ITEM 2.05 Costs Associated with Exit or Disposal Activities

On June 15, 2007, FMC Corporation (FMC or the Company) made the decision to phase out operations of its Baltimore, Maryland agricultural chemicals facility by March 2008. The Company s decision is consistent with its strategy to maintain globally cost-competitive manufacturing positions by sourcing raw materials, intermediates and finished products in lower-cost manufacturing locations.

The Company expects that the phase out of the Baltimore facility will result in estimated pre-tax charges to income from continuing operations of approximately \$125 to 135 million over the next five quarters, beginning in the second quarter of 2007. Estimates of the total cost the Company expects to incur for each major type of cost associated with the phase out are: (i) impairment charges for idled fixed assets of approximately \$70 to 72 million to be recorded in the second quarter of 2007, (ii) accelerated depreciation of fixed assets to be abandoned of approximately \$36 to 38 million, (iii) severance and employee benefits of approximately \$6 to 7 million, and (iv) approximately \$13 to 18 million of other costs including clean-out and demolition costs. Net cash outlays related to the phase out are expected to be approximately \$14 to 18 million.

In 2007, the favorable impact on the Company s income from continuing operations before income taxes, excluding the charges noted above, is expected to be approximately \$5 to 6 million. The annualized benefit to income from continuing operations before income taxes is estimated to be approximately \$25 to 30 million, which is expected to be fully realized in 2009.

A copy of the press release announcing these events is filed as Exhibit 99.1 to this Form 8-K. This Current Report on Form 8-K contains forward-looking statements. The safe harbor statement contained in the press release attached hereto as Exhibit 99.1 is incorporated by reference herein.
