2	ANNUAL REPORT	AUGUST 31, 2009	

Dear Shareholder

The past 12 months reveal two distinct economic and market backdrops one of extreme investor pessimism and decided weakness, and another of increased optimism amid growing signs of recovery. The start of the period was characterized by the former. September through December 2008 saw the surge of the economic storm that sparked the worst recession in decades. The months featured, among others, the infamous collapse of Lehman Brothers, uniformly poor economic data and plummeting investor confidence that resulted in massive government intervention (on a global scale) in the financial system and the economy. The tide turned dramatically in March 2009, however, on the back of new US government initiatives, as well as better-than-expected economic data and upside surprises in corporate earnings.

In this environment, US equities contended with extraordinary volatility, posting steep declines through mid-March before embarking on a rally that resulted in strong year-to-date returns for all major indexes. June saw a brief correction, though it appeared to be induced more by profit-taking and portfolio rebalancing than by a change in the economic outlook. The experience in international markets was similar to that in the United States. Notably, emerging markets staged a strong comeback in 2009 as these areas of the globe have generally seen a stronger acceleration in economic activity.

In fixed income markets, the flight-to-safety premium in Treasury securities prevailed during the equity market downturn, but more recently, ongoing concerns about deficit spending, debt issuance, inflation and dollar weakness have kept Treasury yields higher. At the same time, relatively attractive yields and distressed valuations among non-Treasury assets, coupled with a more favorable macro environment, drew in sidelined investors and triggered a sharp recovery in these sectors. This was particularly evident in the high yield sector, which has firmly outpaced all other taxable asset classes since the start of 2009. The municipal bond market enjoyed strong returns in 2009 as well, buoyed by a combination of attractive valuations, robust retail investor demand and a slowdown in forced selling. Moreover, the Build America Bond program has alleviated supply pressures, creating a more favorable technical environment. In particular, August marked the municipal market s best monthly performance in more than 20 years, as the asset class has regained year-to-date all that was lost during 2008.

Overall, results for the major benchmark indexes were mixed. Higher-risk assets (i.e., equities and high yield bonds) and Treasuries reflected a bifurcated market, while less-risky fixed income investments posted stable, modest returns.

Total Returns as of August 31, 2009	6-month	12-month
US equities (S&P 500 Index)	40.52%	(18.25)%
Small cap US equities (Russell 2000 Index)	48.25	(21.29)
International equities (MSCI Europe, Australasia, Far East Index)	53.47	(14.95)
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index*)	(1.61)	6.77
Taxable fixed income (Barclays Capital US Aggregate Bond Index)	5.95	7.94
Tax-exempt fixed income (Barclays Capital Municipal Bond Index)	5.61	5.67
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	36.31	7.00

^{*} Formerly a Merrill Lynch Index.

The market environment has visibly improved since the beginning of the year, but a great deal of uncertainty and risk remain. Through periods of market turbulence, as ever, BlackRock s full resources are dedicated to the management of our clients assets. We invite you to visit **www.blackrock.com/funds** for our most current views on the economy and financial markets. As always, we thank you for entrusting BlackRock with your investments, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

Announcement to Shareholders

On June 16, 2009, BlackRock, Inc. announced that it received written notice from Barclays PLC (Barclays) in which Barclays Board of Directors had accepted BlackRock s offer to acquire Barclays Global Investors (BGI). At a special meeting held on August 6, 2009, BlackRock s proposed purchase of BGI was approved by an overwhelming majority of Barclays voting shareholders, an important step toward closing the transaction. The combination of BlackRock and BGI will bring together market leaders in active and index strategies to create the preeminent asset management firm. The transaction is scheduled to be completed in the fourth quarter of 2009, subject to important fund shareholder and regulatory approvals.

BlackRock Insured Municipal Income Trust

Investment Objective

BlackRock Insured Municipal Income Trust (BYM) (the Trust) seeks to provide high current income exempt from regular federal income taxes. The Trust will invest at least 80% of its managed assets in municipal obligations that are insured as to the timely payment of both principal and interest.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended August 31, 2009, the Trust returned 10.58% based on market price and 2.83% based on net asset value (NAV). For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of 10.87% on a market price basis and 3.97% on a NAV basis. All returns reflect reinvestment of dividends. During the period, the Trust moved from a discount to a premium to NAV, which accounts for the difference between performance based on price and performance based on NAV. The Trust s above-average yield contributed to performance, as did its constructive duration posture during a period in which yields fell (prices increased) albeit in a very volatile manner. Conversely, the Trust s overweight exposure to the long end of the municipal yield curve detracted from performance as the curve steepened and the shorter end performed better. Additionally, the Trust s holdings of insured bonds with weaker underlying ratings had a negative impact on results, as insurer downgrades led to wider spreads on these securities. We worked to opportunistically upgrade credit quality over the period.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

4 ANNUAL REPORT AUGUST 31, 2009

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of August 31, 2009, the market value of these securities was \$10,859,100 representing 2% of the Trust s long-term investments.

BlackRock Insured Municipal Income Investment Trust

Investment Objective

BlackRock Insured Municipal Income Investment Trust (BAF) (the Trust) seeks to provide current income exempt from regular federal income taxes, including the alternative minimum tax and Florida intangible personal property tax. The Trust will invest at least 80% of its managed assets in municipal obligations that are insured as to the timely payment of both principal and interest.

Effective September 12, 2008, BlackRock Florida Insured Municipal Income Trust was renamed BlackRock Insured Municipal Income Investment Trust.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended August 31, 2009, the Trust returned 11.70% based on market price and 5.36% based on NAV. For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of 10.87% on a market price basis and 3.97% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Trust s overweights in longer-dated tax-backed and utility bonds contributed positively to performance. Conversely, overweight exposure to spread products, such as health care bonds, detracted from results as these issues underperformed the broader municipal market early in the reporting period. Also hampering performance were the Trust s overweight in AMBAC and MBIA and neutral position in FGIC, which underperformed amid continued downgrades of the monoline insurers. The Trust ended the period with cash and short-term investment reserves of 8% of net assets, which detracted mildly from performance as yields on cash equivalent securities remain at historic lows. Notably, due to the repeal of the Florida intangible personal property tax, the Trust is transitioning from its status as a state-specific Florida fund to a national portfolio with broader investment parameters. At times, we sold into strong demand for Florida issues, which raised the Trust s cash reserves above 5%. Going forward, we anticipate reducing cash reserves to be fully invested in the long end of the municipal yield curve.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

- The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of August 31, 2009 and 2008, the market value of these securities was \$7,552,594 representing 4% and \$7,387,462 representing 4%, respectively, of the Trust s long-term investments.

ANNUAL REPORT	AUGUST 31, 2009	5

BlackRock Municipal Bond Trust

Investment Objective

BlackRock Municipal Bond Trust (BBK) (the Trust) seeks to provide current income exempt from regular federal income taxes. Under normal market conditions, the Trust will invest at least 80% of its managed assets in municipal bonds that are investment grade quality, or determined by the investment advisor to be of equivalent credit quality at time of purchase. The Trust may invest up to 20% of its total assets in municipal bonds that are rated, at the time of investment, Ba/BB or B by Moody s, S&P or Fitch or that are unrated but judged to be of comparable quality by BlackRock.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended August 31, 2009, the Trust returned 7.48% based on market price and 2.52% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 5.73% on a market price basis and 1.06% on a NAV basis. All returns reflect reinvestment of dividends. During the period, the Trust moved from a discount to a premium to NAV, which accounts for the difference between performance based on price and performance based on NAV. The Trust sheavy concentrations in lower-rated and longer-dated securities propelled performance in recent months as the yield curve flattened and credit spreads tightened. Performance was supported throughout the period by an above-average dividend yield. On the other hand, the Trust suffered from poor positioning during the fourth quarter of 2008, including underweights in tax-backed and utility bonds, which were among the better performers. At the same time, prices of long-maturity bonds fell disproportionately compared to shorter-dated bonds. In addition, credit spreads, a common gauge of liquidity and risk tolerance, widened as investors sought to minimize risk exposure due to rapidly deteriorating credit fundamentals. The Trust exhibited greater sensitivity to both factors than many of its Lipper peers.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

8 ANNUAL REPORT AUGUST 31, 2009

BlackRock MuniHoldings Insured Investment Fund

Investment Objective

BlackRock MuniHoldings Insured Investment Fund (MFL) (the Trust) seeks to provide shareholders with current income exempt from federal income tax. The Trust also seeks to offer shareholders the opportunity to own shares, the value of which is exempt from Florida intangible personal property tax. Under normal circumstances, the Trust invests at least 80% of its assets in municipal bonds either (i) insured under an insurance policy purchased by the Trust or (ii) insured under an insurance policy obtained by the issuer of the municipal bond or any other party. Such municipal bonds will be insured by insurers or other entities with claims-paying abilities rated at least investment grade at time of purchase and the Trust may invest in municipal obligations regardless of geographic location.

Effective September 12, 2008, BlackRock MuniHoldings Florida Insured Fund was renamed BlackRock MuniHoldings Insured Investment Fund.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended August 31, 2009, the Trust returned 16.19% based on market price and 7.36% based on NAV. For the same period, the closed-end Lipper Insured Municipal Debt Funds (Leveraged) category posted an average return of 10.87% on a market price basis and 3.97% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Trust s overweights in longer-dated housing and utility bonds contributed positively to performance. Conversely, overweight exposure to spread products, such as health care bonds, detracted from results as these issues underperformed the broader municipal market early in the reporting period. Also hampering performance were the Trust s overweight in AMBAC and MBIA and neutral position in FGIC, which underperformed amid continued downgrades of the monoline insurers. The Trust ended the period with cash and short-term investments of 11% of net assets, which detracted mildly from performance as yields on cash equivalent securities remain at historic lows. Notably, due to the repeal of the Florida intangible personal property tax, the Trust is transitioning from its status as a state-specific Florida fund to a national portfolio with broader investment parameters. At times, we sold into strong demand for Florida issues, which raised the Trust s cash reserves above 5%. Going forward, we anticipate reducing cash reserves to be fully invested in the long end of the municipal yield curve.

- Using the higher of S&P s or Moody s ratings.
- The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of August 31, 2009 and 2008, the market value of these securities was \$20,244,144 representing 3% and \$33,232,933 representing 4%, respectively, of the Trust s long-term investments.

ANNUAL REPORT	AUGUST 31, 2009	9

BlackRock MuniVest Fund, Inc.

Investment Objective

BlackRock MuniVest Fund, Inc. (MVF) (the Trust) seeks to provide shareholders with as high a level of current income exempt from federal income taxes as is consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term, investment grade municipal obligations, the interest on which is exempt from federal income taxes in the opinion of bond counsel to the issuer.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended August 31, 2009, the Trust returned 14.81% based on market price and 8.18% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 5.73% on a market price basis and 1.06% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Trust s heavy concentrations in lower-rated and longer-dated securities enhanced performance in recent months as the yield curve flattened and credit spreads tightened. Performance was supported throughout the period by an above-average dividend yield, as we focused on maximizing coupon structure and minimizing cash levels. On the other hand, the Trust suffered from poor positioning during the fourth quarter of 2008. Specifically, prices of long-maturity bonds fell disproportionately compared to shorter-dated bonds. In addition, credit spreads, a common gauge of liquidity and risk tolerance, widened as investors sought to minimize risk exposure due to rapidly deteriorating credit fundamentals. The Trust exhibited greater sensitivity to both factors than many of its Lipper peers.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

10 ANNUAL REPORT AUGUST 31, 2009

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of August 31, 2009 and 2008, the market value of these securities was \$16,779,679 representing 2% and \$14,242,697 representing 2%, respectively, of the Trust s long-term Investments.

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, the Trusts issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of the Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trust s Common Shareholders will benefit from the incremental net income.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the Preferred Shares issuance earn the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the Trust s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup on the Common Shares will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays dividends on the higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trust s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trust s Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust s NAV positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

The Trusts may also leverage their assets through the use of tender option bond (TOB) programs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect the Trusts NAV per share.

The use of leverage may enhance opportunities for increased income to the Trusts and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAVs, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Trusts net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. The Trusts may be required to sell portfolio securities at inopportune times or distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trusts to incur losses. The use of leverage may limit the Trusts ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by a Trust. The Trusts will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Trust anticipates that the total economic leverage from Preferred Shares and TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of August 31, 2009, the Trusts had economic leverage from Preferred Shares and TOBs as a percentage of their total managed assets as follows:

Percent of Leverage

BYM	36%
BAF	37%
BBK	39%
BIE	39%
BLE	39%
MFL MVF	39% 42%
MVF	42%

Derivative Financial Instruments

The Trusts may invest in various derivative instruments, including financial futures contracts and swap agreements as specified in Note 2 of the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction and illiquidity of the derivative instrument. The Trusts—ability to successfully use a derivative instrument depends on the investment advisor—sability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio securities at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment or may cause a Trust to hold a security that it might otherwise sell. The Trusts—investments in these instruments are discussed in detail in the Notes to Financial Statements.

* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 499,269,892
Gross unrealized appreciation Gross unrealized depreciation	\$ 21,096,417 (27,874,296)
Net unrealized depreciation	\$ (6,777,879)

(a) When-issued security.

Counterparty	М	Market Value		nrealized preciation
Oppenheimer & Co., Inc.	\$	543,590	\$	16,621
Siebert Brandford Shank & Co. LLC	\$	227,790	\$	6,965
Morgan Keegan & Co., Inc.	\$	1,897,491	\$	50,286
Prager, Sealy & Co. LLC	\$	1,222,836	\$	16,836

- (b) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (c) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (d) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (e) Securities represent bonds transferred to tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (f) Security may have a maturity of more than one year at time of issuance, but has variable rate and demand features that qualify it as a short-term security. Rate shown is as of report date and maturity shown is the date the principal owed can be recovered through demand.

See Notes to Financial Statements.

14	ANNUAL REPORT	AUGUST 31, 2009

Schedule of Investments (concluded)

BlackRock Insured Municipal Income Trust (BYM)

(g) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	A	Net Activity Inco		Income
FFI Institutional Tax-Exempt Fund	\$	240,680	\$	72,258

(h) Represents the current yield as of report date.

Effective September 1,2008,the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of August 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Securities Level 2:	\$ 4,401,744
Long-Term Investments ¹	542,616,265
Short-Term Securities	4,200,000
Total Level 2	546,816,265
Level 3	
Total	\$ 551,218,009

1	See above Schedule of Investments for values in each s	tate or political classification.

^{*} The cost and unrealized appreciation (depreciation) of investments as of August 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$	164,405,343
	_	
Gross unrealized appreciation	\$	4,937,311
Gross unrealized depreciation		(5,499,950)
Net unrealized depreciation	\$	(562,639)
	_	

(a) When-issued security.

Counterparty	Market Value	Unrealized Appreciation
Wells Fargo Bank NA	\$129,426	\$4,545
Morgan Keegan & Co., Inc.	\$248,499	\$8,727
Raymond C Forbes & Co., Inc.	\$129,426	\$4,545

- (b) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (c) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (d) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (e) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA Florida Municipal Money Fund	\$ (4,278,740)	\$ 29,260
FFI Institutional Tax-Exempt Fund	\$ 9,202,751	\$ 6,767

(f) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. This definition may not apply for purposes of this report, which may combine sector sub-classifications for reporting ease.

Effective September 1,2008,the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of August 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation	luation Inputs		Investments in Securities		
		_	Assets		
Level 1	Short-Term Securities	\$	9,202,756		
Level 2 Level 3	Long-Term Investments		183,337,305		
Total		\$	192,540,061		

¹ See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.

ANNUA	AL REPORT	AUGUST 31, 2009		21

Schedule of Investments (concluded)

BlackRock Municipal Bond Trust (BBK)

* The cost and unrealized appreciation (depreciation) of investments as of August 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 224,770,976
Gross unrealized appreciation	\$ 9,430,484
Gross unrealized depreciation	(14,507,124)
Net unrealized depreciation	\$ (5,076,640)

(a) When-issued security.

Counterparty	N	Market Value		nrealized preciation
Oppenheimer & Co., Inc.	\$	310,623	\$	9,498
Siebert Brandford Shank & Co. LLC	\$	103,541	\$	3,166
Morgan Keegan & Co., Inc.	\$	465,934	\$	17,970
Securevest Financial Group	\$	1,192,826	\$	27,013
Merrill Lynch and Co.	\$	982,910	\$	8,710
Piper Jaffray & Co.	\$	695,607	\$	15,213
Citigroup Inc.	\$	1,153,603	\$	19,105

- (b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (d) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (e) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (f) Non-income producing security.
- (g) Issuer filed for bankruptcy and/or is in default of interest payments.
- (h) Variable rate security. Rate shown is as of report date.
- (i) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity, and is subject to mandatory redemption at maturity.

Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.

(k) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	1	Income	
FFI Institutional Tax-Exempt Fund	\$ 1,500,291	\$	51,058	

(l) Represents the current yield as of report date.

Effective September 1,2008,the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of August 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Securities Level 2 Long-Term Investments	\$ 3,400,718 222,192,766
Total	\$ 225,593,484

See above Schedule of Investments for values in each state or political classification.

See Notes to Financial Statements.
