

Surface Spill Response and Containment

Work continues to collect and disperse oil that has reached the surface of the sea, to protect the shoreline of the Gulf of Mexico, and to collect and clean up any oil that has reached shore.

Over 1,600 vessels are now involved in the response effort, including skimmers, tugs, barges and recovery vessels. Operations to skim oil from the surface of the water have now recovered, in total, some 321,000 barrels (13.5 million gallons) of oily liquid.

The total length of containment boom deployed as part of efforts to prevent oil reaching the coast is now over 1.9 million feet, and an additional 1.8 million feet of sorbent boom has also been deployed.

So far approximately 30,000 claims have been submitted and more than 15,000 payments already have been made, totalling some \$40 million. BP has received more than 110,000 calls into its help lines to date.

Additional information

The cost of the response to date amounts to about \$990 million, including the cost of the spill response, containment, relief well drilling, grants to the Gulf states, claims paid and federal costs. It is too early to quantify other potential costs and liabilities associated with the incident.
