**CAMTEK RECEIVES REPEAT ORDERS FOR FALCONS
FROM A WORLD TOP-10 SEMICONDUCTOR MANUFACTURER**

The new orders, valued at \$1.3 million, bring total systems with this customer to eight

MIGDAL HA EMEK, Israel, December 5, 2005 Camtek Ltd. (Nasdaq: CAMT) announced today that it has received follow on orders for Camtek's Falcon wafer inspection system from a leading international semiconductor manufacturer headquartered in Texas, a top-10 semiconductor supplier. These orders, totaling around US\$1.3 million, bring the number of Falcons purchased by this customer this year to eight systems.

The previous systems have been installed in the customer's facilities in the US and Japan and revenues have already recognized over the last three quarters. The new orders are for plants in Texas and South-East Asia. Camtek expects to deliver the new systems and recognize their respective revenues during the first quarter of 2006.

Tommy Weiss, VP of marketing and sales at Camtek USA, said: "While the Falcon was qualified by the customer's headquarters for worldwide purchasing, each individual plant evaluated the system for its own needs and selected it over the other alternatives based on performance. Of particular interest was the Falcon's capability to monitor probe marks – the indentations left in the interconnect pads during functional testing. We are proud to have been repeatedly selected by this important customer, and are looking forward to continue developing this long-term partnership.

Mr. Rafi Amit, Camtek's CEO added: "Supplying eight systems, in less than a year to a leading customer, demonstrates our ability to capitalize on the Falcon's success in evaluations. Winning repeat orders for multiple locations from such a major manufacturer leads us to believe that we are well positioned to receive numerous additional orders from similar customers, driving our growth and improving our profitability.

ABOUT FALCON

Camtek's line of automated wafer inspection systems, Falcon, helps semiconductor manufacturers, bumping houses and packaging foundries monitor processes and enhance yield. Falcon models deliver superb 2D and 3D inspection and metrology capabilities for wafers before or after test, along the bumping process or after dicing.

ABOUT CAMTEK LTD.

With headquarters in Migdal Ha Emek Israel, Camtek Ltd., designs, develops, manufactures, and markets automatic optical inspection systems and related products. Camtek's automatic inspection systems are used to enhance both production processes and yield for manufacturers in the printed circuit board industry, the high density interconnect substrate industry and the semiconductor manufacturing and packaging industry. This press release is available at www.camtek.co.il.

This press release may contain projections or other forward-looking statements regarding future events or the future performance of the Company. These statements are only predictions and may change as time passes. We do not assume any obligation to update that information. Actual events or results may differ materially from those projected, including as a result of changing industry and market trends, reduced demand for our products, the timely development of our new products and their adoption by the market, increased competition in the industry, price reductions as well as due to risks identified in the documents filed by the Company with the SEC.
