Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 28, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____.

Commission file number: 000-10030

Apple Inc.

(Exact name of Registrant as specified in its charter)

Edgar Filing: APPLE INC - Form 10-Q

California
(State or other jurisdiction)

94-2404110
(I.R.S. Employer Identification No.)

of incorporation or organization)

1 Infinite Loop

Cupertino, California
(Address of principal executive offices)

95014
(Zip Code)

Registrant's telephone number, including area code: (408) 996-1010

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Apple Inc.

Notes to Condensed Consolidated Financial Statements (Unaudited)

Note 1 Summary of Significant Accounting Policies

Apple Inc. and its wholly-owned subsidiaries (collectively "Apple" or the "Company") design, manufacture, and market personal computers, portable digital music players, and mobile communication devices and sell a variety of related software, third-party digital content and applications, services, peripherals, and networking solutions. The Company sells its products worldwide through its online stores, its retail stores, its direct sales force, and third-party wholesalers, resellers, and value-added resellers. In addition, the Company sells a variety of third-party Mac, iPod, and iPhone compatible products including application software, printers, storage devices, speakers, headphones, and various other accessories and supplies through its online and retail stores. The Company sells to consumer, small and mid-sized business ("SMB"), education, enterprise, government, and creative markets.

Basis of Presentation and Preparation

The accompanying Condensed Consolidated Financial Statements include the accounts of the Company. Intercompany accounts and transactions have been eliminated. The accompanying Condensed Consolidated Financial Statements include all adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary to present fairly the Condensed Consolidated Financial Statements for all periods presented. The preparation of these Condensed Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in these Condensed Consolidated Financial Statements and accompanying notes. Actual results could differ materially from those estimates.

Certain prior year amounts in the Condensed Consolidated Financial Statements and notes thereto have been reclassified to conform to the current period's presentation. During the first quarter of 2009, the Company reclassified \$2.4 billion of certain fixed-income securities from short-term marketable securities to long-term marketable securities in the September 27, 2008 Condensed Consolidated Balance Sheet. The reclassification resulted from a change in accounting presentation for certain investments based on contractual maturity dates, which more closely reflects the Company's assessment of the timing of when such securities will be converted to cash. As a result of this change, marketable securities with maturities less than 12 months are classified as short-term and marketable securities with maturities greater than 12 months are classified as long-term. There have been no changes in the Company's investment policies or practices associated with this change in accounting presentation. See Note 2, "Financial Instruments" of this Form 10-Q for additional information.

These Condensed Consolidated Financial Statements and accompanying notes should be read in conjunction with the Company's annual Consolidated Financial Statements and the notes thereto for the fiscal year ended September 27, 2008, included in its Annual Report on Form 10-K (the "2008 Form 10-K"). Unless otherwise stated, references to particular years or quarters refer to the Company's fiscal years ended in September and the associated quarters of those fiscal years.

Earnings Per Common Share

Basic earnings per common share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per common share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if the potentially dilutive securities had been issued. Potentially dilutive securities include outstanding options, shares to be purchased under the employee stock purchase plan, and unvested restricted stock units ("RSUs"). The dilutive effect of potentially dilutive securities is reflected in diluted earnings per share by application of the treasury stock method. Under the treasury stock method, an increase in the fair market value of the Company's common stock can result in a greater dilutive effect from potentially dilutive securities.

Edgar Filing: APPLE INC - Form 10-Q

The following table sets forth the computation of basic and diluted earnings per share for the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in thousands, except net income in millions and per share amounts):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Numerator:				
Net income	\$ 1,205	\$ 1,045	\$ 2,810	\$ 2,626
Denominator:				
Weighted-average shares outstanding	891,180	879,546	890,161	877,704
Effect of dilutive securities	11,813	19,783	12,082	22,079
Denominator for diluted earnings per share	902,993	899,329	902,243	899,783
Basic earnings per share	\$ 1.35	\$ 1.19	\$ 3.16	\$ 2.99
Diluted earnings per share	\$ 1.33	\$ 1.16	\$ 3.11	\$ 2.92

Potentially dilutive securities representing approximately 19.2 million and 12.3 million shares of common stock for the three months ended March 28, 2009 and March 29, 2008, respectively, and 18.0 million and 8.6 million shares of common stock for the six months ended March 28, 2009 and March 29, 2008, respectively, were excluded from the computation of diluted earnings per share for these periods because their effect would have been antidilutive.

Fair Value Measurements

During the first quarter of 2009, the Company adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*, which defines fair value, establishes guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS No. 157 does not require any new fair value measurements, but rather eliminates inconsistencies in guidance found in various other accounting pronouncements. The adoption of SFAS No. 157 did not have a material effect on the Company's financial condition or operating results.

SFAS No. 157 establishes a hierarchy for information and valuations used in measuring fair value, which is broken down into three levels. Level 1 valuations are based on quoted prices in active markets for identical assets or liabilities. Level 2 valuations are based on inputs that are observable, either directly or indirectly, other than quoted prices included within Level 1. Level 3 valuations are based on information that is unobservable and significant to the overall fair value measurement.

The Company also adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB Statement No. 115*, during the first quarter of 2009. SFAS No. 159 allows companies to choose to measure eligible financial instruments and certain other items at fair value that are not required to be measured at fair value. SFAS No. 159 requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings at each reporting date. The Company adopted SFAS No. 159 but has not elected the fair value option for any eligible financial instruments.

Refer to Note 3, *Fair Value Measurements* of this Form 10-Q for additional information on the adoption of SFAS Nos. 157 and 159.

Derivative Financial Instruments

During the second quarter of 2009, the Company adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133*, which requires additional disclosures about the Company's objectives and strategies for using derivative instruments, how the derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and related interpretations, and how the derivative instruments and related hedged items affect the financial statements. The adoption of SFAS No. 161 had no financial impact on the Company's Condensed Consolidated Financial Statements. Refer to Note 2, *Financial Instruments* of this Form 10-Q for additional information on the adoption of SFAS No. 161.

Note 2 Financial Instruments**Cash, Cash Equivalents and Marketable Securities**

The following table summarizes the fair value of the Company's cash and available-for-sale securities held in its marketable securities investment portfolio, recorded as cash, cash equivalents, short-term or long-term marketable securities as of March 28, 2009 and September 27, 2008 (in millions):

	March 28, 2009	September 27, 2008
Cash	\$ 622	\$ 368
Money market funds	1,808	1,536
U.S. Treasury securities	340	118
U.S. agency securities	777	2,798
Certificates of deposit and time deposits	610	2,560
Commercial paper	309	4,429
Corporate securities		66
Total cash equivalents	3,844	11,507
U.S. Treasury securities	1,116	343
U.S. agency securities	15,632	5,823
Non-U.S. government securities	54	83
Certificates of deposit and time deposits	196	486
Commercial paper	1,295	1,254
Corporate securities	2,249	2,247
Municipal securities	5	
Total short-term marketable securities	20,547	10,236
U.S. Treasury securities	195	100
U.S. agency securities	1,375	751
Certificates of deposit and time deposits		32
Corporate securities	2,232	1,496
Municipal securities	63	
Total long-term marketable securities	3,865	2,379
Total cash, cash equivalents and marketable securities	\$ 28,878	\$ 24,490

As of December 27, 2008, the Company changed its accounting presentation for certain fixed-income investments, which resulted in the reclassification of certain investments from short-term marketable securities to long-term marketable securities. As a result, prior period balances have been reclassified to conform to the current period's presentation. The Company classifies its marketable securities as either short-term or long-term based on each instrument's underlying contractual maturity date, while its prior classifications were based on the nature of the securities and their availability for use in current operations. As a result of this change, marketable securities with maturities of less than 12 months are classified as short-term and marketable securities with maturities greater than 12 months are classified as long-term. The Company's long-term marketable securities' maturities range from one year to five years. The Company believes this new presentation is preferable as it more closely reflects the Company's assessment of the timing of when such securities will be converted to cash. Accordingly, certain fixed-income investments totaling \$2.4 billion have been reclassified from short-term marketable securities to long-term marketable securities in the September 27, 2008 Condensed Consolidated Balance Sheet to conform to the current period's financial statement presentation. There have been no changes in the Company's investment policies or practices associated with this change in accounting presentation.

Edgar Filing: APPLE INC - Form 10-Q

The Company had net unrealized losses on its investment portfolio of \$69 million and \$117 million as of March 28, 2009 and September 27, 2008, respectively. In both periods, the net unrealized losses related primarily to long-term marketable securities. The Company may sell certain of its marketable securities prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. The Company recognized no material net gains or losses during the three- and six-month periods ended March 28, 2009 and March 29, 2008 related to such sales.

The following table shows the gross unrealized losses and fair value for investments in an unrealized loss position as of March 28, 2009 and September 27, 2008, aggregated by investment category and the length of time that individual securities have been in a continuous loss position (in millions):

Security Description	Less than 12 Months		March 28, 2009 12 Months or Greater		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
	U.S. agency securities	\$ 2,375	\$ (2)	\$	\$	\$ 2,375
Corporate securities	1,422	(16)	1,109	(106)	2,531	(122)
Total	\$ 3,797	\$ (18)	\$ 1,109	\$ (106)	\$ 4,906	\$ (124)

Security Description	Less than 12 Months		September 27, 2008 12 Months or Greater		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
	U.S. agency securities	\$ 6,822	\$ (13)	\$	\$	\$ 6,822
Corporate securities	2,147	(31)	1,148	(77)	3,295	(108)
Total	\$ 8,969	\$ (44)	\$ 1,148	\$ (77)	\$ 10,117	\$ (121)

The Company considers the declines in market value of its marketable securities investment portfolio to be temporary in nature. The unrealized losses on the Company's marketable securities were caused primarily by changes in market interest rates, specifically, widening credit spreads. The Company typically invests in highly-rated securities, and its policy generally limits the amount of credit exposure to any one issuer. The Company's investment policy requires investments to be rated single-A or better, with the objective of minimizing the potential risk of principal loss. Fair values were determined for each individual security in the investment portfolio. When evaluating the investments for other-than-temporary impairment, the Company reviews factors such as the length of time and extent to which fair value has been below cost basis, the financial condition of the issuer, and the Company's ability and intent to hold the investment for a period of time, which may be sufficient for anticipated recovery in market value. During the three- and six-month periods ended March 28, 2009 and March 29, 2008, the Company did not recognize any material impairment charges on outstanding securities. As of March 28, 2009, the Company does not consider any of its investments to be other-than-temporarily impaired.

Derivative Financial Instruments

The Company uses derivatives to partially offset its business exposure to foreign exchange risk. The Company may enter into foreign currency forward and option contracts to offset some of the foreign exchange risk of expected future cash flows on certain forecasted revenue and cost of sales, of net investments in certain foreign subsidiaries, and on certain existing assets and liabilities. To help protect gross margins from fluctuations in foreign currency exchange rates, certain of the Company's subsidiaries whose functional currency is the U.S. dollar, hedge a portion of forecasted foreign currency revenue. The Company's subsidiaries whose functional currency is not the U.S. dollar and who sell in local currencies, may hedge a portion of forecasted inventory purchases not denominated in the subsidiaries' functional currencies. The Company typically hedges portions of its forecasted foreign currency exposure associated with revenue and inventory purchases for three to six months. To help protect the net investment in a foreign operation from adverse changes in foreign currency exchange rates, the Company may enter into foreign currency forward and option contracts to offset the changes in the carrying amounts of these investments due to fluctuations in foreign currency exchange rates. The Company may also enter into foreign currency forward and option contracts to partially offset the foreign exchange gains and losses generated by the re-measurement of certain assets and liabilities denominated in non-functional currencies. However, the Company may choose not to hedge

certain foreign exchange exposures for a variety of reasons, including but not limited to immateriality, accounting considerations, and the prohibitive economic cost of hedging particular exposures. There can be no assurance the hedges will offset more than a portion of the financial impact resulting from movements in foreign exchange rates. As of the end of the second quarter of 2009, the general nature of the Company's risk management activities and the general nature and mix of the Company's derivative financial instruments have not changed materially from the end of 2008.

The Company's accounting policies for these instruments are based on whether the instruments are designated as hedge or non-hedge instruments in accordance with SFAS No. 133. The Company records all derivatives on the balance sheet at fair value. The effective portions of cash flow hedges are recorded in other comprehensive income until the hedged item is recognized in earnings. The effective portions of net investment hedges are recorded in other comprehensive income as a part of the cumulative translation adjustment. Derivatives that are not designated as hedging instruments and the ineffective portions of cash flow hedges and net investment hedges are adjusted to fair value through earnings in other income and expense.

The Company had a net deferred gain associated with cash flow hedges of approximately \$72 million and \$19 million, net of taxes, recorded in other comprehensive income as of March 28, 2009 and September 27, 2008, respectively. Other comprehensive income associated with cash flow hedges of foreign currency revenue is recognized as a component of net sales in the same period as the related revenue is recognized, and other comprehensive income related to cash flow hedges of inventory purchases is recognized as a component of cost of sales in the same period as the related costs are recognized. The portion of the Company's net deferred gain related to products under subscription accounting is expected to be recorded in earnings ratably over the related products' estimated economic lives beginning when the hedged transactions occur, while the portion of the net deferred gain related to other products is expected to be recorded in earnings at the time the hedged transactions occur. As of March 28, 2009, the hedged transactions are expected to occur within six months.

Derivative instruments designated as cash flow hedges must be de-designated as hedges when it is probable the forecasted hedged transaction will not occur in the initially identified time period or within a subsequent two month time period. Deferred gains and losses in other comprehensive income associated with such derivative instruments are reclassified immediately into earnings through other income and expense. Any subsequent changes in fair value of such derivative instruments also are reflected in current earnings unless they are re-designated as hedges of other transactions. The Company did not recognize any material net gains related to the loss of hedge designation on discontinued cash flow hedges during the three- and six-month periods ended March 28, 2009 and March 29, 2008, respectively.

The Company had an unrealized net gain on net investment hedges of \$6 million, net of tax, and an unrealized net loss on net investment hedges of \$1 million, net of tax, included in the cumulative translation adjustment account of accumulated other comprehensive income (AOCI) as of March 28, 2009 and September 27, 2008, respectively. The ineffective portions and amounts excluded from the effectiveness test of net investment hedges are recorded in current earnings in other income and expense.

The Company recognized in earnings a total net gain on foreign currency forward and option contracts not designated as hedging instruments in accordance with SFAS No. 133 of \$15 million and \$173 million during the three- and six-month periods ended March 28, 2009, respectively.

Edgar Filing: APPLE INC - Form 10-Q

The following table shows the notional principal and credit risk amounts of the Company's derivative instruments as of March 28, 2009 (in millions):

	March 28, 2009	
	Notional Principal	Credit Risk Amounts
Instruments qualifying as accounting hedges:		
Foreign exchange contracts	\$ 2,981	\$ 75
Instruments other than accounting hedges:		
Foreign exchange contracts	\$ 2,351	\$ 29

The notional principal amounts for derivative instruments provide one measure of the transaction volume outstanding as of March 28, 2009, and do not represent the amount of the Company's exposure to credit or market loss. The credit risk amounts shown in the table above represent the Company's gross exposure to potential accounting loss on these transactions if all counterparties failed to perform according to the terms of the contract, based on then-current currency exchange rates. The Company's exposure to credit loss and market risk will vary over time as a function of currency exchange rates. Although the table above reflects the notional principal and credit risk amounts of the Company's foreign exchange instruments, it does not reflect the gains or losses associated with the exposures and transactions that the foreign exchange instruments are intended to hedge. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

The estimates of fair value are based on applicable and commonly used pricing models and prevailing financial market information as of March 28, 2009. Refer to Note 3, "Fair Value Measurements" of this Form 10-Q, for additional information on the fair value measurements for all financial assets and liabilities, including derivative assets and derivative liabilities, that are measured at fair value in the Condensed Consolidated Financial Statements on a recurring basis. The following table shows the Company's derivative instruments measured at gross fair value as reflected in the Condensed Consolidated Balance Sheet as of March 28, 2009 (in millions):

	March 28, 2009	
	Fair Value of Derivatives Designated as Hedge Instruments	Fair Value of Derivatives Not Designated as Hedge Instruments
Derivative assets (a):		
Foreign exchange contracts	\$ 70	\$ 30
Derivative Liabilities (b):		
Foreign exchange contracts	\$ 34	\$ 16

- (a) All derivative assets are recorded as other current assets in the Condensed Consolidated Balance Sheet.
- (b) All derivative liabilities are recorded as accrued expenses in the Condensed Consolidated Balance Sheet.

Edgar Filing: APPLE INC - Form 10-Q

The following tables show the effect of the Company's derivative instruments designated as cash flow and net investment hedges in the Condensed Consolidated Statement of Operations for the three- and six-month periods ended March 28, 2009 (in millions):

	Three Months Ended March 28, 2009				
	Gain or (Loss) Recognized in AOCI - Effective Portion (a)	Location of Gain or (Loss) Reclassified from AOCI into Income - Effective Portion	Gain or (Loss) Reclassified from AOCI into Income - Effective Portion (a)	Location of Gain or (Loss) Recognized - Ineffective Portion and Amount Excluded from Effectiveness Testing	Gain or (Loss) Recognized - Ineffective Portion and Amount Excluded from Effectiveness Testing

Note 3 Fair Value Measurements

In the first quarter of 2009, the Company adopted SFAS No. 157 for all financial assets and liabilities and non-financial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring basis. SFAS No. 157 defines fair value as the price that would be received from selling an asset or paid to transfer a

liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, which are required to be recorded at fair value, the Company considers the principal or most advantageous market in which the Company would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as inherent risk, transfer restrictions, and credit risk.

SFAS No. 157 also establishes a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three levels. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is available and significant to the fair value measurement. SFAS No. 157 establishes and prioritizes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Inputs that are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability.

Assets/Liabilities Measured at Fair Value on a Recurring Basis

The following table presents the Company's assets and liabilities measured at fair value on a recurring basis as of March 28, 2009 (in millions):

	March 28, 2009			
	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total

	March 28, 2009	September 27, 2008
Deferred tax liabilities	\$ 863	\$ 675
Other non-current liabilities	852	746
Total other non-current liabilities	\$ 1,715	\$ 1,421

Note 5 Income Taxes

As of March 28, 2009, the Company recorded gross unrecognized tax benefits of \$586 million, of which \$274 million, if recognized, would affect the Company's effective tax rate. As of September 27, 2008, the total amount of gross unrecognized tax benefits was \$506 million, of which \$253 million, if recognized, would affect the Company's effective tax rate. The Company's total gross unrecognized tax benefits are classified as other non-current liabilities in the Condensed Consolidated Balance Sheets. The Company had \$265 million and \$219 million of gross interest and penalties accrued as of March 28, 2009 and September 27, 2008, respectively, which are classified as other non-current liabilities in the Condensed Consolidated Balance Sheets.

Management believes that an adequate provision has been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company could be required to adjust its provision for income tax in the period such resolution occurs. Although the timing of the resolution and/or closure of audits is highly uncertain, the Company does not believe it is reasonably possible that its unrecognized tax benefits would materially change in the next 12 months.

Note 6 Shareholders Equity**Preferred Stock**

Edgar Filing: APPLE INC - Form 10-Q

The Company has five million shares of authorized preferred stock, none of which is issued or outstanding. Under the terms of the Company's Restated Articles of Incorporation, the Board of Directors is authorized to determine or alter the rights, preferences, privileges and restrictions of the Company's authorized but unissued shares of preferred stock.

Comprehensive Income

Comprehensive income consists of two components, net income and other comprehensive income. Other comprehensive income refers to revenue, expenses, gains, and losses that under U.S. generally accepted accounting principles are recorded as an element of shareholders' equity but are excluded from net income. The Company's other comprehensive income consists of foreign currency translation adjustments from those subsidiaries whose functional currency is not the U.S. dollar, the effective portion of foreign currency net investment hedges, unrealized gains and losses on marketable securities categorized as available-for-sale, and net deferred gains and losses on certain derivative instruments accounted for as cash flow hedges.

The following table summarizes the components of total comprehensive income, net of taxes, during the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Net income	\$ 1,205	\$ 1,045	\$ 2,810	\$ 2,626
Other comprehensive income:				
Net change in unrecognized gains on derivative instruments	(33)	(19)	53	(15)
Change in foreign currency translation	(3)	28	(77)	35
Net change in unrealized losses on marketable securities	(18)	(14)	31	(14)
Total comprehensive income	\$ 1,151	\$ 1,040	\$ 2,817	\$ 2,632

The following table summarizes activity in other comprehensive income related to derivatives, net of taxes, held by the Company during the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Change in fair value of derivatives	\$ 32	\$ (15)	\$ 139	\$ (11)
Adjustment for net gains realized and included in net income	(65)	(4)	(86)	(4)
Change in unrealized gains on derivative instruments	\$ (33)	\$ (19)	\$ 53	\$ (15)

The following table summarizes the components of AOCI, net of taxes, as of March 28, 2009 and September 27, 2008 (in millions):

	March 28, 2009	September 27, 2008
Net unrealized losses on available-for-sale securities	\$ (39)	\$ (70)
Cumulative foreign currency translation	(18)	59
Net unrecognized gains on derivative instruments	72	19
Accumulated other comprehensive income	\$ 15	\$ 8

Employee Benefit Plans*Rule 10b5-1 Trading Plans*

As of April 17, 2009, executive officers Timothy D. Cook, Peter Oppenheimer, Philip W. Schiller, and Bertrand Serlet have entered into trading plans pursuant to Rule 10b5-1(c)(1) of the Securities Exchange Act of 1934, as amended (the Exchange Act). A trading plan is a written document that pre-establishes the amounts, prices and dates (or formula for determining the amounts, prices and dates) of future purchases or sales of the Company's stock including the exercise and sale of employee stock options and shares acquired pursuant to the Company's employee

stock purchase plan and upon vesting of RSUs.

Stock Option Activity

Historically, the Company used equity awards in the form of stock options as one of the means for recruiting and retaining highly skilled talent. Beginning in 2009, the Company changed its equity compensation program for eligible employees to RSUs as the primary type of long-term equity-based award. A summary of the Company's stock option activity and related information for the six months ended March 28, 2009 is as follows (in thousands, except per share amounts and contractual term in years):

	Shares Available for Grant	Number of Shares	Weighted- Average Exercise Price	Outstanding Options Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value
Balance at September 27, 2008	50,572	44,146	\$ 74.39		
Restricted stock units granted	(12,020)		\$		
Options granted	(192)	192	\$ 96.70		
Options cancelled	714	(714)	\$ 115.72		
Restricted stock units cancelled	684		\$		
Options exercised		(2,298)	\$ 30.29		
Plan shares expired	(3)		\$		
Balance at March 28, 2009	39,755	41,326	\$ 76.24	3.87	\$ 1,859,606
Exercisable at March 28, 2009		26,994	\$ 50.96	3.22	\$ 1,672,320
Expected to vest after March 28, 2009		13,913	\$ 93.78	5.09	\$ 181,817

Aggregate intrinsic value represents the value of the Company's closing stock price on the last trading day of the fiscal period in excess of the weighted-average exercise price multiplied by the number of options outstanding or exercisable. The aggregate intrinsic value excludes the effect of stock options that have a zero or negative intrinsic value. The total intrinsic value of options at the time of exercise was \$94 million and \$149 million for the three- and six-month periods ended March 28, 2009, respectively, and \$183 million and \$1.1 billion for the three- and six-month periods ended March 29, 2008, respectively.

RSUs granted are deducted from the shares available for grant under the Company's stock option plans utilizing a factor of two times the number of RSUs granted. Similarly, RSUs cancelled are added back to the shares available for grant under the Company's stock option plans utilizing a factor of two times the number of RSUs cancelled.

Restricted Stock Units

The Company's Board of Directors has granted RSUs to members of the Company's executive management team, excluding its Chief Executive Officer (CEO), as well as various employees within the Company. Beginning in 2009, the Company changed its equity compensation program for eligible employees to RSUs as the primary type of long-term equity-based award. RSUs generally vest over four years either at the end of the four-year service period, in two equal installments on the second and fourth anniversaries of the date of grant, in equal installments on each of the first through fourth anniversaries of the grant date, or in equal installments on each semi-annual anniversary of the grant date. Upon vesting, the RSUs are generally net share settled to cover the required withholding tax and the remaining amount is converted into an equivalent number of shares of common stock.

Outstanding RSU balances were not included in the outstanding options balances in the preceding table. A summary of the Company's RSU activity and related information for the six months ended March 28, 2009 is as follows (in thousands, except per share amounts):

	Number of Shares	Weighted- Average Grant Date Fair Value	Aggregate Intrinsic Value
Balance at September 27, 2008	7,040	\$ 134.91	
Restricted stock units granted	6,010	\$ 96.66	
Restricted stock units vested	(902)	\$ 149.95	
Restricted stock units cancelled	(342)	\$ 122.22	
Balance at March 28, 2009	11,806	\$ 114.66	\$ 1,261,472

The fair value as of the vesting date of RSUs that vested was \$2 million and \$88 million for the three- and six-month periods ended March 28, 2009, respectively, and \$257 million and \$300 million for the three- and six-month periods ended March 29, 2008, respectively.

Note 7 Stock-Based Compensation

SFAS No. 123 (revised 2004), *Share-Based Payment*, requires the use of a valuation model to calculate the fair value of stock-based awards. The Company uses the Black-Scholes-Merton (BSM) option-pricing model to calculate the fair value of stock-based awards. The BSM option-pricing model incorporates various assumptions including expected volatility, expected life, and interest rates. The expected volatility is based on the historical volatility of the Company's common stock over the most recent period commensurate with the estimated expected life of the Company's stock options and other relevant factors including implied volatility in market traded options on the Company's common stock. The Company bases its expected life assumption on its historical experience and on the terms and conditions of the stock awards it grants to employees. Stock-based compensation cost is estimated at the grant date based on the award's fair-value as calculated by the BSM option-pricing model and is recognized as expense ratably on a straight-line basis over the requisite service period.

The compensation expense incurred by the Company for RSUs is based on the closing market price of the Company's common stock on the date of grant and is amortized ratably on a straight-line basis over the requisite service period.

The weighted average assumptions used for the three- and six-month periods ended March 28, 2009 and March 29, 2008 and the resulting estimates of weighted-average fair value per share of options granted and of employee stock purchase plan rights (stock purchase rights) during those periods are as follows:

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Expected life - stock options	3.4 years	3.4 years	3.4 years	3.4 years
Expected life - stock purchase rights	6 months	6 months	6 months	6 months
Interest rate - stock options	1.26%	2.60%	1.73%	3.55%
Interest rate - stock purchase rights	0.19%	3.40%	0.92%	4.17%
Expected volatility - stock options	51.00%	46.70%	53.26%	45.87%
Expected volatility - stock purchase rights	57.64%	38.08%	53.71%	34.57%
Expected dividend yields				
Weighted-average fair value of stock options granted during the period	\$ 38.04	\$ 52.38	\$ 38.23	\$ 63.28
Weighted-average fair value of stock purchase rights during the period	\$ 24.92	\$ 49.01	\$ 32.18	\$ 37.95

The following table provides a summary of the stock-based compensation expense included in the Condensed Consolidated Statements of Operations for the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Cost of sales	\$ 29	\$ 20	\$ 57	\$ 38
Research and development	67	47	127	86
Selling, general, and administrative	85	65	167	118
Total stock-based compensation expense	\$ 181	\$ 132	\$ 351	\$ 242

Stock-based compensation expense capitalized as part of software development costs was not significant as of March 28, 2009 and September 27, 2008. The income tax benefit related to stock-based compensation expense was \$66 million and \$132 million for the three- and six-month periods ended March 28, 2009, respectively, and was \$50 million and \$84 million for the three- and six-month periods ended March 29, 2008, respectively. As of March 28, 2009, the total unrecognized compensation cost related to outstanding stock options and RSUs expected to vest was \$1.6 billion, which the Company expects to recognize over a weighted-average period of 2.82 years.

Note 8 Commitments and Contingencies

Lease Commitments

The Company leases various equipment and facilities, including retail space, under noncancelable operating lease arrangements. The Company does not currently utilize any other off-balance sheet financing arrangements. The major facility leases are for terms of 3 to 20 years and generally provide renewal options for terms of 1 to 5 years. Leases for retail space are generally for terms of 5 to 20 years, the majority of which are for 10 years, and often contain multi-year renewal options. As of September 27, 2008, the Company's total future minimum lease payments under noncancelable operating leases were \$1.8 billion, of which \$1.4 billion related to leases for retail space. As of March 28, 2009, total future minimum lease payments under noncancelable operating leases related to leases for retail space decreased \$21 million to \$1.3 billion.

Accrued Warranty and Indemnifications

The following table reconciles changes in the Company's accrued warranties and related costs for the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Beginning accrued warranty and related costs	\$ 265	\$ 237	\$ 267	\$ 230
Cost of warranty claims	(73)	(80)	(151)	(160)
Accruals for product warranties	55	61	131	148
Ending accrued warranty and related costs	\$ 247	\$ 218	\$ 247	\$ 218

The Company generally does not indemnify end-users of its operating system and application software against legal claims that the software infringes third-party intellectual property rights. Other agreements entered into by the Company sometimes include indemnification provisions under which the Company could be subject to costs and/or damages in the event of an infringement claim against the Company or an indemnified third-party. However, the Company has not been required to make any significant payments resulting from such an infringement claim asserted against it or an indemnified third-party and, in the opinion of management, does not have a potential liability related to unresolved infringement claims subject to indemnification that would have a material adverse effect on its financial condition or operating results. Therefore, the Company did not record a liability for infringement costs as of either March 28, 2009 or September 27, 2008.

Concentrations in the Available Sources of Supply of Materials and Product

Although most components essential to the Company's business are generally available from multiple sources, certain key components including, but not limited to microprocessors, enclosures, certain liquid crystal displays (LCDs), certain optical drives, and application-specific integrated circuits (ASICs) are currently obtained by the Company from single or limited sources, which subjects the Company to significant supply and pricing risks. Many of these and other key components that are available from multiple sources including, but not limited to NAND flash memory, dynamic random access memory (DRAM), and certain LCDs, are subject at times to industry-wide shortages and significant commodity pricing fluctuations. In addition, the Company has entered into certain agreements for the supply of key components including, but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable pricing, but there is no guarantee that the Company will be able to extend or renew these agreements on similar favorable terms, or at all, upon expiration or otherwise obtain favorable pricing in the future. Therefore, the Company remains subject to significant risks of supply shortages and/or price increases that can have a material adverse effect on its financial condition and operating results.

The Company and other participants in the personal computer, consumer electronics and mobile communication industries also compete for various components with other industries that have experienced increased demand for their products. In addition, the Company uses some custom components that are not common to the rest of the personal computer, consumer electronics and mobile communication industries, and new products introduced by the Company often utilize custom components available from only one source until the Company has evaluated whether there is a need for, and subsequently qualifies, additional suppliers. When a component or product uses new technologies, initial capacity constraints may exist until the suppliers' yields have matured. If the Company's supply of a key single-sourced component for a new or existing product were delayed or constrained, if such components were available only at significantly higher prices, or if a key manufacturing vendor delayed shipments of completed products to the Company, the Company's financial condition and operating results could be materially adversely affected. The Company's business and financial performance could also be adversely affected depending on the time required to obtain sufficient quantities from the original source, or to identify and obtain sufficient quantities from an alternative source. Continued availability of these components at acceptable prices, or at all, may be affected if those suppliers decided to concentrate on the production of common components instead of components customized to meet the Company's requirements.

Significant portions of the Company's Mac computers, iPods, iPhones, logic boards, and other assembled products are now manufactured by outsourcing partners, primarily in various parts of Asia. A significant concentration of this outsourced manufacturing is currently performed by only a few of the Company's outsourcing partners, often in single locations. Certain of these outsourcing partners are the sole-sourced supplier of components and manufacturing outsourcing for many of the Company's key products including but not limited to final assembly of substantially all of the Company's portable Mac computers, iPods, iPhones and most of the Company's iMacs. Although the Company works closely with its outsourcing partners on manufacturing schedules, the Company's operating results could be adversely affected if its outsourcing partners were unable to meet their production commitments. The Company's purchase commitments typically cover its requirements for periods ranging from 30 to 150 days.

Long-Term Supply Agreements

The Company has entered into prepaid long-term supply agreements to secure the supply of certain inventory components. During the first quarter of 2009, a long-term supply agreement with Intel Corporation was terminated and the remaining prepaid balance of \$167 million was repaid to the Company. During the second quarter of 2009, the Company made a prepayment of \$500 million to LG Display for the purchase of LCD panels. As of March 28, 2009, the Company had a total of \$808 million of inventory component prepayments outstanding.

Contingencies

The Company is subject to certain other legal proceedings and claims that have arisen in the ordinary course of business and have not been fully adjudicated, which are discussed in Part II, Item 1 of this Form 10-Q under the heading "Legal Proceedings". In the opinion of management, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate have a material adverse effect.

on its financial condition or operating results. However, the results of legal proceedings cannot be predicted with certainty. If the Company failed to prevail in any of these legal matters or if several of these legal matters were resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

Production and marketing of products in certain states and countries may subject the Company to environmental, product safety and other regulations including, in some instances, the requirement to provide customers the ability to return product at the end of its useful life, and place responsibility for environmentally safe disposal or recycling with the Company. Such laws and regulations have been passed in several jurisdictions in which the Company operates, including various countries within Europe and Asia, certain Canadian provinces and certain states within the U.S. Although the Company does not anticipate any material adverse effects in the future based on the nature of its operations and the thrust of such laws, there is no assurance that such existing laws or future laws will not have a material adverse effect on the Company's financial condition or operating results.

Note 9 Segment Information and Geographic Data

In accordance with SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, the Company reports segment information based on the management approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of the Company's reportable segments.

The Company manages its business primarily on a geographic basis. Accordingly, the Company determined its operating segments, which are generally based on the nature and location of its customers, to be the Americas, Europe, Japan, Asia-Pacific, Retail, and FileMaker operations. The Company's reportable operating segments consist of Americas, Europe, Japan, and Retail operations. Other operating segments include Asia Pacific, which encompasses Australia and Asia except for Japan, and the Company's FileMaker, Inc. subsidiary. The Americas, Europe, Japan, and Asia Pacific segments exclude activities related to the Retail segment. The Americas segment includes both North and South America. The Europe segment includes European countries, as well as the Middle East and Africa. The Retail segment operates Apple-owned retail stores in the U.S. and in international markets. Each reportable operating segment provides similar hardware and software products and similar services to the same types of customers. The accounting policies of the various segments are the same as those described in Note 1, *Summary of Significant Accounting Policies* of this Form 10-Q and in the Notes to Consolidated Financial Statements in the Company's 2008 Form 10-K.

The Company evaluates the performance of its operating segments based on net sales and operating income. Net sales for geographic segments are generally based on the location of customers, while Retail segment net sales are based on sales from the Company's retail stores. Operating income for each segment includes net sales to third parties, related cost of sales, and operating expenses directly attributable to the segment. Advertising expenses are generally included in the geographic segment in which the expenditures are incurred. Operating income for each segment excludes other income and expense and certain expenses managed outside the operating segments. Costs excluded from segment operating income include various corporate expenses, such as manufacturing costs and variances not included in standard costs, research and development, corporate marketing expenses, stock-based compensation expense, income taxes, various nonrecurring charges, and other separately managed general and administrative costs. The Company does not include intercompany transfers between segments for management reporting purposes. Segment assets exclude corporate assets, such as cash, short-term and long-term investments, manufacturing and corporate facilities, miscellaneous corporate infrastructure, goodwill and other acquired intangible assets. Except for the Retail segment, capital asset purchases for long-lived assets are not reported to management by segment. Cash payments for capital asset purchases by the Retail segment were \$30 million and \$101 million during the three- and six-month periods ended March 28, 2009, respectively, and \$63 million and \$138 million during the three- and six-month periods ended March 29, 2008, respectively.

The Company has certain retail stores that have been designed and built to serve as high-profile venues to promote brand awareness and serve as vehicles for corporate sales and marketing activities. Because of their unique design elements, locations and size, these stores require substantially more investment than the Company's more typical retail stores. The Company allocates certain operating expenses associated with its high-profile stores to corporate marketing expense to reflect the estimated Company-wide benefit. The allocation of these operating costs to corporate expense is based on the amount incurred for a high-profile store in excess of that incurred by a more

typical Company retail location. The Company had opened a total of 11 high-profile stores as of March 28, 2009. Expenses allocated to corporate marketing resulting from the operations of high-profile stores were \$16 million and \$32 million during the three- and six-month periods ended March 28, 2009, respectively, and \$13 million and \$24 million during the three- and six-month periods ended March 29, 2008, respectively.

Summary information by operating segment for the three- and six-month periods months ended March 28, 2009 and March 29, 2008 is as follows (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Americas:				
Net sales	\$ 3,517	\$ 3,268	\$ 8,018	\$ 7,566
Operating income	\$ 1,027	\$ 918	\$ 2,297	\$ 2,091
Europe:				
Net sales	\$ 2,097	\$ 1,780	\$ 4,868	\$ 4,251
Operating income	\$ 611	\$ 485	\$ 1,420	\$ 1,245
Japan:				
Net sales	\$ 500	\$ 424	\$ 981	\$ 824
Operating income	\$ 190	\$ 125	\$ 317	\$ 233
Retail:				
Net sales	\$ 1,471	\$ 1,451	\$ 3,211	\$ 3,152
Operating income	\$ 308	\$ 334	\$ 661	\$ 739
Other Segments (a):				
Net sales	\$ 578	\$ 589	\$ 1,252	\$ 1,327
Operating income	\$ 159	\$ 143	\$ 343	\$ 342

(a) Other Segments consist of Asia-Pacific and FileMaker.

A reconciliation of the Company's segment operating income to the Condensed Consolidated Financial Statements for the three- and six-month periods months ended March 28, 2009 and March 29, 2008 is as follows (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Segment operating income	\$ 2,295	\$ 2,005	\$ 5,038	\$ 4,650
Stock-based compensation expense	(181)	(132)	(351)	(242)
Other corporate expenses, net (a)	(447)	(558)	(894)	(967)
Total operating income	\$ 1,667	\$ 1,315	\$ 3,793	\$ 3,441

(a) Other corporate expenses include research and development, corporate marketing expenses, manufacturing costs and variances not included in standard costs, and other separately managed general and administrative expenses, including certain corporate expenses associated with support of the Retail segment.

Note 10 Related Party Transactions and Certain Other Transactions

The Company entered into a Reimbursement Agreement with its CEO, Steve Jobs, for the reimbursement of expenses incurred by Mr. Jobs in the operation of his private plane when used for Apple business. The Company did not recognize any expenses pursuant to the Reimbursement Agreement during the three months ended March 28, 2009 and recognized a total of \$4,000 in expenses pursuant to the Reimbursement Agreement during the six months ended March 28, 2009. The Company recognized a total of \$30,000 and \$580,000 in expenses pursuant to the Reimbursement Agreement during the three- and six-month periods ended March 29, 2008, respectively. All expenses recognized pursuant to the Reimbursement Agreement have been included in selling, general, and administrative expenses in the Condensed Consolidated Statements of Operations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This section and other parts of this Form 10-Q contain forward-looking statements that involve risks and uncertainties. Forward-looking statements can be identified by words such as anticipates, expects, believes, plans, predicts, and similar terms. Forward-looking statements are not guarantees of future performance and the Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part II, Item 1A, Risk Factors, which are incorporated herein by reference. The following discussion should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended September 27, 2008 (the 2008 Form 10-K) filed with the U.S. Securities and Exchange Commission (SEC) and the Condensed Consolidated Financial Statements and notes thereto included elsewhere in this Form 10-Q. All information presented herein is based on the Company's fiscal calendar. Unless otherwise stated, references in this report to particular years or quarters refer to the Company's fiscal years ended in September and the associated quarters of those fiscal years. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

Available Information

The Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to reports filed pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended (Exchange Act) are filed with the SEC. Such reports and other information filed by the Company with the SEC are available on the Company's website at <http://www.apple.com/investor> when such reports are available on the SEC website. The public may read and copy any materials filed by the Company with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Room 1580, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy, and information statements and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>. The contents of these websites are not incorporated into this filing. Further, the Company's references to the URLs for these websites are intended to be inactive textual references only.

Executive Overview

The Company designs, manufactures, and markets personal computers, portable digital music players, and mobile communication devices and sells a variety of related software, services, peripherals, and networking solutions. The Company's products and services include the Mac® line of desktop and portable computers, the iPod® line of portable digital music players, iPhone™, Apple TV®, Xserve®, a portfolio of consumer and professional software applications, the Mac OS® X operating system, third-party digital content and applications through the iTunes Store®, and a variety of accessory, service and support offerings. The Company sells its products worldwide through its online stores, its retail stores, its direct sales force, and third-party wholesalers, retailers, and value-added resellers. In addition, the Company sells a variety of third-party Mac, iPod and iPhone compatible products, including application software, printers, storage devices, speakers, headphones, and various other accessories and peripherals through its online and retail stores. The Company sells to consumer, small and mid-sized business (SMB), education, enterprise, government, and creative markets. A further description of the Company's products may be found below under the heading Products and Part II, Item 1A, Risk Factors, as well as in Part I, Item 1, Business, of the Company's 2008 Form 10-K.

The Company is focused on providing innovative products and solutions to consumer, SMB, education, enterprise, government and creative customers that greatly enhance their evolving digital lifestyles and work environments. The Company is the only participant in the personal computer industry that controls the design and development of the entire personal computer, including the hardware, operating system, and sophisticated software applications. Additionally, the Company controls the design and development of hardware and system software for its portable digital music players and mobile communication devices, and hosts a robust platform for the discovery and delivery of third-party digital content and applications for these devices through the iTunes Store. The Company is therefore uniquely positioned to offer superior and well-integrated digital lifestyle and productivity solutions, which are further enhanced by the Company's emphasis on ease-of-use and creative industrial designs.

The Company participates in several highly competitive markets, including personal computers with its Mac line of personal computers, consumer electronics with its iPod product families, mobile communications with iPhone, and distribution of third-party digital content and applications through its online iTunes Store. While the Company is widely recognized as a leading innovator in the personal computer and consumer electronics markets as well as a

leader in the emerging market for distribution of third-party digital content and applications, these markets are highly competitive and subject to aggressive pricing. To remain competitive, the Company believes that increased investment in research and development and marketing and advertising is necessary to maintain or expand its position in the markets where it competes. The Company's research and development spending is focused on further developing its existing Mac line of personal computers, its operating system, application software, iPhone and iPods; developing new digital lifestyle consumer and professional software applications; and investing in new product areas and technologies. The Company also believes increased investment in marketing and advertising programs is critical to increasing product and brand awareness.

The Company utilizes a variety of direct and indirect distribution channels. The Company believes that sales of its innovative and differentiated products are enhanced by knowledgeable salespersons who can convey the value of the hardware, software, and peripheral integration, demonstrate the unique digital lifestyle solutions that are available on Mac computers, and demonstrate the compatibility of the Mac with the Windows platform and networks. The Company further believes providing a high-quality sales and after-sales support experience is critical to attracting new and retaining existing customers. To ensure a high-quality buying experience for its products in which service and education are emphasized, the Company continues to expand and improve its distribution capabilities by opening its own retail stores in the U.S. and internationally. The Company had 252 stores open as of March 28, 2009.

The Company has also invested in programs to enhance reseller sales, including the Apple Sales Consultant Program, which places Apple employees and contractors at selected third-party reseller locations. The Company believes providing direct contact with its targeted customers is an efficient way to demonstrate the advantages of its Mac computers and other products over those of its competitors. The Company also sells to customers directly through its online stores around the world and through its direct sales force.

The Company's iPods are sold through a significant number of distribution points to provide broad access. iPods can be purchased in certain department stores, member-only warehouse stores, large retail chains, and specialty retail stores, as well as through the channels for Mac distribution listed above.

iPhone is distributed through the Company, its cellular network carriers' distribution channels, and certain third-party resellers in over 80 countries. The Company has signed multi-year agreements with various cellular network carriers authorizing them to distribute and provide cellular network services for iPhone 3G. These agreements are generally not exclusive with a specific carrier, except in the U.S., U.K., Germany, Spain, Ireland, and certain other countries.

Products

The Company offers a range of personal computing products including desktop and portable personal computers, related devices and peripherals, and various third-party hardware and software products. In addition, the Company offers its own software products, including Mac OS X, the Company's proprietary operating system software for the Mac; server software and related solutions; professional application software; and consumer, education, and business oriented application software. The Company also designs, develops, and markets to Mac and Windows users its family of iPod digital music players and its iPhone mobile communication device, along with related accessories and services, including the online distribution of third-party digital content through the Company's iTunes Store.

In March 2009, the Company introduced updates to its iMac[®], Mac Pro, and Mac mini desktop computers and in April 2009 the Company introduced an updated Xserve.

In March 2009, the Company introduced the new iPod shuffle, which is nearly half the size of the previous model and is the first music player with the VoiceOver feature enabling it to speak song titles, artists and playlist names. iPod shuffle features a new aluminum design, holds up to 1,000 songs and is the first iPod shuffle to accommodate playlists.

A detailed discussion of the Company's other products as of the end of 2008 may be found in Part I, Item 1, "Business," of the Company's 2008 Form 10-K.

Critical Accounting Policies and Estimates

The preparation of financial statements and related disclosures in conformity with U.S. generally accepted accounting principles and the Company's discussion and analysis of its financial condition and operating results

require the Company's management to make judgments, assumptions, and estimates that affect the amounts reported in its Condensed Consolidated Financial Statements and accompanying notes. Note 1, Summary of Significant Accounting Policies of this Form 10-Q and the Notes to Consolidated Financial Statements in the Company's 2008 Form 10-K describes the significant accounting policies and methods used in the preparation of the Company's Condensed Consolidated Financial Statements. Management bases its estimates on historical experience and on various other assumptions it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates and such differences may be material.

Management believes the Company's critical accounting policies and estimates are those related to revenue recognition, valuation of marketable securities, allowance for doubtful accounts, inventory valuation and inventory purchase commitments, warranty costs, stock-based compensation, income taxes, and legal and other contingencies. Management considers these critical policies because they are both important to the portrayal of the Company's financial condition and operating results, and they require management to make judgments and estimates about inherently uncertain matters. The Company's senior management has reviewed these critical accounting policies and related disclosures with the Audit and Finance Committee of the Company's Board of Directors.

Revenue Recognition

Net sales consist primarily of revenue from the sale of hardware, software, music products, third-party digital content and applications, peripherals, and service and support contracts. The Company recognizes revenue for software products (operating system software and applications software), or any product that is considered to be software-related, in accordance with the guidance in Emerging Issues Task Force (EITF) No. 03-5, *Applicability of AICPA Statement of Position 97-2 to Non-Software Deliverables in an Arrangement Containing More-Than-Incidental Software*, (e.g., Mac computers, iPod portable digital music players and iPhone) pursuant to American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, as amended. For products that are not software or software-related, (e.g., third-party digital content sold on the iTunes Store and certain Mac, iPod and iPhone supplies and accessories), the Company recognizes revenue pursuant to the SEC Staff Accounting Bulletin (SAB) No. 104, *Revenue Recognition*.

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is probable. Product is considered delivered to the customer once it has been shipped and title and risk of loss have been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. For online sales to individuals, for some sales to education customers in the U.S., and for certain other sales, the Company defers revenue until the customer receives the product because the Company retains a portion of the risk of loss on these sales during transit. If at the outset of an arrangement the Company determines the arrangement fee is not, or is presumed not to be, fixed or determinable, revenue is deferred and subsequently recognized as amounts become due and payable and all other criteria for revenue recognition have been met.

For both Apple TV and iPhone, the Company has indicated that from time-to-time it may provide future unspecified features and additional software products free of charge to customers. Therefore, sales of Apple TV and iPhone handsets are recognized under subscription accounting in accordance with SOP No. 97-2. The Company recognizes the associated revenue and cost of goods sold on a straight-line basis over the currently estimated 24-month economic lives of these products, with any loss recognized at the time of sale. Costs incurred by the Company for engineering, sales, marketing, and warranty are expensed as incurred.

The Company records reductions to revenue for estimated commitments related to price protection and for customer incentive programs, including reseller and end-user rebates, and other sales programs and volume-based incentives. For transactions involving price protection, the Company recognizes revenue net of the estimated amount to be refunded, provided the refund amount can be reasonably and reliably estimated and the other conditions for revenue recognition have been met. The Company's policy requires that, if refunds cannot be reliably estimated, revenue is not recognized until reliable estimates can be made or the price protection lapses. For customer incentive programs, the estimated cost of these programs is recognized at the later of the date at which the Company has sold the product or the date at which the program is offered. The Company also records reductions to revenue for expected future product returns based on the Company's historical experience. Future market conditions and product transitions may require the Company to increase customer incentive programs and incur incremental price protection obligations that could result in additional reductions to revenue at the time such programs are offered. Additionally, certain customer

incentive programs require management to estimate the number of customers who will actually redeem the incentive based on historical experience and the specific terms and conditions of particular incentive programs. If a greater than estimated proportion of customers redeem such incentives, the Company would be required to record additional reductions to revenue, which would have a negative impact on the Company's results of operations.

Valuation of Marketable Securities

The Company's investments in available-for-sale securities are reported at fair value. Unrealized gains and losses related to changes in the fair value of investments are included in accumulated other comprehensive income, net of tax, as reported in the Company's Condensed Consolidated Balance Sheets. Changes in the fair value of investments impact the Company's net income only when such investments are sold or an other-than-temporary impairment is recognized. Realized gains and losses on the sale of securities are determined by specific identification of each security's cost basis. The Company regularly reviews its investment portfolio to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns, which would require the Company to record an impairment charge in the period any such determination is made. In making this judgment, the Company evaluates, among other things, the duration and extent to which the fair value of an investment is less than its cost, the credit rating of the investment and any changes thereto, and the Company's ability and intent to hold the investment until the earlier of market price recovery or maturity. The Company's assessment on whether an investment is other-than-temporarily impaired or not, could change in the future due to new developments or changes in assumptions related to any particular investment.

Allowance for Doubtful Accounts

The Company distributes its products through third-party distributors, cellular network carriers, and resellers and directly to certain education, consumer, and enterprise customers. The Company generally does not require collateral from its customers; however, the Company will require collateral in certain instances to limit credit risk. In addition, when possible the Company does attempt to limit credit risk on trade receivables with credit insurance for certain customers in Latin America, Europe, Asia, and Australia and by arranging with third-party financing companies to provide flooring arrangements and other loan and lease programs to the Company's direct customers. These credit-financing arrangements are directly between the third-party financing company and the end customer. As such, the Company generally does not assume any recourse or credit-risk-sharing related to any of these arrangements. However, considerable trade receivables that are not covered by collateral, third-party flooring arrangements, or credit insurance are outstanding with the Company's distribution and retail channel partners.

The allowance for doubtful accounts is based on management's assessment of the ability to collect specific customer accounts and includes consideration of the credit-worthiness and financial condition of those specific customers. The Company records an allowance to reduce the specific receivables to the amount that it reasonably believes to be collectible. The Company also records an allowance for all other trade receivables based on multiple factors, including historical experience with bad debts, the general economic environment, the financial condition of the Company's distribution channels, and the aging of such receivables. If there is a deterioration of a major customer's financial condition, if the Company becomes aware of additional information related to the credit-worthiness of a major customer, or if future actual default rates on trade receivables in general differ from those currently anticipated, the Company may have to adjust its allowance for doubtful accounts, which would affect earnings in the period the adjustments are made.

Inventory Valuation and Inventory Purchase Commitments

The Company must order components for its products and build inventory in advance of product shipments. The Company records a write-down for inventories of components and products, including third-party products held for resale, which have become obsolete or are in excess of anticipated demand or net realizable value. The Company performs a detailed review of inventory each fiscal quarter that considers multiple factors including demand forecasts, product life cycle status, product development plans, current sales levels, and component cost trends. The personal computer, consumer electronics and mobile communications industries are subject to a rapid and unpredictable pace of product and component obsolescence and demand changes. If future demand or market conditions for the Company's products are less favorable than forecasted or if unforeseen technological changes negatively impact the utility of component inventory, the Company may be required to record additional write-downs, which would negatively affect gross margins in the period when the write-downs were recorded.

The Company accrues reserves for estimated cancellation fees related to component orders that have been cancelled or are expected to be cancelled. Consistent with industry practice, the Company acquires components through a

combination of purchase orders, supplier contracts, and open orders based on projected demand information. These commitments typically cover the Company's requirements for periods ranging from 30 to 150 days. If there is an abrupt and substantial decline in demand for one or more of the Company's products or an unanticipated change in technological requirements for any of the Company's products, the Company may be required to record additional reserves for cancellation fees that would negatively affect gross margins in the period when the cancellation fees are identified and recorded.

Warranty Costs

The Company provides for the estimated cost for hardware and software warranties at the time the related revenue is recognized based on historical and projected warranty claim rates, historical and projected cost-per-claim, and knowledge of specific product failures that are outside of the Company's typical experience. Each quarter, the Company reevaluates its estimates to assess the adequacy of its recorded warranty liabilities considering the size of the installed base of products subject to warranty protection and adjusts the amounts as necessary. For products accounted for under subscription accounting pursuant to SOP No. 97-2, the Company recognizes warranty expense as incurred. If actual product failure rates or repair costs differ from estimates, revisions to the estimated warranty liability would be required and could negatively affect the Company's results of operations.

The Company periodically provides updates to its applications and operating system software to maintain the software's compliance with specifications. The estimated cost to develop such updates is accounted for as warranty cost that is recognized at the time related software revenue is recognized. Factors considered in determining appropriate accruals related to such updates include the number of units delivered, the number of updates expected to occur, and the historical cost and estimated future cost of the resources necessary to develop these updates.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), *Share-Based Payment*. Under the provisions of SFAS No. 123R, stock-based compensation cost is estimated at the grant date based on the award's fair-value as calculated by the Black-Scholes-Merton (BSM) option-pricing model and is recognized as expense ratably on a straight-line basis over the requisite service period. The BSM option-pricing model requires various judgmental assumptions including expected volatility, forfeiture rates, and expected option life. Significant changes in any of these assumptions could materially affect the fair value of stock-based awards granted in the future.

Income Taxes

The Company records a tax provision for the anticipated tax consequences of the reported results of operations. In accordance with SFAS No. 109, *Accounting for Income Taxes*, the provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those tax assets are expected to be realized or settled. The Company records a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

The Company recognizes and measures uncertain tax positions in accordance with the Financial Accounting Standards Board (FASB) issued Financial Interpretation No. (FIN) 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109*, whereby the Company only recognizes the tax benefit from an uncertain tax position if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Management believes it is more likely than not that forecasted income, including income that may be generated as a result of certain tax planning strategies, together with the tax effects of the deferred tax liabilities, will be sufficient to fully recover the remaining deferred tax assets. In the event that the Company determines all or part of the net deferred tax assets are not realizable in the future, the Company will make an adjustment to the valuation allowance that would be charged to earnings in the period such determination is made. In addition, the calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of FIN 48 and other complex tax laws. Resolution of these uncertainties in a manner inconsistent with management's expectations could have a material impact on the Company's financial condition and operating results.

Legal and Other Contingencies

As discussed in Part II, Item 1 of this Form 10-Q under the heading "Legal Proceedings" and in Note 8 "Commitments and Contingencies" in Notes to Condensed Consolidated Financial Statements, the Company is subject to various legal proceedings and claims that arise in the ordinary course of business. In accordance with SFAS No. 5, *Accounting for Contingencies*, the Company records a contingent liability when it is probable that a loss has been incurred and the amount is reasonably estimable. There is significant judgment required in both the probability determination and as to whether an exposure can be reasonably estimated. In management's opinion, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate have a material adverse effect on its financial condition or operating results. However, the outcomes of legal proceedings and claims brought against the Company are subject to significant uncertainty. Should the Company fail to prevail in any of these legal matters or should several of these legal matters be resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

Net Sales

The following table summarizes net sales and Mac unit sales by operating segment and net sales and unit sales by product during the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions, except unit sales in thousands and per unit amounts):

	Three Months Ended			Six Months Ended		
	March 28, 2009	March 29, 2008	Change	March 28, 2009	March 29, 2008	Change

Edgar Filing: APPLE INC - Form 10-Q

- (a) Other Segments include Asia Pacific and FileMaker.
- (b) Includes iMac, Mac mini, Mac Pro, and Xserve product lines.
- (c) Includes MacBook, MacBook Air, and MacBook Pro product lines.
- (d) Consists of iTunes Store sales, iPod services, and Apple-branded and third-party iPod accessories.
- (e) Derived from handset sales, carrier agreements, and Apple-branded and third-party iPhone accessories.
- (f) Includes sales of Apple-branded and third-party displays, wireless connectivity and networking solutions, and other hardware accessories.
- (g) Includes sales of Apple-branded operating system, application software, third-party software, AppleCare, and Internet services.
- (h) Derived by dividing total Mac net sales by total Mac unit sales.
- (i) Derived by dividing total iPod net sales by total iPod unit sales.

Net sales during the second quarter of 2009 and the first six months of 2009 increased \$651 million or 9% and \$1.2 billion or 7%, respectively, compared to the same periods in 2008. Several factors contributed positively to these increases, including the following:

iPhone revenue and net sales of related products and services were \$1.5 billion and \$2.8 billion in the second quarter of 2009 and first six months of 2009, respectively, with iPhone handset unit sales totaling 3.8 million and 8.2 million during the second quarter of 2009 and first six months of 2009, respectively. Unit sales of iPhone increased 2.1 million or 123% during the second quarter of 2009 and 4.1 million or 103% during the first six months of 2009 compared to the same periods in 2008. iPhone revenue includes the portion of handset revenue recognized in accordance with subscription accounting over the product's 24-month estimated economic life, as well as revenue from sales of iPhone accessories and carrier agreements. The Company was shipping iPhone 3G in over 80 countries as of March 2009.

Net sales of other music-related products and services increased \$168 million or 19% and \$371 million or 22% during the second quarter of 2009 and first six months of 2009, respectively, compared to the same periods in 2008. The increase was due predominantly to increased net sales of third-party digital content and applications from the iTunes Store, which experienced double-digit growth in each of the Company's geographic segments for both the second quarter of 2009 and first six months of 2009. The Company believes this continued growth is the result of heightened consumer interest in downloading third-party digital content and applications, the expansion of third-party audio and video content available for sale and rent via the iTunes Store, and the launch and continued interest and growth of the iTunes App Store. The Company continues to expand its iTunes content and applications offerings around the world.

Net sales of software, service, and other sales increased \$96 million or 18% during the second quarter of 2009 and increased \$74 million or 6% during the first six months of 2009 compared to the same periods in 2008. These increases were due primarily to hedge gains recognized during the second quarter of 2009 and the first six months of 2009, as well as increased software sales during the second quarter of 2009, which was attributed to the launch of iLife® '09 and iWork® '09.

Partially offsetting the favorable factors, discussed above, net sales during the second quarter of 2009 and the first six months of 2009 were negatively impacted by certain factors, including the following:

Mac net sales and unit sales decreased by 16% and 3%, respectively, for the second quarter of 2009 compared to the same period in 2008. During the first six months of 2009 Mac net sales declined 8% year-over-year, while Mac unit sales increased by 3%. Net sales of the Company's Macs accounted for 36% and 35% of the Company's total net revenue for the second quarter of 2009 and first six months of 2009, respectively. Net sales per Mac unit sold decreased by 13% and 10% during the second quarter of 2009 and first six months of 2009, respectively, compared to the same periods in 2008, due primarily to product mix and lower average selling prices across Mac portable systems and most Mac desktop systems.

Net sales and unit sales of the Company's Mac portable systems decreased by 12% and 2%, respectively, for the second quarter of 2009, while net sales and unit sales increased by 5% and 15%, respectively, for the first six months of 2009 compared to the same periods in 2008. The decline in Mac portable systems during the second quarter of 2009 was attributable to lower sales of most Mac portables with the exception of MacBooks, which experienced year-over-year unit sales and net sales growth in each of the Company's reportable operating segments. For the first six months of 2009, total Mac portable systems net sales and unit sales increased due primarily to higher demand for MacBooks, which experienced double digit growth in net sales and unit sales in each of the Company's reportable operating segments.

Net sales and unit sales of the Company's Mac desktop systems decreased by 22% and 4%, respectively, during the second quarter of 2009, and decreased 27% and 16%, respectively, during the first six months of 2009. The Mac desktop systems decrease for the second quarter of 2009 was due mainly to lower net sales and unit sales of Mac Pro, which declined in each of the Company's reportable operating segments, and overall lower net sales of iMac. Similarly, for the first six months of 2009, the Company's Mac desktop systems decreased due to a decline in sales of iMac and Mac Pro, both of which generated lower sales in each of the Company's reportable operating segments.

Net sales of iPods decreased \$153 million or 8% during the second quarter of 2009 and decreased \$779 million or 13% during the first six months of 2009 compared to the same periods in 2008. Conversely, iPod unit sales increased by 3% in both the second quarter of 2009 and first six months of 2009 compared to the same periods in 2008. Net sales per iPod unit sold decreased 12% and 16% in the second quarter of 2009 and first six months of 2009, respectively, compared to the same periods in 2008 resulting from lower average selling prices across each of the iPod product lines due primarily to price reductions taken with the introduction of new iPods in September 2008 and the price reduction taken on iPod shuffle in February 2008.

Segment Operating Performance

The Company manages its business primarily on a geographic basis. The Company's reportable operating segments consist of the Americas, Europe, Japan, and Retail. The Americas, Europe, and Japan reportable segments do not include activities related to the Retail segment. The Americas segment includes both North and South America. The Europe segment includes European countries as well as the Middle East and Africa. The Retail segment operates Apple-owned retail stores in the U.S. and in international markets. Each reportable geographic operating segment and the Retail operating segment provide similar hardware and software products and similar services.

Americas

Net sales in the Americas segment during the second quarter of 2009 increased \$249 million or 8% compared to the second quarter of 2008, while Americas Mac unit sales decreased 8% year-over-year. The increase in net sales during the second quarter of 2009 was attributable to increased iPhone revenue and higher sales of third-party digital content and applications from the iTunes Store, which were offset partially by a decrease in sales of iPods and Mac portable and desktop systems. Sales of Mac portable and desktop systems decreased due largely to lower sales of MacBook Pro, MacBook Air, and Mac Pro. The Americas segment represented 43% and 44% of the Company's total net sales in the second quarters of 2009 and 2008, respectively.

During the first six months of 2009, net sales in the Americas segment increased \$452 million or 6% compared to the same period in 2008, while Americas Mac unit sales were flat on a year-over-year basis. The increase in net sales during the first six months of 2009 was attributable primarily to the significant year-over-year increase in iPhone revenue and higher sales of third-party digital content and applications from the iTunes Store, which was partially offset by a decrease in sales of iPods, Mac portable and desktop systems, and lower software sales. The Americas segment represented approximately 44% of the Company's total net sales for the first six months of both 2009 and 2008.

Europe

Net sales in Europe increased \$317 million or 18% during the second quarter of 2009 compared to the second quarter of 2008. The key contributors to this growth were iPhone revenue and sales of third-party digital content and applications from the iTunes Store. The increase in net sales was offset partially by lower year-over-year net sales of Mac desktop and portable systems and iPods. Total Mac unit sales increased 5% year-over-year, due primarily to an increase in unit sales of MacBook and iMac, while total Mac net sales in Europe decreased resulting from lower average selling prices.

For the first six months of 2009, net sales and unit sales in Europe increased 15% and 9%, respectively, compared to the same periods in 2008. These increases were due mainly to increased iPhone revenue and strong sales of third-party digital content and applications from the iTunes Store, which were offset partially by lower net sales of Mac desktop systems and iPods. Unit sales of iPods increased due to the strong demand for iPod touch, iPod shuffle and iPod nano, while net sales of iPods decreased due to lower average selling prices during the first six months of 2009 compared to the same period in 2008.

Japan

Japan's net sales increased \$76 million or 18% during the second quarter of 2009 and increased \$157 million or 19% during the first six months of 2009 compared to the same periods in 2008. The key contributors to Japan's net sales growth for both the second quarter and first six months of 2009 were increased iPhone and iPod revenue, and higher sales of third-party digital content and applications from the iTunes Store. Net sales and unit sales of iPods increased during the second quarter of 2009 and first six months of 2009 compared to the same periods in 2008, driven predominantly by strong demand for iPod nano and iPod touch.

Retail

Retail net sales increased \$20 million or 1% during the second quarter of 2009 compared to the second quarter in 2008. The increase in net sales was due predominantly to increased iPhone revenue and strong demand for MacBook, offset partially by a decrease in sales of most other Mac portable and desktop systems and iPods. Retail Mac net sales and unit sales decreased due to lower sales across most Mac portable and desktop systems, partially offset by increased sales of MacBook and Mac mini. The Company opened one new retail store during the second quarter of 2009, ending the quarter with 252 stores open, as compared to 208 stores at the end of the second quarter of 2008. The year-over-year growth rate of Retail net sales was less than the increase in the average number of stores open during the same period, which reflects the challenging consumer-spending environment and continued third-party channel expansion. As a result, with an average of 251 stores and 205 stores open during the second quarters of 2009 and 2008, respectively, average revenue per store declined to \$5.9 million for the second quarter of 2009 from \$7.1 million in the second quarter of 2008.

Retail net sales grew \$59 million or 2% during the first six months of 2009 compared to the same period in 2008 due primarily to increased iPhone revenue and strong demand for MacBook, offset partially by a decrease in sales of iPods, Mac desktop systems, MacBook Air, and MacBook Pro. Average revenue per store decreased to \$12.8 million for the first six months of 2009 based on an average of 250 stores, down from \$15.5 million in the first six months of 2008 based on an average of 203 stores.

The Retail segment reported operating income of \$308 million during the second quarter of 2009 compared to operating income of \$334 million during the second quarter of 2008, and reported operating income of \$661 million during the first six months of 2009 compared to \$739 million during the first six months of 2008. The decline in operating income during the second quarter of 2009 and first six months of 2009 was attributable primarily to lower average revenue per store.

Expansion of the Retail segment has required and will continue to require a substantial investment in fixed assets and related infrastructure, operating lease commitments, personnel, and other operating expenses. Capital asset purchases associated with the Retail segment since its inception totaled \$1.5 billion through the end of the second quarter of 2009. As of March 28, 2009, the Retail segment had approximately 14,000 full-time equivalent employees and had outstanding lease commitments associated with retail space of \$1.3 billion. The Company would incur substantial costs if it were to close multiple retail stores and such costs could adversely affect the Company's financial condition and operating results.

Other Segments

The Company's Other Segments, which consist of its Asia Pacific and FileMaker operations, experienced a decrease in net sales of \$11 million or 2% during the second quarter of 2009 compared to the second quarter of 2008, and a decrease of \$75 million or 6% during the first six months of 2009 compared to the same period in 2008. These decreases were related primarily to lower net sales of most iPod products, Mac desktop systems, and MacBook Pro, offset partially by increased iPhone revenue and net sales of MacBook and iPod touch in the Company's Asia Pacific region.

Gross Margin

Gross margin for the three- and six-month periods ended March 28, 2009 and March 29, 2008 was as follows (in millions, except gross margin percentages):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Net sales	\$ 8,163	\$ 7,512	\$ 18,330	\$ 17,120
Cost of sales	5,192	5,038	11,827	11,314
Gross margin	\$ 2,971	\$ 2,474	\$ 6,503	\$ 5,806
Gross margin percentage	36.4%	32.9%	35.5%	33.9%

The gross margin percentage for the second quarter of 2009 was 36.4% compared to 32.9% for the second quarter of 2008 and the gross margin percentage for the first six months of 2009 was 35.5% compared to 33.9% for the first six months of 2008. The gross margin percentage for the second quarter of 2009 and the first six months of 2009 increased largely as a result of significantly lower commodity and other product costs, which were partially offset by price reductions and a strengthening U.S. dollar.

The Company expects its gross margin percentage to decrease in future periods compared to levels achieved during 2008 and the first half of 2009, and anticipates gross margin levels of about 33% in the third quarter of 2009 and about 30% in the fourth quarter of 2009. This expected decline is due largely to the anticipated impact of product transitions, flat or reduced pricing on new and innovative products that have higher cost structures, both expected and potential future cost increases for key components, and a stronger U.S. dollar.

The foregoing statements regarding the Company's expected gross margin percentage are forward-looking and could differ from anticipated levels because of several factors, including but not limited to certain of those set forth below in Part II, Item 1A, "Risk Factors" under the subheading "Future operating results depend upon the Company's ability to obtain key components including, but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable prices and in sufficient quantities," which is incorporated herein by reference. There can be no assurance that targeted gross margin percentage levels will be achieved. In general, gross margins and margins on individual products will remain under downward pressure due to a variety of factors, including continued industry wide global product pricing pressures, increased competition, compressed product life cycles, product transitions and expected increases in the cost of key components including, but not limited to microprocessors, NAND flash memory, dynamic random access memory (DRAM) and liquid crystal displays (LCDs), as well as potential increases in the costs of outside manufacturing services and a potential shift in the Company's sales mix towards products with lower gross margins. In response to these competitive pressures, the Company expects it will continue to take product pricing actions, which would adversely affect gross margins. Gross margins could also be affected by the Company's ability to manage product quality and warranty costs effectively and to stimulate demand for certain of its products. Due to the Company's significant international operations, financial results can be significantly affected in the short-term by fluctuations in exchange rates.

Operating Expenses

Operating expenses for the three- and six-month periods ended March 28, 2009 and March 29, 2008 were as follows (in millions, except for percentages):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Research and development	\$ 319	\$ 273	\$ 634	\$ 519
Percentage of net sales	4%	4%	3%	3%
Selling, general, and administrative	\$ 985	\$ 886	\$ 2,076	\$ 1,846
Percentage of net sales	12%	12%	11%	11%

Research and Development (R&D)

Expenditures for R&D increased 17% or \$46 million to \$319 million in the three months ended March 28, 2009 compared to the same period in 2008, and increased 22% or \$115 million to \$634 million during the six months ended March 28, 2009 compared to the same period in 2008. These increases were due primarily to higher stock-based compensation expenses and an increase in R&D headcount in the current year to support expanded R&D activities. In addition, \$23 million and \$45 million of software development costs were capitalized related to Mac OS X Version 10.6 Snow Leopard and excluded from R&D expense during the three- and six-month periods ended March 28, 2009, respectively, while no software development costs were capitalized during the same periods of 2008. Although total R&D expense increased 17% and 22% during the three- and six-month periods ended March 28, 2009, respectively, it remained relatively flat as a percentage of net sales given the revenue growth of 9% and 7%, respectively, during the same periods in 2008. The Company continues to believe that focused investments in R&D are critical to its future growth and competitive position in the marketplace and are directly related to timely development of new and enhanced products that are central to the Company's core business strategy. As such, the Company expects to make further investments in R&D to remain competitive.

Selling, General, and Administrative (SG&A)

SG&A expenditures increased \$99 million or 11% and \$230 million or 12%, respectively, for the three- and six-month periods ended March 28, 2009 compared to the same periods in 2008. These increases are due primarily to the Company's continued expansion of its Retail segment, higher stock-based compensation expenses and higher spending on marketing and advertising.

Other Income and Expense

Total other income and expense decreased \$99 million or 61% to \$63 million during the three months ended March 28, 2009 compared to \$162 million in the same period of 2008, and decreased \$141 million or 39% during the six months ended March 28, 2009 compared to the same period in 2008. The overall decrease in other income and expense is attributable to the decline in interest rates during the first six months of 2009 compared to the first six months of 2008, partially offset by the Company's higher cash, cash equivalents and marketable securities balances. The weighted-average interest rate earned by the Company on its cash, cash equivalents and marketable securities decreased to 1.53% in the second quarter of 2009 from 3.93% in the second quarter of 2008.

The Company's investment portfolio had gross unrealized losses of \$124 million and \$121 million as of March 28, 2009 and September 27, 2008, respectively, which were partially offset by gross unrealized gains of \$55 million and \$4 million as of March 28, 2009 and September 27, 2008, respectively. In both periods, the gross unrealized losses primarily related to long-term marketable securities. The Company considers the declines in market value of its marketable securities investment portfolio to be temporary in nature. The unrealized losses on the Company's marketable securities were caused primarily by changes in market interest rates, specifically widening credit spreads. The Company has the intent and ability to hold such investments for a sufficient period of time to allow for recovery of the principal amounts invested. Accordingly, no declines in fair value were recognized in the Company's Condensed Statements of Operations during the three- and six-month periods ended March 28, 2009 and March 29, 2008. The Company may sell certain of its marketable securities prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. The Company recognized no material net gains or losses during the three- and six-month periods ended March 28, 2009 and March 29, 2008 related to such sales.

Provision for Income Taxes

The Company's effective tax rate was 30% for both the three- and six-month periods ended March 28, 2009, compared to approximately 29% and 31% for the three- and six-month periods ended March 29, 2008, respectively. The Company's effective rate for these periods differs from the statutory federal income tax rate of 35% due primarily to certain undistributed foreign earnings for which no U.S. taxes are provided because such earnings are intended to be indefinitely reinvested outside the U.S.

The Internal Revenue Service (the IRS) has completed its field audit of the Company's federal income tax returns for the years 2002 through 2003 and proposed certain adjustments. The Company has contested certain of these adjustments through the IRS Appeals Office. All IRS audit issues for years prior to 2002 have been resolved. In addition, the Company is subject to audits by state, local, and foreign tax authorities. Management believes that adequate provision has been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company could be required to adjust its provision for income tax in the period such resolution occurs.

Recent Accounting Pronouncements

During the first quarter of 2009, the Company adopted SFAS No. 157, *Fair Value Measurements*, which defines fair value, provides a framework for measuring fair value, and expands the disclosures required for fair value measurements. In February 2008, the FASB issued FASB Staff Position (FSP) No. FAS 157-2, *Effective Date of FASB Statement No. 157*. FSP No. 157-2 delays the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for all non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) and will be adopted by the Company beginning in the first quarter of 2010. In April 2009, the FASB issued FSP No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, which provides guidance on determining fair value when there is no active market or where the price inputs being used represent distressed sales. FSP No. 157-4 is effective for interim and annual periods ending after June 15, 2009 and will be adopted by the Company beginning in the third quarter of 2009. Although the Company will continue to evaluate the application of FSP No. 157-2 and FSP No. 157-4, management does not currently believe adoption of these accounting pronouncements will have a material impact on the Company's financial condition or operating results.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations*, which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree in a business combination. SFAS No. 141R also establishes principles around how goodwill acquired in a business combination or a gain from a bargain purchase should be recognized and measured, as well as provides guidelines on the disclosure requirements on the nature and financial impact of the business combination. SFAS No. 141R is effective for fiscal years beginning on or after December 15, 2008 and will be adopted by the Company beginning in the first quarter of 2010. Although the Company will continue to evaluate the application of SFAS No. 141R, management does not currently believe adoption of this accounting pronouncement will have a material impact on the Company's financial condition or operating results.

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*, which provides operational guidance for determining other-than-temporary impairments (OTTI) for debt securities. FSP No. 115-2 and 124-2 is effective for interim and annual periods ending after June 15, 2009 and will be adopted by the Company beginning in the third quarter of 2009. Although the Company will continue to evaluate the application of FSP No. 115-2 and 124-2, management does not currently believe adoption of this accounting pronouncement will have a material impact on the Company's financial condition or operating results.

Liquidity and Capital Resources

The following table presents selected financial information and statistics as of March 28, 2009 and September 27, 2008 (in millions):

	March 28, 2009	September 27, 2008
Cash, cash equivalents, and marketable securities	\$ 28,878	\$ 24,490
Accounts receivable, net	\$ 1,932	\$ 2,422
Inventory	\$ 312	\$ 509
Working capital	\$ 20,102	\$ 18,219

As of March 28, 2009, the Company had \$28.9 billion in cash, cash equivalents, and marketable securities, an increase of \$4.4 billion from September 27, 2008. The principal component of this net increase was the cash generated by operating activities of \$4.8 billion, which was partially offset by payments for acquisitions of property, plant, and equipment of \$439 million. The Company's cash generated by operating activities significantly exceeded its net income due primarily to the increase in deferred revenue, net of deferred costs, associated with subscription accounting for iPhone.

The Company's marketable securities investment portfolio is invested primarily in highly rated securities with a minimum rating of single-A. As of March 28, 2009 and September 27, 2008, \$14.0 billion and \$11.3 billion, respectively, of the Company's cash, cash equivalents, and marketable securities were held by foreign subsidiaries and are generally based in U.S. dollar-denominated holdings. The Company believes its existing balances of cash, cash equivalents, and marketable securities will be sufficient to satisfy its working capital needs, capital asset purchases, outstanding commitments, and other liquidity requirements associated with its existing operations over the next 12 months.

Capital Assets

The Company's cash payments for capital asset purchases were \$439 million during the first six months of 2009, consisting of approximately \$101 million for Retail store facilities and \$338 million for corporate facilities and infrastructure, including information systems enhancements. The Company anticipates utilizing approximately \$1.2 billion for capital asset purchases during 2009, including approximately \$350 million for Retail facilities and approximately \$850 million for corporate facilities and infrastructure.

Off-Balance Sheet Arrangements and Contractual Obligations

The Company has not entered into any transactions with unconsolidated entities whereby the Company has financial guarantees, subordinated retained interests, derivative instruments or other contingent arrangements that expose the Company to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company.

Lease Commitments

As of September 27, 2008, the Company had total outstanding commitments on noncancelable operating leases of \$1.8 billion, \$1.4 billion of which related to the lease of retail space and related facilities. The Company's major facility leases are generally for terms of 3 to 20 years and generally provide renewal options for terms of 1 to 5 years. Leases for retail space are for terms of 5 to 20 years, the majority of which are for 10 years, and often contain multi-year renewal options. Total outstanding commitments on noncancelable operating leases related to the lease of retail space decreased to \$1.3 billion as of March 28, 2009.

Purchase Commitments with Contract Manufacturers and Component Suppliers

The Company utilizes several contract manufacturers to manufacture sub-assemblies for the Company's products and to perform final assembly and test of finished products. These contract manufacturers acquire components and build product based on demand information supplied by the Company, which typically covers periods ranging from 30 to 150 days. The Company also obtains individual components for its products from a wide variety of individual suppliers. Consistent with industry practice, the Company acquires components through a combination of purchase orders, supplier contracts, and open orders based on projected demand information. Such purchase commitments typically cover the Company's forecasted component and manufacturing requirements for periods ranging from 30 to 150 days. In addition, the Company has an off-balance sheet warranty obligation for products accounted for under subscription accounting pursuant to SOP No. 97-2 whereby the Company recognizes warranty expense as incurred. As of March 28, 2009, the Company had outstanding off-balance sheet third-party manufacturing commitments, component purchase commitments, and estimated warranty commitments of \$3 billion.

The Company has entered into prepaid long-term supply agreements to secure the supply of certain inventory components. During the first quarter of 2009, a long-term supply agreement with Intel Corporation was terminated and the remaining prepaid balance of \$167 million was repaid to the Company. During the second quarter of 2009, the Company made a prepayment of \$500 million to LG Display for the purchase of LCD panels. As of March 28, 2009, the Company had a total of \$808 million of inventory component prepayments outstanding.

Asset Retirement Obligations

The Company's asset retirement obligations are associated with commitments to return property subject to operating leases to original condition upon lease termination. As of March 28, 2009, the Company estimated that gross expected future cash flows of approximately \$28 million would be required to fulfill these obligations.

Other Obligations

Other outstanding obligations were approximately \$323 million as of March 28, 2009, primarily related to advertising, research and development, Internet and telecommunications services, and other obligations.

As of March 28, 2009, the Company had gross unrecognized tax benefits of \$586 million and an additional \$265 million for gross interest and penalties classified as non-current liabilities in the Condensed Consolidated Balance Sheet. At this time, the Company is unable to make a reasonably reliable estimate of the timing of payments in individual years due to uncertainties in the timing of tax audit outcomes.

Indemnifications

The Company generally does not indemnify end-users of its operating system and application software against legal claims that the software infringes third-party intellectual property rights. Other agreements entered into by the Company sometimes include indemnification provisions under which the Company could be subject to costs and/or damages in the event of an infringement claim against the Company or an indemnified third-party. However, the Company has not been required to make any significant payments resulting from such an infringement claim asserted against it or an indemnified third-party and, in the opinion of management, does not have a liability related to unresolved infringement claims subject to indemnification that would have a material adverse effect on its financial condition or operating results.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's market risk profile has not changed significantly during the first six months of 2009.

Interest Rate and Foreign Currency Risk Management

The Company regularly reviews its foreign exchange forward and option positions, both on a stand-alone basis and in conjunction with its underlying foreign currency and interest rate related exposures. However, given the effective horizons of the Company's risk management activities and the anticipatory nature of the exposures, there can be no assurance the hedges will offset more than a portion of the financial impact resulting from movements in either foreign exchange or interest rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect the Company's financial condition and operating results.

Interest Rate Risk

While the Company is exposed to interest rate fluctuations in many of the world's leading industrialized countries, the Company's interest income and expense is most sensitive to fluctuations in the general level of U.S. interest rates. As such, changes in U.S. interest rates affect the interest earned on the Company's cash, cash equivalents, and marketable securities, the fair value of those marketable securities, as well as costs associated with foreign currency hedges.

The Company's investment policy and strategy are focused on preservation of capital and supporting the liquidity requirements of the Company. A portion of the Company's cash is managed by external managers within the guidelines of the Company's investment policy and to objective market benchmarks. The Company's internal portfolio is benchmarked against external manager performance.

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's investment portfolio. The Company typically invests in highly rated securities and its policy generally limits the amount of credit exposure to any one issuer. The Company's investment policy requires investments to be rated single-A or better with the objective of minimizing the potential risk of principal loss. All highly liquid investments with initial maturities of three months or less at the date of purchase are classified as cash equivalents. The Company classifies its marketable securities as either short-term or long-term based on each instrument's underlying contractual maturity date. All short-term marketable securities have maturities less than 12 months, while all long-term marketable securities have maturities ranging from one to five years. The Company may sell its investments prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. The Company recognized no material net gains or losses during the three- and six-month periods ended March 28, 2009 and March 29, 2008 related to such sales.

Foreign Currency Risk

In general, the Company is a net receiver of currencies other than the U.S. dollar. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, will negatively affect the Company's net sales and gross margins as expressed in U.S. dollars. There is also a risk that the Company will have to adjust local currency product pricing due to competitive pressures when there has been significant volatility in foreign currency exchange rates.

The Company may enter into foreign currency forward and option contracts with financial institutions to protect against foreign exchange risks associated with certain existing assets and liabilities, certain firmly committed transactions, forecasted future cash flows, and net investments in foreign subsidiaries. Generally, the Company's practice is to hedge a majority of its material foreign exchange exposures, typically for three to six months. However, the Company may choose not to hedge certain foreign exchange exposures for a variety of reasons, including but not limited to immateriality, accounting considerations, and the prohibitive economic cost of hedging particular exposures.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on an evaluation under the supervision and with the participation of the Company's management, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act) were effective as of March 28, 2009 to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the second quarter of 2009, which were identified in connection with management's evaluation required by paragraph (d) of Rules 13a-15 and 15d-15 under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

As of March 28, 2009, the end of the quarterly period covered by this report, the Company was subject to the various legal proceedings and claims discussed below, as well as certain other legal proceedings and claims that have not been fully resolved and that have arisen in the ordinary course of business. In the opinion of management, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate have a material adverse effect on its financial condition or operating results. However, the results of legal proceedings cannot be predicted with certainty. Should the Company fail to prevail in any of these legal matters or should several of these legal matters be resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected. The Company settled certain matters during the second quarter of 2009 that did not individually or in the aggregate have a material impact on the Company's results of operations.

Bader v. Anderson, et al.

Plaintiff filed this purported shareholder derivative action against the Company and each of its then current executive officers and members of its Board of Directors on May 19, 2005 in Santa Clara County Superior Court asserting claims for breach of fiduciary duty, material misstatements and omissions and violations of California Business & Professions Code §17200 (unfair competition). The complaint alleged that the Company's March 14, 2005, proxy statement was false and misleading for failure to disclose certain information relating to the Apple Computer, Inc. Performance Bonus Plan, which was approved by shareholders at the annual meeting held on April 21, 2005. Plaintiff, who ostensibly brought suit on the Company's behalf, made no demand on the Board of Directors and alleged that such demand was excused. The complaint sought injunctive and other relief for purported injury to the Company. On July 27, 2005, plaintiff filed an amended complaint alleging that, in addition to the purported derivative claims, adoption of the bonus plan and distribution of the proxy statement describing that plan also inflicted injury on her directly as an individual shareholder. On January 10, 2006, the Court sustained defendants' demurrer to the amended complaint, with leave to amend. Plaintiff filed a second amended complaint on February 7, 2006, and the Company filed a demurrer. After a hearing on June 13, 2006, the Court sustained the demurrer without leave to amend as to the non-director officers and with leave to amend as to the directors. On July 24, 2006, plaintiff filed a third amended complaint, which purported to bring claims derivatively as well as directly on behalf of a class of common stock.
