LETTER TO STOCKHOLDERS

Dear Stockholders,

We welcome this opportunity to provide the Semi-Annual Report for Helios Strategic Mortgage Income Fund, Inc. and Helios Total Return Fund, Inc. (each, a Fund and collectively, the Funds) for the six-months ended May 31, 2009.

The market environment has continued to be challenging over the last six months. By the close of 2008, a weaker global economy and severe illiquidity came to a head in financial markets and this was most acutely felt by the non-Agency MBS, ABS and CMBS markets. The unprecedented expansion of the U.S. government s balance sheet has helped to improve market sentiment in 2009. The unwinding of leverage that caused such an abrupt change in the markets is also being addressed through a number of programs designed to add demand for MBS and ABS securities, including TALF (Term Asset-Backed Loan Facility) and PPIP (Public-Private Investment Program).

Importantly, we believe the Funds are well positioned to take advantage of current market dislocations, particularly in well-structured securities that offer attractive return prospects after adjusting for risk, some of which may offer defensive characteristics.

Our current objectives are to retain exposure to those securities which are presently out-of-favor and below fundamental value as well as to add to our allocations in opportunistic investments, particularly credit-oriented securities, which continue to be increased at a measured pace. Over the long-term, we believe that this strategy should result in attractive returns for our stockholders.

In addition to performance information, this report provides an overview of market conditions and a discussion of factors affecting the Funds investment performance, together with each Fund s unaudited financial statements and portfolio of investments as of May 31, 2009.

Please visit us at www.hyperionbrookfield.com for more information about this and other funds available to you. We remain fully committed to the Funds and their stockholders. As always, we will continue to actively seek investment opportunities in the market and act on them in a timely fashion in an effort to achieve the Funds objectives. We welcome your questions and comments, and encourage you to contact our Investor Relations team at 1-800 HYPERION. Thank you for your support.

Sincerely,

John J. Feeney, Jr.

President

2009 Semi-Annual Report

OBJECTIVE AND STRATEGY

Helios Strategic Mortgage Income Fund, Inc. is a diversified, closed-end fund whose primary investment objective is to provide a high level of current income by investing primarily in mortgage-backed securities (MBS) that, in the opinion of the Fund's advisor, offer an attractive combination of credit quality, yield and maturity. The Fund's secondary investment objective is to provide capital appreciation. Under normal market conditions, the Fund will invest at least 80% of its total assets in MBS securities backed by interests in real estate including Agency MBS, non-Agency Residential MBS, and Commercial MBS. No assurance can be given that the Fund's investment objectives will be achieved.

Effective December 29, 2008, the Fund was renamed Helios Strategic Mortgage Income Fund, Inc.

Investment Risks: Investors in any bond fund should anticipate fluctuations in price. Bond prices and the value of bond funds decline as interest rates rise. Bonds with longer-term maturities generally are more vulnerable to interest rate risk than bonds with shorter-term maturities. Below-investment grade bonds involve greater credit risk, which is the risk that the issuer will not make interest or principal payments when due. An economic downturn or period of rising interest rates could adversely affect the ability of issuers, especially issuers of below-investment grade debt, to service primary obligations and an unanticipated default could cause the Fund to experience a reduction in value of its shares. The Fund's investments in mortgage-backed or asset-backed securities that are subordinated to other interests in the same pool may increase credit risk to the extent that the Fund as a holder of those securities may only receive payments after the pool is obligations to other investors have been satisfied. Below-investment grade bonds are also subject to greater price volatility and are less liquid, especially during periods of economic uncertainty or change, than higher-rated debt securities. Leverage creates an opportunity for an increased return to common stockholders, but unless the income and capital appreciation, if any, on securities acquired with leverage proceeds exceed the costs of the leverage, the use of leverage will diminish the investment performance of the Fund is shares. Use of leverage may also increase the likelihood that the net asset value of the Fund and market value of its common shares will be more volatile, and the yield and total return to common stockholders will tend to fluctuate more in response to changes in interest rates and creditworthiness.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

For the six-month period ending May 31, 2009, Helios Strategic Mortgage Income Fund, Inc. (the Fund) (NYSE: HSM) had a total return of 18.11%, which assumes the reinvestment of dividends and is exclusive of brokerage commissions. Based on the NYSE closing price of \$6.07 on May 29, 2009, the Fund s shares had a dividend yield of 14.33%. The dividend yield is calculated as the annualized amount of the reporting period s most recent monthly dividend declared divided by the stated stock price.

The Fund s NAV decreased 5.71% over the period due to mark-to-market price decline. This was primarily driven by severe fundamental expectations and significant market uncertainty. While prices declined in most non-Agency sectors over the six months ended May 31, 2009, the Fund s share price improved as the premium between the NAV and the share price also increased.

FIXED INCOME MARKET ENVIRONMENT

By the close of 2008, a weaker global economy and severe illiquidity came to a head in financial markets and this was most acutely felt by the non-Agency MBS, ABS and CMBS markets. The unprecedented expansion of the U.S. government is balance sheet, the so-called quantitative easing in recent months, has helped to improve market sentiment in 2009. Through the first five months of the calendar year, the U.S. Federal Reserve is buying plan for MBS and Treasury notes managed to keep mortgage rates in a target zone (less than 6%). In addition, government plans for housing, such as the agency refinance program and the loan modification programs, are aimed at curbing foreclosure inventory and increasing affordability for homes (mortgages). Finally, the unwinding of leverage that has caused a precipitous change in the markets is also being addressed through a number of programs designed to add demand for MBS and ABS securities, including TALF (Term Asset-Backed Loan Facility) and PPIP (Public-Private Investment Program).

Hyperion Brookfield Asset Management, Inc. 2

Combined, these efforts endeavor to establish a bottom in the housing market, which is currently expected in 2010. The programs aim to maintain lower mortgage rates for current borrowers looking to refinance and to modify loans to prevent foreclosure. Both these steps are necessary, however, it is worth noting that neither will create new demand for homes. Therefore, we anticipate the housing market could decline 15% to 20% over the next 15 to 18 months before reaching the low point. This is significant given the breathtaking home price declines already realized. Nationally, by the end of the first quarter of 2009 home prices were down 25% compared to the fourth quarter of 2006. In certain regions, home prices were down over 45% for this period.

The key signs of a bottom in housing will include increases in home sales and significant declines in existing home inventories. These conditions require that lenders must be willing to lend and creditworthy borrowers must be inclined to borrow. These conditions will occur when a number of critical drivers are in place. The drivers include asset price stability (both in terms of securities prices and home prices); this stability will allow banks to ascertain their collateral and their financing and should improve willingness and/or the ability to lend. In addition, buyers will return to the market as home price declines slow or stabilize. Another important driver will be an improving employment situation, as major financial investments are unlikely to be made while household incomes remain uncertain.

However, in general, the securitized markets are pricing-in conservative forward expectations for government intervention, housing prices, and defaults, in many cases considerably more so than other sectors, such as corporate securities or equities.

PORTFOLIO STRATEGY

As of May 31, 2009, the Fund had a 52.3% allocation to Agency MBS and U.S. Treasury securities. These securities are high-quality, liquid securities backed by the U.S. government and its agencies. The Agency MBS are backed first by the credit of the underlying mortgages and second by the corporate guarantee of the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac). This corporate guarantee was further backed by the U.S. government during 2008, and we remain comfortable with these holdings from a credit perspective. That said, we believe the prices of Agency MBS and U.S. Treasury securities have increased to levels that are not likely sustainable over the longer term. Our opinion regarding values here is based on the absolute level of yields for both agency MBS and U.S. Treasury securities. These prices may remain range-bound while the U.S. government is operating a significant buying program, however the level of prices and of yield spreads are not likely to hold beyond the program. As such, the Fund's exposure to duration was reduced over the past six months, and in addition, we are assessing a measured allocation decrease across Agency MBS and U.S. Treasury securities in order to take advantage of other opportunities, including stronger performing prime MBS securities.

The Fund had a 12.1% allocation to CMBS. The commercial mortgage market weakened substantially over the past four quarters, evidenced by rising incidence of troubled loans and falling asset prices. This resulted in dramatic price declines for CMBS. The price declines have run far in advance of declining fundamentals and therefore we intend to maintain our exposures. In addition, the timing of loan resolutions in CMBS is expected to be protracted, which accrues to the advantage of certain junior classes and benefited the Fund s portfolio.

Approximately 32.1% of the Fund was invested in non-Agency RMBS. This portion of the portfolio had below-investment-grade holdings, which were severely penalized in terms of both price and liquidity. However, many of the Fund sholdings in this sector are from the 2002 to 2005 vintage, which refers to the year in which the loans were originated. These vintages have performed better from a delinquency and prepayment perspective than more recent vintages. As a result, these securities have fewer credit difficulties than securities from either the 2006 or 2007 vintages and we remain comfortable with the Fund s allocation.

With 52.3% of the portfolio allocated to Agency MBS and U.S. Treasuries, we believe the Fund is well positioned to take advantage of current market dislocations and we continue to seek investment opportunities in the securitized sectors, particularly among highly-rated distressed securities. Despite the overall environment, well-structured securities that are defensive in their expected return profile remain available. We expect these types of opportunistic allocations to continue to add long-term value for stockholders.

${\tt Edgar\ Filing:\ HELIOS\ STRATEGIC\ MORTGAGE\ INCOME\ FUND,\ INC.\ -\ Form\ N-CSRS}$

2009 Semi-Annual Report

- (

The Fund also utilizes reverse repurchase agreements and credit default swaps to obtain leverage. As of May 31, 2009, the Fund s leverage was 23.5%. Leverage was trimmed during the period by reducing exposure to CMBS credit default swaps and with an intention to use the TALF as longer-term more effective financing for future purchases in ABS or CMBS. In general, the cost of leverage and access to leverage improved over the period.

As of May 31, 2009, the Fund, inclusive of the effect of leverage, was managed with an average net duration of 3.0 years.

Forward-Looking Information

This management discussion contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements that are based on various assumptions (some of which are beyond our control) may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as may, will, believe, expect, anticipate, continue, should, terms or variations on those terms or the negative of those terms. Although we believe that the expectations contained in any forward-looking statement are based on reasonable assumptions, we can give no assurance that our expectations will be attained. We do not undertake, and specifically disclaim any obligation, to publicly release any update or supplement to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

Hyperion Brookfield Asset Management, Inc. 10

OBJECTIVE AND STRATEGY

Helios Total Return Fund, Inc. is a diversified, closed-end fund whose primary objective is to provide high total return, including short and long-term capital gains and a high level of current income. The Fund pursues this objective by investing and actively managing a portfolio consisting primarily of U.S. Treasury, mortgage-backed, asset-backed and high-yield corporate securities. No assurance can be given that the Fund s investment objectives will be achieved.

Effective December 29, 2008, the Fund was renamed Helios Total Return Fund, Inc.

Investment Risks: Investors in any bond fund should anticipate fluctuations in price. Bond prices and the value of bond funds decline as interest rates rise. Bonds with longer-term maturities generally are more vulnerable to interest rate risk than bonds with shorter-term maturities. Below-investment grade bonds involve greater credit risk, which is the risk that the issuer will not make interest or principal payments when due. An economic downturn or period of rising interest rates could adversely affect the ability of issuers, especially issuers of below-investment grade debt, to service primary obligations and an unanticipated default could cause the Fund to experience a reduction in value of its shares. The Fund's investments in mortgage-backed or asset-backed securities that are subordinated to other interests in the same pool may increase credit risk to the extent that the Fund as a holder of those securities may only receive payments after the pool is obligations to other investors have been satisfied. Below-investment grade bonds are also subject to greater price volatility and are less liquid, especially during periods of economic uncertainty or change, than higher-rated debt securities. Leverage creates an opportunity for an increased return to common stockholders, but unless the income and capital appreciation, if any, on securities acquired with leverage proceeds exceed the costs of the leverage, the use of leverage will diminish the investment performance of the Fund is shares. Use of leverage may also increase the likelihood that the net asset value of the Fund and market value of its common shares will be more volatile, and the yield and total return to common stockholders will tend to fluctuate more in response to changes in interest rates and creditworthiness.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

For the six-month period ending May 31, 2009, Helios Total Return Fund, Inc. (the Fund) (NYSE: HTR) had a total return of 16.95%, which assumes the reinvestment of dividends and is exclusive of brokerage commissions. Based on the NYSE closing price of \$4.85 on May 29, 2009, the Fund is shares have a dividend yield of 11.75%. The dividend yield is calculated as the annualized amount of the reporting period is most recent monthly dividend declared divided by the stated stock price.

The Fund s NAV increased 2.67% over the period. This was particularly positive in light of the substantial mark-to-market price decline experienced over 2008, primarily driven by severe fundamental expectations and significant market uncertainty. In 2009, certain securities held by the Fund such as Agency MBS, Treasury securities and high yield corporate securities saw an improvement. In addition, the discount of the Fund s price relative to NAV declined, most likely reflecting the improvement in market sentiment over the period.

FIXED INCOME MARKET ENVIRONMENT

By the close of 2008, a weaker global economy and severe illiquidity came to a head in financial markets and this was most acutely felt by the non-Agency MBS, ABS and CMBS markets. The unprecedented expansion of the U.S. government s balance sheet, the so-called quantitative easing in recent months, has helped to improve market sentiment in 2009. Through the first five months of the calendar year, the U.S. Federal Reserve s buying plan for MBS and Treasury notes managed to keep mortgage rates in a target zone (less than 6%). In addition, government plans for housing, such as the agency refinance program and the loan modification programs, are aimed at curbing foreclosure inventory and increasing affordability for homes (mortgages). Finally, the unwinding of leverage that has caused a precipitous change in the markets is also being addressed through a number of programs designed to add demand for MBS and ABS securities, including TALF (Term Asset-Backed Loan Facility) and PPIP (Public-Private Investment Program).

Combined, these efforts endeavor to establish a bottom in the housing market, which is currently expected in 2010. The programs aim to maintain lower mortgage rates for current borrowers looking to refinance and to modify loans to prevent foreclosure. Both these steps are necessary, however, it is worth noting that neither will create new demand for homes. Therefore, we anticipate the housing market could decline 15% to 20% over the next 15 to 18 months before reaching the low point. This is significant given the breathtaking home price declines already realized. Nationally, by the end of the first quarter of 2009 prices were down 25% compared to the fourth quarter of 2006. In certain regions, home prices were down over 45% for this period.

The key signs of a bottom in housing will include increases in home sales and significant declines in existing home inventories. These conditions require that lenders must be willing to lend and creditworthy borrowers must be inclined to borrow. These conditions will occur when a number of critical drivers are in place. The drivers include asset price stability (both in terms of securities prices and home prices); this stability will allow banks to ascertain their collateral and their financing and should improve willingness and/or the ability to lend. In addition, buyers will return to the market as home price declines slow or stabilize. Another important driver will be an improving employment situation, as major financial investments are unlikely to be made while household incomes remain uncertain.

However, in general, the securitized markets are pricing-in conservative forward expectations for government intervention, housing prices and defaults, in many cases considerably more so than other sectors, such as corporate securities or equities.

PORTFOLIO STRATEGY

As of May 31, 2009, the Fund had a 48.2% allocation to Agency MBS and U.S. Treasury securities. These securities are high-quality, liquid securities backed by the U.S. government and its agencies. The Agency MBS are backed first by the credit of the underlying mortgages and second by the corporate guarantee of the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac). This corporate guarantee was further backed by the U.S. government during 2008, and we remain comfortable with these holdings from a credit perspective. That said, we believe the prices of Agency MBS and U.S. Treasury securities have increased to levels that are not likely sustainable over the longer term. Our opinion regarding values here is based on the absolute level of yields for both agency MBS and U.S. Treasury securities. These prices may remain range-bound while the U.S. government is operating a significant buying program, however the level of prices and of yield spreads is not likely to hold beyond the program. As such, the Fund s exposure to duration was reduced over the past six months, and in addition, we are assessing a measured allocation decrease across Agency MBS and U.S. Treasury securities in order to take advantage of other opportunities, including stronger performing prime MBS securities.

The Fund had a 14.1% allocation to CMBS. The commercial mortgage market weakened substantially over the past four quarters, evidenced by rising incidence of troubled loans and falling asset prices. This resulted in dramatic price declines for CMBS. The price declines have run far in advance of declining fundamentals and therefore we intend to maintain our exposures. In addition, the timing of loan resolutions in CMBS is expected to be protracted, which accrued to the advantage of certain junior classes and benefited the Fund s portfolio.

Approximately 13.2% of the Fund was invested in non-Agency RMBS. This portion of the portfolio does have below-investment grade holdings, which have been severely penalized in terms of both price and liquidity. However, many of our holdings in this sector are from the 2002 to 2005 vintage, which refers to the year in which the loans were originated. These vintages have performed better from a delinquency and prepayment perspective than more recent vintages. As a result, these securities have fewer credit difficulties than securities from either the 2006 or 2007 vintages.

As of May 31, 2009, approximately 61.0% of the Fund s securities were rated investment grade, while only approximately 39.0% of the Fund s securities were rated below-investment grade. Of the below-investment grade securities, approximately half represent the corporate high yield exposure.

The Fund had 14% exposure to high yield corporate securities, a sector we continue to prefer despite the 350 basis point narrowing in spreads during the first quarter of 2009. While defaults are anticipated to continue to rise and will likely exceed typical peak levels of around 10%, we recognize spreads historically lead defaults lower by six to nine months. Meanwhile spreads are already discounting a default rate in the high teens, which is well in excess of historical norms. We are encouraged that signs of life are evident in the credit and equity markets and continue to believe current spreads offer appropriate compensation for the current market risks.

Corporate credit exposure was focused on companies with strong balance sheets, manageable debt maturities and those with a high likelihood of being able to access capital. Industry themes have played a secondary role. This selectivity in determining the Fund s credit exposure resulted in very few holdings in the lowest rated part of the market (CCC and lower). This higher quality positioning benefited the Fund s relative performance over the period as spreads widened to peak levels.

With 48.2% of the portfolio allocated to Agency MBS and U.S. Treasuries, we believe the Fund is well positioned to take advantage of current market dislocations and we continue to look for investment opportunities in the securitized sectors, particularly among highly-rated distressed securities. Despite the overall environment, well-structured securities that are defensive in their expected return profile remain available. We expect these types of opportunistic allocations to continue to add long-term value for stockholders.

The Fund also utilizes reverse repurchase agreements and credit default swaps to obtain leverage. As of May 31, 2009, the Fund s leverage was 19.2%. Over the period the Fund s costs related to leverage and access to leverage improved.

As of May 31, 2009, the Fund, inclusive of the effect of leverage, was managed with an average net duration of 3.0 years.

Forward-Looking Information

This management discussion contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements that are based on various assumptions (some of which are beyond our control) may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as may, will, believe, expect, anticipate, continue, should, terms or variations on those terms or the negative of those terms. Although we believe that the expectations contained in any forward-looking statement are based on reasonable assumptions, we can give no assurance that our expectations will be attained. We do not undertake, and specifically disclaim any obligation, to publicly release any update or supplement to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

2009 Semi-Annual Report 23

Notes to Portfolios of Investments (Unaudited)

May 31, 2009

The following notes should be read in conjunction with the accompanying Portfolios of Investments.

Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may only be resold in transactions exempt from registration, normally to qualified institutional buyers. As of May 31, 2009, the total value of all such investments were as follows:

| Fund | Value | % of Net Assets |
|---|--------------|-----------------|
| Helios Strategic Mortgage Income Fund, Inc. | \$ 9,258,582 | 16.26% |
| Helios Total Return Fund, Inc. | 30,126,832 | 19.49 |

- 2 Variable Rate Security Interest Rate shown is the rate in effect as of May 31, 2009.
- 3 Security is a step up bond where coupon increases or steps up at a predetermined date. Rates shown are current coupon and next coupon rate when security steps up.
- 4 Security is a step up bond where coupon increases or steps up at a predetermined date. At that date the coupon increases to LIBOR plus a predetermined margin.
- 5 Private Placement.
- 6 Security is valued in good faith pursuant to the fair value procedures adopted by the Board of Directors. As of May 31, 2009 the total value of all such securities were:

| Fund | Value | % of Net Assets |
|---|--------------|-----------------|
| Helios Strategic Mortgage Income Fund, Inc. | \$ 2,070,774 | 3.64% |
| Helios Total Return Fund, Inc. | 2,471,089 | 1.60 |

- 7 Zero-Coupon Note Interest rate represents current yield to maturity.
- 8 Portion or entire principal amount delivered as collateral for swap contracts. (Note 8)
- 9 Portion or entire principal amount delivered as collateral for reverse repurchase agreements. (Note 6)
- 10 Represents a class of subordinated mortgage backed securities (First Loss Bonds) that are the first to receive credit losses on the underlying mortgage pools and will continue to receive the credit losses until the subordinated class is paid off.
- 11 Interest rate is based on the notional amount of the underlying mortgage pools.
- 12 Issuer is currently in default on its regularly scheduled interest payment.
- 13 Investment in subprime security. As of May 31, 2009, the total value of all such investments were:

| Fund | Value | % of Net Assets |
|---|---------------|-----------------|
| Helios Strategic Mortgage Income Fund, Inc. | \$ 14,947,177 | 26.25% |
| Helios Total Return Fund, Inc. | 13,871,236 | 8.97 |

Company filed for Chapter 11 bankruptcy protection and has defaulted on regularly scheduled interest payments on subordinated debt. The Fund owns senior debt issued by this Company that continues to receive income payments.

TBA To Be Announced.

See Notes to Financial Statements.

Notes to Financial Statements (Unaudited)

May 31, 2009

1. The Funds

Helios Strategic Mortgage Income Fund, Inc. (the Helios Strategic Mortgage Income Fund) (formerly The Hyperion Brookfield Strategic Mortgage Income Fund, Inc.) and Helios Total Return Fund, Inc. (the Helios Total Return Fund) (formerly The Hyperion Brookfield Total Return Fund, Inc.) (each, a Fund, and collectively, the Funds or the Helios Funds) were each incorporated under the laws of the State of Maryland on May 17, 2002 and May 26, 1989, respectively. Each Fund is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company with its own investment objective.

Hyperion Brookfield Asset Management, Inc. (HBAM or Advisor), a wholly-owned subsidiary of Brookfield Asset Management Inc., is registered as an investment advisor under the Investment Advisors Act of 1940, as amended, and serves as investment advisor to the Funds.

The investment objective of the Helios Strategic Mortgage Income Fund is to provide a high level of current income by investing primarily in mortgage-backed securities. The investment objective of the Helios Total Return Fund is to provide a high total return, including short and long-term capital gains and a high level of current income, through the management of a portfolio of securities. No assurances can be given that each Fund s investment objective will be achieved.

2. Significant Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments: Debt securities, including U. S. government securities, listed corporate bonds, other fixed income and asset-backed securities, and unlisted securities and private placement securities, are generally valued at the latest price furnished by an independent pricing service or a broker-dealer. Short-term debt securities with remaining maturities of sixty days or less are valued at cost with interest accrued or discount accreted to the date of maturity, unless such valuation, in the judgment of the Advisor s Valuation Committee, does not represent market value.

Investments in equity securities listed or traded on any securities exchange or traded in the over-the-counter market are valued at the last quoted price as of the close of business on the valuation date. Equity securities for which no sales were reported for that date are valued at fair value as determined in good faith by the Advisor's Valuation Committee. Investments in open-end registered investment companies, if any, are valued at the net asset value (NAV) as reported by those investment companies.

When price quotations for certain securities are not readily available, or if the available quotations are not believed to be reflective of market value by the Advisor, those securities will be valued at fair value as determined in good faith by the Advisor s Valuation Committee using procedures established by and under the supervision of each Fund s Board of Directors. There can be no assurance that a Fund could purchase or sell a portfolio security at the price used to calculate a Fund s NAV.

Fair valuation procedures may be used to value a substantial portion of the assets of each Fund. A Fund may use the fair value of a security to calculate its NAV when, for example, (1) a portfolio security is not traded in a public market or the principal market in which the security trades is closed, (2) trading in a portfolio security is suspended and not resumed prior to the normal market close, (3) a portfolio security is not traded in significant volume for a substantial period, or (4) the Advisor determines that the quotation or price for a portfolio security provided by a broker-dealer or independent pricing service is inaccurate.

Notes to Financial Statements (Unaudited)

May 31, 2009

The fair value of securities may be difficult to determine and thus judgment plays a greater role in the valuation process. The fair valuation methodology may include or consider the following guidelines, as appropriate: (1) evaluation of all relevant factors, including but not limited to, pricing history, current market level, supply and demand of the respective security; (2) comparison to the values and current pricing of securities that have comparable characteristics; (3) knowledge of historical market information with respect to the security; (4) other factors relevant to the security which would include, but not be limited to, duration, yield, fundamental analytical data, the Treasury yield curve, and credit quality.

The values assigned to fair valued investments are based on available information and do not necessarily represent amounts that might ultimately be realized, since such amounts depend on future developments inherent in long-term investments. Changes in the fair valuation of portfolio securities may be less frequent and of greater magnitude than changes in the price of portfolio securities valued at their last sale price, by an independent pricing service, or based on market quotations. Imprecision in estimating fair value can also impact the amount of unrealized appreciation or depreciation recorded for a particular portfolio security and differences in the assumptions used could result in a different determination of fair value, and those differences could be material.

The Funds have adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). In accordance with FAS 157, fair value is defined as the price that a Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity is own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 quoted prices in markets that are not active or other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including each Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of May 31, 2009 in valuing the Funds investments carried at fair value:

| | Helios Strategic Mortgage Income Fund, Inc. Helios Total Return Fund, Inc. | | | | | |
|-----------------------|--|---------------------------------|---------------------------|---------------------------------|--|--|
| Valuation Inputs | Investments in Securities | Other Financial Instruments* | Investments in Securities | Other Financial Instruments* | | |
| Level 1 Quoted Prices | \$ | \$ | \$ | \$ | | |
| | 39 727 412 | | 116 347 317 | | | |

Level 2 Quoted Prices in Inactive Markets and Other Significant Observable Inputs

| Significant Observable inputs | | | | |
|---|---------------|-----------------|----------------|----------------|
| Level 3 Significant Unobservable Inputs | 34,646,400 | (13,333,780) | 76,660,385 | (6,421,283) |
| | | | | |
| Total | \$ 74.373.812 | \$ (13.333.780) | \$ 193.007.702 | \$ (6.421.283) |

2009 Semi-Annual Report

Notes to Financial Statements (Unaudited)

May 31, 2009

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:

| | | egic Mortgage Fund, Inc. | Helios Total Return Fund, Inc. | | | |
|------------------------------------|---------------------------|---------------------------------|--------------------------------|---------------------------------|--|--|
| | Investments in Securities | Other Financial Instruments* | Investments in Securities | Other Financial Instruments* | | |
| Balance as of December 1, 2008 | \$ 40,564,072 | \$ (23,511,811) | \$ 101,099,500 | \$ (16,338,312) | | |
| Accrued discounts/premiums | 389,601 | | 148,841 | | | |

| Transfers in and/or out of Level 3 | | | (16,587,111) | | | |
| Balance as of May 31, 2009 | \$ 34,646,400 | \$ (13,333,780) | \$ 76,660,385 | \$ (6,421,283) | | |

Investment Transactions and Investment Income: Securities transactions are recorded on the trade date. Realized gains and losses from securities transactions are calculated on the identified cost basis. Interest income is recorded on the accrual basis. Discounts and premiums on securities are accreted and amortized, respectively, using the effective yield to maturity method.

Taxes: Each Fund intends to continue to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its stockholders. Therefore, no federal income or excise tax provision is required. Each Fund may incur an excise tax to the extent they have not distributed all of their taxable income on a calendar year basis.

FASB has issued FASB Interpretation 48 (FIN 48), Accounting for Uncertainty in Income Taxes. FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken in the course of preparing the Funds—tax returns to determine whether the tax positions are more-likely-than-not—of being sustained by the taxing authority. Tax benefits of positions not deemed to meet the more-likely-than-not threshold would be booked as a tax expense in the current year and recognized as: a liability for unrecognized tax benefits; a reduction of an income tax refund receivable; a reduction of deferred tax asset; an increase in deferred tax liability; or a combination therefore. As of May 31, 2009, the Funds have implemented FIN 48 and have determined that there is no impact on their financial statements.

The Funds have reviewed all taxable years that are open for examination (i.e., not barred by the applicable statute of limitations) by taxing authorities of all major jurisdictions, including the Internal Revenue Service. As of May 31, 2009, open taxable years consisted of the taxable years ended November 30, 2005 through November 30, 2008. No examination of any Fund is currently in progress.

Expenses: Expenses directly attributable to a Fund are charged directly to that Fund, while expenses which are attributable to the Funds are allocated among each Fund based upon relative net assets.

^{*} Other financial instruments include futures and swap contracts.

Dividends and Distributions: Each Fund declares and pays dividends monthly from net investment income. Distributions of realized capital gains in excess of capital loss carryforwards are distributed at least annually. Dividends and distributions are recorded on the ex-dividend date. All common shares have equal dividend and other distribution rights. A notice disclosing the source(s) of a distribution will be provided if payment is made from any source other than the net investment income. Any such notice would be provided only for informational purposes in order to comply with the requirements of Section 19(a) of the 1940 Act and not for tax reporting purposes. The tax composition of each Fund s distributions for each calendar year is reported on IRS Form 1099-DIV.

Notes to Financial Statements (Unaudited)

May 31, 2009

Dividends from net investment income and distributions from realized gains from investment transactions have been determined in accordance with Federal income tax regulations and may differ from net investment income and realized gains recorded by each Fund for financial reporting purposes. These differences, which could be temporary or permanent in nature, may result in reclassification of distributions; however, net investment income, net realized gains and losses and net assets are not affected.

Repurchase Agreements: Each Fund may invest in repurchase agreements. A repurchase agreement is an agreement by which the Funds purchase securities from a third party with the commitments that they will be repurchased by the seller at a fixed price on an agreed upon future date. The Funds, through their custodian, receive delivery of the underlying collateral, the market value of which at the time of purchase is required to be in an amount at least equal to the resale price, including accrued interest. The Advisor is responsible for determining that the value of these underlying securities is sufficient at all times. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings commence with respect to the seller of the security, realization of the collateral by the Funds may be delayed or limited. The Funds had no repurchase agreements outstanding as of May 31, 2009.

Options Written or Purchased: The Funds may write or purchase options as a method of hedging potential declines in similar underlying securities. When a Fund writes or purchases an option, an amount equal to the premiums received or paid by the Fund is recorded as a liability or an asset and is subsequently adjusted to the current market value of the option written or purchased. Premiums received or paid from writing or purchasing options which expire unexercised are treated by the Fund on the expiration date as realized gains or losses. The difference between the premium and the amount paid or received on affecting a closing purchase or sale transaction, including brokerage commissions, also is treated as a realized gain or loss. If an option is exercised, the premium paid or received is added to the proceeds from the sale or cost of the purchase in determining whether the Fund has realized a gain or a loss on the investment transaction.

A Fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result bear the market risk of an unfavorable change in the price of the security underlying the written option.

The Funds purchase or write options to hedge against adverse market movements or fluctuations in value caused by changes in interest rates. Each Fund bears the risk in purchasing an option, to the extent of the premium paid, that it will expire without being exercised. If this occurs, the option expires worthless and the premium paid for the option is recognized as a realized loss. The risk associated with writing call options is that a Fund may forego the opportunity for a profit if the market value of the underlying position increases and the option is exercised. A Fund will only write call options on positions held in its portfolio. The risk in writing a put option is that the Fund may incur a loss if the market value of the underlying position decreases and the option is exercised. In addition, each Fund bears the risk of not being able to enter into a closing transaction for written options as a result of an illiquid market.

When-Issued Purchases and Forward Commitments: The Funds may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis in order to hedge against anticipated changes in interest rates and prices and secure a favorable rate of return. When such transactions are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date, which can be a month or more after the date of the transaction. At the time the Funds make the commitment to purchase securities on a when-issued or forward commitment basis, they will record the transactions and thereafter reflect the values of such securities in determining its net asset value. At the time the Funds enter into a transaction on a when-issued or forward commitment basis, the Advisor will identify collateral consisting of cash or liquid securities equal to the value of the when-issued or forward commitment securities and will monitor the adequacy of such collateral on a daily basis. On the delivery date, the Funds will meet their obligations from securities that are then maturing or sales of the securities identified as collateral by the Advisor and/or from then available cash flow. When-issued securities

2009 Semi-Annual Report

Notes to Financial Statements (Unaudited)

May 31, 2009

and forward commitments may be sold prior to the settlement date. If the Funds dispose of the right to acquire a when-issued security prior to its acquisition or disposes of the right to deliver or receive against a forward commitment, they can incur a gain or loss due to market fluctuation. There is always a risk that the securities may not be delivered and that the Funds may incur a loss. Settlements in the ordinary course are not treated by the Funds as when-issued or forward commitment transactions and, accordingly, are not subject to the foregoing limitations even though some of the risks described above may be present in such transactions.

Cash Flow Information: Each Fund invests in securities and distributes dividends and distributions which are paid in cash or are reinvested at the discretion of stockholders. These activities are reported in the Statement of Changes in Net Assets. Additional information on cash receipts and cash payments is presented in the Statement of Cash Flows. Cash, as used in the Statement of Cash Flows, is the amount reported as Cash in the Statement of Assets and Liabilities, and does not include short-term investments.

Accounting practices that do not affect reporting activities on a cash basis include carrying investments at value and accreting discounts and amortizing premiums on debt obligations.

Short Sales: The Funds may make short sales of securities as a method of hedging potential declines in similar securities owned. The Funds may have to pay a fee to borrow the particular securities and may be obligated to pay to the lender an amount equal to any payments received on such borrowed securities. A gain, limited to the amount at which a Fund sold the security short, or a loss, unlimited as to dollar amount, will be realized upon the termination of a short sale if the market price is less or greater than the proceeds originally received.

Financial Futures Contracts: A futures contract is an agreement between two parties to buy and sell a financial instrument for a set price on a future date. Initial margin deposits are made upon entering into futures contracts and can be either cash or securities. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by marking-to-market on a daily basis to reflect the market value of the contract at the end of each day s trading. Variation margin payments are made or received, depending upon whether unrealized gains or losses are incurred. When the contract is closed, a Fund records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund s basis in the contract.

Each Fund invests in financial futures contracts to hedge against fluctuations in the value of portfolio securities caused by changes in prevailing market interest rates. Should interest rates move unexpectedly, a Fund may not achieve the anticipated benefits of the financial futures contracts and may realize a loss. The use of futures transactions involves the risk of imperfect correlation in movements in the price of futures contracts, interest rates and the underlying hedged assets. A Fund is at risk that it may not be able to close out a transaction because of an illiquid market.

Swap agreements: Each Fund may enter into swap agreements to manage its exposure to various risks. An interest rate swap agreement involves the exchange by a Fund with another party of their respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments with respect to a notional amount of principal. A total rate of return swap agreement is a derivative contract in which one party (the receiver) receives the total return of a specific index on a notional amount of principal from a second party (the seller) in return for paying a funding cost, which is usually quoted in relation to the London Inter-Bank Offered Rate (LIBOR). During the life of the agreement, there are periodic exchanges of cash flows in which the index receiver pays the LIBOR based interest on the notional principal amount and receives (or pays if the total return is negative or spreads widen) the index total return on the notional principal amount. A credit default swap is an agreement between a protection buyer and a protection seller whereby the buyer agrees to periodically pay the seller a premium, generally expressed in terms of interest on a notional principal amount, over a specified period in exchange for receiving compensation from the seller when an underlying reference debt obligation or index of reference debt obligations is subject to one or more specified adverse credit events (such as bankruptcy, failure to pay, acceleration of indebtedness, restructuring, or repudiation/moratorium). The Funds will

Notes to Financial Statements (Unaudited)

May 31, 2009

become protections sellers to take on credit risk in order to earn a premium. Each Fund will usually enter into swaps on a net basis, *i.e.*, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Swaps are marked to market based upon quotations from market makers and the change, if any, along with an accrual for periodic payments due or owed is recorded as unrealized gain or loss in the Statement of Operations. Net payments on swap agreements are included as part of realized gain/loss in the Statement of Operations. Entering into these agreements involves, to varying degrees, elements of credit and market risk in excess of the amounts recognized in the Statement of Assets and Liabilities. Such risks include the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform, that there may be unfavorable changes in the fluctuation of interest rates or the occurrence of adverse credit events on reference debt obligations. See Note 8 for a summary of all open swap agreements as of May 31, 2009.

3. Risks of investing in Asset-Backed Securities and Below-Investment Grade Securities

The value of asset-backed securities may be affected by, among other factors, changes in: interest rates, the market s assessment of the quality of underlying assets, the creditworthiness of the servicer for the underlying assets, information concerning the originator of the underlying assets, or the creditworthiness or rating of the entities that provide any supporting letters of credit, surety bonds, derivative instruments or other credit enhancement. The value of asset-backed securities also will be affected by the exhaustion, termination or expiration of any credit enhancement.

The Funds have investments in below-investment grade debt securities, including mortgage-backed and asset-backed securities. Below-investment grade securities involve a higher degree of credit risk than investment grade debt securities. In the event of an unanticipated default, a Fund would experience a reduction in its income, a decline in the market value of the securities so affected and a decline in the NAV of its shares. During an economic downturn or period of rising interest rates, highly leveraged and other below-investment grade issuers frequently experience financial stress that could adversely affect their ability to service principal and interest payment obligations, to meet projected business goals and to obtain additional financing. The market prices of below-investment grade debt securities are generally less sensitive to interest rate changes than higher-rated investments but are more sensitive to adverse economic or political changes or individual developments specific to the issuer than higher-rated investments. Periods of economic or political uncertainty and change can be expected to result in significant volatility of prices for these securities. Rating services consider these securities to be speculative in nature.

Below-investment grade securities may be subject to market conditions, events of default or other circumstances which cause them to be considered distressed securities. Distressed securities frequently do not produce income while they are outstanding. The Funds may be required to bear certain extraordinary expenses in order to protect and recover their investments in certain distressed securities. Therefore, to the extent the Funds seek capital growth through investment in such securities, the Funds ability to achieve current income for their stockholders may be diminished. The Funds are also subject to significant uncertainty as to when and in what manner and for what value the obligations evidenced by distressed securities will eventually be satisfied (e.g., through a liquidation of the obligor s assets, an exchange offer or plan of reorganization involving the securities or a payment of some amount in satisfaction of the obligation). In addition, even if an exchange offer is made or a plan of reorganization is adopted with respect to distressed securities held by the Funds, there can be no assurance that the securities or other assets received by the Funds in connection with such exchange offer or plan of reorganization will not have a lower value or income potential than may have been anticipated when the investment was made. Moreover, any securities received by the Funds upon completion of an exchange offer or plan of reorganization may be restricted as to resale. As a result of the Funds participation in negotiations with respect to any exchange offer or plan of reorganization with respect to an issuer of such securities, the Funds may be restricted from disposing of distressed securities.

4. Investment Advisory Agreements and Affiliated Transactions

Each Fund entered into separate Investment Advisory Agreements (the Advisory Agreements) with the Advisor under which the Advisor is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of each Fund. The Advisory Agreements provide that each Fund shall pay the Advisor a monthly fee at an annual rate of 0.65% of each Fund's average weekly net assets. During the six months ended May 31, 2009, the Advisor earned \$190,068 and \$495,972 in investment advisory fees from Helios Strategic Mortgage Income Fund and Helios Total Return Fund, respectively.

Each Fund entered into separate Administration Agreements with the Advisor. The Advisor entered into a sub-administration agreement with State Street Bank and Trust Company (the Sub-Administrator). The Advisor and Sub-Administrator perform administrative services necessary for the operation of the Funds, including maintaining certain books and records of the Funds and preparing reports and other documents required by

Notes to Financial Statements (Unaudited)

May 31, 2009

federal, state, and other applicable laws and regulations, and providing the Funds with administrative office facilities. For these services, each Fund shall pay to the Advisor a monthly fee at an annual rate of 0.20% of each Fund s average weekly net assets. During the six months ended May 31, 2009, the Advisor earned \$58,482 in administration fees from Helios Strategic Mortgage Income Fund and \$152,607 in administration fees from Helios Total Return Fund. The Advisor is responsible for any fees due the Sub-Administrator, except for NQ filing fees.

The Administration fees shown in the Statement of Operations includes expenses incurred for the N-Q filings, which amounted to \$3,990 and \$3,995 for Helios Strategic Mortgage Income Fund and Helios Total Return Fund, respectively.

Certain officers and/or directors of each Fund are officers and/or directors of the Advisor.

5. Purchases and Sales of Investments

Purchases and sales of investments, excluding short-term securities, short sales and reverse repurchase agreements, for the six months ended May 31, 2009, were as follows:

| | Long-Term | n Securities | U.S. Government Securities | | |
|---|--------------|---------------|----------------------------|--------------|--|
| | Purchases | Sales | Purchases | Sales | |
| Helios Strategic Mortgage Income Fund, Inc. | \$ 3,319,533 | \$ 12,629,705 | \$ 7,630,469 | \$12,914,824 | |
| Helios Total Return Fund, Inc. | 10,318,403 | 26,613,820 | 15,260,938 | 15,817,052 | |

For purposes of this footnote, U.S. Government securities may include securities issued by the U.S. Treasury, Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

6. Borrowings

Each Fund may enter into reverse repurchase agreements with the same parties with whom they may enter into repurchase agreements. Under a reverse repurchase agreement, a Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. Under the 1940 Act, reverse repurchase agreements will be regarded as a form of borrowing by the Funds unless, at the time they enter into a reverse repurchase agreement, they establish and maintain a segregated account with their custodian containing securities from its portfolio having a value not less than the repurchase price (including accrued interest). Each Fund has established and maintained such accounts for each of its reverse repurchase agreements.

Reverse repurchase agreements involve the risk that the market value of the securities retained in lieu of sale by a Fund may decline below the price of the securities the Fund has sold but is obligated to repurchase. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, such buyer or its trustee or receiver may receive an extension of time to determine whether to enforce the Fund s obligation to repurchase the securities, and the Fund s use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

At May 31, 2009, the Funds had the following reverse repurchase agreements outstanding:

Helios Strategic Mortgage Income Fund, Inc.
Description

| | | Maturity Amount |
|-------------|--|--------------------|
| \$4,325,925 | Goldman Sachs, 0.25%, dated 05/27/09, maturity date 06/02/09 | \$ 4,326,105 |
| | | |
| | Maturity Amount, Including Interest Payable | \$ 4,326,105 |
| | Market Value of Assets Sold Under Agreements | \$ 4,369,064 |
| | Weighted Average Interest Rate | 0.25% |

2009 Semi-Annual Report 39

Notes to Financial Statements (Unaudited)

May 31, 2009

Helios Total Return Fund, Inc.

| Face Value | Description | Maturity Amount |
|--------------|--|--------------------|
| \$ 6,056,295 | Goldman Sachs, 0.25%, dated 05/27/09, maturity date 06/02/09 | \$ 6,056,548 |
| 12,305,000 | Goldman Sachs, 0.45%, dated 05/20/09, maturity date 07/20/09 | 12,314,383 |
| 11,795,000 | Credit Suisse, 0.49%, dated 05/27/09, maturity date 07/27/09 | 11,804,793 |
| \$30,156,295 | Maturity Amount, Including Interest Payable | \$ 30,175,724 |
| | Market Value of Assets Sold Under Agreements | \$ 32,033,561 |
| | Weighted Average Interest Rate | 0.43% |

The average daily balances of reverse repurchase agreements outstanding during the six months ended May 31, 2009, was approximately \$2,530,223 at a weighted average interest rate of 0.46% for Helios Strategic Mortgage Income Fund and approximately \$36,790,072 at a weighted average interest rate of 0.93% for Helios Total Return Fund. The maximum amounts of reverse repurchase agreements outstanding at any time during the period was \$10,656,656, which was 14.72% of total assets for Helios Strategic Mortgage Income Fund, and \$46,592,940, which was 23.40% of total assets for Helios Total Return Fund.

7. Capital Stock

Each Fund has 50 million shares of \$0.01 par value common stock authorized. Of the 10,145,270 shares outstanding at May 31, 2009 for Helios Strategic Mortgage Income Fund, the Advisor owned 7,018 shares. Of the 30,898,937 shares outstanding at May 31, 2009 for Helios Total Return Fund, the Advisor owned 11,112 shares.

Each Fund is continuing their stock repurchase program, whereby an amount of up to 15% of the original outstanding common stock of each Fund, or approximately 1.5 million of Helios Strategic Mortgage Income Fund s shares and approximately 3.7 million of Helios Total Return Fund s shares, are authorized for repurchase. The purchase prices may not exceed the then-current net asset values.

For the six months ended May 31, 2009 and fiscal year ended November 30, 2008, no shares were repurchased for either Fund. For the fiscal year ended November 30, 2007, Helios Strategic Mortgage Income Fund repurchased 10,000 shares at a cost of \$97,478 and at an average discount of 16.11% from its net asset value. All shares repurchased have been retired. For the fiscal year ended November 30, 2007, Helios Total Return Fund repurchased 30,000 shares at a cost of \$204,400 and at an average discount of 14.82% from its net asset value. All shares repurchased have been retired. Since inception of the stock repurchase program for Helios Total Return Fund, 2,119,740 shares have been repurchased pursuant to this program at a cost of \$18,809,905 and at an average discount of 13.20% from its net asset value.

8. Financial Instruments

Each Fund regularly trades in financial instruments with off-balance sheet risk in the normal course of its investing activities to assist in managing exposure to various market risks. These financial instruments include written options, futures contracts and swap agreements and may involve, to a varying degree, elements of risk in excess of the amounts recognized for financial statement purposes. The notional or contractual amounts of these instruments represent the investment a Fund has in particular classes of financial instruments and does not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are considered. During the six months ended May 31, 2009, each Fund had segregated sufficient cash and/or securities to cover any commitments under these contracts.

There was no written option activity for the six months ended May 31, 2009 for either Fund. Also, as of May 31, 2009, there were no futures contracts outstanding for either Fund.

Notes to Financial Statements (Unaudited)

May 31, 2009

As of May 31, 2009, the following swap agreements for Helios Strategic Mortgage Income Fund were outstanding:

Credit Default Swaps Sell Protection

| Notional Amount (1) | Expiration Date | Description | Net Unrealized Appreciation/ (Depreciation) (2) |
|---------------------|--------------------|---|---|
| \$5,000,000 | 02/11/44 | Agreement with JPMorgan Chase & Co. | 5,000,000 | 11/12/49 | Agreement with JPMorgan Chase & Co. (formerly Bear, Stearns & Co.), dated 06/01/07, to receive monthly the notional amount multiplied by 2.35% and to pay only in the event of a write down, or failure to pay a principal payment or an interest shortfall on MSC 2007-T25 H. | (4,394,585) |

(13,333,780)

As of May 31, 2009, the following swap agreements for Helios Total Return Fund were outstanding:

Credit Default Swaps Sell Protection

| Notional Amount (1) | Expiration Date | Description | Net Unrealized Appreciation (Depreciation) (2) |
|---------------------|--------------------|---|--|
| \$2,500,000 | 09/11/42 | Agreement with JPMorgan Chase & Co. (formerly Bear, Stearns & Co.), dated 11/02/05, to receive monthly the notional amount multiplied by 2.10% and pay in the event of a write down, failure to pay a principal payment or an interest shortfall on BSCMS 2005-PWR9K. | \$ (2,169,906) |
| 5,000,000 | 02/15/39 | Agreement with Royal Bank of Scotland, dated 08/11/06, to receive monthly the notional amount multiplied by 1.08% and pay in the event of a write down, failure to pay a principal payment or an interest shortfall on CSMC 2006 C1K. | (4,251,377) |

\$ (6,421,283)

- (1) The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of the particular swap agreement.
- (2) Net unrealized depreciation when netted with upfront cash premiums paid represents the current fair value of credit derivatives and serves as an indicator of the current status of the payment/performance risk and represents the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entities credit soundness and a greater likelihood of risk of default or other credit event occurring as defined under the terms of the agreement.

9. Federal Income Tax Information

Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States of America.

The tax character of distributions for the period ended May 31, 2009, will be determined at the end of each Fund s current fiscal year.

2009 Semi-Annual Report

41

Notes to Financial Statements (Unaudited)

May 31, 2009

During the fiscal year ended November 30, 2008, (i) the tax character of the \$10,413,647 of distributions paid was \$9,639,486 from ordinary income and \$774,161 from return of capital for Helios Strategic Mortgage Income Fund; and, (ii) the tax character of the \$22,462,870 of distributions paid was from ordinary income for Helios Total Return Fund.

At November 30, 2008, the components of net assets (excluding paid-in-capital) on a tax basis were as follows:

| | Helios Strategic Mortgage Income Fund, Inc. | Hel | lios Total Return Fund, Inc. |
|---|---|-----|---------------------------------|
| Undistributed ordinary income | \$ | \$ | 1,020,420 |
| Capital loss carryforward (1) | (8,765,400) | | (27,355,613) |
| Book basis unrealized depreciation | (74,221,731) | | (117,299,890) |
| Plus: Cumulative timing differences | (68,566) | | (213,856) |
| Tax basis unrealized depreciation on investments and swap contracts | (74,290,297) | | (117,513,746) |
| Total tax basis net accumulated losses | \$ (83,055,697) | \$ | (143,848,939) |

⁽¹⁾ To the extent that future capital gains are offset by capital loss carryforwards, such gains will not be distributed. Such capital loss carryforwards will expire as follows:

| Expiring In: | Helios Strategic Mortgage | | | |
|--------------|---------------------------|-------------|--------------------------------|--|
| | Income Fund, Inc. | Helios Tota | Helios Total Return Fund, Inc. | |
| 2009 | \$ | \$ | 8,349,330 | |
| 2010 | | | 3,566,846 | |
| 2011 | 1,070,268 | | | |
| 2013 | 1,251,786 | | 2,216,675 | |
| 2014 | 767,748 | | 1,719,287 | |
| 2015 | 928,622 | | 3,792,571 | |
| 2016 | 4,746,976 | | 7,710,904 | |
| | | | | |

Federal Income Tax Basis: The federal income tax basis of each Fund s investments at May 31, 2009 was as follows:

| Fund | Cost of Investments | ss Unrealized ppreciation | _ | oss Unrealized Depreciation | Net Unrealized Depreciation |
|--|------------------------|-------------------------------|----|--------------------------------|-----------------------------------|
| Helios Strategic Mortgage Income Fund, Inc. | \$ 124,126,791 | \$ 2,228,310 | \$ | (51,981,289) | \$ (49,752,979) |
| Helios Total Return Fund, Inc. 10. Contractual Obligations | 285,710,012 | 3,728,003 | | (96,430,313) | (92,702,310) |

Each Fund enters into contracts that contain a variety of indemnification. Each Fund s maximum exposure under these arrangements is unknown. However, each Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

5.6%

Notes to Financial Statements (Unaudited)

May 31, 2009

12. New Accounting Pronouncements

In September 2008, FASB also issued FASB Staff Position No. FAS 133-1 and FIN 45-4, Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and clarification of the effective date of FASB Statement No. 161. The guidance amends FASB Statement No. 133 (FAS 133), Accounting for Derivative Instruments and Hedging Activities, and also amends FASB Interpretation No. 45 (FIN 45), Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The amendments to FAS 133 include required disclosure for (i) the nature and terms of the credit derivative, reasons for entering into the credit derivative, the events or circumstances that would require the seller to perform under the credit derivative, and the current status of the payment/performance risk of the credit derivative, (ii) the maximum potential amount of future payments (undiscounted) the seller could be required to make under the credit derivative, (iii) the fair value of the credit derivative, and (iv) the nature of any recourse provisions and assets held either as collateral or by third parties. The amendments to FIN 45 require additional disclosures about the current status of the payment/performance risk of a guarantee. All changes to accounting policies have been made in accordance with the position and incorporated for the current period as part of the notes to financial statements.

In April 2009, FASB issued FASB Staff Position No. 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (FSP 157-4 or the Position). FSP 157-4 provides additional guidance for estimating fair value when the volume and level of activity has significantly decreased in relation to normal market activity for the asset or liability. The Position also provides additional guidance on circumstances that may indicate that a transaction is not orderly and requires additional disclosures in annual and interim reporting periods. FSP 157-4 is effective for fiscal periods and interim periods ending after June 15, 2009. The Advisor is currently evaluating the impact the adoption of FSP 157-4 will have on each Fund s financial statements and disclosures.

13. Subsequent Events

Dividend: Each Fund s Board of Directors declared the following regular monthly dividends:

| | Dividend Per Share | Record Date | Payable Date |
|---|-------------------------------|-----------------------|------------------------|
| Helios Strategic Mortgage Income Fund, Inc. | \$ 0.0725 | 06/17/09 | 06/25/09 |
| Helios Total Return Fund, Inc. | \$ 0.0475 Dividend Per Share | 06/17/09 Record Date | 06/25/09 Payable Date |
| Helios Strategic Mortgage Income Fund, Inc. | \$ 0.0725 | 07/22/09 | 07/30/09 |
| Helios Total Return Fund, Inc. | \$ 0.0475 | 07/22/09 | 07/30/09 |

Compliance Certifications (Unaudited)

May 31, 2009

On April 27, 2009, the Funds submitted a CEO annual certification to the New York Stock Exchange (NYSE) on which the Funds principal executive officer certified that he was not aware, as of that date, of any violation by the Funds of the NYSE s Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Funds principal executive and principal financial officers have made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q relating to, among other things, the Funds disclosure controls and procedures and internal control over financial reporting, as applicable.

Board Considerations Relating to the Investment Advisory Agreements (Unaudited)

May 31, 2009

At a meeting held on March 26, 2009, the Boards of Directors of Helios Total Return Fund, Inc. and Helios Strategic Mortgage Income Fund, Inc. (each, a Fund and collectively, the Funds), including a majority of the Disinterested Directors of each Fund, approved the continuation of the investment advisory agreements (the Advisory Agreements) between Hyperion Brookfield Asset Management, Inc. (the Advisor), on the one hand, and each Fund separately, on the other hand. In approving the Advisory Agreements, the Boards, including a majority of the Disinterested Directors of each Fund, determined that the fee structure of each Fund was fair and reasonable and that approval of the Advisory Agreement was in the best interests of such Fund and its stockholders. The Boards considered a wide range of information, including the information received from the Advisor on a quarterly basis. While attention was given to all information furnished, the following discusses the primary factors relevant to each Board's decision.

NATURE, EXTENT AND QUALITY OF SERVICES. The Boards considered the level and depth of knowledge of the Advisor. In evaluating the quality of services provided by the Advisor, the Boards took into account their familiarity with the Advisor s management through board meetings, conversations and reports. The Boards noted that the Advisor is responsible for managing the Funds investment programs, their general operations and the day-to-day management of each Fund and compliance with applicable laws, regulations, policies and procedures. The Boards concluded that the nature, extent and quality of the overall services provided by the Advisor and its affiliates are satisfactory. The Boards conclusion was based, in part, upon services provided to each Fund such as quarterly reports provided by the Advisor: 1) comparing the performance of the Funds with a peer group, 2) showing that the investment policies and restrictions for the Funds were followed, and 3) covering matters such as the compliance of investment personnel and other access persons with the Advisor s and the Funds codes of ethics, the adherence to fair value pricing procedures established by the Boards, the monitoring of portfolio compliance and presentations regarding the economic environment. The Boards also considered the experience of the Advisor as an investment advisor and the experience of the team of portfolio managers that manage the Funds, and its current experience in acting as an investment advisor to other investment funds and institutional clients.

INVESTMENT PERFORMANCE. The Boards placed significant emphasis on the investment performance of the Funds in view of its importance to stockholders. While consideration was given to performance reports and discussions at Board meetings throughout the year, particular attention in assessing the performance was given to a presentation that compared the Funds performance with nine similar funds for the 1, 3 and 5 year periods and the year-to-date period as of February 28, 2009. The Boards noted that while the Funds were generally outperformed by the other funds for all periods, based on the Advisor's explanation of the current market and the steps taken to improve performance, the Boards concluded that the Funds performance was adequate.

PROFITABILITY. The Boards also considered the level of profits expected to be realized by the Advisor and its affiliates in connection with the operation of the Funds. In this regard, the Boards reviewed the Funds profitability analysis addressing the overall profitability of the Advisor for its management of the Helios Funds, as well as its expected profits and that of its affiliates for providing administrative support for the Funds. The Boards further noted that the methodology followed in allocating costs to the Funds appeared reasonable, while also recognizing that allocation methodologies are inherently subjective. The Boards concluded that the expected profitability to the Advisor from the Funds was reasonable.

MANAGEMENT FEE AND TOTAL EXPENSES. The Boards also placed significant emphasis on the review of Fund expenses. The Boards compared the advisory fees and total expense ratio of the Funds with various comparative data with which they had been provided. The Boards noted that the Funds total advisory and administrative fees were slightly higher than the median and that the Funds total expenses were at the median of the Funds peer group. The Boards further noted that the fees and expenses payable by the Funds were comparable to those payable by other client accounts managed by the Advisor and concluded that the Funds management fees and total expenses were reasonable.

2009 Semi-Annual Report

HELIOS FUNDS

Board Considerations Relating to the Investment Advisory Agreements (Unaudited)

May 31, 2009

ECONOMIES OF SCALE. The Boards considered the potential economies of scale that may be realized if the assets of the Funds grow. The Boards noted that stockholders might benefit from lower operating expenses as a result of an increasing amount of assets being spread over the fixed expenses of the Funds, but noted that, as closed-end funds, the Funds were unlikely to grow significantly.

In considering the approval of the Advisory Agreements, each of the Funds Boards, including the Disinterested Directors, did not identify any single factor as controlling. Based on the Boards evaluation of all factors that they deemed to be relevant, the Boards, including the Disinterested Directors, concluded that the Advisor has demonstrated that it possesses the capability and resources necessary to perform the duties required of it under the Advisory Agreements; performance of each of the Funds is adequate in light of the current market and in relation to the performance of funds with similar investment objectives; and the proposed Advisory fees are fair and reasonable, given the nature, extent and quality of the services to be rendered by the Advisor. After carefully reviewing all of these factors, the Boards, including the Disinterested Directors, unanimously approved the continuation of each Fund's Advisory Agreement.

Information Concerning Directors and Officers (Unaudited)

^{***} Josielyne K. Pacifico served as the Funds CCO until March 2009. Lily Y. Tjioe served as the Funds Interim CCO from March 2009 to May 2009.

Dividend Reinvestment Plan

A Dividend Reinvestment Plan (the Plan) is available to stockholders of the Funds pursuant to which they may elect to have all distributions of dividends and capital gains automatically reinvested by American Stock Transfer & Trust Company (the Plan Agent) in additional Fund shares. Stockholders who do not participate in the Plan will receive all distributions in cash paid by check mailed directly to the stockholder of record (or if the shares are held in street or other nominee name, then to the nominee) by the Funds Custodian, as Dividend Disbursing Agent.

The Plan Agent serves as agent for the stockholders in administering the Plan. After the Funds declares a dividend or determines to make a capital gain distribution, payable in cash, if (1) the market price is lower than the net asset value, the participants in the Plan will receive the equivalent in Fund shares valued at the market price determined as of the time of purchase (generally, the payment date of the dividend or distribution); or if (2) the market price of the shares on the payment date of the dividend or distribution is equal to or exceeds their net asset value, participants will be issued Fund shares at the higher of net asset value or 95% of the market price. This discount reflects savings in underwriting and other costs that the Funds otherwise will be required to incur to raise additional capital. If the net asset value exceeds the market price of the Fund shares on the payment date or the Fund declares a dividend or other distribution payable only in cash (*i.e.*, if the Board of Directors precludes reinvestment in Fund shares for that purpose), the Plan Agent will, as agent for the participants, receive the cash payment and use it to buy Fund shares in the open market, on the New York Stock Exchange or elsewhere, for the participants accounts. If, before the Plan Agent has completed its purchases, the market price exceeds the net asset value of the Funds shares, the average per share purchase price paid by the Plan Agent may exceed the net asset value of the Funds shares, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Funds. The Funds will not issue shares under the Plan below net asset value.

Participants in the Plan may withdraw from the Plan upon written notice to the Plan Agent. When a participant withdraws from the Plan or upon termination of the Plan by the Funds, certificates for whole shares credited to his or her account under the Plan will be issued and a cash payment will be made for any fraction of a share credited to such account.

There is no charge to participants for reinvesting dividends or capital gain distributions, except for certain brokerage commissions, as described below. The Plan Agent s fees for handling the reinvestment of dividends and distributions are paid by the Funds. There are no brokerage commissions charged with respect to shares issued directly by the Funds. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open market purchases in connection with the reinvestment of dividends and distributions.

The automatic reinvestment of dividends and distributions will not relieve participants of any federal income tax that may be payable on such dividends or distributions.

A brochure describing the Plan is available from the Plan Agent, by calling 1-212-936-5100.

If you wish to participate in the Plan and your shares are held in your name, you may simply complete and mail the enrollment form in the brochure. If your shares are held in the name of your brokerage firm, bank or other nominee, you should ask them whether or how you can participate in the Plan. Stockholders whose shares are held in the name of a brokerage firm, bank or other nominee and are participating in the Plan may not be able to continue participating in the Plan if they transfer their shares to a different brokerage firm, bank or other nominee, since such stockholders may participate only if permitted by the brokerage firm, bank or other nominee to which their shares are transferred.
