurrence of indebtedness or other obligation that would cause a violation of Section 18(a)(1)(A) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to us from time to time or any successor provisions, whether or not we continue to be subject to such provisions of the 1940 Act, but giving effect, in each case, to any exemptive relief granted to us by the SEC. Currently, these provisions generally prohibit us from making additional borrowings, including through the issuance of additional debt or the sale of additional debt securities, unless our asset coverage, as defined in the 1940 Act, equals at least 200% (or 150% if certain requirements are met) after such borrowings. See “— Recent legislation may allow us to incur additional leverage” below;

- pay dividends on, or purchase or redeem or make any payments in respect of, capital stock or other securities ranking junior in right of payment to the Notes, including subordinated indebtedness, in each case other than dividends, purchases, redemptions or payments that would cause our asset coverage to fall below the threshold specified in Section 18(a)(1)(B) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to us from time to time or any successor provisions, giving effect to (i) any exemptive relief granted to us by the SEC and (ii) no-action relief granted by the SEC to another BDC (or to us if we determine to seek such similar no-action or other relief) permitting the BDC to declare any cash dividend or distribution notwithstanding the prohibition contained in Section 18(a)(1)(B) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to us from time to time in order to maintain the BDC’s status as a RIC under Subchapter M of the Code. These provisions generally prohibit us from declaring any cash dividend or distribution upon any class of our capital stock, or purchasing any such capital stock if our asset coverage, as defined in the 1940 Act, is below 200% (or 150% if certain requirements are met) at the time of the declaration of the dividend or distribution or the purchase and after deducting the amount of such dividend, distribution or purchase;
- sell assets (other than certain limited restrictions on our ability to consolidate, merge or sell all or substantially all of our assets);
- enter into transactions with affiliates;
- create liens (including liens on the shares of our subsidiaries) or enter into sale and leaseback transactions;
- make investments; or
- create restrictions on the payment of dividends or other amounts to us from our subsidiaries.

In addition, the indenture (as defined in “Description of the Notes”) will not require us to make an offer to purchase the Notes in connection with a change of control or any other event.

Furthermore, the terms of the indenture and the Notes do not protect holders of the Notes in the event that we experience changes (including significant adverse changes) in our financial condition, results of operations or credit ratings, if any, as they do not require that we or our subsidiaries adhere to any financial tests or ratios or specified levels of net worth, revenues, income, cash flow, or liquidity.

Our ability to recapitalize, incur additional debt (including additional debt that matures prior to the maturity of the Notes), and take a number of other actions that are not limited by the terms of the Notes may have important

consequences for you as a holder of the Notes, including making it more difficult for us to satisfy our obligations with respect to the Notes or negatively affecting the trading value of the Notes.

Other debt we issue or incur in the future could contain more protections for its holders than the indenture and the Notes, including additional covenants and events of default. The issuance or incurrence of any such debt with incremental protections could affect the market for, trading levels, and prices of the Notes.

S-21

TABLE OF CONTENTS

There is no existing trading market for the Notes and, even if The Nasdaq Global Select Market approves the listing of the Notes, an active trading market for the Notes may not develop, which could limit your ability to sell the Notes and/or the market price of the Notes.

The Notes will be a new issue of debt securities for which there initially will not be a trading market. We intend to list the Notes on The Nasdaq Global Select Market within 30 days of the original issue date under the symbol "OFSL". However, there is no assurance that the Notes will be approved for listing on The Nasdaq Global Select Market. Moreover, even if the listing of the Notes is approved, we cannot provide any assurances that an active trading market will develop or be maintained for the Notes or that you will be able to sell your Notes. If the Notes are traded after their initial issuance, they may trade at a discount from their initial offering price depending on prevailing interest rates, the market for similar securities, our credit ratings, if any, general economic conditions, our financial condition, performance and prospects and other factors. The underwriters have advised us that they intend to make a market in the Notes, but they are not obligated to do so. The underwriters may discontinue any market-making in the Notes at any time at their sole discretion.

Accordingly, we cannot assure you that the Notes will be approved for listing on The Nasdaq Global Select Market, that a liquid trading market will develop or be maintained for the Notes, that you will be able to sell your Notes at a particular time or that the price you receive when you sell will be favorable. To the extent an active trading market does not develop, the liquidity and trading price for the Notes may be harmed. Accordingly, you may be required to bear the financial risk of an investment in the Notes for an indefinite period of time.

Our amount of debt outstanding will increase as a result of this offering, and if we default on our obligations to pay our other indebtedness, we may not be able to make payments on the Notes.

As of April 9, 2018, we had approximately \$38.2 million of indebtedness outstanding under the PWB Credit Facility. Any default under the agreements governing our indebtedness, including a default under the PWB Credit Facility or other indebtedness to which we may be a party that is not waived by the required lenders, and the remedies sought by lenders or the holders of such indebtedness could make us unable to pay principal, premium, if any, and interest on the Notes and substantially decrease the market value of the Notes. If we are unable to generate sufficient cash flow and are otherwise unable to obtain funds necessary to meet required payments of principal, premium, if any, and interest on our indebtedness, or if we otherwise fail to comply with the various covenants, including financial and operating covenants, in the instruments governing our indebtedness (including the PWB Credit Facility), we could be in default under the terms of the agreements governing such indebtedness, including the Notes. In the event of such default, the holders of such indebtedness could elect to declare all the funds borrowed thereunder to be due and payable, together with accrued and unpaid interest, the lenders under the PWB Credit Facility or other debt we may incur in the future could elect to terminate their commitment, cease making further loans and institute foreclosure proceedings against our assets, and we could be forced into bankruptcy or liquidation.

Our ability to generate sufficient cash flow in the future is, to some extent, subject to general economic, financial, competitive, legislative and regulatory factors as well as other factors that are beyond our control. We cannot assure you that our business will generate cash flow from operations, or that future borrowings will be available to us under the PWB Credit Facility or otherwise, in an amount sufficient to enable us to meet our payment obligations under the Notes, our other debt, and to fund other liquidity needs.

If our operating performance declines and we are not able to generate sufficient cash flow to service our debt obligations, we may in the future need to refinance or restructure our debt, including any Notes sold, sell assets, reduce or delay capital investments, seek to raise additional capital or seek to obtain waivers from the lenders under the PWB Credit Facility or other debt that we may incur in the future to avoid being in default. If we are unable to implement one or more of these alternatives, we may not be able to meet our payment obligations under the Notes and our other debt. If we breach our covenants under the PWB Credit Facility or any of our other debt and seek a waiver, we may not be able to obtain a waiver from the required lenders or holders thereof. If this occurs, we would be in default under the PWB Credit Facility or other debt, the lenders or holders could exercise rights as described above, and we could be forced into

TABLE OF CONTENTS

bankruptcy or liquidation. If we are unable to repay debt, lenders having secured obligations could proceed against the collateral securing the debt, including the PWB Credit Facility. Because the PWB Credit Facility has, and any future credit facilities will likely have, customary cross-default provisions, if we have a default under the terms of the Notes, the obligations under the PWB Credit Facility or any future credit facility may be accelerated and we may be unable to repay or finance the amounts due.

Legislative or regulatory tax changes could adversely affect investors.

Changes in tax laws, regulations or administrative interpretations or any amendments thereto could adversely affect us, the entities in which we invest, or our noteholders. In particular, on December 22, 2017, the Tax Cuts and Jobs Act was signed into law. This tax legislation lowers the general federal corporate income tax rate from 35 percent to 21 percent, makes changes regarding the use of net operating losses, repeals the corporate alternative minimum tax and makes significant changes with respect to the U.S. international tax rules. In addition, the legislation generally requires a taxpayer that uses the accrual method of accounting for U.S. tax purposes to include certain amounts in income no later than the time such amounts are reflected on certain financial statements, which therefore if applicable could require us or a holder to accrue income earlier than under prior law, although the precise application of this rule is unclear at this time. The legislation also limits the amount or value of interest deductions of borrowers and in that way may potentially affect the loan market and our and our portfolio companies' use of leverage. For individual taxpayers, the legislation temporarily reduces the maximum individual income tax rate for taxable years 2018 through 2025. The impact of this new legislation on us, the entities in which we invest, and the holders of the Notes is uncertain. You are urged to consult with your tax advisor with respect to the impact of this legislation and the status of any other regulatory or administrative developments and proposals and their potential effect on your investment in the Notes.

We may choose to redeem the Notes when prevailing interest rates are relatively low.

On or after _____, we may choose to redeem the Notes from time to time, especially if prevailing interest rates are lower than the rate borne by the Notes. If prevailing rates are lower at the time of redemption, and we redeem the Notes, you likely would not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the interest rate on the Notes being redeemed. Our redemption right also may adversely impact your ability to sell the Notes as the optional redemption date or period approaches.

Recent legislation may allow us to incur additional leverage.

The 1940 Act generally prohibits us from incurring indebtedness unless immediately after such borrowing we have an asset coverage for total borrowings of at least 200% (i.e., the amount of debt may not exceed 50% of the value of our assets). However, recent legislation has modified the 1940 Act by allowing a BDC to increase the maximum amount of leverage it may incur from an asset coverage ratio of 200% to an asset coverage ratio of 150%, if certain requirements are met. Under the legislation, we are allowed to increase our leverage capacity if stockholders representing at least a majority of the votes cast, when quorum is met, approve a proposal to do so. If we receive stockholder approval, we would be allowed to increase our leverage capacity on the first day after such approval. Alternatively, the legislation allows a "required majority" (as defined in Section 57(o) of the 1940 Act) of our directors to approve an increase in our leverage capacity, and such approval would become effective after one year from the date of approval. In either case, we would be required to make certain disclosures on our website and in SEC filings regarding, among other things, the receipt of approval to increase our leverage, our leverage capacity and usage, and risks related to leverage.

As a result of this legislation, we may be able to increase our leverage up to an amount that reduces our asset coverage ratio from 200% to 150% (i.e., the amount of debt may not exceed 66 2/3% of the value of our assets). Leverage magnifies the potential for loss on investments in our indebtedness and on invested equity capital. As we use leverage to partially finance our investments, you will experience increased risks of investing in our securities. If the value of our assets increases, then the additional leverage would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not increased our leverage. Conversely, if the value of our assets decreases, the additional leverage would cause

TABLE OF CONTENTS

net asset value to decline more sharply than it otherwise would have had we not increased our leverage. Similarly, any increase in our income in excess of interest payable on the borrowed funds would cause our net investment income to increase more than it would without the additional leverage, while any decrease in our income would cause net investment income to decline more sharply than it would have had we not increased our leverage. Such a decline could negatively affect our ability to pay common stock dividends, scheduled debt payments or other payments related to our securities. Leverage is generally considered a speculative investment technique. See “Risk Factors — Risks Related to Our Business and Structure — We finance our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us” in the accompanying prospectus. In addition, the ability of BDCs to increase their leverage will increase the capital available to BDCs and thus competition for the investments that we seek to make. This may negatively impact pricing on the investments that we do make and adversely affect our net investment income and results of operations.

A downgrade, suspension or withdrawal of the credit rating assigned by a rating agency to us or our securities, if any, could cause the liquidity or market value of the Notes to decline significantly.

Our credit ratings, if any, are an assessment by rating agencies of our ability to pay our debts when due. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the Notes. These credit ratings may not reflect the potential impact of risks relating to the structure or marketing of the Notes. Credit ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization in its sole discretion. Neither we nor any underwriter undertakes any obligation to maintain our credit ratings or to advise holders of Notes of any changes in our credit ratings. There can be no assurance that our credit ratings will remain for any given period of time or that such credit ratings will not be lowered or withdrawn entirely by the rating agency if in their judgment future circumstances relating to the basis of the credit ratings, such as adverse changes in our company, so warrant.

Risks Related to Our Business and Structure

We have identified a material weakness in our internal control over financial reporting and our business and stock price may be adversely affected if we have not adequately addressed the weakness.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations.

As a result of our evaluation of our internal control over financial reporting for the year ended December 31, 2017, management identified a material weakness related to the design and operating effectiveness of controls over the reliability of financial information reported by portfolio companies that is used as financial inputs in the Company’s investment valuations.

The identification of the material weakness did not require a fourth quarter 2017 adjustment or impact any of our consolidated financial statements for any prior annual or interim periods and we are developing a remediation plan for this material weakness. Accordingly, management believes that the financial statements included in this prospectus supplement present fairly in all material respects the Company’s financial condition, results of operations and cash flows for the periods presented. We believe that the audited consolidated financial statements included in this prospectus supplement are accurate. If we cannot produce reliable financial reports, investors could lose confidence in our reported financial information, the market price of our stock could decline significantly, we may be unable to obtain additional financing to operate and expand our business, and our business and financial condition could be harmed.

The valuation process for certain of our portfolio holdings may create a conflict of interest.

Many of our portfolio investments are made in the form of securities that are not publicly traded. As a result, our board of directors will determine the fair value of these securities in good faith as described below in “Many of our portfolio investments are recorded at fair value as determined in good faith by our

TABLE OF CONTENTS

board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments.” In connection with that determination, investment professionals from OFS Advisor may provide our board of directors with portfolio company valuations based upon the most recent portfolio company financial statements available and projected financial results of each portfolio company. In addition, the members of our board of directors who are not independent directors have a substantial indirect pecuniary interest in OFS Advisor. The participation of the OFS Advisor’s investment professionals in our valuation process, and the indirect pecuniary interest in OFS Advisor by those members of our board of directors, could result in a conflict of interest since OFS Advisor’s management fee is based, in part, on our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity).

Our incentive fee structure may create incentives for OFS Advisor that are not fully aligned with the interests of our stockholders.

In the course of our investing activities, we will pay management and incentive fees to OFS Advisor. The base management fee is based on our total assets (other than cash and cash equivalents and the intangible asset and goodwill resulting from the SBIC Acquisition, but including assets purchased with borrowed amounts and including assets owned by any consolidated entity). As a result, investors in our common stock will invest on a “gross” basis and receive distributions on a “net” basis after expenses, resulting in a lower rate of return than one might achieve through direct investments. Because these fees are based on our total assets, other than cash and cash equivalents but including assets purchased with borrowed amounts and including any assets owned by any consolidated entity, OFS Advisor will benefit when we incur debt or use leverage. Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interests associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor’s services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors will consider whether our fees and expenses (including those related to leverage) remain appropriate. As a result of this arrangement, OFS Advisor or its affiliates may from time to time have interests that differ from those of our stockholders, giving rise to a conflict.

We may have additional conflicts related to other arrangements with OFS Advisor or its affiliates.

We have entered into a license agreement with OFSAM under which OFSAM has granted us a non-exclusive, royalty-free license to use the name “OFS.” See “Management and Other Agreements — License Agreement” in the accompanying prospectus. In addition, we pay to a subsidiary of OFSAM our allocable portion of overhead and other expenses incurred in performing its obligations under the Administration Agreement, such as rent and our allocable portion of the cost of our officers, including our chief executive officer, chief financial officer, chief compliance officer and chief accounting officer. This will create conflicts of interest that our board of directors must monitor. The lack of liquidity in our investments may adversely affect our business.

Substantially all of our assets are presently invested in illiquid securities, and a substantial portion of our investments in leveraged companies is subject to legal and other restrictions on resale or is otherwise less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded these investments. We may also face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we, OFS Advisor, OFSAM or any of its other affiliates have material nonpublic information regarding such portfolio company.

Uncertainty relating to the LIBOR calculation process may adversely affect the value of any portfolio of LIBOR-indexed, floating-rate debt securities.

Concerns have been publicized that some of the member banks surveyed by the British Bankers’ Association (“BBA”) in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable

TABLE OF CONTENTS

to them in order to profit on their derivatives positions or to avoid an appearance of capital insufficiency or adverse reputational or other consequences that may have resulted from reporting inter-bank lending rates higher than those they actually submitted. A number of BBA member banks have entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations by regulators and governmental authorities in various jurisdictions are ongoing.

Actions by the BBA, regulators or law enforcement agencies may result in changes to the manner in which LIBOR is determined. Uncertainty as to the nature of such potential changes may adversely affect the market for LIBOR-based securities, including our potential portfolio of LIBOR-indexed, floating-rate debt securities. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities or the value of our potential portfolio of LIBOR-indexed, floating-rate debt securities.

On July 27, 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, announced that it intends to phase out LIBOR by the end of 2021. It is unclear if at that time whether or not LIBOR will cease to exist or if new methods of calculating LIBOR will be established such that it continues to exist after 2021. The U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large US financial institutions, is considering replacing U.S. dollar LIBOR with a new index calculated by short term repurchase agreements, backed by Treasury securities. The future of LIBOR at this time is uncertain. If LIBOR ceases to exist, we may need to renegotiate the credit agreements extending beyond 2021 with our portfolio companies that utilize LIBOR as a factor in determining the interest rate to replace LIBOR with the new standard that is established. Any such renegotiated agreements or methodology of the new standard may not be as favorable to us as the current agreements and LIBOR, which may adversely affect our net investment income.

Changes to United States tariff and import/export regulations may have a negative effect on our portfolio companies and, in turn, harm us.

There has been on-going discussion and commentary regarding potential significant changes to United States trade policies, treaties and tariffs. The current administration, along with Congress, has created significant uncertainty about the future relationship between the United States and other countries with respect to the trade policies, treaties and tariffs. These developments, or the perception that any of them could occur, may have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global trade and, in particular, trade between the impacted nations and the United States. Any of these factors could depress economic activity and restrict our portfolio companies' access to suppliers or customers and have a material adverse effect on their business, financial condition and results of operations, which in turn would negatively impact us.

S-26

TABLE OF CONTENTS

USE OF PROCEEDS

We estimate that the net proceeds we will receive from the sale of the Notes will be approximately \$ million (or approximately \$ million if the underwriters exercise their over-allotment option in full) based on a public offering price of \$ per Note, after deducting the underwriting discount and commissions of \$ (or approximately \$ if underwriters fully exercise their over-allotment option) payable by us and estimated offering expenses of approximately \$350,000 payable by us. We may change the size of this offering based on demand and market conditions.

We intend to use the net proceeds from this offering to fund investments in debt and equity securities in accordance with our investment objective and for other general corporate purposes.

We also intend to use a portion of the net proceeds from this offering to repay outstanding indebtedness under the PWB Credit Facility. As of April 9, 2018, we had \$38.2 million of indebtedness outstanding under the PWB Credit Facility, which bore interest at a rate of 5.50% as of such date. The PWB Credit Facility matures on January 31, 2020.

We anticipate that substantially all of the net proceeds from the sale of the Notes will be used as described above within three months of their receipt by us. Pending such uses and investments, we will invest the remaining net proceeds primarily in cash, cash equivalents, U.S. government securities or high-quality debt securities maturing in one year or less from the time of investment. The management fee payable by us to OFS Advisor will not be reduced while our assets are invested in such securities. Our ability to achieve our investment objective may be limited to the extent that the net proceeds of any offering, pending full investment, are held in lower yielding short-term instruments.

S-27

TABLE OF CONTENTS

CAPITALIZATION

The following table sets forth our capitalization as of December 31, 2017:

- on an actual basis; and
- on an as adjusted basis for the sale of \$ million aggregate principal amount of the Notes offered by this prospectus supplement and the accompanying prospectus (assuming no exercise of the over-allotment option) based on an assumed public offering price of \$ per Note, after deducting the underwriting discounts and commissions of \$ by us and estimated offering expenses of approximately \$350,000 payable by us but before the use of proceeds from this offering as described in “Use of Proceeds” in this prospectus supplement.

You should read this table together with “Use of Proceeds” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our financial statements and related notes thereto included in this prospectus supplement and the accompanying prospectus.

	December 31, 2017	
	Actual	As Adjusted(1)
	(amounts in thousands)	
Assets:		
Investments, at fair value	\$ 277,499	\$
Cash and cash equivalents	72,952	
Other assets	7,327	
Total assets	357,778	
Liabilities:

(1) As of April 9, 2018, we had approximately \$149.9 million of SBA-guaranteed debentures outstanding. This table has not been adjusted to reflect the change in our outstanding SBA-guaranteed debentures subsequent to December 31, 2017.

(2)

As of April 9, 2018, we had approximately \$38.2 million outstanding under the PWB Credit Facility. This table has not been adjusted to reflect the changes in our outstanding borrowings under the PWB Credit Facility subsequent to December 31, 2017.

S-28

TABLE OF CONTENTSMANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

The information contained in this section should be read in conjunction with the “Selected Consolidated Financial Data” and our financial statements and notes thereto appearing elsewhere in this prospectus supplement and the accompanying prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under “Risk Factors” and “Special Note Regarding Forward-Looking Statements” appearing elsewhere in this prospectus supplement and under “Risk Factors” in the accompanying prospectus.

Defined Terms

We have used “we,” “us,” “our”, “our company”, and “the Company” to refer to OFS Capital Corporation in this section and in our audited financial statements contained in this prospectus. We also have used several other terms in this section and in our audited financial statements, which are explained or defined below:

1940 Act	Investment Company Act of 1940, as amended
Administration Agreement	Administration agreement between the Company and OFS Services dated November 7, 2012
Advisers Act	Investment Advisers Act of 1940, as amended
Annual Distribution Requirement	Distributions to our stockholders, for each taxable year, of at least 90% of our ICTI
ASC	Accounting Standards Codification, as issued by the FASB
ASC Topic 606	ASC Topic 606, “Revenue From Contracts With Customers”
ASC Topic 820	ASC Topic 820, “Fair Value Measurements and Disclosures”
ASC Topic 946	ASC Topic 946, “Financial Services-Investment Companies”
ASU	Accounting Standards Updates, as issued by the FASB
BDC	Business Development Company under the 1940 Act
BLA	Business Loan Agreement, as amended, with Pacific Western Bank, as lender, which provides the Company with a senior secured revolving credit facility
Board	The Company’s board of directors
Code	Internal Revenue Code of 1986, as amended
DRIP	Distribution reinvestment plan
EBITDA	Earnings before interest, taxes, depreciation, and amortization
Exchange Act	Securities Exchange Act of 1934
FASB	Financial Accounting Standards Board
FDIC	Federal Deposit Insurance Corporation
GAAP	Accounting principles generally accepted in the United States
HPCI	Hancock Park Corporate Income, Inc., a non-traded BDC with an investment strategy similar to the Company for whom OFS Advisor serves as investment adviser
ICTI	Investment company taxable income, which is generally net ordinary income plus net short-term capital gains in excess of net long-term capital losses
Investment Advisory Agreement	Investment advisory agreement between the Company and OFS Advisor dated November 7, 2012
LIBOR	London Interbank Offered Rate
OFS Advisor	OFS Capital Management, LLC, a wholly-owned subsidiary of OFSAM and registered investment advisor under the Advisers Act

Edgar Filing: OFS Capital Corp - Form 497

OFS Capital WM
OFS Services
S-29

OFS Capital WM, LLC, a wholly-owned investment company subsidiary
OFS Capital Services, LLC, a wholly-owned subsidiary of OFSAM and affiliate of

TABLE OF CONTENTS

	OFS Advisor
OFSAM	Orchard First Source Asset Management, LLC, an established investment platform focused on meeting the capital needs of middle-market companies
Prime Rate	United States Prime interest rate
PWB Credit Facility	Senior secured revolving credit facility between the Company and Pacific Western Bank, as lender.
RIC	Regulated investment company under the Code
SBA	U.S. Small Business Administration
SBIC	A fund licensed under the SBA small business investment company program
SBIC Acquisition	The Company's acquisition of the remaining ownership interests in SBIC I LP and SBIC I GP, LLC on December 4, 2013
SBIC Act	Small Business Investment Act of 1958
SBIC I LP	OFS SBIC I, LP, a wholly-owned SBIC subsidiary of the Company
SEC	U.S. Securities and Exchange Commission
WM Credit Facility	Secured revolving line of credit with Wells Fargo Bank, N.A, terminated on May 28, 2015

Critical Accounting Policies and Significant Estimates

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the periods reported. Actual results could materially differ from those estimates. Critical accounting policies are those that require management to make subjective or complex judgments about the effect of matters that are inherently uncertain and may change in subsequent periods. Changes that may be required in the underlying assumptions or estimates in these areas could have a material impact on our current and future financial condition and results of operations.

Our critical accounting policies and estimates are those relating to revenue recognition and fair value estimates. Management has discussed the development and selection of each critical accounting policy and estimate with the Audit Committee of the Board. For descriptions of our revenue recognition and fair value policies, see Note 2 to the consolidated financial statements included in this prospectus supplement.

Revenue recognition

Our investment activities frequently involve the acquisition of multiple financial instruments or rights either in an initial transaction, or in subsequent or "follow-on" transactions, including amendments to existing securities. These financial instruments can include loans, preferred and common stock, warrants, or membership interests in limited liability companies. Acquired rights can include fixed or variable fees that can be either guaranteed or contingent upon operating performance of the underlying portfolio companies. Moreover, these fees may be payable in cash or additional securities. Acquired rights and financial instruments together, are referred to as Instruments.

The revenue recognized on these Instruments is a function of the fee or other consideration allocated to them, including amounts allocated to capital structuring fees, at the time of acquisition. Additionally, subsequent amendments to these Instruments can involve both:

- a determination as to whether the amendment is

of such significance to deem it the consummation of the initial investment transaction and the acquisition of new Instruments (i.e., a "significant modification"), or

a modification of those Instruments to be recognized over their remaining lives, and

- an additional allocation of consideration among newly acquired Instruments.

S-30

TABLE OF CONTENTS

These allocations are generally based on the relative fair value of the Instruments at the time of the transaction, a process involving fair value estimates which is also a critical accounting policy and significant estimate. Moreover, these allocations and determinations can differ between GAAP and U.S. federal income tax bases. Once determined, these allocations directly affect the discount/premium and yield on debt securities, the cost and net gains/losses on equity securities, and capital structuring fees recognized in the statements of operations; and ICTI. These allocations require an understanding of the terms and conditions of the underlying agreements and requires significant management judgment. The table below presents the impact to the initial cost bases of allocated consideration to acquired Instruments for the years ended December 31, 2017, 2016, and 2015, (in thousands):

	2017	2016	2015
Loans:			
Net Loan Fees(1) (excluding equity securities and cash amendment fees)	\$ (1,376)	\$ (983)	\$ (922)
Equity securities (including performance-contingent fees)	—	(822)	—
Equity securities (including performance-contingent fees)	—	822	—
Capital structuring fees	531	369	653

(1)

Loan origination fees, OID, market discount or premium, and loan amendment fees.

On January 1, 2018, we adopted ASC Topic 606, which will result in the re-characterization of capital structuring fees received from portfolio companies, which are recognized as earned upon the closing of an investment, to a component of Net Loan Fees, which are recorded as an adjustment to the amortized cost of the investment and amortized as an adjustment to interest income over the life of the respective debt investment. The adoption of new revenue guidance will not have a material impact on our consolidated financial statements, including the presentation of revenues in our consolidated statements of operations.

Fair value estimates

As of December 31, 2017, approximately 78% of our total assets were carried on the consolidated balance sheet at fair value. As discussed more fully in Note 2 to the consolidated financial statements included in this prospectus supplement, GAAP requires us to categorize financial assets and liabilities carried at fair value according to a three-level valuation hierarchy. The hierarchy gives the highest priority to quoted, active market prices for identical assets and liabilities (Level 1) and the lowest priority to valuation techniques that require significant management judgment because one or more of the significant inputs are unobservable in the market place (Level 3). All of our assets carried at fair value are classified as Level 3; we typically do not hold equity securities or other instruments that are actively traded on an exchange.

As described in Note 6 to the consolidated financial statements included in this prospectus supplement, we follow a process, under the supervision and review of the Board, to determine these unobservable inputs used to calculate the fair values of our investments. The most significant unobservable inputs in these fair value measurements are the discount rates, EBITDA multiples and projected cash flows contractually due from the investment.

We consider a variety of factors in our determination of the discount rate to be applied to an investment including, among other things, investment type, LIBOR swap rate, indicative yields from independent third-party sources and the yield on our investment relative to indicative yields at the time of our investment (initial and subsequent investments) in the portfolio company.

We also consider a variety of factors in our determination of the EBITDA multiple to be applied to an investment including, among other things, the actual EBITDA multiple for the last arms-length transaction, and the ratio of the portfolio company's EBITDA multiple to the average of EBITDA multiples on comparable public companies.

For both the discount rate and the EBITDA multiple we also consider developments at the portfolio company since our investment including, but not limited to, trends in the portfolio company's earnings and leverage multiple, and input from our independent third-party valuation firms. This process typically results in a single selected discount rate and/or EBITDA multiple for each investment.

TABLE OF CONTENTS

The following table illustrates the sensitivity of our fair value measures to reasonably likely changes to the estimated discount rate and EBITDA multiple inputs used in our investment valuations at December 31, 2017 (dollar amounts in thousands):

Valuation Method/ Investment Type	Fair Value at December 31, 2017	Weighted average discount rate/EBITDA multiple at December 31, 2017	Discount rate sensitivity		EBITDA multiple sensitivity	
			-10% Weighted average	+10% Weighted average	+0.5x	-0.5x
Discounted cash flow						
Debt investments:						
Senior Secured	\$ 152,231	12.24%	\$ 155,136	\$ 147,782	N/A	N/A
Subordinated	\$ 47,117	14.69%	\$ 48,261	\$ 45,641	N/A	N/A
Enterprise value						
Debt investments:						
Senior Secured	\$ 12,910	7.50x	N/A	N/A	\$ 13,712	\$ 12,108
Subordinated	\$ 4,074	6.37x	N/A	N/A	\$ 4,752	\$ 3,397
Equity investments:						
Preferred equity	\$ 19,200	7.80x	N/A	N/A	\$ 19,737	\$ 17,038
Common equity and warrants	\$ 11,489	6.27x	N/A	N/A	\$ 13,673	\$ 10,491

The table above presents the impact to our debt and equity investment fair value accounting measures by uniformly modifying our discount rate and EBITDA valuation inputs, as applicable. This discount rate sensitivity measures included in the table do not present the estimated effect of hypothetical changes in actual, observed interest rates, which would affect the cash flows from many of the underlying investments as they are indexed to LIBOR or the Prime Rate of interest, the operating environment of many of our portfolio companies, and other factors, as well as our estimates of the discount rate valuation input. The effect of hypothetical changes in actual, observed interest rates on our fair value measures is not subject to reasonable estimation.

Related Party Transactions

We have entered into a number of business relationships with affiliated or related parties, including the following:

- The Investment Advisory Agreement with OFS Advisor to manage our operating and investment activities. Under the Investment Advisory Agreement we have agreed to pay OFS Advisor an annual base management fee based on the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) as well as an incentive fee based on our investment performance. See Note 4 to the Financial Statements included in this prospectus supplement and “Management and Other Agreements” in the accompanying prospectus.

- The Administration Agreement with OFS Capital Services, an affiliate of OFS Advisor, to provide us with the office facilities and administrative services necessary to conduct our operations. See Note 4 to the Financial Statements included in this prospectus supplement and “Management and Other Agreements” in the accompanying prospectus.

- A license agreement with OFSAM, the parent company of OFS Advisor, under which OFSAM has agreed to grant us a non-exclusive, royalty-free license to use the name “OFS.” Under this agreement, we have a right to use the “OFS” name

for so long as OFS Advisor or one of its affiliates remains our investment adviser. Other than with respect to this limited license, we have no legal right to the “OFS” name. This license agreement will remain in effect for so long as the Investment Advisory Agreement with OFS Advisor is in effect.

S-32

TABLE OF CONTENTS

OFS Advisor's services under the Investment Advisory Agreement are not exclusive to us and OFS Advisor is free to furnish similar services to other entities, including other BDCs affiliated with OFS Advisor, so long as its services to us are not impaired. OFS Advisor also serves as the investment adviser to CLO funds and other assets, including HPCI, a non-traded BDC with an investment strategy similar to ours.

Portfolio Composition and Investment Activity**Portfolio Composition**

As of December 31, 2017, the fair value of our debt investment portfolio totaled \$246.3 million in 35 portfolio companies, of which 79% and 21% were senior secured loans and subordinated loans, respectively, and approximately \$31.2 million in equity investments, at fair value, in 17 portfolio companies in which we also held debt investments and two portfolio companies in which we solely held an equity investment. We had unfunded commitments of \$9.9 million to three portfolio companies at December 31, 2017. Set forth in the tables and charts below is selected information with respect to our portfolio as of December 31, 2017 and 2016.

The following table summarizes the composition of our investment portfolio as of December 31, 2017 and 2016 (dollar amounts in thousands):

	December 31, 2017		December 31, 2016	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Senior secured debt investments(1)	\$ 196,020	\$ 195,112	\$ 182,315	\$ 180,955
Subordinated debt investments	63,031	51,198	66,591	63,410
Preferred equity	24,103	19,200	23,293	23,721
Common equity and warrants	6,821	11,989	7,108	13,541
	\$ 289,975	\$ 277,499	\$ 279,307	\$ 281,627
Total number of portfolio companies	37	37	41	41

(1)

Includes debt investments in which we have entered into a contractual arrangement with co-lenders whereby, subject to certain conditions, we have agreed to receive our principal payments after the repayment of certain co-lenders pursuant to a payment waterfall. The aggregate amortized cost and fair value of these investments was \$21,709 and \$21,919 at December 31, 2017, respectively, and \$28,945 and \$29,276, at December 31, 2016, respectively.

The following table shows the portfolio composition by geographic region at amortized cost and fair value, and as a percentage of total investments. The geographic composition is determined by the location of the portfolio companies' corporate headquarters (dollar amounts in thousands):

	Amortized Cost			Fair Value				
	December 31, 2017	December 31, 2016	December 31, 2016	December 31, 2017	December 31, 2016	December 31, 2016		
South – US	\$ 126,123	43.5%	\$ 120,005	42.9%	\$ 124,699	44.9%	\$ 122,511	43.5%
Northeast – US	106,506	36.7	85,693	30.7	91,012	32.8	78,186	27.8
West – US	32,976	11.4	59,120	21.2	33,097	11.9	61,219	21.7
Midwest – US	20,431	7.0	10,566	3.8	24,621	8.9	15,788	5.6
Canada	3,939	1.4	3,923	1.4	4,070	1.5	3,923	1.4
Total	\$ 289,975	100.0%	\$ 279,307	100.0%	\$ 277,499	100.0%	\$ 281,627	100.0%

As of December 31, 2017, our investment portfolio's three largest industries by fair value, were (1) Manufacturing, (2) Professional, Scientific, and Technical Services, and (3) Other Services (except Public Administration), totaling approximately 44.5% of the investment portfolio. For a full summary of our investment portfolio by industry, see "Note 5, Investments" to the consolidated financial statements included in this prospectus supplement.

TABLE OF CONTENTS

The following table presents our debt investment portfolio by investment size as of December 31, 2017 and 2016 (dollar amounts in thousands):

	Amortized Cost		December 31, 2016		Fair Value		December 31, 2016	
	December 31, 2017				December 31, 2017			
Up to \$4,000	\$ 28,403	10.9%	\$ 34,547	13.9%	\$ 24,745	10.1%	\$ 41,419	17.0%
\$4,001 to \$7,000	53,271	20.5	57,996	23.3	45,765	18.6	55,342	22.6
\$7,001 to \$10,000	84,596	32.7	78,446	31.5	84,026	34.1	80,735	33.0
\$10,001 to \$13,000	37,706	14.6	34,549	13.9	38,033	15.4	37,593	15.4
Greater than \$13,000	55,075	21.3	43,368	17.4	53,741	21.8	29,276	12.0
Total	\$ 259,051	100.0%	\$ 248,906	100.0%	\$ 246,310	100.0%	\$ 244,365	100.0%

The following table displays the composition of our performing debt investment portfolio by weighted average yield as of December 31, 2017 and 2016:

Weighted Average Yield – Performing Debt Investments(1)	December 31, 2017			2016		
	Senior Secured Debt	Subordinated Debt	Total Debt	Senior Secured Debt	Subordinated Debt	Total Debt
Less than 8%	2.0%	—%	1.6%	8.7%	11.4%	9.5%
8% – 10%	26.7	—	21.1	7.7	—	5.6
10% – 12%	38.4	11.5	32.7	32.6	11.9	27.0
12% – 14%	10.1	50.8	18.6	30.9	58.1	38.2
Greater than 14%	22.8	37.7	26.0	20.1	18.6	19.7
Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Weighted average yield – performing debt investments(1)	11.76%	13.40%	12.11%	11.95%	12.44%	12.08%
Weighted average yield – total debt investments(2)	11.76%	11.05%	11.59%	11.52%	12.35%	11.72%

(1)

The weighted average yield on our performing debt investments is computed as (a) the annual stated accruing interest plus the annualized accretion of Net Loan Fees divided by (b) amortized cost of our debt investments, excluding debt investments in non-accrual status as of the balance sheet date.

(2)

The weighted average yield on our total debt investments is computed as (a) the annual stated accruing interest plus the annualized accretion of Net Loan Fees divided by (b) amortized cost of our debt investments, including debt investments in non-accrual status as of the balance sheet date.

The weighted average yield on total investments was 10.35% and 10.88%, at December 31, 2017 and 2016, respectively. Weighted average yield on total investments is computed as (a) the annual stated accruing interest on our debt investments at the balance sheet date, plus the annualized accretion of Net Loan Fees, plus the effective yield on our performing preferred equity investments, divided by (b) amortized cost of our total investment portfolio, including assets in non-accrual status as of the balance sheet date. The weighted average yield of our investments is not the same as a return on investment for our stockholders but, rather, the gross investment income from our investment portfolio before the payment of all of our fees and expenses. There can be no assurance that the weighted average yield will remain at its current level.

The weighted average yield on our performing debt increased from 12.08% at December 31, 2016 to 12.11% at December 31, 2017, primarily due to an increase in the applicable LIBOR rates which are indexed to our variable rate debt investments, offset by approximately \$64.8 million in sales and repayments of debt investments with a weighted average yield of 10.91%, and the deployment of cash during the nine months ended December 31, 2017, including partial deployment of proceeds received from our April 2017 follow-on public offering (the "Offering"), into \$107.4 million of debt investments with a weighted average yield of 10.85% at December 31, 2017.

S-34

TABLE OF CONTENTS

As of December 31, 2017 and 2016, floating rate loans at fair value were 76% and 66% of our debt investment portfolio, respectively, and fixed rate loans at fair value were 24% and 34% of our debt investment portfolio, respectively.

Non-Accrual Loans

At December 31, 2017, we had two loans (Community Intervention Services, Inc. and Southern Technical Institute, LLC) on non-accrual status with respect to all interest and Net Loan Fee amortization, with an amortized cost and fair value of \$11.1 million and \$1.2 million, respectively. Our loan investment in My Alarm Center, LLC, which was on non-accrual status at June 30, 2017, was restructured and exchanged for a new class of preferred equity securities and common equity securities in July 2017. See Note 5 to the consolidated financial statements included in this prospectus supplement for further information. At December 31, 2016, we had one loan (Community Intervention Services, Inc.) on non-accrual status with respect to PIK interest and unamortized Net Loan Fees with an amortized cost and fair value of \$7.6 million and \$5.4 million, respectively.

PIK and Cash Dividend Accruals

Payment-in-kind dividends on preferred equity securities are recognized at fair value when earned. At December 31, 2017, we owned four preferred equity securities (Master Cutlery, LLC, Stancor, L.P., Southern Technical Institute, LLC, and TRS Services, LLC), with an aggregate amortized cost and fair value of \$10.5 million and \$3.7 million, respectively, for which the fair value of the most-recently recognized PIK dividend as of December 31, 2017, was \$0. In addition, beginning June 30, 2017, the Company discontinued recognition of the cash preferred dividend from its investment in Master Cutlery, LLC. At December 31, 2016, the Company owned one preferred equity security (Master Cutlery, LLC) with an amortized cost and fair value of \$3.5 million, and \$1.0 million, respectively, for which the fair value of the most-recently recognized PIK dividend as of December 31, 2016 was \$0.

Investment Activity

The following is a summary of our cash investment activity for the years ended December 31, 2017 and 2016 (dollar amounts in millions):

	Year Ended December 31, 2017		Year Ended December 31, 2016	
	Debt Investments	Equity Investments	Debt Investments	Equity Investments
Investments in new portfolio companies	\$ 114.5	\$ 4.4	\$ 48.7	\$ 0.7
Investments in existing portfolio companies:				
Follow-on investments	19.0	1.4	13.9	0.8
Refinanced investments	—	—	3.2	—
Delayed draw funding	3.6	—	0.9	—
Total investments in existing portfolio companies	22.6	1.4	18.0	0.8
Total investments in new and existing portfolio companies	\$ 137.1	\$ 5.8	\$ 66.7	\$ 1.5
Number of new portfolio company investments	17	4	8	1
Number of existing portfolio company investments	17	2	10	1
Proceeds/distributions from principal payments/equity investments	\$ 105.1	\$ —	\$ 41.4	\$ —
Proceeds from investments sold or redeemed	17.8	19.2	2.8	2.5
Total proceeds from principal payments, equity distributions and investments sold	\$ 122.9	\$ 19.2	\$ 44.2	\$ 2.5

Non-cash Investment Activity

In December 2017, our investment in Jobson Healthcare Information, LLC (“Jobson”) was restructured, whereby the lender group, including us, purchased all the outstanding equity of Jobson for a

TABLE OF CONTENTS

nominal purchase price. Immediately after the restructuring, and as of December 31, 2017, we owned approximately 12.6% of the common equity of Jobson. In February 2018, in connection with the restructuring, the Company sold its warrant investment, on a pro-rata basis, to the other members of the lender group for a nominal amount. As of December 31, 2017, the amortized cost and fair value of our common equity investment in Jobson was \$0; the amortized cost and fair value of our warrant investment in Jobson was \$0.5 million and \$0, respectively; and the amortized cost and fair value of our debt investment in Jobson was \$15.2 million and \$12.9 million, respectively. In July 2017, our senior secured debt investment with a cost basis of \$6.7 million, and preferred equity investments, with an aggregate cost basis of \$0.3 million, in My Alarm Center, LLC (“My Alarm”), were restructured and exchanged for common equity and a new class of preferred equity securities with a fair value of \$0 and \$1.8 million, respectively. As of June 30, 2017, we had recognized cumulative unrealized losses of \$5.2 million on our pre-restructured securities of My Alarm Center, LLC, which upon restructuring, were recognized as realized losses during the quarter ended September 30, 2017.

During the year ended December 31, 2016, we converted \$1.8 million in principal of our subordinated debt investment in Southern Technical Institute, LLC into preferred equity units and warrants valued at \$1.8 million, converted \$0.3 million in principal of our senior secured debt investment in TRS Services, LLC, into preferred equity units valued at \$0.3 million, and converted \$0.8 million in principal of our subordinated debt investment in All Metals, LLC, into a senior secured debt investment in the same portfolio company. In addition, we received additional preferred equity units with nominal value in connection with a \$1.3 million follow on investment in My Alarm, LLC and also amended our My Alarm, LLC senior secured debt investment for which we received preferred equity units valued at \$0.2 million.

Our level of investment activity may vary substantially from period to period depending on various factors, including, but not limited to, the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity, the general economic environment and the competitive environment for the types of investments we make.

We categorize debt investments into seven risk categories based on relevant information about the ability of borrowers to service their debt. For additional information regarding our risk categories, see “The Company — Portfolio Review/Risk Monitoring” in the accompanying prospectus. The following table shows the classification of our debt investments portfolio by risk category as of December 31, 2017 and 2016 (dollar amounts in thousands):

Risk Category	As of December 31,			
	2017		2016	
	Debt Investments, at Fair Value	% of Debt Investments	Debt Investments, at Fair Value	% of Debt Investments
1 (Low Risk)	\$ —	—%	\$ —	—%
2 (Below Average Risk)	3,755	1.5	3,810	1.6
3 (Average)	222,027	90.1	192,078	78.6
4 (Special Mention)	16,454	6.7	43,084	17.6
5 (Substandard)	2,873	1.2	5,393	2.2
6 (Doubtful)	1,201	0.5	—	—
7 (Loss)	—	—	—	—
	\$ 246,310	100.0%	\$ 244,365	100.0%

During the year ended December 31, 2017, we reclassified three debt investments from risk category 4 to risk category 3, with an aggregate fair value of \$17.2 million at December 31, 2016, primarily due to improvement in the underlying businesses of the portfolio companies. In addition, we reclassified our debt investment in Community Intervention Services, Inc. with a fair value of \$5.4 million at December 31, 2016, from risk category 5 to risk

category 6 (our non-accrual debt investment with respect to PIK interest and Net Loan Fees described above), our debt investment in Southern Technical Institute, LLC from a risk category 4 to risk category 6 with a fair value of \$3.2 million at December 31, 2016, and our debt

S-36

TABLE OF CONTENTS

investment in Master Cutlery, LLC from risk category 4 to risk category 5 with a fair value of \$4.4 million at December 31, 2016, primarily due to a degradation in the underlying businesses of the portfolio companies. Further, our loan investment in My Alarm with a fair value and risk rating of \$6.2 million and 3, respectively, at December 31, 2016 was restructured and exchanged for a new class of preferred and common equity securities. All other year over year changes in the fair value of our debt investments within each category, were a result of new debt investments, the receipt of amortization payments on existing debt investments, repayment of certain debt investments in full, changes in the fair value of our existing debt investments within the categories, and other investment activity.

Results of Operations

Key Financial Measures

The following is a discussion of the key financial measures that management employs in reviewing the performance of our operations.

Total Investment Income. We generate revenue primarily in the form of interest income on debt investments, and dividend income from our equity investments. Our debt investments typically have a term of three to eight years and bear interest at fixed and floating rates. As of December 31, 2017, floating rate and fixed rate loans comprised 76% and 24%, respectively, of our current debt investment portfolio at fair value; however, in accordance with our investment strategy, we expect that over time the proportion of fixed rate loans will continue to increase. In some cases, our investments provide for PIK interest, or PIK dividends (meaning interest or dividends paid in the form of additional principal amount of the loan or equity security instead of in cash). We also generate revenue in the form of management, valuation, and other contractual fees, which is recognized as the related services are rendered. In the general course of business, we receive certain fees from portfolio companies which are non-recurring in nature. Such non-recurring fees include prepayment fees on certain loans repaid prior to their scheduled due date, which are recognized as earned when received, and fees for capital structuring services from certain portfolio companies, which are recognized as earned upon closing of the investment. Net Loan Fees are capitalized, and accreted or amortized over the life of the loan as interest income. When we receive principal payments on a loan in an amount that exceeds its amortized cost, we recognize the excess principal payment as income in the period it is received.

Expenses. Our primary operating expenses include interest expense due under our outstanding borrowings, the payment of fees to OFS Advisor under the Investment Advisory Agreement, our allocable portion of overhead expenses under the Administration Agreement and other operating costs described below. Additionally, we will pay interest expense on any outstanding debt under any new credit facility or other debt instrument we may enter into. We will bear all other out-of-pocket costs and expenses of our operations and transactions, whether incurred by us directly, OFS Services or its affiliates, or on our behalf by a third party, including:

- the cost of calculating our net asset value, including the cost of any third-party valuation services;
- the cost of effecting sales and repurchases of shares of our common stock and other securities;
- fees payable to third parties relating to making investments, including out-of-pocket fees and expenses associated with performing due diligence and reviews of prospective investments;
- transfer agent and custodial fees;
- out-of-pocket fees and expenses associated with marketing efforts;
- federal and state registration fees and any stock exchange listing fees;

- U.S. federal, state and local taxes;
- independent directors' fees and expenses;
- brokerage commissions;
- fidelity bond, directors' and officers' liability insurance and other insurance premiums;

S-37

TABLE OF CONTENTS

- direct costs, such as printing, mailing and long-distance telephone;

- fees and expenses associated with independent audits and outside legal costs;

- costs associated with our reporting and compliance obligations under the 1940 Act and other applicable U.S. federal and state securities laws; and

- other expenses incurred by either OFS Services or us in connection with administering our business.

Net Gain (Loss) on Investments. Net gain (loss) on investments consists of the sum of: (a) realized gains and losses from the sale of debt or equity securities, or the redemption of equity securities; and (b) net unrealized appreciation or depreciation on debt and equity investments, net of applicable taxes to the extent the investments are held through taxable wholly owned subsidiaries. In the period in which a realized gain or loss is recognized, such gain or loss will generally be offset by the reversal of previously recognized unrealized appreciation or depreciation, and the net gain recognized in that period will generally be smaller. The unrealized appreciation or depreciation on debt securities is also reversed when those investments are redeemed or paid off prior to maturity. In such instances, the reversal of accumulated unrealized appreciation or depreciation will be reported as a net loss or gain, respectively, and may be partially offset by the acceleration of any premium or discount on the debt security, which is reported in interest income, and any prepayment fees on the debt security, which is reported in fee income.

We do not believe that our historical operating performance is necessarily indicative of our future results of operations that we expect to report in future periods. We are primarily focused on investments in middle-market companies in the United States, including debt investments and, to a lesser extent, equity investments, including warrants and other minority equity securities, which differs to some degree from our historical investment concentration, in senior secured loans to middle-market companies in the United States. Moreover, as a BDC and a RIC, we are also subject to certain constraints on our operations, including, but not limited to, limitations imposed by the 1940 Act and the Code. In addition, SBIC I LP is subject to regulation and oversight by the SBA. For the reasons described above, the results of operations described below may not necessarily be indicative of the results we expect to report in future periods. Net increase in net assets resulting from operations can vary substantially from period to period for various reasons, including the recognition of realized gains and losses and unrealized appreciation and depreciation. As a result, annual comparisons of net increase in net assets resulting from operations may not be meaningful.

We changed the primary method used to value certain of our investments as of December 31, 2016, from the income approach to the market approach (“Valuation Methodology Change”), primarily due to the nature of evidence available under the discounted cash flow method, and to better align with industry practice. The methodology change resulted in a fourth quarter 2016 net increase to the carrying value of the investments and corresponding net increase in unrealized appreciation/depreciation on investments in the consolidated statement of operations of approximately \$1.6 million.

S-38

TABLE OF CONTENTS

Comparison of years ended December 31, 2017, 2016, and 2015.

Consolidated operating results for the years ended December 31, 2017, 2016, and 2015 are as follows (in thousands):

	Years Ended December 31,		
	2017	2016	2015
Investment income			
Interest income:			
Cash interest income	\$ 26,444	\$ 24,901	\$ 25,464
Net Loan Fee amortization	1,450	1,414	2,263
Other interest income	230	85	37
Total interest income	28,124	26,400	27,764
PIK income:			
PIK interest income	1,508	1,194	1,206
Preferred equity PIK dividends	1,399	1,433	1,116
Total PIK income	2,907	2,627	2,322
Dividend income:			
Preferred equity cash dividends	165	168	160
Common equity dividends	317	307	85
Total dividend income	482	475	245
Fee income:			
Management, valuation, and other	163	159	159
Prepayment, structuring, and other fees	1,750	1,433	1,774
Total fee income	1,913	1,592	1,933
Total investment income	33,426	31,094	32,264
Total expenses	17,549	16,949	18,853
Net investment income	15,877	14,145	13,411
Net gain (loss) on investments	(7,967)	(317)	4,820
Net increase in net assets resulting from operations	\$ 7,910	\$ 13,828	\$ 18,231

Interest and PIK income by debt investment type for the years ended December 31, 2017, 2016, and 2015 are summarized below (in thousands):

	Years Ended December 31,		
	2017	2016	2015
Interest and PIK interest income:			
Senior secured debt investments	\$ 21,785	\$ 19,485	\$ 20,038
Subordinated debt investments	7,847	8,109	8,932
Total interest and PIK interest income	\$ 29,632	\$ 27,594	\$ 28,970

Comparison of investment income for the years ended December 31, 2017 and 2016:

Interest income increased approximately \$2.0 million, due to a \$3.4 million increase in recurring interest income caused by a 12% increase in the average outstanding loan balance during 2017, offset by a decrease of \$1.4 million in recurring interest income resulting from a 63 basis point decrease in the weighted average yield in our portfolio during the year ended December 31, 2017. Acceleration of Net Loan Fees of \$0.6 million and \$0.6 million were included in

interest income for the year ended December 31, 2017 and 2016, respectively, from the repayment of loans prior to their scheduled due dates.

S-39

TABLE OF CONTENTS

Fee income increased \$0.3 million primarily due to an increase in prepayment fees and capital structuring fees. We recorded prepayment fees of \$1.0 million resulting from \$60.2 million of unscheduled principal payments during the year ended December 31, 2017, compared to \$0.9 million from \$25.0 million of unscheduled principal payments during 2016. We recognized capital structuring fees of \$0.5 million and \$0.4 million for the years ended December 31, 2017 and 2016, respectively, upon the closing of \$55.7 million and \$37.3 million of debt and equity investments, respectively.

Comparison of investment income for the years ended December 31, 2016 and 2015:

Interest income decreased \$1.4 million primarily due to a \$1.0 million decrease in recurring interest income and a \$0.4 million decrease in accelerated Net Loan Fees. Acceleration of Net Loan Fees occur and are recognized on certain loans that are repaid prior to their scheduled due date. The \$1.0 million decrease in recurring interest income was primarily due to a \$3.6 million decrease caused by a 13% decrease in the average outstanding loan balance during 2016, offset by an increase of \$2.6 million caused by a 19 basis point increase in the weighted average yield in our portfolio during the year ended December 31, 2016. The 13% decrease in the weighted average principal balance of investments and increase in our average portfolio yield was primarily a result of the sale of a portfolio of 20 senior secured debt investments with an aggregate principal balance of approximately \$67.8 million as of May 28, 2015 to Madison (the "WM Asset Sale") which occurred on May 28, 2015 (See "Liquidity and Capital Resources — WM Asset Sale and Related Transactions" for further details), the proceeds of which had only been partially reinvested in higher-yielding assets subsequent to the WM Asset Sale. Acceleration of Net Loan Fees of \$0.6 million and \$1.0 million were included in interest income for the years ended December 31, 2016 and 2015, respectively.

Preferred equity cash and PIK dividend income increased approximately \$0.3 million primarily as a result of additional preferred equity securities purchased during 2015. Common equity dividend income increased by \$0.2 million primarily due to an additional common equity security purchased during the fourth quarter of 2015.

Fee income decreased \$0.3 million primarily due to a decrease in prepayment fees and capital structuring fees. We recorded prepayment fees of \$0.9 million resulting from \$25.0 million of unscheduled principal payments during the year ended December 31, 2016, compared to \$1.1 million from \$47.5 million of unscheduled principal payments during 2015. We recognized capital structuring fees of \$0.4 million and \$0.7 million for the years ended December 31, 2016 and 2015, respectively, upon the closing of \$37.3 million and \$89.0 million of debt and equity investments, respectively.

Expenses

	Years Ended December 31,		
	2017	2016	2015
	(Amounts in thousands)		
Interest expense	\$ 5,813	\$ 5,302	\$ 6,959
Management fees	4,999	4,516	5,225
Incentive fee	2,962	3,333	2,627
Professional fees	1,115	1,200	1,114
Administration fee	1,314	1,304	1,637
General and administrative expenses	1,346	1,294	1,291
Total expenses	\$ 17,549	\$ 16,949	\$ 18,853

Comparison of expenses for the years ended December 31, 2017 and 2016:

Interest expense increased primarily due to an increase in borrowings under our PWB Credit Facility. The average dollar amount of borrowings outstanding under the PWB Credit Facility during the years ended December 31, 2017 and 2016 was \$8.5 million and \$0.6 million, respectively.

Management fee expense increased by \$0.5 million due to an increase in our average total assets, primarily due to an increase in net investment activity, including deployment of funds from the Offering.

TABLE OF CONTENTS

Incentive fee expense decreased by \$0.4 million primarily due to a \$0.6 million decrease in Part One incentive fees, due to a share issuance adjustment related to the Offering, which raised the hurdle rate to a level that was not exceeded in the second quarter because the Offering proceeds were not fully deployed, offset by an increase in pre-incentive fee net investment income due to an increase in net investment activity, including additional deployment of funds from the Offering, and an increase in the accrued Capital Gains Fee. During the year ended December 31, 2017, we did not incur a Capital Gains Fee, compared to a Capital Gains Fee of \$(0.1) million recorded during the year ended December 31, 2016, which represents the reversal of the accrued Capital Gains Fee at December 31, 2015.

Comparison of expenses for the years ended December 31, 2016 and 2015:

Interest expense decreased by \$1.7 million, primarily due to a year-over-year decrease of \$0.8 million in cash interest expense on the WM Credit Facility and a \$1.6 million write-off of deferred debt issuance costs, both related to our permanent reduction of the WM Credit Facility and the termination of the WM Credit Facility on May 28, 2015, offset by an increase of \$0.7 million in cash interest expense incurred on our SBA debentures. Interest expense on our SBA debentures increased due to an increase in the weighted average interest rate and the weighted average debentures outstanding during the year ended December 31, 2016, as a result of additional debenture draws of \$22.6 million during the nine months ended September 30, 2015, which pooled on September 23, 2015.

Management fee expense decreased by \$0.7 million due to a decrease in the average total assets subject to the base management fee.

Incentive fee expense increased by \$0.7 million due to an 11% increase in pre-incentive fee net investment income compared to the prior year, which resulted in a \$0.8 million increase in the incentive fee catch-up provision (the amount of pre-incentive fee income that exceeds the hurdle rate but is less than 2.5%) and a \$0.1 million increase in the incentive fee due to the amount of pre-incentive fee income that exceeded 2.5%, partially offset by a \$0.1 million decrease in the Capital Gains Fee, which represents the reversal of the accrued Capital Gains Fee at December 31, 2015.

Administrative fee expense decreased by \$0.3 million, primarily due to a decrease in the allocable amount of incentives of our officers and their respective staffs, which OFS Services passed along to us under our administration agreement.

Net gain (loss) on investments

	Years Ended December 31,		
	2017	2016	2015
	(Amounts in thousands)		
Senior secured debt	\$ (4,441)	\$ 411	\$ (1,276)
Subordinated debt	(8,667)	(2,368)	(1,106)
Preferred equity	5,373	(2,584)	3,351
Common equity and warrants	(232)	4,224	3,851
Net gain (loss) on investments	\$ (7,967)	\$ (317)	\$ 4,820

Year ended December 31, 2017

We recognized net losses of \$4.4 million on senior secured debt during the year ended December 31, 2017, primarily as a result of a realized loss of \$5.0 million on our senior secured debt investment in My Alarm recognized upon restructuring in the third quarter of 2017, offset by the positive net impact of portfolio company-specific performance factors on other investments. We held the My Alarm investment from the fourth quarter of 2015 and recognized unrealized appreciation of \$0.2 million and \$0 during the years ended December 31, 2016 and 2015, respectively. We recognized net losses of \$8.7 million on subordinated debt during the year ended December 31, 2017, primarily as a result of the net negative impact of portfolio company-specific performance factors, including unrealized depreciation of \$5.4 million recognized on our debt investment in Community

S-41

TABLE OF CONTENTS

Intervention Services, Inc., which was placed on non-accrual status during 2016, unrealized depreciation of \$2.1 million recognized on our debt investment in Southern Technical Institute, LLC, which was placed on non-accrual status during the fourth quarter of 2017, and \$1.6 million of unrealized depreciation on our debt investment in Master Cutlery, LLC.

We recognized net gains of \$5.4 million on preferred equity investments for the year ended December 31, 2017, primarily as a result of \$7.7 million of net realized gains recognized upon sale of three equity investments, offset by the negative impact from changes to EBITDA multiples used in our valuations and negative impacts of portfolio company-specific performance factors, including a \$2.1 million unrealized loss recognized on our equity investment in Southern Technical Institute, LLC. Included in net gains of \$7.7 million for the year ended December 31, 2017, were realized gains of \$11.0 million we recognized upon sale of the three aforementioned equity investments. We recognized cumulative unrealized appreciation of approximately \$3.3 million on these investments through December 31, 2016, which resulted in an aggregate net gain of \$7.7 million during the year ended December 31, 2017. In addition, previously recognized cumulative unrealized depreciation of \$0.3 million at June 30, 2017, on our preferred equity investments in My Alarm, was realized upon restructuring.

We recognized net losses of \$0.2 million on common equity and warrant investments for the year ended December 31, 2017, primarily as a result of the negative impact of portfolio company-specific performance factors, offset by a \$0.4 million net gain realized upon sale of a common equity investment, which includes a realized gain of \$0.9 million, for which we had recognized cumulative unrealized appreciation of \$0.5 million through December 31, 2016.

Year ended December 31, 2016

We recognized net gains of \$0.4 million on senior secured debt during the year ended December 31, 2016, primarily as a result of the net positive impact of market based transactions on our fair values, offset by the net impact of portfolio company-specific performance factors, the pay-off of certain senior secured debt investments, and \$0.4 million as a result of the Valuation Methodology Change.

We recognized net losses of \$2.4 million on subordinated debt during the year ended December 31, 2016, principally due to the net impact of portfolio company-specific performance factors and \$0.5 million as a result of the Valuation Methodology Change.

We recognized net losses of \$2.6 million on preferred equity investments for the year ended December 31, 2016, primarily due to the net impact of portfolio company-specific performance factors offset by \$2.1 million as a result of the Valuation Methodology Change.

We recognized net gains of \$4.2 million on common equity and warrant investments for the year ended December 31, 2016, primarily due to the net impact of portfolio company-specific performance factors and \$0.4 million as a result of the Valuation Methodology Change. In addition, we realized gains of \$2.1 million from the redemption of an equity investment. We held this investment from the first quarter of 2014 and recognized unrealized gains of \$2.1 million and \$0.5 million during the years ended December 31, 2015 and 2014, respectively. The net impact of this transaction was a recognized net loss of \$0.5 million during the year ended December 31, 2016 due to the reversal of the accumulated unrealized gains in excess of the recognized realized gain.

Year ended December 31, 2015

We recognized net losses of \$1.3 million on senior secured debt during the year ended December 31, 2015, primarily as a result of the net impact of changes to certain market loan indices, the impact of portfolio company-specific performance factors, and the settlement of a senior secured debt investment with one of our portfolio companies (Strata Pathology Services, Inc.) (“Strata Settlement”) in the fourth quarter of 2015, partially offset by the pay-off of certain senior secured debt investments, including the WM Asset Sale. In connection with the Strata Settlement, we recognized a realized loss of \$3.9 million and reversed \$3.2 million of previously recognized cumulative unrealized depreciation.

We recognized net losses of \$1.1 million on subordinated debt during the year ended December 31, 2015, principally due to the net impact of portfolio company-specific performance factors, and the impact of changes to certain market loan indices.

S-42

TABLE OF CONTENTS

We recognized net gains of \$3.4 million on preferred equity investments for the year ended December 31, 2015, primarily due to the impact of portfolio company-specific performance factors, the impact of certain investments moving closer to their expected exit events, and a net gain of \$0.7 million from the sale of an investment. We realized a \$1.4 million gain on the sale of the equity investment, offset by the reversal of previously recognized unrealized gains from the date we held this investment, which included recognized unrealized gains of \$0.5 million at December 31, 2014.

We recognized net gains of \$3.9 million on common equity and warrant investments for the year ended December 31, 2015, primarily due to the impact of exit-event assumptions on our valuations, the net impact of portfolio company-specific performance factors, and a gain of \$0.7 million from the redemption of a warrant investment.

Liquidity and Capital Resources

At December 31, 2017, we held cash and cash equivalents of \$73.0 million, which includes cash and cash equivalents of \$72.1 million held by SBIC I LP, our wholly-owned SBIC. Our use of cash held by SBIC I LP is restricted by SBA regulation, including limitations on the amount of cash SBIC I LP can distribute to OFS Capital Corporation as parent company (the "Parent"). Any such distributions to the Parent from SBIC I LP are generally restricted to a statutory measure of undistributed accumulated earnings of SBIC I LP under SBA regulation. During the year ended December 31, 2017, the Parent received cash distributions of \$5.6 million from SBIC I LP. At December 31, 2017, the Parent had \$9.7 million of cash and cash equivalents available for general corporate activities, including \$8.8 million held by SBIC I LP that was available for distribution to it. Additionally, the Parent had \$17.4 million of borrowings available through our PWB Credit Facility at December 31, 2017.

Sources and Uses of Cash and Cash Equivalents

We generate cash through operations from net investment income and the net liquidation of portfolio investments, and use cash in our operations in the net purchase of portfolio investments. Significant variations may exist between net investment income and cash from net investment income, primarily due to the recognition of non-cash investment income, including Net Loan Fee amortization, PIK interest, and PIK dividends, which generally will not be fully realized in cash until we exit the investment. As discussed in Note 4 to our consolidated financial statements included in this prospectus supplement, we pay OFS Advisor a quarterly incentive fee with respect to our pre-incentive fee net investment income, which includes investment income that has not been received in cash. In addition, we must distribute substantially all our taxable income, which approximates, but will not always equal, the cash we generate from net investment income to maintain our RIC tax treatment. Historically, our distributions have been in excess of taxable income and we have limited history of net taxable gains. We also obtain cash to fund investments or general corporate activities from the issuance of securities and our revolving line of credit. These principal sources and uses of cash and liquidity are presented below (in thousands):

	Years Ended December 31,		
	2017	2016	2015
Cash from net investment income	\$ 11,451	\$ 10,051	\$ 12,541
Cash received from net realized gains	11,017	2,228	2,329
Net (purchases and originations) repayments of portfolio investments	(11,795)	(23,595)	68,868
Net cash provided by (used in) operating activities	10,673	(11,316)	83,738
Proceeds from common stock offering, net of expenses	53,423	—	—
Cash distributions paid	(16,700)	(13,062)	(12,690)
Net borrowings (repayment) on debt facilities	8,100	9,500	(50,027)
Payment of debt issuance costs and common stock offering expenses	(203)	(177)	(754)
Increase (decrease) in cash and cash equivalents	\$ 55,293	\$ (15,055)	\$ 20,267

TABLE OF CONTENTS

Comparison of the years ended December 31, 2017 and 2016:

At December 31, 2017, we held cash and cash equivalents of \$73.0 million, an increase of \$55.3 million from December 31, 2016.

Cash from net investment income

Cash from net investment income increased \$1.4 million for the year ended December 31, 2017, compared to the prior year. The increase to cash from net investment income was principally due to an increase in interest income and prepayment and structuring fees collected, and a decrease in cash paid for incentive fees, which primarily resulted from a share issuance adjustment related to the Offering, offset by an increase in cash paid for management fees, primarily due to an increase in net investment activity, including additional deployment of funds from the Offering, and an increase in cash interest paid on our PWB Credit Facility.

Cash received from realized gains

Cash received on realized gains may differ from realized gains in the statement of operations due to delays in the receipt of sale proceeds related to escrow and earn-out provisions in the investment sales transactions.

Net (purchases and originations) repayments of portfolio investments

During the year ended December 31, 2017, net purchases and originations of portfolio investments were primarily due to \$142.9 million of cash we used to purchase portfolio investments, offset by \$131.1 million of cash we received from amortized cost repayments on our portfolio investments. During the year ended December 31, 2016, net purchases were due to \$68.2 million of cash we used to purchase portfolio investments, offset by \$44.6 million of cash we received from amortized cost repayments on our portfolio investments.

Proceeds from common stock offering, net of expenses

In April 2017, we issued 3,625,000 shares of our common stock in a follow-on public offering at an offering price of \$14.57 per share, including shares purchased by the underwriters pursuant to their exercise of the over-allotment option. OFS Advisor paid all of the underwriting discounts and commissions and an additional supplemental payment of \$0.25 per share, representing the difference between the public offering price of \$14.57 per share and the net offering proceeds of \$14.82 per share, which also represented our NAV per share at the time of the Offering. All payments made by OFS Advisor in connection with the Offering are not subject to reimbursement by us. We received \$53.7 million in net proceeds from the Offering.

Comparison of the years ended December 31, 2016 and 2015:

At December 31, 2016, we held cash and cash equivalents of \$17.7 million, a decrease of \$15.1 million from December 31, 2015.

Cash from net investment income

Cash from net investment income decreased \$2.5 million for the year ended December 31, 2016, compared to the prior year. The decline was principally due to higher management and incentive fees paid, and cash interest. Cash used to pay incentive fees during the year ended December 31, 2016 were \$1.6 million greater than the year ended December 31, 2015, due to an increase in our pre-incentive fee net investment income in the fourth quarter of 2015 and the first, second and third quarter of 2016, which were paid during the year ended December 31, 2016. Cash used to pay base management fees during the year ended December 31, 2016 were \$0.2 million greater than the year ended December 31, 2015 primarily due to adjustments in the base management fee rate on January 1, 2015, which lead to a \$0.9 million increase in cash paid for management fees during the year ended December 31, 2016, that was offset by a reduction of \$0.7 million in management fees paid during the year ended December 31, 2016, due to a decrease in the average fair value of our investment portfolio, primarily as a result of the WM Asset Sale in the second quarter of 2015 and subsequent increase in cash and cash equivalents which are not subject to the

S-44

TABLE OF CONTENTS

management fee. Cash interest paid increased due to higher payments on SBA debentures, partially offset by lower payments on the WM Credit Facility. We are required to make interest payments on our SBA debentures semi-annually in March and September through maturity. The weighted average outstanding balance on our SBA debentures, excluding debt issuance costs, increased from \$143.7 million for the year ended December 31, 2015, to \$149.9 million for the year ended December 31, 2016. Additionally, during the first and second quarter of 2015, \$65.9 million and \$22.6 million, respectively, of the weighted average outstanding balance for the year ended December 31, 2015, carried interest at a lower pre-pooling, short-term rate. Consequently, we paid cash interest of \$4.7 million on our SBA debentures for the year ended December 31, 2016 compared to \$3.2 million for the year ended December 31, 2015. This increase was partially offset by a decline in cash paid for interest on our WM Credit Facility from \$1.4 million in the year ended December 31, 2015 to \$0 in the year ended December 31, 2016, due to the retirement of that facility.

Net (purchases and originations) repayments of portfolio investments

During the year ended December 31, 2016, net purchases were due to \$68.2 million of cash we used to purchase portfolio investments, offset by \$44.6 million of cash we received from amortized cost repayments on our portfolio investments. During the year ended December 31, 2015, net repayments were due to \$124.0 million of cash we used to purchase portfolio investments, offset by \$124.0 million of cash we received from amortized cost repayments on our portfolio investments.

Net borrowings (repayment) on debt facilities

Net borrowings of \$9.5 million for the year ended December 31, 2016, were attributable to advances received under the PWB Credit Facility which was used to fund investment purchases and general corporate activities.

Borrowings

SBA Debentures

SBIC I LP has a SBIC license that allowed it to obtain leverage by issuing SBA-guaranteed debentures. These debentures are non-recourse to us, and bear interest payable semi-annually, and each debenture has a maturity date that is ten years following issuance. The interest rate on SBA debentures are fixed at the first pooling date after issuance, which is March and September of each year, at market-driven spreads over U.S. Treasury Notes with ten-year maturities. SBA regulations currently limit the amount that an SBIC may borrow up to a maximum of \$150 million when it has at least \$75 million in regulatory capital, receives a leverage commitment from the SBA and has been through an examination by the SBA subsequent to licensing. For two or more SBICs under common control, the maximum amount of outstanding SBA-provided leverage cannot exceed \$350 million. As of December 31, 2017 and 2016, SBIC I LP had fully drawn the \$149.9 million of leverage commitments from the SBA, which bears interest at a weighted-average fixed cash interest rate of 3.18%.

S-45

TABLE OF CONTENTS

The following table shows our outstanding SBA debentures payable as of December 31, 2017 and 2016 (in thousands):

Pooling Date	Maturity Date	Fixed Interest Rate	SBA debentures outstanding	
			December 31, 2017	December 31, 2016
September 19, 2012	September 1, 2022	3.049%	\$ 14,000	\$ 14,000
September 25, 2013	September 1, 2023	4.448	7,000	7,000
March 26, 2014	March 1, 2024	3.995	5,000	5,000
September 24, 2014	September 1, 2024	3.819	4,110	4,110
September 24, 2014	September 1, 2024	3.370	31,265	31,265
March 25, 2015	March 1, 2025	2.872	65,920	65,920
September 23, 2015	September 1, 2025	3.184	22,585	22,585
SBA debentures outstanding			149,880	149,880
Unamortized debt issuance costs			(2,657)	(3,037)
SBA debentures outstanding, net of unamortized debt issuance costs			\$ 147,223	\$ 146,843

On a stand-alone basis, SBIC I LP held \$251.6 million and \$247.5 million in assets at December 31, 2017 and 2016, respectively, which accounted for approximately 70% and 81% of the Company's total consolidated assets, respectively.

SBIC I LP is periodically examined and audited by the SBA's staff to determine its compliance with SBA regulations. If SBIC I LP fails to comply with applicable SBA regulations, the SBA could, depending on the severity of the violation, limit or prohibit SBIC I LP's use of debentures, declare outstanding debentures immediately due and payable, and/or limit SBIC I LP from making new investments. In addition, SBIC I LP may also be limited in its ability to make distributions to OFS Capital if it does not have sufficient capital in accordance with SBA regulations. Such actions by the SBA would in turn, negatively affect OFS Capital.

PWB Credit Facility

We are party to a BLA with Pacific Western Bank, as lender, to provide us with a senior secured revolving credit facility, or PWB Credit Facility. The PWB Credit Facility is available for general corporate purposes including investment funding and was scheduled to mature on October 31, 2018. The maximum availability of the PWB Credit Facility is equal to 50% of the aggregate outstanding principal amount of eligible loans included in the borrowing base, which excludes subordinated loan investments (as defined in the BLA) and as otherwise specified in the BLA. The PWB Credit Facility is guaranteed by OFS Capital WM and secured by all of our current and future assets excluding assets held by SBIC I LP and the Company's partnership interests in SBIC I LP and SBIC I GP. The PWB Credit Facility bore interest at a variable rate of the Prime Rate plus a 0.75% margin, with a 5.00% floor, and includes an unused commitment fee, payable monthly in arrears, equal to 0.50% per annum on any unused portion.

On March 7, 2018 the BLA was amended to, among other things, increase the maximum amount available under the PWB Credit Facility from \$35 million to \$50 million, extend the maturity date from October 31, 2018 to January 31, 2020, and change the interest rate floor from 5.00% to 5.25%. We incurred deferred debt issuance costs of \$0.2 million in connection with the amendment.

As of December 31, 2017, availability under the PWB Credit Facility was \$17.4 million, based on the stated advance rate of 50% under the borrowing base.

The BLA contains customary terms and conditions, including, without limitation, affirmative and negative covenants such as information reporting requirements, a minimum tangible net asset value, a minimum quarterly net investment income after incentive fees, and a statutory asset coverage test. The BLA also contains customary events of default, including, without limitation, nonpayment, misrepresentation of

S-46

TABLE OF CONTENTS

representations and warranties in a material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change in investment advisor, and the occurrence of a material adverse change in our financial condition. As of December 31, 2017, the Company was in compliance with the applicable covenants.

WM Asset Sale and Related Transactions

On May 28, 2015, OFS Capital and OFS Capital WM entered into a Loan Portfolio Purchase Agreement with Madison Capital Funding, LLC, a Delaware limited liability company (“Madison”), pursuant to which OFS Capital WM completed the WM Asset Sale. Madison is an affiliated entity of MCF Capital Management, LLC (“MCF”), which was the loan manager for OFS Capital WM prior to the WM Asset Sale under a Loan and Security Agreement among OFS Capital WM, MCF, Wells Fargo Securities, LLC, each of the Lenders from time to time party thereto, and Wells Fargo Delaware Trust Company, N.A. (the “Loan and Security Agreement”).

As a result of the WM Asset Sale, we received cash proceeds of approximately \$67.3 million. On May 28, 2015, the total fair value of the debt investments sold, applying the March 31, 2015 fair value percentages to the principal balances of the respective investments on the sale date, was approximately \$66.7 million. The determination of the fair value of our investments is subject to the good faith determination by our board of directors, which is conducted no less frequently than quarterly, pursuant to our valuation policies and accounting principles generally accepted in the United States.

On May 28, 2015, pursuant to the Loan and Security Agreement, we applied approximately \$52.4 million from the sale proceeds of the WM Asset Sale to pay in full and retire OFS Capital WM’s secured revolving credit facility with the WM Credit Facility. As a result of the termination of the WM Credit Facility, we wrote-off the remaining related unamortized deferred financing closing costs of \$1.2 million on the revolving line of credit.

Other Liquidity Matters

We expect to fund the growth of our investment portfolio utilizing borrowings under SBA debentures, future equity offerings, and issuances of senior securities or future borrowings to the extent permitted by the 1940 Act. We cannot assure stockholders that our plans to raise capital will be successful. In addition, we intend to distribute to our stockholders substantially all of our taxable income in order to satisfy the requirements applicable to RICs under Subchapter M of the Code. Consequently, we may not have the funds or the ability to fund new investments or make additional investments in our portfolio companies. The illiquidity of our portfolio investments may make it difficult for us to sell these investments when desired and, if we are required to sell these investments, we may realize significantly less than their recorded value.

In addition, as a BDC, we generally will be required to meet a coverage ratio of total assets, less liabilities and indebtedness not represented by senior securities (including SBIC I LP’s SBA-guaranteed debt), to total senior securities, which include all of our borrowings (excluding SBA-guaranteed debt) and any outstanding preferred stock (of which we had none at December 31, 2017 and 2016), of at least 200% (or 150% if certain requirements are met). We received an exemptive order from the SEC to permit us to exclude the debt of SBIC I LP guaranteed by the SBA from the definition of Senior Securities in the statutory asset coverage ratio under the 1940 Act. This requirement limits the amount that we may borrow. To fund growth in our investment portfolio in the future, we anticipate needing to raise additional capital from various sources, including the equity markets and the securitization or other debt-related markets, which may or may not be available on favorable terms, if at all.

S-47

TABLE OF CONTENTS**Contractual Obligations and Off-Balance Sheet Arrangements**

The following table shows our contractual obligations as of December 31, 2017 (in thousands):

Contractual Obligations(1)	Payments due by period(2)				
	Total	Less than 1 year	1 – 3 years	3 – 5 years	After 5 years
PWB Credit Facility	\$ 17,600	\$ 17,600	\$ —	\$ —	\$ —
SBA Debentures	149,880	—	—	14,000	135,880
Total	\$ 167,480	\$ 17,600	\$ —	\$ 14,000	\$ 135,880

(1)

Excludes commitments to extend credit to our portfolio companies.

(2)

The PWB Credit Facility was scheduled to mature on October 31, 2018. On March 7, 2018, the BLA was amended to, among other things, extend the maturity date to January 31, 2020. The SBA debentures are scheduled to mature between September 2022 and 2025.

We have entered into contracts with affiliates under which we will incur material future commitments — the Investment Advisory Agreement, pursuant to which OFS Advisor has agreed to serve as our investment adviser, and the Administration Agreement, pursuant to which OFS Services has agreed to furnish us with the facilities and administrative services necessary to conduct our day-to-day operations.

We may become a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. These instruments may include commitments to extend credit and involve, to varying degrees, elements of liquidity and credit risk in excess of the amount recognized in the balance sheet. We had \$9.9 million of total unfunded commitments to three portfolio companies at December 31, 2017.

Distributions

We are taxed as a RIC under the Code. Generally, a RIC is entitled to deduct dividends it pays to its stockholders from its income to determine “taxable income.” Taxable income includes our taxable interest, dividend and fee income, and taxable net capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation, as gains or losses are not included in taxable income until they are realized. In addition, gains realized for financial reporting purposes may differ from gains included in taxable income as a result of our election to recognize gains using installment sale treatment, which generally results in the deferment of gains for tax purposes until notes or other amounts, including amounts held in escrow, received as consideration from the sale of investments are collected in cash. Taxable income includes non-cash income, such as changes in accrued and reinvested interest and dividends, which includes contractual PIK interest, and the amortization of discounts and fees. Cash collections of income resulting from contractual PIK interest and dividends or the amortization of discounts and fees generally occur upon the repayment of the loans or debt securities that include such items. Non-cash taxable income is reduced by non-cash expenses, such as realized losses and depreciation, and amortization expense. Our board of directors maintains a variable dividend policy with the objective of distributing four quarterly distributions in an amount not less than 90-100% of our taxable quarterly income or potential annual income for a particular year. In addition, at the end of the year, we may also pay an additional special dividend, or fifth dividend, such that we may distribute approximately all of our annual taxable income in the year it was earned, while maintaining the option to spill over our excess taxable income to a following year. Each year, a statement on Form 1099-DIV identifying the source of the distribution is mailed to the Company’s stockholders. For the year ended December 31, 2017, approximately \$1.14 per share, \$0.22 per share, and \$0 per share of the Company’s distributions represented ordinary income, long-term capital gain, and a return of capital to its stockholders, respectively. In

addition, on February 12, 2018, our Board declared a special distribution of \$0.37 per share payable on March 29, 2018 to stockholders of record as of March 22, 2018, which represents undistributed net long-term capital gains as of December 31, 2017.

S-48

TABLE OF CONTENTS

For a detailed description of our distributions paid for the years ended December 31, 2017, 2016, and 2015, see “Financial Statements — Note 11” in this prospectus supplement.

Recent Developments

On February 12, 2018, the Board declared a special distribution of \$0.37 per share payable on March 29, 2018 to stockholders of record as of March 22, 2018. In addition, on February 27, 2018, the Company’s Board declared a distribution of \$0.34 per share for the first quarter of 2018, payable on March 29, 2018 to stockholders of record as of March 22, 2018.

Quantitative and Qualitative Disclosures about Market Risk

We are subject to financial market risks, including changes in interest rates. Changes in interest rates affect both our cost of funding and the valuation of our investment portfolio. As of December 31, 2017, 76% of our debt investments bore interest at floating interest rates and 24% of our debt investments bore fixed interest rates, at fair value. The interest rates on our debt investments bearing floating interest rates are usually based on a floating LIBOR, and the debt investments typically contain interest rate re-set provisions that adjust applicable interest rates to current rates on a periodic basis. A significant portion of our loans that are subject to the floating LIBOR rates are also subject to a minimum base rate, or floor, that we charge on our loans if the current market rates are below the respective floors. As of December 31, 2017, 93% of our floating rate loans were based on a floating LIBOR (not subject to a floor).

Our outstanding SBA debentures bear interest at a fixed rate. Our PWB Credit Facility has a floating interest rate provision based on the Prime Rate, with a 5.0% interest rate floor, and was 5.25% as of December 31, 2017.

Assuming that the consolidated balance sheet as of December 31, 2017, were to remain constant and that we took no actions to alter our existing interest rate sensitivity, the following tables show the annualized impact of hypothetical base rate changes in interest rates (in thousands):

Basis point increase	Interest income	Interest expense	Net increase (decrease)
50	\$ 1,226	\$ 89	\$ 1,137
100	2,213	178	2,035
150	3,201	268	2,933
200	4,188	357	3,831
250	5,175	446	4,729
Basis point decrease	Interest income	Interest expense(1)	Net increase (decrease)
50	\$ (593)	\$ —	\$ (593)
100	(952)	—	(952)
150	(1,022)	—	(1,022)
200	(1,031)	—	(1,031)
250	(1,031)	—	(1,031)

(1)

Our PWB Credit Facility contains a 5.0% interest rate floor, and therefore a decline in the Prime Rate would not materially impact interest expense.

Although we believe that the foregoing analysis is indicative of our sensitivity to interest rate changes as of December 31, 2017, it does not adjust for potential changes in the credit market, credit quality, size and composition of the assets in our portfolio, and other business developments, including borrowings under the PWB Credit Facility, that could affect net increase in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the statement above.

S-49

TABLE OF CONTENTS

We are subject to financial market risks, including changes in interest rates. Changes in interest rates affect both our cost of funding and the valuation of our investment portfolio. Our risk management systems and procedures are designed to identify and analyze our risk, to set appropriate policies and limits and to continually monitor these risks and limits by means of reliable administrative and information systems and other policies and programs. Our investment portfolio and investment income may be affected by changes in various interest rates, including LIBOR and the Prime Rate.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2017. The term “disclosure controls and procedures” (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the foregoing evaluation of our disclosure controls and procedures as of December 31, 2017, our Chief Executive Officer and our Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were not effective at the reasonable assurance level due to the material weakness identified in the fourth quarter of 2017 and described in the Management’s Report on Internal Control Over Financial Reporting included in this prospectus supplement.

The identification of the material weakness did not require a fourth quarter 2017 adjustment or impact any of our consolidated financial statements for any prior annual or interim periods. Accordingly, management believes that the financial statements included in this prospectus supplement present fairly in all material respects the Company’s financial condition, results of operations and cash flows for the periods presented. Further, we are developing a remediation plan for this material weakness, which is described in the Management’s Report on Internal Control Over Financial Reporting included in this prospectus supplement.

S-50

TABLE OF CONTENTSSENIOR SECURITIES

Information about our senior securities (including preferred stock, debt securities and other indebtedness) is shown in the following tables for the years ended December 31, 2017, 2016, 2015, 2014, 2013 and 2012. The senior securities table as of December 31, 2017, 2016, 2015, and 2014 was audited by our independent registered public accounting firm, BDO USA, LLP. Information as of December 31, 2013 and 2012 was audited by our previous independent registered public accounting firm. The “ — ” indicates information that the SEC expressly does not require to be disclosed for certain types of senior securities.

(dollar amounts in thousands, except per unit data)	Total Amount Outstanding Exclusive of Treasury Securities(1)	Asset Coverage Per Unit(2)	Involuntary Liquidating Preference Per Unit(3)	Average Market Value Per Unit(4)
Class and Year

(1)

Total amount of each class of senior securities outstanding at the end of the period presented.

(2)

The asset coverage ratio for a class of senior securities representing indebtedness is calculated as our consolidated total assets, less all liabilities and indebtedness not represented by senior securities, divided by total senior securities representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the “Asset Coverage Per Unit.”

(3)

The amount to which such class of senior security would be entitled upon the involuntary liquidation of the issuer in preference to any security junior to it.

(4)

Not applicable because senior securities are not registered for public trading.

(5)

The Small Business Administration Debentures are not subject to the asset coverage requirements of the 1940 Act as a result of exemptive relief granted to us by the SEC.

(6)

The WM Credit Facility was terminated on May 28, 2015.

S-51

TABLE OF CONTENTS

DESCRIPTION OF THE NOTES

The Notes will be issued under a base indenture and a first supplemental indenture thereto, to be entered into between us and U.S. Bank National Association, as trustee. We refer to the indenture and the first supplemental indenture collectively as the “indenture” and to U.S. Bank National Association as the “trustee.” The Notes are governed by the indenture, as required by federal law for all bonds and notes of companies that are publicly offered. An indenture is a contract between us and the financial institution acting as trustee on your behalf, and is subject to and governed by the Trust Indenture Act of 1939, as amended. The trustee has two main roles. First, the trustee can enforce your rights against us if we default. There are some limitations on the extent to which the trustee acts on your behalf, described in the second paragraph under “— Events of Default — Remedies if an Event of Default Occurs” below. Second, the trustee performs certain administrative duties for us with respect to the Notes.

This section includes a summary description of the material terms of the Notes and the indenture. Because this section is a summary, however, it does not describe every aspect of the Notes and the indenture. We urge you to read the indenture because it, and not this description, defines your rights as a holder of the Notes. The base indenture has been attached as an exhibit to the registration statement of which this prospectus supplement is a part and the first supplemental indenture will be attached as an exhibit to a post-effective amendment to the registration statement of which this prospectus supplement is a part, in each case, as filed with the SEC. See “Available Information” in this prospectus supplement for information on how to obtain a copy of the indenture.

General

The Notes will mature on _____, 2025. The principal payable at maturity will be 100% of the aggregate principal amount of the Notes.

The interest rate of the Notes is _____ % per year and will be paid every January 31, April 30, July 31 and October 31, beginning on July 31, 2018, and the regular record dates for interest payments will be every January 15, April 15, July 15 and October 15, commencing July 15, 2018. If an interest payment date falls on a non-business day, the applicable interest payment will be made on the next business day and no additional interest will accrue as a result of such delayed payment. The initial interest period will be the period from and including _____, 2018, to, but excluding, the next interest payment date, and the subsequent interest periods will be the periods from and including an interest payment date to, but excluding, the next interest payment date or the stated maturity date, as the case may be.

We will issue the Notes in denominations of \$25 and integral multiples of \$25 in excess thereof. The Notes will not be subject to any sinking fund and holders of the Notes will not have the option to have the Notes repaid prior to the stated maturity date.

The indenture does not limit the amount of debt (including secured debt) that may be issued by us or our subsidiaries under the indenture or otherwise, but does contain a covenant regarding our asset coverage that would have to be satisfied at the time of our incurrence of additional indebtedness. See “— Covenants” and “— Events of Default.” Other than as described under “— Covenants” below, the indenture does not restrict us from paying dividends or issuing or repurchasing our other securities. Other than restrictions described under “— Merger or Consolidation” below, the indenture does not contain any covenants or other provisions designed to afford holders of the Notes protection in the event of a highly leveraged transaction involving us or if our credit rating declines as the result of a takeover, recapitalization, highly leveraged transaction or similar restructuring involving us that could adversely affect your investment in the Notes. We have the ability to issue indenture securities with terms different from the Notes and, without the consent of the holders of the Notes, to reopen the Notes and issue additional Notes.

S-52

TABLE OF CONTENTS

Covenants

In addition to any other covenants described in this prospectus supplement and the accompanying prospectus, as well as standard covenants relating to payment of principal and interest, maintaining an office where payments may be made or securities can be surrendered for payment and related matters, the following covenants will apply to the Notes:

- We agree that for the period of time during which the Notes are outstanding, we will not violate Section 18(a)(1)(A) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to us from time to time or any successor provisions, whether or not we continue to be subject to such provisions of the 1940 Act, but giving effect, in either case, to any exemptive relief granted to us by the SEC. Currently, these provisions generally prohibit us from incurring additional borrowings, including through the issuance of additional debt securities, unless our asset coverage, as defined in the 1940 Act, equals at least 200% (or 150% if certain requirements are met) after such borrowings. See “Risk Factors — Risks Related to the Notes — Recent legislation may allow us to incur additional leverage” in this prospectus supplement.

- We agree that for the period of time during which Notes are Outstanding, the Company will not declare any dividend (except a dividend payable in stock of the issuer), or declare any other distribution, upon a class of the capital stock of the Company, or purchase any such capital stock, unless, in every such case, at the time of the declaration of any such dividend or distribution, or at the time of any such purchase, the Company has an asset coverage (as defined in the 1940 Act) of at least the threshold specified in Section 18(a)(1)(B) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to the Company from time to time or any successor provisions thereto of the 1940 Act, as such obligation may be amended or superseded, after deducting the amount of such dividend, distribution or purchase price, as the case may be, and in each case giving effect to (i) any exemptive relief granted to the Company by the Commission, and (ii) any SEC no-action relief granted by the Commission to another BDC (or to the Company if it determines to seek such similar no-action or other relief) permitting the BDC to declare any cash dividend or distribution notwithstanding the prohibition contained in Section 18(a)(1)(B) as modified by such provisions of Section 61(a) of the 1940 Act as may be applicable to the Company from time to time, as such obligation may be amended or superseded, in order to maintain such BDC’s status as a regulated investment company under Subchapter M of the Code.

- If, at any time, we are not subject to the reporting requirements of Sections 13 or 15(d) of the Exchange Act to file any periodic reports with the SEC, we agree to furnish to holders of the Notes and the trustee, for the period of time during which the Notes are outstanding, our audited annual consolidated financial statements, within 90 days of our fiscal year end, and unaudited interim consolidated financial statements, within 45 days of our fiscal quarter end (other than our fourth fiscal quarter). All such financial statements will be prepared, in all material respects, in accordance with applicable U.S. GAAP.

Optional Redemption

The Notes may be redeemed in whole or in part at any time or from time to time at our option on or after , upon less than 30 days nor more than 60 days written notice by mail prior to the date fixed for redemption thereof, at a redemption price of 100% of the outstanding principal amount of the Notes to be redeemed plus accrued and unpaid interest payments otherwise payable thereon for the then-current quarterly interest period accrued to, but excluding, the date fixed for redemption.

You may be prevented from exchanging or transferring the Notes when they are subject to redemption. In case any Notes are to be redeemed in part only, the redemption notice will provide that, upon surrender of such Note, you will receive, without a charge, a new Note or Notes of authorized denominations representing the principal amount of your remaining unredeemed Notes. Any exercise of our option to redeem the Notes will be done in compliance with the 1940 Act, to the extent applicable.

TABLE OF CONTENTS

If we redeem only some of the Notes, the trustee or, with respect to global securities, DTC, will determine the method for selection of the particular Notes to be redeemed, in accordance with the indenture and the 1940 Act, to the extent applicable, and in accordance with the rules of any national securities exchange or quotation system on which the Notes are listed. Unless we default in payment of the redemption price, on and after the date of redemption, interest will cease to accrue on the Notes called for redemption.

Global Securities

Each Note will be issued in book-entry form and represented by a global security that we deposit with and register in the name of DTC or its nominee. A global security may not be transferred to or registered in the name of anyone other than the depositary or its nominee, unless special termination situations arise. As a result of these arrangements, the depositary, or its nominee, will be the sole registered owner and holder of all the Notes represented by a global security, and investors will be permitted to own only beneficial interests in a global security. For more information about these arrangements, see “— Book-Entry Procedures” below.

Termination of a Global Security

If a global security is terminated for any reason, interests in it will be exchanged for certificates in non-book-entry form (certificated securities). After that exchange, the choice of whether to hold the certificated Notes directly or in street name will be up to the investor. Investors must consult their own banks or brokers to find out how to have their interests in a global security transferred on termination to their own names, so that they will be holders.

Conversion and Exchange

The Notes are not convertible into or exchangeable for other securities.

Payment and Paying Agents

We will pay interest to the person listed in the trustee’s records as the owner of the Notes at the close of business on a particular day in advance of each due date for interest, even if that person no longer owns the Note on the interest due date. That day, usually about two weeks in advance of the interest due date, is called the “record date.” Because we will pay all the interest for an interest period to the holders on the record date, holders buying and selling the Notes must work out between themselves the appropriate purchase price. The most common manner is to adjust the sales price of the Notes to prorate interest fairly between buyer and seller based on their respective ownership periods within the particular interest period. This prorated interest amount is called “accrued interest.”

Payments on Global Securities

We will make payments on the Notes so long as they are represented by a global security in accordance with the applicable policies of the depositary as in effect from time to time. Under those policies, we will make payments directly to the depositary, or its nominee, and not to any indirect holders who own beneficial interests in the global security. An indirect holder’s right to those payments will be governed by the rules and practices of the depositary and its participants, as described under “— Book-Entry Procedures” below.

Payments on Certificated Securities

In the event the Notes become represented by certificated securities, we will make payments on the Notes as follows. We will pay interest that is due on an interest payment date to the holder of the Notes as shown on the trustee’s records as of the close of business on the regular record date. We will make all payments of principal and premium, if any, by check at the office of the applicable trustee in New York, New York and/or at other offices that may be specified in the indenture or a notice to holders against surrender of the Note.

S-54

TABLE OF CONTENTS

Alternatively, if the holder asks us to do so, we will pay any amount that becomes due on the debt security by wire transfer of immediately available funds to an account at a bank in New York City, on the due date. To request payment by wire, the holder must give the applicable trustee or other paying agent appropriate transfer instructions at least 15 business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person who is the holder on the relevant regular record date. Any wire instructions, once properly given, will remain in effect unless and until new instructions are given in the manner described above.

Payment When Offices Are Closed

If any payment is due on the Notes on a day that is not a business day, we will make the payment on the next day that is a business day. Payments made on the next business day in this situation will be treated under the indenture as if they were made on the original due date. Such payment will not result in a default under the Notes or the indenture, and no interest will accrue on the payment amount from the original due date to the next day that is a business day. Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive payments on the Notes.

Events of Default

You will have rights if an Event of Default occurs in respect of the Notes and the Event of Default is not cured, as described later in this subsection.

The term “Event of Default” in respect of the Notes means any of the following:

- We do not pay the principal of any Note when due and payable at maturity;
- We do not pay interest on any Note when due and payable, and such default is not cured within 30 days of its due date;
- We remain in breach of any other covenant in respect of the Notes for 60 days after we receive a written notice of default stating we are in breach (the notice must be sent by either the trustee or holders of at least 25% of the principal amount of the outstanding Notes);
- We file for bankruptcy or certain other events of bankruptcy, insolvency or reorganization occur and remain undischarged or unstayed for a period of 60 days; or
- On the last business day of each of twenty-four consecutive calendar months, the Notes have an asset coverage (as such term is defined in the 1940 Act) of less than 100%, giving effect to any exemptive relief granted to us by the SEC.

An Event of Default for the Notes may, but does not necessarily, constitute an Event of Default for any other series of debt securities issued under the same or any other indenture. The trustee may withhold notice to the holders of the Notes of any default, except in the payment of principal or interest, if it in good faith considers the withholding of notice to be in the best interests of the holders.

Remedies if an Event of Default Occurs

If an Event of Default has occurred and is continuing, the trustee or the holders of not less than 25% in principal amount of the Notes may declare the entire principal amount of all the Notes to be due and immediately payable, but this does not entitle any holder of Notes to any redemption payout or redemption premium. This is called a declaration of acceleration of maturity. In certain circumstances, a declaration of acceleration of maturity may be canceled by the holders of a majority in principal amount of the Notes if (1) we have deposited with the trustee all amounts due and owing with respect to the Notes (other than principal or any payment that has become due solely by reason of such

acceleration) and certain other amounts, and (2) any other Events of Default have been cured or waived. Except in cases of default, where the trustee has some special duties, the trustee is not required to take any action under the indenture at the request of any holders unless the holders offer the trustee protection from expenses and liability reasonably satisfactory to it (called an “indemnity”). If indemnity reasonably

S-55

TABLE OF CONTENTS

satisfactory to the trustee is provided, the holders of a majority in principal amount of the Notes may direct the time, method and place of conducting any lawsuit or other formal legal action seeking any remedy available to the trustee. The trustee may refuse to follow those directions in certain circumstances. No delay or omission in exercising any right or remedy will be treated as a waiver of that right, remedy or Event of Default.

Before you are allowed to bypass the trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to the Notes, the following must occur:

- You must give the trustee written notice that an Event of Default has occurred and remains uncured;

- The holders of at least 25% in principal amount of all the Notes must make a written request that the trustee take action because of the default and must offer the trustee indemnity, security, or both reasonably satisfactory to it against the cost and other liabilities of taking that action;

- The trustee must not have taken action for 60 days after receipt of the above notice and offer of indemnity and/or security; and

- The holders of a majority in principal amount of the Notes must not have given the trustee a direction inconsistent with the above notice during that 60-day period.

However, you are entitled at any time to bring a lawsuit for the payment of money due on your Notes on or after the due date.

Book-entry and other indirect holders should consult their banks or brokers for information on how to give notice or direction to or make a request of the trustee and how to declare or cancel an acceleration of maturity.

Each year, we will furnish to the trustee a written statement of certain of our officers certifying that to their knowledge we are in compliance with the indenture and the Notes, or else specifying any default.

Waiver of Default

The holders of a majority in principal amount of the Notes may waive any past defaults other than a default:

- in the payment of principal (or premium, if any) or interest; or

- in respect of a covenant that cannot be modified or amended without the consent of each holder of the Notes.

Merger or Consolidation

Under the terms of the indenture, we are generally permitted to consolidate or merge with another entity. We are also permitted to sell all or substantially all of our assets to another entity. However, we may not take any of these actions unless all the following conditions are met:

- where we merge out of existence or convey or transfer our assets substantially as an entirety, the resulting entity must agree to be legally responsible for our obligations under the Notes;

- Immediately after giving effect to the transaction, no default or Event of Default shall have happened and be continuing; and

- we must deliver certain certificates and documents to the trustee.

Modification or Waiver

There are three types of changes we can make to the indenture and the Notes issued thereunder.

S-56

TABLE OF CONTENTS

Changes Requiring Your Approval

First, there are changes that we cannot make to your Notes without your specific approval. The following is a list of those types of changes:

- change the stated maturity of the principal of (or premium, if any, on) or any installment of principal of or interest on the Notes;
- reduce any amounts due on the Notes or reduce the rate of interest on the Notes;
- reduce the amount of principal payable upon acceleration of the maturity of a Note following a default;
- change the place or currency of payment on a Note;
- impair your right to sue for payment;
- reduce the percentage of holders of Notes whose consent is needed to modify or amend the indenture; and
- reduce the percentage of holders of Notes whose consent is needed to waive compliance with certain provisions of the indenture or to waive certain defaults or reduce the percentage of holders of Notes required to satisfy quorum or voting requirements at a meeting of holders of the Notes.

Changes Not Requiring Approval

The second type of change does not require any vote by the holders of the Notes. This type is limited to clarifications and certain other changes that would not adversely affect holders of the Notes in any material respect.

Changes Requiring Majority Approval

Any other change to the indenture and the Notes would require the following approval:

- if the change affects only the Notes, it must be approved by the holders of a majority in principal amount of the Notes; and
- if the change affects more than one series of debt securities issued under the same indenture, it must be approved by the holders of a majority in principal amount of all of the series affected by the change, with all affected series voting together as one class for this purpose.

In each case, the required approval must be given by written consent.

The holders of a majority in principal amount of all of the series of debt securities issued under an indenture, voting together as one class for this purpose, may waive our compliance with some of our covenants in that indenture. However, we cannot obtain a waiver of a payment default or of any of the matters covered by the bullet points included above under “— Changes Requiring Your Approval.”

Further Details Concerning Voting

When taking a vote, we will use the following rules to decide how much principal to attribute to the Notes:

The Notes will not be considered outstanding, and therefore not eligible to vote, if we have deposited or set aside in trust money for their payment or redemption or if we or any affiliate of ours own any Notes. The Notes will also not

be eligible to vote if they have been fully defeased as described later under “— Defeasance — Full Defeasance” below. We will generally be entitled to set any day as a record date for the purpose of determining the holders of the Notes that are entitled to vote or take other action under the indenture. However, the record date may not be earlier than 30 days before the date of the first solicitation of holders to vote on or take such action and not later than the date such solicitation is completed. If we set a record date for a vote or other action to be taken by holders of the Notes, that vote or action may be taken only by persons who are holders of the Notes on the record date and must be taken within eleven months following the record date.

S-57

TABLE OF CONTENTS

Book-entry and other indirect holders should consult their banks or brokers for information on how approval may be granted or denied if we seek to change the indenture or the Notes or request a waiver.

Satisfaction and Discharge

The indenture will be discharged and will cease to be of further effect with respect to the Notes when:

- Either
- all the Notes that have been authenticated have been delivered to the trustee for cancellation; or
- all the Notes that have not been delivered to the trustee for cancellation:
- have become due and payable, or
- will become due and payable at their stated maturity within one year, or
- are to be called for redemption within one year,

and we, in the case of the first, second and third sub-bullets above, have irrevocably deposited or caused to be deposited with the trustee as trust funds in trust solely for the benefit of the holders of the Notes, in amounts as will be sufficient, to pay and discharge the entire indebtedness (including all principal, premium, if any, and interest) on such Notes delivered to the trustee for cancellation (in the case of Notes that have become due and payable on or prior to the date of such deposit) or to the stated maturity or redemption date, as the case may be;

- we have paid or caused to be paid all other sums payable by us under the indenture with respect to the Notes; and
- we have delivered to the trustee an officers' certificate and legal opinion, each stating that all conditions precedent provided for in the indenture relating to the satisfaction and discharge of the indenture and the Notes have been complied with.

Defeasance

The following provisions will be applicable to the Notes. "Defeasance" means that, by depositing with a trustee an amount of cash and/or government securities sufficient to pay all principal and interest, if any, on the Notes when due and satisfying any additional conditions noted below, we will be deemed to have been discharged from our obligations under the Notes. In the event of a "covenant defeasance," upon depositing such funds and satisfying similar conditions discussed below we would be released from certain covenants under the indenture relating to the Notes.

Covenant Defeasance

Under current U.S. federal income tax law and the indenture, we can make the deposit described below and be released from some of the restrictive covenants in the indenture under which the Notes were issued. This is called "covenant defeasance." In that event, you would lose the protection of those restrictive covenants but would gain the protection of having money and government securities set aside in trust to repay your Notes. In order to achieve covenant defeasance, the following must occur:

- Since the Notes are denominated in U.S. dollars, we must deposit in trust for the benefit of all holders of the Notes a combination of cash and U.S. government or U.S. government agency notes or bonds that will generate enough cash

to make interest, principal and any other payments on the Notes on their various due dates;

-

We must deliver to the trustee a legal opinion of our counsel confirming that, under current U.S. federal income tax law, we may make the above deposit without causing you to be taxed on the Notes any differently than if we did not make the deposit;

-

We must deliver to the trustee a legal opinion of our counsel stating that the above deposit does not require registration by us under the 1940 Act, and a legal opinion and officers' certificate stating that all conditions precedent to covenant defeasance have been complied with;

S-58

TABLE OF CONTENTS

- Defeasance must not result in a breach or violation of, or result in a default under, the indenture or any of our other material agreements or instruments; and

- No default or Event of Default with respect to the Notes shall have occurred and be continuing and no defaults or events of default related to bankruptcy, insolvency or reorganization shall occur during the next 90 days.

If we accomplish covenant defeasance, you can still look to us for repayment of the Notes if there were a shortfall in the trust deposit or the trustee is prevented from making payment. In fact, if one of the remaining Events of Default occurred (such as our bankruptcy) and the Notes became immediately due and payable, there might be a shortfall. Depending on the event causing the default, you may not be able to obtain payment of the shortfall.

Full Defeasance

If there is a change in U.S. federal income tax law, as described below, we can legally release ourselves from all payment and other obligations on the Notes (called “full defeasance”) if we put in place the following other arrangements for you to be repaid:

- Since the Notes are denominated in U.S. dollars, we must deposit in trust for the benefit of all holders of the Notes a combination of money and U.S. government or U.S. government agency notes or bonds that will generate enough cash to make interest, principal and any other payments on the Notes on their various due dates;

- We must deliver to the trustee a legal opinion confirming that there has been a change in current U.S. federal tax law or an Internal Revenue Service (“IRS”) ruling that allows us to make the above deposit without causing you to be taxed on the Notes any differently than if we did not make the deposit;

- We must deliver to the trustee a legal opinion of our counsel stating that the above deposit does not require registration by us under the 1940 Act, and a legal opinion and officers’ certificate stating that all conditions precedent to defeasance have been complied with;

- Defeasance must not result in a breach or violation of, or constitute a default under, the indenture or any of our other material agreements or instruments; and

- No default or Event of Default with respect to the Notes shall have occurred and be continuing and no defaults or events of default related to bankruptcy, insolvency or reorganization shall occur during the next 90 days.

If we ever did accomplish full defeasance, as described above, you would have to rely solely on the trust deposit for repayment of the Notes. You could not look to us for repayment in the unlikely event of any shortfall. Conversely, the trust deposit would most likely be protected from claims of our lenders and other creditors if we ever became bankrupt or insolvent.

Form, Exchange and Transfer of Certificated Registered Securities

If registered Notes cease to be issued in book-entry form, they will be issued:

- only in fully registered certificated form;

- without interest coupons; and

- unless we indicate otherwise, in denominations of \$25 and amounts that are multiples of \$25.

Holders may exchange their certificated securities for Notes of smaller denominations or combined into fewer Notes of larger denominations, as long as the total principal amount is not changed and as long as the denomination is equal to or greater than \$25.

Holders may exchange or transfer their certificated securities at the office of the trustee. We have appointed the trustee to act as our agent for registering Notes in the names of holders transferring Notes. We may appoint another entity to perform these functions or perform them ourselves.

S-59

TABLE OF CONTENTS

Holders will not be required to pay a service charge to transfer or exchange their certificated securities, but they may be required to pay any tax or other governmental charge associated with the transfer or exchange. The transfer or exchange will be made only if our transfer agent is satisfied with the holder's proof of legal ownership.

We may appoint additional transfer agents or cancel the appointment of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If any certificated securities of a particular series are redeemable and we redeem less than all the Notes, we may block the transfer or exchange of those Notes selected for redemption during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers or exchanges of any certificated Notes selected for redemption, except that we will continue to permit transfers and exchanges of the unredeemed portion of any Note that will be partially redeemed.

If registered Notes are issued in book-entry form, only the depository will be entitled to transfer and exchange the Notes as described in this subsection, since it will be the sole holder of the Notes.

Resignation of Trustee

The trustee may resign or be removed with respect to the Notes provided that a successor trustee is appointed to act with respect to the Notes. In the event that two or more persons are acting as trustee with respect to different series of indenture securities under the indenture, each of the trustees will be a trustee of a trust separate and apart from the trust administered by any other trustee.

Governing Law

The indenture and the Notes will be governed by and construed in accordance with the laws of the State of New York.

Indenture Provisions — Ranking

The Notes will be our direct unsecured obligations and will rank:

- pari passu with our existing and future unsecured, unsubordinated indebtedness;
- senior to any of our future indebtedness that expressly provides it is subordinated to the Notes; and
- effectively subordinated to all of our existing and future secured indebtedness (including indebtedness that is initially unsecured to which we subsequently grant security), to the extent of the value of the assets securing such indebtedness, including, without limitation, borrowings under the PWB Credit Facility; and
- structurally subordinated to all existing and future indebtedness and other obligations of any of our subsidiaries, including SBIC I LP and any other future SBIC subsidiary of the Company.

The Trustee under the Indenture

U.S. Bank National Association serves as the trustee, paying agent, and security registrar under the indenture.

Separately, our securities are held by U.S. Bank National Association pursuant to a custody agreement.

Book-Entry Procedures

The Notes will be represented by global securities that will be deposited and registered in the name of DTC or its nominee. This means that, except in limited circumstances, you will not receive certificates for the Notes. Beneficial interests in the Notes will be represented through book-entry accounts of financial institutions acting on behalf of beneficial owners as direct and indirect participants in DTC. Investors may elect to hold interests in the Notes through either DTC, if they are a participant, or indirectly through organizations that are participants in DTC.

S-60

TABLE OF CONTENTS

The Notes will be issued as fully registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully registered certificate will be issued for each issuance of the Notes, in the aggregate principal amount thereof, and will be deposited with DTC. Interests in the Notes will trade in DTC's Same Day Funds Settlement System, and any permitted secondary market trading activity in such Notes will, therefore, be required by DTC to be settled in immediately available funds. None of the Company, the trustee or the paying agent will have any responsibility for the performance by DTC or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity, corporate and municipal debt issues, and money market instruments from over 100 countries that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC").

DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). DTC has a Standard & Poor's Ratings Services' rating of AA+. The DTC Rules applicable to its participants are on file with the SEC. More information about DTC can be found at www.dtcc.com and www.dtc.org.

Purchases of the Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the Notes on DTC's records. The ownership interest of each actual purchaser of each security, or the "Beneficial Owner," is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Notes are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Notes, except in the event that use of the book-entry system for the Notes is discontinued.

To facilitate subsequent transfers, all Notes deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested by an authorized representative of DTC. The deposit of the Notes with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Notes; DTC's records reflect only the identity of the Direct Participants to whose accounts the Notes are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

S-61

TABLE OF CONTENTS

Redemption notices shall be sent to DTC. If less than all of the Notes within an issue are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed. Redemption proceeds, distributions, and interest payments on the Notes will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from us or the trustee on the payment date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC nor its nominee, the trustee, or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and interest payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of us or the trustee, but disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as securities depository with respect to the Notes at any time by giving reasonable notice to us or to the trustee. Under such circumstances, in the event that a successor securities depository is not obtained, certificates are required to be printed and delivered. We may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository). In that event, certificates will be printed and delivered to DTC.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be reliable, but we take no responsibility for its accuracy.

S-62

TABLE OF CONTENTS

CERTAIN U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following summary describes certain U.S. federal income tax consequences applicable to an investment in the Notes. This summary does not purport to be a complete description of the income tax considerations applicable to such an investment. The summary is based upon the Code, U.S. Treasury regulations, and administrative and judicial interpretations, each as of the date of this prospectus supplement and all of which are subject to change, potentially with retroactive effect, or to different interpretations. We cannot assure you that the IRS will not challenge one or more of the tax consequences described in this summary, and we have not obtained, nor do we intend to obtain, any ruling from the IRS or opinion of counsel with respect to the tax consequences of an investment in the Notes. Investors should consult their own tax advisors with respect to tax considerations that pertain to their investment in the Notes.

This summary discusses only Notes held as capital assets within the meaning of the Code (generally, property held for investment purposes) and does not purport to address persons in special tax situations, such as banks and other financial institutions, insurance companies, controlled foreign corporations, passive foreign investment companies, real estate investment trusts and regulated investment companies (and shareholders of such corporations), dealers in securities or currencies, traders in securities, former citizens of the United States, persons holding the Notes as a position in a “straddle,” “hedge,” “constructive sale transaction,” “conversion transaction,” “wash sale” or other integrated transaction for U.S. federal income tax purposes, entities that are tax-exempt for U.S. federal income tax purposes, retirement plans, individual retirement accounts, tax-deferred accounts, persons subject to the alternative minimum tax, pass-through entities (including partnerships and entities and arrangements classified as partnerships for U.S. federal income tax purposes) and beneficial owners of pass-through entities, or U.S. holders (as defined below) whose functional currency (as defined in the Code) is not the U.S. dollar. It does not address beneficial owners of the Notes other than original purchasers of the Notes who acquire the Notes in this offering for cash at a price equal to their issue price (i.e., the first price at which a substantial amount of the Notes is sold for money to investors (other than to bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placements agents or wholesalers)). It also does not address the U.S. federal income tax consequences to beneficial owners of the Notes subject to the special tax accounting rules under Section 451(b) of the Code. In addition, this summary only addresses U.S. federal income tax consequences, and, except as otherwise noted below, does not address other U.S. federal tax consequences, including, for example, estate or gift tax consequences. This summary also does not address any U.S. state or local or non-U.S. tax consequences. Investors considering purchasing the Notes should consult their own tax advisors concerning the application of the U.S. federal income tax laws to their individual circumstances, as well as any consequences to such investors relating to purchasing, owning and disposing of the Notes under the laws of any state, local, foreign or other taxing jurisdiction.

If a partnership (including an entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds any Notes, the U.S. federal income tax treatment of a partner of the partnership generally will depend upon the status of the partner, the activities of the partnership and certain determinations made at the partner level. Partnerships holding Notes, and persons holding interests in such partnerships, should each consult their own tax advisors as to the consequences of investing in the Notes in their individual circumstances.

Taxation of U.S. Holders

For purposes of this discussion, the term “U.S. holder” means a beneficial owner of a Note that is, for U.S. federal income tax purposes:

- an individual who is a citizen or resident of the United States;
- a corporation created or organized in or under the laws of the United States, any state thereof, or the District of Columbia;

TABLE OF CONTENTS

- a trust (i) the administration of which is subject to the primary supervision of a U.S. court and that has one or more “United States persons” (within the meaning of the Code) that have the authority to control all substantial decisions of the trust or (ii) that has made a valid election under applicable U.S. Treasury regulations to be treated as a “United States person” (within the meaning of the Code); or

- an estate the income of which is subject to U.S. federal income taxation regardless of its source.

Payments of Interest

Payments or accruals of interest on a Note generally will be taxable to a U.S. holder as ordinary interest income at the time they are received (actually or constructively) or accrued, in accordance with the U.S. holder’s regular method of tax accounting.

Sale, Exchange, Redemption, Retirement or Other Taxable Disposition of a Note

Upon the sale, exchange, redemption, retirement or other taxable disposition of a Note, a U.S. holder generally will recognize capital gain or loss equal to the difference between the amount realized on the sale, exchange, redemption, retirement or other taxable disposition (excluding amounts representing accrued and unpaid interest, which are treated as ordinary interest income to the extent not previously included in income) and the U.S. holder’s adjusted tax basis in the Note. A U.S. holder’s adjusted tax basis in a Note generally will equal the U.S. holder’s initial investment in the Note. Capital gain or loss generally will be long-term capital gain or loss if the Note was held for more than one year. Long-term capital gains recognized by individuals and certain other non-corporate U.S. holders generally are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations under the Code.

Additional Tax on Net Investment Income

An additional tax of 3.8% is imposed on certain “net investment income” (or “undistributed net investment income,” in the case of certain U.S. holders that are estates and trusts) received by certain U.S. holders with adjusted gross income above certain threshold amounts. “Net investment income” generally includes interest payments on, and gain recognized from the sale, exchange, redemption, retirement or other taxable disposition of, the Notes, less certain deductions. U.S. holders should consult their own tax advisors regarding the effect, if any, of this tax on their ownership and disposition of the Notes.

Backup Withholding and Information Reporting

In general, a U.S. holder will be subject to U.S. federal backup withholding tax at the applicable rate with respect to payments on the Notes and the proceeds of a sale, exchange, redemption, retirement or other taxable disposition of the Notes, unless the U.S. holder is an exempt recipient and appropriately establishes that exemption, or provides its taxpayer identification number to the paying agent and certifies, under penalty of perjury, that it is not subject to backup withholding on an IRS Form W-9 and otherwise complies with the applicable requirements of the backup withholding rules. Backup withholding is not an additional tax. The amount of any backup withholding from a payment to a U.S. holder may be allowed as a credit against such U.S. holder’s U.S. federal income tax liability and may entitle such U.S. holder to a refund, provided the required information is furnished to the IRS in a timely manner. In addition, payments on the Notes made to, and the proceeds of a sale, exchange, redemption, retirement or other taxable disposition by, a U.S. holder generally will be subject to information reporting requirements, unless such U.S. holder is an exempt recipient and appropriately establishes that exemption.

Taxation of Non-U.S. Holders

For purposes of this discussion, the term “non-U.S. holder” means a beneficial owner of a Note that is neither a U.S. holder nor a partnership for U.S. federal income tax purposes.

TABLE OF CONTENTS

Interest on the Notes

Subject to the discussions of backup withholding and Foreign Account Tax Compliance Act, or FATCA, withholding below, payments to a non-U.S. holder of interest on the Notes generally will not be subject to U.S. federal income tax and will be exempt from withholding of U.S. federal income tax under the “portfolio interest” exemption if such non-U.S. holder properly certifies as to such non-U.S. holder’s foreign status, as described below, and:

- such non-U.S. holder does not own, actually or constructively, 10% or more of the total combined voting power of all classes of our stock entitled to vote;
- such non-U.S. holder is not a “controlled foreign corporation” that is related to us (actually or constructively);
- such non-U.S. holder is not a bank whose receipt of interest on the Notes is in connection with an extension of credit made pursuant to a loan agreement entered into in the ordinary course of such non-U.S. holder’s trade or business; and
- interest on the Notes is not effectively connected with such non-U.S. holder’s conduct of a U.S. trade or business (or, in the case of an applicable income tax treaty, such interest is not attributable to a permanent establishment maintained by such non-U.S. holder in the United States).

The portfolio interest exemption generally applies only if a non-U.S. holder also appropriately certifies as to such non-U.S. holder’s foreign status. A non-U.S. holder can generally meet the certification requirement by providing a properly executed IRS Form W-8BEN or IRS Form W-8BEN-E (or applicable successor form) to the applicable withholding agent. If a non-U.S. holder holds the Notes through a financial institution or other agent acting on such non-U.S. holder’s behalf, such non-U.S. holder may be required to provide appropriate certifications to the agent. Such non-U.S. holder’s agent will then generally be required to provide appropriate certifications to the applicable withholding agent, either directly or through other intermediaries.

If a non-U.S. holder cannot satisfy the requirements described above, payments of interest made to such non-U.S. holder will be subject to U.S. federal withholding tax at a 30% rate, unless (i) such non-U.S. holder provides the applicable withholding agent with a properly executed IRS Form W-8BEN or IRS Form W-8BEN-E (or applicable successor form) claiming an exemption from (or a reduction of) withholding under the benefits of an income tax treaty, or (ii) the payments of such interest are effectively connected with such non-U.S. holder’s conduct of a trade or business in the United States and such non-U.S. holder meets the certification requirements described below under “— Income or Gain Effectively Connected with a U.S. Trade or Business”.

Disposition of the Notes

Subject to the discussions of backup withholding and FATCA withholding below, a non-U.S. holder generally will not be subject to U.S. federal income tax on any gain realized on the sale, redemption, exchange, retirement, or other taxable disposition of a Note unless:

- the gain is effectively connected with the conduct by such non-U.S. holder of a U.S. trade or business (and, if required by an applicable income tax treaty, such non-U.S. holder maintains a permanent establishment in the United States to which such gain is attributable); or
- such non-U.S. holder is a non-resident alien individual who has been present in the United States for 183 days or more in the taxable year of disposition and certain other requirements are met.

If a non-U.S. holder’s gain is described in the first bullet point above, such non-U.S. holder generally will be subject to U.S. federal income tax in the manner described under “— Income or Gain Effectively Connected with a U.S. Trade or

Business” below. A non-U.S. holder described in the second bullet point above will be subject to a flat 30% (or lower applicable income tax treaty rate) U.S. federal income tax on the gain derived from the sale or other disposition, which may be offset by certain U.S. source capital losses.

S-65

TABLE OF CONTENTS

To the extent that any portion of the amount realized on a sale, redemption, exchange, retirement or other taxable disposition of a Note is attributable to accrued but unpaid interest on the Note, this amount generally will be taxed in the same manner as described above in “— Interest on the Notes.”

Income or Gain Effectively Connected with a U.S. Trade or Business

If any interest on the Notes or gain from the sale, redemption, exchange, retirement, or other taxable disposition of the Notes is effectively connected with a non-U.S. holder’s conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, such non-U.S. holder maintains a permanent establishment in the United States to which such interest or gain is attributable), then the interest income or gain will be subject to U.S. federal income tax at regular income tax rates generally in the same manner as if such non-U.S. holder were a U.S. holder (but without regard to the additional tax on net investment income described above). Effectively connected interest income will not be subject to U.S. federal withholding tax if a non-U.S. holder satisfies certain certification requirements by providing to the applicable withholding agent a properly executed IRS Form W-8ECI (or successor form). In addition, if a non-U.S. holder is a corporation, that portion of such non-U.S. holder’s earnings and profits that are effectively connected with such non-U.S. holder’s conduct of a U.S. trade or business may also be subject to a “branch profits tax” at a 30% rate, unless an applicable income tax treaty provides for a lower rate. For this purpose, interest received on a Note and gain recognized on the disposition of a Note will be included in earnings and profits if the interest or gain is effectively connected with the conduct by such non-U.S. holder of a U.S. trade or business.

Backup Withholding and Information Reporting

Under current U.S. Treasury regulations, the amount of interest paid to a non-U.S. holder and the amount of tax withheld, if any, from those payments must be reported annually to the IRS and each non-U.S. holder. These reporting requirements apply regardless of whether U.S. withholding tax on such payments was reduced or eliminated by any applicable tax treaty or otherwise. Copies of the information returns reporting those payments and the amounts withheld may also be made available to the tax authorities in the country where a non-U.S. holder is a resident under the provisions of an applicable income tax treaty or agreement.

Backup withholding generally will not apply to payments of interest to a non-U.S. holder on a Note if the certification described above in “— Interest on the Notes” is duly provided or such non-U.S. holder otherwise establishes an exemption. Additionally, the gross proceeds from a non-U.S. holder’s disposition of Notes may be subject under certain circumstances to information reporting and backup withholding unless the non-U.S. holder provides an IRS Form W-8BEN or W-8BEN-E (or other applicable form) certifying that the non-U.S. holder is not a United States person or otherwise qualifies for an exemption.

Non-U.S. holders should consult their own tax advisors regarding application of the backup withholding rules to their particular circumstances and the availability of and procedure for obtaining an exemption from backup withholding.

Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules may be credited against a non-U.S. holder’s U.S. federal income tax liability (which may result in such non-U.S. holder being entitled to a refund of U.S. federal income tax), provided that the required information is timely provided to the IRS.

Estate Tax

A Note that is held by an individual who, at the time of death, is not a citizen or resident of the United States (as specially defined for U.S. federal estate tax purposes) generally will not be subject to the U.S. federal estate tax, unless, at the time of death, (i) such individual directly or indirectly, actually or constructively, owns ten percent or more of the total combined voting power of all classes of our stock entitled to vote within the meaning of Section 871(h)(3) of the Code and the Treasury Regulations thereunder or (ii) such individual’s interest in the Notes is effectively connected with the individual’s conduct of a United States trade or business.

TABLE OF CONTENTS

FATCA

Legislation commonly referred to as the “Foreign Account Tax Compliance Act,” or “FATCA,” generally imposes a 30% withholding tax on payments of certain types of income to foreign financial institutions (“FFIs”) unless such FFIs either (i) enter into an agreement with the U.S. Treasury to report certain required information with respect to accounts held by U.S. persons (or held by foreign entities that have U.S. persons as substantial owners) or (ii) reside in a jurisdiction that has entered into an intergovernmental agreement (“IGA”) with the United States to collect and share such information and are in compliance with the terms of such IGA and any enabling legislation or regulations. The types of income subject to the tax include U.S. source interest (including interest on a Note) and dividends and, after December 31, 2018, the gross proceeds from the sale of any property that could produce U.S. source interest (such as a Note) or dividends. The information required to be reported includes the identity and taxpayer identification number of each account holder that is a U.S. person and transaction activity within the holder’s account. In addition, subject to certain exceptions, this legislation also imposes a 30% withholding on payments to foreign entities that are not FFIs unless the foreign entity certifies that it does not have a greater than 10% U.S. owner or provides the withholding agent with identifying information on each greater than 10% U.S. owner. Depending on the status of a beneficial owner and the status of the intermediary through which it holds the Notes, a beneficial owner could be subject to this 30% withholding tax with respect to interest paid on the Notes and proceeds from the sale of the Notes. Under certain circumstances, a beneficial owner might be eligible for a refund or credit of such taxes.

Holders and beneficial owners should consult their own tax advisors regarding FATCA and whether it may be relevant to their acquisition, ownership and disposition of the Notes.

You should consult your own tax advisor with respect to the particular tax consequences to you of an investment in the Notes, including the possible effect of any pending legislation or proposed regulations.

TABLE OF CONTENTS

UNDERWRITING

Ladenburg Thalmann & Co. Inc. is acting as the representative of the underwriters for this offering. Subject to the terms and conditions set forth in an underwriting agreement dated _____, 2018 among us, OFS Advisors, OFS Service, the underwriters, we have agreed to sell to the underwriters, and each of the underwriters has agreed, severally and not jointly, to purchase from us, the aggregate principal amount of Notes indicated in the table below:

Underwriter	Principal Amount of Notes
Ladenburg Thalmann & Co. Inc.	
Janney Montgomery Scott LLC	
B. Riley FBR, Inc.	
BB&T Capital Markets, a division of BB&T Securities, LLC	
National Securities Corporation	
Total	

Ladenburg Thalmann & Co. Inc. and Janney Montgomery Scott LLC are acting as book-running managers of this offering.

The underwriting agreement provides that the obligations of the several underwriters are subject to certain conditions precedent such as the receipt by the underwriters of officers' certificates and legal opinions. The underwriting agreement provides that the underwriters will purchase all of the Notes (other than those covered by the over-allotment option described below) if they purchase any of the Notes. If an underwriter defaults, the underwriting agreement provides that, under the circumstances, the purchase commitments of the non-defaulting underwriters may be increased or the underwriting agreement may be terminated. We have agreed to indemnify the underwriters and certain of their controlling persons against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters have advised us that they currently intend to make a market in the Notes. However, the underwriters are not obligated to do so and may discontinue any market-making activities at any time without notice. No assurance can be given as to the liquidity of the trading market for the Notes. If an active public trading market for the Notes does not develop, the market price and liquidity of the Notes may be adversely affected.

The underwriters are offering the Notes, subject to their acceptance of the Notes from us and subject to prior sale. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

The underwriters propose to initially offer some of the Notes directly to the public at the public offering price set forth on the cover page of this prospectus supplement. If all of the Notes are not sold at the public offering price, the representative may change the public offering price and other selling terms. Investors must pay for any Notes purchased in this offering on or before _____, 2018. The representative has advised us that the underwriters do not intend to confirm any sales to any accounts over which they exercise discretionary authority.

The following table shows the sales load to be paid to the underwriters in connection with this offering assuming (1) no exercise of and (2) exercise in full of the underwriters' over-allotment option.

	Per Note	Total	
		Without Over-allotment	With Full Over-allotment
Public offering price	%	\$	\$
Sales load (underwriting discounts and commissions)	%	\$	\$
Proceeds to us (before expenses)	%	\$	\$

S-68

TABLE OF CONTENTS

We estimate expenses payable by us in connection with this offering will be approximately \$350,000. As part of our payment of our offering expenses, we have agreed to pay the underwriters an amount not to exceed \$7,500 for the fees and disbursements of counsel to the underwriters in connection with the review by FINRA of the terms of the sale of the Notes.

Listing

We intend to list the Notes on The Nasdaq Global Select Market. We expect trading in the Notes on The Nasdaq Global Select Market to begin within 30 days after the original issue date under the trading symbol "OFSL". We offer no assurances that an active trading market for the Notes will develop and continue after the offering.

Over-Allotment Option

We have granted to the underwriters an option to purchase from us up to an additional \$ million aggregate principal amount of the Notes on or before April 30, 2018 at the public offering price set forth on the cover of this prospectus supplement less the sales load. The underwriters may exercise the option solely for the purpose of covering over-allotments, if any, in connection with this offering. If the underwriters exercise this overallotment option, each will be obligated, subject to the specified conditions, to purchase a number of additional Notes proportionate to that underwriter's initial principal amount reflected in the table above.

No Sales of Similar Securities

Subject to certain exceptions, we have agreed not to, directly or indirectly, offer, pledge, sell, contract to sell, grant any option for the sale of, make any short sale or otherwise transfer or dispose of any debt securities issued or guaranteed by the Company or any securities convertible into or exercisable or exchangeable for debt securities issued or guaranteed by the Company, enter into any swap or other derivatives transaction that transfers any of the economic benefits or risks of ownership of any debt securities issued or guaranteed by the Company or file any registration statement under the Securities Act with respect to any of the foregoing for a period of 45 days after the date of this prospectus supplement without first obtaining the written consent of Ladenburg Thalmann & Co. Inc., other than certain private sales of debt securities to a limited number of institutional investors. This consent may be given at any time without public notice.

Stabilization

The underwriters have advised us that, pursuant to Regulation M under the Exchange Act, certain persons participating in the offering may engage in transactions including over-allotment, covering transactions and stabilizing transactions, which may have the effect of stabilizing or maintaining the market price of the Notes at a level above that which might otherwise prevail in the open market. Over-allotment involves syndicate sales of securities in excess of the aggregate principal amount of securities to be purchased by the underwriters in the offering, which creates a short position for the underwriters. Covering transactions involve purchases of the securities in the open market after the distribution has been completed in order to cover short positions.

A stabilizing bid is a bid for the purchase of Notes on behalf of the underwriters for the purpose of fixing or maintaining the price of the Notes. A syndicate covering transaction is the bid for or the purchase of Notes on behalf of the underwriters to reduce a short position incurred by the underwriters in connection with the offering. Similar to other purchase transactions, the underwriter's purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of the Notes or preventing or retarding a decline in the market price of the Notes. As a result, the price of the Notes may be higher than the price that might otherwise exist in the open market. A penalty bid is an arrangement permitting the underwriters to reclaim the selling concession otherwise accruing to a syndicate member in connection with the offering if the Notes originally sold by such syndicate member are purchased in a syndicate covering transaction and therefore have not been effectively placed by such syndicate member. The underwriters may conduct these transactions on The Nasdaq Global Select Market, in the over-the-counter market or otherwise.

S-69

TABLE OF CONTENTS

Neither we, nor any of the underwriters makes any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the Notes. The underwriters are not obligated to engage in these activities and, if commenced, any of the activities may be discontinued at any time.

Electronic Distribution

A prospectus in electronic format may be made available by e-mail or on the web sites or through online services maintained by one or more of the underwriters and/or selling group members participating in this offering, or by their affiliates. In those cases, prospective investors may view offering terms online and, depending upon the particular underwriter or selling group member, prospective investors may be allowed to place orders online. The underwriters may agree with us to allocate a limited principal amount of the Notes for sale to online brokerage account holders. Any such allocation for online distributions will be made by the underwriters on the same basis as other allocations. Other than the prospectus in electronic format, information on the underwriters' web sites and any information contained in any other web site maintained by any of the underwriters or selling group members is not part of this prospectus supplement, the accompanying prospectus or the registration statement of which this prospectus supplement is a part, has not been approved and/or endorsed by us or the underwriters and should not be relied on by investors.

Other Relationships

Certain of the underwriters and their affiliates have provided in the past and may provide from time to time in the future in the ordinary course of their business certain commercial banking, financial advisory, investment banking and other services to us, our portfolio companies or our affiliates for which they have received or will be entitled to receive separate fees. In particular, the underwriters or their affiliates may execute transactions with us, on behalf of us, any of our portfolio companies or our affiliates. In addition, the underwriters or their affiliates may act as arrangers, underwriters or placement agents for companies whose securities are sold to or whose loans are syndicated to us, our portfolio companies or our affiliates.

The underwriters or their affiliates may also trade in our securities, securities of our portfolio companies or other financial instruments related thereto for their own accounts or for the account of others and may extend loans or financing directly or through derivative transactions to us, any of our portfolio companies or our affiliates.

After the date of this prospectus supplement, the underwriters and their affiliates may from time to time obtain information regarding specific portfolio companies or us that may not be available to the general public. Any such information is obtained by the underwriters and their affiliates in the ordinary course of their business and not in connection with the offering of the Notes. In addition, after the offering period for the sale of the Notes, the underwriters or their affiliates may develop analyses or opinions related to us or our portfolio companies and buy or sell interests in one or more of our portfolio companies on behalf of their proprietary or client accounts and may engage in competitive activities. There is no obligation on behalf of these parties to disclose their respective analyses, opinions or purchase and sale activities regarding any portfolio company or regarding us to holders of the Notes or any other persons.

In the ordinary course of their various business activities, the underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. Certain of the underwriters and their affiliates that may have a lending relationship with us may routinely hedge their credit exposure to us consistent with their customary risk management policies. Typically, such underwriters and their affiliates would hedge such exposure by entering into transactions that consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the Notes offered by this prospectus supplement and the accompanying prospectus. Any such short positions could adversely affect future trading prices of the Notes offered hereby. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

S-70

TABLE OF CONTENTS

The principal business address of the underwriters are: Ladenburg Thalmann & Co. Inc., 277 Park Avenue, 26th floor, New York, NY 10172 and Janney Montgomery Scott LLC, 1717 Arch Street, Philadelphia, PA 19103; B. Riley FBR, Inc., 299 Park Avenue, 7th Floor, New York, NY 10171; BB&T Capital Markets, 901 East Byrd Street, Suite 300, Richmond, VA 23219; and National Securities Corporation, 200 Vesey Street, 25th Floor, New York, NY 10281.

Alternative Settlement Cycle

We expect that delivery of the Notes will be made against payment therefor on or about April 1, 2018, which will be the third business day following the trade date for the issuance of the Notes (such settlement being herein referred to as “T+3”). Under Rule 15c6-1 promulgated under the Exchange Act, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes prior to the date of delivery hereunder will be required, by virtue of the fact that the Notes initially will settle in T+3 business days, to specify an alternative settlement arrangement at the time of any such trade to prevent a failed settlement.

Other Jurisdictions

The Notes offered by this prospectus supplement and the accompanying prospectus may not be offered or sold, directly or indirectly, nor may this prospectus supplement, the accompanying prospectus or any other offering material or advertisements in connection with the offer and sale of any such Notes be distributed or published, in any jurisdiction except under circumstances that will result in compliance with the applicable rules and regulations of that jurisdiction. Persons into whose possession this prospectus supplement and the accompanying prospectus come are advised to inform themselves about and to observe any restriction relating to the offering and the distribution of this prospectus supplement and the accompanying prospectus. This prospectus supplement and the accompanying prospectus do not constitute an offer to sell or a solicitation of an offer to buy the Notes offered by this prospectus supplement and the accompanying prospectus in any jurisdiction in which such an offer or a solicitation is unlawful.

LEGAL MATTERS

Certain legal matters in connection with the securities offered hereby will be passed upon for us by Eversheds Sutherland (US) LLP, Washington, District of Columbia. Certain legal matters in connection with the securities offered hereby will be passed upon for the underwriters by Dechert LLP, Washington, District of Columbia.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have selected BDO USA, LLP as our independent registered public accounting firm located at 300 North Wabash, Suite 3200, Chicago, IL 60611. The consolidated financial statements of OFS Capital Corporation as of December 31, 2017 and December 31, 2016 and for the three years in the period ended December 31, 2017 in this prospectus supplement have been audited by BDO USA, LLP.

AVAILABLE INFORMATION

We have filed with the SEC a registration statement on Form N-2, together with all amendments and related exhibits, under the Securities Act, with respect to the shares of common stock offered by this prospectus supplement and the accompanying prospectus. The registration statement contains additional information about us and the shares of common stock being offered by this prospectus supplement and the accompanying prospectus.

We are required to file with or submit to the SEC annual, quarterly and current periodic reports, proxy statements and other information meeting the informational requirements of the Exchange Act. You may inspect and copy these reports, proxy statements and other information, as well as the registration statement and related exhibits and schedules, at the Public Reference Room of the SEC at 100 F Street, NE, Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements and other information filed electronically by us with the SEC which are available on

Management's Report on Internal Control Over Financial Reporting

Our management, including our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with U.S. GAAP. Internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that the receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Our management (with the supervision and participation of our Chief Executive Officer and Chief Financial Officer) conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control — Integrated Framework issued in 2013 by the Committee of Sponsoring Organizations of the Treadway Commission.

A material weakness is a deficiency, or combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the registrant's annual or interim financial statements will not be prevented or detected on a timely basis. As a result of our evaluation of our internal control over financial reporting for the year ended December 31, 2017, management identified a material weakness related to the design and operating effectiveness of controls over the reliability of financial information reported by portfolio companies that is used as financial inputs in the Company's investment valuations.

Remediation Plan

Management is developing a remediation plan to address the control deficiency that led to the material weakness and has begun the process of reviewing the Company's policies and procedures related to the reliability of financial information reported by portfolio companies that is used as financial inputs in the Company's investment valuations.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders

OFS Capital Corporation

Chicago, Illinois

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of OFS Capital Corporation (the “Company”), including the consolidated schedules of investments, as of December 31, 2017 and 2016, the related consolidated statements of operations, changes in net assets, cash flows and financial highlights for each of the three years in the period ended December 31, 2017, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2017 and 2016, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) and our report dated March 12, 2018 expressed an adverse opinion thereon.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our procedures included confirmation of securities owned as of December 31, 2017 and 2016 by correspondence with the custodian, loan agent, portfolio companies, or by other appropriate auditing procedures where replies were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Opinion on Internal Control over Financial Reporting

We have audited OFS Capital Corporation's (the "Company's") internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). In our opinion, the Company did not maintain, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets, including the consolidated schedule of investments, of the Company as of December 31, 2017 and 2016, the related consolidated statements of operation, changes in net assets, cash flows and financial highlights for each of the three years in the period ended December 31, 2017, and the related notes and our report dated March 12, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Item 9A, Management's Report on Internal Control over Financial Reporting". Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit of internal control over financial reporting in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness has been identified and described in management's assessment and is included in the accompanying Item 9A, Management's Report on Internal Control over Financial Reporting. The Company did not design and maintain effective internal controls over the reliability of financial information reported by portfolio companies that is used as financial inputs in the Company's investment valuations. This material weakness was considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2017 financial statements, and this report does not affect our report dated March 12, 2018 on those financial statements.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to

SF-4

TABLE OF CONTENTS

permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(1)
Equity ownership may be held in shares or units of companies affiliated with the portfolio company.

(2)
Substantially all of the investments that bear interest at a variable rate are indexed to LIBOR (L), and reset monthly, quarterly, or semi-annually. Approximately 7% of the Company's LIBOR referenced investments are subject to a reference rate floor at December 31, 2017, with a reference rate floor of 2.00%. For each investment, the Company has provided the spread over the reference rate and current interest rate in effect at December 31, 2017. Unless otherwise noted, all investments with a stated PIK rate require interest payments with the issuance of additional securities as payment of the entire PIK provision.

(3)
Fair value was determined using significant unobservable inputs for all of the Company's investments. See Note 6 for further details.

(4)
The negative amount represents the excess of the par value of an unfunded commitment in excess of its fair value.

(5)
Investments (or portion thereof) held by OFS SBIC I, LP. All other investments pledged as collateral under the PWB Credit Facility.

(6)
Non-qualifying assets under Section 55(a) of the 1940 Act. Qualifying assets must represent at least 70% of the Company's assets, as defined under Section 55 of the 1940 Act, at the time of acquisition of any additional non-qualifying assets. As of December 31, 2017, 97.53% of the Company's assets were qualifying assets.

See Notes to Financial Statements.

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Consolidated Schedule of Investments – (continued)

December 31, 2017

(Dollar amounts in thousands)

(7)

Investment was on non-accrual status as of December 31, 2017, meaning the Company has ceased recognizing all or a portion of income on the investment. See Note 2, Non-accrual loans for further details.

(8)

The fair value of the most-recently recognized PIK dividend as of December 31, 2017, was \$0.

(9)

The Company has entered into a contractual arrangement with co-lenders whereby, subject to certain conditions, it has agreed to receive its payment after the repayment of certain co-lenders pursuant to a payment waterfall. The reported interest rate of 9.28% at December 31, 2017, includes additional interest of 0.69% per annum as specified under the contractual arrangement among the Company and the co-lenders.

(10)

Non-income producing.

(11)

The interest rate on these investments contains a PIK provision, whereby the issuer has the option to make interest payments in cash or with the issuance of additional securities as payment of the entire PIK provision. The interest rate in the schedule represents the current interest rate in effect for these investments. The following table provides additional details on these PIK investments, including the maximum annual PIK interest rate allowed as of December 31, 2017:

Portfolio Company	Investment Type	Range of PIK Option	Range of Cash Option	Maximum PIK Rate Allowed
Community Intervention Services, Inc.	Subordinated Loan	0% or 6.00%	13.00% or 7.00%	6.00%
Eblens Holdings, Inc.	Subordinated Loan	0% or 1.00%	13.00% or 12.00%	1.00%
Jobson Healthcare Information, LLC	Senior Secured Loan	1.50% to 5.30%	13.93% to 10.13%	5.30%
United Biologics Holdings, LLC	Senior Secured Loan	0% or 2.00%	14.00% or 12.00%	2.00%

(12)

Represents expiration date of the warrants.

(13)

All or portion of investment held by a wholly-owned subsidiary subject to income tax. See Note 2, Income taxes, for further details.

(14)

The PIK provision is reset at the beginning of each interest period equal to the excess of reference rate over the reference rate floor of 1.00%. The PIK interest rate in the schedule represents the current PIK interest rate in effect.

See Notes to Financial Statements.

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Consolidated Schedule of Investments – (continued)

December 31, 2016

(Dollar amounts in thousands)

(7)

Investment was on non-accrual status as of December 31, 2016, meaning the Company has ceased recognizing all or a portion of income on the investment. See Note 2, Non-accrual loans for further details.

(8)

The fair value of the most-recently recognized PIK dividend as of December 31, 2016, was \$0.

(9)

The Company has entered into a contractual arrangement with co-lenders whereby, subject to certain conditions, it has agreed to receive its payment after the repayment of certain co-lenders pursuant to a payment waterfall. The reported interest rate of 11.33% at December 31, 2016, includes additional interest of 2.08% per annum as specified under the contractual arrangement among the Company and the co-lenders.

(10)

The Company has entered into a contractual arrangement with co-lenders whereby, subject to certain conditions, it has agreed to receive its payment after the repayment of certain co-lenders pursuant to a payment waterfall. The reported interest rate of 12.47% at December 31, 2016, includes additional interest of 2.97% per annum as specified under the contractual arrangement among the Company and the co-lenders.

(11)

Non-income producing.

(12)

The interest rate on these investments contains a PIK provision, whereby the issuer has the option to make interest payments in cash or with the issuance of additional securities as payment of the entire PIK provision. The interest rate in the schedule represents the current interest rate in effect for these investments. The following table provides additional details on these PIK investments, including the maximum annual PIK interest rate allowed as of December 31, 2016:

Portfolio Company	Investment Type	Range of PIK Option	Range of Cash Option	Maximum PIK Rate Allowed
Community Intervention Services, Inc.	Subordinated Loan	0% or 6.00%	13.00% or 7.00%	6.00%
Intelli-Mark Technologies, Inc.	Senior Secured Loan	0% or 2.00%	13.00% or 11.50%	2.00%
Jobson Healthcare Information, LLC	Senior Secured Loan	1.50% and 4.295%	10.13% and 12.925%	4.295%
Pfanstiehl Holdings, Inc.	Subordinated Loan	0% or 2.00%	10.50% or % 8.50%	2.00%
United Biologics Holdings, LLC		0% or 2.00%	14.00% or 12.00%	2.00%

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Note 1. Organization

OFS Capital Corporation, a Delaware corporation, is an externally managed, closed-end, non-diversified management investment company. The Company has elected to be regulated as a BDC under the 1940 Act. In addition, for income tax purposes, the Company has elected to be treated as a RIC under the Code.

The Company's objective is to provide stockholders with current income and capital appreciation through its strategic investment focus primarily on debt investments and, to a lesser extent, equity investments primarily in middle-market companies principally in the United States. OFS Advisor manages the day-to-day operations of, and provides investment advisory services to, the Company.

In addition, OFS Advisor also serves as the investment adviser for HPCI a Maryland corporation and a BDC. HPCI's investment objective is similar to that of the Company.

The Company may make investments directly or through SBIC I LP, its investment company subsidiary licensed under the SBA's SBIC Program. The SBIC Program is designed to stimulate the flow of capital into eligible businesses. SBIC I LP is subject to SBA regulatory requirements, including limitations on the businesses and industries in which it can invest, requirements to invest at least 25% of its regulatory capital in eligible smaller businesses, as defined under the SBIC Act, limitations on the financing terms of investments, and capitalization thresholds that may limit distributions to the Company; and is subject to periodic audits and examinations of its financial statements.

Note 2. Summary of Significant Accounting Policies

Basis of presentation: The Company prepares its consolidated financial statements in accordance with GAAP, including ASC Topic 946, and the requirements for reporting on Form 10-K, the 1940 Act, and Articles 6 or 10 of Regulation S-X. In the opinion of management, the consolidated financial statements include all adjustments, consisting only of normal and recurring accruals and adjustments, necessary for fair presentation in accordance with GAAP. Certain amounts in the prior period financial statements have been reclassified to conform to the current year presentation.

Principles of consolidation: The Company consolidates majority-owned investment company subsidiaries. The Company does not own any controlled operating company whose business consists of providing services to the Company, which would also require consolidation. All intercompany balances and transactions are eliminated upon consolidation.

Investments: The Company applies fair value accounting in accordance with ASC Topic 820, which defines fair value, establishes a framework to measure fair value, and requires disclosures regarding fair value measurements. Fair value is defined as the price to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is determined through the use of models and other valuation techniques, valuation inputs, and assumptions market participants would use to value the investment. Highest priority is given to prices for identical assets quoted in active markets (Level 1) and the lowest priority is given to unobservable valuation inputs (Level 3). The availability of observable inputs can vary significantly and is affected by many factors, including the type of product, whether the product is new to the market, whether the product is traded on an active exchange or in the secondary market, and the current market conditions. To the extent that the valuation is based on less observable or unobservable inputs, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for financial instruments classified as Level 3 (i.e., those instruments valued using non-observable inputs), which comprise the entirety of the Company's investments. Changes to the valuation policy are reviewed by management and the Company's Board. As the Company's investments change, markets change, new products develop, and valuation inputs become more or less observable, the Company will continue to refine its valuation methodologies.

SF-22

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

See Note 6 for more detailed disclosures of the Company's fair value measurements of its financial instruments.

Investment classification: The Company classifies its investments in accordance with the 1940 Act. Under the 1940 Act, "Control Investments" are defined as investments in those companies in which the Company owns more than 25% of the voting securities or has rights to maintain greater than 50% of board representation, "Affiliate Investments" are defined as investments in those companies in which the Company owns between 5% and 25% of the voting securities, and "Non-Control/Non-Affiliate Investments" are those that neither qualify as Control Investments nor Affiliate Investments.

Use of estimates: The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ significantly from those estimates.

Reportable segments: The Company has a single reportable segment and single operating segment structure.

Cash and cash equivalents: Cash and cash equivalents consist of cash and highly liquid investments not held for resale with original maturities of three months or less. The Company's cash and cash equivalents are maintained with a member bank of the FDIC and at times, such balances may be in excess of the FDIC insurance limits. Included in cash and cash equivalents was \$72,140 and \$17,659 held in a US Bank Money Market Deposit Account as of December 31, 2017 and 2016, respectively. In addition, the Company's use of cash and cash equivalents held by SBIC I LP is limited by SBA regulation, including, but not limited to, investment in eligible portfolio companies and general corporate purposes, subject to a statutory measure of undistributed accumulated earnings.

Revenue recognition:

Interest income: Interest income is recorded on an accrual basis and reported as interest receivable until collected. Interest income is accrued daily based on the outstanding principal amount and the contractual terms of the debt investment. Certain of the Company's investments contain a payment-in-kind interest income provision ("PIK interest"). The PIK interest, computed at the contractual rate specified in the applicable investment agreement, is added to the principal balance of the investment, rather than being paid in cash, and recorded as interest income, as applicable, on the consolidated statements of operations. The Company discontinues accrual of interest income, including PIK interest, when there is reasonable doubt that the interest income will be collected.

Loan origination fees, original issue discount ("OID"), market discount or premium, and loan amendment fees (collectively, "Net Loan Fees") are recorded as an adjustment to the amortized cost of the investment, and accreted or amortized as an adjustment to interest income over the life of the respective debt investment using a method that approximates the effective interest method. When the Company receives a loan principal payment, the unamortized Net Loan Fees related to the paid principal is accelerated and recognized in interest income.

Further, the Company may acquire or receive equity, warrants or other equity-related securities ("Equity") in connection with the Company's acquisition of, or subsequent amendment to, debt investments. The Company determines the cost basis of Equity based on their fair value, and the fair value of debt investments and other securities or consideration received. Any resulting difference between the face amount of the debt and its recorded cost resulting from the assignment of value to the Equity is treated as OID, and accreted into interest income as described above.

SF-23

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Dividend income: Dividend income on common stock, generally payable in cash, is recorded at the time dividends are declared. Dividend income on preferred equity investments is accrued daily based on the contractual terms of the preferred equity investment. Dividends on preferred equity securities may be payable in cash or in additional preferred securities, and are generally not payable unless declared or upon liquidation. Declared dividends payable in cash are reported as dividend receivables until collected. Non-cash dividends payable in additional preferred securities or contractually earned but not declared (“PIK dividends”) are recognized at fair value and recorded as an adjustment to the cost basis of the investment.

Fee income: The Company generates revenue in the form of management, valuation, and other contractual fees, that is recognized as the related services are rendered. In the general course of its business, the Company receives certain fees from portfolio companies which are non-recurring in nature. Such non-recurring fees include prepayment fees on certain loans repaid prior to their scheduled due date, which are recognized as earned when received, and fees for capital structuring or advisory services from certain portfolio companies, which are recognized as earned upon closing of the investment.

Net realized and unrealized gain or loss on investments: Investment transactions are reported on a trade-date basis. Unsettled trades as of the balance sheet date are included in payable for investments purchased. Realized gains or losses on investments are measured by the difference between the net proceeds from the disposition and the amortized cost basis of the investment. Investments are valued at fair value as determined in good faith by Company management under the supervision and review of the Board. After recording all appropriate interest, dividend, and other income, some of which is recorded as an adjustment to the cost basis of the investment as described above, the Company reports changes in the fair value of investments as net changes in unrealized appreciation/depreciation on investments in the consolidated statements of operations.

Non-accrual loans: When there is reasonable doubt that principal, cash interest, or PIK interest, will be collected, loan investments are placed on non-accrual status and the Company will generally cease recognizing cash interest, PIK interest, or Net Loan Fee amortization, as applicable. When an investment is placed on non-accrual status, all interest previously accrued but not collected, other than PIK interest that has been contractually added to the adjusted cost basis of the investment prior to the designation date, is reversed against current period interest income. Interest payments subsequently received on non-accrual investments may be recognized as income or applied to principal depending upon management’s judgment. Interest accruals and Net Loan Fee amortization are resumed on non-accrual investments only when they are brought current with respect to principal, interest, and when, in the judgment of management, the investments are estimated to be fully collectible as to all principal. At December 31, 2017, the Company had two loans (Community Intervention Services, Inc. and Southern Technical Institute, LLC) on non-accrual status with respect to all interest and Net Loan Fee amortization, with an aggregate amortized cost and fair value of \$11,090 and \$1,201, respectively. The Company’s loan investment in My Alarm Center, LLC, which was on non-accrual status at June 30, 2017, was restructured and exchanged for a new class of preferred equity securities and common equity securities in July 2017. See Note 5 for further information. At December 31, 2016, the Company had one loan (Community Intervention Services, Inc.) on non-accrual status with respect to PIK interest and unamortized Net Loan Fees with an amortized cost and fair value of \$7,639 and \$5,393, respectively.

Income taxes: The Company has elected to be treated, and intends to qualify annually, as a RIC under Subchapter M of the Code. To qualify as a RIC, the Company must, among other things, meet certain source of income and asset diversification requirements, and timely distribute at least 90% of its ICTI to its stockholders. The Company has made, and intends to continue to make, the requisite distributions to its stockholders, which generally relieves the Company from U.S. federal income taxes.

SF-24

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Depending on the level of ICTI earned in a tax year, the Company may choose to retain ICTI in an amount less than that which would trigger federal income tax liability under Subchapter M of the Code. However, the Company would be liable for a 4% excise tax on such income. Excise tax liability is recognized when the Company determines its estimated current year annual ICTI exceeds estimated current year distributions.

The Company may utilize wholly owned holding companies taxed under Subchapter C of the Code (“Taxable Blockers”) when making equity investments in portfolio companies taxed as pass-through entities to meet its source-of-income requirements as a RIC. Taxable Blockers are consolidated in the Company’s GAAP financial statements and may result in current and deferred federal and state income tax expense with respect to income derived from those investments. Such income, net of applicable income taxes, is not included in the Company’s tax-basis net investment income until distributed by the Taxable Blocker, which may result in timing and character differences between the Company’s GAAP and tax-basis net investment income and realized gains and losses. Income tax expense from Taxable Blockers related to net investment income are included in general and administrative expenses, or the applicable net realized or unrealized gain (loss) line item from which the federal or state income tax originated for capital gains and losses.

The Company evaluates tax positions taken in the course of preparing its tax returns to determine whether they are “more-likely-than-not” to be sustained by the applicable tax authority. Tax benefits of positions not deemed to meet the more-likely-than-not threshold could result in greater and undistributed ICTI, income and excise tax expense, and, if involving multiple years, a re-assessment of the Company’s RIC status. GAAP requires recognition of accrued interest and penalties related to uncertain tax benefits as income tax expense. There were no uncertain income tax positions at December 31, 2017 and 2016. The current and prior three tax years remain subject to examination by U.S. federal and most state tax authorities.

Distributions: Distributions to common stockholders are recorded on the declaration date. The timing of distributions as well as the amount to be paid out as a distribution is determined by the Board each quarter. Distributions from net investment income and net realized gains are determined in accordance with the Code. Net realized capital gains, if any, are distributed at least annually, although the Company may decide to retain such capital gains for investment. Distributions paid in excess of taxable net investment income and net realized gains are considered returns of capital to stockholders.

The Company has adopted a DRIP that provides for reinvestment of any distributions the Company declares in cash on behalf of its stockholders, unless stockholder elects to receive cash. As a result, if the Board authorizes and the Company declares a cash distribution, then stockholders who have not “opted out” of the DRIP will have their cash distribution automatically reinvested in additional shares of the Company’s common stock, rather than receiving the cash distribution.

The Company may use newly issued shares under the guidelines of the DRIP, or the Company may purchase shares in the open market in connection with its obligations under the plan.

Deferred debt issuance costs: Deferred debt issuance costs represent fees and other direct incremental costs incurred in connection with the Company’s borrowings. Deferred debt issuance costs are presented as a direct reduction of the related debt liability on the consolidated balance sheets except for deferred debt issuance costs associated with the Company’s line of credit arrangements, which are included in prepaid expenses and other assets on the consolidated balance sheets. Deferred debt issuance costs are amortized to interest expense over the term of the related debt.

Goodwill: On December 4, 2013, in connection with the SBIC Acquisition, the Company recorded goodwill of \$1,077, which is included in prepaid expenses and other assets on the consolidated balance sheets. Goodwill is not subject to amortization. Goodwill is evaluated for impairment annually or more frequently if events occur or circumstances change that indicate goodwill may be impaired. There have been no goodwill impairments since the date of the SBIC Acquisition.

SF-25

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Intangible asset: On December 4, 2013, in connection with the SBIC Acquisition, the Company recorded an intangible asset of \$2,500 attributable to the SBIC license. The Company amortizes this intangible asset on a straight-line basis over its estimated useful life of 13 years. The Company expects to incur annual amortization expense of \$195 in each of the years ending December 31, 2025 and \$145 in 2026.

The Company tests its intangible asset for impairment if events or circumstances suggest that the asset carrying value may not be fully recoverable. The intangible asset, net of accumulated amortization of \$795 and \$600 at December 31, 2017 and 2016, respectively, is included in prepaid expenses and other assets.

Interest expense: Interest expense is recognized on an accrual basis.

Concentration of credit risk: Aside from its debt instruments, financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash deposits at financial institutions. At various times during the year, the Company may exceed the federally insured limits. To mitigate this risk, the Company places cash deposits only with high credit quality institutions. Management believes the risk of loss is minimal.

New Accounting Standards

The following table discusses recently issued ASUs by the FASB:

Standard	Description	Period of Adoption	Effect of Adoption on the financial statements
Standards that were adopted			
ASU 2015-02, Consolidation: Amendments to the Consolidation Analysis	Modifies existing consolidation guidance for reporting organizations that are required to evaluate whether they should consolidate certain legal entities.	First Quarter 2016 retrospectively	No material impact to the Company's consolidated financial statements.
ASU 2015-03, Interest — Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs	Changes the presentation of debt issuance costs in the financial statements where an entity presents such costs in the balance sheet as a direct deduction from the related debt liability rather than as an asset. Amortization of the costs is reported as interest expense. ASU 2015-03 did not specifically address presentation or subsequent measurement of debt issuance costs related to line of credit arrangements.	First Quarter 2016 retrospectively	Resulted in a \$3,420 retrospective reduction of both net deferred debt issuance costs and SBA debentures payable in the consolidated balance sheet as of December 31, 2015 and a reduction of amortization and write-off of deferred debt issuance costs and corresponding increase in interest expense in the consolidated statement of operations for the years ended December 31, 2015 and 2014, of \$2,100 and \$1,354, respectively. Net deferred debt issuance costs of \$2,657 and \$3,037, are presented as a direct deduction from the SBA debentures payable in the consolidated balance sheet as of December 31, 2017, and 2016, respectively. Amortization and write-off of deferred debt issuance

Standard	Description	Period of Adoption	Effect of Adoption on the financial statements
ASU 2015-15, Interest – Imputation of Interest: Presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements – amendments to SEC paragraphs	Response to SEC views on ASU 2015-03. Given the absence of authoritative guidance within ASU 2015-03 for debt issuance costs related to line of credit arrangements, the SEC stated it would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line of credit arrangement.	First Quarter 2016 retrospectively	Effect of Adoption on the financial statements costs associated with the Company’s SBA debentures and the OFS Capital WM revolving line of credit is included in interest expense in the consolidated statement of operations. See Note 8 for more details. There was no impact to consolidated earnings as a result of this adoption. Net deferred debt issuance costs of \$297 and \$256 associated with the Company’s PWB Credit Facility are presented as an asset and included in prepaid expenses and other assets in the consolidated balance sheet as of December 31, 2017 and 2016, respectively. There was no impact to consolidated earnings as a result of this adoption.
ASU 2015-17, Income Taxes: Balance Sheet Classification of Deferred Taxes SF-27	Requires deferred tax liabilities and assets to be classified as noncurrent in the balance sheet.	First Quarter 2017 prospectively	No material impact to the Company’s consolidated financial statements.

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

The following table discusses recently issued ASUs by the FASB yet to be adopted by the Company:

Standard	Description	Effect of Adoption on the financial statements
Standards that are not yet adopted		
ASU 2014-09, Revenue from Contracts with Customers	Supersedes nearly all existing revenue recognition guidance under GAAP. The core principle of the standard is to recognize revenues to depict the transfer of promised goods or services to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The standard defines a five step process to achieve this core principle. The standard must be adopting using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a modified retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). The adoption will include updates as provided under ASU 2016-08, Revenue from Contracts with Customers: Principal versus Agent Considerations (Reporting Revenue Gross versus Net); ASU 2016-10, Revenue from Contracts with Customers: Identifying Performance Obligations and Licensing; ASU 2016-12, Revenue from Contracts with Customers: Narrow-Scope Improvements and Practical Expedients; ASU 2016-20, Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers; ASU 2017-13, Revenue Recognition (Topic 605), Revenue from Contracts with Customers, Leases (Topic 840), and Leases (Topic 842): Amendments to SEC Paragraphs Pursuant to the Staff Announcement at the July 20, 2017 EITF Meeting and Rescission of Prior SEC Staff Announcements and Observer Comments and ASU 2017-14, Income Statement-Reporting Comprehensive Income (Topic 220), Revenue Recognition (Topic 605), and Revenue from Contracts with Customers.	In August 2015, the FASB issued ASU 2015-14, which defers the effective date of ASU 2014-09, such that the guidance is effective for annual and interim reporting periods beginning after December 15, 2017. Early adoption is not permitted. The Company has completed its evaluation and has determined the adoption of new revenue guidance will not have a material impact to its consolidated financial statements, including the presentation of revenues in its consolidated statements of operations.

SF-28

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Standard	Description	Effect of Adoption on the financial statements
ASU 2016-01, Financial Instruments — Overall	Modifies how entities measure equity investments and present changes in the fair value of financial liabilities. Entities will have to measure equity investments that do not result in consolidation and are not accounted for under the equity method at fair value, and recognize any changes in fair value in net income unless the investments qualify for the new practicality exception. A practicality exception will apply to those equity investments that do not have a readily determinable fair value and do not qualify for the practical expedient to estimate fair value under ASC Topic 820, and as such these investments may be measured at cost.	Annual reporting periods beginning after December 15, 2017, including interim periods within those fiscal years. The Company is required to record its investments at fair value with changes in fair value recognized in net income in accordance with ASC Topic 946. Therefore, the adoption of ASU 2016-01 is not expected to have a material effect on the Company's consolidated financial statements
ASU 2016-15, Statement of Cash Flows	Addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows.	Annual reporting periods beginning after December 15, 2017, including interim periods within those fiscal years and early adoption is permitted. The Company is currently evaluating the impact of this ASU will have on the Company's consolidated financial position and disclosures.
ASU 2016-19, Technical Corrections and Improvements	Makes minor corrections and clarifications that affect a wide variety of topics in the Accounting Standards Codification, including an amendment to Topic 820, Fair Value Measurement, which clarifies the difference between a valuation approach and a valuation technique when applying the guidance of that Topic. The amendment also requires an entity to disclose when there has been a change in either or both a valuation approach and/or a valuation technique. The transition guidance for the Topic 820 amendment must be applied prospectively because it could potentially involve the use of hindsight that includes fair value measurements.	Annual reporting periods beginning after December 15, 2017, including interim periods within those years. Early application is permitted for any fiscal year or interim period for which the entity's financial statements have not yet been issued. The Company is currently evaluating the impact this ASU will have on the Company's consolidated financial position or disclosures.

SF-29

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Standard	Description	Effect of Adoption on the financial statements
ASU 2017-04, Intangibles — Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	Removes Step 2 of the goodwill impairment test, which requires a hypothetical purchase price allocation. A goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill.	Annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early application is permitted. The adoption of ASU 2017-04 is not expected to have a material effect on the Company's consolidated financial statements.
ASU 2017-05, Other Income — Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 620-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets	Defines "insubstance nonfinancial asset", unifies guidance related to partial sales of nonfinancial assets, eliminates rules specifically addressing sales of real estate, removes exceptions to the financial asset derecognition model, and clarifies the accounting for contributions of nonfinancial assets to joint ventures.	The effective date and transition requirements are the same as the effective date and transition requirements for ASU 2014-09 and is not expected to have a material effect on the Company's consolidated financial statements.
ASU 2017-08, Premium Amortization on Purchased Callable Debt Securities	Shortens the amortization period for certain purchased callable debt securities held at a premium to the earliest call date. Securities held at a discount are to continue to be amortized to maturity.	Annual reporting periods beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the ASU in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. Additionally, in the period of adoption, an entity should provide disclosures about a change in accounting principle. The adoption of ASU 2017-08 is not expected to have a material effect on the Company's consolidated financial statements.

SF-30

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Standard	Description	Effect of Adoption on the financial statements
ASU 2017-12, Derivatives and Hedging, Targeted Improvements to Accounting for Hedging Activities	Eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires, for qualifying hedges, the entire change in the fair value of a hedging instrument to be presented in the same income statement line as the hedged item. Additionally, the guidance also expands an entity's ability to apply hedge accounting for nonfinancial and financial risk components, simplifies the hedge documentation and hedge effectiveness assessment requirements, and modifies certain disclosure requirements.	Annual reporting periods beginning after December 15, 2018, including interim periods within those years. Early adoption is permitted. The Company is currently evaluating the impact this ASU will have on the Company's consolidated financial position or disclosures.

Note 3. OFS Capital WM

OFS Capital WM, a wholly-owned investment company subsidiary, was formed in August 2010 with the limited purpose of holding, acquiring, managing and financing senior secured loan investments to middle-market companies in the United States. These loans were managed and serviced by MCF Capital Management, LLC ("MCF") under a loan and security agreement among OFS Capital WM, MCF, Wells Fargo Securities, LLC, and Well Fargo Delaware Trust Company, N.A. (the "Loan and Security Agreement"). MCF charged a management fee of 0.25% per annum of the assigned value of the underlying portfolio investments plus an accrued fee that was deferred until termination of the Loan and Security Agreement on May 28, 2015. The Company incurred management fee expense related to this agreement of \$0, \$0, and \$288, for the years ended December 31, 2017, 2016, and 2015, respectively.

OFS Capital WM Asset Sale and Related Transactions

On May 28, 2015, the Company and OFS Capital WM entered into a Loan Portfolio Purchase Agreement with Madison Capital Funding LLC ("Madison"), an affiliate of MCF, pursuant to which OFS Capital WM sold a portfolio of 20 senior secured debt investments with an aggregate outstanding principal balance of \$67,807 to Madison for cash proceeds of \$67,309 (the "WM Asset Sale"). On May 28, 2015, the total fair value of the debt investments sold, applying the Company's March 31, 2015 fair value percentages to the principal balances of the respective investments on the sale date, was approximately \$66,703. The determination of the fair value of the Company's investments is subject to the good faith determination by the Company's board of directors, which is conducted no less frequently than quarterly, pursuant to the Company's valuation policies and accounting principles generally accepted in the United States.

On May 28, 2015, pursuant to the Loan and Security Agreement, the Company applied \$52,414 from the sale proceeds of the WM Asset Sale to pay in full and retire OFS Capital WM's secured revolving line of credit with Wells Fargo Bank, N.A. WM Credit Facility. As a result of the termination of the WM Credit Facility, the Company wrote-off related unamortized deferred financing closing costs of \$1,216.

(Dollar amounts in thousands, except per share data)

Note 4. Related Party Transactions

Investment Advisory and Management Agreement: OFS Advisor manages the day-to-day operations of, and provides investment advisory services to, the Company pursuant to an Investment Advisory Agreement. The Investment Advisory Agreement was most recently re-approved on April 7, 2017. Under the terms of the Investment Advisory Agreement, which are in accordance with the 1940 Act and subject to the overall supervision of the Company's Board, OFS Advisor is responsible for sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring investments, and monitoring investments and portfolio companies on an ongoing basis. OFS Advisor is a subsidiary of OFSAM and a registered investment advisor under the Investment Advisers Act of 1940, as amended.

OFS Advisor's services under the Investment Advisory Agreement are not exclusive to the Company and OFS Advisor is free to furnish similar services to other entities, including other BDCs affiliated with OFS Advisor, so long as its services to the Company are not impaired. OFS Advisor also serves as the investment adviser to CLO funds and other assets, including HPCI.

OFS Advisor receives fees for providing services, consisting of two components: a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.75% and based on the average value of the Company's total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) at the end of the two most recently completed calendar quarters, adjusted for any share issuances or repurchases during the quarter. OFS Advisor has elected to exclude the value of the intangible asset and goodwill resulting from the SBIC Acquisition from the base management fee calculation.

The base management fee is payable quarterly in arrears and was \$4,999, \$4,516, and \$4,937, for the years ended December 31, 2017, 2016, and 2015, respectively.

The incentive fee has two parts. The first part ("Part One") is calculated and payable quarterly in arrears based on the Company's pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees such as commitment, origination and sourcing, structuring, diligence and consulting fees or other fees that the Company receives from portfolio companies but excluding fees for providing managerial assistance) accrued during the calendar quarter, minus operating expenses for the quarter (including the base management fee, any expenses payable under the Administration Agreement (as defined below) and any interest expense and dividends paid on any outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest or dividend feature (such as OID, debt instruments with PIK interest, equity investments with accruing or PIK dividend and zero coupon securities), accrued income that the Company has not yet received in cash.

Pre-incentive fee net investment income is expressed as a rate of return on the value of the Company's net assets (defined as total assets less indebtedness and before taking into account any incentive fees payable during the period) at the end of the immediately preceding calendar quarter and adjusted for any share issuances or repurchases during such quarter. Accordingly, as a result of the Offering, the Part One incentive fee was reduced by \$593 for the three months ended June 30, 2017, determined by adjusting the value of net assets, as defined above, at March 31, 2017 by the daily weighted average of the Offering proceeds available to the Company during the three months ended June 30, 2017. The incentive fee with respect to pre-incentive fee net income is 20.0% of the amount, if any, by which the pre-incentive fee net investment income for the immediately preceding calendar quarter exceeds a 2.0% (which is 8.0% annualized) hurdle rate and a "catch-up" provision measured as of the end of each calendar quarter. Under this provision, in any calendar quarter, OFS Advisor receives no incentive fee until the net investment income equals the hurdle rate of 2.0%, but then receives, as a "catch-up," 100.0% of the pre-incentive fee net

SF-32

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, OFS Advisor will receive 20.0% of the pre-incentive fee net investment income.

Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the incentive fee, it is possible that the Company may pay an incentive fee in a quarter in which the Company incurs a loss. For example, if the Company receives pre-incentive fee net investment income in excess of the quarterly minimum hurdle rate, the Company will pay the applicable incentive fee even if the Company has incurred a loss in that quarter due to realized and unrealized capital losses. The Company's net investment income used to calculate this part of the incentive fee is also included in the amount of the Company's gross assets used to calculate the base management fee. These calculations are appropriately prorated for any period of less than three months.

The second part ("Part Two") of the incentive fee (the "Capital Gain Fee") is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Advisory Agreement, as of the termination date), commencing on December 31, 2012, and equals 20.0% of the Company's aggregate realized capital gains, if any, on a cumulative basis from the date of the election to be a BDC through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation through the end of such year, less all previous amounts paid in respect of the Capital Gain Fee; provided that the incentive fee determined as of December 31, 2012, was calculated for a period of shorter than twelve calendar months to take into account any realized capital gains computed net of all realized capital losses and unrealized capital depreciation for the period beginning on the date of the Company's election to be a BDC and ending December 31, 2012.

The Company accrues the Capital Gain Fee if, on a cumulative basis, the sum of net realized capital gains and (losses) plus net unrealized appreciation and (depreciation) is positive. If, on a cumulative basis, the sum of net realized capital gains (losses) plus net unrealized appreciation (depreciation) decreases during a period, the Company will reverse any excess Capital Gain Fee previously accrued such that the amount of Capital Gains Fee accrued is no more than 20% of the sum of net realized capital gains (losses) plus net unrealized appreciation (depreciation). OFS Advisor has excluded from the Capital Gain Fee calculation any realized gain with respect to (1) the SBIC Acquisition, and (2) the WM Asset Sale.

The Company incurred incentive fee expense of \$2,962, \$3,333, and \$2,627 for the years ended December 31, 2017, 2016, and 2015, respectively. Incentive fees for the years ended December 31, 2017, 2016, and 2015, included Part One incentive fees (based on net investment income) of \$2,962, which included a share issue adjustment of \$(593) related to the Company's Offering, \$3,472 and \$2,488, respectively, and Part Two incentive fees (based upon net realized and unrealized gains and losses, or capital gains) of \$0, \$(139) and \$139, respectively.

License Agreement: The Company entered into a license agreement with OFSAM under which OFSAM has agreed to grant the Company a non-exclusive, royalty-free license to use the name "OFS."

Administration Agreement: OFS Services furnishes the Company with office facilities and equipment, necessary software licenses and subscriptions, and clerical, bookkeeping and record keeping services at such facilities pursuant to an Administration Agreement. The Administration Agreement was most recently re-approved on April 7, 2017. Under the Administration Agreement, OFS Services performs, or oversees the performance of, the Company's required administrative services, which include being responsible for the financial records that the Company is required to maintain and preparing reports to its stockholders and all other reports and materials required to be filed with the SEC or any other regulatory authority. In addition, OFS Services assists the Company in determining and publishing its net asset value, oversees the preparation and filing of its tax returns and the printing and dissemination of reports to its stockholders,

SF-33

TABLE OF CONTENTS

(Dollar amounts in thousands, except per share data)

and generally oversees the payment of the Company's expenses and the performance of administrative and professional services rendered to the Company by others. Under the Administration Agreement, OFS Services also provides managerial assistance on the Company's behalf to those portfolio companies that have accepted the Company's offer to provide such assistance. Payment under the Administration Agreement is equal to an amount based upon the Company's allocable portion of OFS Services's overhead in performing its obligations under the Administration Agreement, including, but not limited to, rent, information technology services and the Company's allocable portion of the cost of its officers, including its chief executive officer, chief financial officer, chief compliance officer, chief accounting officer, and their respective staffs. To the extent that OFS Services outsources any of its functions, the Company will pay the fees associated with such functions on a direct basis without profit to OFS Services.

Administration fee expense was \$1,314, \$1,304 and \$1,637 for the years ended December 31, 2017, 2016, and 2015, respectively.

Note 5. Investments

As of December 31, 2017, the Company had loans to 35 portfolio companies, of which 79% were senior secured loans and 21% were subordinated loans, at fair value, as well as equity investments in 17 of these portfolio companies. The Company also held an equity investment in two portfolio companies in which it did not hold a debt investment. At December 31, 2017, investments consisted of the following:

	Amortized Cost	Percentage of Net Assets	Fair Value	Percentage of Net Assets
Senior secured debt investments	\$ 196,020	104.1%	\$ 195,112	103.5%
Subordinated debt investments	63,031	33.5	51,198	27.2
Preferred equity	24,103	12.8	19,200	10.2
Common equity and warrants	6,821	3.6	11,989	6.4
Total	289,975	154.0%	277,499	147.3%

In December 2017, the Company's investment in Jobson Healthcare Information, LLC ("Jobson") was restructured, whereby the lender group, including the Company, purchased all the outstanding equity of Jobson for a nominal purchase price. Immediately after the restructuring, and as of December 31, 2017, the Company owned approximately 12.6% of the common equity of Jobson. In February 2018, in connection with the restructuring, the Company sold its warrant investment, on a pro-rata basis, to the other members of the lender group for a nominal amount. As of December 31, 2017, the amortized cost and fair value of the Company's common equity investment was \$0; the amortized cost and fair value of the Company's warrant investment was \$0.5 million and \$0, respectively; and the amortized cost and fair value of the Company's debt investment was \$15,241 and \$12,910, respectively.

In July 2017, the Company's senior secured debt investment with a cost basis of \$6,701, and preferred equity investments, with an aggregate cost basis of \$247, in My Alarm Center, LLC, were restructured and exchanged for common equity and a new class of preferred equity securities with a fair value of \$0 and \$1,745 respectively. As of June 30, 2017, the Company recognized cumulative unrealized losses of \$5,203, which upon restructuring, was realized during the quarter ended September 30, 2017.

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Unconsolidated Significant Subsidiaries: In accordance with Regulation S-X and GAAP, the Company is not permitted to consolidate any subsidiary or other entity that is not an investment company, including those in which the Company has a controlling interest unless the business of the controlled operating company consists of providing services to the Company. In accordance with Regulation S-X Rules 3-09 and 4-08(g), the Company evaluates its unconsolidated controlled portfolio companies as significant subsidiaries under the respective rules. As of December 31, 2017 and 2016, MTE Holding Corp. and Subsidiaries was considered a significant unconsolidated subsidiary under Regulation S-X Rule 4-08(g). The Company's voting ownership in MTE Holding Corp. and Subsidiaries is limited to 50% through a substantive participating voting rights agreement with an unaffiliated investor. Based on the requirements under Regulation S-X Rule 4-08(g), the summarized consolidated financial information of MTE Holding Corp. and Subsidiaries is presented below:

	December 31,		
Balance Sheet:	2017	2016	
Current assets	\$ 7,161	\$ 5,535

Note 6. Fair Value of Financial Instruments

Investments

The Company's investments are valued at fair value as determined in good faith by Company management under the supervision, and review and approval of the Board. These fair values are determined in accordance with a documented valuation policy and a consistently applied valuation process.

- For each debt investment, a basic credit risk rating review process is completed. The risk rating on every credit facility is reviewed and either reaffirmed or revised by OFS Advisor's investment committee.

- Each portfolio company or investment is valued by OFS Advisor.

- The preliminary valuations are documented and are then submitted to OFS Advisor's investment committee for ratification.

- Third-party valuation firm(s) provide valuation services as requested, by reviewing the investment committee's preliminary valuations. OFS Advisor's investment committee's preliminary fair value conclusions on each of the Company's assets for which sufficient market quotations are not

SF-39

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

readily available is reviewed and assessed by a third-party valuation firm at least once in every 12-month period, and more often as determined by the audit committee of the Company's Board or required by the Company's valuation policy. Such valuation assessment may be in the form of positive assurance, range of values or other valuation method based on the discretion of the Company's Board.

- The audit committee of the Board reviews the preliminary valuations of OFS Advisor's investment committee and independent valuation firms and, if appropriate, recommends the approval of the valuations by the Board.

- The Company's Board discusses valuations and determines the fair value of each investment in the portfolio in good faith based on the input of OFS Advisor, the audit committee and, where appropriate, the respective independent valuation firm.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values are determined with models or other valuation techniques, valuation inputs, and assumptions market participants would use in pricing an asset or liability. Valuation inputs are organized in a hierarchy that gives the highest priority to prices for identical assets or liabilities quoted in active markets (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of inputs in the fair value hierarchy are described below:

Level 1:

Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.

Level 2:

Inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specified term, a Level 2 input must be observable for substantially the full term of the asset or liability. Level 2 inputs include: (i) quoted prices for similar assets or liabilities in active markets, (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, (iii) inputs other than quoted prices that are observable for the asset or liability, and (iv) inputs that are derived principally from or corroborated by observable market data.

Level 3:

Unobservable inputs for the asset or liability, and situations where there is little, if any, market activity for the asset or liability at the measurement date.

The inputs into the determination of fair value are based upon the best information under the circumstances and may require significant management judgment or estimation. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The Company assesses the levels of the investments at each measurement date, and transfers between levels are recognized on the measurement date. All of the Company's investments, which are measured at fair value, were categorized as Level 3 based upon the lowest level of significant input to the valuations. There were no transfers among Level 1, 2 and 3 for the years ended December 31, 2017, 2016, and 2015.

Each quarter, for investments for which unadjusted quoted prices in active markets are not available, the Company assesses whether market quotations, prices from pricing services or bids from brokers or dealers (collectively, “Indicative Prices”) are available, as well as the Company’s ability to transact at such Indicative Prices. Investments for which sufficient Indicative Prices exist are generally valued consistent with such Indicative Prices. The Company periodically corroborates observed Indicative Prices with its actual investment purchase prices and/or other valuation techniques, such as the discounted cash flow method described below. Based on the corroborating analysis and the experience of the Company’s management in purchasing and selling these investments, the Company believes that these Indicative Prices may be

SF-40

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

reasonable indicators of fair value. In certain instances, the Company may partially rely on Indicative Prices when the Company determines such Indicative Prices are not of sufficient strength to rely on as the sole indication of fair value. In such instances, the Company applies a weighting factor to the Indicative Price and an alternative fair value analysis, typically a discounted cash flow analysis. The weighting factor placed on an Indicative Price is applied consistently based upon its relative strength, which considers, among other factors, and when available, the depth and liquidity of the Indicative Price. Weighting factors are not significant to the overall fair value measurement, but rather are applied to incorporate relevant market data when available.

In addition, each quarter, the Company assesses whether an arm's length transaction occurred in the same security, including the Company's new investments during the quarter, the cost of which ("Transaction Prices"), may be considered a reasonable indication of fair value for up to three months after the transaction date.

Due to the private nature of this marketplace (meaning actual transactions are not publicly reported), and the non-binding nature of the Indicative Prices, and the general inability to observe the input for the full length of the term of an investment, the Company believes that these valuation inputs are classified as Level 3 within the fair value hierarchy.

In the absence of sufficient, actionable Indicative Prices or Transaction Prices, as an indication of fair value, and consistent with the policies and methodologies adopted by the Board, the Company performs detailed valuations of its debt and equity investments, including an analysis on the Company's unfunded loan commitments, using both the market and income approaches as appropriate. There is no one methodology to estimate fair value and, in fact, for any one portfolio company, enterprise value is generally best expressed as a range of values. The Company may also engage one or more independent valuation firms(s) to conduct independent appraisals of its investments to develop the range of values, from which the Company derives a single estimate of value. Under the income approach, the Company typically prepares and analyzes discounted cash flow models to estimate the present value of future cash flows of either an individual debt investment or of the underlying portfolio company itself.

The primary method used to estimate the fair value of the Company's debt investments is the discounted cash flow method. However, if there is deterioration in credit quality or a debt investment is in workout status, the Company may consider other methods in determining the fair value, including the value attributable to the debt investment from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis. The discounted cash flow approach to determining fair value (or a range of fair values) involves applying an appropriate discount rate(s) to the estimated future cash flows using various relevant factors depending on investment type, including the latest arm's length or market transactions involving the subject security, a benchmark credit spread or other indication of market yields, and company performance. The valuation based on the inputs determined to be the most reasonable and probable is used as the fair value of the investment, which may include a weighting factor applied to multiple valuation methods. The determination of fair value using these methodologies may take into consideration a range of factors including, but not limited to, the price at which the investment was acquired, the nature of the investment, local market conditions, trading values on public exchanges for comparable securities, current and projected operating performance, financing transactions subsequent to the acquisition of the investment and anticipated financing transactions after the valuation date.

The Company changed the primary method used to value certain of its investments, primarily equity investments, as of December 31, 2016, from the income approach to the market approach, principally due to the nature of evidence available under the discounted cash flow method, and to better align with industry practice. The Company may also utilize an income approach when estimating the fair value of its equity securities, either as a primary methodology if consistent with industry practice or if the market approach is otherwise not applicable, or as a supporting methodology to corroborate the fair value ranges determined by the market approach.

SF-41

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

Under the market approach, the Company estimates the enterprise value of portfolio companies. Typically, the enterprise value of a private company is based on multiples of EBITDA, net income, revenues, or other relevant basis. The valuation based on the inputs determined to be the most reasonable and probable is used as the fair value of the investment, which may include a weighting factor applied to multiple valuation methods. In estimating the enterprise value of a portfolio company, the Company analyzes various factors consistent with industry practice, including but not limited to the price at which the investment was acquired, the nature of the investment, local market conditions, trading values on public exchanges for comparable securities, the portfolio company's historical and projected financial results, applicable market trading and transaction comparables, applicable market yields and leverage levels, the nature and realizable value of any collateral, financing transactions subsequent to the acquisition of the investment and anticipated financing transactions after the valuation date.

Application of these valuation methodologies involves a significant degree of judgment by management.

Due to the inherent uncertainty of determining the fair value of Level 3 investments, the fair value of the investments may differ significantly from the values that would have been used had a ready market or observable inputs existed for such investments and may differ materially from the values that may ultimately be received or settled. Further, such investments are generally subject to legal and other restrictions, or otherwise are less liquid than publicly traded instruments. If the Company were required to liquidate a portfolio investment in a forced or liquidation sale, the Company might realize significantly less than the value at which such investment had previously been recorded. The Company's investments are subject to market risk. Market risk is the potential for changes in the value due to market changes. Market risk is directly impacted by the volatility and liquidity in the markets in which the investments are traded.

The following tables provide quantitative information about the Company's significant Level 3 fair value inputs to the Company's fair value measurements as of December 31, 2017 and 2016. In addition to the techniques and inputs noted in the tables below, according to the Company's valuation policy, the Company may also use other valuation techniques and methodologies when determining the Company's fair value measurements. The table below is not intended to be exhaustive, but rather provides information on the significant Level 3 inputs as they relate to the Company's fair value measurements.

	Fair Value at December 31, 2017(1)	Valuation technique	Unobservable inputs	Range (Weighted average)
Debt investments:				
Senior secured	\$ 152,231	Discounted cash flow	Discount rates	10.01% – 16.50% (12.24%)
	12,910	Enterprise value	EBITDA multiples	7.50x – 7.50x (7.50x)
	9,063	Indicative Prices	Broker-dealers' quotes	N/A
Subordinated	47,117	Discounted cash flow	Discount rates	11.24% – 16.90% (14.69%)
	4,074	Enterprise value	EBITDA multiples	4.25x – 7.25x (6.37x)
Equity investments				
Preferred equity	19,200	Enterprise value	EBITDA multiples	4.25x – 13.48x (7.80x)
Common equity and warrants	11,489	Enterprise value	EBITDA multiples	4.25x – 8.28x (6.27x)

(1)
Excludes \$20,908, \$7, and \$500 of senior secured debt investments, subordinated debt investments, and equity investments, respectively, valued at a Transaction Price.

Equity investments				
Preferred equity	23,721	Enterprise value	EBITDA multiples	4.50x – 8.50x (6.82x)
Common equity and warrants	13,042	Enterprise value	EBITDA multiples	5.00x – 8.50x (6.07x)

(1)

Excludes \$15,926, \$12,382, and \$499 of senior secured debt investments, subordinated debt investments, and equity investments, respectively, valued at a Transaction Price.

Changes in market credit spreads or the credit quality of the underlying portfolio company (both of which could impact the discount rate), as well as changes in EBITDA and/or EBITDA multiples, among other things, could have a significant impact on fair values, with the fair value of a particular debt investment susceptible to change in inverse relation to the changes in the discount rate. Changes in EBITDA and/or EBITDA multiples, as well as changes in the discount rate, could have a significant impact on fair values, with the fair value of an equity investment susceptible to change in tandem with the changes in EBITDA and/or EBITDA multiples, and in inverse relation to changes in the discount rate. Due to the wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful. The following tables present changes in investments measured at fair value using Level 3 inputs for the years ended December 31, 2017 and 2016:

	Year Ended December 31, 2017				
	Senior Secured Debt Investments	Subordinated Debt Investments	Preferred Equity	Common Equity and Warrants	Total

The net unrealized appreciation (depreciation) reported in the Company's consolidated statements of operations for the years ended December 31, 2017, 2016, and 2015, attributable to the Company's Level 3 assets held at those respective year ends was \$(10,496), \$254, and \$3,243, respectively.

The information presented should not be interpreted as an estimate of the fair value of the entire Company since fair value measurements are only required for a portion of the Company's assets and liabilities. Due to the wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's

disclosures and those of other companies may not be meaningful.

Other Financial Assets and Liabilities

ASC Topic 820 requires disclosure of the fair value of financial instruments for which it is practical to estimate such value. The Company believes that the carrying amounts of its other financial instruments such as cash, receivables and payables approximate the fair value of such items due to the short maturity of such instruments. The Company's SBA-guaranteed debentures are carried at cost and with their longer

SF-44

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

maturity dates, fair value is estimated by discounting remaining payments using current market rates for similar instruments and considering such factors as the legal maturity date. As of December 31, 2017 and 2016, the fair value of the Company's SBA debentures using Level 3 inputs is estimated at \$155,510 and \$159,708, respectively.

Note 7. Commitments and Contingencies

Unfunded commitments to the Company's portfolio companies as of December 31, 2017, were as follows:

Name of Portfolio Company	Investment Type	Amount
Carolina Lubes, Inc.	Senior Secured Revolver	\$ 2,433
The Escape Game, LLC	Senior Secured Loan	7,000
TRS Services, LLC	Senior Secured Loan	500
		\$ 9,933

From time to time, the Company is involved in legal proceedings in the normal course of its business. Although the outcome of such litigation cannot be predicted with any certainty, management is of the opinion, based on the advice of legal counsel, that final disposition of any litigation should not have a material adverse effect on the financial position of the Company as of December 31, 2017.

Additionally, the Company is subject to periodic inspection by regulators to assess compliance with applicable regulations related to being a BDC and SBIC I LP is subject to periodic inspections by the SBA.

In the normal course of business, the Company enters into contracts and agreements that contain a variety of representations and warranties that provide general indemnifications. The Company's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Company that have not occurred. The Company believes the risk of any material obligation under these indemnifications to be low.

Note 8. Borrowings

SBA Debentures: The SBIC Program allows SBIC I LP to obtain leverage by issuing SBA-guaranteed debentures, subject to issuance of a capital commitment by the SBA and customary procedures. These debentures are non-recourse to the Company, have interest payable semi-annually and a ten-year maturity. The interest rate is fixed at the time of SBA pooling, which is March and September of each year, at a market-driven spread over U.S. Treasury Notes with ten-year maturities.

Under present regulations of the SBIC Act, the maximum amount of SBA-guaranteed debt that may be issued by a single SBIC licensee is \$150,000. An SBIC fund may borrow up to two times the amount of its regulatory capital, subject to customary regulatory requirements. For two or more SBICs under common control, the maximum amount of outstanding SBA-provided leverage cannot exceed \$350,000. In connection with the SBIC Acquisition, the Company increased its total commitments to SBIC I LP to \$75,000, which became a drop down SBIC fund of the Company on December 4, 2013. During 2014, the Company fully funded its \$75,000 commitment to SBIC I LP. As of December 31, 2017 and 2016, SBIC I LP had fully drawn the \$149,880 of leverage commitments from the SBA. On a stand-alone basis, SBIC I LP held \$251,601 and \$247,512 in assets at December 31, 2017 and 2016, respectively, which accounted for approximately 70% and 81% of the Company's total consolidated assets, respectively. These assets can not be pledged under any debt obligation of the Company.

SF-45

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

The following table shows the Company's outstanding SBA debentures payable as of December 31, 2017 and 2016:

Pooling Date	Maturity Date	Fixed Interest Rate	SBA debentures outstanding	
			December 31, 2017	December 31, 2016
September 19, 2012	September 1, 2022	3.049%	\$ 14,000	\$ 14,000
September 25, 2013	September 1, 2023	4.448	7,000	7,000
March 26, 2014	March 1, 2024	3.995	5,000	5,000
September 24, 2014	September 1, 2024	3.819	4,110	4,110
September 24, 2014	September 1, 2024	3.370	31,265	31,265
March 25, 2015	March 1, 2025	2.872	65,920	65,920
September 23, 2015	September 1, 2025	3.184	22,585	22,585
SBA debentures outstanding			149,880	149,880
Unamortized debt issuance costs			(2,656)	(3,037)
SBA debentures outstanding, net of unamortized debt issuance costs			\$ 147,224	\$ 146,843

The Company received exemptive relief from the SEC effective November 26, 2013, which permits the Company to exclude SBA guaranteed debentures from the definition of senior securities in the statutory 200% asset coverage ratio under the 1940 Act, allowing for greater capital deployment.

The effective interest rate on the SBA debentures, which includes amortization of deferred debt issuance costs, was 3.43% as of December 31, 2017 and 2016. Interest expense on the SBA debentures was \$5,141, \$5,156, and \$4,352 for the years ended December 31, 2017, 2016, and 2015, respectively, which includes \$380, \$382, and \$297 of debt issuance costs amortization, respectively.

The weighted-average fixed cash interest rate on the SBA debentures as of December 31, 2017 and 2016, was 3.18%.

PWB Credit Facility: The Company is party to the BLA with Pacific Western Bank, as lender, to provide the Company with a \$35.0 million senior secured revolving credit facility, or PWB Credit Facility. The PWB Credit Facility is available for general corporate purposes including investment funding and is scheduled to mature on October 31, 2018. The maximum availability of the PWB Credit Facility is equal to 50% of the aggregate outstanding principal amount of eligible loans included in the borrowing base, which excludes subordinated loan investments and as otherwise specified in the BLA. The PWB Credit Facility is guaranteed by OFS Capital WM and secured by all of our current and future assets excluding assets held by SBIC I LP and the Company's partnership interests in SBIC I LP and SBIC I GP. The PWB Credit Facility bears interest at a variable rate of the Prime Rate plus a 0.75% margin, with a 5.00% floor, and includes an unused commitment fee, payable monthly in arrears, equal to 0.50% per annum on any unused portion. As of December 31, 2017, the interest rate on the unpaid principal balance of the PWB Credit Facility was 5.25%.

On March 7, 2018 the BLA was amended to, among other things, increase the maximum amount available under the PWB Credit Facility from \$35 million to \$50 million, and extend the maturity date from October 31, 2018 to

January 31, 2020. The Company incurred deferred debt issuance costs of \$166 in connection with the amendment. The average dollar amount of borrowings outstanding during the year ended December 31, 2017, was \$8,488. The effective interest rate, which includes amortization of deferred debt issuance costs as of December 31, 2017, was 5.74% based on the maximum amount available under the PWB Credit Facility. Deferred debt issuance costs, net of accumulated amortization, was \$228 and \$256 as of December 31, 2017

SF-46

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

and 2016, respectively. Amortization of debt issuance costs was \$172, \$108, and \$17, for the years ended December 31, 2017, 2016, and 2015, respectively.

Availability under the PWB Credit Facility as of December 31, 2017 was \$17,400 based on the stated advance rate of 50% under the borrowing base.

The BLA contains customary terms and conditions, including, without limitation, affirmative and negative covenants such as information reporting requirements, a minimum tangible net asset value, a minimum quarterly net investment income after incentive fees, and a statutory asset coverage test. The BLA also contains customary events of default, including, without limitation, nonpayment, misrepresentation of representations and warranties in a material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change in investment advisor, and the occurrence of a material adverse change in our financial condition. As of December 31, 2017, the Company was in compliance with the applicable covenants.

OFS Capital WM Revolving Line of Credit: Prior to the termination of the WM Credit Facility on May 28, 2015 (see Note 3), OFS Capital WM had a \$75,000 secured revolving credit facility, as amended from time to time, with Wells Fargo. The WM Credit Facility was secured by all eligible loans acquired by OFS Capital WM, and had a maturity date of December 31, 2018 and a reinvestment period through December 31, 2015. The interest rate on outstanding borrowings was the London Interbank Offered Rate plus 2.50% per annum. The minimum equity requirement was set at \$35,000. The unused commitment fee on the WM Credit Facility was (i) 0.5% per annum of the first \$25,000 of the unused facility and (ii) 2% per annum of the balance in excess of \$25,000, and was included in interest expense on the consolidated statement of operations during 2015. During the three months ended March 31, 2015, the Company recorded a \$430 write-off of debt issuance costs due to a permanent reduction in the facility's commitment from \$100,000 to \$75,000. During the three months ended June 30, 2015, the Company incurred a \$1,216 write-off of debt issuance costs due to the termination of the facility on May 28, 2015.

Note 9. Federal Income Tax

The Company has elected to be taxed as a RIC under Subchapter M of the Code. In order to maintain its status as a RIC, the Company is required to distribute annually to its stockholders at least 90% of its ICTI, as defined by the Code. Additionally, to avoid a 4% excise tax on undistributed earnings the Company is required to distribute each calendar year the sum of (i) 98% of its ordinary income for such calendar year (ii) 98.2% of its net capital gains for the one-year period ending October 31 of that calendar year, and (iii) any income recognized, but not distributed, in preceding years and on which the Company paid no federal income tax. Maintenance of the Company's RIC status also requires adherence to certain source of income and asset diversification requirements.

The Company has met the required distribution, source of income and asset diversification requirements as of December 31, 2017, and intends to continue meeting these requirements. Accordingly, there is no liability for federal income taxes at the Company level. The Company's ICTI differs from the net increase in net assets resulting from operations primarily due to differences in income recognition on the unrealized appreciation/depreciation of investments, income from Company's equity investments in pass-through entities, PIK dividends that have not yet been declared and paid by underlying portfolio companies, capital gains and losses and the net creation or utilization of capital loss carryforwards.

SF-47

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

The distributions paid to stockholders are reported as ordinary income, long-term capital gains, and returns of capital. The tax character of distributions paid were as follows:

	Years Ended December 31,		
	2017	2016	2015
Ordinary taxable income	\$ 14,158	\$ 12,157	\$ 10,954
Long-term capital gain	2,738	169	—
Return of capital	—	858	2,197
Total distributions to stockholders	\$ 16,896	\$ 13,184	\$ 13,151

Tax-basis undistributed income as of December 31, 2017 and 2016, was as follows:

	December 31,	
	2017	2016
Ordinary income	\$ —	\$ —
Net long-term capital gains	4,936	—

The Company records reclassifications to its capital accounts related to permanent differences between GAAP and tax treatment related to goodwill amortization, excise taxes, and other permanent differences; and temporary differences between GAAP and tax treatment of realized gains and losses, income arising from Company's equity investments in pass-through entities, PIK dividends, and other temporary differences. Reclassifications were as follows:

	Years Ended December 31,		
	2017	2016	2015
Paid-in capital in excess of par	\$ (409)	\$ 592	\$ (198)
Accumulated undistributed net investment income	954	131	(304)
Accumulated net realized gain (loss)	(545)	(723)	502

The tax-basis cost of investments and associated tax-basis gross unrealized appreciation (depreciation) inherent in the fair value of investments as of December 31, 2017 and 2016, were as follows:

	December 31,	
	2017	2016
Tax-basis amortized cost of investments	\$ 282,401	\$ 273,414
Tax-basis gross unrealized appreciation on investments	16,207	19,554
Tax-basis gross unrealized depreciation on investments	(21,109)	(11,341)
Tax-basis net unrealized appreciation (depreciation) on investments	(4,902)	8,213
Fair value of investments	\$ 277,499	\$ 281,627

The Company recognizes deferred taxes on the appreciation of securities held through Taxable Blockers. Net unrealized depreciation on investments reported in net assets on the consolidated balance sheets has been increase by and other liabilities include deferred tax liabilities on appreciated securities of \$4 at December 31, 2017. There were no deferred tax assets or liabilities at December 31, 2016.

Shares outstanding at end of period	13,340,217	9,700,297	9,691,170
Weighted average shares outstanding	12,403,706	9,693,801	9,670,153
Ratio/Supplemental Data (in thousands except ratios)			
Average net asset value(3)	\$ 171,631	\$ 142,818	\$ 140,002
Net asset value at end of period	\$ 188,336	\$ 143,778	\$ 143,012
Net investment income	\$ 15,877	\$ 14,145	\$ 13,411
Ratio of total expenses to average net assets	10.2%	11.9%	13.5%
Ratio of net investment income to net assets at end of period	8.4%	9.8%	9.6%
Portfolio turnover(7)	50.4%	18.1%	44.6%

(1)

Calculation is ending market value less beginning market value, adjusting for dividends and distributions reinvested at prices obtained in the Company's dividend reinvestment plan for the respective distributions.

(2)
Calculation is ending net asset value less beginning net asset value, adjusting for dividends and distributions reinvested at the Company's quarter-end net asset value for the respective distributions.

(3)
Based on the average of the net asset value at the beginning of the indicated period and the end of each calendar quarter within the period indicated.

(4)
The components of the distributions are presented on an income tax basis.

(5)
The issuance of common stock on a per share basis reflects the incremental net asset value change as a result of the Offering.

SF-49

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

(6)

Represents the impact of different share amounts used in calculating per share data as a result of calculating certain per share data based on a weighted average shares outstanding during the period and certain per share data based on the shares outstanding as of a period end or transaction date.

(7)

Portfolio turnover rate is calculated using the lesser of period-to-date sales and principal payments or period-to-date purchases over the average of the invested assets at fair value.

Note 11. Distributions

The Company intends to make distributions to stockholders on a quarterly basis of substantially all of its net investment income. In addition, although the Company intends to make distributions of net realized capital gains, if any, at least annually, out of assets legally available for such distributions, it may in the future decide to retain such capital gains for investment.

The Company may be limited in its ability to make distributions due to the BDC asset coverage requirements of the 1940 Act. The Company's ability to make distributions may also be affected by its ability to receive distributions from SBIC I LP. SBIC I LP's ability to make distributions is governed by SBA regulations. Consolidated cash and cash equivalents includes \$72,116 held by SBIC I LP, which was not available for distribution at December 31, 2017.

The following table summarizes distributions declared and paid for the years ended December 31, 2017, 2016, and 2015:

Date Declared	Record Date	Payment Date	Amount Per Share	Cash Distribution	DRIP Shares Issued	DRIP Shares Value
Year ended December 31, 2015						
March 4, 2015	March 17, 2015	March 31, 2015	\$ 0.34	\$ 3,133	12,106	\$ 148
May 4, 2015	June 16, 2015	June 30, 2015	0.34	3,132	12,834	154
August 6, 2015	September 16, 2015	September 30, 2015	0.34	3,142	14,355	147
December 2, 2015	December 17, 2015	December 31, 2015	0.34	3,283	1,041	12
			\$ 1.36	\$ 12,690	40,336	\$ 461
Year ended December 31, 2016						
March 7, 2016	March 17, 2016	March 31, 2016	\$ 0.34	\$ 3,280	1,154	\$ 15
May 2, 2016	June 16, 2016	June 30, 2016	0.34	3,269	1,998	26
August 5, 2016	September 16, 2016	September 30, 2016	0.34	3,258	2,888	38
October 31, 2016	December 16, 2016	December 30, 2016	0.34	3,255	3,087	43

Edgar Filing: OFS Capital Corp - Form 497

			\$ 1.36	\$ 13,062	9,127	\$ 122
Year ended December 31, 2017						
March 9, 2017	March 17, 2017	March 31, 2017	\$ 0.34	\$ 3,257	2,919	\$ 41
May 2, 2017	June 16, 2017	June 30, 2017	0.34	4,483	3,439	49
August 1, 2017	September 15, 2017	September 29, 2017	0.34	4,491	3,196	42
October 31, 2017	December 15, 2017	December 29, 2017	0.34	4,469	5,366	64
			\$ 1.36	\$ 16,700	14,920	\$ 196

For the year ended December 31, 2017, \$196 of the total \$16,896 paid to stockholders represented DRIP participation, during which the Company satisfied the DRIP participation requirements with the issuance of 14,920 shares at an average value of \$13.18 per share at the date of issuance. For the year

SF-50

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

ended December 31, 2016, \$122 of the total \$13,184 paid to stockholders represented DRIP participation, during which the Company satisfied the DRIP participation requirements with the issuance of 9,127 shares at an average value of \$13.23 per share at the date of issuance. For the year ended December 31, 2015, \$461 of the total \$13,151 paid to stockholders represented DRIP participation, during which the Company satisfied the DRIP participation requirements with the issuance of 40,336 shares at an average value of \$11.44 per share at the date of issuance. Since the Company's IPO, distributions to stockholders total \$67,775, or \$6.63 per share on a cumulative basis. Distributions in excess of the Company's current and accumulated ICTI would be treated first as a return of capital to the extent of the stockholder's tax basis, and any remaining distributions would be treated as a capital gain. The determination of the tax attributes of the Company's distributions is made annually as of the end of its fiscal year based upon its ICTI for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of the Company's distributions for a full year. Each year, a statement on Form 1099-DIV identifying the source of the distribution is mailed to the Company's stockholders. For the year ended December 31, 2017, approximately \$1.14 per share, \$0.22 per share, and \$0 per share of the Company's distributions represented ordinary income, long-term capital gain, and a return of capital to its stockholders, respectively.

TABLE OF CONTENTS

OFS Capital Corporation and Subsidiaries

Notes to Consolidated Financial Statements

(Dollar amounts in thousands, except per share data)

(2)

Represents the total amount of interest, fees or dividends included in 2017 income for the portion of the year ended December 31, 2017, that an investment was included in Control or Affiliate Investment categories, respectively.

(3)

Gross additions include increases in cost basis resulting from a new portfolio investment, PIK interest, fees and dividends, accretion of OID, and net increases in unrealized net appreciation or decreases in net unrealized depreciation.

(4)

Gross reductions include decreases in the cost basis of investments resulting from principal repayments and sales, if any, and net decreases in net unrealized appreciation or net increases in net unrealized depreciation, and transfers from Affiliate Investment to Control Investment.

(5)

Fair value was determined using significant unobservable inputs. See Note 6 for further details.

(6)

Non-income producing.

(7)

Dividends credited to income include dividends contractually earned but not declared.

(8)

Jobson became an affiliate investment effective December 31, 2017, due to an increase in voting ownership interest.

(9)

Malabar was reclassified from a control investment to an affiliate investment due to a decrease in voting interest.

Note 14. Subsequent Events Not Disclosed Elsewhere

On February 12, 2018, the Board declared a special distribution of \$0.37 per share payable on March 29, 2018 to stockholders of record as of March 22, 2018. In addition, on February 27, 2018, the Company's Board declared a distribution of \$0.34 per share for the first quarter of 2018, payable on March 29, 2018 to stockholders of record as of March 22, 2018.

Debt Securities

We are an externally managed, non-diversified, closed-end management investment company that has elected to be treated as a business development company under the Investment Company Act of 1940 (the “1940 Act”). Our investment objective is to provide our stockholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments.

We may offer, from time to time, in one or more offerings or series, up to \$200.0 million in shares of our common stock, par value \$0.01 per share, preferred stock, par value \$0.01 per share, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities which we refer to, collectively, as the “securities.” We may sell our securities directly or through underwriters or dealers, “at-the-market” to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

The securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents or underwriters involved in the sale of shares of our securities, and will disclose any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See “Plan of Distribution.” We may not sell any securities through agents, underwriters or dealers without delivery of this prospectus and a prospectus supplement describing the method and terms of the offering of the securities.

Substantially all of the debt securities in which we invest are below investment grade debt securities and are often referred to as “high yield” or “junk” securities. Exposure to below investment grade securities involves certain risk, and those securities are viewed as having predominately speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. A material amount of our debt investments contain floating interest rate provisions that may make it more difficult for the borrowers to make debt repayments. Further, our debt investments generally will not pay down principal during their term which could result in a substantial loss to us if the portfolio company is unable to refinance or repay the debt at maturity.

Our common stock is traded on the Nasdaq Global Select Market under the symbol “OFS.” On June 13, 2017, the last reported sales price on the Nasdaq Global Select Market for our common stock was \$14.20 per share. We are required to determine the net asset value per share of our common stock on a quarterly basis. Our net asset value per share of our common stock as of March 31, 2017 was \$14.98.

Please read this prospectus before investing and keep it for future reference. It contains important information about us that a prospective investor ought to know before investing in our securities. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission. The information is available free of charge by contacting Investor Relations of OFS Capital Corporation, 10 S. Wacker Drive, Suite 2500, Chicago, IL 60606, or by calling us at (847) 734-2000 or on our website at www.ofscapital.com. The Securities and Exchange Commission, or the SEC, maintains a website at www.sec.gov where such information is available without charge. Information contained on our website is not incorporated by reference into this

prospectus, and you should not consider information contained on our website to be part of this prospectus. Investing in our securities involves a high degree of risk, including credit risk and the risk of the use of leverage. Before buying any of our securities, you should read the discussion of the material risks of investing in our securities in “Risk Factors” beginning on page 16 of this prospectus. Neither the SEC nor any state securities commission has approved or disapproved of these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense. This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement. Prospectus dated June 16, 2017

You should rely only on the information contained in this prospectus and any prospectus supplement to this prospectus. We have not authorized any dealer, salesperson or other person to provide you with different information or to make representations as to matters not stated in this prospectus or any accompanying prospectus supplement. If anyone provides you with different or inconsistent information, you should not rely on it. This prospectus and any such supplement do not constitute an offer to sell, or a solicitation of an offer to buy, any securities by any person in any jurisdiction where it is unlawful for that person to make such an offer or solicitation or to any person in any jurisdiction to whom it is unlawful to make such an offer or solicitation. The information in this prospectus and any such supplement is accurate only as of its date, and under no circumstances should the delivery of this prospectus and any such supplement or the sale of any securities imply that the information in this prospectus is accurate as of any later date or that the affairs of OFS Capital Corporation have not changed since such date. This prospectus and any accompanying prospectus supplement will be updated to reflect material changes.

ii

TABLE OF CONTENTS
ABOUT THIS PROSPECTUS

This prospectus and any accompanying prospectus supplement is part of a registration statement that we have filed with the Securities and Exchange Commission using the “shelf” registration process. Under the shelf registration process, which constitutes a delayed offering in reliance on Rule 415 under the Securities Act of 1933, as amended, we may offer, from time to time, up to \$200.0 million of shares of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights, or debt securities on the terms to be determined at the time of the offering. We may sell our securities through underwriters or dealers, “at-the-market” to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. Our securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus and any accompanying prospectus supplement provides you with a general description of our securities that we may offer. Each time we use this prospectus to offer our securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any such supplements together with the additional information described under “Available Information” and “Risk Factors” sections before you make an investment decision.

A prospectus supplement may also add to, update or change information contained in this prospectus.

iii

TABLE OF CONTENTS

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider before investing in our securities. Throughout this prospectus, we refer to OFS Capital Corporation and its consolidated subsidiaries as the “Company,” “we,” “us” or “our;” OFS Capital Management, LLC as “OFS Advisor” or the “Advisor;” and OFS Capital Services, LLC as “OFS Services” or the “Administrator.” OFS Capital Corporation

We are an externally managed, closed-end, non-diversified management investment company and have elected to be treated as a BDC under the Investment Company Act of 1940, as amended (the “1940 Act”). Our investment objective is to provide our stockholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments. Our investment strategy focuses primarily on investments in middle-market companies in the United States. We use the term “middle-market” to refer to companies that may exhibit one or more of the following characteristics: number of employees between 150 and 2,000; revenues between \$15 million and \$300 million; annual earnings before interest, taxes, depreciation and amortization (“EBITDA”), between \$3 million and \$50 million; generally, private companies owned by private equity firms or owners/operators; and enterprise value between \$10 million and \$500 million. For additional information about how we define the middle-market, see “The Company — Investment Criteria/Guidelines.”

As of March 31, 2017, we had debt and equity investments in 38 portfolio companies with an aggregate fair value of \$258.3 million. As of March 31, 2017, 64% of our investment portfolio was comprised of senior secured loans, 20% of subordinated loans and 16% of equity investments, at fair value.

While our investment strategy focuses primarily on middle-market companies in the United States, including senior secured loans, which includes first-lien, second-lien and unitranche loans as well as subordinated loans and, to a lesser extent, warrants and other equity securities, we also may invest up to 30% of our portfolio in opportunistic investments of non-eligible portfolio companies. Specifically, as part of this 30% basket, we may consider investments in investment funds that are operating pursuant to certain exceptions to the 1940 Act and in advisers to similar investment funds, as well as in debt of middle-market companies located outside of the United States and debt and equity of public companies that do not meet the definition of eligible portfolio companies because their market capitalization of publicly traded equity securities exceeds the levels provided for in the 1940 Act.

Our investment strategy includes OFS SBIC I LP (“SBIC I LP”), which received a license under the U.S. Small Business Administration (“SBA”) Small Business Investment Company program, in May 2012. The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA leverage funding is subject to SBIC I LP’s payment of certain fees to the SBA, and the ability of SBIC I LP to draw on the leverage commitment is subject to its compliance with SBA regulations and policies, including an audit by the SBA. For additional information regarding the regulation of SBIC I LP, see “— Regulation — Small Business Investment Company Regulations.

In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

On a stand-alone basis, SBIC I LP held approximately \$251.3 million, \$247.5 million, and \$245.1 million in assets at March 31, 2017, December 31, 2016 and 2015, respectively, which accounted for approximately 82%, 81% and 83% of our total consolidated assets at March 31, 2017, December 31, 2016 and 2015, respectively.

Our investment activities are managed by OFS Capital Management, LLC (“OFS Advisor”) and supervised by our board of directors, a majority of whom are independent of us, OFS Advisor and its affiliates. Under the investment advisory agreement between us and OFS Advisor (the “Investment

TABLE OF CONTENTS

Advisory Agreement”) we have agreed to pay OFS Advisor an annual base management fee based on the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) as well as an incentive fee based on our investment performance. We have elected to exclude from the base management fee calculation any base management fee that would be owed in respect of the intangible asset and goodwill resulting from our acquisitions of the remaining ownership interests in SBIC I LP and SBIC I GP, LLC (“SBIC I GP”) on December 4, 2013 (“SBIC Acquisition”).

We have also entered into an administration agreement (“Administration Agreement”) with OFS Capital Services, LLC (“OFS Services”). Under our Administration Agreement, we have agreed to reimburse OFS Services for our allocable portion (subject to the review and approval of our independent directors) of overhead and other expenses incurred by OFS Services in performing its obligations under the Administration Agreement.

As a BDC, we must not acquire any assets other than “qualifying assets” specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Qualifying assets include investments in “eligible portfolio companies.” Under the relevant Securities and Exchange Commission (“SEC”) rules, the term “eligible portfolio company” includes all private companies, companies whose securities are not listed on a national securities exchange, and certain public companies that have listed their securities on a national securities exchange and have a market capitalization of less than \$250 million, in each case organized in the United States.

We are permitted to borrow money from time to time within the levels permitted by the 1940 Act (which generally allows us to incur leverage for up to 50% of our asset base). We may borrow money when the terms and conditions available are favorable to do so and are aligned with our investment strategy and portfolio composition. The use of borrowed funds or the proceeds of preferred stock to make investments would have its own specific benefits and risks, and all of the costs of borrowing funds or issuing preferred stock would be borne by holders of our common stock.

We have elected to be treated for tax purposes as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (“Code”). To continue to qualify as a RIC, we must, among other things, meet certain source-of-income and assets diversification requirements. Pursuant to these elections, we generally will not have to pay corporate-level taxes on any income we distribute to our stockholders.

The 1940 Act generally prohibits BDCs from making certain negotiated co-investments with certain affiliates absent an order from the SEC permitting the BDC to do so. On October 12, 2016, we received exemptive relief from the SEC to permit us to co-invest in portfolio companies with certain other funds managed by OFS Advisor (“Affiliated Funds”) in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the “Order”).

Pursuant to the Order, we are generally permitted to co-invest with Affiliated Funds if a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

TABLE OF CONTENTS

Organizational Structure

About OFS and Our Advisor

OFS (which refers to the collective activities and operations of Orchard First Source Asset Management, LLC (“OFSAM”) and its subsidiaries and certain affiliates) is an established investment platform focused on meeting the capital needs of middle-market companies. OFS is the successor to First Source Financial Inc., which was founded in 1995 as a joint venture between Dominion Capital, Inc., a wholly-owned subsidiary of Dominion Resources, Inc., or Dominion, and Household Commercial Financial Services Inc., a unit of Household International, or Household. Household sold its interest in First Source Financial Inc. to Dominion in 1997. In 2003, Orchard Paladin Management, LLC, our predecessor, acquired from Dominion a portfolio of performing and non-performing loans of approximately \$625 million in aggregate commitment amount, plus additional investments in equity securities. Shortly thereafter, in 2004, Orchard Paladin Management, LLC acquired Dominion’s interest in First Source Financial Inc. Most of the loan workouts and special situations investments managed by our senior managers since 2003 involved loans in the portfolio acquired from Dominion and loans acquired as a result of the purchase of Dominion’s interest in First Source Financial Inc.

As of March 31, 2017, OFS had 43 full-time employees. OFS is headquartered in Chicago, Illinois and also has offices in New York, New York and Los Angeles, California.

Our investment activities are managed by OFS Advisor, our investment adviser. OFS Advisor is responsible for sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. OFS Advisor is a registered investment adviser under the Investment Advisers Act of 1940 (the “Advisers Act”) and a subsidiary of OFSAM.

Our relationship with OFS Advisor is governed by and dependent on the Investment Advisory Agreement and may be subject to conflicts of interest. OFS Advisor provides us with advisory services in exchange for a base management fee and incentive fee; see “—Management and Other Agreements — Investment Advisory Agreement”. The base management fee is based on our total assets (other than cash and cash equivalents, and the intangible asset and goodwill resulting from the SBIC Acquisitions; but including assets purchased with borrowed amounts, and including assets owned by any consolidated entity) and, therefore, OFS Advisor will benefit when we incur debt or use leverage. Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts

TABLE OF CONTENTS

of interest associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor's services and fees as well as its portfolio management decisions and portfolio performance.

OFS Advisor has entered into a Staffing Agreement (the "Staffing Agreement") with Orchard First Source Capital, Inc. ("OFSC") a wholly-owned subsidiary of OFSAM. Under the Staffing Agreement, OFSC makes experienced investment professionals available to OFS Advisor and provides access to the senior investment personnel of OFS and its affiliates. The Staffing Agreement provides OFS Advisor with access to deal flow generated by OFS and its affiliates in the ordinary course of their businesses and commits the members of OFS Advisor's investment committee to serve in that capacity. As our investment adviser, OFS Advisor is obligated to allocate investment opportunities among us and any other clients fairly and equitably over time in accordance with its allocation policy.

OFS Advisor capitalizes on the deal origination and sourcing, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of OFS's professionals. The senior management team of OFS, including Bilal Rashid, Jeff Cerny and Mark Hauser, provides services to OFS Advisor. These managers have developed a broad network of contacts within the investment community, averaging over 20 years of experience investing in debt and equity securities of middle-market companies. In addition, these managers have gained extensive experience investing in assets that will constitute our primary focus and have expertise in investing across all levels of the capital structure of middle-market companies. See "Portfolio Management" for additional information regarding our portfolio managers.

Our Administrator

OFS Services, an affiliate of OFS Advisor, provides the administrative services necessary for us to operate. OFS Services furnishes us with office facilities and equipment, necessary software licenses and subscriptions and clerical, bookkeeping and recordkeeping services at such facilities. OFS Services oversees our financial reporting as well as prepares our reports to stockholders and all other reports and materials required to be filed with the SEC or any other regulatory authority. OFS Services also manages the determination and publication of our net asset value and the preparation and filing of our tax returns and generally monitors the payment of our expenses and the performance of administrative and professional services rendered to us by others. OFS Services may retain third parties to assist in providing administrative services to us. To the extent that OFS Services outsources any of its functions, we will pay the fees associated with such functions at cost, on a direct basis.

Market Opportunity

Our investment strategy is focused primarily on investments in middle-market companies in the United States. We find the middle-market attractive for the following reasons:

Large Target Market. According to the U.S. Census Bureau in its 2012 economic census, there were approximately 197,000 companies in the United States with annual revenues between \$10 million and \$2.5 billion, compared with approximately 1,300 companies with revenues greater than \$2.5 billion. We believe that these middle-market companies represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have historically constituted the vast bulk of OFS's portfolio companies since its inception, and constituted the vast bulk of our portfolio as of March 31, 2017. We believe that this market segment will continue to produce significant investment opportunities for us.

Specialized Lending Requirements with High Barriers to Entry. We believe that several factors render many U.S. financial institutions ill-suited to lend to U.S. middle-market companies. For example, based on the experience of our management team, lending to private middle-market companies in the United States (a) is generally more labor-intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information for such companies, (b) requires due diligence and underwriting practices consistent with the demands and economic limitations of the middle-market and

TABLE OF CONTENTS

(c) may also require more extensive ongoing monitoring by the lender. As a result, middle-market companies historically have been served by a limited segment of the lending community. As a result of the unique challenges facing lenders to middle-market companies, there are high barriers to entry that a new lender must overcome. Robust Demand for Debt Capital. We believe that private equity firms have significant committed but uncalled capital, a large portion of which is still available for investment in the United States. Subject to market conditions, we expect the large amount of unfunded buyout commitments will drive demand for leveraged buyouts over the next several years, which should, in turn, create leveraged lending opportunities for us.

Competitive Strengths and Core Competencies

Deep Management Team Experienced in All Phases of Investment Cycle and Across All Levels of the Capital Structure. We are managed by OFS Advisor, which has access through the Staffing Agreement with OFSC to the resources and expertise of OFS's investment professionals. As of March 31, 2017, OFS's credit and investment professionals (including all investment committee members) employed by OFSC had an average of over 15 years of investment experience with strong institutional backgrounds.

Significant Investment Capacity. The net proceeds of equity and debt offerings and borrowing capacity under our credit facilities, will provide us with a substantial amount of capital available for deployment into new investment opportunities in our targeted asset class.

Scalable Infrastructure Supporting the Entire Investment Cycle. We believe that our loan acquisition, origination and sourcing, underwriting, administration and management platform is highly scalable (that is, it can be expanded on a cost efficient basis within a time frame that meets the demands of business growth). Our platform extends beyond origination and sourcing and includes a regimented credit monitoring system. We believe that our careful approach, which involves ongoing review and analysis by an experienced team of professionals, should enable us to identify problems early and to assist borrowers before they face difficult liquidity constraints.

Extensive Loan Sourcing Capabilities. OFS Advisor gives us access to the deal flow of OFS. We believe OFS's 20-year history as a middle-market lending platform and its market position make it a leading lender to many sponsors and other deal sources, especially in the currently under-served lending environment, and we have extensive relationships with potential borrowers and other lenders.

Structuring with a High Level of Service and Operational Orientation. We provide client-specific and creative financing structures to our portfolio companies. Based on our experience in lending to and investing in middle-market companies, we believe that the middle-market companies we target, as well as sponsor groups we may pursue, require a higher level of service, creativity and knowledge than has historically been provided by other service providers more accustomed to participating in commodity-like loan transactions.

Rigorous Credit Analysis and Approval Procedures. OFS Advisor utilizes the established, disciplined investment process of OFS for reviewing lending opportunities, structuring transactions and monitoring investments. Using OFS's disciplined approach to lending, OFS Advisor seeks to minimize credit losses through effective underwriting, comprehensive due diligence investigations, structuring and, where appropriate, the implementation of restrictive debt covenants.

Structure of Investments

We anticipate that our loan portfolio will continue to contain investments of the following types with the following characteristics:

Senior Secured First-Lien Loans. First-lien senior secured loans comprise, and will continue to comprise, a significant portion of our investment portfolio. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans (in certain cases, subject to a payment waterfall). The collateral takes the form of first-priority liens on specified assets of the portfolio company borrower and, typically, first-priority pledges of the ownership interests in the borrower.

TABLE OF CONTENTS

Our first lien loans may provide for moderate loan amortization in the early years of the loan, with the majority of the amortization deferred until loan maturity. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in this prospectus.

Senior Secured Unitranche Loans. Unitranche loans are loans that combine both senior and subordinated debt into one loan under which the borrower pays a single blended interest rate that is intended to reflect the relative risk of the secured and unsecured components. We typically structure our unitranche loans as senior secured loans. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans. This collateral takes the form of first-priority liens on the assets of a portfolio company and, typically, first-priority pledges of the ownership interests in the company. We believe that unitranche lending represents a significant growth opportunity for us, offering the borrower the convenience of dealing with one lender, which may result in a higher blended rate of interest to us than we might realize in a traditional multi-tranche structure. Unitranche loans typically provide for moderate loan amortization in the initial years of the facility, with the majority of the amortization deferred until loan maturity. Unitranche loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. In many cases, we will be the sole lender, or we, together with our affiliates, will be the sole lender, of unitranche loans, which can afford us additional influence with a borrower in terms of monitoring and, if necessary, remediation in the event of under performance. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in this prospectus.

Senior Secured Second-lien Loans. Second-lien senior secured loans obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of such loans. This collateral typically takes the form of second-priority liens on the assets of a portfolio company, and we may enter into an inter-creditor agreement with the holders of the portfolio company's first-lien senior secured debt. These loans typically provide for no contractual loan amortization in the initial years of the facility, with all amortization deferred until loan maturity. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in this prospectus.

Subordinated ("Mezzanine") Loans. These investments are typically structured as unsecured, subordinated loans that typically provide for relatively high, fixed interest rates that provide us with significant current interest income. These loans typically will have interest-only payments (often representing a combination of cash pay and payment-in-kind ("PIK") interest) in the early years, with amortization of principal deferred to maturity. Mezzanine loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. Mezzanine investments are generally more volatile than secured loans and may involve a greater risk of loss of principal. Mezzanine loans often include a PIK feature (meaning a feature allowing for the payment of interest in the form of additional principal amount of the loan instead of in cash), which effectively operates as negative amortization of loan principal, thereby increasing credit risk exposure over the life of the loan. These loans are categorized as Subordinated Loans in our consolidated schedule of investments included in this prospectus.

Equity Securities. Equity securities typically consist of either a direct minority equity investment in common or membership/partnership interests or preferred stock of a portfolio company, and are typically not control-oriented investments. Our preferred equity investments typically contain a fix dividend yield based on the par value of the equity security. Preferred equity dividends may be paid in cash at a stipulated date, usually quarterly and are participating and/or cumulative. We may structure such equity investments to include provisions protecting our rights as a minority-interest holder, as well as a "put," or right to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and "piggyback" registration rights, which grants us the right to register our equity interest when either the portfolio company or another investor in the portfolio company initiates a registration. Our equity investments typically are made in connection with debt investments to the same portfolio companies. These securities are categorized as a Preferred Equity or Common Equity in our consolidated schedule of investments included in this prospectus.

TABLE OF CONTENTS

Warrants. In some cases, we may receive nominally priced warrants to buy a minority equity interest in the portfolio company in connection with a loan. As a result, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure such warrants to include provisions protecting our rights as a minority-interest holder, as well as a put to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and “piggyback” registration rights. These securities are categorized as a Warrant in our consolidated schedule of investments included in this prospectus.

General Structuring Considerations. We tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its operating results. We seek to limit the downside potential of our investments by:

- selecting investments that we believe have a very low probability of loss;
- requiring a total return on our investments (including both interest and potential equity appreciation) that we believe will compensate us appropriately for credit risk; and
- negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with the preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or rights to a seat on the board of directors under some circumstances.

We expect to hold most of our investments to maturity or repayment, but we may sell some of our investments earlier if a liquidity event occurs, such as a sale, recapitalization or worsening of the credit quality of the portfolio company.

Investments

We pursue an investment strategy focused primarily on investments in middle-market companies in the United States. We focus on investments in loans, in which OFS Advisor’s investment professionals have expertise, including investments in first-lien, unitranche, second-lien, and mezzanine loans and, to a lesser extent, on warrants and other equity securities. We seek to create a diverse portfolio by making investments in the securities of middle-market companies that we expect to range generally from \$3.0 million to \$25.0 million each, although we expect this investment size will vary proportionately with the size of our capital base.

Competition

Our primary competitors include public and private funds, other BDCs, commercial and investment banks, commercial finance companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical, and marketing resources than we do. Some competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Further, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC, or to the distribution and other requirements we must satisfy to maintain our RIC status.

We expect to continue to use the expertise of the investment professionals of OFS and its affiliates to which we have access, to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we expect that the relationships of the senior members of OFS and its affiliates will enable us to learn about, and compete effectively for, financing opportunities with attractive middle-market companies in the industries in which we seek to invest. For additional information concerning the competitive risks we face, see “Risk Factors — Risks Related to our Business and Structure — We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.”

TABLE OF CONTENTS

Conflicts of Interests

Subject to certain 1940 Act restrictions on co-investments with affiliates, OFS Advisor will offer us the right to participate in investment opportunities that it determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors. Such offers will be subject to the exception that, in accordance with OFS Advisor's allocation policy, we might not participate in each individual opportunity but will, on an overall basis, be entitled to participate fairly and equitably with other entities managed by OFS Advisor and its affiliates.

To the extent that we compete with entities managed by OFS Advisor or any of its affiliates for a particular investment opportunity, OFS Advisor will allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (a) its internal allocation policy, (b) the requirements of the Advisers Act, and (c) certain restrictions under the 1940 Act and rules thereunder regarding co-investments with affiliates. OFS Advisor's allocation policy is intended to ensure that we may generally share fairly and equitably with other investment funds or other investment vehicles managed by OFS Advisor or its affiliates in investment opportunities that OFS Advisor determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors, particularly those involving a security with limited supply or involving differing classes of securities of the same issuer that may be suitable for us and such other investment funds or other investment vehicles. Under this allocation policy, if two or more investment vehicles with similar or overlapping investment strategies are in their investment periods, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

- investment guidelines and/or restrictions, if any, set forth in the applicable organizational, offering or similar documents for the investment vehicles;
- risk and return profile of the investment vehicles;
- suitability/priority of a particular investment for the investment vehicles;
- if applicable, the targeted position size of the investment for the investment vehicles;
- level of available cash for investment with respect to the investment vehicles;
- total amount of funds committed to the investment vehicles; and
- the age of the investment vehicles and the remaining term of their respective investment periods, if any.

In situations where co-investment with such other accounts is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, OFS Advisor will need to decide which account will proceed with the investment. The decision by OFS Advisor to allocate an opportunity to another entity could cause us to forego an investment opportunity that we otherwise would have made. See "Related-Party Transactions and Certain Relationships."

Recent Developments

In April 2017, the Company sold 3,625,000 shares of the Company's common stock at an offering price of \$14.57 per share. The Company received net proceeds of approximately \$52.82 million, which the Company intends to use for

new investments in portfolio companies in accordance with its investment objective and strategies and for general working capital purposes, including to temporarily repay indebtedness (which will be subject to re-borrowing), and other working capital needs. The Company also will pay expenses, including advisory and administrative fees and expenses, and may pay other expenses such as due diligence expenses of potential new investments, from the net proceeds of the offering.

Corporate Information

Our principal executive offices are located at 10 S. Wacker Drive, Suite 2500, Chicago, IL, 60606, and our telephone number is (847) 734-2000. Information contained in our website is not incorporated by reference into this prospectus, and you should not consider that information to be part of this prospectus.

8

TABLE OF CONTENTS

We file annual, quarterly and current periodic reports, proxy statements and other information with the SEC under the Securities Exchange Act of 1934, as amended, which we refer to as the Exchange Act. This information is available at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information about the operation of the SEC's public reference room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet website, at www.sec.gov, that contains reports, proxy and information statements, and other information regarding issuers, including us, who file documents electronically with the SEC.

Risks

Investing in our securities may be speculative and involves certain risks relating to our structure and our investment objective that you should consider before deciding whether to invest. See "Risk Factors" beginning on page 16 of this prospectus for a more detailed discussion of material risks you should carefully consider before deciding to invest in our securities.

9

TABLE OF CONTENTS

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that you will bear directly or indirectly. We caution you that the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by “us,” “the Company” or “OFS Capital,” or that “we” will pay fees or expenses, you will indirectly bear such fees or expenses as an investor in OFS Capital.

Stockholder transaction expenses:

Sales load borne by us (as a percentage of offering price)	—%(1)
Offering expenses borne by us (as a percentage of offering price)	—%(2)
Dividend reinvestment plan fees (per sales transaction fee)	\$ 15.00(3)
Total Stockholder transaction expenses (as a percentage of offering price)	—%
Annual expenses (as a percentage of net assets attributable to common stock):	
Base Management fees payable under the Investment Advisory Agreement	3.28%(4)
Incentive fees payable under the Investment Advisory Agreement	2.67%(5)
Interest payments on borrowed funds	3.82%(6)
Other expenses	2.18%(7)
Acquired fund fees and expenses	—%(8)(9)
Total annual expenses	11.95%

(1)

In the event that the securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load and the following Example will be updated accordingly.

(2)

The related prospectus supplement will disclose the applicable offering expenses and total stockholder transaction expenses.

(3)

The expenses of the dividend reinvestment plan are included in “other expenses.” The plan administrator’s fees will be paid by us. There will be no brokerage charges or other charges to stockholders who participate in the plan except that, if a participant elects by written notice to the plan administrator to have the plan administrator sell part or all of the shares held by the plan administrator in the participant’s account and remit the proceeds to the participant, the plan administrator is authorized to deduct a \$15.00 transaction fee plus a \$0.10 per share brokerage commission from the proceeds. For additional information, see “Distribution Reinvestment Plan.”

(4)

Our base management fee is 1.75% of the average value of our total assets (other than cash and cash equivalents, and the intangible asset and goodwill resulting from the SBIC Acquisitions; but including assets purchased with borrowed amounts, and including assets owned by any consolidated entity). This item represents actual base management fees incurred for the three months ended March 31, 2017, annualized for a 12-month period. We may from time to time decide it is appropriate to change the terms of the agreement. Under the 1940 Act, any material change to our Investment Advisory Agreement must be submitted to stockholders for approval. See “Management and Other Agreements — Investment Advisory Agreement”.

(5)

Assumes a Part One and Part Two incentive fee, as defined below, of \$3.6 million and \$0.3 million, respectively. The Part One incentive fee was calculated based on our statement of operations for the three months ended March 31, 2017, annualized for a 12-month period. The Part Two incentive of \$0.3 million represents the actual Part Two incentive fee accrued for the three months ended March 31, 2017. The Part Two incentive fee is accrued, but not paid, if, on a cumulative basis, the sum of net realized capital gains and (losses) plus net unrealized appreciation and (depreciation) is positive. Net realized and unrealized capital gains or losses can vary substantially from period to period.

TABLE OF CONTENTS

The incentive fee consists of two parts:

The first (“Part One”), payable quarterly in arrears, equals 20.0% of our pre-incentive fee net investment income initially calculated based on values at the closing of this offering (including income that is accrued but not yet received in cash), subject to a 2.0% quarterly (8.0% annualized) hurdle rate and a “catch-up” provision measured as of the end of each calendar quarter. Under this provision, in any calendar quarter, OFS Advisor receives no incentive fee until our pre-incentive fee net investment income equals the hurdle rate of 2.0% but then receives, as a “catch-up,” 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, OFS Advisor will receive 20.0% of our pre-incentive fee net investment income as if a hurdle rate did not apply.

The hurdle rate is fixed at 2.0% quarterly (8% annualized), which means that, if interest rates rise, it will be easier for our pre-incentive fee net investment income to surpass the hurdle rate, which could lead to the payment of fees to OFS Advisor in an amount greater than expected. There is no accumulation of amounts on the hurdle rate from quarter to quarter and accordingly there is no clawback of amounts previously paid if subsequent quarters are below the quarterly hurdle rate and there is no delay of payment if prior quarters are below the quarterly hurdle rate.

The second part (“Part Two”), payable annually in arrears, equals 20.0% of our realized capital gains on a cumulative basis, if any (or upon the termination of the Investment Advisory Agreement, as of the termination date), computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. The incentive fee is determined on a consolidated basis. We accrue the Part Two incentive fee if, on a cumulative basis, the sum of net realized capital gains and (losses) plus net unrealized appreciation and (depreciation) is positive. See “Management and Other Agreements — Investment Advisory Agreement.”

(6)

Interest payments on borrowed funds represents an estimate of our annualized interest expenses on our SBA debentures and our expected interest expense under our senior secured revolving credit facility with Pacific Western Bank (the “PWB Credit Facility”) over the next twelve months. At March 31, 2017, we had \$149.9 million of SBA debentures outstanding with an effective interest rate of 3.42%, which includes amortization of deferred debt issuance costs. At March 31, 2017, we had \$8.0 million outstanding the PWB Credit Facility with an effective interest rate of 6.74%, which includes amortization of deferred debt issuance costs and unused fees. For purposes of this calculation, we have assumed the March 31, 2017 amounts outstanding under the SBA debentures and PWB Credit Facility.

We may borrow additional funds from time to time to make investments to the extent we determine that the economic situation is conducive to doing so. We do not expect to issue any preferred stock during the next twelve months and, therefore, have not included the cost of issuing and servicing preferred stock in the table. In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

Availability under the PWB Credit Facility as of March 31, 2017 was \$16.3 million based on the stated advance rate of 50% under the borrowing base. Our stockholders will bear directly or indirectly the costs of borrowings under any debt instruments we may enter into.

(7)

Includes our overhead expenses, including payments under the Administration Agreement based on our allocable portion of overhead and other expenses incurred by OFS Services. See “Management and Other Agreements — Administration Agreement.” These expenses are based on estimated amounts for the current fiscal year.

TABLE OF CONTENTS

(8)

Our stockholders indirectly bear the expenses of underlying funds or other investment vehicles that would be investment companies under section 3(a) of the 1940 Act but for the exceptions to that definition provided for in sections 3(c)(1) and 3(c)(7) of the 1940 Act (“Acquired Funds”) in which we invest. We do not currently invest in underlying funds or other investment companies.

(9)

Estimated.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have no additional leverage and that our annual operating expenses would remain at the levels set forth in the table above. The expense amounts assume an annual base management fee 1.75% for each year. Transaction expenses are not included in the following example.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5.0% annual return	\$ 87	\$ 254	\$ 405	\$ 726

While the example assumes, as required by the applicable rules of the SEC, a 5.0% annual return, our performance will vary and may result in a return greater or less than 5.0%. The incentive fee under the Investment Management Agreement, which, assuming a 5.0% annual return, would either not be payable or would have an insignificant impact on the expense amounts shown above, is not included in the above example. The above illustration assumes that we will not realize any capital gains (computed net of all realized capital losses and unrealized capital depreciation) in any of the indicated time periods. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses and returns to our investors would be higher. For example, if we assumed that we received our 5.0% annual return completely in the form of net realized capital gains on our investments, computed net of all cumulative unrealized depreciation on our investments, the projected dollar amount of total cumulative expenses set forth in the above illustration would be as follows:

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5.0% annual return	\$ 98	\$ 279	\$ 440	\$ 771

While the examples assume reinvestment of all distributions at net asset value, participants in our dividend reinvestment plan will receive a number of shares of our common stock determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the dividend payment date. The market price per share of our common stock may be at, above or below net asset value. See “Distribution Reinvestment Plan” for additional information regarding the dividend reinvestment plan. The example should not be considered a representation of future expenses, and actual expenses may be greater or less than those shown.

TABLE OF CONTENTS

SELECTED CONSOLIDATED FINANCIAL DATA

The following selected financial and other data for the years ended December 31, 2016, 2015, and 2014 are derived from our consolidated financial statements that have been audited by BDO USA, LLP, our independent auditors. Selected financial and other data for the year ended December 31, 2013, the period November 8, 2012 through December 31, 2012, and the period January 1, 2012 through November 7, 2012 are derived from our audited consolidated financial statements. The selected financial data and other data for the three months ended March 31, 2017, and 2016 are derived from our unaudited financial statements. Interim results as of and for the three months ended March 31, 2017 are not necessarily indicative of the results that may be expected for the year ending December 31, 2017. The data should be read in conjunction with our consolidated financial statements and notes thereto and “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” “Senior Securities,” and the consolidated financial statements and related notes included elsewhere herein.

(1)

The consolidated statement of operations for the year ended December 31, 2012 included the Company's Pre-IPO and Post-IPO operations during 2012.

(2)

The determination of the tax attributes of our distributions is made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of our distributions for a full year. If the tax characteristics of the Company's distributions paid during 2017 were determined as of March 31, 2017, approximately \$0.08 per share of the Company's distributions represented a return of capital. The return of capital portion of these distributions as of December 31, 2016, 2015, 2014, and 2013 (which includes the period December 8, 2012 to December 31, 2012), was \$0.09, \$0.23, \$0.72, and \$0.40.

TABLE OF CONTENTS

(3)

On January 1, 2016, we adopted Accounting Standards Update (“ASU”) 2015-03 which requires that debt issuance costs related to a recognized debt liability to be presented on the balance sheet as a direct deduction from the carrying amount of the debt liability rather than as an asset. Adoption of ASU 2015-03 requires the changes to be applied retrospectively.

RATIO OF EARNINGS TO FIXED CHARGES

The following table contains our ratio of earnings to fixed charges for the periods indicated, computed as set forth below. You should read these ratios of earnings to fixed charges in connection with our consolidated financial statements, including the notes to those statements, included in this prospectus.

	For the Three Months Ended March 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013	For the Year Ended December 31, 2012
Earnings to Fixed Charges(1)	4.51	3.61	3.52	2.58	2.42	2.16

For purposes of computing the ratios of earnings to fixed charges, earnings represent net increase in net assets resulting from operations plus (or minus) income tax expense (benefit) including excise tax expense plus fixed charges. Fixed charges include interest and credit facility fees expense and amortization of debt issuance costs.

(1)

Earnings include net realized and unrealized gains or losses. Net realized and unrealized gains or losses can vary substantially from period to period.

TABLE OF CONTENTS

RISK FACTORS

Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus, and any prospectus supplement accompanying this prospectus, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face, but they are the principal risks associated with an investment in us. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment. The risk factors described below, together with those set forth in any prospectus supplement accompanying this prospectus, are the principal risk factors associated with an investment in our securities, as well as those factors generally associated with an investment company with investment objectives, investment policies, capital structure or trading markets similar to ours.

Risks Related to Our Business and Structure

Global economic, political and market conditions may adversely affect our business, results of operations and financial condition, including our revenue growth and profitability.

The current worldwide financial market situation, as well as various social and political tensions in the U.S. and around the world, may contribute to increased market volatility, may have long-term effects on the U.S. and worldwide financial markets, and may cause economic uncertainties or deterioration in the U.S. and worldwide. Since 2010, several European Union (“EU”) countries, including Greece, Ireland, Italy, Spain, and Portugal, have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the Euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. In June 2016, the United Kingdom (“U.K.”) held a referendum in which voters approved an exit from the EU (“Brexit”), and, subsequently, on March 29, 2017, the U.K. government began the formal process of leaving the EU. Brexit created political and economic uncertainty and instability in the global markets (including currency and credit markets), and especially in the U.K. and the EU, and this uncertainty and instability may last indefinitely. In addition, the fiscal policy of foreign nations, such as Russia and China, may have a severe impact on the worldwide and U.S. financial markets. We cannot predict the effects of these or similar events in the future on the U.S. economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

As a result of the 2016 U.S. election, the Republican Party currently controls both the executive and legislative branches of government, which increases the likelihood that legislation may be adopted that could significantly affect the regulation of U.S. financial markets. Areas subject to potential change, amendment or repeal include the Dodd-Frank Wall Street Reform and Consumer Protection Act and the authority of the Federal Reserve and the Financial Stability Oversight Council. The U.S. may also potentially withdraw from or renegotiate various trade agreements and take other actions that would change current trade policies of the U.S. We cannot predict which, if any, of these actions will be taken or, if taken, their effect on the financial stability of the U.S. Such actions could have a significant adverse effect on our business, financial condition and results of operations. We cannot predict the effects of these or similar events in the future on the U.S. economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

We are dependent upon the OFS senior professionals for our future success and upon their access to the investment professionals and partners of OFS and its affiliates.

We do not have any internal management capacity or employees. We will depend on the diligence, skill and network of business contacts of the OFS senior professionals to achieve our investment objective. Our future success will depend, to a significant extent, on the continued service and coordination of the OFS senior management team, particularly Bilal Rashid, Senior Managing Director and President of OFSC,

TABLE OF CONTENTS

Jeffrey Cerny, Senior Managing Director and Treasurer of OFSC and Mark Hauser, Senior Managing Director of OFSC. Each of these individuals is an employee at will of OFSC and, with the exception of Mr. Hauser, is not subject to an employment contract. In addition, we rely on the services of Richard Ressler, Chairman of the executive committee of OFSAM and Chairman of OFS Advisor's Pre-Allocation Investment Committee, CLO Investment Committee and Middle-Market Investment Committee (the "Middle-Market Investment Committee", and collectively, the "Advisor Investment Committees"), pursuant to a consulting agreement with Orchard Capital Corporation. The departure of Mr. Ressler or any of the senior managers of OFSC, or of a significant number of its other investment professionals, could have a material adverse effect on our ability to achieve our investment objective.

We expect that OFS Advisor will evaluate, negotiate, structure, close and monitor our investments in accordance with the terms of the Investment Advisory Agreement. We can offer no assurance, however, that OFS senior professionals will continue to provide investment advice to us. If these individuals do not maintain their existing relationships with OFS and its affiliates and do not develop new relationships with other sources of investment opportunities, we may not be able to grow our investment portfolio or achieve our investment objective. In addition, individuals with whom the OFS senior professionals have relationships are not obligated to provide us with investment opportunities.

Therefore, we can offer no assurance that such relationships will generate investment opportunities for us.

OFS Advisor is a subsidiary of OFSAM that has no employees and depends upon access to the investment professionals and other resources of OFS and its affiliates to fulfill its obligations to us under the Investment Advisory Agreement. OFS Advisor also depends upon OFS to obtain access to deal flow generated by the professionals of OFS and its affiliates. Under a Staffing Agreement between OFSC, a subsidiary of OFSAM that employs OFS's personnel, and OFS Advisor, OFSC has agreed to provide OFS Advisor with the resources necessary to fulfill these obligations. The Staffing Agreement provides that OFSC will make available to OFS Advisor experienced investment professionals and access to the senior investment personnel of OFSC for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. We are not a party to this Staffing Agreement and cannot assure stockholders that OFSC will fulfill its obligations under the agreement. If OFSC fails to perform, we cannot assure stockholders that OFS Advisor will enforce the Staffing Agreement or that such agreement will not be terminated by either party or that we will continue to have access to the investment professionals of OFSC and its affiliates or their information and deal flow.

The investment committees that oversee our investment activities are provided by OFS Advisor under the Investment Advisory Agreement. The loss of any member of the Advisor Investment Committees or of other OFS senior professionals could limit our ability to achieve our investment objective and operate as we anticipate. This could have a material adverse effect on our financial condition and results of operation.

Our business model depends to a significant extent upon strong referral relationships with financial institutions, sponsors and investment professionals. Any inability of OFS Advisor to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We depend upon OFS Advisor to maintain relationships with financial institutions, sponsors and investment professionals, and we will continue to rely to a significant extent upon these relationships to provide us with potential investment opportunities. If OFS Advisor fails to maintain such relationships, or to develop new relationships with other sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the principals of OFS Advisor have relationships are not obligated to provide us with investment opportunities, and, therefore, we can offer no assurance that these relationships will generate investment opportunities for us in the future.

Our financial condition and results of operation will depend on our ability to manage our business effectively.

Our ability to achieve our investment objective and grow will depend on our ability to manage our business. This will depend, in turn, on the ability of the Advisor Investment Committees to identify, invest in and monitor companies that meet our investment criteria. The achievement of our investment objectives on a cost-effective basis will depend upon the execution by the Advisor Investment Committees to execute our investment process, their ability to provide competent, attentive and efficient services to us and, to a

TABLE OF CONTENTS

lesser extent, our access to financing on acceptable terms. OFS Advisor will have substantial responsibilities under the Investment Advisory Agreement. The OFS Advisor's senior professionals and other personnel of OFS Advisor's affiliates, including OFSC, may be called upon to provide managerial assistance to our portfolio companies. These activities may distract them or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our business, financial condition and results of operations. We have potential conflicts of interest related to obligations that OFS Advisor or its affiliates may have to other clients.

OFS Advisor and its affiliates manage other assets, including those of other BDCs and CLO funds, and may manage other entities in the future, and these other funds and entities may have similar or overlapping investment strategies. Our executive officers, directors and members of the Advisor Investment Committees serve as officers, directors or principals of entities that operate in the same or a related line of business as we do, or of investment funds or other investment vehicles managed by OFS Advisor or its affiliates. Accordingly, they may have obligations to investors in those entities, the fulfillment of which might not be in our or our stockholders' best interests or may require them to devote time to services for other entities, which could interfere with the time available to provide services to us. For example, OFS Advisor currently serves as the investment adviser to Hancock Park Corporate Income, Inc. ("HPCI"), a non-traded BDC, that invests in senior secured loans of middle-market companies in the United States, similar to those we target for investment, including first-lien, second-lien and unitranche loans as well as subordinated loans and, to a lesser extent, warrants and other equity securities. Therefore, many investment opportunities will satisfy the investment criteria for both HPCI and us. HPCI operates as a distinct and separate entity and any investment in our common stock will not be an investment in HPCI. In addition, our executive officers and certain of our independent directors serve in substantially similar capacities for HPCI. Similarly, OFS Advisor and/or its affiliates may have other clients with, similar, different or competing investment objectives. In serving in these multiple capacities, our executive officers and directors, OFS Advisor and/or its affiliates, and members of the Advisor Investment Committee may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the best interests of us or our stockholders.

OFS Advisor will seek to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy. Under this allocation policy, if OFS Advisor is actively seeking investments for two or more investment vehicles with similar or overlapping investment strategies, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities under law or in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

- investment guidelines and/or restrictions, if any, under law or set forth in the applicable organizational, offering or similar documents for the investment vehicles;
- risk and return profile of the investment vehicles;
- suitability/priority of a particular investment for the investment vehicles;
- if applicable, the targeted position size of the investment for the investment vehicles;
- level of available cash for investment with respect to the investment vehicles;
- total amount of funds committed to the investment vehicles; and

- the age of the investment vehicles and the remaining term of their respective investment periods, if any.

Application of one or more of the factors listed above may result in the allocation of an investment opportunity to HPCI or any other investment vehicle advised by OFS Advisor over us.

OFS Advisor and OFSAM have both subjective and objective procedures and policies in place designed to manage the potential conflicts of interest between OFS Advisor's fiduciary obligations to us and its fiduciary obligations to other clients. For example, such policies and procedures are designed to

18

TABLE OF CONTENTS

ensure that investment opportunities are allocated in a fair and equitable manner among us and other clients of OFS Advisor. An investment opportunity that is suitable for clients of OFS Advisor may not be capable of being shared among some or all of such clients due to the limited scale of the opportunity or other factors, including regulatory restrictions imposed by the 1940 Act.

There can be no assurance that we will be able to participate in all investment opportunities that are suitable to us. Our independent directors may face conflicts of interest related to their obligations to the affiliated BDC for which they also serve as independent directors.

The independent directors of our board of directors also comprise the independent directors of the board of directors of HPCI, an affiliated BDC that is also managed by OFS Advisor. In their capacities as directors for a BDC board, the independent directors have a duty to make decisions on behalf of that BDC that are in the best interests of that BDC and its stockholders. Accordingly, our independent directors may face conflicts of interest when making a decision on behalf of one BDC that may not be in the best interest of the other BDC. For example, the SEC has granted exemptive relief to us, OFS Advisor, HPCI, and certain other of our affiliates to co-invest in certain transactions that would otherwise be prohibited by the 1940 Act. In accordance with that relief, the independent directors must make certain findings on behalf of each BDC with respect to initial co-investment transactions, including that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair to the BDC and its stockholders and do not involve overreaching in respect of the BDC or its stockholders on the part of any of the other participants in the proposed transaction. Under such circumstances, the independent directors may face conflicts of interest when making these determinations on behalf of us and HPCI.

Members of the Advisor Investment Committees, OFS Advisor or its affiliates may, from time to time, possess material non-public information, limiting our investment discretion.

OFS senior professionals and members of the Advisor Investment Committees may serve as directors of, or in a similar capacity with, companies in which we invest, the securities of which are purchased or sold on our behalf. In the event that material nonpublic information is obtained with respect to such companies, or we become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have an adverse effect on us and our stockholders.

To the extent PIK interest and PIK dividends constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash representing such income.

Our investments may include contractual PIK interest or PIK dividends, which represents contractual interest or dividends added to a loan balance or equity security and due at the end of such loan's or equity security's term. To the extent PIK interest and PIK dividends constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash.

Such risks include:

- The higher interest or dividend rates of PIK instruments reflect the payment deferral and increased risk associated with these instruments, and PIK instruments often represent a significantly higher risk than non-PIK instruments.

- Even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is supposed to occur at the maturity of the obligation.

- PIK instruments may have unreliable valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of any associated collateral. PIK income may also create uncertainty about the source of our cash distributions.

TABLE OF CONTENTS

•
For accounting purposes, any cash distributions to stockholders representing PIK income are not treated as coming from paid-in capital, even though the cash to pay them comes from the offering proceeds. As a result, despite the fact that a distribution representing PIK income could be paid out of amounts invested by our stockholders, the 1940 Act does not require that stockholders be given notice of this fact by reporting it as a return of capital.

•
PIK interest or dividends have the effect of generating investment income at a compounding rate, thereby further increasing the incentive fees payable to OFS Advisor. Similarly, all things being equal, the deferral associated with PIK interest or dividends also decreases the investment principal-to-value ratio at a compounding rate.

We may have additional conflicts related to other arrangements with OFS Advisor or its affiliates.

We have entered into a license agreement with OFSAM under which OFSAM has granted us a non-exclusive, royalty-free license to use the name “OFS.” See “Management and Other Agreements — License Agreement.” In addition, we rent office space from a subsidiary of OFSAM and pay to that subsidiary our allocable portion of overhead and other expenses incurred in performing its obligations under the Administration Agreement, such as rent and our allocable portion of the cost of our officers, including our chief executive officer, chief financial officer, chief compliance officer and chief accounting officer. This will create conflicts of interest that our board of directors must monitor.

The Investment Advisory Agreement with the OFS Advisor and the Administration Agreement with OFS Services were not negotiated on an arm’s length basis and may not be as favorable to us as if they had been negotiated with an unaffiliated third party.

The Investment Advisory Agreement and the Administration Agreement were negotiated between related parties. Consequently, their terms, including fees payable to OFS Advisor, may not be as favorable to us as if they had been negotiated with an unaffiliated third party. In addition, we could choose not to enforce, or to enforce less vigorously, our rights and remedies under these agreements because of our desire to maintain our ongoing relationship with OFS Advisor, OFS Services and their respective affiliates. Any such decision, however, would breach our fiduciary obligations to our stockholders.

Our ability to enter into transactions with our affiliates will be restricted, which may limit the scope of investments available to us.

BDCs generally are prohibited under the 1940 Act from knowingly participating in certain transactions with their affiliates without the prior approval of their independent directors and, in some cases, of the SEC. Those transactions include purchases and sales, and so-called “joint” transactions, in which a BDC and one or more of its affiliates engage in certain types of profit-making activities. Any person that owns, directly or indirectly, five percent or more of a BDC’s outstanding voting securities will be considered an affiliate of the BDC for purposes of the 1940 Act, and a BDC generally is prohibited from engaging in purchases or sales of assets or joint transactions with such affiliates, absent the prior approval of the BDC’s independent directors. Additionally, without the approval of the SEC, a BDC is prohibited from engaging in purchases or sales of assets or joint transactions with the BDC’s officers, directors, and employees, and advisor (and its affiliates).

BDCs may, however, invest alongside certain related parties or their respective other clients in certain circumstances where doing so is consistent with current law and SEC staff interpretations. For example, a BDC may invest alongside such accounts consistent with guidance promulgated by the SEC staff permitting us and such other accounts to purchase interests in a single class of privately placed securities so long as certain conditions are met, including that the BDC’s advisor, acting on the BDC’s behalf and on behalf of other clients, negotiates no term other than price. Co-investment with such other accounts is not permitted or appropriate under this guidance when there is an opportunity to invest in different securities of the same issuer or where the different investments could be expected to result in a conflict between the BDC’s interests and those of other accounts. Moreover, except in certain circumstances, this guidance does not permit a BDC to invest in any issuer in which the advisor or other affiliates has previously invested.

TABLE OF CONTENTS

On October 12, 2016, we received exemptive relief from the SEC to permit us to co-invest in portfolio companies with certain other funds managed by OFS Advisor (“Affiliated Funds”) provided we comply with the Order. Pursuant to the Order, we are generally permitted to co-invest with Affiliated Funds if a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

When we invest alongside OFSAM and its affiliates or their respective other clients, OFS Advisor will, to the extent consistent with applicable law, regulatory guidance, or the Order, allocate investment opportunities in accordance with its allocation policy. Under this allocation policy, if two or more investment vehicles with similar or overlapping investment strategies are in their investment periods, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

- investment guidelines and/or restrictions, if any, set forth in the applicable organizational, offering or similar documents for the investment vehicles;
- risk and return profile of the investment vehicles;
- suitability/priority of a particular investment for the investment vehicles;
- if applicable, the targeted position size of the investment for the investment vehicles
- level of available cash for investment with respect to the investment vehicles;
- total amount of funds committed to the investment vehicles; and
- the age of the investment vehicles and the remaining term of their respective investment periods, if any.

In situations where co-investment with other accounts is not permitted or appropriate, OFS Advisor will need to decide which account will proceed with the investment. The decision by OFS Advisor to allocate an opportunity to another entity could cause us to forego an investment opportunity that we otherwise would have made. These restrictions, and similar restrictions that limit our ability to transact business with our officers or directors or their affiliates, may limit the scope of investment opportunities that would otherwise be available to us.

SBA regulations limit the outstanding dollar amount of SBA guaranteed debenture funding that may be received by an SBIC or group of SBICs under common control.

SBA regulations currently limit the amount that an SBIC may borrow to up to a maximum of \$150 million when it has at least \$75 million in regulatory capital, receives a leverage commitment from the SBA and has been through an examination by the SBA subsequent to licensing. For two or more SBICs under common control, the maximum amount of outstanding SBA debentures cannot exceed \$350 million.

We cannot presently predict whether or not we will borrow the maximum permitted amount; if we reach the maximum dollar amount of SBA guaranteed debentures permitted, and thereafter require additional capital, our cost of

capital may increase, and there is no assurance that we will be able to obtain additional financing on acceptable terms. Moreover, SBIC I LP's status as an SBIC does not automatically assure that it will receive SBA guaranteed debenture funding. Receipt of SBA leverage funding is dependent upon whether SBIC I LP is and continues to be in compliance with SBA regulations and policies and whether funding is available. The amount of SBA leverage funding available to SBICs is dependent upon annual Congressional authorizations and in the future may be subject to annual Congressional appropriations. There can be no assurance that there will be sufficient debenture funding available at the times desired by SBIC I LP. As of

21

TABLE OF CONTENTS

March 31, 2017, we had fully funded our \$75.0 million commitment to SBIC I LP. As of March 31, 2017, SBIC I LP had leverage commitments of approximately \$149.9 million from the SBA, and \$149.9 million of outstanding SBA-guaranteed debentures, leaving no incremental borrowing capacity under present SBA regulations. In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

SBIC I LP is subject to SBA regulations.

Our investment strategy includes SBIC I LP, which is regulated by the SBA. On December 4, 2013, we acquired the remaining limited and general partnership interests of SBIC I LP that we did not already own, which resulted in SBIC I LP becoming our wholly-owned subsidiary.

The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of leverage commitments by the SBA and other customary procedures. Prior to becoming our wholly-owned subsidiary, SBIC I LP had received \$67.3 million in SBA leverage commitments. In July 2014, we funded the remaining \$13.6 million of our \$75 million commitment to SBIC I LP. As of March 31, 2017, SBIC I LP had leverage commitments of approximately \$149.9 million from the SBA, and \$149.9 million of outstanding SBA-guaranteed debentures, leaving no incremental borrowing capacity under present SBA regulations.

Further, the SBA regulations require that a licensed SBIC be periodically examined and audited by the SBA to determine its compliance with the relevant SBA regulations. If SBIC I LP fails to comply with applicable SBA regulations, the SBA could, depending on the severity of the violation, limit or prohibit its use of debentures, declare outstanding debentures immediately due and payable, and/or limit its ability to make new investments. The SBA, as a creditor, will have a superior claim to SBIC I LP's assets over SBIC I LP's limited partners and our stockholders in the event SBIC I LP is liquidated or the SBA exercises its remedies under the SBA debentures issued by SBIC I LP in the event of a default. In addition, the SBA can revoke or suspend a license for willful or repeated violation of, or willful or repeated failure to observe, any provision of the Small Business Investment Act of 1958 or any rule or regulation promulgated thereunder. These actions by the SBA would, in turn, negatively affect us because of our ownership interest in SBIC I LP.

The SBA places certain limitations on the financing terms of investments by SBICs in portfolio companies and prohibits an SBIC from providing funds to small businesses for certain purposes, such as relending, real estate or investing in companies outside of the United States, and providing funds to businesses engaged in a few prohibited industries and to certain "passive" (i.e., non-operating) companies. In addition, without prior SBA approval, an SBIC may not invest an amount equal to more than approximately 30% of the SBIC's regulatory capital in any one company and its affiliates. Compliance with SBIC requirements may cause SBIC I LP to forego attractive investment opportunities that are not permitted under SBA regulations.

SBIC I LP is subject to ongoing regulation and oversight by the SBA, including requirements with respect to maintaining certain minimum financial ratios and other covenants. In addition, SBIC I LP may also be limited in its ability to make distributions to us if it does not have sufficient accumulated net profit, in accordance with SBA regulations. These requirements may make it more difficult for us to achieve our investment objective.

We finance our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.

The use of leverage magnifies the potential for gain or loss on amounts invested. The use of leverage is generally considered a speculative investment technique and increases the risks associated with investing in our securities. We may pledge up to 100% of our assets and may grant a security interest in all of our assets, other than assets held in SBIC I LP and our ownership interest in SBIC I LP and SBIC I GP, under the terms of any debt instruments we may enter into with lenders. In addition, under the terms of any credit

TABLE OF CONTENTS

facility or other debt instrument we enter into, we are likely to be required by its terms to use the net proceeds of any investments that we sell to repay a portion of the amount borrowed under such facility or instrument before applying such net proceeds to any other uses. If the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged, thereby magnifying losses or eliminating our equity stake in a leveraged investment. Similarly, any decrease in our revenue or income will cause our net income to decline more sharply than it would have had we not borrowed. Such a decline would also negatively affect our ability to make dividend payments on our common stock or preferred stock. Our ability to service our debt will depend largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures. Moreover, because the management fee payable to OFS Advisor is payable based on our total assets (other than cash and cash equivalents and goodwill and intangible assets related to the SBIC Acquisitions but including assets purchased with borrowed amounts and including assets owned by any consolidated entity), OFS Advisor will have a financial incentive to incur leverage which may not be consistent with our stockholders' interests. In addition, our common stockholders will bear the burden of any increase in our expenses as a result of our use of leverage, including interest expenses and any increase in the management fee payable to OFS Advisor.

As a BDC, generally we are not permitted to incur indebtedness unless immediately after such borrowing we have an asset coverage ratio for total borrowings of at least 200% (i.e., the amount of debt may not exceed 50% of the value of our assets). In addition, we may not be permitted to declare any cash dividend or other distribution on our outstanding common shares, or purchase any such shares, unless, at the time of such declaration or purchase, we have asset coverage of at least 200% after deducting the amount of such dividend, distribution, or purchase price. If this ratio declines below 200%, we may not be able to incur additional debt and may need to sell a portion of our investments to repay some debt when it is disadvantageous to do so, and we may not be able to make distributions. As of December 31, 2016, our asset coverage ratio was greater than 1,000%, excluding the debt held by SBIC I LP.

The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed Return on Our Portfolio (Net of Expenses)(1)				
	(10)%	(5)%	—%	5%	10%
Corresponding return to common stockholder(2)	(22)%	(13)%	(4)%	5%	14%

(1)

The assumed return is required by SEC regulation, and is not a prediction of and does not represent our projected or actual performance.

(2)

Assumes \$258.3 million in investments at fair value, \$157.9 million in debt outstanding, \$145.4 million in net assets, and average cost of funds of 3.6%. Assumptions are based on our financial condition and our average cost of funds at March 31, 2017.

Based on our outstanding indebtedness of \$157.9 million as of March 31, 2017 and the average cost of funds of 3.6% as of that date, our investment portfolio must experience an annual return of at least 2.2% to cover interest payments on the outstanding debt.

This example is for illustrative purposes only, and actual interest rates on our borrowings are likely to fluctuate. See "Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources — Borrowings" for additional information.

Changes in interest rates will affect our cost of capital and net investment income.

To the extent we borrow money or issue preferred stock to make investments, our net investment income will depend, in part, upon the difference between the rate at which we borrow funds or pay dividends on preferred stock and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest

rates will not have a material adverse effect on our net investment income in the event we use debt to finance our investments. In periods of rising interest rates,

23

TABLE OF CONTENTS

our cost of funds would increase, which could reduce our net investment income. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

A rise in the general level of interest rates typically leads to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates may result in an increase of the amount of incentive fees payable to OFS Advisor.

We may enter into reverse repurchase agreements, which are another form of leverage.

We may enter into reverse repurchase agreements as part of our management of our temporary investment portfolio. Under a reverse repurchase agreement, we will effectively pledge our assets as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the fair value of the pledged collateral. At the maturity of the reverse repurchase agreement, we will be required to repay the loan and correspondingly receive back our collateral. While used as collateral, the assets continue to pay principal and interest which are for the benefit of us.

Our use of reverse repurchase agreements, if any, involves many of the same risks involved in our use of leverage, as the proceeds from reverse repurchase agreements generally will be invested in additional securities. There is a risk that the market value of the securities acquired in the reverse repurchase agreement may decline below the price of the securities that we have sold but remain obligated to purchase. In addition, there is a risk that the market value of the securities retained by us may decline. If a buyer of securities under a reverse repurchase agreement were to file for bankruptcy or experience insolvency, we may be adversely affected. Also, in entering into reverse repurchase agreements, we would bear the risk of loss to the extent that the proceeds of such agreements at settlement are less than the fair value of the underlying securities being pledged. In addition, due to the interest costs associated with reverse repurchase agreements transactions, our net asset value would decline, and, in some cases, we may be worse off than if we had not used such instruments.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. Payment of such dividends and repayment of the liquidation preference of such preferred stock must take preference over any dividends or other payments to our common stockholders, and preferred stockholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

A number of entities compete with us to make the types of investments that we plan to make. We will compete with public and private funds, other BDCs, commercial and investment banks, commercial finance companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some of our competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or the source of income, asset diversification and distribution requirements we must satisfy to maintain our RIC tax treatment. These characteristics could allow our competitors to consider a wider variety of instruments, establish more relationships and offer better pricing and more flexible structuring than we are able to. The competitive pressures we face may have a material adverse effect on our business, financial condition and results of operations. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

TABLE OF CONTENTS

With respect to the investments we make, we will not seek to compete based primarily on the interest rates we will offer, and we believe that some of our competitors may make loans with interest rates that will be lower than the rates we offer. In the secondary market for acquiring existing loans, we expect to compete generally on the basis of pricing terms. With respect to all investments, we may lose some investment opportunities if we do not match our competitors' pricing, terms and structure. However, if we match our competitors' pricing, terms and structure, we may experience decreased net interest income, lower yields and increased risk of credit loss. We may also compete for investment opportunities with OFSAM and its other affiliates or accounts managed by OFSAM or one of its other affiliates. Although OFS Advisor will allocate opportunities in accordance with its policies and procedures, allocations to such other accounts will reduce the amount and frequency of opportunities available to us and may not be in the best interests of us and our stockholders. Moreover, the performance of investments will not be known at the time of allocation.

We may suffer credit losses.

Investment in middle-market companies is highly speculative and involves a high degree of risk of credit loss, and therefore our securities may not be suitable for someone with a low tolerance for risk. These risks are likely to increase during volatile economic periods, such as the U.S. and many other economies have recently been experiencing.

We will be subject to corporate-level federal income tax if we are unable to maintain our qualification as a RIC. We have elected to be treated as a RIC under Subchapter M of the Code, but no assurance can be given that we will be able to maintain RIC status. As a RIC, we are not required to pay corporate-level federal income taxes on our income and capital gains distributed (or deemed distributed) to our stockholders. To continue to qualify for tax treatment as a RIC under the Code and to be relieved of federal taxes on income and gains distributed to our stockholders, we must meet certain source-of-income, asset diversification and distribution requirements. The distribution requirement for a RIC is satisfied if we distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis. We will be subject, to the extent we use debt financing or preferred stock, to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements or preferred stock that could, under certain circumstances, restrict us from making distributions necessary to qualify for tax treatment as a RIC. If we are unable to obtain cash from other sources, we may fail to maintain our qualification for the tax benefits available to RICs and, thus, may be subject to corporate-level federal income tax. To maintain our qualification as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments are in private or thinly traded public companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to continue to qualify for tax treatment as a RIC for any reason and become subject to corporate-level federal income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distributions to stockholders and the amount of our distributions and the amount of funds available for new investments. Such a failure would have a material adverse effect on us and our stockholders. See "Material Federal Income Tax Considerations — Taxation as a Regulated Investment Company."

Our subsidiaries and portfolio companies may be unable to make distributions to us that will enable us to meet RIC requirements, which could result in the imposition of an entity-level tax.

In order for us to maintain our tax treatment as a RIC and to minimize corporate-level taxes, we are required to distribute on an annual basis substantially all of our taxable income, which includes income from our subsidiaries and portfolio companies. As a substantial portion of our investments are made through SBIC I LP, we are significantly dependent on that entity for cash distributions to enable us to meet the RIC distribution requirements. SBIC I LP may be limited by the Small Business Investment Act of 1958 and SBA regulations governing SBICs from making certain distributions to us that may be necessary to enable us to continue to qualify as a RIC. We may have to request a waiver of the SBA's restrictions for

TABLE OF CONTENTS

SBIC I LP to make certain distributions to maintain our tax treatment as a RIC and we cannot assure stockholders that the SBA will grant such waiver. If our subsidiaries and portfolio companies are unable to make distributions to us, this may result in loss of RIC tax treatment and a consequent imposition of a corporate-level federal income tax on us. We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as the accretion of OID. This may arise if we purchase assets at a discount, receive warrants in connection with the making of a loan or in other circumstances, or through contracted PIK interest or dividends (meaning interest or dividends paid in the form of additional principal amount of the loan or equity security instead of in cash), which represents contractual interest or dividends added to the loan balance or equity security and due at the end of the investment term. Such OID, which could be significant relative to our overall investment activities, or increases in loan or equity investment balances as a result of contracted PIK arrangements, will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash.

Since in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to maintain the tax benefits available to RICs. In such a case, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations and sourcings to meet these distribution requirements. If we sell built-in-gain assets, we may be required to recognize taxable income in respect of the built-in-gain on such assets. In such a case, we would have to distribute all of our taxable gain (including the built-in-gain) in respect of such sale to avoid the imposition of entity-level tax on such gain. If we are not able to obtain such cash from other sources, we may fail to maintain the tax benefits available to RICs and thus be subject to corporate-level income tax. See “Material Federal Income Tax Considerations — Taxation as a Regulated Investment Company.”

We may in the future choose to pay dividends in our own stock, in which case stockholders may be required to pay tax in excess of the cash they receive.

We distribute taxable dividends that are payable in cash or shares of our common stock at the election of each stockholder. Under certain applicable provisions of the Code and the Treasury regulations, distributions payable in cash or in shares of stock at the election of stockholders are treated as taxable dividends. The Internal Revenue Service has issued private rulings indicating that this rule will apply even where the total amount of cash that may be distributed is limited to no more than 20% of the total distribution. Under these rulings, if too many stockholders elect to receive their distributions in cash, each such stockholder would receive a pro rata share of the total cash to be distributed and would receive the remainder of their distribution in shares of stock. If we decide to make any distributions consistent with these rulings that are payable in part in our stock, taxable stockholders receiving such dividends will be required to include the full amount of the dividend (whether received in cash, our stock, or a combination thereof) as ordinary income (or as long-term capital gain to the extent such distribution is properly reported as a capital gain dividend) to the extent of our current and accumulated earnings and profits for United States federal income tax purposes. As a result, a U.S. stockholder may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. stockholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our stock.

TABLE OF CONTENTS

Because we expect to distribute substantially all of our net investment income and net realized capital gains to our stockholders, we may need additional capital to finance our growth and such capital may not be available on favorable terms or at all.

We have elected to be taxed for federal income tax purposes as a RIC under Subchapter M of the Code. If we meet certain requirements, including source of income, asset diversification and distribution requirements, and if we continue to qualify as a BDC, we will continue to qualify for tax treatment as RIC under the Code and will not have to pay corporate-level taxes on income we distribute to our stockholders as dividends, allowing us to substantially reduce or eliminate our corporate-level tax liability. As a BDC, we are generally required to meet a coverage ratio of total assets to total senior securities, which includes all of our borrowings and any preferred stock we may issue in the future, of at least 200% at the time we issue any debt or preferred stock. This requirement limits the amount that we may borrow. Because we will continue to need capital to grow our investment portfolio, this limitation may prevent us from incurring debt or preferred stock and require us to raise additional equity at a time when it may be disadvantageous to do so. We cannot assure investors that debt and equity financing will be available to us on favorable terms, or at all, and debt financings may be restricted by the terms of any of our outstanding borrowings. In addition, as a BDC, we are generally not permitted to issue common stock priced below net asset value without stockholder approval. If additional funds are not available to us, we could be forced to curtail or cease new lending and investment activities, and our net asset value could decline.

The PWB Credit Facility contains various covenants and restrictions which, if not complied with, could accelerate our repayment obligations under the credit facility or limit its use, thereby materially and adversely affecting our liquidity, financial condition, results of operations and ability to pay distributions.

The PWB Credit Facility provides us with a senior secured revolving line of credit of up to \$25.0 million, with maximum availability equal to 50% of the aggregate outstanding principal amount of eligible loans included in the borrowing base and otherwise specified in the credit agreement. The PWB Credit Facility is guaranteed by our subsidiary OFS Capital WM, LLC (“OFS Capital WM”) and secured by all of our current and future assets excluding assets held by SBIC I LP and our SBIC I LP and SBIC I GP partnership interests. The PWB Credit Facility contains customary terms and conditions, including, without limitation, affirmative and negative covenants such as information reporting requirements, a minimum tangible net asset value, a minimum quarterly net investment income after incentive fees, and a statutory asset coverage test. The PWB Credit Facility also contains customary events of default, including, without limitation, nonpayment, misrepresentation of representations and warranties in any material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change in investment advisor, and the occurrence of a material adverse change in our financial condition. The PWB Credit Facility permits us to fund additional investments as long as we are within the conditions set out in the credit agreement. Our continued compliance with these covenants depends on many factors, some of which are beyond our control, and there are no assurances that we will continue to comply with these covenants. Our failure to satisfy these covenants could result in foreclosure by our lenders, which would accelerate our repayment obligations under the facility and thereby have a material adverse effect on our business, liquidity, financial condition, results of operations and ability to pay distributions to our stockholders. We had \$8.0 million outstanding under the PWB Credit Facility as of March 31, 2017. Availability under the PWB Credit Facility as of March 31, 2017 was \$16.3 million based on the stated advance rate of 50% under the borrowing base.

Adverse developments in the credit markets may impair our ability to secure debt financing.

During the economic downturn in the United States that began in mid-2007, many commercial banks and other financial institutions stopped lending or significantly curtailed their lending activity. In addition, in an effort to stem losses and reduce their exposure to segments of the economy deemed to be high risk, some financial institutions limited routine refinancing and loan modification transactions and even reviewed the terms of existing facilities to identify bases for accelerating the maturity of existing lending facilities. As a result, it may be difficult for us to obtain desired financing to finance the growth of our investments on acceptable economic terms, or at all.

TABLE OF CONTENTS

If we are unable to consummate credit facilities on commercially reasonable terms, our liquidity may be reduced significantly. If we are unable to repay amounts outstanding under any facility we may enter into and are declared in default or are unable to renew or refinance any such facility, it would limit our ability to initiate significant originations or to operate our business in the normal course. These situations may arise due to circumstances that we may be unable to control, such as inaccessibility of the credit markets, a severe decline in the value of the U.S. dollar, a further economic downturn or an operational problem that affects third parties or us, and could materially damage our business. Moreover, we are unable to predict when economic and market conditions may become more favorable. Even if such conditions improve broadly and significantly over the long term, adverse conditions in particular sectors of the financial markets could adversely impact our business.

Terrorist attacks, acts of war or natural disasters may impact the businesses in which we invest and harm our business, operating results and financial condition.

Terrorist acts, acts of war or natural disasters may disrupt our operations, as well as the operations of the businesses in which we invest. Such acts have created, and continue to create, economic and political uncertainties and have contributed to global economic instability. Future terrorist activities, military or security operations, or natural disasters could further weaken the domestic/global economies and create additional uncertainties, which may negatively impact the businesses in which we invest directly or indirectly and, in turn, could have a material adverse impact on our business, operating results and financial condition. Losses from terrorist attacks and natural disasters are generally uninsurable.

The failure in cybersecurity systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyberattack, a natural catastrophe, an industrial accident, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyberattacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss.

Third parties with whom we do business may also be sources of cybersecurity or other technological risks. We outsource certain functions and these relationships allow for the storage and processing of our information, as well as customer, counterparty, employee and borrower information. While we engage in actions to reduce our exposure resulting from outsourcing, ongoing threats may result in unauthorized access, loss, exposure or destruction of data, or other cybersecurity incidents, with increased costs and other consequences, including those described above.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments.

Many of our portfolio investments take the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We value these securities at fair value as determined in good faith by our board of directors, including to reflect significant events affecting the value of our securities. All of our investments (other than cash and cash equivalents) are classified as Level 3 under Accounting Standards Codification Topic 820, Fair Value Measurement and Disclosures (ASC Topic 820). This means that our portfolio valuations are based on

TABLE OF CONTENTS

unobservable inputs and our own assumptions about how market participants would price the asset or liability in question. Inputs into the determination of fair value of our portfolio investments require significant management judgment or estimation. Even if observable market data are available, such information may be the result of consensus pricing information or broker quotes, which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimers materially reduces the reliability of such information. We presently retain the services of two independent service providers to review the valuation of these securities at least annually.

The types of factors that the board of directors takes into account in determining the fair value of our investments generally include, as appropriate, comparison to third-party yield benchmarks and comparison to publicly traded securities including such factors as yield, maturity and measures of credit quality, the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and cash flow, the markets in which the portfolio company does business and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. Our net asset value could be adversely affected if our determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

We adjust quarterly the valuation of our portfolio to reflect our board of directors' determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our statement of income as net change in unrealized appreciation or depreciation.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, distributions from our subsidiaries and portfolio companies, the degree to which we encounter competition in our markets and general economic conditions. In light of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Changes in the laws or regulations governing our business, or changes in the interpretations thereof, and any failure by us to comply with these laws or regulations, could have a material adverse effect on our, and our portfolio companies', business, results of operations or financial condition.

We and our portfolio companies are subject to regulation by laws at the U.S. federal, state and local levels, including those that govern BDCs, SBICs, RICs, or non-depository commercial lenders. These laws and regulations, including applicable accounting standards, as well as their interpretation, may change from time to time, and new laws, regulations, accounting standards and interpretations may also come into effect. Any such new or changed laws or regulations could have a material adverse effect on our business.

We are also subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. If we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and may be subject to civil fines and criminal penalties.

In addition, changes to the laws and regulations governing our operations related to permitted investments may cause us to alter our investment strategy, including making investments in entities such as OFS Capital WM and SBIC I LP, in order to avail ourselves of new or different opportunities. Such changes could result in material differences to the strategies and plans set forth in this prospectus and our accounting practices described in this prospectus, and may shift our investment focus from the areas of

TABLE OF CONTENTS

expertise of OFS Advisor to other types of investments in which OFS Advisor may have little or no expertise or experience. Any such changes, if they occur, could have a material adverse effect on our results of operations and the value of a stockholder's investment.

Over the last several years, there has been an increase in regulatory attention to the extension of credit outside of the traditional banking sector, raising the possibility that some portion of the non-bank financial sector will be subject to new or different regulation. While it cannot be known at this time whether these regulations will be implemented or what form they will take, increased regulation of non-bank credit extension could negatively impact our operations, cash flows or financial condition, impose additional costs on us, intensify the regulatory supervision of us or otherwise adversely affect our business.

The effect of global climate change may impact the operations of our portfolio companies.

There may be evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions. In December 2015, the United Nations, of which the U.S. is a member, adopted a climate accord (the "Paris Agreement") with the long-term goal of limiting global warming and the short-term goal of significantly reducing greenhouse gas emissions. The U.S. subsequently ratified the Paris Agreement, and it entered into force on November 4, 2016. As a result, some of our portfolio companies may become subject to new or strengthened regulations or legislation which could increase their operating costs and/or decrease their revenues.

Proposed legislation may allow us to incur additional leverage.

In prior Congresses, legislation was introduced in the U.S. House of Representatives that was intended to revise certain regulations applicable to BDCs. The legislation provided for (i) increasing the amount of funds BDCs may borrow by reducing asset to debt limitations from 2:1 to 3:2, (ii) permitting BDCs to file registration statements with the U.S. Securities and Exchange Commission that incorporate information from already-filed reports by reference, (iii) utilizing other streamlined registration processes afforded to operating companies, and (iv) allowing BDCs to own investment advisor subsidiaries. There are no assurances as to when the legislation will be introduced or enacted by current Congress, if at all, or, if enacted, what final form the legislation would take. To the extent this or similar legislation was enacted, it might permit us to incur additional leveraging which would subject us to additional risks.

Loss of status as a RIC would reduce our net asset value and distributable income.

We have qualified as a RIC under the Code. As a RIC we do not have to pay federal income taxes on our income (including realized gains) that we distribute to our stockholders, provided that we satisfy certain distribution and other requirements. Accordingly, we are not permitted under accounting rules to establish reserves for taxes on our unrealized capital gains. If we fail to qualify for RIC status in any year, to the extent that we had unrealized gains, we would have to establish reserves for taxes, which would reduce our net asset value and the amount potentially available for distribution. In addition, if we, as a RIC, were to decide to make a deemed distribution of net realized capital gains and retain the net realized capital gains, we would have to establish appropriate reserves for taxes that we would have to pay on behalf of stockholders. It is possible that establishing reserves for taxes could have a material adverse effect on the value of our common stock. See "Material Federal Income Tax Considerations — Taxation as a Regulated Investment Company."

Our board of directors may change our investment objective, operating policies and strategies without prior notice or stockholder approval.

Our board of directors has the authority, except as otherwise provided in the 1940 Act, to modify or waive certain of our operating policies and strategies without prior notice and without stockholder

TABLE OF CONTENTS

approval. However, absent stockholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. Under Delaware law, we also cannot be dissolved without prior stockholder approval except by judicial action. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and the price value of our common stock. Nevertheless, any such changes could adversely affect our business and impair our ability to make distributions.

OFS Advisor can resign on 60 days' notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

OFS Advisor has the right, under the Investment Advisory Agreement, to resign at any time upon not less than 60 days' written notice, whether we have found a replacement or not. If OFS Advisor resigns, we may not be able to find a new investment advisor or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the value of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by the OFS Advisor and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

OFS Services can resign from its role as our Administrator under the Administration Agreement, and we may not be able to find a suitable replacement, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

OFS Services has the right to resign under the Administration Agreement, whether we have found a replacement or not. If OFS Services resigns, we may not be able to find a new administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the value of our shares may decline. In addition, the coordination of our internal management and administrative activities is likely to suffer if we are unable to identify and reach an agreement with a service provider or individuals with the expertise possessed by OFS Services. Even if we are able to retain a comparable service provider or individuals to perform such services, whether internal or external, their integration into our business and lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

We incur significant costs as a result of being a publicly traded company.

As a publicly traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act and other rules implemented by the SEC.

Efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") involve significant expenditures, and non-compliance with Section 404 of the Sarbanes-Oxley Act may adversely affect us and the market price of our securities.

Under current SEC rules, beginning with our fiscal year ended December 31, 2013, we have been required to report on our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act and related rules and regulations of the SEC. We are required to review our internal control over financial reporting on an annual basis, and evaluate and disclose changes in our internal control over financial reporting on a quarterly and annual basis.

TABLE OF CONTENTS

As a result, we expect to continue to incur additional expenses that may negatively impact our financial performance and our ability to make distributions. This process also results in a diversion of management's time and attention. In the event that we are unable to maintain compliance with Section 404 of the Sarbanes-Oxley Act and related rules, we and the market price of our securities may be adversely affected.

We have identified a material weakness in our internal control over financial reporting and our business and stock price may be adversely affected if we have not adequately addressed the weakness.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations.

As a result of our evaluation of our internal control over financial reporting for the year ended December 31, 2016, management identified a material weakness related to design and effectiveness of controls over certain key assumptions and underlying data used in our investment valuations.

The identification of this material weakness did not require a material fourth quarter 2016 adjustment or impact any of our consolidated financial statements for any prior annual or interim periods.

We believe that the audited consolidated financial statements included in this prospectus are accurate. If we cannot produce reliable financial reports, investors could lose confidence in our reported financial information, the market price of our stock could decline significantly, we may be unable to obtain additional financing to operate and expand our business, and our business and financial condition could be harmed.

Capital markets may experience periods of disruption and instability and we cannot predict when these conditions will occur. Such market conditions could materially and adversely affect debt and equity capital markets in the United States and abroad, which could have a negative impact on our business, financial condition and results of operations.

The global capital markets have experienced a period of disruption as evidenced by a lack of liquidity in the debt capital markets, write-offs in the financial services sector, the re-pricing of credit risk and the failure of certain major financial institutions. While the capital markets have improved, these conditions could deteriorate again in the future. During such market disruptions, we may have difficulty raising debt or equity capital, especially as a result of regulatory constraints.

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness and any failure to do so could have a material adverse effect on our business. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments. In addition, significant changes in the capital markets, including the disruption and volatility, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition and results of operations.

Various social and political tensions in the United States and around the world, including in the Middle East, Eastern Europe and Russia, may continue to contribute to increased market volatility, may have long-term effects on the United States and worldwide financial markets, and may cause further economic uncertainties or deterioration in the United States and worldwide. Several European Union ("EU") countries, including Greece, Ireland, Italy, Spain, and Portugal, continue to face budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is also continued concern about national-level support for the euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. The recent United States and global economic downturn, or a return to the recessionary period in the United States, could adversely impact our investments. We cannot predict the duration of the effects related to these or similar events in the future on the United States economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

The recent United States and global economic downturn, or a return to the recessionary period in the United States, could adversely impact our investments. We cannot predict the duration of the effects related to these or similar events in the future on the United States economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

Risks Related to BDCs

Regulations governing our operation as a BDC affect our ability to and the way in which we raise additional capital. As a BDC, we will need to raise additional capital, which will expose us to risks, including the typical risks associated with leverage.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as “senior securities,” up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted as a BDC to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 200% of gross assets less all liabilities and indebtedness not represented by senior securities, after each issuance of senior securities. If the value of our assets decline, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. Also, any amounts that we use to service our indebtedness would not be available for distributions to our common stockholders. If we issue senior securities, we will be exposed to typical risks associated with leverage, including an increased risk of loss.

As of March 31, 2017, we had debt outstanding in the amount of \$157.9 million. Our ability to incur additional debt and remain in compliance with the asset coverage test will be limited. We may seek an additional credit facility to finance investments or for working capital requirements. There can be no assurance that we will be able to obtain such financing on favorable terms or at all. We have received an exemptive order from the SEC to permit us to exclude the debt of SBIC I LP guaranteed by the SBA from our definition of senior securities in our statutory 200% asset coverage ratio under the 1940 Act.

If we issue preferred stock, the preferred stock would rank “senior” to common stock in our capital structure, preferred stockholders would have separate voting rights on certain matters and might have other rights, preferences or privileges more favorable than those of our common stockholders, and the issuance of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in our stockholders’ best interest. Holders of our common stock will directly or indirectly bear all of the costs associated with offering and servicing any preferred stock that we issue. In addition, any interests of preferred stockholders may not necessarily align with the interests of holders of our common stock and the rights of holders of shares of preferred stock to receive dividends would be senior to those of holders of shares of our common stock. We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value per share of our common stock if our board of directors determines that such sale is in the best interests of us and our stockholders, and if our stockholders approve any such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease, and our stockholders might experience dilution.

TABLE OF CONTENTS

Our ability to invest in public companies may be limited in certain circumstances.

To maintain our status as a BDC, we are not permitted to acquire any assets other than “qualifying assets” specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Subject to certain exceptions for follow-on investments and distressed companies, an investment in an issuer that has outstanding securities listed on a national securities exchange may be treated as a qualifying asset only if such issuer has a common equity market capitalization that is less than \$250 million at the time of such investment and meets the other specified requirements.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to continue to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than “qualifying assets” unless, at the time of and after giving effect to such acquisition, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets.

We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If a sufficient portion of our assets are not qualifying assets, we could violate the 1940 Act provisions applicable to BDCs. As a result of such violation, specific rules under the 1940 Act could prevent us, for example, from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. If we need to dispose of such investments quickly, it could be difficult to dispose of such investments on favorable terms. We may not be able to find a buyer for such investments and, even if we do find a buyer, we may have to sell the investments at a substantial loss. Any such outcomes would have a material adverse effect on our business, financial condition and results of operations.

If we do not maintain our status as a BDC, we would be subject to regulation as a registered closed-end investment company under the 1940 Act. As a registered closed-end fund, we would be subject to substantially more regulatory restrictions under the 1940 Act which would significantly decrease our operating flexibility.

Risks Related to Our Investments

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and harm our operating results.

A portfolio company’s failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company’s ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. In addition, lenders in certain cases can be subject to lender liability claims for actions taken by them when they become too involved in the borrower’s business or exercise control over a borrower. It is possible that we could become subject to a lender liability claim, including as a result of actions taken if we render significant managerial assistance to the borrower. Furthermore, if one of our portfolio companies were to file for bankruptcy protection, even though we may have structured our investment as senior secured debt, depending on the facts and circumstances, including the extent to which we provided managerial assistance to that portfolio company, a bankruptcy court might re-characterize our debt holding and subordinate all or a portion of our claim to claims of other creditors.

TABLE OF CONTENTS

Our investments in the debt instruments of leveraged portfolio companies may be risky and, due to the significant volatility of such companies, we could lose all or part of our investment in bankruptcy proceedings or otherwise. Investment in leveraged companies involves a number of significant risks. Leveraged companies in which we invest may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold due to the significant volatility of such companies. Negative developments may be accompanied by deterioration of the value of any collateral and a reduction in the likelihood of our realizing any guarantees that we may have obtained in connection with our investment. Such developments may ultimately result in the leveraged companies in which we invest entering into bankruptcy proceedings, which have a number of inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by an issuer may adversely and permanently affect the issuer. If the proceeding is converted to a liquidation, the value of the issuer may not equal the liquidation value that was believed to exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor's return on investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial. In addition, since our mezzanine loans are generally subordinated to senior loans and are generally unsecured, other creditors may rank senior to us in the event of a bankruptcy proceeding.

Our investments in private and middle-market portfolio companies are generally considered lower credit quality obligations, are risky, and we could lose all or part of our investment.

Investment in private and middle-market companies involves a number of significant risks. Generally, little public information exists about these companies, and we rely on the ability of OFS Advisor's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Middle-market companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees we may have obtained in connection with our investment. Such companies typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns.

Middle-market companies are more likely to be considered lower grade investments, commonly called "junk bonds," which are either rated below investment grade by one or more nationally-recognized statistical rating agencies at the time of investment, or may be unrated but determined by the OFS Advisor to be of comparable quality. On average, the debt in which we invest have contractual maturities between four and six years, and typically is not rated by any rating agency. We believe, however, that if such investments were rated, they would be below investment grade (rated lower than "Baa3" by Moody's Investors Service, lower than "BBB-" by Fitch Ratings or lower than "BBB-" by Standard & Poor's). We may invest without limit in debt of any rating, as well as debt that has not been rated by any nationally recognized statistical rating organization.

Lower grade securities or comparable unrated securities are considered predominantly speculative regarding the issuer's ability to pay interest and principal, and are susceptible to default or decline in market value due to adverse economic and business developments. The market values for lower grade debt tend to be very volatile and are less liquid than investment grade securities. For these reasons, an investment in our company is subject to the following specific risks: increased price sensitivity to a deteriorating economic environment; greater risk of loss due to default or declining credit quality; adverse company specific events

TABLE OF CONTENTS

are more likely to render the issuer unable to make interest and/or principal payments; and if a negative perception of the lower grade debt market develops, the price and liquidity of lower grade securities may be depressed. This negative perception could last for a significant period of time.

Additionally, middle-market companies are more likely to depend on the management talents and efforts of a small group of persons. Therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us. Middle-market companies also may be parties to litigation and may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence. In addition, our executive officers, directors and OFS Advisor may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies.

Investments in equity securities involve a substantial degree of risk.

We have purchased, and may purchase in the future, common stock and other equity securities, including warrants, in various portfolio companies. Although equity securities historically have generated higher average total returns than debt securities over the long term, equity securities may experience more volatility in those returns than debt securities. The equity securities we acquire may fail to appreciate, decline in value or lose all value, and our ability to recover our investment will depend on our portfolio company's success. Investments in equity securities involve a number of significant risks, including the risk of further dilution in the event the portfolio company issues additional securities. Investments in preferred securities involve special risks, such as the risk of deferred distributions, illiquidity and limited voting rights.

Our equity ownership in a portfolio company may represent a control investment. Our ability to exit a control investment in a timely manner could result in a realized loss on the investment.

If we obtain a control investment in a portfolio company, our ability to divest ourselves from a debt or equity investment could be restricted due to illiquidity in a private stock, limited trading volume on a public company's stock, inside information on a company's performance, insider blackout periods, or other factors that could prohibit us from disposing of the investment as we would if it were not a control investment. Additionally, we may choose not to take certain actions to protect a debt investment in a control investment portfolio company. As a result, we could experience a decrease in the value of our portfolio company holdings and potentially incur a realized loss on the investment.

We may suffer a loss if a portfolio company defaults on a loan and the underlying collateral is not sufficient.

We will at times take a security interest in the available assets of our portfolio companies, including the equity interests of their subsidiaries and, in some cases, the equity interests of our portfolio companies held by their stockholders. In the event of a default by a portfolio company on a secured loan, we will only have recourse to the assets collateralizing the loan. There is a risk that the collateral securing our loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise, and may fluctuate in value based upon the success or deterioration of the business and market conditions, including as a result of the inability of a portfolio company to raise additional capital. Additionally, in the case of certain of our investments, we do not have a first lien position on the collateral and may not receive the full value of the collateral upon liquidation. If the underlying collateral value is less than the loan amount, we will suffer a loss.

In the event of bankruptcy of a portfolio company, we may not have full recourse to its assets in order to satisfy our loan, or our loan may be subject to equitable subordination. In addition, certain of our loans are subordinate to other debt of the portfolio company. If a portfolio company defaults on our loan or on debt senior to our loan, or in the event of a portfolio company bankruptcy, our loan will be satisfied only after the senior debt receives payment. Where debt senior to our loan exists, the presence of inter-creditor arrangements may limit our ability to amend our loan documents, assign our loans, accept prepayments, exercise our remedies (through "standstill" periods) and control decisions made in bankruptcy proceedings relating to the portfolio company. Bankruptcy and portfolio company litigation can significantly increase collection losses and the time needed for us to acquire the underlying collateral in the event of a default, during which time the collateral may decline in value, causing us to suffer losses.

TABLE OF CONTENTS

If the value of collateral underlying our loan declines or interest rates increase during the term of our loan, a portfolio company may not be able to obtain the necessary funds to repay our loan at maturity through refinancing. Decreasing collateral value and/or increasing interest rates may hinder a portfolio company's ability to refinance our loan because the underlying collateral cannot satisfy the debt service coverage requirements necessary to obtain new financing. If a borrower is unable to repay our loan at maturity, we could suffer a loss which may adversely impact our financial performance.

The lack of liquidity in our investments may adversely affect our business.

All of our assets are presently invested in illiquid securities, and a substantial portion of our investments in leveraged companies is subject to legal and other restrictions on resale or is otherwise less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded these investments. We may also face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we, OFS Advisor, OFSAM or any of its other affiliates have material nonpublic information regarding such portfolio company.

Price declines and illiquidity in the corporate debt markets may adversely affect the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by our board of directors. As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments:

- a comparison of the portfolio company's securities to publicly traded securities;
- the enterprise value of a portfolio company;
- the nature and realizable value of any collateral;
- the portfolio company's ability to make payments and its earnings and discounted cash flow;
- the markets in which the portfolio company does business; and
- changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors.

When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we will use the pricing indicated by the external event to corroborate our valuation. We will record decreases in the market values or fair values of our investments as unrealized depreciation. Declines in prices and liquidity in the corporate debt markets may result in significant net unrealized depreciation in our portfolio. The effect of all of these factors on our portfolio may reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse effect on our business, financial condition and results of operations. We are a non-diversified management investment company within the meaning of the 1940 Act, and therefore we are not limited with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified management investment company within the meaning of the 1940 Act, which means that we will not be limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. To the extent that we assume large positions in the securities of a small number of issuers,

our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market's assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond our asset diversification requirements as a RIC under the Code, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

37

TABLE OF CONTENTS

Our portfolio may be concentrated in a limited number of portfolio companies and industries, which will subject us to a risk of significant loss if any of these companies defaults on its obligations under any of its debt instruments or if there is a downturn in a particular industry.

Although we believe our portfolio is comprised of investments in a number of portfolio companies across a variety of industries, our portfolio is and may in the future be concentrated in a limited number of portfolio companies and industries. Beyond the asset diversification requirements associated with our qualification as a RIC under the Code, we do not have fixed guidelines for diversification. As a result, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, while we are not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio. Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as “follow-on” investments, in seeking to:

- increase or maintain in whole or in part our position as a creditor or equity ownership percentage in a portfolio company;
- exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or
- preserve or enhance the value of our investment.

We have discretion to make follow-on investments, subject to the availability of capital resources. Failure on our part to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our level of risk, because we prefer other opportunities or because we are inhibited by compliance with BDC requirements or the desire to maintain our RIC status. Our ability to make follow-on investments may also be limited by OFS Advisor’s allocation policy.

Because we generally do not hold controlling equity interests in our portfolio companies, we may not be able to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

We generally do not hold controlling equity positions in our portfolio companies. For portfolio companies in which we do not hold a controlling equity interest, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and that the management and/or stockholders of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity of the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investments.

Defaults by our portfolio companies will harm our operating results.

A portfolio company’s failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets. This could trigger cross-defaults under other agreements and jeopardize such portfolio company’s ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We have invested a substantial portion of our capital in senior secured, unitranche, second-lien and mezzanine loans issued by our portfolio companies. The portfolio companies may be permitted to incur,

TABLE OF CONTENTS

other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying senior creditors, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share any distributions on an equal and ratable basis with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Additionally, certain loans that we make to portfolio companies may be secured on a second-priority basis by the same collateral securing first-priority debt of such companies. The senior-secured liens on the collateral will secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the portfolio company under the agreements governing the loans. The holders of obligations secured by first-priority liens on the collateral will generally control the liquidation of, and be entitled to receive proceeds from, any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second-priority liens after payment in full of all obligations secured by the first-priority liens on the collateral. If such proceeds were not sufficient to repay amounts outstanding under the loan obligations secured by the second-priority liens, then we, to the extent not repaid from the proceeds of the sale of the collateral, would only have an unsecured claim against the portfolio company's remaining assets, if any. The rights we may have with respect to the collateral securing the loans we make to our portfolio companies with more senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that we enter into with the holders of such senior debt. Under a typical intercreditor agreement, at any time that obligations that have the benefit of the first-priority liens are outstanding, any of the following actions that may be taken in respect of the collateral will be at the direction of the holders of the obligations secured by the first-priority liens:

- the ability to cause the commencement of enforcement proceedings against the collateral;
- the ability to control the conduct of such proceedings;
- the approval of amendments to collateral documents;
- releases of liens on the collateral; and
- waivers of past defaults under collateral documents.

We may not have the ability to control or direct such actions, even if our rights are adversely affected.

We may also make unsecured loans to portfolio companies, meaning that such loans will not benefit from any interest in collateral of such companies. Liens on such portfolio companies' collateral, if any, will secure the portfolio company's obligations under its outstanding secured debt and may secure certain future debt that is permitted to be incurred by the portfolio company under its secured loan agreements. The holders of obligations secured by such liens will generally control the liquidation of, and be entitled to receive proceeds from, any realization of such collateral to repay their obligations in full before us. In addition, the value of such collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the

proceeds, if any, from sales of such collateral would be sufficient to satisfy our unsecured loan obligations after payment in full of all secured loan obligations. If such proceeds were not sufficient to repay the outstanding secured loan obligations, then our unsecured claims would rank equally with the unpaid portion of such secured creditors' claims against the portfolio company's remaining assets, if any.

39

TABLE OF CONTENTS

If we make subordinated investments, the obligors or the portfolio companies may not generate sufficient cash flow to service their debt obligations to us.

We make subordinated investments that rank below other obligations of the obligor in right of payment. Subordinated investments are subject to greater risk of default than senior obligations as a result of adverse changes in the financial condition of the obligor or in general economic conditions. If we make a subordinated investment in a portfolio company, the portfolio company may be highly leveraged, and its relatively high debt-to-equity ratio may create increased risks that its operations might not generate sufficient cash flow to service all of its debt obligations.

The disposition of our investments may result in contingent liabilities.

A significant portion of our investments involve private securities. In connection with the disposition of an investment in private securities, we may be required to make representations about the business and financial affairs of the portfolio company typical of those made in connection with the sale of a business. We may also be required to indemnify the purchasers of such investment to the extent that any such representations turn out to be inaccurate, or with respect to potential liabilities. These arrangements may result in contingent liabilities that ultimately result in funding obligations that we must satisfy through our return of distributions previously made to us.

Our base management fee may induce OFS Advisor to cause us to incur leverage.

Our base management fee is payable based upon our total assets, other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity. This fee structure may encourage OFS Advisor to cause us to borrow money to finance additional investments. Under certain circumstances, the use of borrowed money may increase the likelihood of default, which would disfavor holders of our common stock. Given the subjective nature of the investment decisions made by OFS Advisor on our behalf, our board of directors may not be able to monitor this potential conflict of interest effectively.

Our incentive fee may induce OFS Advisor to make certain investments, including speculative investments.

The incentive fee payable by us to OFS Advisor may create an incentive for OFS Advisor to make investments on our behalf that are riskier or more speculative than would be the case in the absence of such compensation arrangement.

The way in which the incentive fee payable to OFS Advisor is determined may encourage OFS Advisor to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor our stockholders.

OFS Advisor receives an incentive fee based, in part, upon net capital gains realized on our investments. Unlike that portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, OFS Advisor may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to OFS Advisor with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our stockholders will bear his or her share of the management and incentive fee of OFS Advisor as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest.

Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interests associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor's services and fees. In connection with these reviews, our independent directors will consider whether our fees and expenses (including those related to leverage) remain appropriate.

TABLE OF CONTENTS

Our incentive fee structure may create incentives for OFS Advisor that are not fully aligned with the interests of our stockholders.

In the course of our investing activities, we will pay management and incentive fees to OFS Advisor. The base management fee is based on our total assets (other than cash and cash equivalents

We may pay an incentive fee on income we do not receive in cash.

The part of the incentive fee payable to OFS Advisor that relates to our pre-incentive fee net investment income is computed and paid on income that may include interest income that has been accrued but not yet received in cash.

This fee structure may be considered to involve a conflict of interest for OFS Advisor to the extent that it may encourage OFS Advisor to favor debt financings that provide for deferred interest, rather than current cash payments of interest. OFS Advisor may have an incentive to invest in deferred interest securities in circumstances where it would not have done so but for the opportunity to continue to earn the incentive fee even when the issuers of the deferred interest securities would not be able to make actual cash payments to us on such securities. This risk could be increased because OFS Advisor is not obligated to reimburse us for any incentive fees received even if we subsequently incur losses or never receive in cash the deferred income that was previously accrued.

OFS Advisor's liability is limited under the Investment Advisory Agreement, and we have agreed to indemnify OFS Advisor against certain liabilities, which may lead OFS Advisor to act in a riskier manner on our behalf than it would when acting for its own account.

Under the Investment Advisory Agreement, OFS Advisor will not assume any responsibility to us other than to render the services called for under that agreement, and it will not be responsible for any action of our board of directors in following or declining to follow OFS Advisor's advice or recommendations. Under the terms of the Investment Advisory Agreement, OFS Advisor and its affiliates' respective officers, directors, members, managers, stockholders and employees will not be liable to us, any subsidiary of ours, our directors, our stockholders or any subsidiary's stockholders or partners for acts or omissions performed in accordance with and pursuant to the Investment Advisory Agreement, except those resulting from acts constituting gross negligence, willful misconduct, bad faith or reckless disregard of such person's duties under the Investment Advisory Agreement. In addition, we have agreed to indemnify OFS Advisor and its affiliates' respective officers, directors, members, managers, stockholders and employees from and against any claims or liabilities, including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the Investment Advisory Agreement, except where attributable to gross negligence, willful misconduct, bad faith or reckless disregard of such person's duties under the Investment Advisory Agreement. These protections may lead OFS Advisor to act in a riskier manner when acting on our behalf than it would when acting for its own account.

We may be subject to additional risks if we engage in hedging transactions and/or invest in foreign securities.

The 1940 Act generally requires that 70% of our investments be in issuers each of whom is organized under the laws of, and has its principal place of business in, any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands or any other possession of the United States. Our investment strategy does not presently contemplate investments in securities of non-U.S. companies. We expect that these investments would focus on the same debt investments that we make in U.S. middle-market companies and accordingly would be complementary to our overall strategy and enhance the diversity of our holdings. Investing in securities of emerging market issuers involves many risks, including economic, social, political, financial, tax and security conditions in the emerging market, potential inflationary economic environments, regulation by foreign governments, different accounting standards and political uncertainties. Economic, social, political, financial, tax and security conditions also could negatively affect the value of emerging market companies. These factors could include changes in the emerging market government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to the emerging market companies or investments in their securities and the possibility of fluctuations in the rate of exchange between currencies.

TABLE OF CONTENTS

Engaging in either hedging transactions or investing in foreign securities would entail additional risks to our stockholders. We could, for example, use instruments such as interest rate swaps, caps, collars and floors and, if we were to invest in foreign securities, we could use instruments such as forward contracts or currency options and borrow under a credit facility in currencies selected to minimize our foreign currency exposure. In each such case, we generally would seek to hedge against fluctuations of the relative values of our portfolio positions from changes in market interest rates or currency exchange rates. Hedging against a decline in the values of our portfolio positions would not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of the positions declined. However, such hedging could establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions could also limit the opportunity for gain if the values of the underlying portfolio positions increased. Moreover, it might not be possible to hedge against an exchange rate or interest rate fluctuation that was so generally anticipated that we would not be able to enter into a hedging transaction at an acceptable price.

While we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates could result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged could vary. Moreover, for a variety of reasons, we might not seek to establish a perfect correlation between the hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation could prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it might not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities would likely fluctuate as a result of factors not related to currency fluctuations.

Our ability to enter into transactions involving derivatives and financial commitment transactions may be limited. The SEC has proposed a new rule under the 1940 Act that would govern the use of derivatives (defined to include any swap, security-based swap, futures contract, forward contract, option or any similar instrument) as well as financial commitment transactions (defined to include reverse repurchase agreements, short sale borrowings and any firm or standby commitment agreement or similar agreement) by BDCs. Under the proposed rule, a BDC would be required to comply with one of two alternative portfolio limitations and manage the risks associated with derivatives transactions and financial commitment transactions by segregating certain assets. Furthermore, a BDC that engages in more than a limited amount of derivatives transactions or that uses complex derivatives would be required to establish a formalized derivatives risk management program. If the SEC adopts this rule in the form proposed, our ability to enter into transactions involving such instruments may be hindered, which could have an adverse effect on our business, financial condition and results of operations.

We may not realize gains from our equity investments.

When we invest in senior secured, unitranche, second-lien and mezzanine loans, we may acquire warrants or other equity securities of portfolio companies as well. We may also invest in equity securities directly. To the extent we hold equity investments, except as described below, we will attempt to dispose of them and realize gains upon our disposition of them. However, the equity interests we receive may not appreciate in value and may decline in value. As a result, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience. In the case of SBIC I LP, our wholly-owned subsidiary, we will not receive direct benefits from the sale of assets in their portfolios. Rather, our return on our investment in such assets will depend on the ability of SBIC I LP's portfolio to generate cash flow in excess of payments required, as appropriate, to be made to other parties under the terms of the SBA debentures, and distribution, subject to SBA regulation, of the excess to us.

TABLE OF CONTENTS

Uncertainty relating to the London Interbank Offered Rate (“LIBOR”) calculation process may adversely affect the value of any portfolio of LIBOR-indexed, floating-rate debt securities.

Concerns have been publicized that some of the member banks surveyed by the British Bankers’ Association (“BBA”) in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable to them in order to profit on their derivatives positions or to avoid an appearance of capital insufficiency or adverse reputational or other consequences that may have resulted from reporting inter-bank lending rates higher than those they actually submitted. A number of BBA member banks have entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations by regulators and governmental authorities in various jurisdictions are ongoing.

Actions by the BBA, regulators or law enforcement agencies may result in changes to the manner in which LIBOR is determined. Uncertainty as to the nature of such potential changes may adversely affect the market for LIBOR-based securities, including our potential portfolio of LIBOR-indexed, floating-rate debt securities. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities or the value of our potential portfolio of LIBOR-indexed, floating-rate debt securities.

Risks Related to Our Securities

There is a risk that stockholders may not receive distributions or that our distributions may not grow over time and a portion of our distributions may be a return of capital.

We have made distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure stockholders that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. Our ability to pay distributions might be adversely affected by the impact of one or more of the risk factors described in this prospectus. Due to the asset coverage test applicable to us under the 1940 Act as a BDC, we may be limited in our ability to make distributions. Our ability to make distributions may also be affected by our ability to receive distributions from SBIC I LP which is governed by SBA regulations.

When we make distributions, we will be required to determine the extent to which such distributions are paid out of current or accumulated earnings and profits. Distributions in excess of current and accumulated earnings and profits will be treated as a non-taxable return of capital to the extent of an investor’s basis in our stock and, assuming that an investor holds our stock as a capital asset, thereafter as a capital gain. A return of capital is a return to stockholders of a portion of their original investment in us rather than income or capital gains. A return of capital reduces the basis that the investor has in the Company’s shares, which may result in an increase in the amount of any taxable gain or a reduction in any deductible loss upon a subsequent sale of such shares. See “Material Federal Income Tax Considerations-Taxation as a RIC.”

The market price of our common stock may fluctuate significantly.

As with any stock, the market price of our common stock will fluctuate with market conditions and other factors. Our common stock is intended for long-term investors and should not be treated as a trading vehicle. Shares of BDCs frequently trade at a discount from their net asset value. The market price and liquidity of the market for shares of our common stock may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

- significant volatility in the market price and trading volume of securities of BDCs or other companies in our sector, which is not necessarily related to the operating performance of these companies;
- exclusion of our common stock from certain market indices, such as the Russell 2000 Financial Services Index, which could reduce the ability of certain investment funds to own our common stock and put short-term selling pressure on our common stock;

TABLE OF CONTENTS

- changes in regulatory policies or tax guidelines, particularly with respect to RICs, SBICs or BDCs;
- loss of RIC or BDC status;
- failure of SBIC I LP to maintain its status as an SBIC;
- inability to obtain a second SBA license;
- our origination activity, including the pace of, and competition for, new investment opportunities;
- changes or perceived changes in earnings or variations in operating results;
- changes or perceived changes in the value of our portfolio of investments;
- changes in accounting guidelines governing valuation of our investments;
- any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
- potential future sales of common stock or debt securities convertible into or exchangeable or exercisable for our common stock or the conversion of such securities;
- departure of OFS Advisor's, OFSC's or any of their affiliates' key personnel;
- operating performance of companies comparable to us;
- general economic trends and other external factors; and
- loss of a major funding source.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

The shares of our common stock beneficially owned by our principal stockholders are generally available for resale, subject to the provisions of Rule 144 promulgated under the Securities Act. Sales of substantial amounts of our common stock, or the availability of such common stock for sale, could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the

sale of securities should we desire to do so.

Certain provisions of the Delaware General Corporation Law and our certificate of incorporation and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Delaware General Corporation Law, our certificate of incorporation and our bylaws contain provisions that may have the effect of discouraging a third party from making an acquisition proposal for us. We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our certificate of incorporation dividing our board of directors into three classes with the term of one class expiring at each annual meeting of stockholders. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price of our common stock.

Our common stock may trade below its net asset value per share, which limits our ability to raise additional equity capital.

If our common stock is trading below its net asset value per share, we will generally not be able to issue additional shares of our common stock at its market price without first obtaining the approval for such issuance from our stockholders and our independent directors. Shares of BDCs, including shares of our common stock, have traded at discounts to their net asset values. As of March 31, 2017, our net asset value per share was \$14.98. The daily average closing price of our shares on the Nasdaq Global Select Market for the three months ended March 31, 2017 was \$14.52. If our common stock trades below net asset value, the higher the cost of equity capital may result in it being unattractive to raise new equity, which may limit our ability to grow. The risk of trading below net asset value is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether shares of our common stock will trade above, at or below our net asset value.

44

TABLE OF CONTENTS

If we issue preferred stock, debt securities or convertible debt securities, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock and/or debt securities would result in a higher yield or return to the holders of our common stock. The issuance of preferred stock, debt securities or convertible debt would likely cause the net asset value and market value of our common stock to become more volatile. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of our common stock would be reduced. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to exceed the net rate of return on our portfolio, the use of leverage would result in a lower rate of return to the holders of common stock than if we had not issued the preferred stock or debt securities. Any decline in the net asset value of our investment would be borne entirely by the holders of our common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of our common stock than if we were not leveraged through the issuance of preferred stock. This decline in net asset value would also tend to cause a greater decline in the market price for our common stock.

There is also a risk that, in the event of a sharp decline in the value of our net assets, we would be in danger of failing to maintain required asset coverage ratios which may be required by the preferred stock, debt securities, convertible debt or units or of a downgrade in the ratings of the preferred stock, debt securities, convertible debt or units or our current investment income might not be sufficient to meet the dividend requirements on the preferred stock or the interest payments on the debt securities. If we do not maintain our required asset coverage ratios, we may not be permitted to declare dividends. In order to counteract such an event, we might need to liquidate investments in order to fund redemption of some or all of the preferred stock, debt securities or convertible debt. In addition, we would pay (and the holders of our common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, debt securities, convertible debt or any combination of these securities. Holders of preferred stock, debt securities or convertible debt may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

Holders of any preferred stock that we may issue will have the right to elect members of the board of directors and have class voting rights on certain matters.

The 1940 Act requires that holders of shares of preferred stock must be entitled as a class to elect two directors at all times and to elect a majority of the directors if dividends on such preferred stock are in arrears by two years or more, until such arrearage is eliminated. In addition, certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock, including changes in fundamental investment restrictions and conversion to open-end status and, accordingly, preferred stockholders could veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies, might impair our ability to maintain our tax treatment as a RIC for U.S. federal income tax purposes.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering. In addition, if the subscription price is less than our net asset value per share, then you will experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights, stockholders who do not fully exercise their subscription rights should expect that they will, at the completion of a rights offering pursuant to this prospectus, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of such rights offering.

In addition, if the subscription price is less than the net asset value per share of our common stock, then our stockholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of a rights offering or what proportion of the shares will be purchased as a result of such rights offering. Such dilution could be substantial.

TABLE OF CONTENTS

The trading market or market value of our publicly issued debt securities may fluctuate.

Our publicly issued debt securities may or may not have an established trading market. We cannot assure you that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

- the time remaining to the maturity of these debt securities;
- the outstanding principal amount of debt securities with terms identical to these debt securities;
- the ratings assigned by national statistical ratings agencies;
- the general economic environment;
- the supply of debt securities trading in the secondary market, if any;
- the redemption or repayment features, if any, of these debt securities;
- the level, direction and volatility of market interest rates generally; and
- market rates of interest higher or lower than rates borne by the debt securities.

You should also be aware that there may be a limited number of buyers when you decide to sell your debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may materially adversely affect your return on any debt securities that we may issue. If your debt securities are redeemable at our option, we may choose to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In addition, if your debt securities are subject to mandatory redemption, we may be required to redeem your debt securities also at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In this circumstance, you may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as your debt securities being redeemed.

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings are an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities.

TABLE OF CONTENTS

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

In addition to factors previously identified elsewhere in this prospectus, including the “Risks” section of this prospectus, the following factors, among others, could cause actual results to differ materially from forward-looking statements or historical performance:

- the introduction, withdrawal, success and timing of business initiatives and strategies;
- changes in political, economic or industry conditions, the interest rate environment or financial and capital markets, which could result in changes in the value of our assets;
- the relative and absolute investment performance and operations of our investment adviser;
- the impact of increased competition;
- the impact of future acquisitions and divestitures;
- the unfavorable resolution of legal proceedings;
- our business prospects and the prospects of our portfolio companies;
- the impact, extent and timing of technological changes and the adequacy of intellectual property protection;
- the impact of legislative and regulatory actions and reforms and regulatory, supervisory or enforcement actions of government agencies relating to us or OFS Advisors;
- the ability of OFS Advisors to identify suitable investments for us and to monitor and administer our investments;
- our contractual arrangements and relationships with third parties;
- any future financings by us, including a second SBIC license;
- the ability of OFS Advisors to attract and retain highly talented professionals;
- fluctuations in foreign currency exchange rates; and
- the impact of changes to tax legislation and, generally, our tax position.

This prospectus and any prospectus supplement, and other statements that we may make, may contain forward-looking statements with respect to future financial or business performance, strategies or expectations.

Forward-looking statements are typically identified by words or phrases such as “trend,” “opportunity,” “pipeline,” “believe,” “comfortable,” “expect,” “anticipate,” “current,” “intention,” “estimate,” “position,” “assume,” “potential,” “outlook,” “continue,” “maintain,” “sustain,” “seek,” “achieve” and similar expressions, or future or conditional verbs such as “will,” “would,” “should,” “could,” “may” or similar expressions.

Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made, and we assume no duty to and do not undertake to update forward-looking statements. These forward-looking statements do not meet the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act of 1933, as amended, or the Securities Act or Section 21E of the Securities Exchange Act of 1934. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

TABLE OF CONTENTS

USE OF PROCEEDS

We intend to use the net proceeds from the sale of our securities for general corporate purposes, which include investing in debt and equity securities, repayment of any outstanding indebtedness, acquisitions and other general corporate purposes. The supplement to this prospectus relating to an offering will more fully identify the use of proceeds from such offering.

We anticipate that substantially all of the net proceeds from any offering of our securities will be used as described above within twelve months, but in no event longer than two years, depending on the availability of attractive opportunities and market conditions. However, there can be no assurance that we will be able to achieve this goal. Pending such uses and investments, we will invest the remaining net proceeds primarily in cash, cash equivalents, U.S. government securities or high-quality debt securities maturing in one year or less from the time of investment. The management fee payable by us to our investment adviser will not be reduced while our assets are invested in such securities. Our ability to achieve our investment objective may be limited to the extent that the net proceeds of any offering, pending full investment, are held in lower yielding short-term instruments.

48

TABLE OF CONTENTS

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock began trading on November 8, 2012 on The Nasdaq Global Market under the symbol "OFS". Effective January 2, 2014, our common stock was included in the Nasdaq Global Select Market. The following table lists the high and low closing sale price for our common stock, net asset value per share, and the cash distributions per share that we have declared on our common stock for each fiscal quarter during the last two most recently completed fiscal years. The stock quotations are inter-dealer quotations and do not include markups, markdowns or commissions.

Period	NAV Per Share(1)	Price Range		Premium (Discount) of High Sales Price to NAV	Premium (Discount) of Low Sales Price to NAV	Cash Distribution per Share(2)
		High	Low			
Fiscal 2017						
Second Quarter(3)	*	\$ 14.58	\$ 13.50	*	*	\$ 0.34
First Quarter	14.98	\$ 15.24	\$ 13.55	1.7%	(9.5)%	\$ 0.34
Fiscal 2016						
Fourth Quarter	\$ 14.82	\$ 14.09	\$ 12.25	(4.9)%	(17.3)%	\$ 0.34
Third Quarter	\$ 14.67	\$ 14.25	\$ 12.78	(2.9)%	(12.9)%	\$ 0.34
Second Quarter	\$ 14.76	\$ 13.75	\$ 11.83	(6.8)%	(19.9)%	\$ 0.34
First Quarter	\$ 14.65	\$ 13.07	\$ 9.98	(10.8)%	(31.9)%	\$ 0.34
Fiscal 2015						
Fourth Quarter	\$ 14.76	\$ 11.72	\$ 10.11	(20.6)%	(31.5)%	\$ 0.34
Third Quarter	\$ 14.46	\$ 12.17	\$ 10.00	(15.8)%	(30.8)%	\$ 0.34
Second Quarter	\$ 14.66	\$ 12.50	\$ 11.75	(14.7)%	(19.8)%	\$ 0.34
First Quarter	\$ 14.24	\$ 12.44	\$ 11.20	(12.6)%	(21.3)%	\$ 0.34

(1)

Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of each period.

(2)

The distribution during the second quarter of fiscal 2017 was declared by the Company's Board of Directors on May 2, 2017, payable on June 30, 2017, to stockholders of record as of June 16, 2017. The determination of the tax attributes of distributions is made annually as of the end of each fiscal year based upon taxable income for the full year and distributions paid for the full year. If the tax characteristics of the Company's distributions paid during 2017 were determined as of March 31, 2017, approximately \$0.08 per share of the Company's distributions would have represented a return of capital. The return of capital portion of these distributions as of December 31, 2016, 2015, 2014, and 2013 (which includes the period December 8, 2012 to December 31, 2012), was \$0.09, \$0.23, \$0.72, and \$0.40.

(3)

Period from April 1, 2017 through June 13, 2017.

*

Not determinable at the time of filing.

TABLE OF CONTENTSMANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information contained in this section should be read in conjunction with the Selected Consolidated Financial Data and our Financial Statements and notes thereto appearing elsewhere in this prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under "Risk Factors" and "Special Note Regarding Forward-Looking Statements" appearing elsewhere herein.

Defined Terms

We have used "we," "us," "our", "our company", and "the Company" to refer to OFS Capital Corporation in this section and in our unaudited financial statements contained in this prospectus. We also have used several other terms in this section and in our unaudited financial statements, which are explained or defined below:

1940 Act	Investment Company Act of 1940, as amended
Administration Agreement	Administration agreement between the Company and OFS Services
Annual Distribution Requirement	Distributions to our stockholders, for each taxable year, of at least 90% of our ICTI
ASC	Accounting Standards Codification, as issued by the FASB
ASC Topic 820	ASC Topic 820, "Fair Value Measurements and Disclosures"
ASU	Accounting Standards Updates, as issued by the FASB
BDC	Business Development Company under the 1940 Act
BLA	Business Loan Agreement, as amended, with Pacific Western Bank, as lender, which provides the Company with a senior secured revolving credit facility
Board	The Company's board of directors
Code	Subchapter M of the Internal Revenue Code of 1986, as amended
DRIP	Distribution reinvestment plan
EBITDA	Earnings before interest, taxes, depreciation, and amortization
FASB	Financial Accounting Standards Board
FDIC	Federal Deposit Insurance Corporation
GAAP	Accounting principles generally accepted in the United States
HPCI	Hancock Park Corporate Income, Inc., a non-traded BDC with an investment strategy similar to the Company for whom OFS Advisor serves as investment adviser
ICTI	Investment company taxable income, which is generally net ordinary income plus net short-term capital gains in excess of net long-term capital losses
Investment Advisory Agreement	Investment advisory agreement between the Company and OFS Advisor
LIBOR	London Interbank Offered Rate
OFS Advisor	OFS Capital Management, LLC, a wholly-owned subsidiary of OFSAM and registered investment advisor under the 1940 Act
OFS Capital WM, LLC	OFS Capital WM, a wholly-owned investment company subsidiary
OFS Services	OFS Capital Services, LLC, a wholly-owned subsidiary of OFSAM and affiliate of OFS Advisor

TABLE OF CONTENTS

OFSAM	Orchard First Source Asset Management, LLC, an established investment platform focused on meeting the capital needs of middle-market companies
PWB Credit Facility	Senior secured revolving credit facility between the Company and Pacific Western Bank, as lender.
RIC	Regulated investment company under the Code
RMR	Recurring monthly revenue
SBA	U.S. Small Business Administration
SBIC	A fund licensed under the SBA small business investment company program
SBIC Acquisition	The Company's acquisition of the remaining ownership interests in SBIC I LP and SBIC I GP, LLC on December 4, 2013
SBA Act	Small Business Investment Act of 1958
SBIC I LP	OFS SBIC I, LP, a wholly-owned SBIC subsidiary of the Company
SEC	U.S. Securities and Exchange Commission

Overview

We are an externally managed, closed-end, non-diversified management investment company and have elected to be treated as a BDC under the 1940 Act. Our investment activities are managed by OFS Advisor; and OFS Services, an affiliate of OFS Advisor, provides the administrative services necessary for us to operate. In exchange for these services we pay OFS Advisor a base management fee and an incentive fee and we pay OFS Services an administration fee. The base management fee, incentive fee, and the administration fee represents a substantial portion of our total expenses.

Our investment objective is to provide our stockholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments in middle-market companies in the United States. We believe that these middle-market companies represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have historically constituted the vast bulk of our portfolio companies since inception, and as of March 31, 2017. We believe that this market segment will continue to produce significant investment opportunities for us.

Our investment strategy includes SBIC I LP, a licensee under the SBA's SBIC program. The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA leverage funding is subject to SBIC I LP's payment of certain fees to the SBA, and the ability of SBIC I LP to draw on the leverage commitment is subject to its compliance with SBA regulations and policies, including an audit by the SBA. On a stand-alone basis, SBIC I LP held approximately \$251.3 million and \$247.5 million in assets at March 31, 2017 and December 31, 2016, respectively, which accounted for approximately 82% and 81% of our total consolidated assets, respectively.

We generate revenue in the form of interest income on debt investments, capital gains, and dividend income from our equity investments. Our debt investments typically have a term of three to eight years and bear interest at fixed and floating rates. As of March 31, 2017, floating rate and fixed rate loans comprised 67% and 33%, respectively, of our current debt investment portfolio at fair value; however, in accordance with our investment strategy, we expect that over time the proportion of fixed rate loans will continue to increase. We expect to make quarterly distributions, such that we distribute substantially all of our ICTI. In addition, although we intend to make distributions of net realized capital gains, if any, at least annually, out of assets legally available for such distributions, we may in the future decide to retain such capital gains for investment.

Further, we have elected to be taxed as a RIC under the Code. As a RIC, we are not required to pay corporate-level federal income taxes on any income that we distribute to our stockholders from our ICTI. We are required to recognize ICTI in circumstances in which we have not received a corresponding payment

TABLE OF CONTENTS

in cash. For example, we hold debt obligations that are treated under applicable tax rules as issued with OID and debt instruments with PIK interest, and we must include in ICTI each year the portion of the OID and PIK interest that accrues for that year (as it accrues over the life of the obligation), irrespective of the fact the cash representing such income is received by us in that taxable year. The continued recognition of non-cash ICTI may cause difficulty in meeting the Annual Distribution Requirement. We may be required to sell investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital, or forgo new investment opportunities to meet this requirement. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax treatment and thus become subject to corporate-level income tax.

We are permitted to borrow money from time to time within the levels permitted by the 1940 Act (which generally allows us to incur leverage for up to 50% of our asset base). We may borrow money when the terms and conditions available are favorable to do so and are aligned with our investment strategy and portfolio composition. The use of borrowed funds or the proceeds of preferred stock to make investments would have its own specific benefits and risks, and all of the costs of borrowing funds or issuing preferred stock would be borne by holders of our common stock. The 1940 Act generally prohibits BDCs from making certain negotiated co-investments with certain affiliates absent an order from the SEC permitting the BDC to do so. On October 12, 2016, we received exemptive relief from the SEC to permit us to co-invest in portfolio companies with certain other funds managed by OFS Advisor (“Affiliated Funds”) in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the “Order”). Pursuant to the Order, we are generally permitted to co-invest with Affiliated Funds if a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

Critical Accounting Policies and Significant Estimates

The preparation of financial statements and related disclosures in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the periods reported. Actual results could materially differ from those estimates. Critical accounting policies are those that require management to make subjective or complex judgments about the effect of matters that are inherently uncertain and may change in subsequent periods. Changes that may be required in the underlying assumptions or estimates in these areas could have a material impact on our current and future financial condition and results of operations.

Our critical accounting policies and estimates are those relating to revenue recognition and fair value estimates. Management has discussed the development and selection of each critical accounting policy and estimate with the Audit Committee of the board of directors. For a descriptions of our revenue recognition and fair value policies, see Note 2 to our March 31, 2017 consolidated financial statements included in this prospectus.

Revenue recognition. Our investment activities frequently involve the acquisition of multiple financial instruments or rights either in an initial transaction, or in subsequent or “follow-on” transactions, including amendments to existing securities. These financial instruments can include loans, preferred and common stock, warrants, or membership interests in limited liability companies. Acquired rights can include fixed or variable fees that can be either guaranteed or contingent upon operating performance of the underlying portfolio companies. Moreover, these fees may be payable in cash or additional securities. (Acquired rights and financial instruments together, “Instruments”.)

TABLE OF CONTENTS

The revenue recognized on these Instruments is a function of the fee or other consideration allocated to them, including amounts allocated to capital structuring fees, at the time of acquisition. Additionally, subsequent amendments to these Instruments can involve both

- a determination as to whether the amendment is

of such significance to deem it the consummation of the initial investment transaction and the acquisition of new Instruments (i.e., a “significant modification”), or

- a modification of those Instruments to be recognized over their remaining lives, and

- an additional allocation of consideration among newly acquired Instruments.

These allocations are generally based on the relative fair value of the Instruments at the time of the transaction, a process involving fair value estimates which is also a critical accounting policy and significant estimate. Moreover, these allocations and determinations can differ between GAAP and federal income tax bases. Once determined, these allocations directly effect the discount/premium and yield on debt securities, the cost and net gains/losses on equity securities, and capital structuring fees recognized in the statements of operations; and ICTI. These allocations require an understanding of the terms and conditions of the underlying agreements and requires significant management judgment. The table below presents the impact to the initial cost bases of allocated consideration to acquired Instruments for the three months ended March 31, 2017, and 2016, and for the years ended December 31, 2016, 2015, and 2014 (in thousands):

	Three Months Ended March 31,		Year Ended December 31,		
	2017	2016	2016	2015	2014
Loans:					
Net Loan Fees(1) (excluding equity securities and cash amendment fees)	\$ (48)	\$ (640)	\$ (983)	\$ (922)	\$ (974)
Equity securities (including performance-contingent fees)	—	(505)	(822)	—	(1,101)
Equity securities (including performance-contingent fees)	—	505	822	—	1,101
Capital structuring fees	—	(14)	369	653	775

(1)

Loan origination fees, OID, market discount or premium, and loan amendment fees.

Fair value estimates. As of March 31, 2017, approximately 84% of our total assets were carried on the consolidated balance sheets at fair value. As discussed more fully in Note 2 of our March 31, 2017 consolidated financial statements included in this prospectus, GAAP requires us to categorize financial assets and liabilities carried at fair value according to a three-level valuation hierarchy. The hierarchy gives the highest priority to quoted, active market prices for identical assets and liabilities (Level 1) and the lowest priority to valuation techniques that require significant management judgment because one or more of the significant inputs are unobservable in the market place (Level 3). All of our assets carried at fair value are classified as Level 3; we typically do not hold equity securities or other instruments that are actively traded on an exchange.

As described in Note 6 of our March 31, 2017 consolidated financial statements included in this prospectus, we follow a process, under the supervision and review of the Board, to determine these unobservable inputs used to calculate the fair values of our investments. The most significant unobservable inputs in these fair value measurements are the discount rates, EBITDA/RMR multiples and projected cash flows contractually due from the investment.

We consider a variety of factors in our determination of the discount rate to be applied to an investment including, among other things, investment type, LIBOR swap rate, indicative yields from independent third-party sources and the yield on our investment relative to indicative yields at the time of our investment (initial and subsequent investments) in the portfolio company.

We also consider a variety of factors in our determination of the EBITDA/RMR multiple to be applied to an investment including, among other things, the actual EBITDA/RMR multiple for the last arms-length transaction, the ratio of the portfolio company's EBITDA/RMR multiple to the average of

53

TABLE OF CONTENTS

EBITDA/RMR multiples on comparable public companies (“Comparable Multiples”), and the change in Comparable Multiples and the financial performance of the underlying comparable public companies relative to the financial performance of the portfolio company.

For both the discount rate and the EBITDA/RMR multiple we also consider developments at the portfolio company since our investment including, but not limited to, trends in the portfolio company’s earnings and leverage multiple, and input from our independent third-party valuation firms. This process typically results in a single selected discount rate and/or EBITDA/RMR multiple for each investment.

The following table illustrates the sensitivity of our fair value measures to reasonably likely changes to the estimated discount rate and EBITDA/RMR multiple inputs used in our debt and equity investment valuations at March 31, 2017 (dollar amounts in thousands):

Valuation Method/Investment Type	Fair Value at March 31, 2017	Weighted average discount rate at March 31, 2017	Discount rate sensitivity		EBITDA/RMR multiple sensitivity	
			-10% Weighted average	+10% Weighted average	+0.5x	-0.5x
Discounted cash flow						
Debt investments:						
Senior Secured	\$ 137,683	12.23%	\$ 140,304	\$ 134,355	N/A	N/A
Subordinated	46,582	14.72%	47,890	44,843	N/A	N/A
Enterprise value						
Debt investments:						
Senior Secured	\$ 17,492	7.25x (EBITDA)/ 40.00x (RMR)	N/A	N/A	\$ 18,733	\$ 16,251
Subordinated	\$ 4,685	8.62x (EBITDA)	N/A	N/A	\$ 5,323	\$ 4,046
Equity investments:						
Preferred equity	\$ 27,093	7.64x (EBITDA)/ 40.00x (RMR)	N/A	N/A	\$ 29,322	\$ 25,134
Common equity and warrants	\$ 13,891	6.08x (EBITDA)	N/A	N/A	\$ 15,769	\$ 11,763

The table above presents the impact to our debt and equity investment fair value accounting measures by uniformly modifying our discount rate and EBITDA/RMR valuation inputs, as applicable. This discount rate sensitivity measures included in the table do not present the estimated effect of hypothetical changes in actual, observed interest rates, which would affect the cash flows from many of the underlying investments as they are indexed to LIBOR or the Prime Rate of interest, the operating environment of many of our portfolio companies, and other factors, as well as our estimates of the discount rate valuation input. The effect of hypothetical changes in actual, observed interest rates on our fair value measures is not subject to reasonable estimation.

Related Party Transactions

We have entered into a number of business relationships with affiliated or related parties, including the following:

- We entered into the Investment Advisory Agreement with OFS Advisor to manage our operating and investment activities. Under the Investment Advisory Agreement we have agreed to pay OFS Advisor an annual base management fee based on the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) as well as an

incentive fee based on our investment performance. See “Management and Other Agreements” and Note 4 to our March 31, 2017 consolidated financial statements included in this prospectus.

TABLE OF CONTENTS

• We entered into the Administration Agreement with OFS Capital Services, an affiliate of OFS Advisor, to provide us with the office facilities and administrative services necessary to conduct our operations. See “Management and Other Agreements” and Note 4 to our March 31, 2017 consolidated financial statements included in this prospectus.

• We have entered into a license agreement with OFSAM, the parent company of OFS Advisor, under which OFSAM has agreed to grant us a non-exclusive, royalty-free license to use the name “OFS.” Under this agreement, we have a right to use the “OFS” name for so long as OFS Advisor or one of its affiliates remains our investment adviser. Other than with respect to this limited license, we have no legal right to the “OFS” name. This license agreement will remain in effect for so long as the Investment Advisory Agreement with OFS Advisor is in effect.

OFS Advisor’s services under the Investment Advisory Agreement are not exclusive to us and OFS Advisor is free to furnish similar services to other entities, including other BDCs affiliated with OFS Advisor, so long as its services to us are not impaired. OFS Advisor also serves as the investment adviser to CLO funds and other assets, including Hancock Park Corporate Income, Inc., a non-traded BDC with an investment strategy similar to the Company.

Portfolio Composition and Investment Activity

Portfolio Composition

As of March 31, 2017, the fair value of our debt investment portfolio totaled \$217.3 million in 36 portfolio companies, of which 76% and 24% were senior secured loans and subordinated loans, respectively, and approximately \$41.0 million in equity investments, at fair value, in 17 portfolio companies in which we also held debt investments and two portfolio companies in which we solely held an equity investment. We had unfunded commitments of \$2.1 million to three portfolio companies at March 31, 2017. Set forth in the tables and charts below is selected information with respect to our portfolio as of March 31, 2017, and December 31, 2016.

The following table summarizes the composition of our investment portfolio as of March 31, 2017, and December 31, 2016 (dollar amounts in thousands):

	March 31, 2017		December 31, 2016	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Senior secured debt investments(1)	\$ 169,010	\$ 166,060	\$ 182,315	\$ 180,955
Subordinated debt investments	54,671	51,267	66,591	63,410
Preferred equity	23,676	27,093	23,293	23,721
Common equity and warrants	7,108	13,891	7,108	13,541
	\$ 254,465	\$ 258,311	\$ 279,307	\$ 281,627
Total number of portfolio companies	38	38	41	41

(1)

Includes debt investments in which we have entered into a contractual arrangement with co-lenders whereby, subject to certain conditions, we have agreed to receive our principal payments after the repayment of certain co-lenders pursuant to a payment waterfall. The aggregate amortized cost and fair value of these investments was \$14,210 and \$14,250 at March 31, 2017, respectively, and \$28,945 and \$29,276, at December 31, 2016, respectively.

TABLE OF CONTENTS

The following table shows the portfolio composition by geographic region at amortized cost and fair value and as a percentage of total investments; the geographic composition is determined by the location of the portfolio companies' corporate headquarters (dollar amounts in thousands):

	Amortized Cost				Fair Value			
	March 31, 2017		December 31, 2016		March 31, 2017		December 31, 2016	
South – US	\$ 118,140	46.4%	\$ 120,005	42.9%	\$ 125,578	48.6%	\$ 122,511	43.5%
Northeast – US	77,194	30.4	85,693	30.7	66,440	25.7	78,186	27.8
West – US	44,623	17.5	59,120	21.2	47,251	18.3	61,219	21.7
Midwest – US	10,581	4.2	10,566	3.8	15,117	5.9	15,788	5.6
Canada	3,927	1.5	3,923	1.4	3,925	1.5	3,923	1.4
Total	\$ 254,465	100.0%	\$ 279,307	100.0%	\$ 258,311	100.0%	\$ 281,627	100.0%

As of March 31, 2017, our investment portfolio's three largest industries by fair value, were (1) Administrative and Support and Waste Management Remediation Services, (2) Manufacturing, and (3) Professional, Scientific, and Technical Services, totaling approximately 52.2% of the investment portfolio. For a full summary of our investment portfolio by industry, see Note 5 to our March 31, 2017 consolidated financial statements included in this prospectus. The following table presents our debt investment portfolio by investment size as of March 31, 2017, and December 31, 2016 (dollar amounts in thousands):

	Amortized Cost				Fair Value			
	March 31, 2017		December 31, 2016		March 31, 2017		December 31, 2016	
Up to \$4,000	\$ 29,472	13.1%	\$ 34,547	13.9%	\$ 32,882	15.1%	\$ 41,419	17.0%
\$4,001 to \$7,000	62,209	27.8	57,996	23.3	53,746	24.7	55,342	22.6
\$7,001 to \$10,000	78,627	35.2	78,446	31.5	78,274	36.0	80,735	33.0
\$10,001 to \$13,000	24,594	11.0	34,549	13.9	38,175	17.6	37,593	15.4
Greater than \$13,000	28,779	12.9	43,368	17.4	14,250	6.6	29,276	12.0
Total	\$ 223,681	100.0%	\$ 248,906	100.0%	\$ 217,327	100.0%	\$ 244,365	100.0%

The following table displays the composition of our performing debt investment portfolio by weighted average yield as of March 31, 2017, and December 31, 2016:

Weighted Average Yield	March 31, 2017			December 31, 2016		
	Senior Secured Debt	Subordinated Debt	Total Debt	Senior Secured Debt	Subordinated Debt	Total Debt
Less than 8%	7.7%	13.9%	9.4%	8.7%	11.4%	9.5%
8% – 10%	9.1	—	6.9	7.7	—	5.6

Edgar Filing: OFS Capital Corp - Form 497

10% – 12%	39.6	10.9	32.6	32.6	11.9	27.0
12% – 14%	25.3	46.3	30.4	30.9	58.1	38.2
Greater than 14%	18.3	28.9	20.9	20.1	18.6	19.7
Total	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Weighted average yield	11.90%	12.43%	12.03%	11.95%	12.44%	12.08%

The weighted average yield on our performing debt investments is computed as (a) the annual stated accruing interest on our debt investments at the balance sheet date, plus the annualized accretion of Net Loan Fees divided by (b) amortized cost of our debt investments, excluding assets on non-accrual basis as of the balance sheet date. The weighted average yield of our debt investments is not the same as a return on investment for our stockholders but, rather, relates to a portion of our investment portfolio and is calculated before the payment of all of our fees and expenses. There can be no assurance that the weighted average yield will remain at its current level.

56

TABLE OF CONTENTS

As of March 31, 2017, and December 31, 2016, floating rate loans at fair value were 67% and 66% of our debt investment portfolio, respectively, and fixed rate loans at fair value were 33% and 34% of our debt investment portfolio, respectively.

Investment Activity

The following is a summary of our investment activity for the three months ended March 31, 2017 and 2016 (in millions).

	Three Months Ended March 31, 2017		Three Months Ended March 31, 2016

(1)

Received LLC membership interest in connection with a follow-on debt investment in an existing portfolio company valued at \$0.3 million.

During the three months ended March 31, 2016, we converted a \$1.8 million portion of a subordinated debt investment with a principal amount of \$1.8 million into equity units and warrants valued at \$1.8 million. In addition, we received equity in a portfolio company as consideration for an amendment to a senior secured debt investment in the same portfolio company with a fair value of \$0.2 million.

The following is a summary of our investment activity for the years ended December 31, 2016 and 2015 (dollar amounts in millions):

	Year Ended December 31, 2016		Year Ended December 31, 2015	
	Debt Investments	Equity Investments	Debt Investments	Equity Investments
Investments in new portfolio companies	\$ 48.7	\$ 0.7	\$ 66.6	\$ 12.1

(1)
The year ended December 31, 2015 includes \$7.2 of proceeds pertaining to a debt investment we sold in December 2014 and \$67.3 of proceeds pertaining to the WM Asset Sale.

TABLE OF CONTENTS

During the year ended December 31, 2016, we converted \$1.8 million in principal of a subordinated debt investment into preferred equity units and warrants valued at \$1.8 million, converted \$0.3 million in principal of a senior secured debt investment into preferred equity units valued at \$0.3 million, and converted \$0.8 million in principal of a subordinated debt investment into a senior secured debt investment in the same portfolio company. In addition, we amended a senior secured debt investment for which it received preferred equity units in the same portfolio company valued at \$0.2 million and received additional preferred equity units with nominal value in connection with a \$1.3 million follow on investment in the same portfolio company.

Our level of investment activity may vary substantially from period to period depending on various factors, including, but not limited to, the amount of debt and equity capital available to middle market companies, the level of merger and acquisition activity, the general economic environment and the competitive environment for the types of investments we make.

We categorize debt investments into seven risk categories based on relevant information about the ability of borrowers to service their debt. For additional information regarding our risk categories, see “The Company-Portfolio Review/Risk Monitoring.” The following table shows the classification of our debt investments portfolio by credit risk rating as of March 31, 2017, and December 31, 2016 (dollar amounts in thousands):

Risk Category	March 31, 2017		December 31, 2016	
	Debt Investments, at Fair Value	% of Debt Investments	Debt Investments, at Fair Value	% of Debt Investments
1 (Low Risk)	\$ —	—%	\$ —	—%
2 (Below Average Risk)	3,772	1.7	3,810	1.6
3 (Average)	175,760	80.9	192,078	78.6
4 (Special Mention)	28,475	13.1	43,084	17.6
5 (Substandard)	9,320	4.3	5,393	2.2
6 (Doubtful)	—	—	—	—
7 (Loss)	—	—	—	—
	\$ 217,327	100.0%	\$ 244,365	100.0%

During the three months ended March 31, 2017, we reclassified one debt investments from risk category 3 to risk category 5 with a fair value of \$6.3 million at December 31, 2016, primarily due to a degradation in the underlying businesses of the portfolio company. In addition, we reclassified two debt investment from risk category 4 to risk category 3, with an aggregate fair value at December 31, 2016 of \$13.9 million. All other year changes in distribution of our debt investments across risk categories, were a result of new debt investments, the receipt of amortization payments on existing debt investments, repayment of certain debt investments in full, changes in the fair value of our existing debt investments within the categories, and other investment activity.

Non-Accrual Loans and Discontinued PIK Dividend Accruals

At March 31, 2017 and December 31, 2016 we had one loan (Community Intervention Services, Inc., risk category 5) designated non-accrual with respect to PIK interest and Net Loan Fees with an amortized cost of \$7.6 million and \$7.6 million, respectively, and a fair value of \$4.7 million and \$5.4 million, respectively. At March 31, 2017 and December 31, 2016, we had one preferred equity security (Master Cutlery, LLC), with an amortized cost of \$3,483 and \$3,483, respectively, and a fair value of \$70 and \$954, respectively, for which we discontinued the PIK dividend accrual.

TABLE OF CONTENTS

Results of Operations

Key Financial Measures

The following is a discussion of the key financial measures that management employs in reviewing the performance of our operations.

Total Investment Income. We generate revenue in the form of interest income on debt investments, capital gains, and dividend income from our equity investments. Our debt investments typically have a term of three to eight years and bear interest at fixed and floating rates. As of March 31, 2017, floating rate and fixed rate loans comprised 67% and 33%, respectively, of our current debt investment portfolio at fair value; however, in accordance with our investment strategy, we expect that over time the proportion of fixed rate loans will continue to increase. In some cases, our investments provide for deferred interest or dividend payments, PIK interest, or PIK dividends (meaning interest or dividends paid in the form of additional principal amount of the loan or equity security instead of in cash). In addition, we may generate total investment income in the form of commitment, structuring or due diligence fees, fees for providing managerial assistance and consulting fees. Loan origination fees, OID, market discount or premium, and loan amendment fees are capitalized, and accreted or amortized over the life of the loan as interest income. When we receive principal payments on a loan in an amount that exceeds its amortized cost, we will also recognize the excess principal payment as income in the period it is received.

Expenses. Our primary operating expenses include interest expense due under our outstanding borrowings, the payment of fees to OFS Advisor under the Investment Advisory Agreement, our allocable portion of overhead expenses under the Administration Agreement and other operating costs described below. Additionally, we will pay interest expense on any outstanding debt under any new credit facility or other debt instrument we may enter into. We will bear all other out-of-pocket costs and expenses of our operations and transactions, whether incurred by us directly or on our behalf by a third party, including:

- the cost of calculating our net asset value, including the cost of any third-party valuation services;
- the cost of effecting sales and repurchases of shares of our common stock and other securities;
- fees payable to third parties relating to making investments, including out-of-pocket fees and expenses associated with performing due diligence and reviews of prospective investments;
- transfer agent and custodial fees;
- out-of-pocket fees and expenses associated with marketing efforts;
- federal and state registration fees and any stock exchange listing fees;
- U.S. federal, state and local taxes;
- independent directors' fees and expenses;
- brokerage commissions;

- fidelity bond, directors' and officers' liability insurance and other insurance premiums;
- direct costs, such as printing, mailing and long-distance telephone;
- fees and expenses associated with independent audits and outside legal costs;
- costs associated with our reporting and compliance obligations under the 1940 Act and other applicable U.S. federal and state securities laws; and
- other expenses incurred by either OFS Services or us in connection with administering our business.

Net Gain (Loss) on Investments. Net gain (loss) on investments consists of the sum of: (a) realized gains and losses from the sale of debt or equity securities, or the redemption of equity securities; and (b) changes in net unrealized appreciation/depreciation on debt and equity investments. In the period in which a realized gain or loss is recognized, such gain or loss will generally be offset by the reversal of previously recognized unrealized appreciation or depreciation, and the net gain recognized in that period

59

TABLE OF CONTENTS

will generally be smaller. The unrealized appreciation or depreciation on debt securities is also reversed when those investments are redeemed or paid off prior to maturity. In such instances, the reversal on unrealized appreciation or depreciation will be reported as a net loss or gain, respectively, and may be partially offset by the acceleration of any premium or discount on the debt security in interest income and any prepayment fees on the debt security in fee income.

We do not believe that our historical operating performance is necessarily indicative of our future results of operations that we expect to report in future periods. We are primarily focused on investments in middle-market companies in the United States, including debt investments and, to a lesser extent, equity investments, including warrants and other minority equity securities, which differs to some degree from our historical investment concentration, in senior secured loans to middle-market companies in the United States. Moreover, as a BDC and a RIC, we will also be subject to certain constraints on our operations, including, but not limited to, limitations imposed by the 1940 Act and the Code. In addition, SBIC I L.P. is subject to regulation and oversight by the SBA. For the reasons described above, the results of operations described below may not necessarily be indicative of the results we expect to report in future periods.

Net increase in net assets resulting from operations can vary substantially from period to period for various reasons, including the recognition of realized gains and losses and unrealized appreciation and depreciation. As a result, annual comparisons of net increase in net assets resulting from operations may not be meaningful.

Comparison of three months ended March 31, 2017, and 2016

Consolidated operating results for the three months ended March 31, 2017 and 2016, are as follows (in thousands):

	Three Months Ended March 31,	
	2017	2016
Investment income		
Interest income:		
Cash interest income	6,615	6,089
Net Loan Fee amortization	341	366
PIK interest income	314	292
Other interest income	11	16
Total interest income	7,281	6,763
Dividend income:		
Preferred equity cash dividends	33	213
Preferred equity PIK dividends	383	301
Common equity dividends	90	43
Total dividend income	506	557
Fee income:		
Management, valuation, and other	42	38
Prepayment, structuring, and other fees	205	485
Total fee income	247	523
Total investment income	8,034	7,843
Total expenses	4,694	4,188
Net investment income	3,340	3,655
Net gain (loss) on investments	1,526	(1,376)
Net increase in net assets resulting from operations	\$ 4,866	\$ 2,279

TABLE OF CONTENTS

Interest income by debt investment type for the three months ended March 31, 2017 and 2016, is summarized below (in thousands):

	Three Months Ended March 31,	
	2017	2016
Interest income:		
Senior secured debt investments	\$ 5,380	\$ 4,501
Subordinated debt investments	1,901	2,262
Total interest income	7,281	6,763

Interest income increased by \$0.5 million for the three months ended March 31, 2017 compared to the three months ended March 31, 2016. The increase was primarily due to a \$0.6 million increase caused by a 10% increase in the average outstanding loan balance, offset by a \$0.1 million decrease caused by a 1% decrease in our weighted average yield in our portfolio for the three months ended March 31, 2017. Acceleration of Net Loan Fees of \$0.1 million and \$0.1 million were included in interest income for the three months ended March 31, 2017 and 2016, respectively. Fee income decreased by \$0.3 million for the three months ended March 31, 2017 compared to the three months ended March 31, 2016, primarily due to a decrease in prepayment fees. We recorded prepayment fees of \$0.2 million resulting from \$16.9 million of unscheduled principal payments during the three months ended March 31, 2017 compared to prepayment fees of \$0.5 million resulting from \$11.5 million of unscheduled principal payments we recorded during the three months ended March 31, 2016.

Expenses

	Three Months Ended March 31,	
	2017	2016
Interest expense	\$ 1,387	\$ 1,308
Management fees	1,192	1,115
Incentive fee	1,181	733
Professional fees	263	314
Administration fee	401	428
General and administrative expenses	270	290
Total expenses	\$ 4,694	\$ 4,188

Incentive fee expense increased by \$0.4 million for the three months ended March 31, 2017, compared to the three months ended March 31, 2016. The increase was primarily due to an increase in the accrued Capital Gains Fee during three months ended March 31, 2017. During the three months ended March 31, 2017 we recorded a Capital Gains Fee of \$0.3 million compared to a Capital Gains Fee of \$(0.1) million recorded during three months ended March 31, 2016, which represents the reversal of the accrued Capital Gains Fee at December 31, 2015.

Net Gain (Loss) on Investments

Net gain (loss) by investment type for the three months ended March 31, 2017 and 2016, are as follows (in thousands):

	Three Months Ended March 31,	
	2017	2016
Senior secured debt	\$ (1,590)	\$ (1,382)
Subordinated debt	(223)	313
Preferred equity	2,989	(1,379)

Edgar Filing: OFS Capital Corp - Form 497

Common equity and warrants	350	1,072
Net gain (loss) on investments	1,526	(1,376)

61

TABLE OF CONTENTS

Three months ended March 31, 2017

We recognized net losses of \$1.6 million on senior secured debt during the three months ended March 31, 2017, primarily as a result of the impact of changes to EBITDA multiples used in our valuations, offset by the positive impact of portfolio company-specific performance factors.

We recognized net losses of \$0.2 million on subordinated debt during the three months ended March 31, 2017, primarily as a result of the net impact of portfolio company-specific performance factors.

We recognized net gains of \$3.0 million on preferred equity investments for the three months ended March 31, 2017, primarily as a result of the net impact of changes to EBITDA multiples used in our valuations and the net positive impact of portfolio company-specific performance factors.

We recognized net gains of \$0.4 million on common equity and warrant investments for the three months ended March 31, 2017, primarily as a result of the impact of changes to EBITDA multiples used in our valuations, offset primarily by the net negative impact of portfolio company-specific performance factors.

Three months ended March 31, 2016

We recognized net losses of \$1.4 million on senior secured debt primarily as a result of the impact of widening spreads in second lien loan indices and other interest rate market factors on our discount rates, and the pay-off of debt investments, partially offset by the net impact of company-specific performance and other factors on our valuations.

We recognized net gains of \$0.3 million on subordinated debt principally as a result of the pay-off of debt investments and the net impact of company-specific performance and other factors, partially offset by the impact of widening spreads in second lien loan indices and other interest rate market factors on our discount rates.

We recognized net losses of \$1.4 million on preferred equity investments for the three months ended March 31, 2016, primarily as a result of the net impact of company-specific performance and other factors on our valuations, offset by the net impact of investments moving closer to their expected exit events.

We recognized net gains of \$1.1 million on common equity and warrant investments for the three months ended March 31, 2016 primarily attributable to the net impact of portfolio company-specific performance factors, and the impact of exit-event assumptions on our valuations. During the three months ended March 31, 2016, we realized gains of \$2.6 million principally from the redemption of a common equity investment. We held this investment from the first quarter of 2014 and recognized unrealized gains of \$2,062 and \$498 during the years ended December 31, 2015 and 2014, respectively. There was no net gain during the three months ended March 31, 2016, on this transaction.

Comparison of the years ended December 31, 2016, 2015, and 2014

Consolidated operating results for the years ended December 31, 2016, 2015, and 2014 are as follows (in thousands):

	Years Ended December 31,		
	2016	2015	2014
Total investment income	\$ 31,094	\$ 32,264	\$ 22,820
Total expenses	16,949	18,853	13,685
Net investment income	14,145	13,411	9,135
Net gain (loss) on investments	(317)	4,820	805
Net increase in net assets resulting from operations	\$ 13,828	\$ 18,231	\$ 9,940

TABLE OF CONTENTS

Total Investment Income

	2016	2015	2014
	(Amounts in thousands)		
Interest income:			
Senior secured debt investments	\$ 19,485	\$ 20,038	\$ 18,410
Subordinated debt investments	8,109	8,932	2,926
Total interest income	27,594	28,970	21,336
Dividend income:			
Preferred equity	1,601	1,276	570
Common equity	307	85	—
Total dividend income	1,908	1,361	570
Fee income	1,592	1,933	914
Total investment income	\$ 31,094	\$ 32,264	\$ 22,820

Comparison of Investment Income for the Years Ended December 31, 2016 and 2015:

Interest income decreased \$1.4 million primarily due to a \$1.0 million decrease in interest income and a \$0.4 million decrease in accelerated Net Loan Fees. The \$1.0 million decrease in interest income was primarily due to a \$3.6 million decrease caused by a 13% decrease in the average outstanding loan balance during 2016, offset by an increase of \$2.6 million caused by a 19 basis point increase in the weighted average yield in our portfolio during the year ended December 31, 2016. The 13% decrease in the weighted average principal balance of investments and increase in our average portfolio yield was primarily a result of the WM Asset Sale which occurred on May 28, 2015, the proceeds of which had only been partially reinvested in higher yielding assets subsequent to the WM Asset Sale. Acceleration of Net Loan Fees of \$0.6 million and \$1.0 million were included in interest income for the year ended December 31, 2016 and 2015, respectively. Acceleration of Net Loan Fees occur and are recognized on certain loans that are repaid prior to their scheduled due date.

Preferred equity cash and PIK dividend income increased approximately \$0.3 million primarily as a result of additional preferred equity securities purchased during 2015. Common equity dividend income increased by \$0.2 million primarily due to an additional common equity security purchased during the fourth quarter of 2015. Fee income decreased \$0.3 million primarily due to a decrease in prepayment fees, capital structuring fees. We recorded prepayment fees of \$0.9 million resulting from \$25.0 million of unscheduled principal payments during the year ended December 31, 2016, compared to \$1.1 million from \$47.5 million of unscheduled principal payments during 2015. We recognized capital structuring fees of \$0.4 million and \$0.7 million for the years ended December 31, 2016 and 2015, respectively, upon the closing of \$37.3 million and \$89.0 million of debt and equity investments, respectively.

Comparison of Investment Income for the Years Ended December 31, 2015 and 2014:

Interest income increased by \$7.6 million primarily due to the increase in our average portfolio yield, offset by a decrease of \$0.4 million in accelerated Net Loan Fees. Our average portfolio yield increased due to the reallocation of capital into debt investments of lower middle market portfolio companies. Acceleration of Net Loan Fees occur and are recognized on certain loans that are repaid prior to their scheduled due date.

Dividend income increased by \$0.8 million, primarily due to a full year recognition of PIK dividends in 2015 from equity investments purchased in 2014.

Fee income increased by \$1.0 million, primarily due to an increase in prepayment fees received which are earned when a portfolio company repays its debt obligation prior to maturity. We did not recognize any prepayment fees during the year ended December 31, 2014.

TABLE OF CONTENTS

Expenses

	2016	2015	2014
	(Amounts in thousands)		
Interest expense	\$ 5,302	\$ 6,959	\$ 5,578
Management fees	4,516	5,225	2,916
Incentive fee	3,333	2,627	1,253
Professional fees	1,200	1,114	1,517
Administration fee	1,304	1,637	1,245
General and administrative expenses	1,294	1,291	1,176
Total expenses	\$ 16,949	\$ 18,853	\$ 13,685

Comparison of Expenses for the Years Ended December 31, 2016 and 2015:

Interest expense decreased by \$1.7 million, primarily due to a year-over-year decrease of \$0.8 million in cash interest expense on our secured revolving line of credit with Wells Fargo Bank, N.A. (“WM Credit Facility”) and a \$1.6 million write-off of deferred debt issuance costs, both related to our permanent reduction of the WM Credit Facility and the termination of the WM Credit Facility on May 28, 2015, offset by an increase of \$0.7 million in cash interest expense incurred on our SBA debentures. Interest expense on our SBA debentures increased due to an increase in the weighted average interest rate and the weighted average debentures outstanding during the year ended December 31, 2016, as a result of additional debenture draws of \$22.6 million during the nine months ended September 30, 2015, which pooled on September 23, 2015.

Management fee expense decreased by \$0.7 million, due to a decrease in the average total assets subject to the base management fee.

Incentive fee expense increased by \$0.7 million, due to a 11% increase in pre-incentive fee net investment income compared to the prior year, which resulted in a \$0.8 million increase in the incentive fee catch-up provision (the amount of pre-incentive fee income that exceeds the hurdle rate but is less than 2.5%) and a \$0.1 million increase in the incentive fee due to the amount of pre-incentive fee income that exceeded 2.5%, partially offset by a \$0.1 million decrease in the Capital Gains Fee, which represents the reversal of the accrued Capital Gains Fee at December 31, 2015.

Administrative fee expense decreased by \$0.3 million, primarily due to a decrease in the allocable amount of incentives of our officers and their respective staffs, which OFS Services passed along to us under our administration agreement.

Comparison of Expenses for the Years Ended December 31, 2015 and 2014:

Interest expense increased by \$1.4 million due to an increase of \$2.7 million in interest expense incurred on our SBA debentures, which was due to an increase of \$99.5 million in the weighted average SBA debentures outstanding during 2015 compared to 2014. The increase in interest on our SBA debentures was offset by a decrease of approximately \$2.1 million in interest expense on the WM Credit Facility, due to a decrease of approximately \$66.9 million in weighted average borrowings on the facility in 2015 compared to 2014 driven by repayments throughout 2015, including termination of the facility on May 28, 2015. In addition, amortization and write-off of deferred financing closing costs, which is included in interest expense, increased by \$0.8 million for the year ended December 31, 2015, compared to the year ended December 31, 2014. The increase was due to increased write-offs of \$1.0 million in deferred financing closing costs in connection with permanent reductions of the WM Credit Facility, an increase of \$0.2 million in amortization on the deferred financing closing costs incurred upon the draw of SBA debentures, offset by a decrease of \$0.4 million in amortization of deferred financing closing costs on the WM Credit Facility due to a lower average balance of deferred financing closing costs in 2015 as a result of the permanent reductions made to the WM Credit Facility in 2015.

TABLE OF CONTENTS

Management fee expense of \$5.2 million for the year ended December 31, 2015, consisted of \$4.9 million of base management fee expense we incurred to OFS Advisor and \$0.3 million of loan management fee charged by MCF Capital Management, LLC, the loan manager for OFS Capital WM. Management fee expense totaled \$2.9 million for the year ended December 31, 2014, consisting of \$2.2 million of base management fee expense we incurred to OFS Advisor and \$0.7 million of loan management fee charged by MCF Capital Management, LLC. The base management fee to OFS Advisor increased by approximately \$2.7 million, of which approximately \$0.5 million was due to an increase in our average total assets during the year ended December 31, 2015 as compared to our average total assets during the year ended December 31, 2014 and approximately \$2.2 million was due to the reset of our base management fee to 0.4375% per quarter effective January 1, 2015 as compared with 0.145833% effective April 1, 2014. The decrease of approximately \$0.4 million of loan management fee charged by MCF Capital Management, LLC was due to a decreased amount of portfolio investments subject to the loan management fee during 2015 and the termination of the WM Credit Facility on May 28, 2015.

Incentive fee expense increased \$1.4 million, primarily as result of an increase in our pre-incentive fee net investment income.

Administrative fee expense increased by \$0.4 million, primarily due to an increase in the allocable amount of the salary and incentives of our officers and their respective staffs, which OFS Services passed along to us under our administration agreement.

Net Gain on Investments

	2016	2015	2014
	(Amounts in thousands)		
Senior secured debt	\$ 411	\$ (1,276)	\$ (1,783)
Subordinated debt	(2,368)	(1,106)	117
Preferred equity	(2,584)	3,351	1,334
Common equity and warrants	4,224	3,851	1,137
Net gain (loss) on investments	\$ (317)	\$ 4,820	\$ 805

Year ended December 31, 2016

We recognized net gains of \$0.4 million on senior secured debt during the year ended December 31, 2016, primarily as a result of the net positive impact of market based transactions on our fair values, offset by the net impact of portfolio company-specific performance factors, the pay-off of certain senior secured debt investments, and \$0.4 million as a result of the Valuation Methodology Change.

We recognized net losses of \$2.4 million on subordinated debt during the year ended December 31, 2016, principally due to the net impact of portfolio company-specific performance factors and \$0.5 million as a result of the Valuation Methodology Change.

We recognized net losses of \$2.6 million on preferred equity investments for the year ended December 31, 2016, primarily due to the net impact of portfolio company-specific performance factors offset by \$2.1 million as a result of the Valuation Methodology Change.

We recognized net gains of \$4.2 million on common equity and warrant investments for the year ended December 31, 2016, primarily due to the net impact of portfolio company-specific performance factors and \$0.4 million as a result of the Valuation Methodology Change. In addition, we realized gains of \$2.1 million from the redemption of an equity investment. We held this investment from the first quarter of 2014 and recognized unrealized gains of \$2.1 million and \$0.5 during the years ended December 31, 2015 and 2014, respectively. The net impact of this transaction was a recognized net loss of \$0.5 during the year ended December 31, 2016 due to the reversal of the accumulated unrealized gains in excess of the recognized realized gain.

TABLE OF CONTENTS

Year ended December 31, 2015

We recognized net losses of \$1.3 million on senior secured debt during the year ended December 31, 2015, primarily as a result of the net impact of changes to certain market loan indices, the impact of portfolio company-specific performance factors, and the settlement of a senior secured debt investment with one of our portfolio companies (Strata Pathology Services, Inc.) (“Strata Settlement”) in the fourth quarter of 2015, partially offset by the pay-off of certain senior secured debt investments, including the WM Asset Sale. In connection with the Strata Settlement, we recognized a realized loss of \$3.9 million and reversed \$3.2 million of previously recognized cumulative unrealized depreciation.

We recognized net losses of \$1.1 million on subordinated debt during the year ended December 31, 2015, principally due to the net impact of portfolio company-specific performance factors, and the impact of changes to certain market loan indices.

We recognized net gains of \$3.4 million on preferred equity investments for the year ended December 31, 2015, primarily due to the impact of portfolio company-specific performance factors, the impact of certain investments moving closer to their expected exit events, and a net gain of \$0.7 million from the sale of an investment. We realized a \$1.4 million gain on the sale of the equity investment, offset by the reversal of previously recognized unrealized gains from the date we held this investment, which included recognized unrealized gains of \$0.5 at December 31, 2014.

We recognized net gains of \$3.9 million on common equity and warrant investments for the year ended December 31, 2015, primarily due to the impact of exit-event assumptions on our valuations, the net impact of portfolio company-specific performance factors, and a gain of \$0.7 million from the redemption of a warrant investment.

Year ended December 31, 2014

We recognized net losses of \$1.8 million on senior secured debt during the year ended December 31, 2014, primarily as a result of the impact of portfolio company-specific performance factors, and a \$1.8 million net loss related to the restructuring of our debt investment in Tangible Software, Inc. in the fourth quarter of 2014 (“Tangible Restructuring”). In connection with the Tangible Restructuring, we recorded a \$2.9 million realized loss. The \$2.9 million realized loss reflected a reversal of (1) approximately \$1.1 million of unrealized losses recorded on this investment during the year ended December 31, 2013, (2) approximately \$1.7 million of additional unrealized losses recorded from January 1, 2014 through December 17, 2014, the Tangible Restructuring date, and (3) approximately \$0.1 million of additional losses we recognized on the Tangible Restructuring date, which represented the difference between the fair value of consideration we received in connection with the Tangible Restructuring and the fair value of the pre-restructured investments on the restructuring date.

We recognized net gains of \$1.3 million on preferred equity investments for the year ended December 31, 2014, primarily due to the net impact of portfolio company-specific performance factors.

We recognized net gains of \$1.1 million on common equity and warrant investments for the year ended December 31, 2014, primarily due to the net impact of portfolio company-specific performance factors. In addition we realized a loss of \$0.7 million related to the Tangible Restructuring in the fourth quarter of 2014. We recognized accumulated unrealized losses on this investment of \$0.7 million prior to 2014. There was no net loss for the year ended December 31, 2014, on this transaction.

Liquidity and Capital Resources

Sources and Uses of Cash and Cash Equivalents

We generate cash through operations from net investment income and the net liquidation of portfolio investments, and use cash in our operations in the net purchase of portfolio investments. Significant variations may exist between net investment income and cash from net investment income, primarily due to the recognition of non-cash investment income, including certain Net Loan Fee amortization, PIK interest, and PIK dividends, which generally will not be fully realized in cash until we exit the investment at a price greater than cost. As discussed in Note 4 of our March 31, 2017 consolidated financial statements included in this prospectus, we pay OFS Advisor a quarterly incentive fee with respect to our pre-incentive fee net

TABLE OF CONTENTS

investment income, which includes investment income that we may not have received in cash. In addition, we must distribute substantially all our taxable income, which approximates, but will not always equal, the cash we generate from net investment income to maintain our RIC tax treatment. Historically, our distributions resulted in a distribution in excess of taxable income, and we have no history of net taxable gains. We also obtain cash to fund investments or for general corporate activities from our revolving line of credit. These principal sources and uses of cash and liquidity are presented below (in thousands):

	Three Months Ended	
	March 31,	
	2017	2016
Cash from net investment income	\$ 2,362	\$ 1,315
Net sales and repayments of portfolio investments	28,833	11,481
Net cash provided by operating activities	\$ 31,195	\$ 12,796
Cash distributions paid	\$ (3,257)	\$ (3,280)
Net repayment of borrowings	\$ (1,500)	\$ —

At March 31, 2017, we held cash and cash equivalents of \$44.1 million, an increase of \$26.4 million from December 31, 2016.

Cash from net investment income

Net cash from net investment income increased \$1.0 million for the three months ended March 31, 2017, compared to the three months ended March 31, 2016, principally due to an increase in interest income collected, offset by a decrease in fees and cash dividends collected.

Net sales and repayments of portfolio investments

During the three months ended March 31, 2017, net sales and repayments of portfolio investments were primarily due to \$32.0 million of cash we received from principal payments on our portfolio investments. These cash receipts were offset by \$3.1 million of cash we used to purchase portfolio investments. During the three months ended March 31, 2016, sales and repayments of portfolio investments were primarily due to \$2.1 million of cash collected from the redemption of a warrant investment and \$15.9 million of cash we received from principal payments on our portfolio investments. These cash receipts were offset by \$6.5 million of cash we used to purchase portfolio investments.

SBA Debentures

As a result of the SBIC Acquisitions, SBIC I LP became our wholly-owned subsidiary effective December 4, 2013. SBIC I LP has a SBIC license that allows it to obtain leverage by issuing SBA-guaranteed debentures, subject to issuance of a capital commitment by the SBA and customary procedures. These debentures are non-recourse to OFS Capital, and bear interest payable semi-annually, and each debenture has a maturity date that is ten years following issuance. The interest rate is fixed at the first pooling date after issuance, which is March and September of each year, at a market-driven spread over U.S. Treasury Notes with ten-year maturities. SBA regulations currently limit the amount that an SBIC may borrow up to a maximum of \$150 million when it has at least \$75 million in regulatory capital, receives a leverage commitment from the SBA and has been through an examination by the SBA subsequent to licensing. For two or more SBICs under common control, the maximum amount of outstanding SBA-provided leverage cannot exceed \$350 million. As of December 31, 2016 and 2015, SBIC I LP had fully drawn the \$149.9 million of leverage commitments from the SBA.

In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

On a stand-alone basis, SBIC I LP held \$251.3 million, and \$247.5 million in assets at March 31, 2017, and December 31, 2016, respectively, which accounted for approximately 82% and 81% of the Company's total consolidated assets, respectively.

TABLE OF CONTENTS

SBIC I LP is periodically examined and audited by the SBA's staff to determine its compliance with SBA regulations. If SBIC I LP fails to comply with applicable SBA regulations, the SBA could, depending on the severity of the violation, limit or prohibit SBIC I LP's use of debentures, declare outstanding debentures immediately due and payable, and/or limit SBIC I LP from making new investments. In addition, SBIC I LP may also be limited in its ability to make distributions to OFS Capital if it does not have sufficient capital in accordance with SBA regulations. Such actions by the SBA would in turn, negatively affect OFS Capital.

PWB Credit Facility

The PWB Credit Facility is available for general corporate purposes including investment funding and is scheduled to mature on October 31, 2018. As of March 31, 2017, we had \$8.0 million outstanding at a fixed interest rate of 5% per annum, and \$16.3 million available for use under the PWB Credit Facility. In addition, we incur an unused commitment fee, payable monthly in arrears, equal to 0.50% per annum on any unused portion of the PWB Credit Facility in excess of \$15.0 million.

The PWB Credit Facility is guaranteed by OFS Capital WM and secured by all of our current and future assets, excluding assets held by SBIC I LP and our SBIC I LP and SBIC I GP partnership interests.

The BLA contains customary terms and conditions, including, without limitation, affirmative and negative covenants such as information reporting requirements, a minimum tangible net asset value, a minimum quarterly net investment income after incentive fees, and a statutory asset coverage test. The BLA also contains customary events of default, including, without limitation, nonpayment, misrepresentation of representations and warranties in a material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change in investment advisor, and the occurrence of a material adverse change in our financial condition. As of March 31, 2017, the Company was in compliance with the applicable covenants.

Other Liquidity Matters

We expect to fund the growth of our investment portfolio utilizing borrowings under SBA debentures, follow-on equity offerings, and issuances of senior securities or future borrowings to the extent permitted by the 1940 Act. We cannot assure stockholders that our plans to raise capital will be successful. In addition, we intend to distribute to our stockholders substantially all of our taxable income in order to satisfy the requirements applicable to RICs under Subchapter M of the Code. Consequently, we may not have the funds or the ability to fund new investments or make additional investments in our portfolio companies. The illiquidity of our portfolio investments may make it difficult for us to sell these investments when desired and, if we are required to sell these investments, we may realize significantly less than their recorded value.

In addition, as a BDC, we generally will be required to meet a coverage ratio of total assets, less liabilities and indebtedness not represented by senior securities (including SBIC I LP's SBA-guaranteed debt), to total senior securities, which include all of our borrowings (excluding SBA-guaranteed debt) and any outstanding preferred stock (of which we had none at March 31, 2017), of at least 200%. We received an exemptive order from the SEC to permit us to exclude the debt of SBIC I LP guaranteed by the SBA from the definition of Senior Securities in the statutory 200% asset coverage ratio under the 1940 Act. This requirement limits the amount that we may borrow. To fund growth in our investment portfolio in the future, we anticipate needing to raise additional capital from various sources, including the equity markets and the securitization or other debt-related markets, which may or may not be available on favorable terms, if at all.

TABLE OF CONTENTS

Contractual Obligations and Off-Balance Sheet Arrangements

The following table shows our contractual obligations as of March 31, 2017 (in thousands):

	Payments due by period				
	Total	Less than year	1 – 3 years(2)	3 – 5 years	After 5 years(2)
Contractual Obligations(1)					
PWB Credit Facility	\$ 8,000	\$ —	\$ 8,000	\$ —	\$ —
SBA Debentures	149,880	—	—	—	149,880
Total	\$ 157,880	\$ —	\$ 8,000	\$ —	\$ 149,880

(1)

Excludes commitments to extend credit to our portfolio companies.

(2)

The PWB Credit Facility is scheduled to mature on October 31, 2018. The SBA debentures are scheduled to mature between September 2022 and 2025.

We have entered into contracts with third parties under which we have material future commitments—the Investment Advisory Agreement, pursuant to which OFS Advisor has agreed to serve as our investment adviser, and the Administration Agreement, pursuant to which OFS Services has agreed to furnish us with the facilities and administrative services necessary to conduct our day-to-day operations.

We may become a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. These instruments may include commitments to extend credit and involve, to varying degrees, elements of liquidity and credit risk in excess of the amount recognized in the balance sheet. We had \$2.1 million of total unfunded commitments to three portfolio companies at March 31, 2017.

Distributions

We are taxed as a RIC under the Code. Generally, a RIC is entitled to deduct dividends it pays to its stockholders from its income to determine “taxable income.” Taxable income includes our taxable interest, dividend and fee income, and taxable net capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation, as gains or losses are not included in taxable income until they are realized. In addition, gains realized for financial reporting purposes may differ from gains included in taxable income as a result of our election to recognize gains using installment sale treatment, which generally results in the deferment of gains for tax purposes until notes or other amounts, including amounts held in escrow, received as consideration from the sale of investments are collected in cash. Taxable income includes non-cash income, such as changes in accrued and reinvested interest and dividends, which includes contractual PIK interest, and the amortization of discounts and fees. Cash collections of income resulting from contractual PIK interest and dividends or the amortization of discounts and fees generally occur upon the repayment of the loans or debt securities that include such items. Non-cash taxable income is reduced by non-cash expenses, such as realized losses and depreciation, and amortization expense. Our board of directors maintains a variable dividend policy with the objective of distributing four quarterly distributions in an amount not less than 90-100% of our taxable quarterly income or potential annual income for a particular year. In addition, at the end of the year, we may also pay an additional special dividend, or fifth dividend, such that we may distribute approximately all of our annual taxable income in the year it was earned, while maintaining the option to spill over our excess taxable income to a following year. Each year, a statement on Form 1099-DIV identifying the source of the distribution is mailed to the Company’s stockholders. Generally, a RIC is entitled to deduct dividends it pays to its stockholders from its income to determine “taxable income.” Taxable income

includes our taxable interest, dividend and fee income, and taxable net capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation, as gains or losses are not

TABLE OF CONTENTS

included in taxable income until they are realized. In addition, gains realized for financial reporting purposes may differ from gains included in taxable income as a result of our election to recognize gains using installment sale treatment, which generally results in the deferment of gains for tax purposes until notes or other amounts, including amounts held in escrow, received as consideration from the sale of investments are collected in cash. Taxable income includes non-cash income, such as changes in accrued and reinvested interest and dividends, which includes contractual PIK interest, and the amortization of discounts and fees. Cash collections of income resulting from contractual PIK interest and dividends or the amortization of discounts and fees generally occur upon the repayment of the loans or debt securities that include such items. Non-cash taxable income is reduced by non-cash expenses, such as realized losses and depreciation, and amortization expense. If the tax characteristics of the distributions paid during fiscal 2017 were determined as of March 31, 2017, we estimate that approximately \$0.08 per share would represent a return of capital.

Quantitative and Qualitative Disclosures About Market Risk

We are subject to financial market risks, including changes in interest rates. As of March 31, 2017, 67% of our debt investments bore interest at floating interest rates and 33% of our debt investments bore fixed interest rates, at fair value. The interest rates on our debt investments bearing floating interest rates are usually based on a floating LIBOR, and the debt investments typically contain interest rate re-set provisions that adjust applicable interest rates to current rates on a periodic basis. A significant portion of the debt investments bearing floating interest rates in our portfolio as of March 31, 2017 had interest rate floors, which have effectively converted those debt investments to fixed rate debt investments in the current interest rate environment.

Our outstanding SBA debentures and PWB Credit Facility bear interest at a fixed rate. We expect that other credit facilities into which we may enter in the future may have floating interest rate provisions.

Assuming that the consolidated balance sheet as of March 31, 2017 were to remain constant and that we took no actions to alter our existing interest rate sensitivity, the following table shows the annualized impact of hypothetical base rate changes in interest rates (in thousands):

Basis point increase(1)	Interest income	Interest expense	Net increase (decrease)
50	\$ 675	\$ —	\$ 675
100	1,352	—	1,352
150	2,101	—	2,101
200	2,853	—	2,853
250	3,605	—	3,605

(1)

A decline in interest rates would not have a material impact on our net investment income.

Although we believe that the foregoing analysis is indicative of our sensitivity to interest rate changes as of March 31, 2017 it does not adjust for potential changes in the credit market, credit quality, size and composition of the assets in our portfolio, and other business developments, including borrowings under our credit facility, that could affect net increase in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the statement above.

We are subject to financial market risks, including changes in interest rates. Changes in interest rates affect both our cost of funding and the valuation of our investment portfolio. Our risk management systems and procedures are designed to identify and analyze our risk, to set appropriate policies and limits and to continually monitor these risks and limits by means of reliable administrative and information systems and other policies and programs. Our investment portfolio and investment income may be affected by changes in various interest rates, including LIBOR and prime rates.

TABLE OF CONTENTS

Management's Report on Internal Control Over Financial Reporting

Our management, including our Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with U.S. GAAP. Internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that the receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Our management (with the supervision and participation of our Chief Executive Officer and Chief Financial Officer) conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control — Integrated Framework issued in 2013 by the Committee of Sponsoring Organizations of the Treadway Commission.

A material weakness is a deficiency, or combination of control deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the registrant's annual or interim financial statements will not be prevented or detected on a timely basis. As a result of our evaluation of our internal control over financial reporting for the year ended December 31, 2016, we have concluded that our internal control over financial reporting was not effective as of December 31, 2016, due to a material weakness in internal control over financial reporting related to the design and effectiveness of controls over certain key assumptions and underlying data used in the Company's investment valuations.

Remediation efforts

We are currently in the process of remediating the material weakness in our internal control over financial reporting as described above and are taking the necessary steps that we believe will address the underlying causes of the material weakness. Accordingly, we believe that the unaudited consolidated financial statements included in this prospectus do fairly present, in all material respects, our financial position, results of operations and cash flows for the periods presented.

We have completed the development and formal documentation of our policies and procedures relating to our internal control over financial reporting, but we have not completed the necessary testing of these formalized controls. While management believes the necessary steps have been taken, the identified material weakness in internal control will not be considered fully remediated until sufficient time has elapsed to provide evidence that can be tested to validate that the new controls have been implemented and are operating effectively. We implemented the following remediation steps to address the material weakness discussed above and to improve its internal control over financial reporting:

- We changed the primary method used to value certain investments, primarily equity investments, from the discounted cash flow method to the market approach as of December 31, 2016. The market approach contains a lesser number of Level 3 inputs and generally requires less complex judgment.

- We have designed and implemented controls and procedures to objectively validate and document key inputs and assumptions used in developing our fair value estimates.

Changes in Internal Control over Financial Reporting

Other than as described above, there have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

71

TABLE OF CONTENTS

THE COMPANY

Overview

We are an externally managed, closed-end, non-diversified management investment company and have elected to be treated as a BDC under the 1940 Act. Our investment objective is to provide our stockholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments. Our investment strategy focuses primarily on investments in middle-market companies in the United States. We use the term “middle-market” to refer to companies that may exhibit one or more of the following characteristics: number of employees between 150 and 2,000; revenues between \$15 million and \$300 million; EBITDA between \$3 million and \$50 million; generally, private companies owned by private equity firms or owners/operators; and enterprise value between \$10 million and \$500 million. For additional information about how we define the middle-market, see “General — Investment Criteria/Guidelines.”

As of March 31, 2017, we had debt and equity investments in 38 portfolio companies with an aggregate fair value of \$258.3 million. As of March 31, 2017, 64% of our investment portfolio was comprised of senior secured loans, 20% of subordinated loans and 16% of equity investments, at fair value.

While our investment strategy focuses primarily on middle-market companies in the United States, including senior secured loans, which includes first-lien, second-lien and unitranche loans as well as subordinated loans and, to a lesser extent, warrants and other equity securities, we also may invest up to 30% of our portfolio in opportunistic investments of non-eligible portfolio companies. Specifically, as part of this 30% basket, we may consider investments in investment funds that are operating pursuant to certain exceptions to the 1940 Act and in advisers to similar investment funds, as well as in debt of middle-market companies located outside of the United States and debt and equity of public companies that do not meet the definition of eligible portfolio companies because their market capitalization of publicly traded equity securities exceeds the levels provided for in the 1940 Act.

Our investment strategy includes SBIC I LP, a licensee under the U.S. Small Business Administration (“SBA”) SBIC program. The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA leverage funding is subject to SBIC I LP’s payment of certain fees to the SBA, and the ability of SBIC I LP to draw on the leverage commitment is subject to its compliance with SBA regulations and policies, including an audit by the SBA. For additional information regarding the regulation of SBIC I LP, see “— Regulation — Small Business Investment Company Regulation”.

In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

On a stand-alone basis, SBIC I LP held approximately \$251.3 million, \$247.5 million, and \$245.1 million in assets at March 31, 2017, December 31, 2016 and 2015, respectively, which accounted for approximately 82%, 81% and 83% of our total consolidated assets at March 31, 2017, December 31, 2016 and 2015, respectively.

Our investment activities are managed by OFS Capital Management, LLC and supervised by our board of directors, a majority of whom are independent of us, OFS Advisor and its affiliates. Under the Investment Advisory Agreement we have agreed to pay OFS Advisor an annual base management fee based on the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) as well as an incentive fee based on our investment performance. We have elected to exclude from the base management fee calculation any base management fee that would be owed in respect of the intangible asset and goodwill resulting from our acquisitions of the remaining ownership interests in SBIC I LP and SBIC I GP on December 4, 2013. OFS Advisor also serves as the investment adviser to CLO funds and other assets, including Hancock Park Corporate Income, Inc., a non-traded BDC with an investment strategy similar to the Company’s. OFS Advisor will seek to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy.

TABLE OF CONTENTS

We have also entered into an Administration Agreement with OFS Capital Services, LLC. Under our Administration Agreement, we have agreed to reimburse OFS Services for our allocable portion (subject to the review and approval of our independent directors) of overhead and other expenses incurred by OFS Services in performing its obligations under the Administration Agreement. See “Management and Other Agreements — Administration Agreement.”

As a BDC, we must not acquire any assets other than “qualifying assets” specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Qualifying assets include investments in “eligible portfolio companies.” Under the relevant SEC rules, the term “eligible portfolio company” includes all private companies, companies whose securities are not listed on a national securities exchange, and certain public companies that have listed their securities on a national securities exchange and have a market capitalization of less than \$250 million, in each case organized in the United States. We are permitted to borrow money from time to time within the levels permitted by the 1940 Act (which generally allows us to incur leverage for up to 50% of our asset base). We may borrow money when the terms and conditions available are favorable to do so and are aligned with our investment strategy and portfolio composition. The use of borrowed funds or the proceeds of preferred stock to make investments would have its own specific benefits and risks, and all of the costs of borrowing funds or issuing preferred stock would be borne by holders of our common stock. We have elected to be treated for tax purposes as a RIC under Subchapter M of the Code. To continue to qualify as a RIC, we must, among other things, meet certain source-of-income and assets diversification requirements. Pursuant to these elections, we generally will not have to pay corporate-level taxes on any income we distribute to our stockholders.

The 1940 Act generally prohibits BDCs from making certain negotiated co-investments with certain affiliates absent an order from the SEC permitting the BDC to do so. On October 12, 2016, we received exemptive relief from the SEC to permit us to co-invest in portfolio companies with certain other funds managed by OFS Advisor (“Affiliated Funds”) in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors, subject to compliance with certain conditions (the “Order”). Pursuant to the Order, we are generally permitted to co-invest with Affiliated Funds if a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

About OFS and Our Advisor

OFS (which refers to the collective activities and operations of OFSAM and its subsidiaries and certain affiliates) is an established investment platform focused on meeting the capital needs of middle-market companies.

As of March 31, 2017, OFS had 43 full-time employees. OFS is headquartered in Chicago, Illinois and also has offices in New York, New York and Los Angeles, California.

Our investment activities are managed by OFS Advisor, our investment adviser. OFS Advisor is responsible for sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. OFS Advisor is a registered investment adviser under the Investment Advisers Act of 1940 (the “Advisers Act”) and a subsidiary of OFSAM., our parent company prior to the completion of our initial public offering (“IPO”).

Our relationship with OFS Advisor is governed by and dependent on the Investment Advisory Agreement and may be subject to conflicts of interest. OFS Advisor provides us with advisory services in exchange for a base management fee and incentive fee; see “Management and Other Agreements — Investment Advisory Agreement.” The base management fee is based on our total assets (other than cash

TABLE OF CONTENTS

and cash equivalents, and the intangible asset and goodwill resulting from the SBIC Acquisitions; but including assets purchased with borrowed amounts, and including assets owned by any consolidated entity) and, therefore, OFS Advisor will benefit when we incur debt or use leverage. Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interest associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor's services and fees as well as its portfolio management decisions and portfolio performance.

OFS Advisor has entered into the Staffing Agreement with OFSC, a wholly-owned subsidiary of OFSAM. Under the Staffing Agreement, OFSC makes experienced investment professionals available to OFS Advisor and provides access to the senior investment personnel of OFS and its affiliates. The Staffing Agreement provides OFS Advisor with access to deal flow generated by OFS and its affiliates in the ordinary course of their businesses and commits the members of OFS Advisor's investment committee to serve in that capacity. As our investment adviser, OFS Advisor is obligated to allocate investment opportunities among us and any other clients fairly and equitably over time in accordance with its allocation policy.

OFS Advisor capitalizes on the deal origination and sourcing, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of OFS's professionals. The senior management team of OFS, including Bilal Rashid, Jeff Cerny and Mark Hauser, provides services to OFS Advisor. These managers have developed a broad network of contacts within the investment community, averaging over 20 years of experience investing in debt and equity securities of middle-market companies. In addition, these managers have gained extensive experience investing in assets that will constitute our primary focus and have expertise in investing across all levels of the capital structure of middle-market companies. See "Portfolio Management" for additional information regarding our portfolio managers.

Our Administrator

OFS Services, an affiliate of OFS Advisor, provides the administrative services necessary for us to operate. OFS Services furnishes us with office facilities and equipment, necessary software licenses and subscriptions and clerical, bookkeeping and recordkeeping services at such facilities. OFS Services oversees our financial reporting as well as prepares our reports to stockholders and all other reports and materials required to be filed with the SEC or any other regulatory authority. OFS Services also manages the determination and publication of our net asset value and the preparation and filing of our tax returns and generally monitors the payment of our expenses and the performance of administrative and professional services rendered to us by others. OFS Services may retain third parties to assist in providing administrative services to us. To the extent that OFS Services outsources any of its functions, we will pay the fees associated with such functions at cost, on a direct basis.

Market Opportunity

Large Target Market. According to the U.S. Census Bureau in its 2012 economic census, there were approximately 197,000 companies in the United States with annual revenues between \$10 million and \$2.5 billion, compared with approximately 1,300 companies with revenues greater than \$2.5 billion. We believe that these middle-market companies represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have historically constituted the vast bulk of OFS's portfolio companies since its inception, and constituted the vast bulk of our portfolio as of March 31, 2017. We believe that this market segment will continue to produce significant investment opportunities for us.

Specialized Lending Requirements with High Barriers to Entry. We believe that several factors render many U.S. financial institutions ill-suited to lend to U.S. middle-market companies. For example, based on the experience of our management team, lending to private middle-market companies in the United States (a) is generally more labor-intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information for such companies, (b) requires due diligence and underwriting practices consistent with the demands and economic limitations of the middle-market and

TABLE OF CONTENTS

(c) may also require more extensive ongoing monitoring by the lender. As a result, middle-market companies historically have been served by a limited segment of the lending community. As a result of the unique challenges facing lenders to middle-market companies, there are high barriers to entry that a new lender must overcome. Robust Demand for Debt Capital. We believe that private equity firms have significant committed but uncalled capital, a large portion of which is still available for investment in the United States. Subject to market conditions, we expect the large amount of unfunded buyout commitments will drive demand for leveraged buyouts over the next several years, which should, in turn, create leveraged lending opportunities for us.

Competitive Strengths and Core Competencies

Deep Management Team Experienced in All Phases of Investment Cycle and Across All Levels of the Capital Structure. We are managed by OFS Advisor, which has access through the Staffing Agreement with OFSC to the resources and expertise of OFS's investment professionals. As of March 31, 2017, OFS's credit and investment professionals (including all investment committee members) employed by OFSC had an average of over 15 years of investment experience with strong institutional backgrounds.

Significant Investment Capacity. The net proceeds of equity and debt offerings and borrowing capacity under our credit facilities, will provide us with a substantial amount of capital available for deployment into new investment opportunities in our targeted asset class.

Scalable Infrastructure Supporting the Entire Investment Cycle. We believe that our loan acquisition, origination and sourcing, underwriting, administration and management platform is highly scalable (that is, it can be expanded on a cost efficient basis within a timeframe that meets the demands of business growth). Our platform extends beyond origination and sourcing and includes a regimented credit monitoring system. We believe that our careful approach, which involves ongoing review and analysis by an experienced team of professionals, should enable us to identify problems early and to assist borrowers before they face difficult liquidity constraints.

Extensive Loan Sourcing Capabilities. OFS Advisor gives us access to the deal flow of OFS. We believe OFS's 20-year history as a middle-market lending platform and its market position make it a leading lender to many sponsors and other deal sources, especially in the currently under-served lending environment, and we have extensive relationships with potential borrowers and other lenders.

Structuring with a High Level of Service and Operational Orientation. We provide client-specific and creative financing structures to our portfolio companies. Based on our experience in lending to and investing in middle-market companies, we believe that the middle-market companies we target, as well as sponsor groups we may pursue, require a higher level of service, creativity and knowledge than has historically been provided by other service providers more accustomed to participating in commodity-like loan transactions.

Rigorous Credit Analysis and Approval Procedures. OFS Advisor utilizes the established, disciplined investment process of OFS for reviewing lending opportunities, structuring transactions and monitoring investments. Using OFS's disciplined approach to lending, OFS Advisor seeks to minimize credit losses through effective underwriting, comprehensive due diligence investigations, structuring and, where appropriate, the implementation of restrictive debt covenants.

Investment Criteria/Guidelines

Our investment objective is to generate current income and capital appreciation by investing primarily in middle-market companies in the United States. We focus on investments in senior secured loans, including first lien, second lien, and unitranche loans, as well as subordinated loans and, to a lesser extent, warrants and other equity securities. In particular, we believe that structured equity debt investments (i.e., typically senior secured unitranche loans, often with warrant coverage, and often in companies with no financial sponsor) represent a strong relative value opportunity offering the borrower the convenience of dealing with one lender, which may result in a higher blended rate of interest to us than we might expect to receive under a traditional multi-tranche structure. We expect that our investments in the equity securities of

TABLE OF CONTENTS

portfolio companies, such as warrants, preferred stock, common stock and other equity interests, will principally be made in conjunction with our debt investments. Generally, we do not expect to make investments in companies or securities that OFS Advisor determines to be distressed investments (such as discounted debt instruments that have either experienced a default or have a significant potential for default), other than follow-on investments in portfolio companies of ours. We intend to continue to generate strong risk-adjusted net returns by assembling a diversified portfolio of investments across a broad range of industries.

We target U.S. middle-market companies through OFS's access to a network of financial institutions, private equity sponsors, investment banks, consultants and attorneys, and our proprietary database of borrowers developed over OFS's more than 20 years in lending to middle-market companies. A typical targeted borrower will exhibit certain of the following characteristics:

- number of employees between 150 and 2,000;
- revenues between \$15 million and \$300 million;
- annual EBITDA between \$3 million and \$50 million;
- generally, private companies owned by private equity firms or owners/operators;
- enterprise value between \$10 million and \$500 million;
- effective and experienced management teams;
- defensible market share;
- solid historical financial performance, including a steady stream of cash flow;
- high degree of recurring revenue;
- diversity of customers, markets, products and geography; and
- differentiated products or services.

While we believe that the characteristics listed above are important in identifying and investing in prospective portfolio companies, not all of these criteria will be met by each prospective portfolio company.

Due Diligence and Investment Process Overview

We employ a thorough and disciplined underwriting and due diligence process that is conducted in accordance with established credit policies and procedures, and that is focused on investment recovery. Our process involves a comprehensive analysis of a prospective portfolio company's market, operational, financial, and legal position, as well as its future prospects. In addition to our own analysis, we may use the services of third parties for environmental

reviews, quality of earnings reports, industry surveys, background checks on key managers, and insurance reviews. We seek to invest in companies that have experienced and incentivized management teams, that have stable and predictable cash flows, and that have defensible market positions. We underwrite our investments with the expectation that we will hold them for a number of years, and we structure and document our investments accordingly.

Our due diligence and underwriting process typically addresses the following elements (although certain elements may not be included in every due diligence undertaking):

- **Prospective Portfolio Company Characteristics:** focusing on primary drivers of the company's revenues and cash flows, including its key products and services; customer and supplier concentrations, and contractual relationships; depth, breadth, and quality of company management, as well as the extent to which the management team is appropriately compensated with equity incentives; and any regulatory, labor, or litigation matters impacting the company.

- **Industry and Competitive Overview:** including industry size and the company's position within it; growth potential and barriers to entry; governmental, regulatory, or technological issues potentially affecting the industry; and cyclical or seasonality risks associated with the industry.

TABLE OF CONTENTS

- Financial Analysis: involving an understanding of the company's historical financial results, focusing on actual operating trends experienced over time, in order to forecast future performance, including in various sensitized performance scenarios; attention to projected cash flows, debt service coverage, and leverage multiples under such scenarios; and an assessment of enterprise valuations and debt repayment/investment recovery prospects given such sensitized performance scenarios.

- Investment Documentation: focusing on obtaining the best legal protections available to us given our position within the capital structure, including, as appropriate, financial covenants; collateral liens and stock pledges; review of loan documents of other of the prospective portfolio company's creditors; and negotiation of inter-creditor agreements.

Portfolio Review/Risk Monitoring

As of March 31, 2017, we had debt investments in 36 portfolio companies, totaling \$217.3 million at fair value, of which \$3.8 million, \$175.8 million, \$28.4 million, and \$9.3 million were rated 2, 3, 4, and 5, respectively. We had no investments rated 6 or 7 as of December 31, 2016.

We view active portfolio monitoring as a vital part of our investment process, and we benefit from a portfolio management system developed by OFS that includes daily, weekly, monthly, and quarterly components, and that involves comprehensive review of the performance of each of our portfolio companies. As part of the portfolio management process, OFS Advisor performs ongoing risk assessment on each of our investments and assigns each debt investment a credit rating based on OFS's internal ratings scale.

We categorize debt investments into the following risk categories based on relevant information about the ability of borrowers to service their debt:

1 (Low Risk) — The debt investment has mostly satisfactory asset quality and liquidity, as well as good leverage capacity. It maintains predictable and strong cash flows from operations. The trends and outlook for the portfolio company's operations, balance sheet, and industry are neutral to favorable. Collateral, if appropriate, has maintained value and would be capable of being liquidated on a timely basis. Overall a debt investment with a 1 risk rating is considered to be of investment grade quality.

2 (Below Average Risk) — The debt investment has acceptable asset quality, moderate excess liquidity, and modest leverage capacity. It could have some financial/non-financial weaknesses which are offset by strengths; however, the credit demonstrates an ample current cash flow from operations. The trends and outlook for the portfolio company's operations, balance sheet, and industry are generally positive or neutral to somewhat negative. Collateral, if appropriate, has maintained value and would be capable of being liquidated successfully on a timely basis.

3 (Average) — The debt investment has acceptable asset quality, somewhat strained liquidity, and minimal leverage capacity. It is at times characterized by acceptable cash flows from operations. Under adverse market conditions, the debt service could pose difficulties for the borrower. The trends and conditions of the portfolio company's operations and balance sheet are neutral to slightly negative.

4 (Special Mention) — The debt investment has not lost, and is not expected to lose, principal or interest but it possesses credit deficiencies or potential weaknesses which deserve management's close and continued attention. The portfolio company's operations and/or balance sheet have demonstrated an adverse trend or deterioration which, while serious, has not reached the point where the liquidation of debt is jeopardized. These weaknesses are generally considered correctable by the borrower in the normal course of business but may weaken the asset or inadequately protect our credit position if not checked or corrected.

5 (Substandard) — The debt investment is protected inadequately by the current enterprise value or paying capacity of the obligor or of the collateral, if any. The portfolio company has well-defined weaknesses based upon objective evidence, such as recurring or significant decreases in revenues and cash flows. These assets are characterized by the possibility that we may sustain loss if the deficiencies are not corrected. The possibility that liquidation would not be timely (e.g., bankruptcy or foreclosure) requires a Substandard classification even if there is little likelihood of loss.

TABLE OF CONTENTS

6 (Doubtful) — The debt investment has all the weaknesses inherent in those classified as Substandard, with the additional factor that the weaknesses are pronounced to the point that collection or liquidation in full, on the basis of currently existing facts, conditions and values, is deemed uncertain. The possibility of loss on a Doubtful asset is high but, because of certain important and reasonably specific pending factors which may strengthen the asset, its classification as an estimated loss is deferred until its more exact status can be determined.

7 (Loss) — The debt investment is considered almost fully uncollectible and of such little value that its continuance as an asset is not warranted. It is generally a credit that is no longer supported by an operating company, a credit where the majority of our assets have been liquidated or sold and a few assets remain to be sold over many months or even years, or a credit where the remaining collections are expected to be minimal.

Investment Committees

The Advisor Investment Committees are responsible for the overall asset allocation decisions and the evaluation and approval of investments of OFS Advisor's advisory clients.

The Middle-Market Investment Committee, which is comprised of Richard Ressler (Chairman), Jeffrey Cerny, Mark Hauser and Bilal Rashid, along with the investment committee for SBIC I LP (the "SBIC Investment Committee"), which is comprised of Mark Hauser and Bilal Rashid, is responsible for the evaluation and approval of all the investments made by us directly or through our wholly-owned subsidiaries, as appropriate.

The process employed by the Advisor Investment Committees, including the Middle-Market Investment Committee, and the SBIC Investment Committee is intended to bring the diverse experience and perspectives of the committees' members to the investment process. The Middle-Market Investment Committee and SBIC Investment Committee serve to provide investment consistency and adherence to our core investment philosophy and policies. The Middle-Market Investment Committee and SBIC Investment Committee also determine appropriate investment sizing and implement ongoing monitoring requirements of our investments.

In certain instances, management may seek the approval of our board of directors prior to the making of an investment. In addition to reviewing investments, the meetings of the Middle-Market Investment Committee and SBIC Investment Committee, where applicable, serve as a forum to discuss credit views and outlooks. Potential transactions and deal flow are reviewed on a regular basis. Members of the investment team are encouraged to share information and views on credits with members of the Middle-Market Investment Committee and SBIC Investment Committee, where applicable, early in their analysis. We believe this process improves the quality of the analysis and assists the deal team members in working efficiently.

Structure of Investments

We anticipate that our loan portfolio will continue to contain investments of the following types with the following typical characteristics:

Senior Secured First-Lien Loans. First-lien senior secured loans comprise, and will continue to comprise, a significant portion of our investment portfolio. First-lien senior secured loans obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans (in certain cases, subject to a payment waterfall). The collateral takes the form of first-priority liens on specified assets of the portfolio company borrower and, typically, first-priority pledges of the ownership interests in the borrower. Our first lien loans may provide for moderate loan amortization in the early years of the loan, with the majority of the amortization deferred until loan maturity. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in this prospectus.

Senior Secured Unitranche Loans. Unitranche loans are loans that combine both senior and subordinated debt into one loan under which the borrower pays a single blended interest rate that is intended to reflect the relative risk of the secured and unsecured components. We typically structure our unitranche loans as senior secured loans. We obtain security interests in the assets of these portfolio

TABLE OF CONTENTS

companies as collateral in support of the repayment of these loans. This collateral takes the form of first-priority liens on the assets of a portfolio company and, typically, first-priority pledges of the ownership interests in the company. We believe that unitranche lending represents a significant growth opportunity for us, offering the borrower the convenience of dealing with one lender, which may result in a higher blended rate of interest to us than we might realize in a traditional multi-tranche structure. Unitranche loans typically provide for moderate loan amortization in the initial years of the facility, with the majority of the amortization deferred until loan maturity. Unitranche loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. In many cases, we will be the sole lender, or we, together with our affiliates, will be the sole lender, of unitranche loans, which can afford us additional influence with a borrower in terms of monitoring and, if necessary, remediation in the event of underperformance. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in this prospectus.

Senior Secured Second-lien Loans. Second-lien senior secured loans obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of such loans. This collateral typically takes the form of second-priority liens on the assets of a portfolio company, and we may enter into an inter-creditor agreement with the holders of the portfolio company's first-lien senior secured debt. These loans typically provide for no contractual loan amortization in the initial years of the facility, with all amortization deferred until loan maturity. These loans are categorized as Senior Secured Loans in our consolidated schedule of investments included in this prospectus.

Subordinated ("Mezzanine") Loans. These investments are typically structured as unsecured, subordinated loans that typically provide for relatively high, fixed interest rates that provide us with significant current interest income. These loans typically will have interest-only payments (often representing a combination of cash pay and payment-in-kind ("PIK") interest) in the early years, with amortization of principal deferred to maturity. Mezzanine loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. Mezzanine investments are generally more volatile than secured loans and may involve a greater risk of loss of principal. Mezzanine loans often include a PIK feature (meaning a feature allowing for the payment of interest in the form of additional principal amount of the loan instead of in cash), which effectively operates as negative amortization of loan principal, thereby increasing credit risk exposure over the life of the loan. These loans are categorized as Subordinated Loans in our consolidated schedule of investments included in this prospectus.

Equity Securities. Equity securities typically consist of either a direct minority equity investment in common or membership/partnership interests or preferred stock of a portfolio company, and are typically not control-oriented investments. Our preferred equity investments typically contain a fix dividend yield based on the par value of the equity security. Preferred equity dividends may be paid in cash at a stipulated date, usually quarterly and are participating and/or cumulative. We may structure such equity investments to include provisions protecting our rights as a minority-interest holder, as well as a "put," or right to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and "piggyback" registration rights, which grants us the right to register our equity interest when either the portfolio company or another investor in the portfolio company initiates a registration. Our equity investments typically are made in connection with debt investments to the same portfolio companies. These securities are categorized as a Preferred Equity or Common Equity in our consolidated schedule of investments included in this prospectus.

Warrants. In some cases, we may receive nominally priced warrants to buy a minority equity interest in the portfolio company in connection with a loan. As a result, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure such warrants to include provisions protecting our rights as a minority-interest holder, as well as a put to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and "piggyback" registration rights. These securities are categorized as a Warrant in our consolidated schedule of investments included in this prospectus.

TABLE OF CONTENTS

General Structuring Considerations. We tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its operating results. We seek to limit the downside potential of our investments by:

- selecting investments that we believe have a very low probability of loss;
- requiring a total return on our investments (including both interest and potential equity appreciation) that we believe will compensate us appropriately for credit risk; and
- negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with the preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or rights to a seat on the board of directors under some circumstances.

We expect to hold most of our investments to maturity or repayment, but we may sell some of our investments earlier if a liquidity event occurs, such as a sale, recapitalization or worsening of the credit quality of the portfolio company.

Investments

We pursue an investment strategy focused primarily on investments in middle-market companies in the United States. We focus on investments in loans, in which OFS Advisor's investment professionals have expertise, including investments in first-lien, unitranche, second-lien, and mezzanine loans and, to a lesser extent, on warrants and other equity securities. We seek to create a diverse portfolio by making investments in the securities of middle-market companies that we expect to range generally from \$3.0 million to \$25.0 million each, although we expect this investment size will vary proportionately with the size of our capital base.

Competition

Our primary competitors include public and private funds, other BDCs, commercial and investment banks, commercial finance companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical, and marketing resources than we do. Some competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Further, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC, or to the distribution and other requirements we must satisfy to maintain our RIC status.

We expect to continue to use the expertise of the investment professionals of OFS and its affiliates to which we have access, to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we expect that the relationships of the senior members of OFS and its affiliates will enable us to learn about, and compete effectively for, financing opportunities with attractive middle-market companies in the industries in which we seek to invest. For additional information concerning the competitive risks we face, see "Risk Factors — Risks Related to our Business and Structure — We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses" in this prospectus.

Administration

We do not have any direct employees, and our day-to-day investment operations are managed by OFS Advisor. We have a chief executive officer, chief financial officer, chief compliance officer, chief accounting officer, and corporate secretary and, to the extent necessary, our board of directors may elect to appoint

TABLE OF CONTENTS

additional officers going forward. Our officers are employees of OFSC, an affiliate of OFS Advisor, and a portion of the compensation paid to our officers are paid by us pursuant to the Administration Agreement. All of our executive officers are also officers of OFS Advisor.

Properties

We do not own or lease any real estate or other physical properties material to our operation. Our headquarters are located at 10 S. Wacker Drive, Suite 2500, Chicago, IL, 60606, and are provided by OFS Services pursuant to the Administration Agreement. Additional operations are conducted from offices in New York, New York and Los Angeles, California, which are also provided by OFS Services pursuant to the Administration Agreement. We believe that our office facilities are suitable and adequate for our business as we contemplate continuing to conduct it.

Legal Proceedings

We, OFS Advisor and OFS Services, are not currently subject to any material pending legal proceedings threatened against us as of March 31, 2017. From time to time, we may be a party to certain legal proceedings incidental to the normal course of our business including the enforcement of our rights under contracts with our portfolio companies. Furthermore, third parties may try to seek to impose liability on us in connection with the activities of our portfolio companies. While the outcome of these legal proceedings cannot be predicted with certainty, we do not expect that these proceedings will have a material effect upon our business, financial condition, results of operations or cash flows.

TABLE OF CONTENTS

SENIOR SECURITIES

Information about our senior securities (including preferred stock, debt securities and other indebtedness) is shown in the following tables for the years ended December 31, 2016, 2015, 2014, 2013 and 2012, and as of March 31, 2017. The report of our independent registered public accounting firm, BDO USA, LLP, on the senior securities table as of December 31, 2016, 2015, and 2014 is attached as an exhibit to the registration statement of which this prospectus is a part. Information as of December 31, 2013 and 2012 was audited by our previous independent registered public accounting firm. The “ — ” indicates information that the SEC expressly does not require to be disclosed for certain types of senior securities.

(1)

Total amount of each class of senior securities outstanding at the end of the period presented.

(2)

The asset coverage ratio for a class of senior securities representing indebtedness is calculated as our consolidated total assets, less all liabilities and indebtedness not represented by senior securities, divided by total senior securities representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the “Asset Coverage Per Unit.”

(3)

The amount to which such class of senior security would be entitled upon the involuntary liquidation of the issuer in preference to any security junior to it. The “ — ” indicates information which the Securities and Exchange Commission expressly does not require to be disclosed for certain types of senior securities.

(4)

Not applicable because senior securities are not registered for public trading.

(5)

The Small Business Administration Debentures are not subject to the asset coverage requirements of the 1940 Act as a result of exemptive relief granted to us by the SEC.

(6)

The WM Credit Facility was terminated on May 28, 2015.

(1)
Equity ownership may be held in shares or units of companies affiliated with the portfolio company.

TABLE OF CONTENTS

(2)

The majority of investments that bear interest at a variable rate are indexed to LIBOR (L), and reset monthly, quarterly, or semi-annually. Approximately 50% of the Company's LIBOR referenced investments are subject to an interest rate floor. For each investment, the Company has provided the spread over the reference rate and current interest rate in effect at March 31, 2017. Unless otherwise noted, all investments with a stated PIK rate require interest payments with the issuance of additional securities as payment of the entire PIK provision.

(3)

The negative fair value is the result of the unfunded commitment being below par.

(4)

Investments held by OFS SBIC I, LP. All other investments pledged as collateral under the PWB Credit Facility.

(5)

Non-qualifying assets under Section 55(a) of the 1940 Act. Qualifying assets must represent at least 70% of the Company's assets, as defined under Section 55 of the 1940 Act, at the time of acquisition of any additional non-qualifying assets. As of March 31, 2017, 97.15% of the Company's assets were qualifying assets.

(6)

Investment was on non-accrual status as of March 31, 2017, meaning the Company has ceased recognizing all or a portion of income on the investment. See Note 2, Non-accrual loans for further details.

(7)

Recognition of PIK dividend income discontinued as of March 31, 2017. See Note 2, Dividend Income for further details.

(8)

The Company has entered into a contractual arrangement with co-lenders whereby, subject to certain conditions, it has agreed to receive its payment after the repayment of certain co-lenders pursuant to a payment waterfall. The reported interest rate of 11.27% at March 31, 2017, includes additional interest of 2.02% per annum as specified under the contractual arrangement among the Company and the co-lenders.

(9)

Non-income producing.

(10)

The interest rate on these investments contains a PIK provision, whereby the issuer has the option to make interest payments in cash or with the issuance of additional securities as payment of the entire PIK provision. The interest rate in the schedule represents the current interest rate in effect for these investments. The following table provides additional details on these PIK investments, including the maximum annual PIK interest rate allowed as of March 31, 2017:

Portfolio Company	Investment Type	Range of PIK Option	Range of Cash Option	Maximum PIK Rate Allowed
Community Intervention Services, Inc.	Subordinated Loan	0% or 6.00%	13.00% or 7.00%	6.00%
Intelli-Mark Technologies, Inc.	Senior Secured Loan	0% or 2.00%	13.00% or 11.50%	2.00%

Edgar Filing: OFS Capital Corp - Form 497

Jobson Healthcare Information, LLC	Senior Secured Loan	1.5% or 4.55%	10.13% or 13.18%	4.55%
United Biologics Holdings, LLC	Senior Secured Loan	0% or 2.00%	14.00% or 12.00%	2.00%

MANAGEMENT

Board of Directors

We have three classes of directors, currently consisting of one Class I director, two Class II directors and two Class III directors. At each annual meeting of stockholders, directors are elected for a full term of three years to succeed those whose terms are expiring. The terms of the three classes are staggered in a manner so that only one class is elected by stockholders annually.

Information regarding our board of directors is as follows:

Name, Address, and Age	Position(s) held with Fund	Term of Office and Length of Time Served	Principal Occupation, Other Business Experience During the Past Five Years	Number of Portfolios in Fund Complex Overseen by Director(1)	Other Directorships Held by Director
Independent Directors
