AMAZON.COM, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1 Accounting Policies

Unaudited Interim Financial Information

We have prepared the accompanying consolidated financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim financial reporting. These consolidated financial statements are unaudited and, in our opinion, include all adjustments, consisting of normal recurring adjustments and accruals necessary for a fair presentation of our consolidated balance sheets, operating results, and cash flows for the periods presented. Operating results for the periods presented are not necessarily indicative of the results that may be expected for 2011 due to seasonal and other factors. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States ("GAAP") have been omitted in accordance with the rules and regulations of the SEC. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes in Item 8 of Part II, "Financial Statements and Supplementary Data," of our 2010 Annual Report on Form 10-K.

Principles of Consolidation

The consolidated financial statements include the accounts of Amazon.com, Inc., its wholly-owned subsidiaries, and those entities in which we have a variable interest and are the primary beneficiary (collectively, the "Company"). Intercompany balances and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent liabilities in the consolidated financial statements and accompanying notes. Estimates are used for, but not limited to, determining the selling price of products and services in multiple element revenue arrangements and determining the lives of these elements, incentive discount offers, sales returns, vendor funding, stock-based compensation, income taxes, valuation of investments and inventory, collectability of receivables, valuation of acquired intangibles and goodwill, depreciable lives of fixed assets and internally-developed software and contingencies. Actual results could differ materially from those estimates.

Recent Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update ("ASU") to address diversity in practice in interpreting the pro forma revenue and earnings disclosure requirements for business combinations. The ASU specifies that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the current year business combination(s) had occurred as of the beginning of the comparable prior annual reporting period. We do not expect the provisions of this ASU, which are effective for us on January 1, 2011, to have a material impact on our consolidated financial statements. We have adopted this ASU prospectively for business combinations occurring on or after December 15, 2010.

Note 2 Cash, Cash Equivalents, and Marketable Securities

As of March 31, 2011, and December 31, 2010, our cash, cash equivalents, and marketable securities primarily consisted of cash, U.S. and foreign government and agency securities, AAA-rated money market funds, and other investment grade securities. Our marketable fixed-income securities have effective maturities of less than 5 years. Cash equivalents and marketable securities are recorded at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. To increase the comparability of fair value measures, the following hierarchy prioritizes the inputs to valuation methodologies used to measure fair value:

Level 1 Valuations based on quoted prices for identical assets and liabilities in active markets.

Edgar Filing: AMAZON COM INC - Form 10-Q

Level 2 Valuations based on observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 Valuations based on unobservable inputs reflecting our own assumptions, consistent with reasonably available assumptions made by other market participants. These valuations require significant judgment.

We measure the fair value of money market funds and equity securities based on quoted prices in active markets for identical assets or liabilities. All other financial instruments were valued either based on recent trades of securities in inactive markets or based on quoted market prices of similar instruments and other significant inputs derived from or corroborated by observable market data. We did not hold any securities categorized as Level 3 as of March 31, 2011, or December 31, 2010.

Table of Contents

The following table summarizes, by major security type, our cash, cash equivalents, and marketable securities that are measured at fair value on a recurring basis and are categorized using the fair value hierarchy (in millions):

	March 31, 2011			December 31, 2010
	Cost or Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Total Estimated Fair Value
Cash	\$ 745	\$	\$	\$ 745
Level 1 securities:				
Money market funds	1,798			1,798
Equity securities	2		(1)	1
Level 2 securities:				
Foreign government and agency securities	1,347	3	(6)	1,344
U.S. government and agency securities	2,533	10	(2)	2,541
Corporate debt securities	542	2	(3)	541
Asset-backed securities	29			29
Other fixed income securities	20			20
	\$ 7,016	\$ 15	\$ (12)	\$ 7,019
Less: Long-term restricted cash, cash equivalents, and marketable securities (1)				(138)
Total cash, cash equivalents, and marketable securities				\$ 6,881

(1) We are required to pledge or otherwise restrict a portion of our cash, cash equivalents, and marketable securities as collateral for standby letters of credit, guarantees, debt and real estate lease agreements. We classify cash and marketable securities with use restrictions of twelve months or longer as non-current Other assets on our consolidated balance sheets. See Note 3 Commitments and Contingencies.

Note 3 Commitments and Contingencies**Commitments**

We have entered into non-cancellable operating, capital and financing leases for equipment and office, fulfillment center, and data center facilities. Rental expense under operating lease agreements was \$74 million and \$48 million for Q1 2011 and Q1 2010.

For buildings that are under build-to-suit lease arrangements where we have taken occupancy in the three months ended March 31, 2011, we determined that we continue to be the deemed owner of these buildings. These arrangements do not qualify for sales recognition under the sale-leaseback accounting guidance due principally to our significant investment in tenant improvements. As a result, the buildings, in the amount of \$87 million, are being depreciated over the shorter of their useful lives or the lives of the related leases. The long-term construction obligation is now considered a long-term financing obligation with amounts payable during the next 12 months recorded as Accrued expenses and other.

Table of Contents

The following summarizes our principal contractual commitments, excluding open orders for inventory purchases that support normal operations, as of March 31, 2011:

	Nine Months Ended December 31, 2011 (in millions)	Year Ended December 31,					
		2012	2013	2014	2015	Thereafter	Total
Operating and capital commitments:							
Debt principal and interest	\$ 30	\$ 100	\$ 191	\$ 30	\$ 15	\$ 1	\$ 321
Capital leases, including interest	210	224	144	30	15	1	624
Financing lease obligations, including interest (1)	17	23	24	25	25	274	388
Operating leases	197	255	227	209	178	662	1,728
Other commitments (2) (3)	65	110	87	75	82	936	1,355
Total commitments	\$ 519	\$ 712	\$ 673	\$ 339	\$ 300	\$ 1,873	\$ 4,416

- (1) Relates to the 825,000 square feet of occupied corporate office space under build-to-suit lease arrangements.
- (2) Includes the estimated timing and amounts of payments for rent, operating expenses, and tenant improvements associated with approximately 877,000 square feet of corporate office space currently being developed under build-to-suit leases and which we anticipate occupying in 2011 and 2013. The amount of space available and our financial and other obligations under the lease agreements are affected by various factors, including government approvals and permits, interest rates, development costs, and other expenses and our exercise of certain rights under the lease agreements.
- (3) Excludes \$218 million of tax contingencies for which we cannot make a reasonably reliable estimate of the amount and period of payment.

Pledged Securities

As of March 31, 2011, and December 31, 2010, we have pledged or otherwise restricted \$140 million and \$160 million of our cash and marketable securities as collateral for standby and trade letters of credit, guarantees, debt related to our international operations, as well as real estate leases. We classify cash and marketable securities with use restrictions of twelve months or longer as non-current. Other assets on our consolidated balance sheets.

Legal Proceedings

The Company is involved from time to time in claims, proceedings and litigation, including the matters described in Item 8 of Part II, Financial Statements and Supplementary Data, Note 6 Commitments and Contingencies, Legal Proceedings and Other Contingencies of our 2010 Annual Report on Form 10-K, as supplemented by the following:

In August 2006, Cordance Corporation filed a complaint against us for patent infringement in the United States District Court for the District of Delaware. The complaint alleges that our website technology, including our 1-Click ordering system, infringes a patent obtained by Cordance purporting to cover an Object-Based Online Transaction Infrastructure (U.S. Patent No. 6,757,710) and seeks injunctive relief, monetary damages in an amount no less than a reasonable royalty, treble damages for alleged willful infringement, prejudgment interest, costs, and attorneys' fees. In response, we asserted a declaratory judgment counterclaim in the same action alleging that a service that Cordance has advertised its intent to launch infringes a patent owned by us entitled Networked Personal Contact Manager (U.S. Patent No. 6,269,369). In August 2009, a jury trial was held and the jury found that all asserted claims of the 710 patent were not infringed by Amazon or were invalid. At trial, Cordance's damages expert opined that, if we are found to infringe the 710 patent and the patent is found to be valid (both of which we dispute), Amazon should pay damages of \$32 million, and Cordance has claimed damages in excess of that amount in post-trial mediation. Our damages expert testified that, under the same circumstances, the maximum damages fairly recoverable against Amazon would be less than \$1 million. In February 2010, the Court partially reversed the jury's findings, ruling that some of the asserted claims of the 710 Patent were valid and were infringed by Amazon. We commenced our appeal of the Court's ruling in the U.S. Court of Appeals for the Federal Circuit in August 2010.

Edgar Filing: AMAZON COM INC - Form 10-Q

In November 2007, an Austrian copyright collection society, Austro-Mechana, filed lawsuits against several Amazon.com EU subsidiaries in the Commercial Court of Vienna, Austria and in the District Court of Munich, Germany seeking to collect a tariff on blank digital media sold by our EU-based retail websites to customers located in Austria. In July 2008, the German court stayed the German case pending a final decision in the Austrian case. In July 2010, the Austrian court ruled in favor of Austro-Mechana and ordered us to report all sales of products to which the tariff potentially applies for a determination of damages. We contest Austro-Mechana's claim and in September 2010 commenced an appeal in the Commercial Court of Vienna. We lost this appeal and in March 2011 commenced an appeal in the Supreme Court of Austria.

In May 2009, Big Baboon, Inc. filed a complaint against us for patent infringement in the United States District Court for the Central District of California. The complaint alleges, among other things, that our third-party selling and payments technology

Table of Contents

infringes a patent owned by Big Baboon, Inc. purporting to cover an Integrated Business-to-Business Web Commerce and Business Automation System (U.S. Patent No. 6,115,690) and seeks injunctive relief, monetary damages, treble damages, costs and attorneys fees. In February 2011, the Court entered an order staying the lawsuit pending the outcome of the Patent and Trademark Office's re-examination of the patent in suit. We dispute the allegations of wrongdoing and intend to vigorously defend ourselves in this matter.

In June 2009, Bedrock Computer Technologies LLC filed a complaint against us for patent infringement in the United States District Court for the Eastern District of Texas. The complaint alleges, among other things, that our website technology infringes a patent owned by Bedrock purporting to cover a Method And Apparatus For Information Storage and Retrieval Using a Hashing Technique with External Chaining and On-the-Fly Removal of Expired Data (U.S. Patent Nos. 5,893,120) and seeks injunctive relief, monetary damages, enhanced damages, a compulsory future royalty, costs and attorneys fees. The complaint was dismissed without prejudice in March 2010, but the plaintiff filed a new complaint against us the following month containing similar allegations. In April 2011, we settled this litigation on terms that include a nonexclusive license to the patent in suit.

In February 2011, SFA Systems, LLC, filed a complaint against us for patent infringement in the United States District Court for the Eastern District of Texas. The complaint alleges, among other things, that by using computer-implemented systems and methods for personalization Amazon and Zappos infringe a patent owned by the plaintiff purporting to cover an Integrated Computerized Sales Force Automation System (No. 6,067,525), and seeks monetary damages, interest, costs, and attorneys fees. We dispute the allegations of wrongdoing and intend to vigorously defend ourselves in this matter.

In February 2011, Gildersleeve Holdings AG, LLC, filed a complaint against us for patent infringement in the United States District Court for the Northern District of Georgia. The complaint alleges, among other things, that by providing systems and methods for personalized presentation of information Amazon infringes a patent owned by the plaintiff purporting to cover a Method and Apparatus for Viewer-Specific Presentation of Information (No. 7,000,183), and seeks monetary damages, interest, injunctive relief, costs, and attorneys fees. We dispute the allegations of wrongdoing and intend to vigorously defend ourselves in this matter.

In March 2011, MasterObjects, Inc., filed a complaint against us for patent infringement in the United States District Court for the Northern District of California. The complaint alleges, among other things, that by providing drop down search suggestions of increasing relevance as users type queries into our search box, Amazon infringes a patent owned by the plaintiff purporting to cover a System and Method for Utilizing Asynchronous Client Server Communication Objects (No. 7,752,326), and seeks monetary damages, interest, injunctive relief, costs, and attorneys fees. We dispute the allegations of wrongdoing and intend to vigorously defend ourselves in this matter.

In April 2011, Walker Digital LLC filed five complaints against us for patent infringement in the United States District Court for the District of Delaware. The complaints allege that we infringe several of the plaintiff's U.S. patents by, among other things, providing cross benefits to customers through our promotions, (Patent Nos. 7,831,470 and 7,827,056), using a customer's identified original product to offer a substitute product (No. 7,236,942), offering products and services from retailers at discounted prices and arranging for users to buy them from merchants (No. 6,249,772), using our product recommendations and personalization features to offer complementary products together (Nos. 6,601,036 and 6,138,105), and enabling customers to subscribe to a delivery schedule for products they routinely use at reduced prices (No. 5,970,470). The complaints seek monetary damages, interest, injunctive relief, costs, and attorneys fees. We dispute the allegations of wrongdoing and intend to vigorously defend ourselves in these matters.

We cannot predict the impact (if any) that any of the matters described above or in our 2010 Annual Report on Form 10-K may have on our business, results of operations, financial position, or cash flows. Because of the inherent uncertainties of such matters, including the early stage and lack of specific damage claims in many of them, we cannot estimate the range of possible losses from them (except as otherwise indicated).

Other Contingencies

In September 2010, the State of Texas issued an assessment of \$269 million for uncollected sales taxes for the period from December 2005 to December 2009, including interest and penalties through the date of the assessment. The State of Texas is alleging that we should have collected sales taxes on applicable sales transactions during those years. We believe that the State of Texas did not provide a sufficient basis for its assessment and that the assessment is without merit. We intend to vigorously defend ourselves in this matter. In March 2011, the SEC staff notified us of an inquiry concerning this assessment, and we are cooperating with the staff's inquiry.

Depending on the amount and the timing, an unfavorable resolution of this matter could materially affect our business, results of operations, financial position, or cash flows.

See also Note 6 Income Taxes.

Table of Contents**Note 4 Stockholders Equity****Stock Award Activity**

We granted restricted stock units representing 0.7 million and 2.4 million shares of common stock during Q1 2011 and Q1 2010 with a per share weighted average fair value of \$171.47 and \$134.18. In 2011, we granted our annual stock awards in Q2, while in 2010 we granted 2 million of our annual stock awards in Q1.

Common shares outstanding plus shares underlying outstanding stock awards totaled 466 million and 465 million at March 31, 2011, and December 31, 2010. These totals include all vested and unvested stock-based awards outstanding, including those awards we estimate will be forfeited. The following table summarizes our restricted stock unit activity for the three months ended March 31, 2011 (in millions):

	Number of Units
Outstanding at December 31, 2010	14.0
Units granted	0.7
Units vested	(0.9)
Units forfeited	(0.4)
Outstanding at March 31, 2011	13.4

Scheduled vesting for outstanding restricted stock units at March 31, 2011, is as follows (in millions):

	Nine Months Ended December 31, 2011	2012	2013	2014	2015	Thereafter	Total
Scheduled vesting restricted stock units	4.3	4.2	2.6	1.5	0.5	0.3	13.4

As of March 31, 2011, there was \$595 million of net unrecognized compensation cost related to unvested stock-based compensation arrangements. This compensation is recognized on an accelerated basis, with approximately half of the compensation expected to be expensed in the next twelve months, and has a weighted average recognition period of 1.3 years.

Note 5 Comprehensive Income

Comprehensive income was \$325 million and \$210 million for Q1 2011 and Q1 2010. The primary differences between net income as reported and comprehensive income are foreign currency translation adjustments, net of tax, and changes in unrealized gains and losses on available-for-sale securities, net of tax.

Note 6 Income Taxes

Our tax provision for interim periods is determined using an estimate of our annual effective tax rate, adjusted for discrete items, if any, that are taken into account in the relevant period. Each quarter we update our estimate of the annual effective tax rate, and if our estimated tax rate changes, we make a cumulative adjustment. The 2011 annual effective tax rate is estimated to be lower than the 35% U.S. federal statutory rate primarily due to anticipated earnings of our subsidiaries in jurisdictions where our effective tax rate is lower than in the U.S. Cash paid for income taxes was \$7 million and \$4 million in Q1 2011 and Q1 2010.

As of March 31, 2011, and December 31, 2010, gross unrecognized tax benefits (tax contingencies) were \$218 million and \$213 million. Due to the nature of our business operations we expect the total amount of tax contingences for prior period tax positions will grow in 2011 in

Edgar Filing: AMAZON COM INC - Form 10-Q

comparable amounts to 2010; however, changes in state and federal tax laws or tax assessments may impact our tax contingencies. It is reasonably possible that within the next 12 months we will receive additional assessments by various tax authorities. These assessments may or may not result in changes to our contingencies.

We are under examination, or may be subject to examination, by the Internal Revenue Service (IRS) for calendar years 2005 through 2010. These examinations may lead to ordinary course adjustments or proposed adjustments to our taxes or our net operating losses. In addition, while we have not yet received a Revenue Agent's Report generally issued at the conclusion of an IRS examination, we recently received Notices of Proposed Adjustment from the IRS for the 2005 and 2006 calendar years relating to transfer pricing with our foreign subsidiaries. The Notices propose an increase to our U.S. taxable income which would result in additional federal tax expense over a seven year period beginning in 2005 totaling approximately \$1.5 billion, subject to interest. We disagree with the proposed adjustments and intend to vigorously contest them. If we are not able to resolve these proposed adjustments at the IRS examination level, we plan to pursue all available administrative and, if necessary, judicial remedies.

Note 7 Segment Information

We have organized our operations into two principal segments: North America and International. We present our segment information along the same lines that our chief executive reviews our operating results in assessing performance and allocating resources.

Table of Contents

We allocate to segment results the operating expenses Fulfillment, Marketing, Technology and content, and General and administrative, but exclude from our allocations the portions of these expense lines attributable to stock-based compensation. We do not allocate the line item Other operating expense (income), net to our segment operating results. A majority of our costs for Technology and content are incurred in the United States and most of these costs are allocated to our North America segment. There are no internal revenue transactions between our reporting segments.

Information on reportable segments and reconciliation to consolidated net income was as follows:

	Three Months Ended March 31, 2011 2010 (in millions)	
North America		
Net sales	\$ 5,465	\$ 3,780
Segment operating expenses (1)	5,175	3,507
Segment operating income	\$ 290	\$ 273
International		
Net sales	\$ 4,392	\$ 3,351
Segment operating expenses (1)	4,217	3,117
Segment operating income	\$ 175	\$ 234
Consolidated		
Net sales	\$ 9,857	\$ 7,131
Segment operating expenses (1)	9,392	6,624
Segment operating income	465	507
Stock-based compensation	(110)	(87)
Other operating income (expense), net	(33)	(26)
Income from operations	322	394
Total non-operating income (expense)	(15)	7
Provision for income taxes	(89)	(100)
Equity-method investment activity, net of tax	(17)	(2)
Net income	\$ 201	\$ 299

- (1) Represents operating expenses, excluding stock-based compensation and Other operating expense (income), net, which are not allocated to segments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**Forward-Looking Statements**

This Quarterly Report on Form 10-Q includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including statements regarding guidance, industry prospects or future results of operations or financial position, made in this Quarterly Report on Form 10-Q are forward-looking. We use words such as anticipates, believes, expects, future, intends, and similar expressions to identify forward-looking statements. Forward-looking statements reflect management's current expectations and are inherently uncertain. Actual results could differ materially for a variety of reasons, including, among others,

Edgar Filing: AMAZON COM INC - Form 10-Q

fluctuations in foreign exchange rates, changes in global economic conditions and consumer spending, world events, the rate of growth of the Internet and online commerce, the amount that Amazon.com invests in new business opportunities and the timing of those investments, the mix of products sold to customers, the mix of net sales derived from products as compared with services, the extent to which we owe income taxes, competition, management of growth, potential fluctuations in operating results, international growth and expansion, the outcomes of legal proceedings and claims, fulfillment center optimization, risks of inventory management, seasonality, the degree to which the Company enters into, maintains, and develops commercial agreements, acquisitions, and strategic transactions, payments risks, and risks of fulfillment throughput and productivity. In addition, the current global economic climate amplifies many of these risks. These risks and uncertainties, as well as other risks and uncertainties that could cause our actual results to differ significantly from management's expectations, are described in greater detail in Item 1A of Part II, Risk Factors.

Table of Contents

For additional information, see Item 7 of Part II, Management's Discussion and Analysis of Financial Condition and Results of Operations Overview of our 2010 Annual Report on Form 10-K.

Critical Accounting Judgments

The preparation of financial statements in conformity with GAAP requires estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities in the consolidated financial statements and accompanying notes. The SEC has defined a company's critical accounting policies as the ones that are most important to the portrayal of the company's financial condition and results of operations, and which require the company to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, we have identified the critical accounting policies and judgments addressed below. We also have other key accounting policies, which involve the use of estimates, judgments, and assumptions that are significant to understanding our results. For additional information, see Item 8 of Part II, Financial Statements and Supplementary Data Note 1 Description of Business and Accounting Policies, of our 2010 Annual Report on Form 10-K and Item 1 of Part I, Financial Statements Note 1 Accounting Policies, of this Form 10-Q. Although we believe that our estimates, assumptions, and judgments are reasonable, they are based upon information presently available. Actual results may differ significantly from these estimates under different assumptions, judgments, or conditions.

Inventories

Inventories, consisting of products available for sale, are primarily accounted for using the first-in first-out (FIFO) method, and are valued at the lower of cost or market value. This valuation requires us to make judgments, based on currently-available information, about the likely method of disposition, such as through sales to individual customers, returns to product vendors, or liquidations, and expected recoverable values of each disposition category.

These assumptions about future disposition of inventory are inherently uncertain. As a measure of sensitivity, for every 1% of additional inventory valuation allowance we would have recorded an additional cost of sales of approximately \$31 million for Q1 2011.

Goodwill

We evaluate goodwill for impairment annually or more frequently when an event occurs or circumstances change that indicates that the carrying value may not be recoverable. Our annual testing date is October 1. We test goodwill for impairment by first comparing the book value of net assets to the fair value of the reporting units. If the fair value is determined to be less than the book value or qualitative factors indicate that it is more likely than not that goodwill is impaired, a second step is performed to compute the amount of impairment as the difference between the estimated fair value of goodwill and the carrying value. We estimate the fair value of the reporting units using discounted cash flows. Forecasts of future cash flow are based on our best estimate of future net sales and operating expenses, based primarily on expected category expansion, pricing, market segment share and general economic conditions. Certain estimates of discounted cash flows involve businesses and geographies with limited financial history and developing revenue models. Changes in these forecasts could significantly change the amount of impairment recorded, if any.

During the quarter, management monitored the actual performance of the business relative to the fair value assumptions used during our annual goodwill impairment test. For the periods presented, no triggering events were identified that require an update to our annual impairment test. As a measure of sensitivity, a 10% decrease in the fair value of any of our reporting units as of December 31, 2010, would have had no impact on the carrying value of our goodwill.

Financial and credit market volatility directly impacts our fair value measurement through our weighted average cost of capital that we use to determine our discount rate and through our stock price that we use to determine our market capitalization. During times of volatility, significant judgment must be applied to determine whether credit or stock price changes are a short-term swing or a longer-term trend. As a measure of sensitivity, a prolonged 20% decrease from our March 31, 2011, closing stock price would not be an indicator of possible impairment.

Stock-Based Compensation

We measure compensation cost for stock awards at fair value and recognize it as compensation expense over the service period for awards expected to vest. The fair value of restricted stock units is determined based on the number of shares granted and the quoted price of our common stock. The estimation of stock awards that will ultimately vest requires judgment for the amount that will be forfeited, and to the extent actual results or updated estimates differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period estimates are revised. We consider many factors when estimating expected forfeitures, including employee class, economic environment, and

Edgar Filing: AMAZON COM INC - Form 10-Q

historical experience. We update our estimated forfeiture rate quarterly. A 1% change to our estimated forfeiture rate would have had an approximately \$19 million impact on our Q1 2011 operating income. Our estimated forfeiture rates at March 31, 2011, and December 31, 2010, were 28.8 % and 29.7%.

Table of Contents

We utilize the accelerated method, rather than the straight-line method, for recognizing compensation expense. Under this method, over 50% of the compensation cost is expensed in the first year of a four year vesting term. If forfeited early in the life of an award, the forfeited amount is much greater under an accelerated method than under a straight-line method.

Income Taxes

We are subject to income taxes in both the U.S. and numerous foreign jurisdictions. Significant judgment is required in evaluating and estimating our tax positions and determining our provision and accruals for these taxes. During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. For example, our effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, by changes in foreign currency exchange rates, entry into new businesses and geographies and changes to our existing businesses, acquisitions, by changes in the valuation of our deferred tax assets and liabilities, or by changes in the relevant tax, accounting and other laws, regulations, principles and interpretations. We are subject to audit in various jurisdictions, and such jurisdictions may assess additional income tax against us. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different from our historical income tax provisions and accruals. The results of an audit or litigation could have a material effect on our operating results or cash flows in the period or periods for which that determination is made, as well as prior and subsequent periods.

If we determine that additional portions of our deferred tax assets are realizable, the majority of the benefit will come from the assets associated with the stock-based compensation that was not recognized in the financial statements, but was claimed on the tax return. Since this compensation did not originally run through our consolidated statements of operations, the benefit generated will be recorded to stockholders equity.

Recent Accounting Pronouncements

See Item 1 of Part I, Financial Statements Note 1 Accounting Policies Recent Accounting Pronouncements.

Liquidity and Capital Resources

Cash flow information is as follows:

	Three Months Ended March 31,		Twelve Months Ended March 31,	
	2011	2010	2011	2010
	(in millions)		(in millions)	
Operating activities	\$ (1,586)	\$ (1,098)	\$ 3,033	\$ 2,780
Investing activities	390	(542)	(2,428)	(2,732)
Financing activities	24	87	92	97

Our financial focus is on long-term, sustainable growth in free cash flow. Free cash flow, a non-GAAP financial measure, was \$1.90 billion for the trailing twelve months ended March 31, 2011, compared to \$2.32 billion for the trailing twelve months ended March 31, 2010, a decrease of 18%. See Non-GAAP Financial Measures below for a reconciliation of free cash flow to cash provided by operating activities. The decrease in free cash flow for the trailing twelve months ended March 31, 2011, compared to the comparable prior year period was primarily due to increased capital expenditures and changes in working capital¹, partially offset by depreciation and amortization expense and increases in sales of gift certificates to customers. Tax benefits relating to excess stock-based compensation deductions are presented in the statement of cash flows as financing cash inflows; accordingly, as such tax benefits decline, a greater amount of cash is classified as operating cash inflow. Operating cash flows and free cash flows can be volatile and are sensitive to many factors, including changes in working capital and the timing and magnitude of capital expenditures. Working capital at any specific point in time is subject to many variables, including seasonality, inventory management and category expansion, the timing of cash receipts and payments, vendor payment terms, and fluctuations in foreign exchange rates.

Our principal sources of liquidity are cash flows generated from operations and our cash, cash equivalents, and marketable securities balances, which, at fair value, were \$6.9 billion and \$8.8 billion at March 31, 2011, and December 31, 2010. Amounts held in foreign currencies were \$2.9 billion and \$3.4 billion at March 31, 2011, and December 31, 2010, and were primarily Euros, British Pounds and Japanese Yen.

⁽¹⁾ Working capital consists of accounts receivable, inventory, and accounts payable.

Table of Contents

Cash provided by (used in) operating activities was \$(1,586) million and \$(1,098) million for Q1 2011 and Q1 2010. Our operating cash flows result primarily from cash received from our consumer, seller, and enterprise customers, miscellaneous marketing and promotional agreements, and our co-branded credit card agreements, offset by cash payments we make for products and services, employee compensation (less amounts capitalized related to internal use software that are reflected as cash used in investing activities), payment processing and related transaction costs, operating leases and interest payments on our long-term obligations. Cash received from our consumer, seller, and enterprise customers, and other activities generally corresponds to our net sales. Because consumers primarily use credit cards to buy from us, our receivables from customers settle quickly. Changes to our operating cash flows have historically been driven primarily by changes in operating income and changes to the components of working capital, including changes to receivable and payable days and inventory turns, as well as changes to non-cash items such as excess stock-based compensation and deferred taxes.

Cash provided by (used in) investing activities corresponds with purchases, sales, and maturities of marketable securities, capital expenditures, including leasehold improvements, internal-use software and website development costs, and cash outlays for acquisitions, investments in other companies, and intellectual property rights. Cash provided by (used in) investing activities was \$390 million and \$(542) million for Q1 2011 and Q1 2010, with the variability caused primarily by purchases, maturities, and sales of marketable securities and other investments, increased capital expenditures, and increases in cash paid for acquisitions. Capital expenditures were \$298 million and \$140 million during Q1 2011 and Q1 2010 with the sequential increases primarily reflecting additional investments in support of continued business growth, including investments in technology infrastructure including Amazon Web Services (AWS), additional capacity to support our fulfillment operations, and investments in corporate office space. We expect this trend to continue over time. Capital expenditures included \$52 million and \$40 million for internal-use software and website development during Q1 2011 and Q1 2010. Stock-based compensation capitalized for internal-use software and website development costs does not affect cash flows. We made cash payments, net of acquired cash, related to acquisition and investment activity of \$139 million and \$19 million during Q1 2011 and Q1 2010.

Cash provided by (used in) financing activities was \$24 million and \$87 million for Q1 2011 and Q1 2010. Cash outflows from financing activities result from payments on obligations related to capital leases and leases accounted for as financing arrangements and repayments of long-term debt, and repurchases of common stock. Payments on obligations related to capital leases and leases accounted for as financing arrangements, and repayments of long-term debt, were \$111 million and \$61 million in Q1 2011 and Q1 2010. Cash inflows from financing activities primarily result from proceeds from long-term debt and tax benefits relating to excess stock-based compensation deductions. Proceeds from long-term debt and other were \$89 million and \$62 million in Q1 2011 and Q1 2010. Tax benefits relating to excess stock-based compensation deductions are presented as financing cash flows. Cash inflows (outflows) from tax benefits related to stock-based compensation deductions were \$46 million and \$86 million for Q1 2011 and Q1 2010.

We recorded net tax provisions of \$89 million and \$100 million in Q1 2011 and Q1 2010. A majority of this provision is non-cash. We have current tax benefits relating to excess stock-based compensation deductions that are being utilized to reduce our U.S. taxable income. Cash taxes paid, net of refunds, were \$7 million and \$4 million for Q1 2011 and Q1 2010. We used substantially all of our federal net operating loss carryforwards in 2010 and as of December 31, 2010, we had available federal tax credits of \$227 million. Once we use our credits, we expect cash paid for taxes to significantly increase. We endeavor to optimize our global taxes on a cash basis, rather than on a financial reporting basis.

Table of Contents

In January 2010, our Board of Directors authorized a program to repurchase up to \$2 billion of our common stock, which replaces the prior February 2008 repurchase authorization. We did not repurchase common stock in Q1 2011.

In April 2011, we acquired Quidsi, Inc. for consideration of approximately \$500 million, primarily in cash, and the assumption of debt.

See Item 1 of Part I, Financial Statements Note 3 Commitments and Contingencies for additional discussion of our principal contractual commitments, as well as our pledged securities. Purchase obligations and open purchase orders, consisting of inventory and significant non-inventory commitments, were \$1.8 billion at March 31, 2011.

On average, our high inventory turnover² means we collect from our customers before our payments to suppliers come due. Inventory turnover was 12 and 13 for Q1 2011 and Q1 2010. We expect some variability in inventory turnover over time as it is affected by several factors, including category expansion and changes in our product mix, the mix of sales by us and by other sellers, our continuing focus on in-stock inventory availability, our investment in new geographies and product lines, and the extent to which we choose to utilize outsource fulfillment providers.

We believe that current cash, cash equivalents, and marketable securities balances will be sufficient to meet our anticipated operating cash needs for at least the next 12 months. However, any projections of future cash needs and cash flows are subject to substantial uncertainty. See Item 1A of Part II, Risk Factors. We continually evaluate opportunities to sell additional equity or debt securities, obtain credit facilities, repurchase common stock, pay dividends, or repurchase, refinance, or otherwise restructure our debt for strategic reasons or to further strengthen our financial position. The sale of additional equity or convertible debt securities would likely be dilutive to our shareholders. In addition, we will, from time to time, consider the acquisition of, or investment in, complementary businesses, products, services, and technologies, which might affect our liquidity requirements or cause us to issue additional equity or debt securities. There can be no assurance that additional lines-of-credit or financing instruments will be available in amounts or on terms acceptable to us, if at all.

⁽²⁾ Inventory turnover is the quotient of trailing twelve month cost of sales to average inventory over five quarter ends.

Table of Contents**Results of Operations**

We have organized our operations into two principal segments: North America and International. We present our segment information along the same lines that our chief executive reviews our operating results in assessing performance and allocating resources.

	Three Months Ended March 31, 2011 2010 (in millions)	
Net Sales:		
North America	\$ 5,465	\$ 3,780
International	4,392	3,351
Consolidated	\$ 9,857	\$ 7,131
Year-over-year Percentage Growth:		
North America	45%	47%
International	31	45
Consolidated	38	46
Year-over-year Percentage Growth, excluding effect of exchange rates:		
North America	45%	46%
International	27	37
Consolidated	36	42
Net Sales Mix:		
North America	55%	53%
International	45	47
Consolidated	100%	100%

Sales increased 38% in Q1 2011. Changes in currency exchange rates affected net sales positively by \$144 million for Q1 2011 and positively by \$185 million for Q1 2010. For a discussion of the effect on sales growth of exchange rates, see [Effect of Exchange Rates](#) below.

The North America sales growth rate was 45% for Q1 2011. Sales growth primarily reflects increased unit sales. Increased unit sales were driven largely by our continued efforts to reduce prices for our customers, including from shipping offers, by a larger base of sales in faster growing categories such as electronics and other general merchandise, by increased in-stock inventory availability, and by increased selection of product offerings. The International sales growth rate was 31% for Q1 2011. Sales growth primarily reflects increased unit sales. Increased unit sales were driven largely by our continued efforts to reduce prices for our customers, including from shipping offers, by a larger base of sales in faster growing categories such as electronics and other general merchandise, by increased in-stock inventory availability, and by increased selection of product offerings, offset by a significant decline in Japan unit sales following the March 11, 2011, earthquake and related events, which we estimate negatively impacted the international sales growth rate, excluding the effects of exchange rates, by approximately 500 basis points. Additionally, changes in currency exchange rates affected International net sales positively by \$141 million for Q1 2011. We expect that, over time, our International segment will represent 50% or more of our consolidated net sales.

Sales of products by other sellers on our websites represented 33% and 31% of units for Q1 2011 and Q1 2010. Revenues from sales are recorded as a net amount. Because we focus on operating profits, we are largely neutral on whether an item is sold by us or by another seller.

Table of Contents*Supplemental Information*

Supplemental information about shipping results is as follows:

	Three Months Ended March 31,	
	2011	2010
	(in millions)	
Shipping Activity:		
Shipping revenue (1)(2)	\$ 330	\$ 248
Outbound shipping costs	(786)	(518)
Net shipping cost	\$ (456)	\$ (270)
Year-over-year Percentage Growth:		
Shipping revenue	33%	30%
Outbound shipping costs	52	45
Net shipping cost	69	61
Percent of Net Sales:		
Shipping revenue	3.3%	3.5%
Outbound shipping costs	(7.9)	(7.3)
Net shipping cost	(4.6)%	(3.8)%

(1) Excludes amounts earned on shipping activities by third-party sellers where we do not provide the fulfillment service.

(2) Includes amounts earned from the Amazon Prime membership shipping service and Fulfillment by Amazon programs.

We expect our net cost of shipping to continue to increase to the extent our customers accept and use our shipping offers at an increasing rate; to the extent our product mix shifts to the electronics and other general merchandise category; to the extent we reduce shipping rates; to the extent we use more expensive shipping methods; and to the extent we offer additional services. We seek to mitigate costs of shipping over time in part through achieving higher sales volumes, negotiating better terms with our suppliers, and achieving better operating efficiencies. We believe that offering low prices to our customers is fundamental to our future success, and one way we offer lower prices is through shipping offers.

Table of Contents

Supplemental information about our net sales is as follows:

Table of Contents*Operating Expenses*

Information about operating expenses with and without stock-based compensation was as follows (in millions):

	Three Months Ended March 31, 2011			Three Months Ended March 31, 2010		
	As Reported	Stock-Based Compensation	Net	As Reported	Stock-Based Compensation	Net
Operating Expenses:						
Cost of sales	\$ 7,608	\$	\$ 7,608	\$ 5,501	\$	\$ 5,501
Fulfillment	855	(24)	831	546	(18)	528
Marketing	327	(7)	320	201	(5)	196
Technology and content	579	(61)	518	366	(47)	319
General and administrative	133	(18)	115	97	(17)	80
Other operating expense						
(income), net	33		33	26		26
Total operating expenses	\$ 9,535	\$ (110)	\$ 9,425	\$ 6,737	\$ (87)	\$ 6,650

Year-over-year Percentage Growth:

Fulfillment	57%	57%	29%	30%
Marketing	63	63	56	57
Technology and content	58	62	33	34
General and administrative	37	44	43	44
Percent of Net Sales:				
Fulfillment	8.7%	8.4%	7.7%	7.4%
Marketing	3.3	3.2	2.8	2.7
Technology and content	5.9	5.3	5.1	4.5
General and administrative	1.4	1.2	1.4	1.1

Operating expenses without stock-based compensation are non-GAAP financial measures. See Non-GAAP Financial Measures below.

Cost of Sales

Cost of sales consists of the purchase price of consumer products and content where we are the seller of record, inbound and outbound shipping charges, and packaging supplies. Shipping charges to receive products from our suppliers are included in our inventory, and recognized as cost of sales upon sale of products to our customers.

The increase in cost of sales in absolute dollars in Q1 2011 compared to the comparable prior year period is primarily due to increased product and shipping costs resulting from increased sales.

Consolidated gross profit and gross margin for each of the periods presented were as follows:

	Three Months Ended March 31,	
	2011	2010
Gross Profit (in millions)	\$ 2,249	\$ 1,630
Gross Margin	22.8%	22.9%

Gross margin for Q1 2011 remained relatively consistent with the prior year period. We believe that income from operations is a more meaningful measure than gross profit and gross margin due to the diversity of our product categories and services.

Fulfillment

Edgar Filing: AMAZON COM INC - Form 10-Q

Fulfillment costs as a percentage of net sales may vary due to several factors, such as payment processing and related transaction costs, our level of productivity and accuracy, changes in volume, size, and weight of units received and fulfilled, the extent we utilize fulfillment services provided by third parties, and our ability to affect customer service contacts per unit by implementing

Table of Contents

improvements in our operations and enhancements to our customer self-service features. Additionally, because payment processing costs associated with seller transactions are based on the gross purchase price of underlying transactions, and payment processing and related transaction costs are higher as a percentage of sales versus our retail sales, sales by our sellers have higher fulfillment costs as a percent of net sales.

The increase in fulfillment costs in absolute dollars in Q1 2011 compared to the comparable prior year period, is primarily due to variable costs corresponding with sales volume, inventory levels, and product sales mix; payment processing and related transaction costs, and costs from expanding fulfillment capacity.

We seek to expand our fulfillment capacity to accommodate greater selection and in-stock inventory levels and meet anticipated shipment volumes from sales of our own products as well as sales by third parties for which we provide the fulfillment services. We evaluate our facility requirements as necessary.

Marketing

We direct customers to our websites primarily through a number of targeted online marketing channels, such as our Associates program, sponsored search, portal advertising, email marketing campaigns, and other initiatives. Our marketing expenses are largely variable, based on growth in sales and changes in rates. To the extent there is increased or decreased competition for these traffic sources, or to the extent our mix of these channels shifts, we would expect to see a corresponding change in our marketing expense.

The increase in marketing costs in absolute dollars in Q1 2011 compared to the comparable prior year period is primarily due to increased spending on online marketing channels, such as sponsored search programs and our Associates program, and on television advertising.

While costs associated with our shipping are not included in marketing expense, we view these offers as effective worldwide marketing tools, and intend to continue offering them indefinitely.

Technology and Content

We seek to efficiently invest in several areas of technology and content including seller platforms, digital initiatives, and expansion of new and existing product categories, as well as technology infrastructure so that we can continue to enhance the customer experience, improve our process efficiency and support AWS. We expect spending in technology and content to increase over time as we continue to add employees and technology infrastructure.

The increase in technology and content costs in absolute dollars in Q1 2011 compared to the comparable prior year period is primarily due to increased spending on technology infrastructure and increases in payroll and related expenses. We expect these trends to continue over time.

During Q1 2011 and Q1 2010, we capitalized \$62 million (including \$10 million of stock-based compensation) and \$47 million (including \$8 million of stock-based compensation) of costs associated with internal-use software and website development. Amortization of previously capitalized amounts was \$52 million and \$43 million for Q1 2011 and Q1 2010. A majority of our technology costs are incurred in the U.S., most of which are allocated to our North America segment. Infrastructure and other technology costs used to support AWS are included in technology and content.

General and Administrative

The increase in general and administrative costs in absolute dollars in Q1 2011 compared to the comparable prior year period is primarily due to increases in payroll and related expenses and professional service fees.

Stock-Based Compensation

Compensation cost for all stock-based awards is measured at fair value on date of grant and recognized using an accelerated method over the service period for awards expected to vest. The fair value of restricted stock units is determined based on the number of shares granted and the quoted price of our common stock. Such value is recognized as expense over the service period, net of estimated forfeitures, using the accelerated method. The estimation of stock awards that will ultimately vest requires judgment, and to the extent actual results or updated estimates differ from our current estimates, such amounts are recorded as a cumulative adjustment in the period estimates are revised. We consider many factors when estimating expected forfeitures including employee class, the economic environment, and historical experience.

Edgar Filing: AMAZON COM INC - Form 10-Q

Actual results and future estimates may differ substantially from our current estimates.

Stock-based compensation was \$110 million and \$87 million during Q1 2011 and Q1 2010. The increase is primarily due to an increase in total stock-based compensation value granted to our employees and to a decrease in our estimated forfeiture rate.

Table of Contents*Other Operating Expense (Income), Net*

Other operating expense (income) was \$33 million and \$26 million for Q1 2011 and Q1 2010. The increase in Q1 2011 was primarily related to the amortization of intangible assets.

Income from Operations

For the reasons discussed above, income from operations decreased 18% to \$322 million in Q1 2011, from \$394 million in Q1 2010.

Interest Income and Expense

The primary component of our interest expense is related to our capital leases and leases accounted for as financing arrangements. Interest expense was \$12 million and \$7 million during Q1 2011 and Q1 2010.

Our interest income was \$15 million and \$11 million during Q1 2011 and Q1 2010. We generally invest our excess cash in investment grade short- to intermediate-term fixed income securities and AAA-rated money market funds. Our interest income corresponds with the average balance of invested funds and the prevailing rates we are earning on them, which vary depending on the geographies and currencies in which they are invested.

Income Taxes

Our tax provision for interim periods is determined using an estimate of our annual effective tax rate, adjusted for discrete items, if any, that are taken into account in the relevant period. There is a potential for significant volatility of our 2011 effective tax rate due to several factors, including from variability in accurately predicting our taxable income, the taxable jurisdictions to which it relates, business acquisitions and investments, and foreign currencies. The tax provision for Q1 2011 includes income tax expense of approximately \$8 million related to a discrete item in the quarter.

We have current tax benefits relating to excess stock-based compensation deductions that are being utilized to reduce our U.S. taxable income. We used substantially all of our federal net operating loss carryforwards in 2010 and as of December 31, 2010, had available federal tax credits of \$227 million. As a result of new U.S. legislation that became effective in December 2010, we are able to accelerate our depreciation deductions for qualifying property acquired in 2011.

Equity Method Investment Activity, Net of Tax

Equity method investment losses, net of tax, were \$(17) million and \$(2) million during Q1 2011 and Q1 2010. The increase in Q1 2011 was primarily due to losses from new equity method investments, partially offset by the recognition of a non-cash gain on a previously held equity position in a company that we acquired in 2011.

Effect of Exchange Rates

The effect on our consolidated statements of operations from changes in exchange rates versus the U.S. Dollar is as follows (in millions, except per share data):

	Three Months Ended March 31,					
	At Prior Year Rates (1)	2011 Exchange Rate Effect (2)	As Reported	At Prior Year Rates (1)	2010 Exchange Rate Effect (2)	As Reported
Net sales	\$ 9,713	\$ 144	\$ 9,857	\$ 6,946	\$ 185	\$ 7,131
Operating expenses	9,398	137	9,535	6,567	170	6,737
Income from operations	315	7	322	379	15	394
Net interest income (expense) and other (3)	1	(16)	(15)	11	(4)	7

Edgar Filing: AMAZON COM INC - Form 10-Q

Net income	208	(7)	201	286	13	299
Diluted earnings per share	\$ 0.46	\$ (0.02)	\$ 0.44	\$ 0.63	\$ 0.03	\$ 0.66

- (1) Represents the outcome that would have resulted had exchange rates in the reported period been the same as those in effect in the comparable prior year period for operating results, and if we did not incur the variability associated with remeasurements for our intercompany balances.

Table of Contents

- (2) Represents the increase or decrease in reported amounts resulting from changes in exchange rates from those in effect in the comparable prior year period for operating results, and if we did not incur the variability associated with remeasurements for our intercompany balances.

- (3) Includes foreign-currency gains and losses on cross-currency investments, and remeasurement of our intercompany balances.

Non-GAAP Financial Measures

Regulation G, Conditions for Use of Non-GAAP Financial Measures, and other SEC regulations define and prescribe the conditions for use of certain non-GAAP financial information. Our measures of Free cash flow, operating expenses with and without stock-based compensation, and the effect of exchange rates on our consolidated statement of operations, meet the definition of non-GAAP financial measures.

Free cash flow is used in addition to and in conjunction with results presented in accordance with GAAP and free cash flow should not be relied upon to the exclusion of GAAP financial measures.

Free cash flow, which we reconcile to Net cash provided by (used in) operating activities, is cash flow from operations reduced by Purchases of fixed assets, including internal-use software and website development. We use free cash flow, and ratios based on it, to conduct and evaluate our business because, although it is similar to cash flow from operations, we believe it typically will present a more conservative measure of cash flows since purchases of fixed assets are a necessary component of ongoing operations.

Free cash flow has limitations due to the fact that it does not represent the residual cash flow available for discretionary expenditures. For example, free cash flow does not incorporate the portion of payments representing principal reductions of obligations related to capital leases and leases accounted for as financing arrangements or cash payments for business acquisitions. Therefore, we believe it is important to view free cash flow as a complement to our entire consolidated statements of cash flows.

The following is a reconciliation of free cash flow to the most comparable GAAP measure, Net cash provided by (used in) operating activities for the trailing twelve months ended March 31, 2011 and 2010 (in millions):

	Twelve Months Ended March 31,	
	2011	2010
Net cash provided by (used in) operating activities	\$ 3,033	\$ 2,780
Purchases of fixed assets, including internal-use software and website development	(1,138)	(458)
Free cash flow	\$ 1,895	\$ 2,322
Net cash provided by (used in) investing activities	\$ (2,428)	\$ (2,732)
Net cash provided by (used in) financing activities	\$ 92	\$ 97

Operating expenses with and without stock-based compensation is provided to show the impact of stock-based compensation, which is non-cash and excluded from our internal operating plans and measurement of financial performance (although we consider the dilutive impact to our shareholders when awarding stock-based compensation and value such awards accordingly). In addition, unlike other centrally-incurred operating costs, stock-based compensation is not allocated to segment results and therefore excluding it from operating expense is consistent with our segment presentation in our footnotes to the consolidated financial statements.

Operating expenses without stock-based compensation has limitations since it does not include all expenses primarily related to our workforce. More specifically, if we did not pay out a portion of our compensation in the form of stock-based compensation, our cash salary expense included in the Fulfillment, Technology and content, Marketing, and General and administrative line items would be higher.

Information regarding the effect of exchange rates, versus the U.S. Dollar, on our consolidated statements of operations is provided to show reported period operating results had the exchange rates remained the same as those in effect in the comparable prior year period.

Guidance

Edgar Filing: AMAZON COM INC - Form 10-Q

We provided guidance on April 26, 2011, in our earnings release furnished on Form 8-K as set forth below. These forward-looking statements reflect Amazon.com's expectations as of April 26, 2011. Our results are inherently unpredictable and may be materially affected by many factors, such as fluctuations in foreign exchange rates, changes in global economic conditions and consumer spending, world events, the rate of growth of the Internet and online commerce and the various factors detailed below. While this guidance includes our current estimate of second quarter effects from the Japan earthquake and related events, including sales trends to date, impacts from events of this nature are inherently uncertain and we are not able to accurately forecast all potential ramifications.

Table of Contents

Second Quarter 2011 Guidance

Net sales are expected to be between \$8.85 billion and \$9.65 billion, or to grow between 35% and 47% compared with second quarter 2010.

Operating income is expected to be between \$95 million and \$245 million, or between 65% decline and 9% decline compared with second quarter 2010.

This guidance includes approximately \$180 million for stock-based compensation and amortization of intangible assets, and it assumes, among other things, that no additional business acquisitions or investments are concluded and that there are no further revisions to stock-based compensation estimates.

These projections are subject to substantial uncertainty. See Item 1A of Part II, Risk Factors.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk for the effect of interest rate changes, foreign currency fluctuations, and changes in the market values of our investments. Information relating to quantitative and qualitative disclosures about market risk is set forth below and in Item 2 of Part I, Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our investment portfolio. All of our cash equivalent and marketable fixed income securities are designated as available-for-sale and, accordingly, are presented at fair value on our consolidated balance sheets. We generally invest our excess cash in investment grade short- to intermediate-term fixed income securities and AAA-rated money market funds. Fixed rate securities may have their fair market value adversely affected due to a rise in interest rates, and we may suffer losses in principal if forced to sell securities that have declined in market value due to changes in interest rates.

Foreign Exchange Risk

During Q1 2011, net sales from our International segment accounted for 45% of our consolidated revenues. Net sales and related expenses generated from our international websites, as well as those relating to www.amazon.ca (which is included in our North America segment), are denominated in the functional currencies of the corresponding websites and primarily include Euros, British Pounds and Japanese Yen. The functional currency of our subsidiaries that either operate or support these websites is the same as the corresponding local currency. The results of operations of, and certain of our intercompany balances associated with, our internationally-focused websites are exposed to foreign exchange rate fluctuations. Upon consolidation, as exchange rates vary, net sales and other operating results may differ materially from expectations, and we may record significant gains or losses on the remeasurement of intercompany balances. For example, as a result of fluctuations in foreign exchange rates throughout the period compared to rates in effect the prior year, international segment revenues in Q1 2011 increased by \$141 million in comparison with Q1 2010.

We have foreign exchange risk related to foreign-denominated cash, cash equivalents, and marketable securities (foreign funds). Based on the balance of foreign funds at March 31, 2011, of \$2.9 billion, an assumed 5%, 10%, and 20% negative currency movement would result in fair value declines of \$146 million, \$292 million, and \$584 million. All investments are classified as available-for-sale. Fluctuations in fair value are recorded in Accumulated other comprehensive loss, a separate component of stockholders' equity.

We have foreign exchange risk related to our intercompany balances denominated in various foreign currencies. Based on the intercompany balances at March 31, 2011, an assumed 5%, 10%, and 20% adverse change to foreign exchange would result in losses of \$50 million, \$95 million, and \$190 million, recorded to Other income (expense), net.

See Item 2 of Part I, Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Effect of Exchange Rates for additional information on the effect on reported results of changes in exchange rates.

Investment Risk

As of March 31, 2011, our recorded basis in equity investments was \$191 million. These investments primarily relate to equity-method investments in private companies. We review our investments for impairment when events and circumstances indicate that the decline in fair value of such assets below the carrying value is other-than-temporary. Our analysis includes review of recent operating

Table of Contents

results and trends, recent sales/acquisitions of the investee securities, and other publicly available data. The current global economic climate provides additional uncertainty. Valuations of private companies are inherently more difficult due to the lack of readily available market data. As such we believe that market sensitivities are not practicable.

Item 4. Controls and Procedures

We carried out an evaluation required by the Securities Exchange Act of 1934 (the "1934 Act"), under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) of the 1934 Act, as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the 1934 Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

During the most recent fiscal quarter, there has not occurred any change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives as specified above. Management does not expect, however, that our disclosure controls and procedures will prevent or detect all error and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

See Item 1 of Part I, Financial Statements, Note 3, Commitments and Contingencies, Legal Proceedings, and Other Contingencies.

Item 1A. Risk Factors

Please carefully consider the following risk factors. If any of the following risks occur, our business, financial condition, operating results, and cash flows could be materially adversely affected. In addition, the current global economic climate amplifies many of these risks.

We Face Intense Competition

Our businesses are rapidly evolving and intensely competitive, and we have many competitors in different industries, including retail, e-commerce services, digital content and digital media devices, and web services. Many of our current and potential competitors have greater resources, longer histories, more customers, and greater brand recognition. They may secure better terms from vendors, adopt more aggressive pricing and devote more resources to technology, infrastructure, fulfillment, and marketing.

Competition may intensify as our competitors enter into business combinations or alliances and established companies in other market segments expand into our market segments. In addition, new and enhanced technologies, including search, web services, and digital, may increase our competition. The Internet facilitates competitive entry and comparison shopping, and increased competition may reduce our sales and profits.

Our Expansion Places a Significant Strain on our Management, Operational, Financial and Other Resources

We are rapidly and significantly expanding our global operations, including increasing our product and service offerings and scaling our infrastructure to support our retail and services businesses. This expansion increases the complexity of our business and places significant strain on our management, personnel, operations, systems, technical performance, financial resources, and internal financial control and reporting functions. We may not be able to manage growth effectively, which could damage our reputation, limit our growth and negatively affect our

operating results.

Our Expansion into New Products, Services, Technologies and Geographic Regions Subjects Us to Additional Business, Legal, Financial and Competitive Risks

We may have limited or no experience in our newer market segments, and our customers may not adopt our new offerings. These offerings may present new and difficult technology challenges, and we may be subject to claims if customers of these offerings experience service disruptions or failures or other quality issues. In addition, profitability, if any, in our newer activities may be lower than in our older activities, and we may not be successful enough in these newer activities to recoup our investments in them. If any of this were to occur, it could damage our reputation, limit our growth and negatively affect our operating results.

Table of Contents

We May Experience Significant Fluctuations in Our Operating Results and Growth Rate

We may not be able to accurately forecast our growth rate. We base our expense levels and investment plans on sales estimates. A significant portion of our expenses and investments is fixed, and we may not be able to adjust our spending quickly enough if our sales are less than expected.

Our revenue growth may not be sustainable, and our percentage growth rates may decrease. Our revenue and operating profit growth depends on the continued growth of demand for the products and services offered by us or our sellers, and our business is affected by general economic and business conditions worldwide. A softening of demand, whether caused by changes in customer preferences or a weakening of the U.S. or global economies, may result in decreased revenue or growth.

Our net sales and operating results will also fluctuate for many other reasons, including due to risks described elsewhere in this section and the following:

our ability to retain and increase sales to existing customers, attract new customers, and satisfy our customers' demands;

our ability to retain and expand our network of sellers;

our ability to offer products on favorable terms, manage inventory, and fulfill orders;

the introduction of competitive websites, products, services, price decreases, or improvements;

changes in usage or adoption rates of the Internet, e-commerce, digital media devices and web services, including in non-U.S. markets;

timing, effectiveness, and costs of expansion and upgrades of our systems and infrastructure;

the success of our geographic, service, and product line expansions;

the outcomes of legal proceedings and claims;

variations in the mix of products and services we sell;

variations in our level of merchandise and vendor returns;

the extent to which we offer free shipping, continue to reduce product prices worldwide, and provide additional benefits to our customers;

the extent to which we invest in technology and content, fulfillment and other expense categories;

increases in the prices of fuel and gasoline, as well as increases in the prices of other energy products and commodities like paper and packing supplies;

the extent to which operators of the networks between our customers and our websites successfully charge fees to grant our customers unimpaired and unconstrained access to our online services;

our ability to collect amounts owed to us when they become due;

the extent to which use of our services is affected by spyware, viruses, phishing and other spam emails, denial of service attacks, data theft, computer intrusions and similar events; and

terrorist attacks and armed hostilities.

We May Not Be Successful in Our Efforts to Expand into International Market Segments

Our international activities are significant to our revenues and profits, and we plan to further expand internationally. In certain international market segments, we have relatively little operating experience and may not benefit from any first-to-market advantages or otherwise succeed. It is costly to establish, develop and maintain international operations and websites and promote our brand internationally. Our international operations may not be profitable on a sustained basis.

In addition to risks described elsewhere in this section, our international sales and operations are subject to a number of risks, including:

local economic and political conditions;

government regulation of e-commerce, other online services and electronic devices and restrictive governmental actions (such as trade protection measures, including export duties and quotas and custom duties and tariffs), nationalization and restrictions on foreign ownership;

restrictions on sales or distribution of certain products or services and uncertainty regarding liability for products, services and content, including uncertainty as a result of less Internet-friendly legal systems, local laws, lack of legal precedent, and varying rules, regulations, and practices regarding the physical and digital distribution of media products and enforcement of intellectual property rights;

Table of Contents

business licensing or certification requirements, such as for imports, exports and electronic devices;

limitations on the repatriation and investment of funds and foreign currency exchange restrictions;

limited fulfillment and technology infrastructure;

shorter payable and longer receivable cycles and the resultant negative impact on cash flow;

laws and regulations regarding consumer and data protection, privacy, network security, encryption, and restrictions on pricing or discounts;

lower levels of use of the Internet;

lower levels of consumer spending and fewer opportunities for growth compared to the U.S.;

lower levels of credit card usage and increased payment risk;

difficulty in staffing, developing and managing foreign operations as a result of distance, language and cultural differences;

different employee/employer relationships and the existence of workers' councils and labor unions;

laws and policies of the U.S. and other jurisdictions affecting trade, foreign investment, loans and taxes; and

geopolitical events, including war and terrorism.

As the international e-commerce channel grows, competition will intensify. Local companies may have a substantial competitive advantage because of their greater understanding of, and focus on, the local customer, as well as their more established local brand names. We may not be able to hire, train, retain, and manage required personnel, which may limit our international growth.

In 2004, we acquired Joyo.com Limited, which is organized under the laws of the British Virgin Islands and through a People's Republic of China ("PRC") entity, provides technology and services for the Joyo Amazon websites. The PRC regulates Joyo Amazon's business through regulations and license requirements restricting (i) foreign investment in the Internet, retail and delivery sectors, (ii) Internet content and (iii) the sale of media and other products. In order to meet local ownership and regulatory licensing requirements, Joyo Amazon's business is operated by PRC companies that are indirectly owned, either wholly or partially, by PRC nationals. Although we believe Joyo Amazon's structure complies with existing PRC laws, it involves unique risks. There are substantial uncertainties regarding the interpretation of PRC laws and regulations, and it is possible that the PRC government will ultimately take a view contrary to ours. If Joyo Amazon (including its subsidiary and affiliates) were found to be in violation of any existing or future PRC laws or regulations or if interpretations of those laws and regulations were to change, the business could be subject to fines and other financial penalties, have its licenses revoked or be forced to shut down entirely. In addition, if Joyo Amazon were unable to enforce its contractual relationships with respect to management and control of its business, it might be unable to continue to operate the business.

If We Do Not Successfully Optimize and Operate Our Fulfillment Centers, Our Business Could Be Harmed

Edgar Filing: AMAZON COM INC - Form 10-Q

If we do not adequately predict customer demand or otherwise optimize and operate our fulfillment centers successfully, it could result in excess or insufficient inventory or fulfillment capacity, result in increased costs, impairment charges, or both, or harm our business in other ways. A failure to optimize inventory will increase our net shipping cost by requiring long-zone or partial shipments. Orders from several of our websites are fulfilled primarily from a single location, and we have only a limited ability to reroute orders to third parties for drop-shipping. We and our co-sourcers may be unable to adequately staff our fulfillment and customer service centers. As we continue to add fulfillment and warehouse capability or add new businesses with different fulfillment requirements, our fulfillment network becomes increasingly complex and operating it becomes more challenging. If the other businesses on whose behalf we perform inventory fulfillment services deliver product to our fulfillment centers in excess of forecasts, we may be unable to secure sufficient storage space and may be unable to optimize our fulfillment centers. There can be no assurance that we will be able to operate our network effectively.

We rely on a limited number of shipping companies to deliver inventory to us and completed orders to our customers. If we are not able to negotiate acceptable terms with these companies or they experience performance problems or other difficulties, it could negatively impact our operating results and customer experience. In addition, our ability to receive inbound inventory efficiently and ship completed orders to customers also may be negatively affected by inclement weather, fire, flood, power loss, earthquakes, labor disputes, acts of war or terrorism, acts of God and similar factors.

Third parties either drop-ship or otherwise fulfill an increasing portion of our customers' orders, and we are increasingly reliant on the reliability, quality and future procurement of their services. Under some of our commercial agreements, we maintain the inventory of other companies, thereby increasing the complexity of tracking inventory and operating our fulfillment centers. Our failure to properly handle such inventory or the inability of these other companies to accurately forecast product demand would result in unexpected costs and other harm to our business and reputation.

Table of Contents

The Seasonality of Our Business Places Increased Strain on Our Operations

We expect a disproportionate amount of our net sales to occur during our fourth quarter. If we do not stock or restock popular products in sufficient amounts such that we fail to meet customer demand, it could significantly affect our revenue and our future growth. If we overstock products, we may be required to take significant inventory markdowns or write-offs, which could reduce profitability. We may experience an increase in our net shipping cost due to complimentary upgrades, split-shipments, and additional long-zone shipments necessary to ensure timely delivery for the holiday season. If too many customers access our websites within a short period of time due to increased holiday demand, we may experience system interruptions that make our websites unavailable or prevent us from efficiently fulfilling orders, which may reduce the volume of goods we sell and the attractiveness of our products and services. In addition, we may be unable to adequately staff our fulfillment and customer service centers during these peak periods and delivery and other fulfillment companies and customer service co-sourcers may be unable to meet the seasonal demand. We also face risks described elsewhere in this Item 1A relating to fulfillment center optimization and inventory.

We generally have payment terms with our vendors that extend beyond the amount of time necessary to collect proceeds from our customers. As a result of holiday sales, at December 31 of each year, our cash, cash equivalents, and marketable securities balances typically reach their highest level (other than as a result of cash flows provided by or used in investing and financing activities). This operating cycle results in a corresponding increase in accounts payable at December 31. Our accounts payable balance generally declines during the first three months of the year, resulting in a corresponding decline in our cash, cash equivalents, and marketable securities balances.

Our Business Could Suffer if We Are Unsuccessful in Making, Integrating, and Maintaining Commercial Agreements, Strategic Alliances, and Other Business Relationships

We provide e-commerce services to other businesses through our seller programs and other commercial agreements, strategic alliances and business relationships. Under these agreements, we provide technology, fulfillment and other services, as well as enable sellers to offer products or services through our websites and power their websites. These arrangements are complex and require substantial personnel and resource commitments by us, which may limit the agreements we are able to enter into and our ability to integrate and deliver services under them. If we fail to implement, maintain, and develop the components of these commercial relationships, which may include fulfillment, customer service, inventory management, tax collection, payment processing, licensing of third-party software, hardware, and content, and engaging third parties to perform hosting and other services, these initiatives may not be viable. The amount of compensation we receive under certain of these agreements is partially dependent on the volume of the other company's sales. Therefore, if the other company's offering is not successful, the compensation we receive may be lower than expected or the agreement may be terminated. Moreover, we may not be able to enter into additional commercial relationships and strategic alliances on favorable terms. We also may be subject to claims from businesses to which we provide these services if we are unsuccessful in implementing, maintaining or developing these services.

As our agreements terminate, we may be unable to renew or replace these agreements on comparable terms, or at all. We may in the future enter into amendments on less favorable terms or encounter parties that have difficulty meeting their contractual obligations to us, which could adversely affect our operating results.

Our present and future e-commerce services agreements, other commercial agreements, and strategic alliances create additional risks such as:

disruption of our ongoing business, including loss of management focus on existing businesses;

impairment of other relationships;

variability in revenue and income from entering into, amending, or terminating such agreements or relationships; and

difficulty integrating under the commercial agreements.

Our Business Could Suffer if We Are Unsuccessful in Making, Integrating, and Maintaining Acquisitions and Investments

Edgar Filing: AMAZON COM INC - Form 10-Q

We have acquired and invested in a number of companies, and we may acquire or invest in or enter into joint ventures with additional companies. These transactions create risks such as:

disruption of our ongoing business, including loss of management focus on existing businesses;

problems retaining key personnel;

additional operating losses and expenses of the businesses we acquired or in which we invested;

the potential impairment of tangible assets, such as inventory, and intangible assets and goodwill acquired in the acquisitions;

the potential impairment of customer and other relationships of the company we acquired or in which we invested or our own customers as a result of any integration of operations;

the difficulty of incorporating acquired technology and rights into our offerings and unanticipated expenses related to such integration;

Table of Contents

the difficulty of integrating a new company's accounting, financial reporting, management, information, human resource and other administrative systems to permit effective management, and the lack of control if such integration is delayed or not implemented;

the difficulty of implementing at companies we acquire the controls, procedures and policies appropriate for a larger public company;

potential unknown liabilities associated with a company we acquire or in which we invest; and

for foreign transactions, additional risks related to the integration of operations across different cultures and languages, and the economic, political, and regulatory risks associated with specific countries.

As a result of future acquisitions or mergers, we might need to issue additional equity securities, spend our cash, or incur debt, contingent liabilities, or amortization expenses related to intangible assets, any of which could reduce our profitability and harm our business. In addition, valuations supporting our acquisitions and strategic investments could change rapidly given the current global economic climate. We could determine that such valuations have experienced impairments or other-than-temporary declines in fair value which could adversely impact our financial results.

We Have Foreign Exchange Risk

The results of operations of, and certain of our intercompany balances associated with, our international websites are exposed to foreign exchange rate fluctuations. Upon translation, operating results may differ materially from expectations, and we may record significant gains or losses on the remeasurement of intercompany balances. As we have expanded our international operations, our exposure to exchange rate fluctuations has increased. We also hold cash equivalents and/or marketable securities primarily in Euros, Japanese Yen, and British Pounds. If the U.S. Dollar strengthens compared to these currencies, cash equivalents and marketable securities balances, when translated, may be materially less than expected and vice versa.

The Loss of Key Senior Management Personnel Could Negatively Affect Our Business

We depend on our senior management and other key personnel, particularly Jeffrey P. Bezos, our President, CEO, and Chairman. We do not have key person life insurance policies. The loss of any of our executive officers or other key employees could harm our business.

We Face Risks Related to System Interruption and Lack of Redundancy

We experience occasional system interruptions and delays that make our websites and services unavailable or slow to respond and prevent us from efficiently fulfilling orders or providing services to third parties, which may reduce our net sales and the attractiveness of our products and services. If we are unable to continually add software and hardware, effectively upgrade our systems and network infrastructure and take other steps to improve the efficiency of our systems, it could cause system interruptions or delays and adversely affect our operating results.

Our computer and communications systems and operations could be damaged or interrupted by fire, flood, power loss, telecommunications failure, earthquakes, acts of war or terrorism, acts of God, computer viruses, physical or electronic break-ins, and similar events or disruptions. Any of these events could cause system interruption, delays, and loss of critical data, and could prevent us from accepting and fulfilling customer orders and providing services, which could make our product and service offerings less attractive and subject us to liability. Our systems are not fully redundant and our disaster recovery planning may not be sufficient. In addition, we may have inadequate insurance coverage to compensate for any related losses. Any of these events could damage our reputation and be expensive to remedy.

We Face Significant Inventory Risk

In addition to risks described elsewhere in this Item 1A relating to fulfillment center and inventory optimization by us and third parties, we are exposed to significant inventory risks that may adversely affect our operating results as a result of seasonality, new product launches, rapid changes in product cycles and pricing, defective merchandise, changes in consumer demand and consumer spending patterns, changes in consumer tastes with respect to our products and other factors. We endeavor to accurately predict these trends and avoid overstocking or understocking products we manufacture and/or sell. Demand for products, however, can change significantly between the time inventory or components are ordered and the date of sale. In addition, when we begin selling or manufacturing a new product, it may be difficult to establish

Edgar Filing: AMAZON COM INC - Form 10-Q

vendor relationships, determine appropriate product or component selection, and accurately forecast demand. The acquisition of certain types of inventory or components may require significant lead-time and prepayment and they may not be returnable. We carry a broad selection and significant inventory levels of certain products, such as consumer electronics, and we may be unable to sell products in sufficient quantities or during the relevant selling seasons. Any one of the inventory risk factors set forth above may adversely affect our operating results.

Table of Contents

We May Not Be Able to Adequately Protect Our Intellectual Property Rights or May Be Accused of Infringing Intellectual Property Rights of Third Parties

We regard our trademarks, service marks, copyrights, patents, trade dress, trade secrets, proprietary technology, and similar intellectual property as critical to our success, and we rely on trademark, copyright, and patent law, trade secret protection, and confidentiality and/or license agreements with our employees, customers, and others to protect our proprietary rights. Effective intellectual property protection may not be available in every country in which our products and services are made available. We also may not be able to acquire or maintain appropriate domain names in all countries in which we do business. Furthermore, regulations governing domain names may not protect our trademarks and similar proprietary rights. We may be unable to prevent third parties from acquiring domain names that are similar to, infringe upon, or diminish the value of our trademarks and other proprietary rights.

We may not be able to discover or determine the extent of any unauthorized use of our proprietary rights. Third parties that license our proprietary rights also may take actions that diminish the value of our proprietary rights or reputation. The protection of our intellectual property may require the expenditure of significant financial and managerial resources. Moreover, the steps we take to protect our intellectual property may not adequately protect our rights or prevent third parties from infringing or misappropriating our proprietary rights. We also cannot be certain that others will not independently develop or otherwise acquire equivalent or superior technology or other intellectual property rights.

Other parties also may claim that we infringe their proprietary rights. We have been subject to, and expect to continue to be subject to, claims and legal proceedings regarding alleged infringement by us of the intellectual property rights of third parties. Such claims, whether or not meritorious, may result in the expenditure of significant financial and managerial resources, injunctions against us or the payment of damages. We may need to obtain licenses from third parties who allege that we have infringed their rights, but such licenses may not be available on terms acceptable to us or at all. In addition, we may not be able to obtain or utilize on terms that are favorable to us, or at all, licenses or other rights with respect to intellectual property we do not own in providing e-commerce services to other businesses and individuals under commercial agreements. These risks have been amplified by the increase in third parties whose sole or primary business is to assert such claims.

Our digital content offerings depend in part on effective digital rights management technology to control access to digital content. If the digital rights management technology that we use is compromised or otherwise malfunctions, we could be subject to claims, and content providers may be unwilling to include their content in our service.

We Have a Rapidly Evolving Business Model and Our Stock Price Is Highly Volatile

We have a rapidly evolving business model. The trading price of our common stock fluctuates significantly in response to, among other risks, the risks described elsewhere in this Item 1A, as well as:

changes in interest rates;

conditions or trends in the Internet and the e-commerce industry;

quarterly variations in operating results;

fluctuations in the stock market in general and market prices for Internet-related companies in particular;

changes in financial estimates by us or securities analysts and recommendations by securities analysts;

changes in our capital structure, including issuance of additional debt or equity to the public;

changes in the valuation methodology of, or performance by, other e-commerce or technology companies; and

transactions in our common stock by major investors and certain analyst reports, news, and speculation.

Volatility in our stock price could adversely affect our business and financing opportunities and force us to increase our cash compensation to employees or grant larger stock awards than we have historically, which could hurt our operating results or reduce the percentage ownership of our existing stockholders, or both.

Government Regulation Is Evolving and Unfavorable Changes Could Harm Our Business

We are subject to general business regulations and laws, as well as regulations and laws specifically governing the Internet, e-commerce, and electronic devices. Existing and future laws and regulations may impede our growth. These regulations and laws may cover taxation, privacy, data protection, pricing, content, copyrights, distribution, mobile communications, electronic device certification, electronic waste, electronic contracts and other communications, consumer protection, web services, the provision of online payment services, unencumbered Internet access to our services, the design and operation of websites, and the characteristics and quality of products and services. It is not clear how existing laws governing issues such as property ownership, libel, and personal privacy apply to the Internet, e-commerce, digital content and web services. Jurisdictions may regulate consumer-to-consumer online businesses, including certain aspects of our seller programs. Unfavorable regulations and laws could diminish the demand for our products and services and increase our cost of doing business.

Taxation Risks Could Subject Us to Liability for Past Sales and Cause Our Future Sales to Decrease

We do not collect sales or other taxes on shipments of most of our goods into most states in the U.S. Under some of our commercial agreements, the other company is the seller of record, and we are obligated to collect sales tax in accordance with that

Table of Contents

company's instructions. We may enter into additional agreements requiring similar tax collection obligations. Our fulfillment center and customer service center networks, and any future expansion of them, along with other aspects of our evolving business, may result in additional sales and other tax obligations.

Currently, U.S. Supreme Court decisions restrict the imposition of obligations to collect state and local sales and use taxes with respect to sales made over the Internet. However, a number of states, as well as the U.S. Congress, have been considering or adopted initiatives that could limit or supersede the Supreme Court's position regarding sales and use taxes on Internet sales. If these initiatives are successful, we could be required to collect sales and use taxes in additional states or change our business practices. The imposition by state and local governments of various taxes upon Internet commerce could create administrative burdens for us, put us at a competitive disadvantage if they do not impose similar obligations on all of our online competitors and decrease our future sales.

We collect consumption tax (including value added tax, goods and services tax, and provincial sales tax) as applicable on goods and services sold by us that are ordered on our international sites. Additional foreign countries may seek to impose sales or other tax collection obligations on us.

A successful assertion by one or more states or foreign countries that we should collect sales or other taxes on the sale of merchandise or services could result in substantial tax liabilities for past sales, decrease our ability to compete with traditional retailers, and otherwise harm our business.

We Could be Subject to Additional Income Tax Liabilities

We are subject to income taxes in the United States and numerous foreign jurisdictions. Significant judgment is required in evaluating and estimating our worldwide provision and accruals for these taxes. During the ordinary course of business, there are many transactions for which the ultimate tax determination is uncertain. For example, our effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, by changes in foreign currency exchange rates, entry into new businesses and geographies and changes to our existing businesses, acquisitions, by changes in the valuation of our deferred tax assets and liabilities, or by changes in the relevant tax, accounting and other laws, regulations, principles and interpretations. We are subject to audit in various jurisdictions, and such jurisdictions may assess additional income tax against us. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different from our historical income tax provisions and accruals. The results of an audit or litigation could have a material effect on our operating results or cash flows in the period or periods for which that determination is made, as well as prior and subsequent periods.

Our Supplier Relationships Subject Us to a Number of Risks

We have significant suppliers, including licensors, that are important to our sourcing, manufacturing and any related ongoing servicing of merchandise and content. We do not have long-term arrangements with most of our suppliers to guarantee availability of merchandise, content, components or services, particular payment terms, or the extension of credit limits. If our current suppliers were to stop selling or licensing merchandise, content, components or services to us on acceptable terms, or delay delivery, including as a result of one or more supplier bankruptcies due to poor economic conditions, as a result of natural disasters or for other reasons, we may be unable to procure alternatives from other suppliers in a timely and efficient manner and on acceptable terms, or at all.

We May be Subject to Risks Related to Government Contracts and Related Procurement Regulations

Our contracts with U.S., as well as state, local and foreign, government entities are subject to various procurement regulations and other requirements relating to their formation, administration and performance. We may be subject to audits and investigations relating to our government contracts and any violations could result in various civil and criminal penalties and administrative sanctions, including termination of contract, refunding or suspending of payments, forfeiture of profits, payment of fines and suspension or debarment from future government business. In addition, such contracts may provide for termination by the government at any time, without cause.

We May Be Subject to Product Liability Claims if People or Property Are Harmed by the Products We Sell

Some of the products we sell or manufacture may expose us to product liability claims relating to personal injury, death, or environmental or property damage, and may require product recalls or other actions. Certain third parties also sell products using our e-commerce platform that may increase our exposure to product liability claims, such as if these sellers do not have sufficient protection from such claims. Although we maintain liability insurance, we cannot be certain that our coverage will be adequate for liabilities actually incurred or that insurance will continue to be available to us on economically reasonable terms, or at all. In addition, some of our agreements with our vendors and sellers do

not indemnify us from product liability.

We Are Subject to Payments-Related Risks

We accept payments using a variety of methods, including credit card, debit card, credit accounts (including promotional financing), gift certificates, direct debit from a customer's bank account, consumer invoicing, physical bank check and payment upon delivery. As we offer new payment options to our customers, we may be subject to additional regulations, compliance requirements,

Table of Contents

and fraud. For certain payment methods, including credit and debit cards, we pay interchange and other fees, which may increase over time and raise our operating costs and lower profitability. We rely on third parties to provide payment processing services, including the processing of credit cards, debit cards, electronic checks, and promotional financing, and it could disrupt our business if these companies become unwilling or unable to provide these services to us. We are also subject to payment card association operating rules, certification requirements and rules governing electronic funds transfers, which could change or be reinterpreted to make it difficult or impossible for us to comply. If we fail to comply with these rules or requirements, we may be subject to fines and higher transaction fees and lose our ability to accept credit and debit card payments from our customers, process electronic funds transfers, or facilitate other types of online payments, and our business and operating results could be adversely affected. We also offer co-branded credit card programs that represent a significant component of our services revenue. If one or more of these agreements are terminated and we are unable to replace them on similar terms, or at all, it could adversely affect our operating results.

In addition, we qualify as a money services business in certain jurisdictions because we enable customers to keep account balances with us and transfer money to third parties, and because we provide services to third parties to facilitate payments on their behalf. In these jurisdictions, we may be subject to requirements for licensing, regulatory inspection, bonding, the handling of transferred funds and consumer disclosures. We are also subject to or voluntarily comply with a number of other laws and regulations relating to money laundering, international money transfers, privacy and information security and electronic fund transfers. If we were found to be in violation of applicable laws or regulations, we could be subject to civil and criminal penalties or forced to cease our payments services business.

We Could Be Liable for Breaches of Security

Although we have developed systems and processes that are designed to protect customer information and prevent fraudulent transactions, data loss and other security breaches, failure to prevent or mitigate such breaches may adversely affect our operating results.

We Could Be Liable for Fraudulent or Unlawful Activities of Sellers

The law relating to the liability of providers of online payment services is currently unsettled. In addition, governmental agencies could require changes in the way this business is conducted. Under our seller programs, we may be unable to prevent sellers from collecting payments, fraudulently or otherwise, when buyers never receive the products they ordered or when the products received are materially different from the sellers' descriptions. Under our A2Z Guarantee, we reimburse buyers for payments up to certain limits in these situations, and as our marketplace seller sales grow, the cost of this program will increase and could negatively affect our operating results. We also may be unable to prevent sellers on our sites or through other seller sites from selling unlawful goods, from selling goods in an unlawful manner, or violating the proprietary rights of others, and could face civil or criminal liability for unlawful activities by our sellers.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Reserved

Not applicable.

Item 5. Other Information

None.
