Honda Begins Construction of Third Motorcycle Plant in Indonesia

Bekasi, West Java, September 8, 2004 PT Astra Honda Motor Inc., Honda's joint venture company in Indonesia responsible for motorcycle production and sales, today announced it has begun construction of its third manufacturing plant. The new plant will be located in MM2100 Industrial Town in Bekasi, 33 kilometers southeast of Jakarta. The total investment is expected to be approximately US\$100 million (equivalent to ¥11 billion*) and the plant will become operational in October 2005 with an annual capacity of approximately 1 million units.

*¹ US\$1 = ¥110

Honda began production of motorcycles in Indonesia in 1971 with a technical partnership with PT Federal Motor. In 2000, PT Astra Honda Motor Inc., a 50/50 joint venture between PT Astra International and Honda, was established to pursue production of motorcycle parts, motorcycle engine and chassis assembly, and sales. In 2003, PT Astra Honda Motor became Honda's first overseas operation to achieve cumulative motorcycle production of 10 million units. The motorcycle market in Indonesia, the third largest in the world, expanded to 3.1 million units in 2003, a 22% increase from 2002. As the market is expected to grow even more in 2004 to approximately 4 million and beyond, Honda is enhancing its production capacity by adding a new plant, to swiftly respond to the increasing demands.

About P.T. Astra Honda Motor

Establishment:	December 2000
Operations began:	January 2001
Location:	Jakarta, Indonesia
Capital:	185 billion rupiah
Capitalization Ratio:	50% Honda Motor Co., Ltd. / 50% P.T. Astra International
Representative:	Minoru Yamashita
Business Activities:	Motorcycle parts production, motorcycle engine and chassis assembly, motorcycle sales

Honda Motorcycle & Scooter India Announces First Motorcycle Model;

Production of New Unicorn Model Begins on New Second Line

New Delhi, September 8, 2004 Honda Motorcycle & Scooter India (Private) Ltd. (HMSI), Honda's wholly owned subsidiary in India, today introduced its first motorcycle model Unicorn with an air-cooled, 4-stroke, single-cylinder, 150cc engine. HMSI also announced that production of the Unicorn has begun on a new second production line dedicated to motorcycles.

Unicorn is a sporty motorcycle with excellent driving stability due to its mono suspension. Unicorn's newly developed engine achieves top level fuel efficiency in the 150cc motorcycle class 60km per liter^{*1}. In addition, Unicorn has unique features to achieve excellent usability such as tough up tube that helps prevent flat tires. The Unicorn will go on sale in October 7, at a price of 52,950 rupee (approximately ¥127,000 yen^{*2}). HMSI plans to sell 110,000 units per year.

The second production line dedicated to motorcycle production the MC line is located in a new building adjacent to the existing first line which is dedicated to scooter production. Production of the Unicorn began September 1, 2004. The 2nd line's annual production capacity for the 1st year is 150,000 units, with an initial investment of approximately 1.6 billion rupee (approximately ¥3.8 billion yen).

The total market size for motorcycles and scooters in India has reached 5.3 million units in 2003 (a 7% increase from the previous year), with motorcycles accounting for 4.1 million units (a 12% increase from the previous year). Motorcycles have been the driving force of market expansion in India.

HMSI began production of scooters in May, to start sales in June 2001, and has become the leading scooter manufacturer in the country. The company began exports of the 100cc scooter, LEAD, to European markets in 2003. By adding its first motorcycle model, Unicorn, HMSI will enhance the product lineup to better meet the diversifying needs of the market.

Honda Begins Production of Fit Hatchback in China

September 13, 2004 Guangzhou Honda Automobile Co., Ltd., Honda's automobile production and sales joint venture in China, began production September 12, of Fit, a new small car for the China domestic market. Fit will go on sale September 22.

Beginning production in March 1999 with the Accord, Guangzhou Honda has responded to customer needs in China by offering a product lineup ranging from mid- and high-end cars to economy cars, which now also includes the Odyssey and Fit Saloon. By adding the 5-door Fit, to the existing economy car lineup of 1.3 liter and 1.5 liter Fit Saloon models, Guangzhou Honda will be better able to meet the needs of the potentially large market of middle class individual car buyers. To date, sedans have been the focus of the Chinese auto market. However, Guangzhou Honda wants to create a new trend by developing the 5-door hatchback segment.

China is the fifth country to produce the Fit after Japan, Brazil, Thailand, and Indonesia. The Fit first became popular in Japan, but has also been well-received in more than 70 countries in Europe, Asia and South America earning recognition as a global model along with the Accord, Civic and the CR-V. Since it was first introduced a little more than 3 years ago, cumulative sales of the Fit now exceed 850,000 units.

From January through August of 2004, the automobile passenger market in China has grown to roughly 1.62 million units (+21% compared to the same period in 2003). Sales at Guangzhou Honda have risen to approximately 117,000 units during this same period (+70.2%).

Honda Announces 2005 Motorcycle Models for Europe

Munich, Germany; September 13, 2004 Honda Europe Motorcycle S.R.L. today revealed the new 2005 motorcycle models for the European market, on exhibit at INTERMOT München (Munich Motor Show), a major international motorcycle exhibition held this year from September 14 to 19.

Honda's motorcycles for the new model year offer European customers exciting new performance. The CBR600RR, based on the advanced technologies featured on Honda's RC211V MotoGP champion, offers improved performance, while the new mid-class FMX650, aimed at the popular European motard market, further reinforces the Honda lineup.

In addition, Honda continues to enhance environmental and safety performance. A new version of the CB1300 joins the growing lineup to feature the Antilock Braking System (ABS), and the Zoomer, a 50cc scooter highly popular in Japan, is now equipped with Programmed Fuel Injection (PGM-FI).

Key features of the models featured at the exhibition are as follows:

CBR600RR

The CBR600RR is a mid-size supersport bike equipped with a liquid-cooled, four-stroke, in-line, four-cylinder, 600cc engine. First introduced in 2003, this motorcycle features advanced technologies and styling developed for the RC211V, Honda's MotoGP machine, and has been very well received in Japan, Europe, and North America. The 2005 model for Europe features a lighter frame and improved suspension (including the inverted front fork and radial-mount front brake calipers used in the RC211V and CBR1000RR), providing improved performance and handling stability. The CBR600RR will be released in European markets starting at the end of 2004, and annual European sales are projected to reach 12,000 units.

The 2005 CBR600RR (European model)

The New FMX650

Table of Contents

FMX650

The new FMX650 is a dual sport model featuring an air-cooled, four-stroke, single-cylinder, 650cc engine and super motard styling. With fun motoring as its design concept, the FMX650 is equally at home in the city or out on the highway. Starting in spring 2005, the FMX650 will be released in a wide range of European markets. The FMX650 is manufactured by Honda affiliate Montesa Honda S.A. of Spain, and annual European sales are projected to reach 7,000 units.

CB1300 and CB1300 ABS

The CB1300 is a naked sports motorcycle with a liquid-cooled, four-stroke, in-line, four-cylinder, 1300cc engine. The 2005 model features improved throttle response at lower speeds, and the CB1300 ABS Antilock Braking System-equipped model is now also available. Manufactured at the Hamamatsu Factory in Japan, CB1300 and CB1300 ABS are scheduled to be released in European markets starting in spring 2005. The combined annual European sales for the two bikes are projected to reach 2,000 units.

Zoomer

The Zoomer, new to the European market, features cool naked styling and a liquid-cooled, four-stroke, single-cylinder, 50cc engine. Introduced in 2001 in Japan, it was developed by Honda's N Project team, which focuses on the individualistic youth segment. The Zoomer has since been released in the North American market as well. The 2005 Zoomer will be the first 50cc scooter sold in Europe to feature Honda's advanced Programmed Fuel Injection (PGM-FI), which not only improves fuel economy and reduces emissions, but also achieves smooth acceleration and even greater engine reliability. Starting in fall 2004, the 2005 Zoomer will be released in a wide range of European markets. The Zoomer is manufactured at the Kumamoto Factory in Japan, and annual European sales are projected to reach 5,000 units.

*The N(New)project is a development team comprised of young designers dedicated to creating new products specifically designed to appeal to the unique needs and wants of a younger generation.

Best-selling Fit Lifts Honda's August Sales to Number Two in Japanese Market

September 27, 2004 Honda Motor Co., Ltd. today announced production, domestic sales, and export results for the month of August. With introduction of several new models and a minor model change of the Fit, Honda's monthly sales ranked second among automakers in Japan for the first time in the last eight months. The Fit was also Japan's best selling car in August for the first time since it achieved the position in August 2003. (The Honda Odyssey also ranked as a monthly best-seller in January of this year.)

Both domestic and overseas production showed substantial increases in August, up 12.6% and 21.6% respectively, compared to the same month a year ago. Domestic production has now increased for three consecutive months due to strong domestic sales, while overseas production has increased for seven consecutive months due primarily to a major increase in production in North America, Europe and Asia.

Total domestic sales increased 8.8% in August compared to the same month last year placing Honda second in the Japanese automobile market for the first time since December 2003. The Honda Fit, which received a minor model change in June, became Honda's and the industry's best selling car for the month on sales of 11,663 units. Further, the Life and Odyssey models remained strong, with sales of 9,481 units and 5,730 units, respectively, while newly introduced models such as Edix and Elysion also made positive contributions to the sales increase, with 4,903 units and 3,444 units, respectively.

Total exports in August declined by 3.1% compared to the same month last year. The remodeled Fit also was well received in Europe and contributed to a 72.9% increase in exports to Europe this month compare to August 2003.

PRESS RELEASE

HONDA FOUNDATION ANNOUNCES

THE HONDA PRIZE FOR THE YEAR 2004 WILL BE AWARDED TO

DR. WALTER C. WILLETT, PROFESSOR OF EPIDEMIOLOGY AND NUTRITION,

HARVARD SCHOOL OF PUBLIC HEALTH, U.S.A.

Honda Foundation (Founder: Soichiro Honda, President: Hiromori Kawashima) announced that it has decided to confer the Honda Prize for the year 2004 on Dr. Walter C. Willett (59), Professor of Epidemiology and Nutrition, Harvard School of Public Health, U.S.A. Among the 25 laureates of the Honda Prize, Dr. Willett will be the fifth American and the third medical scientist to receive the prize.

Dr. Willett pioneered the development of a dietary assessment tool which later became known as the Food Frequency Questionnaire (FFQ). In 1980, he commenced an 18-year large-scale FFQ epidemiologic diet survey (cohort research) on a cumulative total of 300 thousand men and women nationwide. This research convincingly proved diet plays a major role in the outbreak and prevention of chronic ailments like cancer, cardiac diseases, and diabetes. The results helped clarify the relationship between specific diseases and various food ingredients like fat, alcohol, and dietary fiber. They also serve as the basis for the importance of vitamins and supplements such as folic acid and beta-carotene in a healthy diet.

Before Dr. Willett developed FFQ, it was very difficult to show how diet was related to chronic diseases on a case-by-case basis although diet was thought to play an important role. Researchers worldwide followed Dr. Willett's lead and conducted similar epidemiologic studies. As a result, nutritional epidemiology underwent a fundamental change and dramatic advances were realized. This is especially true in the field of elucidating the relationship between diet and maladies such as cancer and cardiac diseases.

Table of Contents

Honda Foundation believes that Dr. Willett's achievements are consistent with Eco-Technology* - a genuine technology which is advocated by the foundation. Dr. Willett, the 25th laureate of the Honda Prize, will be awarded a supplemental prize of 10 million yen. The award ceremony will be held at Hotel Okura, Tokyo, Japan on Wednesday, November 17, 2004.

*Eco-Technology is the term coined to denote the harmonious development of ecology and technology. It is a technological concept for future society which values technological advances in harmony with the environment surrounding human activities, rather than the traditional pursuit and use of technology solely for efficiency and profit.

To Our Shareholders

Performance Highlights (First Quarter Results)

Honda's consolidated net income for the fiscal first quarter ended June 30, 2004 totaled ¥114.2 billion (\$1,054 million), an increase of 12.2% from the corresponding period in 2003. Basic net income per common share for the quarter amounted to ¥121.65 (\$1.12), compared to ¥106.02 for the same period in 2003. Two of Honda's American Depositary Shares represent one common share.

Unit sales in all of Honda's business categories relating to products, namely motorcycles, automobiles and power products, increased during the fiscal first quarter, and consolidated net sales and other operating revenue (herein referred to as revenue) for the quarter amounted to ¥2,073.1 billion (\$19,120 million), an increase of 3.2% over the corresponding period in 2003. Revenue included currency translation effects and was negatively affected by the translation of foreign currency denominated revenue from Honda's overseas subsidiaries into yen. Honda estimates that if the exchange rate of yen had remained unchanged from that in the corresponding period in 2003, revenue for the quarter would have increased approximately 7.7%.

Consolidated operating income for the fiscal first quarter totaled ¥159.9 billion (\$1,476 million), an increase of 0.3% compared to the corresponding period in 2003. This increase was primarily due to the growth in revenue as a result of higher unit sales of automobiles, motorcycles and power products as well as ongoing cost reduction effects, which offset the negative effects of the depreciation of the U.S. dollar.

Consolidated income before income taxes and equity in income of affiliates for the quarter totaled ¥174.0 billion (\$1,605 million), an increase of 17.6% from the corresponding period in 2003.

Review of Operations

With respect to Honda's sales in the fiscal first quarter by business category, motorcycle unit sales increased 29.0%, to 2,582 thousand units. Of them, unit sales in Japan increased 3.2%, to 97 thousand units, and overseas unit sales increased 30.3%, to 2,485 thousand units. Revenue increased 13.5%, to ¥274.0 billion (\$2,528 million). This increase was mainly due to increased unit sales, which offset the negative impact of the appreciation of the yen against the U.S. dollar. Operating income increased 197.6%, to ¥17.1 billion (\$159 million).

Honda's unit sales of automobiles for the quarter increased 9.0%, to 772 thousand units. In Japan, unit sales of automobiles increased 0.7%, to 154 thousand units, and overseas unit sales increased 11.4%, to 618 thousand units. Revenue increased 2.1%, to ¥1,655.1 billion (\$15,265 million), primarily due to increased unit sales, offsetting negative currency translation effects. Operating income decreased 5.3%, to ¥115.6 billion (\$1,067 million), mainly due to negative currency effects caused by the depreciation of the U.S. dollar, which offset positive impacts of higher profit from increased revenue and ongoing cost reduction effects.

Revenue from financial services for the quarter decreased 7.1%, to ¥59.4 billion (\$548 million). Operating income decreased 26.8%, to ¥22.2 billion (\$205 million).

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Unit sales of power product for the quarter totaled 1,387 thousand units, an increase of 14.0% compared to the corresponding period in 2003. Of them, unit sales in Japan totaled 118 thousand units, an increase of 7.3%, and overseas unit sales increased 14.6%, to 1,269 thousand units. Revenue from power products and other businesses increased 3.3%, to ¥88.5 billion (\$817 million), primarily due to increased unit sales of power products, offsetting negative currency translation effects. Operating income increased 332.9%, to ¥4.8 billion (\$45 million).

Honda Accord V6 Hybrid : Honda's Best-Selling Vehicle Goes Hybrid

American Honda Motor Co., Inc., released the first images of its 2005 *Accord V6 Hybrid*, a gas electric hybrid version of Honda's best-selling car, scheduled to go on sale at Honda dealerships nationwide later this year. Utilizing a next-generation hybrid powertrain, the *Accord V6 Hybrid* will deliver power and performance above the current 240-horsepower *Accord V6* with the fuel economy of a compact-class, four-cylinder *Civic* sedan.

Putting hybrid technology into our most popular model is a further indication of Honda's commitment to hybrid technology and our confidence that consumers are ready for more hybrid models," said Tom Elliot, executive vice president of American Honda Motor. "The *Accord V6 Hybrid* delivers both increased performance and higher fuel economy. It takes hybrid technology into all new territory.

With leading-class performance and fuel efficiency provided by a highly advanced and super-efficient hybrid V6 powertrain, the *Accord V6 Hybrid* will produce in excess of 240 horsepower with near-peak torque available across the engine's full operating range for exhilarating performance with superb acceleration, passing power and cruising comfort. Honda's innovative new Variable Cylinder Management (VCM) technology further enhances the efficiency of the *Accord V6 Hybrid* by deactivating three of the engine's six cylinders during cruising and deceleration with no impact to vehicle performance or passenger comfort.

Accord V6 Hybrid

Honda's advanced and super-efficient Integrated Motor Assist (IMA) hybrid system utilizes a high-output electric motor/generator to provide for more efficient engine operation by capturing electrical energy during braking or deceleration and using that energy to help power the vehicle. In addition, the system features the ability to shut off the engine during vehicle stops for further efficiency gains. The resulting savings in fuel consumption, along with VCM cylinder deactivation, provides for fuel economy comparable to a compact-class *Civic* sedan powered by a four-cylinder engine.

The *Accord V6 Hybrid*'s exterior has a number of exclusive features, including a unique front grille design, new taillight appearance and special hybrid badging, along with a rear trunk lid spoiler and exclusive alloy wheel design for improved aerodynamics.

Japan

Honda Introduces New 3x2 Edix Mini-Van

Edix

Honda Motor Co., Ltd., introduced *Edix*, a distinctive new mini-van featuring six independent seats in two rows of three (3x2 layout), creating a variety of communication-enhancing seating arrangements in an easy-to-handle vehicle with a short, wide body. The *Edix* went on sale July 8 at Honda automobile dealers throughout Japan.

The 3x2 design of the *Edix* delivers new value, offering a versatile communication space that enables occupants to share the fun of mobility as never before. Six independent seats are arranged in two rows of three, with the front and rear center seats mounted on long slides that allow for a V-pattern seat layout. This provides three-person, side-by-side seating without excessive vehicle width. What's more, the long slide mechanism on the front center seat makes it possible to position the seat well back of the instrument panel and any deploying airbags, permitting the safer installation of a child seat¹. This 3x2 layout enables passengers to flexibly position their seats based on the number and relationship of the occupants, creating a new type of communication space that allows occupants of the front and rear rows to share the same view and conversation.

The *Edix* mini-van offers numerous other advantages as well, such as a short, wide stance that helps create a dynamic, wedge-style exterior and a spacious, modern interior with a high-quality feel. Furthermore, despite the modest overall length, the *Edix*'s wide tread ensures stable handling and a smooth ride, combined with versatile seating that provides ample cargo space, even with six passengers on board.

¹ Except infant seat. Accommodates a child or junior seat up to 460mm in width. A child seat can only be installed with the rear center seat slid back and the front center seat in the rear-most position.

* *Edix* is the combination of *edit* and *six*, expressing the concept of a six-passenger mini-van that allows occupants to freely *edit* their interior environment for maximum enjoyment.

Honda Begins Sales of New 50cc Scooter in China

Ziyou Today

Sundiro Honda Motorcycle Co., Ltd., Honda's motorcycle production and sales joint venture in China, has begun sales in the Chinese market of the *Ziyou Today* 50cc scooter (in Japan, it is marketed as the *Today*).

Ziyou Today achieves excellent environmental performance, adopting the Euro 1 emission standard required in China and offering high fuel efficiency. In addition, *Ziyou Today* offers enhanced features, including an antitheft system. This high-quality and highly reliable scooter is being launched to offer new value for customers in China. The annual sales target of the *Ziyou Today* is estimated at approximately 50,000 units.

Ziyou Today is the Chinese version of the *Today*, first introduced to Japan in August 2002. Sundiro Honda has been manufacturing and exporting the *Today* to nine countries around the world, including Japan, Australia, New Zealand and Mexico. In Japan, the *Today* has been well received with total sales of more than 200,000 units from its introduction in August 2002 through May 2004.

The Chinese motorcycle market is estimated at 12 million units in 2004, with 50cc scooters estimated to account for one million of that total.

- Notes: 1. Geographical segmentation is based on the location where sales originated.
2. Asia was previously included in Other Regions. From the first half ended September 30, 2003, it is separately presented in the Geographical Segment.
3. Certain reclassifications have been made to the geographical segment information of the prior year's fiscal first quarter to conform to the presentation used for the fiscal first quarter ended June 30, 2004.

Overseas Sales

For the three months ended June 30, 2004

Millions of yen				
North America	Europe	Asia	Other Regions	Total

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Overseas sales	¥ 1,105,015	¥ 233,079	¥ 233,564	¥ 117,645	¥ 1,689,303
Consolidated sales					¥ 2,073,153
Overseas sales ratio to consolidated sales	53.3%	11.2%	11.3%	5.7%	81.5%

For the three months ended June 30, 2003

Overseas sales	¥ 1,176,778	¥ 205,344	¥ 192,182	¥ 82,628	¥ 1,656,932
Consolidated sales					¥ 2,008,228
Overseas sales ratio to consolidated sales	58.6%	10.2%	9.6%	4.1%	82.5%

Note: Asia was previously included in Other Regions. From the first half ended September 30, 2003, it is separately presented in overseas sales. Certain reclassifications have been made to the overseas sales of the prior year's fiscal first quarter to conform to the presentation used for the fiscal first quarter ended June 30, 2004.

Table of Contents

Explanatory Notes:

1. The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States because the Company has issued American Depositary Receipts listed on the New York Stock Exchange and files reports with the U.S. Securities and Exchange Commission. All segment information, however, is prepared in accordance with a Ministerial Ordinance under the Securities and Exchange Law of Japan.
2. The average exchange rates for the fiscal first quarter ended June 30, 2004 were ¥109.77=U.S.\$1 and ¥132.28= 1. The approximate exchange rates for the corresponding period last year were ¥118.50=U.S.\$1 and ¥134.66= 1.
3. U.S. dollar amounts have been translated from yen solely for the convenience of the reader at the rate of ¥108.43=U.S.\$1, the approximate exchange rate prevailing on the Tokyo Foreign Exchange Market on June 30, 2004.
4. The Company's common stock-to-ADR exchange rate was changed from two shares of common stock to one ADR to one share of common stock to two ADRs, effective January 10, 2002.
5. The Company has adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 130, Reporting Comprehensive Income. The following table represents components of the Company's comprehensive income. Other comprehensive income consists of changes in adjustments from foreign currency translation, net unrealized gains on marketable equity securities and minimum pension liabilities adjustment.

For the three months ended June 30

	Millions of yen	
	2003	2004
Net income	¥ 101,819	¥ 114,262
Other comprehensive income	24,964	32,177
Comprehensive income	¥ 126,783	¥ 146,439

6. Certain gains and losses on sale and disposal of property, plant and equipment, which were previously recorded in other income (expenses), have been reclassified to selling, general and administrative expenses and net realized gains and losses on interest rate swap contracts not designated as accounting hedges by finance subsidiaries, which were previously recorded in cost of sales, have been included in other income (expenses) other in the prior year's fiscal fourth quarter, respectively. Accordingly, those reclassifications have been made to the consolidated statements of income and retained earnings and to the segment information of the prior year's fiscal first quarter to conform to the presentation used for the fiscal first quarter ended June 30, 2004.
7. The number of treasury stock has been excluded from the calculation for basic net income per common share.
