UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2007

or

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from _____ to _____

Commission File No. 001-32260

Westlake Chemical Corporation

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

2801 Post Oak Boulevard, Suite 600

Houston, Texas 77056

76-0346924
(I.R.S. Employer
Identification Number)

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

(Address of principal executive offices, including zip code)

(713) 960-9111

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. **Yes** **No**

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer **Accelerated filer** **Non-accelerated filer**

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) **Yes** **No**

The number of shares outstanding of the registrant's sole class of common stock, as of May 1, 2007, was 65,467,880.

Table of Contents**WESTLAKE CHEMICAL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(UNAUDITED)

(dollars in thousands, except per share data)

1. Basis of Financial Statements

The accompanying unaudited consolidated interim financial statements were prepared in accordance with the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim periods. Accordingly, certain information and footnotes required for complete financial statements under generally accepted accounting principles in the United States have not been included. These interim consolidated financial statements should be read in conjunction with the December 31, 2006 financial statements and notes thereto of Westlake Chemical Corporation (the "Company") included in the annual report on Form 10-K for the fiscal year ended December 31, 2006, filed with the SEC on February 26, 2007. These financial statements have been prepared in conformity with the accounting principles and practices as disclosed in the notes to the consolidated financial statements of the Company for the fiscal year ended December 31, 2006.

In the opinion of the Company's management, the accompanying unaudited consolidated interim financial statements reflect all adjustments (consisting only of normal recurring adjustments) that are necessary for a fair presentation of the Company's financial position as of March 31, 2007, its results of operations for the three months ended March 31, 2007 and 2006 and the changes in its cash position for the three months ended March 31, 2007 and 2006.

Results of operations and changes in cash position for the interim periods presented are not necessarily indicative of the results that will be realized for the year ending December 31, 2007 or any other interim period. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In February 2007, the Financial Accounting Standards Board issued Statement of Financial Accounting Standard No. 159 ("SFAS 159"), "The Fair Value Option for Financial Assets and Financial Liabilities." SFAS 159 allows entities the option to measure eligible financial instruments at fair value as of specified dates. Such election, which may be applied on an instrument by instrument basis, is typically irrevocable once elected. SFAS 159 is effective for fiscal years beginning after November 15, 2007, and the Company has not yet determined the impact this interpretation might have on its financial position.

2. Stock-Based Compensation

The Board of Directors of the Company has adopted, and the stockholders have approved, the Westlake Chemical Corporation 2004 Omnibus Incentive Plan (the "2004 Plan"). Under the 2004 Plan, all employees of the Company, as well as certain individuals who have agreed to become the Company's employees, are eligible for awards. Shares of common stock may be issued as authorized in the 2004 Plan. At the discretion of the administrator of the 2004 Plan, employees and non-employee directors may be granted awards in the form of stock options, stock appreciation rights, stock awards or cash awards (any of which may be a performance award). The Company utilizes the fair value method to account for these awards, and the total compensation expense related to the 2004 Plan was \$524 and \$429 for the three months ended March 31, 2007 and 2006, respectively.

Option activity and changes during the three months ended March 31, 2007 were as follows:

Options	Weighted	Weighted	Aggregate
	Average	Average	Intrinsic

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

		Exercise	Remaining	Value
		Price	Term	
			(Years)	
Outstanding at December 31, 2006	356,284	\$ 20.57		
Granted	352,700	31.61		
Exercised	(3,471)	17.78		
Cancelled	(7,317)	28.39		
Outstanding at March 31, 2007	698,196	\$ 26.08	8.9	\$ 2,762
Exercisable at March 31, 2007	111,482	\$ 18.49	7.7	\$ 1,071

Table of Contents**WESTLAKE CHEMICAL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)**

(UNAUDITED)

(dollars in thousands, except per share data)

For options outstanding at March 31, 2007, the options had the following range of exercise prices:

Range of Prices	Options Outstanding	Weighted Average Remaining Contractual Life (Years)
\$14.50	217,913	7.4
\$25.42 - \$36.10	480,283	9.6

The aggregate intrinsic value in the table represents the total pretax intrinsic value (the difference between the Company's closing stock price on the last trading day of the first quarter of 2007 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on March 31, 2007. This amount changes based on the fair market value of the Company's common stock. The total intrinsic value of options exercised for the three months ended March 31, 2007 and 2006 was \$57 and \$511.

As of March 31, 2007, \$5,323 of total unrecognized compensation cost related to stock options is expected to be recognized over a weighted-average period of 3.7 years.

The Company used the Black-Scholes option pricing model to value its options. The table below presents the weighted average value and assumptions used in determining each option's fair value for each option granted during the first three months of 2007 and 2006. Volatility was calculated using historical trends of the Company's common stock price.

	Stock Option Grants Three Months Ended March 31,	
	2007	2006
Weighted average fair value of grants	\$ 14.23	\$ 15.28
Risk-free interest rate	4.5%	4.8%
Expected life in years	6-10	6-7
Expected volatility	33.2%	33.9%
Expected dividend yield	0.5%	0.3%

Non-vested restricted stock awards as of March 31, 2007 and changes during the three months ended March 31, 2007 were as follows:

Number of Shares	Weighted Average Grant Date Fair Value
---------------------	---

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

Non-vested at December 31, 2006	53,928	\$ 30.85
Granted	198,811	31.61
Vested	(6,569)	36.10
Forfeited	(2,987)	31.65
Non-vested at March 31, 2007	243,183	\$ 31.32

As of March 31, 2007, there was \$6,483 of unrecognized stock-based compensation expense related to non-vested restricted stock awards. This cost is expected to be recognized over a weighted-average period of 4.8 years.

Table of Contents**WESTLAKE CHEMICAL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)**

(UNAUDITED)

(dollars in thousands, except per share data)

3. Accounts Receivable

Accounts receivable consist of the following:

	March 31,	December 31,
	2007	2006
Accounts receivable trade	\$ 408,491	\$ 294,564
Accounts receivable affiliates	1,153	1,252
Allowance for doubtful accounts	(3,140)	(3,287)
	406,504	292,529
Accounts receivable other	17,126	16,374
Accounts receivable, net	\$ 423,630	\$ 308,903

4. Inventories

Inventories consist of the following:

	March 31,	December 31,
	2007	2006
Finished products	\$ 261,769	\$ 290,048
Feedstock, additives and chemicals	126,133	137,669
Materials and supplies	37,504	36,499
	425,406	464,216
Allowance for inventory obsolescence	(7,755)	(7,940)
Inventories, net	\$ 417,651	\$ 456,276

5. Property, Plant and Equipment

Depreciation expense on property, plant and equipment of \$19,136 and \$18,075 is included in cost of sales in the consolidated statements of operations for the three months ended March 31, 2007 and 2006, respectively.

6. Other Assets

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

Amortization expense on other assets of \$5,408 and \$2,687 is included in the consolidated statements of operations for the three months ended March 31, 2007 and 2006, respectively.

7. Derivative Commodity Instruments

The Company uses derivative instruments, in conjunction with certain physical commodity positions, to reduce price volatility risk on commodities. The Company had a net gain of \$728 in connection with trading activity for the three months ended March 31, 2007 compared to a net gain of \$5,204 for the three months ended March 31, 2006. All of the 2007 net gain related to derivative gains. Of the 2006 net gain, \$4,813 related to derivative gains and \$391 related to sales of related physical feedstock positions. Gains and losses in connection with trading activity are included in cost of sales. Risk management asset balances of \$797 and \$5,721 were included in Accounts receivable, net and risk management liability balances of \$-0- and \$1,211 were included in current liabilities in the Company's consolidated balance sheets as of March 31, 2007 and December 31, 2006, respectively.

8. Income Taxes

The Company adopted the provisions of Financial Standards Accounting Board Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48) on January 1, 2007. The Company recognized no adjustments in the liability for unrecognized income tax benefits in the first quarter of 2007 as a result of the implementation of FIN 48. As of January 1, 2007, the total gross unrecognized tax benefits were \$9,637. Of this total, \$5,072, net of federal tax benefits, would favorably impact the effective income tax rate if recognized. There have been no significant changes to these amounts during the three months ended March 31, 2007.

Table of Contents**WESTLAKE CHEMICAL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)**

(UNAUDITED)

(dollars in thousands, except per share data)

The Company recognizes penalties and interest accrued related to unrecognized tax benefits in income tax expense. As of January 1, 2007, the Company had approximately \$3,069 of accrued interest and penalties related to uncertain tax positions. There has been no significant change to this amount during the three months ended March 31, 2007.

The Company files income tax returns in the U.S. federal jurisdiction, various states and foreign jurisdictions. With few exceptions, the Company is no longer subject to the examinations by tax authorities before the year 1999. Management does not anticipate a significant change to the total amount of unrecognized tax benefits within the next twelve months.

The effective income tax rate was 34.6% in the first quarter of 2007. The 2007 tax rate was below the statutory rate of 35% primarily due to state tax credits and the domestic manufacturing deduction, partially offset by state income taxes. The effective tax rate was 36.9% for the first quarter of 2006. The 2006 tax rate was above the statutory rate of 35% primarily due to state income tax, partially offset by the manufacturing deduction.

9. Earnings per Share

There are no adjustments to Net income for the diluted earnings per share computations.

The following table reconciles the denominator for the basic and diluted earnings per share computations shown in the consolidated statements of operations:

	Three Months Ended	
	March 31,	2006
	2007	2006
	(in thousands)	
Weighted average common shares basic	65,218	65,092
Plus incremental shares from assumed conversions:		
Options	92	125
Restricted stock	15	14
Weighted average common shares diluted	65,325	65,231

10. Pension and Post-Retirement Benefit Costs

Components of Net Periodic Costs are as follows:

	Three Months Ended	
	March 31,	
	Pension	Post-Retirement

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

	2007	2006	2007	2006
Service cost	\$ 260	\$ 267	\$ 78	\$ 91
Interest cost	557	471	146	134
Expected return on plan assets	(599)	(550)		
Amortization of transition obligation			28	28
Amortization of prior service cost	80	79	67	67
Amortization of net loss	132	100	104	77
Net periodic benefit cost	\$ 430	\$ 367	\$ 423	\$ 397

In the first quarters of 2007 and 2006, the Company made no contributions to the Salaried and Wage pension plans and has no current plan to contribute any additional funds to the plans during the fiscal year ending December 31, 2007.

11. Commitments and Contingencies

The Company is subject to environmental laws and regulations that can impose civil and criminal sanctions and that may require it to mitigate the effects of contamination caused by the release or disposal of hazardous substances into the environment. Under one law, an owner or operator of property may be held strictly liable for remediating contamination without regard to whether that person caused the contamination, and without regard to whether the practices that resulted in

Table of Contents

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(UNAUDITED)

(dollars in thousands, except per share data)

the contamination were legal at the time they occurred. Because several of the Company's production sites have a history of industrial use, it is impossible to predict precisely what effect these requirements will have on the Company.

Contract Litigation with Goodrich and PolyOne. In connection with the 1990 and 1997 acquisitions of the Goodrich Corporation chemical manufacturing complex in Calvert City, Kentucky, Goodrich agreed to indemnify the Company for any liabilities related to preexisting contamination at the complex. For its part, the Company agreed to indemnify Goodrich for post-closing contamination caused by the Company's operations. The soil and groundwater at the complex, which does not include the Company's nearby PVC facility, had been extensively contaminated by Goodrich's operations. In 1993, Goodrich spun off the predecessor of PolyOne, and that predecessor assumed Goodrich's indemnification obligations relating to preexisting contamination. PolyOne is now coordinating the investigation and remediation of contamination at the complex. In mid-1997 the Company began operating (pursuant to contract) a certain piece of groundwater remediation equipment at the complex owned by Goodrich.

For a number of years, PolyOne has asserted that the Company's operations after the 1990 and 1997 acquisitions have contributed to the contamination. In May 2003, Goodrich asserted that the Company is responsible for a portion of the costs of treating the complex's contaminated groundwater. Goodrich then began withholding payment of 45% of the monthly costs incurred by the Company to operate certain remediation equipment.

In October 2003, the Company sued Goodrich in the United States District Court for the Western District of Kentucky for breach of contract to recover its unpaid invoices for providing these services. Goodrich filed a counterclaim against the Company and a third-party complaint against PolyOne. PolyOne in turn filed motions to dismiss, counterclaims against Goodrich, and cross-claims against the Company, in which it alleged, among other things, that Goodrich and the Company had conspired to defraud PolyOne.

In March 2005, the court dismissed PolyOne's claims against the Company and granted the Company's motion for summary judgment on its breach of contract claim against Goodrich. In July 2005, Goodrich agreed to pay the Company all past due amounts, including interest, in the amount of \$3,132. This reimbursement is reflected in the consolidated statement of operations for the year ended December 31, 2005, resulting in a \$2,606 reduction of selling, general and administrative expenses and \$526 of interest income. Goodrich further agreed to timely and fully pay the Company for all future services. Goodrich reserved the right to seek reconsideration of the court's order, which, if granted, could require the Company to reimburse Goodrich for its payments to the Company under the July 2005 agreement. The case is continuing with respect to Goodrich's counterclaim against the Company and the claims between Goodrich and PolyOne. Trial is set for October 2007.

The current groundwater remediation activities at the Calvert City complex do not have a specified termination date but are expected to last for the foreseeable future. Since the Company acquired in mid-1997 the relevant portion of the complex where certain groundwater remediation equipment is located, the Company has spent \$24,131 through March 31, 2007 in operating this equipment, all of which has been reimbursed to the Company by Goodrich. Goodrich is continuing to reimburse the Company on a monthly basis as ongoing expenses for these services are incurred. The costs incurred to operate the groundwater remediation equipment were \$3,362 in 2006 and \$833 in the first quarter of 2007.

Administrative Proceedings. There are several administrative proceedings in Kentucky involving the Company, Goodrich and PolyOne and the same manufacturing complex in Calvert City. In 2003, the Kentucky Environmental and Public Protection Cabinet (the Cabinet) re-issued Goodrich's Resource Conservation and Recovery Act, or RCRA, permit which requires Goodrich to remediate contamination at the Calvert City manufacturing complex. Both Goodrich and PolyOne challenged various terms of the permit in an attempt to shift Goodrich's clean-up obligations under the permit to the Company.

In January 2004, the Cabinet notified the Company that the Company's ownership of a closed landfill (known as former Pond 4) requires it to submit an application for its own permit under RCRA. This could require the Company to bear the cost of performing remediation work at former Pond 4 and adjacent areas at the complex. The Company challenged the Cabinet's January 2004 order and has obtained several extensions to submit the required permit application, which is now due in September 2007. In October 2006, the Cabinet notified Goodrich and the

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

Company that both were operators of former Pond 4 under RCRA, and ordered them to jointly submit an application for a RCRA permit no later than April 2007. Goodrich and the Company have both challenged the Cabinet's October 2006 order.

Table of Contents

WESTLAKE CHEMICAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(UNAUDITED)

(dollars in thousands, except per share data)

All of these administrative proceedings have been consolidated. At a hearing on February 9, 2007, the administrative law judge vacated the hearing date and set a status conference for May 18, 2007 based on the fact that the parties are engaged in settlement discussions.

Litigation Related to the Administrative Proceedings. The Company has the contractual right to reconvey title to former Pond 4 back to Goodrich, and the Company has tendered former Pond 4 back to Goodrich under this provision. In March 2005, the Company sued Goodrich in the United States District Court for the Western District of Kentucky to require Goodrich to accept the tendered reconveyance and to indemnify the Company for costs the Company incurred in connection with former Pond 4. Goodrich subsequently filed a third-party complaint against PolyOne, seeking to hold PolyOne responsible for any of Goodrich's former Pond 4 liabilities to the Company. Goodrich moved to dismiss the Company's suit against it, the Company filed a motion for partial summary judgment against Goodrich, and PolyOne moved to dismiss Goodrich's third-party complaint against it. On March 30, 2007, the court granted Goodrich's motion to dismiss the Company's claim that Goodrich is required to accept the tendered reconveyance. Although the Company's motion for partial summary judgment was denied on March 30, the Company's claim for indemnification of its costs incurred in connection with Pond 4 is still before the court.

PolyOne filed a separate lawsuit against the Company in March 2005 in the United States District Court for the Western District of Kentucky seeking to require the Company to apply for its own RCRA permit. Purportedly brought under the citizen suit provisions of RCRA, PolyOne's suit involves the same issues raised in the Goodrich and PolyOne challenges to the RCRA permit discussed above. The Company filed a motion to dismiss PolyOne's suit. On March 30, 2007, the court granted the Company's motion to dismiss. PolyOne has not appealed the dismissal of its suit.

Monetary Relief. Neither the court nor the Cabinet has established any allocation of the costs of remediation among the various parties that are involved in the judicial and administrative proceedings discussed above. The Company is not in a position at this time to state what effect, if any, the resolution of these proceedings could have on the Company's financial condition, results of operations, or cash flows. Any monetary liabilities that the Company might incur with respect to the remediation of contamination at the complex would likely be spread out over an extended period. As a result, the Company believes it is unlikely that any remediation costs allocable to it will be material in terms of expenditures made in any individual reporting period.

Environmental Investigations. In 2002, the EPA's National Enforcement Investigations Center, or NEIC, investigated the Company's manufacturing complex in Calvert City. In early 2004, the NEIC investigated the Company's nearby PVC plant. The EPA subsequently submitted information requests to the Company under the Clean Air Act and RCRA. The Company and the EPA met in June 2004 to attempt to voluntarily resolve the notices of violation that were issued to the Company for the 2002 investigation and to voluntarily resolve any issues raised at the PVC plant in the 2004 investigation. Since then, parties have continued to engage in settlement discussions. The EPA has indicated that it will impose monetary penalties and require plant modifications that will involve capital expenditures. The Company expects that, based on the EPA's past practices, the amount of any monetary penalties would be reduced by a portion of the expenditures that the Company would agree to make for certain supplemental environmental projects. The Company has recorded an accrual for a probable loss related to monetary penalties and other items to be expensed; however, based on correspondence with the EPA, the Company reduced its loss accrual by \$1,500 during the fourth quarter of 2006. Although the ultimate amount of liability is not ascertainable, the Company believes that any amounts exceeding the recorded accruals should not materially affect the Company's financial condition. It is possible, however, that the ultimate resolution of this matter could result in a material adverse effect on the Company's results of operations or cash flows for a particular reporting period.

In addition to the matters described above, the Company is involved in various routine legal proceedings incidental to the conduct of its business. The Company does not believe that any of these routine legal proceedings will have a material adverse effect on its financial condition, results of operations or cash flows.

12. Segment Information

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

The Company operates in two principal business segments: Olefins and Vinyls. These segments are strategic business units that offer a variety of different products. The Company manages each segment separately as each business requires different technology and marketing strategies.

Loan related to tax-exempt revenue bonds	10,889	10,889
 Long-term debt	 \$ 280,876	 \$ 260,156

As of March 31, 2007, the Company had borrowings under the revolving credit facility that bore interest at either LIBOR plus 1.00% or prime rate minus 0.50%. The revolving credit facility also requires an unused commitment fee of 0.25%. All interest rates under the facility are subject to quarterly grid pricing adjustments based on a fixed charge coverage ratio. The facility matures on January 6, 2011.

15. Guarantor Disclosures

The Company's payment obligations under its 6⁵/₈% senior notes are fully and unconditionally guaranteed by each of its current and future domestic restricted subsidiaries that guarantee other debt of the Company or of another guarantor of the 6⁵/₈% senior notes in excess of \$5,000 (the Guarantor Subsidiaries). Each Guarantor Subsidiary is 100% owned by the parent company. These guarantees are the joint and several obligations of the Guarantor Subsidiaries. The following unaudited condensed consolidating financial information presents the financial condition, results of operations and cash flows of Westlake Chemical Corporation, the Guarantor Subsidiaries and the remaining subsidiaries that do not guarantee the notes (the Non-Guarantor Subsidiaries), together with consolidating adjustments necessary to present the Company's results on a consolidated basis.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

This discussion and analysis should be read in conjunction with information contained in the accompanying unaudited consolidated interim financial statements of Westlake Chemical Corporation and the notes thereto and the consolidated financial statements and notes thereto of Westlake Chemical Corporation included in Westlake Chemical Corporation's Annual Report on Form 10-K for the fiscal year ended December 31, 2006. The following discussion contains forward-looking statements. Please read "Forward-Looking Statements" for a discussion of limitations inherent in such statements.

We are a vertically integrated manufacturer and marketer of petrochemicals, polymers and fabricated products. Our two principal business segments are Olefins and Vinyls. We use the majority of our internally-produced basic chemicals to produce higher value-added chemicals and fabricated products.

Recent Developments

We are performing a major turnaround during the second quarter of 2007 for one of our ethylene units at our Lake Charles facility. We expect the unit to be shut down for approximately 45 days during the second quarter to complete the tie-ins of our previously announced project designed to upgrade the feedstock flexibility of the plant, which is expected to reduce energy costs and provide for additional ethylene capacity. During a turnaround, production at the unit is suspended while work on the unit is performed. Sales are expected to continue during the turnaround period.

In April 2006, we announced that we had entered into a Memorandum of Understanding to study the development of an ethane-based ethylene, polyethylene and other derivatives project in the Republic of Trinidad and Tobago. The Government of the Republic of Trinidad and Tobago has expressed an interest in becoming a minority equity partner in the project. As currently envisioned, the project would use 37,500 barrels per day of ethane to produce 570,000 metric tons (1.25 billion pounds) per year of ethylene, which would in turn be used to produce polyethylene and other derivative products. The project could be expanded in the future as more ethane becomes available. The capital cost is initially estimated to be approximately \$1.5 billion. The size, scope, and cost of the project are subject to further definition in connection with a detailed feasibility study that we are currently performing. It is expected that the project will be financed through a project financing arrangement.

On November 30, 2006 we acquired Eastman Chemical Company's polyethylene business, related assets and a 200 mile, 10-inch pipeline from Mont Belvieu, Texas to Longview, Texas, all of which are headquartered in Longview, Texas (Longview). A more detailed description of this acquisition can be found in our Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

Table of Contents*Summary*

For the three months ended March 31, 2007, net income was \$19.7 million, or \$0.30 per diluted share, on net sales of \$718.8 million. This represents a decrease of \$31.6 million, or \$0.49 per diluted share, from the three months ended March 31, 2006 net income of \$51.3 million, or \$0.79 per diluted share, on net sales of \$618.8 million. Income from operations was \$32.7 million for the first quarter of 2007 as compared to \$110.9 million for the first quarter of 2006. The first quarter of 2007 results have been negatively impacted by a number of factors including a slow down in residential housing starts and a dramatic drop in selling prices and margins that began early in the fourth quarter of 2006. This pricing environment is in contrast with the first quarter of 2006, which benefited from strong market conditions that existed for a period of time following Hurricanes Katrina and Rita. We are, however, beginning to see some pricing improvement for ethylene, polyethylene and PVC. Some industry analysts expect a gradual improvement in the olefins business, but recovery in the vinyls business is expected to take longer. Any improvement in the Vinyls segment is expected to be impacted by additional capacity coming on stream in late 2007 and into 2008.

Sales for the three months ended March 31, 2007 increased over the first three months of 2006 due to higher sales volumes for most products, and additional polyethylene volume as a result of the Longview acquisition in late 2006. This increase was partially offset by lower sales prices for most products.

RESULTS OF OPERATIONS*First Quarter 2007 Compared with First Quarter 2006*

Net Sales. Net sales increased by \$100.0 million to \$718.8 million in the first quarter of 2007 from \$618.8 million in the first quarter of 2006. This increase was primarily due to higher sales volumes for most of our major products. Polyethylene sales volumes were significantly higher in the first quarter of 2007 as compared to the first quarter of 2006 due to the acquisition of the Longview facilities. These increases were partially offset by lower sales prices for most of our major products.

Gross Margin. Gross margin percentage decreased to 8.1% in the first quarter of 2007 from 21.2% in the first quarter of 2006. This decrease was primarily due to lower sales prices for most of our major products and higher cost of raw materials. Our raw material cost in both segments normally tracks industry prices, which experienced an increase of 3.6% for ethane and 2.2% for propane as compared to the first quarter of 2006. In addition, we had a \$0.7 million gain in connection with trading activity for the first three months of 2007 compared to a \$5.2 million gain for the first three months of 2006, a decrease of \$4.5 million (see Note 7 to the consolidated financial statements).

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$5.0 million, or 24.8%, in the first quarter of 2007 as compared to the first quarter of 2006. The increase was primarily due to transition costs and other operating expenses related to the acquisition of the Longview facilities.

Interest Expense. Interest expense in the first quarter of 2007 decreased by \$2.4 million to \$3.6 million from \$6.0 million in the first quarter of 2006, primarily due to lower average interest rates and lower average debt outstanding for the period. Average interest rates were lower due to the refinancing completed in the first quarter of 2006.

Debt Retirement Cost. As a result of the redemption of \$247.0 million aggregate principal amount of 8³/₄% senior notes due July 15, 2011 and the repayment of \$9.0 million of our term loan, we recognized \$25.9 million in non-operating expense in the first quarter of 2006, consisting of a pre-payment premium on our 8³/₄% senior notes of \$22.2 million and a write-off of \$3.7 million in previously capitalized debt issuance cost. We did not recognize any debt retirement costs in the first quarter of 2007.

Other Income, Net. Other income, net decreased by \$1.3 million to \$1.0 million in the first quarter of 2007 from \$2.3 million in the first quarter of 2006 primarily due to lower interest income associated with lower cash balances, partially offset by higher equity in income from our joint venture in China.

Income Taxes. The effective income tax rate was 34.6% in the first quarter of 2007 as compared to 36.9% in the first quarter of 2006. The 2007 tax rate was below the statutory rate of 35% primarily due to state tax credits and the domestic manufacturing deduction, partially offset by state income taxes. The 2006 tax rate was above the statutory rate of 35% primarily due to state income tax, partially offset by the manufacturing deduction.

Olefins Segment

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

Net Sales. Net sales increased by \$144.5 million, or 42.5%, to \$484.2 million in the first quarter of 2007 from \$339.7 million in the first quarter of 2006. This increase was primarily due to the additional polyethylene sales volume from our Longview

Table of Contents

facilities, which were acquired in the fourth quarter of 2006, and higher ethylene sales. These increases were partially offset by lower sales prices. Average selling prices for the Olefins segment decreased by 13.7% in the first quarter of 2007 as compared to the first quarter of 2006.

Income from Operations. Income from operations decreased by \$32.4 million, or 54.4%, to \$27.2 million in the first quarter of 2007 from \$59.6 million in the first quarter of 2006. This decrease was primarily due to the dramatic decrease in product prices and margins which began early in the fourth quarter of 2006 and continued into the first quarter of 2007. Although product prices and volumes began to improve in the first three months of 2007, margins were still significantly below the first quarter of 2006 levels. In addition, trading activity resulted in a gain in the first quarter of 2007 of \$0.7 million as compared to \$5.2 million in the first quarter of 2006.

Vinyls Segment

Net Sales. Net sales decreased by \$44.5 million, or 15.9%, to \$234.6 million in the first quarter of 2007 from \$279.1 million in the first quarter of 2006. This decrease was due to lower selling prices for all of our major vinyls products. The decreased sales prices were partially offset by generally higher sales volumes for our major products. Average selling prices for the Vinyls segment decreased by 25.7% in the first quarter of 2007 as compared to the first quarter of 2006.

Income from Operations. Income from operations decreased by \$46.6 million, or 85.7%, to \$7.8 million in the first quarter of 2007 from \$54.4 million in the first quarter of 2006. This decrease was primarily due to lower selling prices and margins for all of our vinyls products which was partially offset by higher sales volumes. Selling prices, margins and sales volumes for PVC resin and PVC pipe fell dramatically in the fourth quarter of 2006 due to weakness in the residential housing market, falling energy prices and seasonal slowdowns. Sales prices and margins continued under pressure in the first quarter of 2007. Sales volumes in the first quarter of 2007, however, have improved and the industry has implemented a PVC resin price increase beginning in March, 2007. By comparison, the first quarter of 2006 was very strong due to supply constraints resulting from the impact from Hurricanes Katrina and Rita.

Table of Contents**CASH FLOW DISCUSSION FOR THREE MONTHS ENDED MARCH 31, 2007 AND 2006****Cash Flows*****Operating Activities***

Operating activities used cash of \$42.4 million in the first three months of 2007 compared to cash provided by operating activities of \$66.8 million in the first three months of 2006. The \$109.2 million decrease in cash flows from operating activities was primarily due to lower income from operations in 2007 and unfavorable changes in working capital, which were partially offset by \$25.9 million of debt retirement costs incurred in 2006. Income from operations decreased by \$78.2 million in the first three months of 2007 as compared to the first three months of 2006. Changes in components of working capital, which we define for purposes of this cash flow discussion as accounts receivable, inventories, prepaid expense and other current assets less accounts payable and accrued liabilities, used cash of \$85.7 million in the first three months of 2007, compared to \$13.8 million of cash used in the first three months of 2006, an increase in cash use of \$71.9 million. In the first three months of 2007, accounts receivable increased by \$116.0 million largely due to increased sales and receivables related to the Longview acquisition while inventory decreased by \$38.6 million. Accounts payable and accrued liabilities decreased by \$14.0 million during the first three months of 2007. The primary reason for the \$13.8 million use of cash related to working capital in the first three months of 2006 was due to a decrease in accounts payable and accrued liabilities of \$39.8 million, partially offset by a decrease in accounts receivable of \$25.5 million.

Investing Activities

Net cash used for investing activities during the first three months of 2007 was \$15.1 million as compared to net cash used by investing activities of \$56.0 million in the first three months of 2006. Capital expenditures were \$18.9 million in the first three months of 2007 compared to \$28.5 million in the first three months of 2006. The 2006 period included significant expenditures related to a project designed to upgrade the feedstock flexibility in our ethylene plant. The costs related to this project were lower in the 2007 period as this project nears completion. The remaining capital expenditures in the first quarters of 2007 and 2006 primarily related to maintenance, safety and environmental projects.

Financing Activities

Net cash provided by financing activities during the first three months of 2007 was \$18.2 million as compared to net cash used of \$12.3 million in the first three months of 2006. The 2007 activity was primarily related to borrowing a net \$20.7 million under our revolving credit facility, partially offset by the \$2.6 million payment of cash dividends. During the first three months of 2006, we received proceeds of \$249.2 million from the issuance of our 6 5/8% senior notes, which was offset by the repayment of \$256.0 million of debt and the payment of \$1.8 million of cash dividends. We also incurred \$4.1 million in costs associated with the refinancing that were capitalized during the first quarter of 2006 and that will be amortized over the term of the new debt.

Liquidity and Capital Resources***Liquidity and Financing Arrangements***

Our principal sources of liquidity are from cash and cash equivalents, cash from operations, borrowings under a revolving credit facility and long-term financing. As discussed previously, we are currently performing a feasibility study in connection with the potential development of an ethane-based ethylene, polyethylene and other derivatives project in the Republic of Trinidad and Tobago. The capital cost is initially estimated to be approximately \$1.5 billion, in which we would be a majority partner. If this project is approved, construction could commence in late 2007. It is expected that we would invest some level of cash and the remainder would be financed through a project financing arrangement. We believe that our sources of liquidity as described above, along with any additional project financing, will be adequate to fund our cash requirements.

Cash

Cash balances were \$13.3 million at March 31, 2007 compared to \$52.6 million at December 31, 2006.

Debt

Our \$300.0 million senior secured revolving credit facility is a source of liquidity. As of March 31, 2007, borrowings under the revolving credit facility bore interest at either LIBOR plus 1.00% or prime rate minus 0.50%. The revolving credit facility also requires an unused commitment fee of 0.25%. All interest rates under the facility are subject to quarterly grid pricing adjustments based on a fixed charge coverage ratio. The

facility matures on January 6, 2011.

Table of Contents

As of March 31, 2007, our long term debt totaled \$280.9 million, consisting of \$249.3 million principal amount of 6⁵/₈% senior notes due 2016, a \$10.9 million loan from the proceeds of tax-exempt revenue bonds (supported by a \$11.3 million letter of credit) and \$20.7 million of borrowings under our revolving credit facility. Debt outstanding under the revolving credit facility and the tax-exempt bonds bear interest at variable rates.

On January 13, 2006, we issued \$250.0 million of 6⁵/₈% aggregate principal amount of senior notes due 2016, the proceeds of which, together with cash on hand, were used to redeem our 8³/₄% senior notes due 2011 and repay our term loan as follows:

On January 18, 2006, we repaid the entire \$9.0 million outstanding under our term loan, plus accrued but unpaid interest.

On two redemption dates, February 8, 2006 and February 13, 2006, we redeemed the entire \$247.0 million principal amount outstanding of our 8³/₄% senior notes due 2011, and paid a make-whole premium of \$22.2 million, plus accrued and unpaid interest. As a result of the early redemption of the 8³/₄% senior notes due 2011 and the repayment of the term loan, we recognized \$25.9 million in non-operating expense in the first quarter of 2006 consisting of a pre-payment premium on the 8³/₄% senior notes of \$22.2 million and a write-off of \$3.7 million in previously capitalized debt issuance cost.

The 6⁵/₈% senior notes are unsecured and were issued with an original issue discount of \$0.8 million. There is no sinking fund and no scheduled amortization of the notes prior to maturity. The notes are subject to redemption and the holders may require us to repurchase the notes upon a change of control. All domestic restricted subsidiaries that guarantee other debt of ours or of another guarantor of the senior notes in excess of \$5 million are guarantors of the notes.

The agreements governing the 6⁵/₈% senior notes and the revolving credit facility each contain customary covenants and events of default. Accordingly, these agreements impose significant operating and financial restrictions on us. These restrictions, among other things, provide limitations on incurrence of additional indebtedness, the payment of dividends, certain investments and acquisitions and sales of assets. These limitations are subject to a number of important qualifications and exceptions, including, without limitation, an exception for the payment of our regular quarterly dividend of up to \$0.20 per share (currently \$0.04 per share). The 6⁵/₈% senior notes indenture does not allow distributions unless, after giving pro forma effect to the distribution, our fixed charge coverage ratio is at least 2.0 and such payment, together with the aggregate amount of all other distributions after January 13, 2006, is less than the sum of 50% of our consolidated net income for the period from October 1, 2003 to the end of the most recent quarter for which financial statements have been filed, plus 100% of net cash proceeds received after October 1, 2003 as a contribution to our common equity capital or from the issuance or sale of certain securities, plus several other adjustments. The amount allowed under this restriction was \$443,041 at March 31, 2007. The revolving credit facility also restricts dividend payments unless, after giving effect to such payment, the availability under the line of credit equals or exceeds \$60.0 million. None of the agreements require us to maintain specified financial ratios, except that the revolving credit facility requires us to maintain a minimum fixed charge coverage ratio of 1.0 to 1.0 when availability falls below \$60.0 million. In addition, the 6⁵/₈% senior notes indenture and the revolving credit facility restrict our ability to create liens, to engage in certain affiliate transactions and to engage in sale-leaseback transactions.

Our ability to make payments on our indebtedness and to fund planned capital expenditures will depend on our ability to generate cash in the future, which is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based on our current level of operations, we believe our cash flow from operations, available cash and available borrowings under our revolving credit facility will be adequate to meet our liquidity needs for the foreseeable future.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides safe harbor provisions for forward-looking information. Certain of the statements contained in this report are forward-looking statements. All statements, other than statements of historical facts, included in this report that address activities, events or developments that we expect, project, believe or anticipate will or may occur in the future are forward-looking statements. These include such matters as:

timing, size, scope, cost and other matters related to the project in the Republic of Trinidad and Tobago;

timing and impact of the turnaround for an ethylene unit at the Lake Charles facility;

anticipated future results of operations;

industry outlook;

production capacities;

our ability to borrow additional funds under our credit facility;

our ability to meet our liquidity needs;

expected outcomes of legal and administrative proceedings and their expected effects on our financial position, results of operations and cash flows; and

compliance with present and future environmental regulations and costs associated with environmentally related penalties, capital expenditures and remedial actions.

We have based these statements on assumptions and analyses in light of our experience and perception of historical trends, current conditions, expected future developments and other factors we believe were appropriate in the circumstances when the statements were made. These statements are subject to a number of assumptions, risks and uncertainties, including those described in "Risk Factors" in Westlake Chemical Corporation's Annual Report on Form 10-K for the fiscal year ended December 31, 2006 and the following:

general economic and business conditions;

timing, duration and impact of turnarounds;

the cyclical nature of the chemical industry;

Edgar Filing: WESTLAKE CHEMICAL CORP - Form 10-Q

the integration of the Longview facilities;

the availability, cost and volatility of raw materials and energy;

uncertainties associated with the United States and worldwide economies, including those due to political tensions in the Middle East and elsewhere;

current and potential governmental regulatory actions in the United States and regulatory actions and political unrest in other countries;

industry production capacity and operating rates;

the supply/demand balance for our products;

competitive products and pricing pressures;

access to capital markets;

terrorist acts;

operating interruptions (including leaks, explosions, fires, natural disasters, weather-related incidents, mechanical failure, unscheduled downtime, labor difficulties, transportation interruptions, spills and releases and other environmental risks);

changes in laws or regulations;

technological developments;

our ability to implement our business strategies; and

creditworthiness of our customers.

Many of these factors are beyond our ability to control or predict. Any of the factors, or a combination of these factors, could materially affect our future results of operations and the ultimate accuracy of the forward-looking statements. These forward-looking statements are not guarantees of our future performance, and our actual results and future developments may differ materially from those projected in the forward-looking statements. Management cautions against putting undue

Table of Contents

reliance on forward-looking statements or projecting any future results based on such statements or present or prior earnings levels. Every forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk***Commodity Price Risk***

A substantial portion of our products and raw materials are commodities whose prices fluctuate as market supply and demand fundamentals change. Accordingly, product margins and the level of our profitability tend to fluctuate with changes in the business cycle. We try to protect against such instability through various business strategies. Our strategies include ethylene product feedstock flexibility and moving downstream into the olefins and vinyls products where pricing is more stable. We use derivative instruments in certain instances to reduce price volatility risk on feedstocks and products. Based on our open derivative positions at March 31, 2007, a hypothetical \$1.00 increase in the price of a MMBTU of natural gas would have decreased our income before taxes by \$0.3 million, a hypothetical \$0.10 increase in the price of a gallon of ethane would have increased our income before taxes by \$0.6 million and a hypothetical \$0.10 increase in the price of a gallon of benzene would have decreased our income before taxes by \$0.2 million. Additional information concerning derivative commodity instruments appears in Note 7 to the consolidated financial statements.

Interest Rate Risk

We are exposed to interest rate risk with respect to fixed and variable rate debt. At March 31, 2007, we had variable rate debt of \$31.6 million outstanding. All of the debt under our credit facility and tax exempt revenue bonds is at variable rates. We do not currently hedge our variable interest rate debt, but we may do so in the future. The average variable interest rate for our variable rate debt of \$31.6 million as of March 31, 2007 was 5.70%. A hypothetical 100 basis point increase in the average interest rate on our variable rate debt would increase our annual interest expense by approximately \$0.3 million. Also, at March 31, 2007, we had \$249.3 million of fixed rate debt. We are subject to the risk of higher interest cost if and when this debt is refinanced. If interest rates are 1% higher at the time of refinancing, our annual interest expense would increase by approximately \$2.5 million.

Item 4. Controls And Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Vice President, Chief Financial Officer and Treasurer, of the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 as of the end of the period covered by this report. In the course of this evaluation, management considered certain internal control areas in which we have made and are continuing to make changes to improve and enhance controls. Based upon that evaluation, our President and Chief Executive Officer and our Vice President, Chief Financial Officer and Treasurer concluded that our disclosure controls and procedures are effective, in all material respects, with respect to (i) the accumulation and communication to our management, including our Chief Executive Officer and our Chief Financial Officer, of information required to be disclosed by us in the reports that we submit under the Exchange Act, and (ii) the recording, processing, summarizing and reporting of such information within the time periods specified in the SEC's rules and forms.

There were no changes in our internal control over financial reporting that occurred during the three months ended March 31, 2007, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

Westlake Chemical Corporation's Annual Report on Form 10-K for the fiscal year ended December 31, 2006 (the 2006 Form 10-K), filed on February 26, 2007, contained a description of various legal proceedings in which we are involved, including environmental proceedings at our facilities in Calvert City, Kentucky. See Note 11 to the consolidated financial statements for an update of certain of those proceedings, which information is incorporated by reference herein.
