Forward Looking Statements

This report contains forward-looking statements that relate to future transactions, events or expectations. In addition, RGC Resources, Inc. (Resources or the Company) may publish forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. These statements are based on management's current expectations and information available at the time of such statements and are believed to be reasonable and are made in good faith. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company's forward-looking statements. The risks and uncertainties that may affect the operations, performance, development and results of the Company's business include, but are not limited to, the following: (i) failure to earn on a consistent basis an adequate return on invested capital; (ii) ability to retain and attract professional and technical employees; (iii) the potential loss of large-volume industrial customers to alternate fuels, facility closings or production changes; (iv) volatility in the price and availability of natural gas; (v) uncertainty in the demand for natural gas in the Company's service area; (vi) general economic conditions both locally and nationally; (vii) increases in interest rates; (viii) increased customer delinquencies and conservation efforts resulting from high fuel costs, difficult economic conditions and/or colder weather; (ix) variations in winter heating degree-days from the 30-year average on which the Company's billing rates are set; (x) impact of potential climate change legislation regarding limitations on carbon dioxide emissions; (xi) impact of potential increased regulatory oversight and compliance requirements due to financial, environmental, safety and system integrity laws and regulations; (xii) failure to obtain timely rate relief from regulatory authorities for increasing operating or gas costs; (xiii) capital market conditions and the availability of debt and equity financing to support capital expenditures; (xiv) impact of terrorism; (xv) volatility in actuarially determined benefit costs and plan asset performance; (xvi) effect of natural disasters on production and distribution facilities and the related effect on supply availability and price; and (xvii) changes in accounting regulations and practices, which could change the accounting treatment for certain transactions. All of these factors are difficult to predict and many are beyond the Company's control. Accordingly, while the Company believes its forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. When used in the Company's documents or news releases, the words, anticipate, believe, intend, plan, estimate, expect, objective, projection, forecast, , budget, assume, indicate or similar conditional verbs such as will, would, should, can, could or may are intended to identify forward-looking statements.

Forward-looking statements reflect the Company's current expectations only as of the date they are made. The Company assumes no duty to update these statements should expectations change or actual results differ from current expectations except as required by applicable laws and regulations.

PART I

Item 1. Business.
General and Historical Development

Resources was incorporated in the state of Virginia on July 31, 1998, for the primary purpose of becoming the holding company for Roanoke Gas Company (Roanoke Gas) and its subsidiaries. Effective July 1, 1999, Roanoke Gas and its subsidiaries were reorganized into the holding company structure. Resources is currently comprised of the following subsidiaries: Roanoke Gas, Diversified Energy Company and RGC Ventures of Virginia, Inc.

Roanoke Gas was organized as a public service corporation under the laws of the Commonwealth of Virginia in 1912. The principal service of Roanoke Gas is the distribution and sale of natural gas to residential, commercial and industrial customers within its service areas in Roanoke, Virginia and the surrounding areas. Roanoke Gas also provides certain non-regulated services which accounts for most of the non-gas utility revenue of Resources. Roanoke Gas regulated operations provided more than 98% of the total revenues of Resources for the year ended September 30, 2009.

Effective as of October 31, 2007, Resources closed on the sale of the stock of Bluefield Gas Company to ANGD, LLC, and Roanoke Gas completed the sale of its natural gas distribution assets located in the Town of Bluefield and the County of Tazewell, Virginia to Appalachian Natural Gas Company, a subsidiary of ANGD, LLC.

In January 1979, the Company formed Diversified Energy Company, which contained the propane operations and energy marketing operations. The propane operations were sold in July 2004 and the energy marketing operations were sold in August 2006. Diversified currently has no active operations.

On October 11, 2000, the information technology department of Resources formed Application Resources, Inc. under RGC Ventures of Virginia, Inc. to provide information technology consulting services. Application Resources provides less than 1% of the other revenues of Resources.

Services

Roanoke Gas maintains an integrated natural gas distribution system. Natural gas is purchased from suppliers and distributed to residential, commercial and large industrial users through underground mains and service lines. For fiscal 2009, 91.0% of the Company's 56,119 natural gas customers were residential users accounting for 42% of total sales volumes and 58% of gross revenue, 8.9% were commercial users accounting for 30% of total sales volumes and 36% of gross revenues, and 0.1% were large industrial and transportation customers accounting for 28% of total sales volumes and only 4% of gross revenues. Transportation customers are those natural gas users that purchase their natural gas requirements directly from a supplier other than the Company and utilize Roanoke Gas natural gas distribution system for delivery to their operations.

Roanoke Gas natural gas distribution business accounted for approximately 98% and 99% of Resources total revenues from continuing operations for fiscal years 2009 and 2008, respectively. The Company's revenues are affected by changes in gas costs as well as by changes in consumption volume due to weather and economic conditions and changes in the non gas portion of customer billing rates. Increases or decreases in the cost of natural gas are passed on to customers through the purchased gas adjustment mechanism. Significant increases in gas costs may cause customers to conserve, or in the case of industrial customers, to use alternative energy sources.

The Company's retail sales are seasonal and temperature-sensitive as the majority of the gas sold by Resources is used for heating. The industry standard for the unit of measure for natural gas is a decatherm (DTH), which is the heat equivalent of one million BTU where one BTU is equal to the amount of heat required to raise the temperature of one pound of liquid water by one degree Fahrenheit. For the fiscal year ended September 30, 2009, approximately 67% of the Company's total DTH of natural gas sales were made in the five-month period of November through March. Total natural gas deliveries from continuing operations were 9.3 million DTH in fiscal years 2009 and 2008. Total delivered natural gas volumes were nearly unchanged from last year; however, the more weather sensitive residential and commercial deliveries increased by 6% due to colder weather, while the less weather sensitive transportation and industrial volumes declined by 12% primarily related to the depressed economic environment. The Company's actual heating degree days in fiscal 2009 were approximately 96% percent of the 30-year normal, as compared with approximately 88% of the 30-year normal in fiscal year 2008.

Suppliers

Roanoke Gas is served by multiple interstate and intrastate pipelines including Columbia Gas Transmission Corporation and Columbia Gulf Transmission Corporation (together Columbia), and East Tennessee Natural Gas Company, Tennessee Gas Pipeline, Midwestern Gas Transmission and Saltville Gas Storage Company, LLC. Columbia historically has delivered approximately 54% of the Company's gas supply, while the other pipelines deliver the balance of the Company's requirements. The rates paid for natural gas transportation and storage services purchased from the interstate pipeline companies are established by tariffs approved by FERC (the Federal Energy Regulatory Commission). These tariffs contain flexible pricing provisions, which, in some instances, authorize these transporters to reduce rates and charges to meet price competition. The current pipeline contracts expire at various times from 2012 to 2019. The Company anticipates being able to renew these contracts.

The Company manages its pipeline contracts and liquefied natural gas storage facility (LNG) in order to provide for sufficient capacity to meet the natural gas demands of its customers. The maximum daily winter capacity for delivery into Roanoke Gas' distribution system under the interstate and intrastate pipelines is 78,606 DTH per day. The LNG facility, which is capable of storing up to 220,000 DTH of natural gas in a liquid state for use during peak demand, has the capability of providing an additional 33,000 DTH per day. Combined, the pipelines and LNG facility can provide more than 111,000 DTH on a single winter day. In fiscal 2009, the Company realized a maximum one day customer demand of 78,021 DTH.

The Company currently uses multi-year contracts to meet its natural gas supply needs. The Company currently contracts with ConocoPhillips to be the asset manager and primary supplier for Roanoke Gas. The natural gas purchased under the asset manager agreement is priced at indexed-based market prices based on prices as reported in major industry pricing publications. The Company expects its firm supply agreements will be sufficient to meet customer demands for natural gas during the term of the agreement.

The Company uses summer storage programs to supplement gas supply requirements during the winter months. During the summer months, the Company injects gas into its LNG facility. In addition, the Company has contracted for storage reserves from Columbia, Tennessee Gas Pipeline and Saltville Gas Storage Company, LLC for a combined total of more than 2.6 million DTH of storage capacity. The balance of the Company's annual natural gas requirements are met primarily through market purchases through its asset manager who also manages its pipeline transportation and storage rights and gas supply inventories and deliveries.

Competition

Regulated natural gas utilities operate in a monopolistic environment. Roanoke Gas currently holds the only franchises and/or certificates of public convenience and necessity to distribute natural gas in its Virginia service areas. These franchises generally extend for multi-year periods and are renewable by the municipalities, including exclusive franchises in the cities of Roanoke and Salem and the Town of Vinton, Virginia, which expire December 31, 2015.

Management anticipates that the Company will be able to renew all of its franchises when they expire. There can be no assurance, however, that a given jurisdiction will not refuse to renew a franchise or will not, in connection with the renewal of a franchise, impose certain restrictions or conditions that could adversely affect the Company's business operations or financial condition. Certificates of public convenience and necessity, issued by the Virginia State Corporation Commission (SCC), are of perpetual duration, subject to compliance with regulatory standards.

Although Roanoke Gas has exclusive rights for the distribution of natural gas in its service area, the Company competes with suppliers of other energy sources such as fuel oil, electricity, propane and coal. Competition can be intense among the other energy sources and can be based primarily on price. This is particularly true for industrial applications that may switch to other fuels, unless environmental regulation restrictions limit the usage of other fuels. The relationship between supply and demand has the greatest impact on the price of natural gas. Greater demand for natural gas for electric generation and other uses combined with limited domestic supplies can provide upward pressure on the price of natural gas. The Company continues to see a demand for its product and extends service to the new residential construction markets located along or near gas distribution mains in its service area. However, due to the current economic environment, new construction has declined significantly and the rate of customer growth has declined from recent levels.

Regulation

Roanoke Gas is subject to regulation at both the state and local levels. At the state level, regulation is performed by the SCC and includes the approval of rates and charges at which natural gas is sold to customers, the approval of agreements between or among affiliated companies involving the provision of goods and services, pipeline safety, and certain corporate activities of the Company, including mergers and acquisitions. The SCC also grants certificates of public convenience and necessity to distribute natural gas in Virginia.

At the local level, Roanoke Gas is further regulated by the municipalities and localities that grant franchises for the placement of gas distribution pipelines and the operation of a gas distribution network within the streets and alleys of the municipalities.

Employees

At September 30, 2009, Resources had 123 full-time employees and 129 total employees. As of that date, 42 employees, or 34% of the Company's full-time employees, belonged to the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied-Industrial International Union, Local No. 2-515 and were represented under a collective bargaining agreement. The union has been in place at the Company since 1952. The Roanoke Gas collective bargaining agreement will expire on July 31, 2010. Negotiations on a new collective bargaining agreement will begin in early 2010. Management maintains an amicable relationship with the union.

Item 1A. Risk Factors.

Not required.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Included in Utility Plant on the Company's consolidated balance sheet are storage plant, transmission plant, distribution plant and general plant of Roanoke Gas as categorized by natural gas utilities. The Company has approximately 1,034 miles of transmission and distribution pipeline, and transmission and distribution plant represent almost 86% of the total investment in plant.

Roanoke Gas owns and operates eight metering stations through which it measures and regulates the gas being delivered by its suppliers. These stations are located at various points throughout the Company's distribution system.

Roanoke Gas also owns a liquefied natural gas storage facility located in Botetourt County that has the capacity to store up to 220,000 DTH of natural gas.

The Company's executive, accounting and business offices and the maintenance and service departments are located in Roanoke, Virginia along Kimball Avenue.

The Company considers its present properties adequate.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

The information set forth under the caption "Market Price and Dividend Information" in the 2009 Annual Report to Shareholders is incorporated herein by reference. As of November 30, 2009, there were 1,408 holders of record of the Company's common stock. This number does not include all beneficial owners of common stock who hold their shares in "street name."

Pursuant to the RGC Resources Restricted Stock Plan for Outside Directors (the "Restricted Stock Plan"), 40% of the monthly retainer fee of each non-employee director of the Company is paid in shares of unregistered common stock and is subject to vesting and transferability restrictions ("restricted stock"). A participant can, subject to approval of Directors of the Company (the "Board"), elect to receive up to 100% of his retainer fee in restricted stock. The number of shares of restricted stock is calculated each month based on the closing sales price of the Company's common stock on the NASDAQ National Market on the first day of the month. The shares of restricted stock are issued in reliance on Section 3(a)(11) and Section 4(2) exemptions under the Securities Act of 1933 and will vest only in the case of the participant's death, disability, retirement or in the event of a change in control of the Company. Shares of restricted stock will be forfeited to the Company upon (i) the participant's voluntary resignation during his term on the Board or (ii) removal for cause. During the quarter ended September 30, 2009, the Company issued a total of 858 shares of restricted stock pursuant to the Restricted Stock Plan as follows:

Investment Date	Price	Number of Shares

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A(T). Controls and Procedures.

Disclosure Controls and Procedures.

The Company maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to be effective in providing reasonable assurance that information required to be disclosed in reports under the Exchange Act are recorded, processed and summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (the "SEC"), and that such information is accumulated and communicated to management to allow for timely decisions regarding required disclosure.

As of September 30, 2009, the Company completed an evaluation, under the supervision and with the participation of management, including the chief executive officer and the chief financial officer (principal financial officer), of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2009.

Management's Annual Report on Internal Control Over Financial Reporting.

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) or 15d-15(f) under the Exchange Act.) Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America and include those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Management conducted an evaluation of the design and effectiveness of the Company's system of internal control over financial reporting as of September 30, 2009, based on the framework set forth in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its evaluation, management concluded that, as of September 30, 2009, the Company's internal control over financial reporting was effective.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the SEC that permit the Company to provide only management's report in this annual report.

Changes in Internal Control Over Financial Reporting.

There were not any changes in the Company's internal controls over financial reporting during the fourth fiscal quarter of the fiscal year covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

None
