Forward-Looking Statements

This Quarterly Report on Form 10-Q, other periodic reports filed by Regions Financial Corporation (Regions) under the Securities Exchange Act of 1934, as amended, and any other written or oral statements made by or on behalf of Regions may include forward-looking statements. The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements which are identified as such and are accompanied by the identification of important factors that could cause actual results to differ materially from the forward-looking statements. For these statements, we, together with our subsidiaries, unless the context implies otherwise, claim the protection afforded by the safe harbor in the Act. Forward-looking statements are not based on historical information, but rather are related to future operations, strategies, financial results or other developments. Forward-looking statements are based on management's expectations as well as certain assumptions and estimates made by, and information available to, management at the time the statements are made. Those statements are based on general assumptions and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and projections expressed in such statements. These risks, uncertainties and other factors include, but are not limited to, those described below:

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) became law on July 21, 2010, and a number of legislative, regulatory and tax proposals remain pending. Additionally, the U.S. Treasury and federal banking regulators continue to implement, but are also beginning to wind down, a number of programs to address capital and liquidity in the banking system. Proposed rules, including those that are part of the Basel III process, could require banking institutions to increase levels of capital. All of the foregoing may have significant effects on Regions and the financial services industry, the exact nature and extent of which cannot be determined at this time.

Regions' ability to mitigate the impact of the Dodd-Frank Act on debit interchange fees through revenue enhancements and other revenue measures, which will depend on various factors, including the acceptance by customers of modified fee structures for Regions' products and services.

The impact of compensation and other restrictions imposed under the Troubled Asset Relief Program (TARP) until Regions repays the outstanding preferred stock and warrant issued under the TARP, including restrictions on Regions' ability to attract and retain talented executives and associates.

Possible additional loan losses, impairment of goodwill and other intangibles, and adjustment of valuation allowances on deferred tax assets and the impact on earnings and capital.

Possible changes in interest rates may increase funding costs and reduce earning asset yields, thus reducing margins. Increases in benchmark interest rates would also increase debt service requirements for customers whose terms include a variable interest rate, which may negatively impact the ability of borrowers to pay as contractually obligated.

Possible changes in general economic and business conditions in the United States in general and in the communities Regions serves in particular, including any prolonging or worsening of the current unfavorable economic conditions, including unemployment levels.

Possible changes in the creditworthiness of customers and the possible impairment of the collectability of loans.

Possible changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies, and similar organizations, may have an adverse effect on business.

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

The current stresses in the financial and real estate markets, including possible continued deterioration in property values.

Regions' ability to manage fluctuations in the value of assets and liabilities and off-balance sheet exposure so as to maintain sufficient capital and liquidity to support Regions' business.

Table of Contents

Regions' ability to expand into new markets and to maintain profit margins in the face of competitive pressures.

Regions' ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by Regions' customers and potential customers.

Regions' ability to keep pace with technological changes.

Regions' ability to effectively manage credit risk, interest rate risk, market risk, operational risk, legal risk, liquidity risk, and regulatory and compliance risk.

Regions' ability to ensure adequate capitalization which is impacted by inherent uncertainties in forecasting credit losses.

The cost and other effects of material contingencies, including litigation contingencies, and any adverse judicial, administrative, or arbitral rulings or proceedings.

The effects of increased competition from both banks and non-banks.

The effects of geopolitical instability and risks such as terrorist attacks.

Possible changes in consumer and business spending and saving habits could affect Regions' ability to increase assets and to attract deposits.

The effects of weather and natural disasters such as floods, droughts, wind, tornadoes and hurricanes, and the effects of man-made disasters.

Possible downgrades in ratings issued by rating agencies.

Potential dilution of holders of shares of Regions' common stock resulting from the U.S. Treasury's investment in TARP.

Possible changes in the speed of loan prepayments by Regions' customers and loan origination or sales volumes.

Possible acceleration of prepayments on mortgage-backed securities due to low interest rates, and the related acceleration of premium amortization on those securities.

The effects of problems encountered by larger or similar financial institutions that adversely affect Regions or the banking industry generally.

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Regions' ability to receive dividends from its subsidiaries.

The effects of the failure of any component of Regions' business infrastructure which is provided by a third party.

Changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies.

The effects of any damage to Regions' reputation resulting from developments related to any of the items identified above.

The words "believe," "expect," "anticipate," "project," and similar expressions often signify forward-looking statements. You should not place undue reliance on any forward-looking statements, which speak only as of the date made. We assume no obligation to update or revise any forward-looking statements that are made from time to time.

See also the "Forward-Looking Statements" and "Risk Factors" sections of Regions' Annual Report on Form 10-K for the year ended December 31, 2010 and the "Forward-Looking Statements" section of Regions' Quarterly Reports on Form 10-Q for the quarters ended March 31, 2011 and June 30, 2011, as filed with the Securities and Exchange Commission.

REGIONS FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Three and Nine Months Ended September 30, 2011 and 2010

NOTE 1 Basis of Presentation

Regions Financial Corporation (Regions or the Company) provides a full range of banking and bank-related services to individual and corporate customers through its subsidiaries and branch offices located primarily in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. The Company is subject to competition from other financial institutions, is subject to the regulations of certain government agencies and undergoes periodic examinations by those regulatory authorities.

The accounting and reporting policies of Regions and the methods of applying those policies that materially affect the consolidated financial statements conform with accounting principles generally accepted in the United States (GAAP) and with general financial services industry practices. The accompanying interim financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and notes to the consolidated financial statements necessary for a complete presentation of financial position, results of operations and cash flows in conformity with GAAP. In the opinion of management, all adjustments, consisting of normal and recurring items, necessary for the fair presentation of the consolidated financial statements have been included. These interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto in Regions Form 10-K for the year ended December 31, 2010.

Regions has evaluated all subsequent events for potential recognition and disclosure through the filing date of this Form 10-Q.

Certain amounts in prior period financial statements have been reclassified to conform to the current period presentation. These reclassifications are immaterial and have no effect on net income, total assets or stockholders equity.

Table of Contents**NOTE 2 Securities**

There was no gross unrealized loss on debt securities held to maturity at either September 30, 2011 or December 31, 2010.

For the securities included in the tables above, management does not believe any individual unrealized loss, which was comprised of 229 securities and 292 securities at September 30, 2011 and December 31, 2010, respectively, represented an other-than-temporary impairment as of those dates. The Company does not intend to sell, and it is not likely that the Company will be required to sell, the securities before the recovery of their amortized cost basis, which may be at maturity.

Proceeds from sale, gross gains and gross losses on sales of securities available for sale are shown in the table below. The cost of securities sold is based on the specific identification method.

Total investor real estate	11,884	15,908	17,464
Residential first mortgage	14,083	14,898	15,723
Home equity	13,316	14,226	14,534
Indirect	1,774	1,592	1,657
Consumer credit card	1,024		
Other consumer	1,200	1,184	1,169
Total consumer	31,397	31,900	33,083
	\$ 79,447	\$ 82,864	\$ 84,420

In June 2011, Regions completed the purchase of approximately \$1.2 billion of Regions-branded credit card accounts from FIA Card Services. The purchase included approximately \$1.1 billion in consumer credit card accounts and approximately \$0.1 billion in small business credit card accounts, which are included in the commercial and industrial portfolio class. During the third quarter of 2011, the allocation to the purchased credit card relationship intangibles was adjusted to approximately \$170 million. Approximately \$84 million was allocated to the allowance for loan losses.

During the three and nine months ended September 30, 2011, Regions purchased approximately \$173 million and \$509 million, respectively, in indirect loans from a third party.

ALLOWANCE FOR CREDIT LOSSES

The allowance for credit losses represents management's estimate of credit losses inherent in the loan and credit commitment portfolios as of period-end. The allowance for credit losses consists of two components: the allowance for loan and lease losses and the reserve for unfunded credit commitments. Management's assessment of the appropriateness of the allowance for credit losses is based on a combination of both of these components. Regions determines its allowance for credit losses in accordance with applicable accounting literature as well as regulatory guidance related to receivables and contingencies. Binding unfunded credit commitments include items such as letters of credit, financial

guarantees and binding unfunded loan commitments.

Table of Contents

Prior to 2011, the allowance for accruing commercial and investor real estate loans, as well as non-accrual loans in those portfolio segments below \$2.5 million, was determined using categories of pools of loans with similar risk characteristics (i.e., pass, special mention, substandard accrual, and non-accrual, as defined below). These categories were utilized to develop the associated allowance for loan losses using historical losses adjusted for current economic conditions. Beginning in 2011, these pools of loans were compiled at a more granular level. A probability of default and a loss given default were statistically calculated for each pool. These parameters, in combination with other account data and assumptions, were used to calculate the estimate of incurred loss. The Company made the change to provide enhanced segmentation, process controls, transparency, governance and information technology controls. Additionally, beginning in the third quarter of 2011, for accruing impaired commercial and investor real estate loans (i.e., troubled debt restructurings, or "TDRs", which carry an accruing risk rating) and for non-accrual commercial and investor real estate loans less than \$2.5 million, Regions based the allowance for loan losses on a discounted cash flow analysis performed at the note level, where projected cash flows reflect credit losses based on statistical information derived from loans with similar risk characteristics (e.g., risk rating and product type). The changes did not have a material impact on the overall allowance for credit losses. The credit quality indicators for commercial and investor real estate loans disclosed in the tables below provide additional information regarding the underlying credit quality of Regions' portfolio segments and classes, and the corresponding impact on the allowance for credit losses.

The components of the calculation of the allowance for credit losses related to non-accrual commercial and investor real estate loans equal to or greater than \$2.5 million, unfunded commitments, and all consumer loans were calculated in 2011 in the same manner as before. For non-accrual commercial and investor real estate loans equal to or greater than \$2.5 million, the allowance for loan losses is based on a specific evaluation, considering the facts and circumstances specific to each obligation.

Except for the changes to the calculation of the allowance for loan losses for commercial and investor real estate loans as described above, there were no changes to Regions' allowance process or accounting policies related to the allowance for credit losses from those described in the Annual Report on Form 10-K for the year ended December 31, 2010.

Management considers the current level of allowance for credit losses appropriate to absorb losses inherent in the loan portfolio and unfunded commitments. Management's determination of the appropriateness of the allowance for credit losses, which is based on the factors and risk identification procedures previously discussed, requires the use of judgments and estimations that may change in the future. Changes in the factors used by management to determine the appropriateness of the allowance or the availability of new information could cause the allowance for credit losses to be adjusted in future periods.

Table of Contents**ROLLFORWARD OF ALLOWANCE FOR CREDIT LOSSES**

The following tables present an analysis of the allowance for credit losses by portfolio segment for the three and nine months ended September 30, 2011. The total allowance for credit losses is then disaggregated to show the amounts derived through individual evaluation and the amounts calculated through collective evaluation. The allowance for credit losses related to individually evaluated loans includes reserves for non-accrual loans and leases equal to or greater than \$2.5 million. The allowance for credit losses related to collectively evaluated loans includes the remainder of the loan portfolio.

Table of Contents

PORTFOLIO SEGMENT RISK FACTORS

The following describe the risk characteristics relevant to each of the portfolio segments.

Commercial The commercial loan portfolio segment includes commercial and industrial loans to commercial customers for use in normal business operations to finance working capital needs, equipment purchases or other expansion projects. Commercial also includes owner-occupied commercial real estate loans to operating businesses, which are loans for long-term financing of land and buildings, and are repaid by cash flow generated by business operations. Owner-occupied construction loans are made to commercial businesses for the development of land or construction of a building where the repayment is derived from revenues generated from the business of the borrower. Collection risk in this portfolio is driven by the creditworthiness of underlying borrowers, particularly cash flow from customers' business operations.

Investor Real Estate Loans for real estate development are repaid through cash flow related to the operation, sale or refinance of the property. This portfolio segment includes extensions of credit to real estate developers or investors where repayment is dependent on the sale of real estate or income generated from the real estate collateral. A portion of Regions' investor real estate portfolio segment is comprised of loans secured by residential product types (land, single-family and condominium loans) within Regions' markets. Additionally, these loans are made to finance income-producing properties such as apartment buildings, office and industrial buildings, and retail shopping centers. Loans in this portfolio segment are particularly sensitive to valuation of real estate.

Consumer The consumer loan portfolio segment includes residential first mortgage, home equity, indirect, consumer credit card, and other consumer loans. Residential first mortgage loans represent loans to consumers to finance a residence. These loans are typically financed over a 15 to 30 year term and, in most cases, are extended to borrowers to finance their primary residence. Home equity lending includes both home equity loans and lines of credit. This type of lending, which is secured by a first or second mortgage on the borrower's residence, allows customers to borrow against the equity in their home. Real estate market values as of the time the loan or line is secured directly affect the amount of credit extended and, in addition, changes in these values impact the depth of potential losses. Indirect lending, which is lending initiated through third-party business partners, is largely comprised of loans made through automotive dealerships. Consumer credit card includes approximately 500,000 Regions branded consumer credit card accounts purchased late in the second quarter of 2011 from FIA Card Services. Other consumer loans include direct consumer installment loans, overdrafts and educational loans. Loans in this portfolio segment are sensitive to unemployment and other key consumer economic measures.

CREDIT QUALITY INDICATORS

The following tables present credit quality indicators for the loan portfolio segments and classes, excluding loans held for sale, as of September 30, 2011, December 31, 2010 and September 30, 2010. Commercial and investor real estate loan classes are detailed by categories related to underlying credit quality and probability of default. These categories are utilized to develop the associated allowance for credit losses.

Pass includes obligations where the probability of default is considered low;

Special Mention includes obligations that have potential weakness which may, if not reversed or corrected, weaken the credit or inadequately protect the Company's position at some future date. Obligations in this category may also be subject to economic or market conditions which may, in the future, have an adverse effect on debt service ability;

Substandard Accrual includes obligations that exhibit a well-defined weakness which presently jeopardizes debt repayment, even though they are currently performing. These obligations are characterized by the distinct possibility that the Company may incur a loss in the future if these weaknesses are not corrected;

Non-accrual includes obligations where management has determined that full payment of principal and interest is in doubt.

Table of Contents

Substandard accrual and non-accrual loans are often collectively referred to as classified. Special mention, substandard accrual, and non-accrual loans are often collectively referred to as criticized and classified.

Classes in the consumer portfolio segment are disaggregated by accrual status. The associated allowance for credit losses is generally based on historical losses of the various classes adjusted for current economic conditions.
