**ITEM 1.01. ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT.**

The Board of Directors of Franklin Electronic Publishers, Incorporated (the Company) approved, effective March 17, 2006, the acceleration of vesting for all outstanding stock options granted to employees of the Company. Options to purchase approximately 524,000 shares were accelerated, of which 146,875 are held by Senior Executive Officers (the CEO and CFO) of the Company. Stock options held by non-employee directors and consultants are unaffected by the acceleration of the vesting.

The Board of Directors made the decision to approve the acceleration of the vesting of the affected stock options in order to reduce the non-cash compensation expense that would have been recorded in future periods, following the effectiveness of the Financial Accounting Standards Board's Statement of Financial Accounting Standards No. 123 (Revised 2004) (FAS 123(R)). FAS 123(R) will require the Company to record an expense for the value of stock options as they vest, including options that were granted prior to the adoption of FAS 123(R) by the Company. Pursuant to Securities and Exchange Commission Rule 4-01(a)(3) of Regulation S-X, the Company is required to adopt FAS 123(R) beginning in the first quarter of its 2007 fiscal year (beginning April 1, 2006). Absent the acceleration of vesting of these stock options, the Company would have been required to recognize approximately \$900,000 in compensation expense through December, 2009 (the remaining vesting periods for the affected options). The acceleration of the vesting of the options described above will be reflected in the footnote pertaining to stock options in the Company's financial statements for the fiscal year ending March 31, 2006.

Under accounting guidance effective during fiscal 2006 (Accounting Principles Board Opinion 25 and other relevant accounting guidance), the Company will record an expense in the fourth quarter of fiscal 2006 of approximately \$43,000, which represents the Company's estimate of the intrinsic value of the outstanding options that would have been forfeited had the acceleration not occurred.
