b. Comparative Information

Certain amounts in the unaudited financial statements at December 31, 2006 were reclassified for disclosure on a comparative basis with those for the period ended December 31, 2007.

NOTE 2: CONSIDERATION OF THE EFFECTS OF INFLATION

The unaudited financial statements have been prepared in constant monetary units, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the government discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date again, the restatement of the financial statements was discontinued.

and subsidiaries

Notes to the Unaudited Consolidated Financial Statements (Continued)

In thousand of pesos

NOTE 2: (Continued)

This criterion is not in line with current professional accounting standards, which establish that the financial statements should be restated through September 30, 2003. However, due to the low level of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the consolidated financial statements taken as a whole.

The rate used for restatement of items was the domestic whole revenue price index published by the National Institute of Statistics and Census.

NOTE 3: SIGNIFICANT ACCOUNTING POLICIES

The unaudited financial statements of the subsidiaries mentioned in Note 1, have been prepared on a consistent basis with those applied by IRSA Inversiones y Representaciones Sociedad Anónima. The Note 1 to the unaudited basic financial statements details the most significant accounting policies applied by the Company. Below are the most relevant accounting policies adopted by the subsidiaries, which are not included in that Note.

a. Banco Hipotecario S.A. shares

Banco Hipotecario S.A. shares were valued by using the equity method of accounting by the end of the period. See Note 1.5.i. to the unaudited basic financial statements.

b. Revenue recognition

In addition to the description in the unaudited basic financial statements:

Net income for admission rights and rental of stores and stands

Leases with tenants are accounted for as operating leases. Tenants are generally charged a rent, which consists of the higher of (i) a monthly base rent (the Base Rent) and (ii) a specified percentage of the tenant's monthly gross sales (the Percentage Rent) (which generally ranges between 4% and 10% of tenant's gross sales).

Furthermore, pursuant to the rent adjustment clause in most leases, the tenant's Base Rent generally increases between 7% and 12% each year during the term of the lease. Minimum rental income is recognized following the accrue method. Certain lease agreements contain provisions, which provide for rents based on a percentage of sales or based on a percentage of sales volume above a specified

NOTE 3: (Continued)

threshold. APSA determines the compliance with specific targets and calculates the additional rent on a monthly basis as provided for in the contracts. Thus, these contingent rents are not recognized until the required thresholds are exceeded.

Generally, the Company's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial nine months, upon not less than 60 days' written notice, subject to penalties which vary from one to one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease.

Additionally, the Company monthly charges its tenants administration fees relating to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations. These fees are prorated among the tenants according to their leases and varies from shopping center to shopping center.

Administration fees are recognized monthly when accrued. In addition to rent, tenants are generally charged admission rights, that tenants may be required to pay upon entering into a lease or upon lease renewal. Admission right is normally paid in one lump sum or in a small number of monthly installments. Admission rights are recognized in earnings using the straight-line method over the life of the respective lease agreements.

Lease agent operations

Fibesa S.A. and Comercializadora Los Altos S.A. (formerly Altocity.com S.A.), companies in which APSA have shares of 99.9999% and 100% respectively, act as the leasing agents for APSA bringing together that company and potential lessees for the retail space available in certain of APSA's shopping centers. Fibesa S.A.'s and Comercializadora Los Altos S.A. (formerly Altocity.com S.A.) revenues are derived primarily from collected commissions from spaces lease agreements calculated as a percentage of the final rental income value. Revenues are recognized at the time the transaction is successfully concluded.

Credit card operations

Revenues derived from credit card transactions include commissions, financing income, charges to users for life and disability insurance and statements of accounts. Commissions are recognized at the time the merchants' transactions are processed, while the remaining income is recognized at the time it is accrued.

Hotel operations

The Company recognizes revenues from its rooms, catering, and restaurant facilities as accrued on the close of each business day.

Net operating results from each business unit are disclosed in Note 4.

c. Intangible assets

Intangible assets are carried at cost restated as mentioned in Note 2, less accumulated amortization and corresponding allowances for impairment in value. Included in the Intangible Assets caption are the following:

Trademarks

Trademarks include the expenses and fees related to their registration.

Pre-operating expenses

This item reflects expenses generated by the opening of new shopping malls restated as mentioned in Note 2. Those expenses are amortized by the straight-line method in 3 years, beginning as from the date of opening of the shopping center.

Property development expenses

Expenses incurred related to the selling of development properties, including advertising, commissions and other expenses, are charged to net income for the period in which the corresponding income is accrued, based on the percentage of completion method.

The value of these assets does not exceed its estimated recoverable value at the end of each period/year as applicable.

NOTE 3: (Continued)

d. **Goodwill**

Negative goodwill represents the excess of the market value of net assets of the subsidiaries at the percentage of participation acquired over the acquisition cost. Goodwill has been restated following the guidelines mentioned in Note 2 and amortization has been calculated by the straight-line method based on an estimated useful life, that in no case exceeds 20 years, considering the weighted-average of the remaining useful life of identifiable assets acquired subject to depreciation.

Additionally, also includes goodwill from the subsidiary APSA, originated from the purchase of shares of Tarshop S.A., Fibesa S.A. and Emprendimiento Recoleta S.A., which is amortized through the straight-line method over a period that not exceeds 10 years. The goodwill resulting from the purchase of the shareholding in Empalme S.A.I.C.F.A. y G. is amortized in 16 years.

NOTE 4: **NET OPERATING INCOME BY BUSINESS UNIT**

These segments are Sales and development of properties, Office and others, Shopping centers, Credit card, Hotel and financial operations and others. NOTE 16: RESTRICTED ASSETS

Puerto Retiro S.A.

On April 18, 2000, Puerto Retiro S.A. (indirect subsidiary of the Company) was notified of a filing made by the National Government, through the Ministry of Defense, to extend the petition in bankruptcy of Inversora Dársena Norte S.A. (Indarsa) to Puerto Retiro S.A.. Concurrently with the complaint, at the request of plaintiff, the bankruptcy court granted an order restraining the ability of Puerto Retiro S.A. to sell or dispose in any manner the acquired real estate property from Tandanor S.A. in June 1993.

Indarsa had acquired 90% of the capital stock of Tandanor S.A. to a formerly estate owned company privatized in 1991, engaged in the shipyard industry.

Indarsa did not comply with the payment of the outstanding price for the acquisition of the stock of Tandanor, and therefore the Ministry of Defense requested the bankruptcy of Indarsa, pursuing to extend the bankruptcy to Puerto Retiro S.A.

The evidence steps of the legal procedures have been completed. Puerto Retiro S.A. appealed the precautionary measure, being the same confirmed by the Court on December 14, 2000. The parties have submitted their claims in due time. The file was passed for the judge to issue a pronouncement, this being a decree adjourning the summoning of decisions to pronouncement in the understanding that there exists pre-judgment in respect of the penal cause filed against ex-officers of the Ministry of Defense and ex-directors of the Company. Consequently, the matter will not be solved until there is final judgment in penal jurisdiction.

The Management and legal advisors of Puerto Retiro S.A. estimate that there are legal and technical issues sufficient to consider that the request for postponement of bankruptcy will be denied by the court. However, taking the circumstances into account and the progress of the legal action, this position cannot be considered final.

NOTE 17: TARSHOP S.A. CREDIT CARD RECEIVABLES SECURITIZATION

Tarshop has ongoing revolving year securitization programs through which Tarshop S.A., a majority-owned subsidiary of APSA, transfers a portion of its customer credit card receivable balances to master trusts that issues certificates to public and private investors.

Under the securitization programs, Trusts may issue two types of certificates representing undivided interests in the Trusts Títulos de Deuda Fiduciaria (TDF) and Certificados de Participación (CP), which represent debt, and equity certificates, respectively. Interest and principal services are paid periodically to the TDF holders throughout the life of the security. CPs are subordinated securities which entitle the CP holders to share pro rata in the cash flows of the securitized credit card receivables, after principal and interest on the TDFs and other fees and expenses have been paid. During the revolving period no payments are made to TDF and CP holders. Principal collections of the underlying financial assets are used by the Trust to acquire additional credit card receivables throughout the revolving period. Once the revolving period ends, a period of liquidation occurs during which: (i) no further assets are purchased, (ii) all cash collections are used to fulfill the TDF service requirements and (iii) the remaining proceeds are used to fulfill the CPs service requirements.

In consideration of the receivables transferred to the Trusts, which have been eliminated from the Company's balance sheet, Tarshop received cash (arising from the placement of the debt securities by the Trusts) and CPs issued by the trusts. The latter are recorded at their equity values at the closing of the period/year on the basis of the financial statements issued by the trusts.

Tarshop S.A., agreed on a Securitization Program of consumption portfolio for the purpose of securing long-term financing and the possibility of direct access to the capital market.

Under this Securitization Program, at December 31, 2007, Tarshop S.A. transferred to financial trusts the total amount of Ps. 1,040,000 of credits receivable originated in the use of its clients' credits cards and personal loans carrying promissory notes. On August 1, 2005, a note was submitted to the Argentine Central Bank stating the acceptance of the number of BODEN verified by the Superintendence of Financial and Exchange Entities.

Finally, in September 2005 began the subscription of Coverage BODEN 2012. As of December 31, 2007 the subscription in BODEN 2012 amounts to US\$ 773,533.

On the other hand, liabilities to the Argentine Central Banks recorded as of December 31, 2007 amount to Ps. 188,647, being the credit balance related to advances to subscribe BODEN 2012 in line with sections 28 and 29 of Decree 905/02.

The net exposure with the Public Sector, without considering liquid assets in accounts authorized by the Argentine Central Bank, amount to Ps. 2,648,293 and Ps. 3,104,566 as of December 31, 2007 and 2006, respectively.

Through Communication A 4546 of July 9, 2006, it was established that as from July 1, 2007, such limit was modified to 35%. The exposure of Banco Hipotecario S.A. to the Public Sector originated in compensations granted by the National Government as a result of year 2002 crisis, principally related to the asymmetric pesification of assets and liabilities. To such extent and considering that assets to the Public Sector exceeded the mentioned limit. On January 19, 2006, Banco Hipotecario S.A. reported to the Argentine Central Bank that it will gradually decrease the proportion of assets subject to the exposure to the Public Sector, in line with the amortization and cancellation made by the Government of the bonds received for asymmetric compensation in the currency of issuance. To date, no objections to this issue have been received.

NOTE 1: ACCOUNTING STANDARDS

Below are the most relevant accounting standards used by the Company to prepare these unaudited financial statements:

1.1. Preparation and presentation of unaudited financial statements

These unaudited financial statements are stated in Argentine pesos and were prepared in accordance with disclosure and valuation criteria contained in the Technical Resolutions issued by the Argentine Federation of Professional Councils in Economic Sciences, approved with certain amendments by the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires, in accordance with the resolutions issued by the National Securities Commission.

Unification of professional accounting standards

The National Securities Commission has issued General Resolutions No. 485 and 487 on December 29, 2005 and January 26, 2006, respectively.

Such resolutions have adopted, with certain modifications, the new accounting standards recently issued by the Professional Council in Economic Sciences of the Autonomous City of Buenos Aires through its Resolution CD N° 93/2005. These standards are to be obligatorily applied for fiscal years or interim periods corresponding to fiscal years started as from January 1, 2006.

The principal change that the application of these new standards has generated relates to the treatment of the adjustment for inflation in calculating the deferred tax which can be taken as a temporary difference, according to the Company's criteria. At present the adjustment for inflation is considered as a permanent difference in the deferred income tax calculation. The Company in accordance with the new accounting standards has decided not to recognize the deferred liability generated by the effect of the adjustment for inflation on the fixed assets and other non-monetary assets. The estimated effect as of December 31, 2007 that the adoption of the new criteria would have generated would be a decrease in shareholders' equity of approximately Ps. 174.1 million, which should be recorded in the income statement accounts of previous years for Ps. 193 million (loss) and in the income statement accounts of the period for Ps. 18.9 million (gain).

In accordance with the Company's Management the potential effect that the new accounting standards would have in its subsidiary Banco Hipotecario S.A. would not be significant on the amount of the Company's investment.

The above-mentioned liability would probably turn to the previous position according to the detail that follows:

Item	Up to 12 months	From 1 to 2 years	From 2 to 3 years	Over 3 years	Total
Amount in millions	9.8	9.8	9.7	144.8	174.1

1.2. Use of estimates

The preparation of financial statements requires Company's Management, at a specific date, to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses for the period. Company's Management makes estimates for example when accounting for allowance for doubtful accounts, depreciation and amortization, impairment of long-lived assets, income taxes and contingencies. Future actual results could differ from the estimates and assumptions made at the date of these unaudited financial statements.

1.3. Recognition of the effects of inflation

The unaudited financial statements have been prepared in constant currency, reflecting the overall effects of inflation through August 31, 1995. From that date and until December 31, 2001 the Company discontinued the restatement of the financial statements due to a period of monetary stability. From January 1, 2002 up to February 28, 2003 the effects of inflation were recognized due to the existence of an inflationary period. As from that date, the restatement of the financial statements was discontinued.

This criterion is not in line with current professional accounting standards, which establish that the financial statements should have been restated through September 30, 2003. However, due to the low level of inflation rates during the period from March to September 2003, this deviation has not had a material effect on the unaudited financial statements taken as a whole.

The rate used for restatement of items in these unaudited financial statements is the domestic wholesale price index published by the National Institute of Statistics and Census.

1.4. Comparative information

Balances items as of June 30, 2007 shown in these unaudited financial statements for comparative purposes arise from the audited annual financial statements corresponding to the year then ended.

Certain amounts in the unaudited financial statements as of December 31, 2006 were reclassified for disclosure on comparative bases with those for the six-month period ended December 31, 2007.

1.5. Valuation criteria

a. Cash and banks

Cash on hand has been valued at face value.

b. Foreign currency assets and liabilities

Foreign currency assets and liabilities were valued at each period/year-end exchange rates.

Operations denominated in foreign currency are converted into pesos at the rates of exchange in effect at the date of settlement of the operation.

c. Current investments

Current investments in debt securities and mutual funds were valued at their net realization value.

d. Mortgages and lease receivables and trade accounts payable

Mortgages and lease receivables and trade accounts payable have been valued at the price applicable to spot operations at the time of the transaction plus interest and implicit financial components accrued at the internal rate of return determined at that moment.

e. Financial receivables and liabilities

Financial receivables and payables have been valued at the amount deposited and collected, respectively, net of operating costs, plus financial results accrued based on the internal rate of return estimated at that time.

f. Other receivables and payables

Sundry current assets and liabilities have been valued at face value plus the financial results accrued at the closing of the corresponding period/year.

Sundry receivables and payables (value added tax, deposits in guarantee, and accounts receivable in trust) disclosed under other current and other non-current receivables and payables, were valued based on the best estimate of the amount receivable and payable, respectively, discounted at an interest rate that reflect the value-time of money and the estimate specific transaction risks at the time of incorporation to assets and liabilities, respectively.

As established by the regulations of the National Securities Commission, deferred tax assets and liabilities and MPIT have not been discounted.

Liabilities in kind:

Liabilities in kind corresponding to obligations to deliver units to be built are valued considering the cost of the assets received. The Company estimates that this value does not exceed the cost of construction of the units to deliver plus additional costs to transfer the assets to the creditor.

g. Balances corresponding to financial transactions and sundry receivables and payables with related parties

Receivables and payables with related parties generated by financial transactions and other sundry transactions were valued in accordance with the terms agreed by the parties.

h. Inventories

A property is classified as inventories upon determination by the Board of Directors that the property is to be marketed for sale in the normal course of business over the next several years.

Properties classified as inventories have been valued at acquisition or construction cost restated as mentioned in Note 1.3., or estimated market value, whichever is lower. As of June 30, 2006 the Company maintained allowances for impairment of certain inventories for those which market value is lower than cost (See Exhibit E). Costs include land and land improvements, direct construction costs, construction overhead costs, interest on indebtedness and real estate taxes. During the year ended June 30, 2007 there were no items charged to assets.

During the six-month period ended December 31, 2007 interest costs were capitalized.

Inventories on which advance payments that establish price have been received, and the operation's contract terms and conditions assure that the sale will be effectively accomplished and that the income will be realized, are valued at its fair market value. Profits arising from such valuation are shown in the Gain from recognition of inventories at net realizable value caption of the unaudited Statements of Income.

Properties held for sale are classified as current or non-current based on the estimated date of sale and the time at which the related receivable is expected to be collected by the Company.

The amount recorded in inventories, net of allowances set up, does not exceed their estimated recoverable value at the end of the period/year.

Credits in kind:

The Company has credits in kinds related to rights on the construction of certain units. The units relating to the buildings called Terreno Caballito and Dique III have been valued according to the accounting measuring standards corresponding to inventories receivables and they have been disclosed under Inventories .

i. Non-current investments

Investments in debt securities:

Investments in debt securities were valued based on the best estimate of the discounted amount receivable, applying the corresponding internal rate of return estimated at the time of incorporation to assets, as the Company will hold them to maturity. The value thus obtained does not exceed the respective estimated recoverable value at the end of the period/year.

Investments in subsidiaries and related companies:

Investments in subsidiaries and related companies detailed in Exhibit C, have been valued by using the equity method of accounting based on the unaudited financial statements at December 31, 2007 issued by them. The accounting standards used by the subsidiaries to prepare their unaudited financial statements are the same as those used by the Company. The accounting standards used by the related companies to prepare their unaudited financial statements are those currently in effect.

The unaudited Financial Statements of Banco Hipotecario S.A. and Banco de Crédito y Securitización S.A. are prepared in accordance with the Central Bank of the Argentine Republic (BCRA) standards. For the purpose of the valuation of the investment in the Company, adjustments necessary to adequate the unaudited financial statements to the professional accounting standards have been considered.

This item also includes the lower or higher value paid for the purchase of shares in subsidiaries and related companies assignable to the assets acquired, and goodwill related to the subsidiary Alto Palermo S.A., Palermo Invest S.A. and the related company, Banco Hipotecario S.A.

1.5. (Continued)

i. (Continued)

The Company has an important investment in Banco Hipotecario S.A. This investment is valued according to the equity method due to the significant influence of the economic group on the decisions of Banco Hipotecario S.A. and to the intention of keeping said investment on a permanent basis.

In accordance with the regulations of the BCRA and the contracts signed as a result of Banco Hipotecario S.A.'s financial debt restructuring process, there are certain restrictions on the distribution of profits by Banco Hipotecario S.A. to the Company.

Corporations purchased by the Company were recorded in line with the acquisition method set forth in Technical Resolution No. 18. All assets and liabilities acquired to third independent parties were adjusted to show their fair value. The Company identified the assets and liabilities acquired, including intangible assets like: leasing contracts acquired in higher or lesser conditions to market conditions, costs included in entering into current lease contracts (the last being the market cost that the Company avoids paying for acquiring leasing contracts in operation) and intangible value of relations with customers. The process of identification and the determination of the price paid is a matter that requires complex judgments and significant estimates.

The Company used the information contained in valuations estimated by independent appraisers as primary base for assigning the price paid for the land and the building acquired. The amounts assigned to all the other assets and liabilities were based on independent valuations or in the Company's own analysis on comparable assets and liabilities. The current value of tangible assets acquired considers the property value as if it were empty.

Under the terms of Technical Resolution No. 21, taking into account that the market value of the tangible and intangible assets and liabilities identified exceed the price paid, the intangible assets acquired were not recognized as they would give rise to an increase of the negative goodwill at the time of purchase.

Certificates of participation in IRSA I financial trust:

The certificates of participation in IRSA I financial trust have been valued at the amount resulting from apportioning the participation certificate holding to the trust assets.

Undeveloped parcels of lands:

The Company acquires undeveloped land in order to provide an adequate and well-located supply for its residential and office building operations. The Company's strategy for land acquisition and development is dictated by specific market conditions where the Company conducts its operations.

Land held for development and sale and improvements are stated at cost restated as mentioned in Note 1.3. or market value, whichever is lower. The Company maintains allowances for impairment of certain parcels of undeveloped land for which their market value is lower than cost. (See Exhibit E).

Land and land improvements are transferred to inventories or fixed assets when construction commences or their trade is decided.

The values thus obtained, net of the allowances recorded, do not exceed their respective estimated recoverable values at the end of the period/year.

j. Fixed assets, net

Fixed assets comprise primarily of rental properties and other properties and equipment held for use by the Company.

Fixed assets value, net of allowances set up, does not exceed estimated recoverable value at the end of the period/year.

Rental properties

Rental properties are carried at acquisition and/or construction cost, restated as mentioned in Note 1.3., less accumulated depreciation and allowance for impairment at the end of the period/year. The Company capitalizes accrued interest costs associated with long-term construction projects. During the period ended December 31, 2007, interest costs for Ps. 65 were capitalized in the building known as "DIQUE IV".

During the current period the Company acquired the building known as "Museo Renault" which was valued at its acquisition cost. At the date of these financial statements, the Company is in the process of analysis of current value of this asset as to identify possible greater values or negative goodwill as specified in RT 21.

Accumulated depreciation is computed under the straight-line method over the estimated useful lives of each asset. Expenditures for ordinary maintenance and repairs are charged to results in the period incurred.

The Company has allowances for impairment of certain rental properties as disclosed in Exhibit A. Increases and decreases of such allowances are disclosed in Exhibit E.

Significant renovations and improvements, which improve or extend the useful life of the asset are capitalized and depreciated over its estimated remaining useful life. At the time depreciable assets are retired or otherwise disposed of, the cost and the accumulated depreciation of the assets are eliminated from the accounts and the resulting gain or loss is disclosed in the unaudited statement of income.

Other properties and equipment

Other properties and equipment properties are carried at cost, restated as mentioned in Note 1.3., less accumulated depreciation at the end of the period/year. Accumulated depreciation is computed under the straight-line method over the estimated useful lives of the assets, as specified below:

Assets	Estimated useful life (years)
Leasehold improvements	On contract basis
Furniture and fixtures	5
Vehicles	5
Machinery, equipment and computer equipment	3

The cost of maintenance and repairs is charged to expense as incurred.

The cost of significant renewals and improvements are added to the carrying amount of the respective assets. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts.

k. **Deferred financing cost**

Expenses incurred in connection with the issuance of Negotiable Obligations and proceeds of loans are amortized over the life of the related issuances. In the case of redemption or conversion of these notes, the related expenses are amortized using the accelerated depreciation method.

Amortization has been recorded under Financial results, net in the unaudited statements of income as a greater financing expense.

NOTE 1: (Continued)

l. Customer advances

Customer advances represent payments received in advance in connection with the sale and rent of properties.

m. Income tax

The Company has recognized the charge for income tax by the deferred tax liability method, recognizing timing differences between measurements of accounting and tax assets and liabilities (see Note 14).

To determine deferred assets and liabilities, the tax rate expected to be in effect at the time of reversal or use has been applied to timing differences identified and tax loss carryforwards, considering the legal regulations approved at the date of issuance of these unaudited financial statements.

n. Minimum Presumed Income Tax (MPIT)

The Company calculates MPIT by applying the current 1% rate on computable assets at the end of the year. This tax complements income tax. The Company's tax obligation in each period/year will coincide with the higher of the two taxes. However, if MPIT exceeds income tax in a given period, that amount in excess will be computable as payment on account of income tax arising in any of the following ten years.

At December 31, 2007, the Company has estimated the MPIT, recognizing under Other receivables the amount estimated to be offset as payment on account of income tax in future years in accordance with current regulations, and expensing the remaining balance.

o. Allowances and Provisions

Allowance for doubtful accounts: the Company provides for losses relating to mortgages, lease and other accounts receivable. The allowance for losses is recognized when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the terms of the agreements. The allowance is determined on a one-by-one basis considering the present value of expected future cash flows. While Management uses the information available to make assessments, future adjustments to the allowance may be necessary if future economic conditions differ substantially from the assumptions used in making the assessments. Management has considered all events and/or transactions that are subject to reasonable and normal methods of estimations, and the unaudited financial statements reflect that consideration.

NOTE 1: (Continued)

1.5. (Continued)

o. (Continued)

For impairment of assets: the Company regularly assesses its non-current assets for recoverability whenever there is an indication that the carrying amount of an asset may exceed its recoverable value.

In such cases, the Company has estimated the recoverable value of rental properties based on their economic use value, which is determined based on estimated future cash flows discounted. For the rest of the assets (inventories and undeveloped parcels of land) the Company makes a comparison with market values based on values of comparable properties. If the recoverable value of assets, which had been impaired in prior years, increases, the Company records the corresponding reversals of impairment loss as required by accounting standards.

Increases and decreases of allowances for impairment of assets during the period ended December 31, 2007 and during the fiscal year ended June 30, 2007 are detailed in Exhibit E.

For lawsuits: the Company has certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving labor. The Company accrues liabilities when it is probable that future costs will be incurred and such costs can be reasonably estimated. Such accruals are based on developments to date, the Company's estimates of the outcomes of these matters and the Company's lawyers' experience in contesting, litigating and settling other matters.

As the scope of the liabilities becomes better defined, there may be changes in the estimates of future costs, which could have an effect on the Company's future results of operations and financial condition or liquidity.

At the date of issuance of these unaudited financial statements, Company's Management understands that there are no elements to foresee other potential contingencies having a negative impact on these unaudited financial statements.

p. Shareholders' equity accounts

q. Results for the period

The results for the period are shown as follows:

Amounts included in the unaudited Income Statement are shown in the currency of the month to which they correspond.

Charges for assets consumed (fixed asset depreciation, intangible asset amortization and cost of sales) were determined based on the values recorded for such assets.

Results from investments in subsidiary and affiliated companies was calculated under the equity method, by applying the percentage of the Company's equity interest to the results of such companies, with the adjustments for application of Technical Resolution No. 21.

r. Advertising expenses

The Company generally charges the advertising and publicity expenses to results when they are incurred. Advertising and promotion expenses were approximately Ps. 227 and Ps. 558 for the periods ended December 31, 2007 and 2006, respectively.

s. Pension information

The Company does not maintain any pension plans. Argentine laws provide for pension benefits to be paid to retired employees from government pension plans and/or a privately managed funds plan to which employees may elect to contribute.

t. Derivative financial instruments

The Company has entered into an interest rate swap agreement in order to hedge the risks of fluctuation in interest rates related to its financial debt which accrues interest at variable rate. See Note 15 for details.

u. Revenue recognition

u.1. Sales of properties

The Company records revenue from the sale of properties when all of the following criteria are met:

the sale has been consummated,

there is sufficient evidence to demonstrate the buyer's ability and commitment to pay for the property,

the Company's receivable is not subject to future subordination,

the Company has transferred the property to the buyer.

The Company uses the percentage-of-completion method of accounting with respect to sales of development properties under construction. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs according to budgeted costs. The Company does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun. The percentage-of-completion method of accounting requires the Company's Management to prepare budgeted costs in connection with sales of properties/units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

u.2. Leases

Revenues from leases are recognized on a straight line basis over the life of the related lease contracts.

v. Cash and cash equivalents

The Company considers, for cash flow purposes, all highly liquid investments with original maturities of three months or less, consisting primarily of mutual funds, as cash equivalents.

w. Monetary assets and liabilities

Monetary assets and liabilities are stated at their face value plus or minus the related financial gain or loss.

x. Vacation expenses

Vacation expenses are fully accrued in the period in which the employee renders services in order to be able to take such vacation.

6. Brief comment on the outlook for the coming year.

See Attached.

SUMMARY as of December 31, 2007

During calendar year 2007 the Argentine economy continued to grow in terms of Gross Domestic Product (GDP) for the fifth consecutive year. According to November 2007 data, the year-on-year GDP growth was 8.5%.

Thanks to the rise in salaries and growth in economic activity levels, investment and private consumption have reached historical highs. While investment represented 22.5% of the GDP, private consumption showed an inter-annual 8.6% non-seasonal increase, accounting for approximately 65% of the GDP. As a result of this expansion, during calendar year 2007 unemployment decreased to 7.5%, the lowest figure recorded in the last 14 years. However, the inflationary pickup and limited supply of energy may cause a deceleration in activity levels in the future. To counteract the effects of these two issues, the authorities are analyzing the possibility of increasing energy supply through investments in generation and transmission assets. Despite the potential deceleration of economic activity levels mentioned, certain sectors of the economy keep posting record growth levels. The car manufacturing industry, for example, recorded a 141.7% increase in January 2008 compared to the same month of 2007, and exports rose 107.2% in the same period, according to Automobile Manufacturing Association data.

Public accounts continued to show a favorable evolution during calendar year 2007, mainly reflected by the rate of primary surplus. Primary budget surplus reached 3.2% of the GDP, driven by high tax revenue levels, balancing public spending. In connection with external accounts, Argentina posted a trade balance surplus of US\$ 6.350 billion as of November 30 of calendar year 2007. Consequently, the Argentine Central Bank has strengthened its reserve position, achieving an inter-annual growth of 42.8% in reserves.

As concerns the industries in which we operate, construction continues to be one of the main drivers of the Argentine economy. For the first eleven months of calendar year 2007, the summary indicator of construction activities (ISAC in Spanish) prepared by the National Institute of Statistics and Census (INDEC) showed an 8.3% increase as compared to the same period of the previous year, according to non-seasonal data.

Housing demand in the residential real estate market has shown a sustained growth in recent years, underpinned by the income recovery in the population, the local investors' trend to channel savings to the real estate segment and the inflow of foreign investors who are attracted by the City of Buenos Aires and its alluring real estate values compared to other capitals of the world. In this context, while the excessive supply of mortgage loans has shored up real estate prices in the major economies of the world, in our market real estate prices have lagged as compared to these economies because housing credits remain at levels lower than 2% of the GDP. Therefore, a crisis in low-quality mortgage loans that adversely affects housing values is not likely to occur.

On the contrary, looking ahead mortgage lending should increase to the extent permitted by market conditions, with a view to satisfying the population's housing needs. In this regard, the federal administration is expected to promote future housing financing policies through the financial system and the pension funds aimed at reactivating the mortgage market.

In line with the high levels in private consumption, supermarket sales recorded a year-on-year increase of 29.7% measured at current prices. As concerns the performance of shopping center sales, the INDEC estimates that in calendar year 2007 they recorded a 28.0% increase compared to calendar year 2006, measured in current pesos. The inflow of tourists combined with a competitive exchange rate have added to the favorable performance of this segment.

Demand in the office segment is active while the supply of new offices is still low and soon absorbed, causing demand to remain unsatisfied. Vacancies are caused by the relocation of businesses, and their level is technically null in the higher categories. This mismatch between supply and demand has resulted in a continuous rise in rental prices, particularly in the top quality office segment.

The hotel segment, and five star hotels in particular, have been favored in the last five years by the increase in the number of tourists with high purchasing power. In an international scenario in which worldwide inflow of tourists reached record highs in 2007, according to the latest issue of the WTO World Tourism Barometer, Argentina ranked second among the American countries with the largest growth rate in tourist arrivals, with a 11% increase compared to 2006.

Comments on results for the semester ended December 31, 2007

In this macroeconomic context, we registered a significant improvement in our operating income which amounted to Ps.141.9 million as of December 31, 2007, compared to Ps.104.7 million as of December 31, 2006. This represents a 35.5% increase.

The Company's revenues increased 45.9%, from Ps.340.3 million as of December 31, 2006 to Ps.496.6 million as of December 31, 2007. The participation of the different segments in net revenues was: sales and developments, Ps.63.0 million; offices and other rental properties Ps.44.8 million; shopping centers, Ps.172.6 million; hotels Ps.76.0 million; credit cards, Ps.139.9 million; and financial and other transactions, Ps.0.3 million.

Although we recorded an increase in revenues from our principal business segments, our net income for the six-month period ended December 31, 2007 was Ps.5.8 million compared to Ps.66.1 million in the same period of fiscal year 2007. It should be noted that in the first quarter of the current fiscal year we recorded losses of Ps.30.0 million, which implies that in this quarter we were capable of generating sufficient income to offset accumulated losses. In addition, the lower income in this period as compared to the same period of the previous fiscal year was not motivated by any factors inherent to the operations in the various business segments, but to results not related to operations, such as higher financial expenses and losses from related companies.

Financial results registered a Ps.54.9 million loss compared to a Ps.12.3 million gain in the same semester of fiscal year 2007. The difference is mainly explained by the issue of IRSA's and APSA's Notes in the first six months of fiscal year 2007 which generated interest that translated into higher financing expenses. On the other hand, there was a drop in the value of certain financial assets held as a result of market conditions.

Finally, the results from related companies showed a loss of Ps.9.1 million compared to a gain of Ps.15.0 million in the same semester of fiscal year 2007. Banco Hipotecario's most recent quarterly financial statements reflect the reversal of losses and show healthy business indicators. Banco Hipotecario's net income for the last quarter of the calendar year amounts to Ps.33 million, which partially offsets the extraordinary losses posted for the third quarter in the amount of 102.1 million attributable to valuation differences arising from portfolio holdings of certain financial assets at a lower fair value. In calendar year 2007, Banco Hipotecario recorded net cumulative income for Ps. 80.8 million. In the last quarter, loans to the private sector grew by 59% compared to the same quarter of the previous year. Furthermore, in 2007, BHSA opened 8 new branches and 35 sales offices, which totals 96 points of sale.

First semester of fiscal year 2008 highlights, including significant operations occurred after the end of the period.

I. Offices and Other Rental Properties

During the six-month period ended December 31, 2007, income from rental properties totaled Ps.44.8 million, registering a 95.0% increase as compared to Ps.23.0 million registered in the same period of fiscal year 2007.

Our significant growth in this segment is mainly explained by the higher rental prices of our office buildings and our consolidated position in the class A and AAA building segment, whose occupancy levels have surpassed those prevailing before the 2001 crisis.

The sustained increase in demand for rental properties and the scarce supply of new spaces have given rise to a strong recovery in prices which have already reached and even surpassed the levels in place during the years prior to the 2001 crisis in dollar terms. According to CB Richard Ellis and Colliers International records, the rental prices of AAA class offices in the Catalinas and Plaza Roma areas ranges from US\$/sqm 35 per month to US\$/sqm 38 per month, compared to a range of US\$/sqm 30 per month to US\$/sqm 35 per month in the same semester of the previous year, whereas average rental prices of A class offices stands between US\$/sqm 25 per month and US\$/sqm 28 per month. It should be noted that as most lease agreements are executed for a 36-month term, the effect of this recovery will be shown in the results for the successive years. At present, our office portfolio stands at US\$/sqm. 19 per month, which value will be gradually updated as our lease agreements are renewed.

Our portfolio represents 135,182 square meters of A and AAA leaseable area, a 58.5% increase in leaseable area compared to the figures recorded as of December 31, 2006, causing the Company's market share in this segment to rise to more than 20%. Our offices continue to have full occupancy levels, reaching 98.6% during the second quarter of fiscal year 2008 compared to 98.1% in the second quarter of the previous fiscal year. This implies a vacancy rate of 1.4% in our offices, which is lower to the market average of 2.6% according to Colliers International records, showing the high quality of our properties and the Company's strong positioning. Besides, these values are way below the ones recorded during the years prior to the 2001 crisis, which exceeded 6%.

The promising future in this business segment encourages us to continue studying the possibility of adding new spaces to our portfolio, either through construction or purchase of built properties with proven yield, in top-rated locations. Our future projects include the addition of 11,000 sqm. of leaseable area in Dique IV in Puerto Madero, currently under construction, which implies a total investment of approximately Ps. 45 million. Work progress is 18%, and completion is scheduled for December 31, 2008. In addition, since December 2006 we have a purchase option in respect of the building known as Edificio República, located in the intersection of Tucumán and Bouchard Streets, which has 21 floors of luxury office space. This property is one of the most important office buildings in the City of Buenos Aires, and was designed by the renowned architect César Pelli. We expect to exercise this purchase option in the next months.

After the closing of this quarter, Techint Compañía Técnica Internacional Sociedad Anónima Comercial e Industrial submitted an offer to purchase 29.9% of Edificio Bouchard Plaza, also known as Edificio La Nación, which represented a highly attractive opportunity for the Company in terms of realized appreciation of its portfolio assets. The transaction, representing an area of 9,946 square meters and 133 parking spaces, amounted to US\$ 34.4 million and generated a Ps.20.5 million profit. It should be noted that the lease agreements executed with NORTEL NETWORKS DE ARGENTINA SA and Techint were assigned.

Below is information on our office space as of December 31, 2007.

II. Alto Palermo S.A (APSA): Shopping Centers and Credit Card

The following information relates to data extracted from the balance sheet of our subsidiary Alto Palermo S.A. (APSA), the company which operates our shopping center and credit card segments, in which we had a 62.5% interest as of December 31, 2007.

Net income for the six-month period was Ps.48.7 million, compared to Ps.40.2 million recorded in the same period of the previous year. In terms of percentages, this improvement stands for a 21.1% increase.

Total revenues as of December 31, 2007 amounted to Ps.316.2 million, i.e., 42.1% higher than the total revenues recorded in the same period of the previous year. This increase mainly results from the consumer spending momentum, which has fostered sales in our shopping center and credit card segments.

Gross profit for the period showed a major 39.6% increase, from Ps. 148.5 million in the second quarter of fiscal year 2007 to Ps. 207.3 million in the same period of fiscal year 2008.

The consolidated operating income for the period registered a gain of Ps.107.9 million as compared to Ps.84.9 million registered in the same period of the previous year, which stands for a 27.1% increase. EBITDA¹ for the six-month period totaled Ps. 145.7 million representing a 23.9% increase as compared to the EBITDA for the same period of the previous year. The increase in operating results at lower rates than the increase in total revenues is the result of: (1) a higher incidence of the credit card segment in the business, which operates at lower margins; (2) the results of the subsidiary Tarshop during the second quarter of fiscal year 2008, as explained under Credit Card Segment .

As concerns the evolution of the shopping center segment, revenues have developed favorably, showing a 29.8% increase compared to the same period of the previous fiscal year. EBITDA for this segment has grown in line with this variation, and increased 28.7% compared to the first six months of fiscal year 2007.

During the six-month period ended December 31, 2007, our tenants sales have continued to grow, reaching Ps. 1,870.8 million, 31.3% higher in nominal terms than those recorded in the same period of the previous year.

The business success of our tenants continues to increase demand for space at our shopping centers. In this way, we were able to maintain an occupancy rate of 98.7%. The evolution of this variable not only shows an improvement in our business, but also the excellent quality of our shopping centers portfolio.

Panamerican Mall Project, City of Buenos Aires. In December 2006 we entered into several agreements for the construction, marketing and management of a new shopping center to be developed in the neighborhood of Saavedra, City of Buenos Aires, by Panamerican Mall S.A.. The project includes the construction of a shopping center, a hypermarket, a cinema complex and an office building and/or a residential building. This is one of the Company s most important projects. In March 2007 we started to build the shopping center, which we expect to open in early 2009. As of December 31, 2007, Ps.83.1 million had been invested, and the degree of progress of the works was 17%.

Torres Rosario, City of Rosario. On October 11, 2007 we signed a swap agreement with Condominios del Alto S.A. pursuant to which the Company swapped a portion of plot 2-g, with a total area of 7,901.30 square meters, intended for the construction of housing units in exchange for 15 units to be built with a constructed surface area of 1,504.45 square meters and 15 parking spaces.

Acquisition of Soleil Factory, Province of Buenos Aires. On the days preceding the closing of this quarter, the Company executed a bill of sale for a partial bulk transfer with INCSA, for the purchase of one of the portions of the going concern which is composed of a Shopping Center in the property where the Soleil Factory shopping center is currently located, in the District of San Isidro, Province of Buenos Aires. The transaction is subject to several conditions precedent. The total price will be US\$ 20.7 million. As of the date hereof, US\$ 8.1 million had already been paid in advance. The remaining balance, amounting to US\$ 12.6 million, will be paid within seven years from the date of execution of the deed of the definitive bulk transfer.

Below is information on our shopping centers as of December 31, 2007, in accordance with the Company s consolidated financial statements.

¹ EBITDA represents operating income plus depreciation and amortization charges. EBITDA is not regarded as a generally accepted accounting measure and should therefore not be used to measure financial or operating performance.

Tarjeta Shopping

Tarshop S.A. is a credit card company in which we hold a 80% interest.

Our credit card business unit posted an income of Ps.4.1 million for the second quarter of fiscal year 2008, lower than the Ps.9.0 million income recorded in the same period of the previous year, as a result of higher financial and transaction costs.

Net revenues posted a significant increase of 56.7%, from Ps.89.3 million during the first semester of fiscal year 2007 to Ps.139.9 million during this semester. In addition, operating results reached Ps.11.7 million.

Edgar Filing: IRSA INVESTMENTS & REPRESENTATIONS INC - Form 6-K

During the first semester EBITDA of the Credit Cards segment was Ps.13.9 million, a reduction from Ps.18.2 million in the same period of the previous year.

The credit portfolio including securitized coupons as of December 31, 2007 reached Ps.852.1 million, 52.7% higher than the Ps.558.0 million portfolio recorded as of December 31, 2006.

In the area of collections, short-term delinquency at December 31, 2007 was 5.9%.

III. Sales and Developments

In the six-month period ended December 31, 2007, the sales and developments segment recorded revenues of Ps.63.0 million, compared to Ps.30.8 million in the same period of the previous year. Below is a description of the Company's major developments:

Barrio Chico (formerly San Martín de Tours). This is a unique project in Barrio Parque, the most exclusive residential area in the city of Buenos Aires. Sales in this project were launched in May 2007, with a high degree of success. Previously, efforts had been made to develop the image of the product, in whose context the designation chosen was Barrio Chico and was accompanied by advertising in the most important print media. As of December 31, 2007, the project had been completed and two units were pending sale.

Torres Renoir, Dique III. In view of the steady demand for residential properties in the area of Puerto Madero, during fiscal year 2006 we closed swap agreements that allowed us to start construction of these two exclusive residential buildings of 42 and 51 floors. In the light of the development boom in this area, the project has aroused great expectations in the market, given its outstanding features. On September 30, 2006, in view of the market's interest in this project, sales were launched in Tower 1, whose current degree of progress is 92.0%. As of December 31, 2007, 93.0% of our units had been sold, with two units pending sale.

In connection with Tower 2, as of December 31, 2007, the preliminary building tasks had started. During the second quarter of fiscal year 2008, on November 2, 2007, the Company and the developer decided to replace the swap agreement for Tower 2 for a payment of US\$18.2 million, US\$5.0 million of which were paid on that date and the balance will be received by the Company over the next six months. The income resulting from this transaction amounted to approximately US\$4.7 million.

Caballito. On May 4, 2006 we entered into a US\$7.5 million swap agreement with Koad S.A. whereby we transferred title of block 36 of the property Terrenos de Caballito to Koad in order for it to develop at its sole expense, cost and risk, a complex known as Caballito Nuevo. The construction works have already started, and include two apartment towers of 34 floors each, with 1, 2 and 3 room units of 40 to 85 sqm. surface area, including a wide variety of amenities and services. In consideration for it, Koad paid to us US\$0.05 million while the US\$7.45 million balance will be repaid through the delivery of 118 apartment units and 55 parking spaces. The final number of units to be received will depend on the date of actual delivery by Koad, as the agreement provides for rewards based on terms of delivery. At present, the degree of progress is 15.0% and marketing is expected to be launched during this fiscal year.

Abril, Hudson, Province Buenos Aires. In Abril we have developed a 312-hectare private residential community for the construction of single family homes targeting the upper-middle income market. Abril is located near Hudson City, approximately 34 kilometers south of the City of Buenos Aires. The project includes 20 neighborhoods subdivided into 1,273 lots of approximately 1,107 square meters each. Abril also includes an 18-hole golf course, 130 hectares of woodlands, a 4,000 square meter mansion and entertainment facilities, a bilingual school, horse stables and sports centers and a shopping center. The neighborhoods have been completed, and during the second quarter of fiscal year 2008 the sale of the last plots available in stock was launched.

Benavidez, Tigre. In the district of Benavidez, Municipality of Tigre, 35 km north from downtown Buenos Aires, we are developing a 99.8 hectare gated residential complex known as El Encuentro. It will have a privileged front access to Highway No. 9, allowing an easy way to and from the city. Given the rise in the values of land in the Northern area of the Province of Buenos Aires, particularly in the area in which the development is located, our expectations regarding sales of the lots to be received pursuant to the swap agreement are highly positive. In connection with the degree of work progress, as of December 31, 2007, all services were already operational, including electricity, water, sewage, effluent treatment plant, public lighting, finished roads, accesses, buildings, sports sector, etc. The pending works include a road tunnel and the Bancalari-Benavidez expressway. Marketing actions started after the closing of this quarter and the preliminary sales agreement for the first plot sold was executed in mid January.

Canteras Natal Crespo, Province of Córdoba. The preliminary guidelines for the development of the project have already been laid down. With the engagement of the Chilean architecture firm URBE a Master Plan has been developed. Filing of the applications for preliminary approval is underway, and the Municipality of La Calera has already approved the feasibility of the location for the projected real estate development and the feasibility of its

electric power requirements. The project will be characterized by its attractive and varied offer of residential plots and areas of low and medium density housing. Each of the neighborhoods will have full-service infrastructure. The project will stand out for being embedded in the unique hillside setting of Sierras Chicas, in the Province of Córdoba.

Solares de Santa María, City of Buenos Aires, (formerly, Santa María del Plata). Solares de Santa María is a 70-hectare property facing the River Plate, located in the south border of Puerto Madero (at 10 minutes distance from the Government House) where we plan to start developing an urban project through our subsidiary Solares de Santa María S.A., in which we hold a 90% equity interest. The project has been designed with a residential profile and also features mixed uses, including offices, retail stores, hotels, sports and sailing clubs and service support areas such as a school, supermarket, parking areas, etc., and has been conceived as a new neighborhood in the City of Buenos Aires.

Since its purchase in 1997, we followed the application process for obtaining validation and approval of the project before the governmental authorities of the City of Buenos Aires. So as to optimize and achieve project start-up, while such consents and authorizations are obtained the Company has made contacts with investors with international experience in this kind of real estate development.

Recently, in November 2007, the Executive Branch of the Government of the City of Buenos Aires approved the project through Decree 1584/2007². The approval was made in compliance with the standards of the urban design previously approved by the Urban Planning Council of the Executive Branch, and was passed upon by all competent authorities. The assignment of places for public use and convenience is the maximum one provided for in the Planning Code: 50% of the site will be donated for public use and convenience (357,975 sqm) in which common recreational green and sailing areas, roads, pedestrian lanes, etc. will be constructed. However, several operational and implementation issues remain to be approved by different areas of the authorities in charge of the urban affairs of the City of Buenos Aires.

This notwithstanding, the Decree has been challenged in court in its formal and procedural aspects, but the authorities have not rendered a decision in connection with this challenge yet. In this sense, we shall evaluate in due course the actions to adopt in order to protect our vested rights.

El Rancho, San Carlos de Bariloche. On December 14, 2006, we acquired through our hotel operator subsidiary Llao Llao Resorts S.A., a 129,533 sqm. plot located in the city of San Carlos de Bariloche, in the Province of Rio Negro. The total purchase price was US\$ 7.0 million, US\$ 4.2 million of which were paid in cash and the balance of US\$ 2.8 million was financed through a mortgage payable in 36 equal, consecutive, monthly installments of US\$ 0.086 million each. The plot is located on the shore of Gutierrez Lake, in the surroundings of the Llao Llao Hotel, in an unequalled natural frame, and has a 1,000 sqm. chalet designed by architect Ezequiel Bustillo. The Company is evaluating the possibility of developing a condo hotel on the site.

Organization of IRSA-CYRELA and Vicente Lopez residential project. IRSA-CYRELA (CYRSA), our developer of residential units for Argentina recently organized in partnership with the Brazilian developer CYRELA, continues to make progress in its first residential project to be developed in a plot of more than 22,000 square meters in the district of Vicente López. The project will involve a new concept of residential complexes focused on the use of common spaces, and will be one of the most significant developments in the Greater Buenos Aires area.

Below is a detail of the sales and properties being developed by IRSA as of December 31, 2007.

² On December 21, 2007 we filed a note with the Argentine Securities Commission and the U.S. Securities and Exchange Commission with a detail of the degree of progress of the consent proceedings relating to Solares de Santa María.

IV. Hotels

Income from the hotel segment recorded a 21.3% increase, from Ps.62.7 million in the first semester of fiscal year 2007 to Ps.76.0 million in the same period of this fiscal year.

This rise was due to both the occupation and the average price rate increase. During the first six months of fiscal year 2008, the accumulated average occupancy rate in our hotels was 79.5%, compared to 74.5% in the same period of the previous year. Price rates were highly favored, as they recorded a 16.9% increase compared to the same period of the previous year. The average price per room rose from Ps.470 for the second quarter of fiscal year 2007 to Ps.549 for the second quarter of fiscal year 2008.

In view of the consolidation of the excellent performance of the hotel business in recent years, fueled by local and international tourism, before the closing of this quarter we concluded the expansion works for the construction of 43 new rooms in the Llao Llao hotel, following the traditional characteristics of this establishment. Therefore, the hotel now has 201 rooms. We have also continued improvement and refurbishment works at the Sheraton Libertador Hotel, with a degree of work progress of 50% and estimated completion date by the end of fiscal year 2009, and at the Intercontinental Hotel, with a degree of work progress of 70% and estimated completion date by mid fiscal year 2009.

The following chart shows information regarding our hotels for the six-month period ended December 31, 2007.

Credit Rating Upgrading. After the closing of the quarter, on February 1, 2008 Fitch Ratings announced the upgrading of the Company's international credit rating from B to B+ and its national credit rating from A- to AA-.

Below are the main comments of its announcement:

All ratings have a stable outlook.

The upgrading of IRSA's ratings reflects an increase in the Company's cash flow generation capacity and the financing obtained by IRSA and its subsidiary, APSA, in 2007, that improved IRSA's debt profile and reduced its refinancing risk.

The credit ratings are backed by IRSA's strong position in the Argentine real estate market, where the Company obtained highly favorable cash flow results in its shopping center and office building segments and its portfolio of properties strategically located in the City of Buenos Aires, that might increase the Company's liquidity if sold or used for new developments.

IRSA issues new shares. On October 10, 2007, the Company's General Ordinary and Extraordinary Shareholders' Meeting approved a capital stock increase through the issuance of up to 280 million shares of common stock. In turn, the Shareholders' Meeting approved the issuance of warrants to subscribe shares in the Company's common stock free of charge, which may be exercised by those who subscribed the capital stock increase. These warrants entitle subscribing shareholders to one share every three subscribed shares. As of the date hereof, we have decided to postpone this procedure up and until we see an improvement in the prevailing market conditions.

APSA Distribution of Dividends. On November 9, 2007, as resolved by the Shareholders' Meeting, a cash dividend of Ps. 55.7 million was paid, which represents Ps. 0.07 per share.

VI. Brief comment on prospects for the next quarter

Economic activity in Argentina has continued to grow at high rates for the fifth consecutive year. The main drivers of this expansion process are consumption and investment, variables that have a highly positive impact on our business. Although the current international scenario shows signs of deceleration in economic growth, Argentina is well positioned to face this situation, given its sound fiscal support and sustained world demand for agricultural products, which are the main components of Argentine exports. For this reason, the outlook for fiscal year 2008 continues to be favorable.

The success obtained in the positioning and in the sales of our Shopping Centers encourages us to continue improving our vast variety of commercial proposals, suited to the needs of consumers and latest trends. In the near future we intend to continue to increase our portfolio of assets in this segment, through Panamerican Mall and Shopping Neuquén. Moreover, in line with our policy of continuously improving our portfolio, remodeling works are being performed to change the image of most of our shopping centers. Another key component of our business strategy is the presence of internationally and nationally reputed lessees; therefore, we will keep promoting their diversification and will foster the participation of top brands in our shopping centers, offering the best products in the market to our consumer public.

IRSA Inversiones y Representaciones Sociedad Anónima

Regarding the office market, we believe that the level of prices per square meter will continue to rise on a sustained basis backed by the excessive demand and lack of vacancy. For this reason, we will continue to analyze the addition of new assets to our portfolio. Along these lines, we are building a 11,000 square meter building in Dique IV in Puerto Madero, and we hold a purchase option for the building known as Edificio República, one of the most modern and emblematic office buildings in the City of Buenos Aires, designed by the renowned architect César Pelli. Also noteworthy is the fact that the projected appreciation of the price per square meter has not been fully reflected in our financial statements, as the rates of the lease agreements for most of the properties in our asset portfolio have still not been reviewed. Consequently, we consider that the evolution of income from this business segment will be favorable over the next quarters of this fiscal year.

Finally, we must mention the huge growth potential of our Company which is materialized in its strategically located land reserves, such as the plots in Puerto Madero, Caballito, Neuquén, Rosario and Córdoba, among others. In the future we will continue developing these land reserves through our various lines of business. In this regard, as concerns the residential market, we will make further progress in the proceedings for urbanizing the Solares de Santa María site and the development of residential projects through the IRSA-CYRELA vehicle.

We conducted our review in accordance with standards established by Technical Resolution No. 7 of the Argentine Federation of Professional Councils of Economic Sciences for limited reviews of financial statements. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion. We consider that our limited review provides a reasonable basis for our report.
3. Based on our work and examinations of the financial statements of the Company and the consolidated financial statements for the years ended June 30, 2007 and 2006, on which we issued our unqualified report on July 30, 2007, we report that:
 - a) the financial statements of IRSA Inversiones y Representaciones Sociedad Anónima at December 31, 2007 and 2006 and its consolidated financial statements at those dates, set out in point 1, prepared in accordance with accounting standards prevailing in the Autonomous City of Buenos Aires, include all significant facts and circumstances of which we are aware and we have no observations to make on them.
 - b) the comparative information included in the basic and consolidated balance sheets and the supplementary notes and exhibits to the attached financial statements arise from the Company's financial statements at June 30, 2007.
