Yona Ovadia, CEO of Gilat, commented:

“I am pleased to report that our strong fourth quarter concludes a year of important progress for Gilat as we advanced our business strategy and achieved substantial profitability growth.

“We were successful in achieving our objectives through our continued focus on our growth engines of Broadband, Mobile Cellular Backhaul and Mobility IFC, along with continued efforts to drive costs out of the business.

“We secured significant Broadband business around the globe over the past year including: NBN in Australia, Gazprom in Russia, ChinaSatcom in China, LASCOM in Japan, Hispasat in Latin America and ISRO in India. In the Mobile market, we continued as the front-runner in the LTE/4G satellite backhaul market with expansion of projects with existing customers and additional contract wins such as Telstra in Australia. In the Mobility market, we reached an important milestone with our dual-band aero terminal by passing the standard for the environmental testing of avionics hardware and receiving the DO-160 certification. Lastly, we continued investing in product leadership, as demonstrated by the successful trials for aero and maritime connectivity solutions over Telesat's phase 1 LEO satellite, as well as the announcement of the 5G-ready powerful solution that provides new levels of speeds and capabilities, in support of the growing demand of data consumption.

“Further, we executed our plan to improve profitability, with the result that GAAP operating income for full-year 2018 increased 96.0% from 2017, while Adjusted EBITDA rose 34.6% and GAAP net income reached \$18.4 million or \$0.33 per diluted share.”

Mr. Ovadia concluded:

“Looking at 2019, we will continue our focus on improving profitability, by further developing and expanding our existing growth engines, as we see continued reception to our services and solutions. As the market constantly evolves and requires higher throughputs and greater efficiency, we will also continue to invest substantially in R&D and in our product roadmap, to maintain product leadership especially in the era of NGSO and 5G.

“I am pleased to say that we have a substantial pipeline going into 2019, which is reflected in our management objectives that include further revenue and profitability growth for the year, even with a significant investment in R&D.

“I am also pleased to say that with this continued and significant progress and the strength of the Gilat balance sheet, the Board is planning to award a cash dividend to shareholders while maintaining our ample liquidity to fund future growth.”

Non-GAAP Measures

The attached summary unaudited financial statements were prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP). To supplement the consolidated financial statements presented in accordance with GAAP, the Company presents Non-GAAP presentations of net income, operating income, Adjusted EBITDA and earnings per share. The adjustments to the Company's GAAP results are made with the intent of providing both management and investors a more complete understanding of the Company's underlying operational results, trends and performance. Non-GAAP financial measures mainly exclude the effect of stock based compensation, amortization of purchased intangibles, litigation expenses, income related to trade secrets claims and expenses for tax contingencies to be paid under an amnesty program and initial recognition of deferred tax asset with respect to carry-forward losses.

Adjusted EBITDA is presented to compare the Company's performance to that of prior periods and evaluate the Company's financial and operating results on a consistent basis from period to period. The Company also believes this measure, when viewed in combination with the Company's financial results prepared in accordance with GAAP, provides useful information to investors to evaluate ongoing operating results and trends. Adjusted EBITDA, however, should not be considered as an alternative to operating income or net income for the period and may not be indicative of the historic operating results of the Company; nor is it meant to be predictive of potential future results. Adjusted EBITDA is not a measure of financial performance under GAAP and may not be comparable to other similarly titled measures for other companies. Reconciliation between the Company's Operating income and Adjusted EBITDA is presented in the attached summary financial statements.

This news release also contains a forward-looking estimate of Adjusted EBITDA projected to be generated by Gilat in 2019. A forward-looking estimate of net income and reconciliations of the forward-looking estimates of Adjusted EBITDA to net income are not provided because the items necessary to estimate net income are not estimable at this time. Non-GAAP presentations of net income, operating income, Adjusted EBITDA and earnings per share should not be considered in isolation or as a substitute for any of the consolidated statements of operations prepared in accordance with GAAP, or as an indication of Gilat's operating performance or liquidity.
