Highlights of the Period

ADSL - is offered under the brand name **SPEEDY** and reached 715,600 clients in September 2004, increasing 18.2% in relation to the 2Q04, when there were 605,548 clients. In relation to the 423,548 clients registered in September 2003, the growth is 69.0%.

Alternative Plans - In July 2004, Telesp announced to its clients and users in general the launching of a promotion through the Alternative Plans for the local service **Economy Line** and **Super Economy Line** and for the Domestic Long Distance service **Economy Line Card** for fixed phones in its concession area. With the **Economy Line**, the client pays a monthly fee of R\$22.30 and is able to make local calls (fixed-to-fixed) to be charged in the monthly bill. In order to make long distance calls or calls to cellular numbers, a pre-paid card that grants the

credits is required. With the Super Economy Line, the client pays a monthly fee of R\$11.15 and the telephone only receives calls. In order to make any calls, the pre-paid card is required. Until the end of the third quarter, 600,000 Economy and Super Economy Lines were sold.

The net operating revenues at the end of the 9M04 were R\$9,862.1 million and when compared to the revenues recorded in the 9M03, an increase of R\$1,253.5 million, or 14.6%, is shown. This is explained by the tariff increases in 2003 and 2004, besides the growth in the SPEEDY service and long distance services. In the quarterly comparison, an increase of R\$271.9 million, or 8.6%, was registered due to the same reasons.

The accumulated EBITDA margin for the 9M04 was 45.0%, while it reached 46.8% for the quarter, the highest values along the year. When comparing the 9M04 with the 9M03 a drop of 1.4 p.p. is noted, mainly as a result of the increase in interconnection expenses (as a reflection of the growth in long distance traffic using the access code 15 and the increase of fixed-to-mobile traffic) and outsourcing. When comparing the 3Q04 with the 3Q03, a fall of 1.4 p.p. was also recorded, chiefly due to the higher expenses with materials and outsourcing.

The consolidated Capex (committed) accumulated until September 2004 was R\$883.1 million. This number is in line with the investment needs of the Company and confirms the long-term interest of the Telefónica Group in Brazil.

The total indebtedness of the Company as of September 30, 2004 was R\$2,068.6 million including hedging operations. The net debt of the Company of R\$1,689.7 million results from subtracting R\$378.9 million of cash and cash equivalent. For comparison reasons, as of June 30, 2004, the indebtedness of the Company was R\$3,441.7 million including hedging operations. The R\$2,767.9 million of net debt as of June 30, 2004 results from subtracting R\$673.7 million of cash and cash equivalent. In September 2004, the settlement of the contract with Comtel in the amount of R\$944.2 million was carried on.

Highlights about revenues

Gross Operating Revenues by the end of the 9M04 reached R\$13,619.9 million, a R\$1,801.5 million or 15.2% increase compared to the same period of the previous year. When comparing the 3Q04 with the 3Q03, the revenues grew R\$362.5 million, or 8.3%.

Table of Contents

The main sources of Gross Operating Revenues variations are explained as follows:

Monthly Subscription Fee: totaled R\$3,415.2 million in the 9M04, representing an increase of R\$299.9 million, or 9.6% compared to the 9M03, mainly due to the tariff increases in 2003 and 2004, partially offset by a 1.3% reduction in the average number of lines in service. When comparing the 3Q04 with the 3Q03, a R\$48.5 million or 4.2% growth was recorded because of the same aforementioned reasons.

Installation Charge: amounted to R\$63.2 million in the 9M04, a decrease of R\$18.4 million or 22.5% when compared to the same period of the previous year. It is worth noting the campaigns launched by the Company starting in July 2004 where the installation charge was forfeit as part of the promotion. A decrease of R\$12.8 million or 42.1% was recorded when comparing the 3Q04 with the 3Q03.

Local Service: registered revenues of R\$2,269.5 million for the 9M04, showing an increase of R\$66.1 million or 3.0% compared to the 9M03, due to the tariff increases in 2003 and 2004, partially offset by the reduction in traffic (exceeding pulses) of about 5.2%. There was a fall of R\$75.5 million or 9.2% when comparing the 3Q04 with the 3Q03, due to the reduction in traffic (exceeding pulses) of about 5.3%, partially offset by the tariff increases in 2004.

Others: reached R\$680.4 million in the 9M04, representing a R\$124.8 million or 22.5% increase when compared with the 9M03, highlighting the increase in revenues from value added Services, sales of merchandise and 2M-ATB (2 Megabits Basic Tariff Area) data access, partially offset by the drop in revenues coming from the external relocation of telephone lines. When comparing the 3Q04 with the 3Q03, a growth of R\$35.9 million or 18.1% was shown, highlighting the revenues from value added services and ISDN installation. It is worth noting that more than 55% of our clients are subscribed to at least one value added service.

DLD: reached R\$2,313.4 million in the 9M04, presenting an increase of R\$567.5 million, or 32.5%, compared to the 9M03. When comparing the 3Q04 with the 3Q03, there was an increase of R\$105.9 million or 13.9%. The increase in revenues is explained by the following reasons:

Long distance (intra-state): totaled R\$1,752.9 million in the 9M04, growing R\$461.2 million, or 35.7%, when compared to the 9M03. When comparing the 3Q04 with the 3Q03, there was an increase of R\$98.5 million or 17.3%. These increases were mainly the result of the revenues from the SMP (Personal Mobile Service) traffic, the tariff increases in 2003 and 2004 and the increase in the market share.

Table of Contents

Long distance (inter-state): reached R\$560.5 million in the 9M04, showing an increase of R\$106.3 million, or 23.4%. In the 3Q04, it reached R\$199.0 million, showing a positive variation of R\$7.4 million or 3.9% compared with the 3Q03. These increases were mainly the result of the revenues from the SMP (Mobile Personal Service) traffic, the tariff increases in 2003 and 2004 and the increase in the market share.

Fixed-to-mobile: amounted to R\$3,008.3 million in the 9M04, presenting an increase of R\$396.4 million or 15.2% compared to the same period of the previous year. When comparing the 3Q04 with the 3Q03, an increase of R\$124.7 million or 14.5% was recorded. This was due to the tariff increase and the growth in the cellular subscriber base.

ILD: reached R\$81.8 million in the 9M04, an increase of R\$7.8 million or 10.5% when compared to the 9M03. The increase amounted to R\$0.6 million, or 1.9%, when comparing the 3Q04 with the 3Q03, due to the increase in both fixed-to-fixed and SMP traffic and also the increase in the market share.

Interconnection Revenues: amounted to R\$822.7 million in the 9M04, showing a reduction of R\$7.3 million or 0.9% when compared with the 9M03, mainly due to the increased long distance traffic by means of Telesp's access code 15, which was extended to the SMP in July 2003. When comparing the 3Q04 with the 3Q03, there was an increase of R\$6.0 million or 2.2%, mainly due to the increase in mobile-to-fixed interconnection revenues.

Public Telephony: totaled R\$251.9 million in the 9M04, and when compared to the 9M03, it grew R\$73.1 million or 40.8%, mainly due to the tariff increases in 2003 and 2004 and the increase in the sale of public telephone cards. When comparing the 3Q04 with the 3Q03, an increase of R\$26.4 million or 40.8% was recorded because of the same aforementioned reasons.

Data Transmission: revenues for the 9M04 reached R\$710.1 million, a R\$291.7 million or 69.7% increase regarding the 9M03. The increase was mainly caused by the growth in SPEEDY services and other non-switched data packaged services. During the quarter, the revenues grew R\$103.0 million or 67.8% compared to the 3Q03 due to the same reasons. The revenues for installation fee of these services are also included in this entry.

Operating Expenses Highlights

Operating Expenses in the 9M04 reached R\$5,421.0 million, an increase of R\$812.3 million or 17.6% compared to the 9M03. When comparing the 3Q04 with the 3Q03, the increase was R\$189.5 million or 11.6%.

Table of Contents

The main sources of Operating Expenses variations are explained as follows:

Personnel expenses totaled R\$405.0 million in the 9M04, falling R\$47.2 million or 10.4% compared to the 9M03, mainly due to: the headcount reorganization and the consequent application of the early retirement programs, the resulting decrease of 17.4% in the average headcount in March 2003, December 2003 and April 2004 and the change in the criteria for provisioning the winter's employees bonus. These effects were partially offset by the salary increase of 8% (September 2003). When comparing the 3Q04 with the 3Q03, an increase of R\$12.0 million was recorded, due to the change in the criteria for provisioning the employees' winter bonus.

General and administrative expenses for the 9M04 reached R\$4,530.6 million, representing an increase of R\$914.6 million, or 25.3% compared to the 9M03. If the interconnection expenses were not considered, the growth would be in the amount of R\$318.8 million, or 20.0%. The increase was R\$199.1 million or 14.8% in the 3Q04 when compared to the 3Q03. Likewise, if the interconnection expenses were not considered, this growth would be in the amount of R\$84.3 million, or 14.9%.

Table of Contents

Annual disclosure

The main sources of General and Administrative Expenses variations are explained as follows:

- a) *Materials* reached R\$95.3 million in the 9M04 showing a R\$16.4 million or 20.8% growth when compared to the 9M03, mainly due to the increase in the cost of merchandise sold. There was an increase of just R\$6.7 million or 30.0% when comparing the 3Q04 with the 3Q03 due to higher expenses related with productive plant maintenance and the cost of merchandise sold.

- b) *Outsourcing expenses* reached R\$1,674.8 million, an increase of R\$311.3 million or 22.8% when comparing the 9M04 with the 9M03, as the result of the increase in expenses of operating plant services, technical and administrative services, IP-network traffic and co-billing. When comparing the 3Q04 with the 3Q03, an increase of R\$78.3 million or 15.9% was recorded, due to the same reasons.

- c) *Inter-connection expenses* reached R\$2,617.2 million, growing R\$595.8 million or 29.5% when comparing the 9M04 with the 9M03 due to the increased fixed-to-mobile traffic and the tariff increase. The increase in the expenses also reflects the start of operations of the

Table of Contents

SMP in July 2003, resulting in payments to cellular operators. There was an increase of R\$114.9 million or 14.7% due to the same reasons when comparing the 3Q04 with the 3Q03.

- d) *Other Expenses* reached R\$143.3 million in the 9M04, going down R\$8.9 million, or 5.8%, compared to the 9M03 mainly due to the reduction in rental expenses of ducts, offset by higher expenses with right of use and rental of infrastructure. When comparing the 3Q04 with the 3Q03, a reduction of R\$0.7 million, or 1.4%, was recorded due to the same reasons.

Taxes reached R\$194.0 million, showing an increase of R\$27.5 million, or 16.5%, when comparing the 9M04 and the 9M03, chiefly due to the increase in expenses with FUST and FUNTTEL, both charged on revenues. The values related to Cofins on financial revenues that were classified until December 2003 in Other Operating Revenues (Expenses) are now classified in Taxes. Due to the same reasons, an increase of R\$15.9 million, or 30.3%, was recorded in the 3Q04 when compared to the 3Q03.

Provisions for bad debt presented a contraction of R\$7.6 million, or 2.3%, comparing the 9M04 and the 9M03. It corresponds to 3.3% of the total Net Operating Revenues compared to the 3.9% provision in the 9M03. During the 3Q04, this provision represented 3.0% of the Net Operating Revenues. This reduction is possible through the implementation of some measures to promote an improvement in collections and in refining the client classification criteria. Nevertheless, it is worth noting that this indicator has historically presented seasonal fluctuations. As of September 30, 2004, the Company did not register any client with an outstanding bill that surpassed 1% of the total accounts receivable.

Other operating revenues (expenses) registered a positive net result of R\$34.7 million in the 9M04 compared to the negative result of R\$38.6 million in the 9M03, which represents a positive variation of R\$73.3 million. This behavior is mainly due to the reclassification of the expenses with Cofins (charged to the Taxes account in the 2004), increase in recovered taxes, partially offset by the reduction of revenues from shared infra-structure. When comparing the 3Q04 with the 3Q03, there was also a positive variation of R\$34.7 million, mainly due to the partial reversion of the provision for pension plans and provisions for contingencies.

Depreciation dropped R\$63.9 million, or 3.0%, in the 9M04 compared to the 9M03, mainly due to the realignment of Capex after achieving the universalization targets and the reductions of the provision for obsolescence. Likewise, a reduction of R\$22.0 million or 3.1% was shown in the 3Q04 compared to the 3Q03 due to the same reasons.

Net Financial Revenues / (Expenses): when comparing the 9M04 with the 9M03 and excluding the value of the interest on the Company's net worth, there was an improvement in the financial result of R\$191.8 million, mainly due to the reduction in the financial expenses. The indebtedness and result of the operations of the Company are significantly affected by the risk of the exchange rates. As of September 30, 2004, 100% of the financial debt was denominated in foreign currency (US Dollar, Canadian Dollar and Yen), while 99.5% of the indebtedness was being covered by active positions in hedge operations (Swap to CDI). The gains and losses of those operations are recorded in the financial statements. As of September 30, 2004, those transactions showed a negative consolidated net result of R\$199.2 million, while a liability of R\$205.9 million was recorded to acknowledge the temporary loss.

NON-OPERATING REVENUES (EXPENSES) in the 9M04 registered a negative variation of R\$2.6 million, or 8.6%, when compared to the 9M03, due to the increase in obsolete assets write-off. When comparing the 3Q04 with the 3Q03, a positive variation of R\$1.6 million is recorded, mainly due to the raise in revenues from fines to suppliers, partially offset by obsolete assets write-off.

LOANS AND FINANCING: As of September 30, 2004, the Company had R\$1,862.7 million (R\$3,253.7 million as of June 30, 2004) in loans and financing denominated in foreign currency, from which R\$1,216.4 million (R\$2,371.0 million as of June 30, 2004) were obtained at fixed interest rates, and R\$646.3 million (R\$882.7 million as of June 30, 2004) were obtained at foreign variable interest rates. In order to be protected against the exchange risk of the loans denominated in foreign currency, the Company contracted hedge operations to tie the debt to the local currency, with floating interest rates indexed to the CDI, and as a consequence the financial results of the Company are affected by the fluctuations of this rate. The Company is also protected against the fluctuation of foreign variable interest rates. As of September 30, 2004, the Company had Swap floating (CDI) x Fixed operations to partially cover the fluctuations in the local currency interest rates. The covered operations mature in January 2005 and totaled R\$640.0 million (R\$1,153.4 million as of June 30, 2004).

On the other hand, the Company invests the balance of cash and cash equivalents (financial instruments) of R\$378.9 million (R\$673.7 million as of June 30, 2004) mainly in short-term instruments, based on the variation of the CDI, which reduces this risk. Book value of those instruments is close to market value because of their short-term maturity.

CORPORATE EVENTS

Telesp acquires the IP Network from Telefônica Empresas S.A.: On December 10, 2002, the management of Telecomunicações de São Paulo - Telesp announced that its Board of Directors, on session held on December 10, 2002, decided to approve the proposal for the purchase, from Telefônica Empresas, of the business composed by the assets and contracts with customers related to the following services: (i) Switched IP (Internet Protocol): Services and infrastructure that allow the establishment of switched connections of remote users through the dial-up network; (ii) Speedy Link: Service rendered to Internet Service Providers (ISPs), that allows them to offer to their clients the use of the broad band access to internet named SPEEDY. In accordance with the article 9 of the Law #9249/95 and item V of the Instruction #207/96 of the CVM (Comissão de Valores Mobiliários), the amount of Interest on the Company's Net Worth was charged, on its net value, to the amount of the mandatory dividends related to the fiscal year 2003.

BONDS

In September 02, 2004, the Company published a relevant fact related to the establishment of a Public Offering of Obligations Program (the Program) and the activation, within the Program's parameters, of the First Issuance of Telesp's Bonds (the Offer).

The Program has a total value of R\$3,000,000,000.00 (three billion reais), with maturity of two years, counted from the filing at CVM. It considers the issuance of simple bonds, not convertible to shares, unsecured type and/or Promissory Notes.

The Offer consists of the issuance of 150,000 simple bonds, not convertible to shares, unsecured type (Debêntures), with nominal value of R\$10,000.00 per unit, totaling the amount of R\$1,500,000,000.00 (one billion and five hundred million reais), in a single series. The bonds will yield interests with quarterly payments corresponding to 103.5% of the accumulated average daily rates of the DI (overnight Inter-financial Deposits Extra-Group), calculated and published by CETIP (Custodian and Liquidation Chamber). The bonds will mature in 6 years, with a provision to review the conditions in three years.

The Offer and the Program were approved by Telesp's Extraordinary General Shareholders' Meeting, held on September 02, 2004. The additional conditions of the Offer were deliberated in the Board of Directors' Meeting of the Issuer, held on September 20, 2004.

On October 15, 2004, the Program was filed at the CVM, and the registration of the Offer was granted.

On July 06, 2003, the mobile telephony operating companies started to implement the long distance carrier selection (CSP). It enables the client to determine the long distance carrier for each domestic long distance (VC2 and VC3) and international call, according to the SMP rules. Consequently, the Company started to acknowledge the revenues from said services and, at the same time, started to pay to the mobile telephony operators for the use of their networks.

Table of Contents

On June 29, 2004, through Edicts #45011 and #45012, the Agência Nacional de Telecomunicações – ANATEL approved the percentages for the tariff adjustment for the Switched Fixed Telephony Service (STFC) according to the criteria established in the Local and Domestic Long Distance Concession Contracts, to be effective starting on July 02, 2004 and for sector 32 (former CETERP) since July 03, 2004. On July 02, the approved percentages were applied on top of the tariffs determined by the legal injunction.

The average variations of the tariff baskets were as follows:

Local: 6.89%

Long Distance: 3.20%

TU-RL: -10.47%

TU-RIU: 3.20%

After the final decision regarding the Legal Injunction by the STJ, with the reincorporation of the IGP-DI as the index, the approved percentages, in accordance with Anatel’s published acts, were applied on top of the approved tariffs in June 2003, non-retroactively. The increase was divided in two installments, with the first one being effective on September 01, 2004. On September 01, 2004 on, the following readjustment indexes were applied to Telefônica’s services:

Pulse: average of 3.22%

Domestic Long Distance: average of 5.22%

Non-residential and trunk monthly fee: 7.75%

Residential monthly fee: 3.14%

Installation: average of 14.14%

The second installment was effective from November 01, 2004 on. The following readjustment indexes were applied to Telefônica’s services:

Pulse: average of 3.13%

Domestic Long Distance: average of 4.97%

Non-residential and trunk monthly fee: 7.20%

Residential monthly fee: 3.05%

Installation: average of 12.40%

Tagline

Telecomunicações de São Paulo S/A - TELESP since November 30, 1999 (due to a corporate restructuring) is the new name of Telesp Participações S/A., a corporation organized under the laws of the Federal Republic of Brazil, formed upon the reorganization of Telecomunicações Brasileiras S.A., on May 22, 1998. TELESP is the principal supplier of fixed line public telecommunications services in the Brazilian state of São Paulo. The Brazilian Government sold its stake in TELESP PARTICIPAÇÕES thus privatizing the Company on July 29, 1998. TELESP's operating concession expires on December 31, 2005, at which point it can be extended for a period of 20 years.

Telecomunicações de São Paulo S/A - TELESP acquired, in December 1999, voting and non-voting shares of Centrais Telefônicas de Ribeirão Preto S/A - CETERP. The CETERP cellular operating division was sold afterwards.

The tender offer to exchange the shares of the Company by BDRs (Brazilian Depositary Receipts) representatives of the shares of Telefônica, S.A. was concluded on June 30, 2000.

On October 10, 2000, the Board of Directors approved the creation of an integral subsidiary to provide package network switched services and afterwards the Company promoted the partial spin-off of this subsidiary which is a listed company.

Edgar Filing: TELESP PARTICIPACOES SA - Form 6-K

TELESP's business, services and tariffs have been regulated by ANATEL (Agência Nacional de Telecomunicações) since June 16, 1997, according to various decrees, decisions, plans and regulatory measures.

TELESP became the first operator to file the corresponding information of the accomplishment of Anatel's targets. ANATEL has already granted the license to permit Telesp to offer domestic and international long distance services to its customers, and also to extend its business out of its concession area (São Paulo) to the whole country.

The international long distance services started to be deployed on May 7, 2002 while the domestic long distance services were not being rendered in that period due to a legal injunction. For the same reasons, the domestic long distance services started to be deployed on July 29, 2002.

The Board of Directors of ANATEL, on its 240th meeting held on January 29, 2003 granted Telecomunicações de São Paulo, S.A. - Telesp the authorization to exploit the Multimedia Communications Service (SCM) nationwide. The Company may offer voice and data services through points of presence, composed of networks and telecommunication circuits.

On July 06, 2003, the mobile telephone operating companies started to implement the long distance carrier selection. It enables the client to determine the long distance carrier for each domestic long distance call (VP2 and VP3) or international call, according to the SMP - Mobile Personal Service rules. Consequently, the Company started to acknowledge the revenues from said services and, at the same time, started to pay to the mobile telephone operators for the use of their networks.

On September 04, 2004, the rules established in Resolution # 373, dated as of June 03, 2004 of Anatel (National Telecommunications Agency) were implemented. This Resolution deals with the reconfiguration of the local areas for the Switched Fixed Telephone Service. As a consequence, all calls, previously billed as domestic long distance (DC - Áreas Conurbadas), will now be billed as local calls. In São Paulo, this modification comprised 53 municipalities, while 39 of them were in Grande São Paulo.

- 1/ Installation Charge was readjusted on October 04, 2003.
- 2/ Some services have differentiated tariff rates for the former CTBC concession area, such as: installation charge (R\$66.74), monthly fee for non-residential and trunk lines (R\$55.96), DLD (D1=R\$0.150, D2=R\$0.216, D3=R\$0.308 and D4=R\$0.439). There are different tariffs within CETERP's region.
- 3/ From February 8, 2003 on, there are different tariffs for the several concession sectors where the calls are originated and terminated, according to the table approved by Anatel.

Note a) On February 06, 2004, according to the Act 42422, ANATEL (Agência Nacional de Telecomunicações) approved the tariff adjustment of the Cellular Móvil Service - SMC and Personal Mobile Service - SMP, with an increase of 6.99% for the VC1, VC2 and VC3 throughout the entire concession area of Telesp, sectors 31, 32 and 34 of Region III. The new tariffs started to be charged on February 11, 2004.

Note b) On June 29, 2004, through Edicts #45011 and #45012, the Agência Nacional de Telecomunicações - ANATEL approved the percentages for the tariff adjustment for the Switched Fixed Telephony Service (STFC) according to the criteria established in the Local and Domestic Long Distance Concession Contracts, to be effective starting on July 02, 2004 and for sector 32 (former CETERP) since July 03, 2004. On July 02, the approved percentages were applied on top of the tariffs determined by the legal injunction.

The average variations of the tariff baskets were as follows:

Local: 6.89%

Long Distance: 3.20%

TU-RL: -10.47%

TU-RIU: 3.20%

Note c) After the final decision regarding the Legal Injunction by the STJ, with the reincorporation of the IGP-DI as the index, the approved percentages, in accordance with Anatel's published acts, were applied on top of the approved tariffs in June 2003, non-retroactively. The increase was divided in two installments, with the first one being effective on September 01, 2004. On September 01, 2004 on, the following readjustment indexes were applied to Telefónica's services:

Pulse: average of 3.22%

Domestic Long Distance: average of 5.22%

Non-residential and trunk monthly fee: 7.75%

Residential monthly fee: 3.14%

Installation: average of 14.14%

Note d) The second installment was effective from November 01, 2004 on. The following readjustment indexes were applied to Telefónica's services:

Pulse: average of 3.13%

Domestic Long Distance: average of 4.97%

Non-residential and trunk monthly fee: 7.20%

Residential monthly fee: 3.05%

Installation: average of 12.40%
