NAPCO SECURITY TECHNOLOGIES, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1.) Summary of Significant Accounting Policies and Other Disclosures

The accompanying Condensed Consolidated Financial Statements are unaudited. In management's opinion, all adjustments (consisting of only normal recurring accruals) necessary for a fair presentation have been made. The results of operations for the periods ended December 31, 2011 are not necessarily indicative of results that may be expected for any other interim period or for the full year.

The unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and related notes contained in the Company's Annual Report on Form 10-K for the year ended June 30, 2011. The accounting policies used in preparing these unaudited Condensed Consolidated Financial Statements are consistent with those described in the June 30, 2011 Consolidated Financial Statements. In addition, the Condensed Consolidated Balance Sheet as of June 30, 2011 was derived from the audited financial statements but does not include all disclosures required by Generally Accepted Accounting Principles ("GAAP").

The Condensed Consolidated Financial Statements include the accounts of Napco Security Technologies, Inc. and all of its wholly-owned subsidiaries. All inter-company balances and transactions have been eliminated in consolidation.

The Company's fiscal year begins on July 1 and ends on June 30. Historically, the end users of the Company's products want to install its products prior to the summer; therefore sales of its products historically peak in the period April 1 through June 30, the Company's fiscal fourth quarter, and are reduced in the period July 1 through September 30, the Company's fiscal first quarter. In addition, demand is affected by the housing and construction markets.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent gains and losses at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Critical estimates include management's judgments associated with, among other things, revenue recognition, reserves for sales returns and allowances, allowance for doubtful accounts, concentration of credit risk, inventories, intangible assets and income taxes. Actual results could differ from those estimates.

Revenue Recognition

The Company recognizes revenue when the following criteria are met: (i) persuasive evidence of an agreement exists, (ii) there is a fixed and determinable price for the Company's product, (iii) shipment and passage of title occurs, and (iv) collectability is reasonably assured. Revenues from merchandise sales are recorded at the time the product is shipped or delivered to the customer pursuant to the terms of the sale. The Company reports its sales levels on a net sales basis, with net sales being computed by deducting from gross sales the amount of actual sales returns and other allowances and the amount of reserves established for anticipated sales returns and other allowances.

Sales Returns and Other Allowances

The Company analyzes sales returns and is able to make reasonable and reliable estimates of product returns based on the Company's past history. Estimates for sales returns are based on several factors including actual returns and based on expected return data communicated to it by its customers. Accordingly, the Company believes that its historical returns analysis is an accurate basis for its allowance for sales returns. Actual results could differ from those estimates.

Allowance for Doubtful Accounts

In the ordinary course of business, the Company has established a reserve for doubtful accounts and customer deductions in the amount of \$250,000 and \$255,000 as of December 31, 2011 and June 30, 2011, respectively. The Company's reserve for doubtful accounts is a subjective critical estimate that has a direct impact on reported net earnings. This reserve is based upon the evaluation of accounts receivable agings, specific exposures and historical trends.

Business Concentration and Credit Risk

An entity is more vulnerable to concentrations of credit risk if it is exposed to risk of loss greater than it would have had if it mitigated its risk through diversification of customers. Such risks of loss manifest themselves differently, depending on the nature of the concentration, and vary in significance.

The Company had one customer with an accounts receivable balance that represents 16% of the Company's accounts receivable at December 31, 2011 and 17% at June 30, 2011. Sales to this customer did not exceed 10% of net sales in any of the past three fiscal years.

Inventories

Inventories are valued at the lower of cost or fair market value, with cost being determined on the first-in, first-out (FIFO) method. The reported net value of inventory includes finished saleable products, work-in-process and raw materials that will be sold or used in future periods. Inventory costs include raw materials, direct labor and overhead. The Company's overhead expenses are applied based, in part, upon estimates of the proportion of those expenses that are related to procuring and storing raw materials as compared to the manufacture and assembly of finished products. These proportions, the method of their application, and the resulting overhead included in ending inventory, are based in part on subjective estimates and actual results could differ from those estimates.

In addition, the Company records an inventory obsolescence reserve, which represents the difference between the cost of the inventory and its estimated market value, based on various product sales projections. This reserve is calculated using an estimated obsolescence percentage applied to the inventory based on age, historical trends, requirements to support forecasted sales, and the ability to find alternate applications of its raw materials and to convert finished product into alternate versions of the same product to better match customer demand. There is inherent professional judgment and subjectivity made by both production and engineering members of management in determining the estimated obsolescence percentage. In addition, and as necessary, the Company may establish specific reserves for future known or anticipated events. The Company also regularly reviews the period over which its inventories will be converted to sales. Any inventories expected to convert to sales beyond 12 months from the balance sheet date are classified as non-current.

Intangible Assets

Certain intangible assets determined to have indefinite lives are not amortized but are tested for impairment at least annually. Intangible assets with definite lives are amortized over their useful lives and are reviewed for impairment at least annually at the Company's fiscal year end of June 30 or more often whenever there is an indication that the carrying amount may not be recovered.

Changes in intangible assets are as follows (in thousands):

	December 31, 2011			June 30, 2011		
	Cost	Accumulated amortization	Net book value	Cost	Accumulated amortization	Net book value
Other intangible assets:						
Customer relationships	\$ 9,800	\$ (4,093)	\$ 5,707	\$ 9,800	\$ (3,584)	\$ 6,216
Non-compete agreement	340	(164)	176	340	(140)	200
Trademark	5,900	--	5,900	5,900	--	5,900
	\$ 16,040	\$ (4,257)	\$ 11,783	\$ 16,040	\$ (3,724)	\$ 12,316

Amortization expense for intangible assets subject to amortization was approximately \$266,000 and \$288,000 for the three months ended December 31, 2011 and 2010, respectively. Amortization expense for intangible assets subject to amortization was approximately \$533,000 and \$577,000 for the six months ended December 31, 2011 and 2010, respectively. Amortization expense for each of the next five years is estimated to be as follows: 2012 - \$1,065,000;

2013 - \$917,000; and 2014 - \$781,000; 2015 - \$667,000 and 2016 - \$529,000. The weighted average amortization period for intangible assets was 16.2 years and 16.7 years at December 31, 2011 and June 30, 2011, respectively.

Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets in question may not be recoverable. An impairment would be recorded in circumstances where undiscounted cash flows expected to be generated by an asset are less than the carrying value of that asset.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company measures and recognizes the tax implications of positions taken or expected to be taken in its tax returns on an ongoing basis.

Advertising and Promotional Costs

Advertising and promotional costs are included in "Selling, General and Administrative" expenses in the condensed consolidated statements of operations and are expensed as incurred. Advertising expense for the three months ended December 31, 2011 and 2010 was \$232,000 and \$270,000, respectively. Advertising expense for the six months ended December 31, 2011 and 2010 was \$483,000 and \$361,000, respectively. The decrease for the three months ended December 31, 2011 is due to the timing of a tradeshow that occurred in September 2011 as partially offset by increased spending on this tradeshow in the current fiscal year as well as on media and printed advertising. Last year, the same tradeshow occurred in the quarter ended December 31, 2010. The increase for the six months ended December 31, 2011 is due to increased spending on tradeshows and media and printed advertising.

Research and Development Costs

Research and development costs are included in "Cost of Sales" in the condensed consolidated statements of operations and are expensed as incurred. Research and development expense for the three months ended December 31, 2011 and 2010 was \$1,009,000 and \$1,218,000, respectively. Research and development expense for the six months ended December 31, 2011 and 2010 was \$2,040,000 and \$2,485,000, respectively.

Stock Options

During the three and six months ended December 31, 2011 no stock options were granted or exercised under its 2002 Employee Incentive Stock Option Plan or under its 2000 Non-employee Incentive Stock Option Plan.

Self-funded Employee Health Benefit Plan

Effective February 1, 2011, the Company converted its employee health benefit plan from a fully-insured plan to a self-insured plan. The Company made this change due, primarily, to significant increases in health insurance costs over the past few years. Under this arrangement, the Company engaged a plan administrator to process claims and purchased an insurance policy that covers claims over a certain aggregate amount over the plan year. The aggregate limit is based on the number of employees enrolled in the plan. As of December 31, 2011 and June 30, 2011, the aggregate limit of claims to be self-insured was approximately \$1,374,000 and \$1,409,000, respectively. The Company records claims as they are paid and records an accrual for unpaid claims based upon the date of service or date incurred. In connection with this self-insured liability, the Company has accrued \$227,000 and \$150,000 as of December 31, 2011 and June 30, 2011, respectively.

Recent Accounting Pronouncements

In June 2011, the FASB amended its authoritative guidance related to the presentation of comprehensive income, requiring entities to present items of net income and other comprehensive income either in one continuous statement or in two separate consecutive statements. This guidance becomes effective for the Company's fiscal 2013 first quarter. The Company is currently evaluating the impact of adopting this guidance but believes that it may result only in changes in the presentation of its financial statements and will not have a material impact on the Company's results of operations, financial position or cash flows.

In May 2011, the FASB amended its authoritative guidance related to fair value measurements to provide a consistent definition and measurement of fair value, as well as similar disclosure requirements between U.S. GAAP and International Financial Reporting Standards. This guidance clarifies the application of existing fair value measurement and expands the existing disclosure requirements. This guidance becomes effective for the Company's fiscal 2012 third quarter. This guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows, but may require additional disclosures.

In December 2010, the FASB amended its authoritative guidance related to Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more-likely-than-not that goodwill impairment exists. In determining whether it is more-likely-than-not that goodwill impairment exists, consideration should be made as to whether there are any adverse qualitative factors indicating that an impairment may exist. This guidance became effective for the Company's fiscal 2012 first quarter. The adoption of this standard did not have a material impact on the Company's consolidated financial statements.

2.) Stock-based Compensation

In December 2002, the stockholders approved the 2002 Employee Stock Option Plan (the 2002 Plan). The 2002 Plan authorizes the granting of awards, the exercise of which would allow up to an aggregate of 1,836,000 shares of the Company's common stock to be acquired by the holders of such awards. Under the 2002 Plan, the Company may grant stock options, which are intended to qualify as incentive stock options (ISOs), to key employees. Any plan participant who is granted ISOs and possesses more than 10% of the voting rights of the Company's outstanding common stock must be granted an option with a price of at least 110% of the fair market value on the date of grant.

Under the 2002 Plan, stock options have been granted to key employees with a term of 10 years at an exercise price equal to the fair market value on the date of grant and are exercisable in whole or in part at 20% per year from the date of grant. At December 31, 2011, 1,471,480 stock options were granted, 364,520 stock options were available for grant, and 1,372,140 stock options were exercisable under this plan. As of December 31, 2011, there was no unearned stock-based compensation cost related to non-vested share-based compensation arrangements granted under the 2002 Plan. The total fair value of the options vesting during both the three and six months ended December 31, 2011 under the 2002 Plan was \$29,000. No options were granted during the three or six months ended December 31, 2011.

The following table reflects activity under the 2002 Plans for the six months ended December 31, 2011:

	Options	Weighted average exercise price
Outstanding, July 1, 2011	1,380,140	\$2.95
Granted	--	--
Terminated	--	--
Exercised	--	--
Outstanding, December 31, 2011	1,380,140	\$2.95
Exercisable, December 31, 2011	1,380,140	\$2.95
Weighted average fair value at grant date of options granted	n/a	
Total intrinsic value of options exercised	n/a	
Total intrinsic value of options outstanding	\$600,000	
Total intrinsic value of options exercisable	\$600,000	

In September 2000, the stockholders approved a 10 year extension of the already existing 1990 non-employee stock option plan (the 2000 Plan) to encourage non-employee directors and consultants of the Company to invest in the Company's stock. This plan expired in September 2010. No further options may be granted under the 2000 Plan. The 2000 Plan provided for the granting of non-qualified stock options, the exercise of which would allow up to an aggregate of 270,000 shares of the Company's common stock to be acquired by the holders of the stock options. The 2000 Plan provided that the option price will not be less than 100% of the fair market value of the stock at the date of grant. Outstanding options are exercisable at 20% per year and expire five years after the date of grant. Compensation cost was recognized for the fair value of the options granted to non-employee directors and

consultants as of the date of grant. As of December 31, 2011, there was no unearned stock-based compensation cost related to non-vested share-based compensation arrangements granted under the 2000 Plan. The total fair value of the options vesting during the three and six months ended December 31, 2011 under the 2000 Plan was \$0.

The following table reflects activity under the 2000 Plan for the six months ended December 31, 2011:

	Options	Weighted average exercise price
Outstanding, July 1, 2011	30,000	\$5.03
Granted	--	--
Terminated	--	--
Exercised	--	--
Outstanding, December 31, 2011	30,000	\$5.03
Exercisable, December 31, 2011	30,000	\$5.03
Weighted average fair value at grant date of options granted	n/a	
Total intrinsic value of options exercised	n/a	
Total intrinsic value of options outstanding	\$--	
Total intrinsic value of options exercisable	\$--	

3.) Inventories, net

Inventories, net of reserves are valued at lower of cost (first-in, first-out method) or market. The Company regularly reviews parts and finished goods inventories on hand and, when necessary, records a provision for excess or obsolete inventories. As of December 31, 2011 and June 30, 2011, the balance in this reserve amounted to \$2,534,000. The Company also regularly reviews the period over which its inventories will be converted to sales. Any inventories expected to convert to sales beyond 12 months from the balance sheet date are classified as non-current.

Inventories, net of reserves consist of the following (in thousands):

	December 31, 2011	June 30, 2011
Component parts	\$14,856	\$14,014
Work-in-process	4,719	4,452
Finished product	6,038	5,721
	\$25,613	\$24,187

4.) Earnings (Loss) Per Common Share

Earnings (loss) per common share amounts ("Basic EPS") are calculated by dividing earnings by the weighted average number of common shares outstanding for the period. Earnings (loss) per common share amounts, assuming dilution ("Diluted EPS"), were computed by reflecting the potential dilution from the exercise of stock options. Both Basic EPS and Diluted EPS are presented on the face of the condensed consolidated statements of operations.

A reconciliation between the numerators and denominators of the Basic and Diluted EPS computations for earnings is as follows (in thousands except per share data):

	Three months ended December 31, 2011		
	Net income (numerator)	Shares (denominator)	Per Share Amounts
Basic EPS			
Net income, as reported	\$309	19,096	\$0.02
Effect of dilutive securities			

Edgar Filing: NAPCO SECURITY TECHNOLOGIES, INC - Form 10-Q

Employee Stock Options	--	160	--
Diluted EPS			
Net loss, as reported and assumed option exercises	\$ 309	19,256	\$0.02

1,250,280 options to purchase shares of common stock in the three months ended December 31, 2011 were excluded in the computation of Diluted EPS because their inclusion would be anti-dilutive.

5.) Long Term Debt

As of December 31, 2011 and June 30, 2011, long-term debt consisted of a revolving credit loan facility of \$11,100,000 as well as a term loan with a remaining balance of \$13,391,000 and \$15,177,000, respectively, as described further below. The term loan is being repaid in 19 quarterly installments of \$893,000 each which commenced in December 2008, and a final payment of \$8,033,000 due in August 2013. The revolving line of credit expires in August 2012 and any outstanding borrowings are to be repaid or refinanced on or before that time. The

Company intends to refinance or extend the revolving line of credit prior to the expiration date. However, the revolving credit loan has been classified as a current liability until such time that the Company might renew or extend the facility because the expiration date currently falls within one year of the balance sheet date of December 31, 2011.

Outstanding balances and interest rates as of December 31, 2011 and June 30, 2011 are as follows:

	December 31, 2011			June 30, 2011		
	Outstanding	Interest Rate		Outstanding	Interest Rate	
Revolving line of credit	\$8,600	4.90	%	\$8,600	4.82	%
Term loan	13,391	4.93	%	15,177	4.82	%
Total debt	\$21,991	4.92	%	\$23,777	4.82	%

On October 28, 2010, the Company entered into a Second Amended and Restated Credit Agreement Dated as of October 28, 2010 among the Company, as the Borrower, Capital One, N.A., as a Lender and HSBC Bank USA, National Association as Lender, Administrative Agent and Collateral Agent (the "Second Amended Agreement"). The Second Amended Agreement amended and restated the previous term loan and revolving credit facility and provides for a term loan of \$16,070,000 and a revolving credit facility of \$11,100,000. The Second Amended Agreement also provides for a LIBOR interest rate option of LIBOR plus 4.5% in addition to the existing prime option of prime plus 4.0%. The Company's obligations under the Second Amended Agreement continue to be secured by the Company's headquarters in Amityville, New York, certain other assets and the common stock of the Company's wholly-owned subsidiaries.

6.) Geographical Data

The Company is engaged in one major line of business: the development, manufacture, and distribution of security alarm products and door security devices for commercial and residential use. Sales to unaffiliated customers are primarily shipped from the United States. The Company has customers worldwide with a major concentration in the United States.

The following represents selected consolidated geographical data for the three and six months ended December 31, 2011 and 2010 (in thousands):

	Three Months ended December		Six Months ended December 31,	
	2011	31, 2010	2011	2010
Sales to external customers(1):				
Domestic	\$ 16,578	\$ 16,332	\$ 31,907	\$ 30,592
Foreign	1,039	1,276	1,913	2,343
Total Net Sales	\$ 17,617	\$ 17,608	\$ 33,820	\$ 32,935

	As of	
	December 31, 2011	June 30, 2011
Identifiable assets:		
United States	\$ 50,038	\$ 54,426
Dominican Republic (2)	15,120	14,342
Other foreign countries	--	27
Total Identifiable		
Assets	\$ 65,158	\$ 68,795

(1) All of the Company's sales occur in the United States and are shipped primarily from the Company's facilities in the United States. There were no sales into any one foreign country in excess of 10% of Net Sales.

(2) Consists primarily of inventories (\$11,020,000 and \$9,995,000) and fixed assets (\$4,053,000 and \$4,189,000) located at the Company's principal manufacturing facility in the Dominican Republic as of December 31, 2011 and June 30, 2011, respectively.

7.) Commitments and Contingencies

In the normal course of business, the Company is a party to claims and/or litigation. Management believes that the resolution of such claims and/or litigation, considered in the aggregate, will not have a material adverse effect on the Company's financial position and results of operations.

8.) Income Taxes

The provision for income taxes represents Federal, foreign, and state and local income taxes. The effective rate differs from statutory rates due to the effect of state and local income taxes, tax rates in foreign jurisdictions, tax benefit of R&D credits and certain nondeductible expenses. Our effective tax rate will change from quarter to quarter based on recurring and non-recurring factors including, but not limited to, the geographical mix of earnings, enacted tax legislation, and state and local income taxes. In addition, changes in judgment from the evaluation of new information resulting in the recognition, de-recognition or re-measurement of a tax position taken in a prior annual period are recognized separately in the quarter of the change.

The Company does not expect that our unrecognized tax benefits will significantly change within the next twelve months. We file a consolidated U.S. income tax return and tax returns in certain state and local and foreign jurisdictions. As of December 31, 2011 we remain subject to examination in all tax jurisdictions for all relevant jurisdictional statutes for fiscal years 2007 and thereafter.

The Company has identified its U.S. Federal income tax return and its State return in New York as its major tax jurisdictions. During the six months ended December 31, 2011 the Company decreased its reserve for uncertain income tax positions by \$45,000. As a result, as of December 31, 2011 and June 30, 2011 the Company has a long-term accrued income tax liability of \$120,000 and \$165,000, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q and the information incorporated by reference may include "Forward-Looking Statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act of 1934. The Company intends the Forward-Looking Statements to be covered by the Safe Harbor Provisions for Forward-Looking Statements. All statements regarding the Company's expected financial position and operating results, its business strategy, its financing plans and the outcome of any contingencies are Forward-Looking Statements. The Forward-Looking Statements are based on current estimates and projections about our industry and our business. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates," or variations of such words and similar expressions are intended to identify such Forward-Looking Statements. The Forward-Looking Statements are subject to risks and uncertainties that could cause actual results to differ materially from those set forth or implied by any Forward-Looking Statements. For example, the Company is highly dependent on its Chief Executive Officer for strategic planning. If he is unable to perform his services for any significant period of time, the Company's ability to grow could be adversely affected. In addition, factors that could cause actual results to differ materially from the Forward-Looking Statements include, but are not limited to, the ability to maintain adequate financing to fund operations, adverse tax consequences of offshore operations, significant fluctuations in the exchange rate between the Dominican Peso and the U.S. Dollar, distribution problems, unforeseen environmental liabilities, the uncertain economic, military and political conditions in the world and the successful integration of Marks into our existing operations.

Overview

The Company is a diversified manufacturer of security products, encompassing intrusion and fire alarms, building access control systems and electronic locking devices. These products are used for commercial, residential, institutional, industrial and governmental applications, and are sold worldwide principally to independent distributors, dealers and installers of security equipment. International sales accounted for approximately 6% and 7% of our revenues for the six months ended December 31, 2011 and 2010, respectively.

The Company owns and operates manufacturing facilities in Amityville, New York and the Dominican Republic. A significant portion of our operating costs are fixed, and do not fluctuate with changes in production levels or utilization of our manufacturing capacity. As production levels rise and factory utilization increases, the fixed costs are spread over increased output, which should improve profit margins. Conversely, when production levels decline our fixed costs are spread over reduced levels, thereby decreasing margins.

The security products market is characterized by constant incremental innovation in product design and manufacturing technologies. Generally, the Company devotes 7-8% of revenues to research and development (R&D) on an annual basis. The Company does not expect products resulting from our R&D investments in fiscal 2012 to contribute materially to revenue during this fiscal year, but should benefit the Company over future years. In general, the new products introduced by the Company are initially shipped in limited quantities, and increase over time. Prices and manufacturing costs tend to decline over time as products and technologies mature.

Economic and Other Factors

Since October 2008, the U.S. and international economies have experienced a significant downturn and continue to be very volatile. In the event that the downturn in the U.S. or international financial markets continues at these levels or worsens, our revenue, profit and cash flow levels could be materially adversely affected in future periods. This could affect our ability to maintain adequate financing. If the current worldwide economic downturn continues at these levels or worsens, many of our current or potential future customers may experience serious cash flow problems and as a result may, modify, delay or cancel purchases of our products. Additionally, customers may not be able to pay, or may delay payment of, accounts receivable that are owed to us.

Seasonality

The Company's fiscal year begins on July 1 and ends on June 30. Historically, the end users of Napco's products want to install its products prior to the summer; therefore sales of its products historically peak in the period April 1 through June 30, the Company's fiscal fourth quarter, and are reduced in the period July 1 through September 30, the Company's fiscal first quarter. In addition, demand is affected by the housing and construction markets. The severity of the current economic downturn may also affect this trend.

Critical Accounting Policies and Estimates

The Company's significant accounting policies are fully described in Note 1 to the Company's consolidated financial statements included in its June 30, 2011 Annual Report on Form 10-K. Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Revenue Recognition

Revenues from merchandise sales are recorded at the time the product is shipped or delivered to the customer pursuant to the terms of sale. We report our sales levels on a net sales basis, which is computed by deducting from gross sales the amount of actual returns received and an amount established for anticipated returns and other allowances.

Our sales return accrual is a subjective critical estimate that has a direct impact on reported net sales and income. This accrual is calculated based on a history of gross sales and actual sales returns, as well as management's estimate of anticipated returns and allowances. As a percentage of gross sales, sales returns, rebates and allowances were 6% and 7% for the six months ended December 31, 2011 and 2010, respectively.

Inventories

Inventories are valued at the lower of cost or fair market value, with cost being determined on the first-in, first-out (FIFO) method. The reported net value of inventory includes finished saleable products, work-in-process and raw materials that will be sold or used in future periods. Inventory costs include raw materials, direct labor and overhead. The Company's overhead expenses are applied based, in part, upon estimates of the proportion of those expenses that are related to procuring and storing raw materials as compared to the manufacture and assembly of finished products. These proportions, the method of their application, and the resulting overhead included in ending inventory, are based in part on subjective estimates and actual results could differ from those estimates.

In addition, the Company records an inventory obsolescence reserve, which represents the difference between the cost of the inventory and its estimated market value, based on various product sales projections. This reserve is calculated using an estimated obsolescence percentage applied to the inventory based on age, historical trends, requirements to

support forecasted sales, and the ability to find alternate applications of its raw materials and to convert finished product into alternate versions of the same product to better match customer demand. There is inherent professional judgment and subjectivity made by both production and engineering members of management in determining the estimated obsolescence percentage. In addition, and as necessary, the Company may establish specific reserves for future known or anticipated events. The Company also regularly reviews the period over which its inventories will be converted to sales. Any inventories expected to convert to sales beyond 12 months from the balance sheet date are classified as non-current.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company measures and recognizes the tax implications of positions taken or expected to be taken in its tax returns on an ongoing basis.

Results of Operations

	Three months ended December 31, (dollars in thousands)			Six months ended December 31, (dollars in thousands)						
	2011	2010	%	Increase/ (decrease)		2011	2010	Increase/ (decrease)		
Net sales	\$17,617	\$17,608		(0.2)	%	\$33,820	\$32,935	2.7	%	
Gross profit	4,895	4,690		4.1	%	9,051	8,113	11.4	%	
Gross profit as a % of net sales	27.8	% 26.6	%	4.5	%	26.8	% 24.6	%	8.9	%
Selling, general and administrative	4,000	4,159		(3.8)	%	8,298	8,299	0.0	%	
Selling, general and administrative as a percentage of net sales	22.7	% 23.6	%	(3.4)	%	24.5	% 25.2	%	(2.4)	%
Operating income (loss)	895	531		66.1	%	753	(186))	497.8	%
Interest expense, net	298	411		(27.5)	%	602	1,005		(40.1)	%
Other expense	13	14		(7.1)	%	27	28		(3.6)	%
Provision (benefit) for income taxes	275	(51))	766.7	%	(18)	(242))	119.4	%
Net income (loss)	309	157		47.1	%	142	(977))	106.6	%

Sales for the three months ended December 31, 2011 remained relatively constant at \$17,577,000 as compared to \$17,608,000 for the same period a year ago. Sales for the six months ended December 31, 2011 increase by 2.7% to \$33,820,000 as compared to \$32,935,000 for the same period a year ago. The increase in sales for the six months was primarily due to increased sales during the first quarter in the Company's intrusion products (\$917,000) and access control products (\$217,000) as partially offset by a decrease in door-locking products (\$258,000).

Gross profit for the three months ended December 31, 2011 increased to \$4,895,000 or 27.8% of sales as compared to \$4,690,000 or 26.6% of sales for the same period a year ago. Gross profit for the six months ended December 31, 2011 increased to \$9,051,000 or 26.8% of sales as compared to \$8,113,000 or 24.6% of sales for the same period a year ago. The increase in Gross profit in dollars and as a percentage of sales for the three months was primarily due to the Company reducing some of its overhead expenditures. The increase in Gross profit in dollars and as a percentage of sales for the six months was primarily due to the increases in sales described above as well as the Company reducing its overhead expenditures.

Selling, general and administrative expenses for the three months ended December 31, 2011 decreased by \$159,000 to \$4,000,000, or 22.7% of sales, as compared to \$4,159,000, or 23.6% of sales a year ago. Selling, general and administrative expenses for the six months ended December 31, 2011 remained constant at \$8,298,000, or 24.5% of sales, as compared to \$8,299,000, or 25.2% of sales a year ago. The increase in Selling, general and administrative expenses for the three months was due primarily to a tradeshow that occurred in the quarter ended September 30, 2011. In the prior fiscal year, this tradeshow occurred in the quarter ended December 31, 2010.

Interest expense, net for the three months ended December 31, 2011 decreased by \$113,000 to \$298,000 as compared to \$411,000 for the same period a year ago. Interest expense, net for the six months ended December 31, 2011 decreased by \$403,000 to \$602,000 as compared to \$1,005,000 for the same period a year ago. The decrease in interest expense for the three and six months ended December 31, 2011 resulted from lower interest rates charged by the Company's banks as well as lower outstanding debt in the current period.

The Company's provision for income taxes for the three months ended December 31, 2011 increased by \$326,000 to a provision of \$275,000 as compared to a benefit of \$51,000 for the same period a year ago. The Company's provision

for income taxes for the six months ended December 31, 2011 increased by \$224,000 to a benefit of \$18,000 as compared to a benefit of \$242,000 for the same period a year ago. The changes in the provision for income taxes were caused by the change in the proportion of the income before income taxes being generated by the Company's U.S. operations to the loss being generated by non-taxable foreign operations in the three and six months ended December 31, 2011 as compared to the same periods a year ago. As a result, the Company's effective rate for income tax was 47% and (48)% for the three months ended December 31, 2011 and 2010, respectively, and (15)% and 20% for the six months ended December 31, 2011 and 2010, respectively.

Net income increased by \$152,000 to \$309,000 or \$0.02 per diluted share for the three months ended December 31, 2011 as compared to \$157,000 or \$0.01 per diluted share for the same period a year ago. Net income increased by \$1,119,000 to \$142,000 or \$0.01 per diluted share for the six months ended December 31, 2011 as compared to a net loss of \$(977,000) or \$(0.05) per diluted share for the same period a year ago. The change for the three and six months ended December 31, 2011 was primarily due to the items as described above.

Liquidity and Capital Resources

During the six months ended December 31, 2011 the Company utilized all of its cash from operations (\$1,174,000) and a portion of its cash on hand at June 30, 2011 (\$823,000 of \$3,077,000) to repay outstanding debt (\$1,786,000) and purchase property, plant and equipment (\$211,000). The Company believes its current working capital, cash flows from operations and its revolving credit agreement, which the Company anticipates renewing before its expiration in August 2012, will be sufficient to fund the Company's operations through the next twelve months.

Accounts Receivable at December 31, 2011 decreased \$3,230,000 to \$14,410,000 as compared to \$17,640,000 at June 30, 2011. This decrease is primarily the result of the lower sales volume during the quarter ended December 31, 2011 as compared to the quarter ended June 30, 2011, which is typically the Company's highest.

Inventories at December 31, 2011 increased by \$1,426,000 to \$25,613,000 as compared to \$24,187,000 at June 30, 2011. The increase in inventory is primarily the result of the Company level-loading its production facility in anticipation of the Company's historical sales cycle where more sales occur in the latter quarters relative to the earlier quarters.

As of December 31, 2011, long-term debt consisted of a revolving credit loan facility of \$11,100,000, of which \$8,600,000 was outstanding as of December 31, 2011, as well as a term loan with a remaining balance of \$13,391,000, as described further below. The term loan is being repaid in 19 quarterly installments of \$893,000 each which commenced in December 2008, and a final payment of \$8,033,000 due in August 2013. The revolving line of credit expires in August 2012 and any outstanding borrowings are to be repaid or refinanced on or before that time. The Company intends to refinance or extend the revolving line of credit prior to the expiration date. However, the revolving credit loan has been classified as a current liability until such time that the Company might renew or extend the facility because the expiration date currently falls within one year of the balance sheet date of December 31, 2011.

On October 28, 2010, the Company entered into a Second Amended and Restated Credit Agreement Dated as of October 28, 2010 among the Company, as the Borrower, Capital One, N.A., as a Lender and HSBC Bank USA, National Association as Lender, Administrative Agent and Collateral Agent (the "Second Amended Agreement"). The Second Amended Agreement amended and restated the previous term loan and revolving credit facility and provides for a term loan of \$16,070,000 and a revolving credit facility of \$11,100,000. The Second Amended Agreement also provides for a LIBOR interest rate option of LIBOR plus 4.5% in addition to the existing prime option of prime plus 4.0%. The Company's obligations under the Second Amended Agreement continue to be secured by the Company's headquarters in Amityville, New York, certain other assets and the common stock of the Company's wholly-owned subsidiaries.

As of December 31, 2011 the Company had no material commitments for capital expenditures or inventory purchases other than purchase orders issued in the normal course of business.

ITEM 3: Quantitative and Qualitative Disclosures About Market Risk

The Company's principal financial instrument is long-term debt (consisting of a revolving credit facility and term loan) that provides for interest based on the prime rate or LIBOR as described in the agreement. The Company is affected by market risk exposure primarily through the effect of changes in interest rates on amounts payable by the Company under this credit facility. At December 31, 2011, an aggregate principal amount of approximately \$21,991,000 was outstanding under the Company's credit facility with a weighted average interest rate of approximately 4.92%. If principal amounts outstanding under the Company's credit facility remained at this level for an entire year and the interest rate increased or decreased, respectively, by 1% the Company would pay or save, respectively, an additional \$220,000 in interest that year.

All foreign sales transactions by the Company are denominated in U.S. dollars. As such, the Company has shifted foreign currency exposure onto its foreign customers. As a result, if exchange rates move against foreign customers, the Company could experience difficulty collecting unsecured accounts receivable, the cancellation of existing orders or the loss of future orders. The foregoing could materially adversely affect the Company's business, financial condition and results of operations. We are also exposed to foreign currency risk relative to expenses incurred in Dominican Pesos ("RD\$"), the local currency of the Company's production facility in the Dominican Republic. The result of a 10% strengthening in the U.S. dollar to our RD\$ expenses would result in an annual decrease in income from operations of approximately \$600,000.

ITEM 4: Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management to allow timely decisions regarding required disclosure. Management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding management's control objectives.

At the conclusion of the period ended December 31, 2011, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at December 31, 2011.

During the second quarter of fiscal 2012, there were no changes in the Company's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II: OTHER INFORMATION

Item 1A. Risk Factors

Information regarding the Company's Risk Factors are set forth in the Company's Annual Report on Form 10-K for the year ended June 30, 2011. There have been no material changes in the risk factors previously disclosed in the Company's Form 10-K for the year ended June 30, 2011 during the three months ended December 31, 2011.
