COMPLETE PRODUCTION SERVICES, INC.

Notes to Consolidated Financial Statements

(Unaudited, in thousands, except share and per share data)

1. General:

(a) Nature of operations:

Complete Production Services, Inc. is a provider of specialized services and products focused on developing hydrocarbon reserves, reducing operating costs and enhancing production for oil and gas companies. Complete Production Services, Inc. focuses its operations on basins within North America and manages its operations from regional field service facilities located throughout the U.S. Rocky Mountain region, Texas, Oklahoma, Louisiana, Arkansas, Pennsylvania, western Canada and Mexico. We also had operations in Southeast Asia.

References to Complete, the Company, we, our and similar phrases used throughout this Quarterly Report on Form 10-Q relate collectively to Complete Production Services, Inc. and its consolidated affiliates.

On April 21, 2006, our common stock began trading on the New York Stock Exchange under the symbol CPX .

(b) Basis of presentation:

The unaudited interim consolidated financial statements reflect all normal recurring adjustments that are, in the opinion of management, necessary for a fair statement of the financial position of Complete as of September 30, 2011 and the statements of operations and the statements of comprehensive income for the quarters and nine-month periods ended September 30, 2011 and 2010, as well as the statement of stockholders equity for the nine months ended September 30, 2011 and the statements of cash flows for the nine months ended September 30, 2011 and 2010. Certain information and disclosures normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been condensed or omitted. These unaudited interim consolidated financial statements should be read in conjunction with our audited consolidated financial statements and the notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2010 filed with the Securities and Exchange Commission on February 18, 2011. We believe that these financial statements contain all adjustments necessary so that they are not misleading.

In preparing financial statements, we make informed judgments and estimates that affect the reported amounts of assets and liabilities as of the date of the financial statements and affect the reported amounts of revenues and expenses during the reporting period. We review our estimates on an on-going basis, including those related to impairment of long-lived assets and goodwill, contingencies and income taxes. Changes in facts and circumstances may result in revised estimates and actual results may differ from these estimates.

The results of operations for interim periods are not necessarily indicative of the results of operations that could be expected for the full year.

(c) Discontinued operations:

On July 6, 2011, we sold our Southeast Asian products business, through which we provided oilfield equipment sales, rentals and refurbishment services, to MTQ Corporation Limited (MTQ), a Singapore firm which provides engineering services to oilfield and industrial equipment users and manufacturers. Proceeds from the sale of this business totaled \$21,913, of which \$2,613 represented cash on hand at July 6, 2011 which was transferred to us in October 2011 pursuant to the final settlement. We recorded a loss on the sale of this business of \$136 as of September 30, 2011. See Note 10, Discontinued operations.

Table of Contents**2. Business acquisition:**

On May 11, 2011, we completed the purchase of the hydraulic snubbing and production testing assets of a business with operations in the Marcellus, Eagle Ford and Barnett Shales. We paid a total of \$15,576 in cash for these assets, which included goodwill of \$4,433. The entire purchase price was allocated to the completion and production services business segment. We believe this acquisition will supplement our hydraulic snubbing and production testing service offerings in Pennsylvania and Texas. The following table summarizes our preliminary purchase price allocation for this acquisition as of September 30, 2011:

Net assets acquired:	
Other current assets	\$ 725
Property, plant and equipment	5,868
Current liabilities	(10)
Intangible assets	4,560
Goodwill	4,433
Net assets acquired	\$ 15,576
Consideration:	
Cash, net of cash and cash equivalents acquired	\$ 15,576

The purchase price of this acquired business was negotiated as an arm's length transaction with the seller. We use various valuation techniques, including an earnings multiple approach, to evaluate acquisition targets. We also consider precedent transactions which we have undertaken and similar transactions of others in our industry. We determine the fair value of assets acquired, including identifiable intangible assets, and evaluate property, plant and equipment acquired based upon, at minimum, the replacement cost of the assets, by applying valuation techniques and by obtaining other supporting documentation from third-party consultants.

This acquisition was not deemed to be significant to our overall results for the nine months ended September 30, 2011, therefore no pro forma disclosure of the impact of this acquisition has been provided.

3. Accounts receivable:

	September 30, 2011	December 31, 2010
Trade accounts receivable	\$ 332,169	\$ 249,998
Related party receivables	38,285	51,046
Unbilled revenue	65,257	42,747
Other receivables	3,749	2,353
	439,460	346,144
Allowance for doubtful accounts	3,865	4,160
	\$ 435,595	\$ 341,984

Of the related party receivables at September 30, 2011 and December 31, 2010, \$37,722 and \$50,048, respectively, related to amounts due from a company for which one of our directors has an ownership interest and serves as chief executive officer and chairman of the board.

4. Inventory:

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

	September 30, 2011	December 31, 2010
Finished goods	\$ 15,565	\$ 13,497

Work in process	1,663	1,282
	37,395	30,842
Inventory reserves	1,109	2,453
	\$ 36,286	\$ 28,389

Table of Contents**5. Property, plant and equipment:**

	Cost	Accumulated Depreciation	Net Book Value
September 30, 2011			
Land	\$ 11,357	\$	\$ 11,357
Buildings	36,310	5,385	30,925
Field equipment	1,575,633	748,501	827,132
Vehicles	126,227	67,577	58,650
Office furniture and computers	21,995	13,603	8,392
Leasehold improvements	22,749	7,609	15,140
Construction in progress	122,229		122,229
	\$ 1,916,500	\$ 842,675	\$ 1,073,825

	Cost	Accumulated Depreciation	Net Book Value
December 31, 2010			
Land	\$ 8,475	\$	\$ 8,475
Buildings	32,083	4,456	27,627
Field equipment	1,437,343	639,282	798,061
Vehicles	128,098	57,930	70,168
Office furniture and computers	17,938	11,712	6,226
Leasehold improvements	22,503	6,007	16,496
Construction in progress	23,879		23,879
	\$ 1,670,319	\$ 719,387	\$ 950,932

Construction in progress at September 30, 2011 and December 31, 2010 primarily included progress payments to vendors for equipment to be delivered in future periods and component parts to be used in the final assembly of operating equipment, which in all cases were not yet placed into service at the time. Significant assets included in construction in progress at September 30, 2011 included a Marcellus Frac fleet, two drilling rigs and coiled tubing assets. For the quarter and nine months ended September 30, 2011, we recorded capitalized interest of \$922 and \$1,978, respectively, related to assets that we are constructing for internal use and amounts paid to vendors under progress payments for assets that are being constructed on our behalf.

In August 2011, we sold a water evaporation facility located in Wyoming. The net book value of this asset totaled \$1,174. Proceeds received from the sale totaled \$620, resulting in a loss of \$554 on the transaction.

In conjunction with our impairment testing of long-term assets at December 31, 2010, we noted approximately \$5,814 of salvage value assigned to various coiled tubing and wireline assets at one of our operating divisions. Although we evaluated these assets and the assets of the overall reporting unit for recoverability and noted no significant impairment based on an undiscounted cash flow projection, we believe that the salvage value assigned to these assets was no longer appropriate. These assets were acquired several years ago, and we believe the estimate for salvage value used at that time was appropriate. However, increasingly, our business is focusing on larger-diameter coiled tubing units and more technologically-advanced equipment. As such, effective January 1, 2011, we changed our estimate of salvage value to zero and are depreciating these assets over their remaining useful lives, which we determined to be an average of 1.3 years. This change in estimate has been applied prospectively and is expected to increase our depreciation expense over the next five years as follows: 2011 \$4,867; 2012 \$789; 2013 \$134 and 2014 \$24.

6. Notes payable:

We entered into a note arrangement to finance certain of our annual insurance premiums for the policy term from May 1, 2009 to April 2010. Our accounting policy has been to record a prepaid asset associated with certain of these policies which is amortized over the term and which

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

takes into account actual premium payments and deposits made to date, to record an accrued liability for premiums which are contractually committed for the policy term and to make monthly premium payments in accordance with our premium commitments and monthly note payments for amounts financed. For the nine months ended September 30, 2010, we paid \$1,069 under this note payable arrangement. Effective May 1, 2011 and 2010, we renewed our annual insurance premiums for the respective twelve-month terms, but chose to prepay our premiums for certain insurance coverages rather than finance such premiums as in prior renewals.

Table of Contents**7. Long-term debt:**

The following table summarizes long-term debt as of September 30, 2011 and December 31, 2010:

	2011	2010
Revolving credit facility (a)	\$	\$
8.0% senior notes (b)	650,000	650,000
	\$ 650,000	\$ 650,000

(a) Prior to June 13, 2011, we maintained a senior secured facility (the Amended Credit Agreement) with Wells Fargo Bank, National Association, as U.S. Administrative Agent, HSBC Bank Canada, as Canadian Administrative Agent, and certain other financial institutions which was structured as an asset-based facility subject to borrowing base restrictions. In connection with the facility, Wells Fargo Capital Finance, LLC (formerly known as Wells Fargo Foothill, LLC) served as U.S. Administrative Agent and also served as U.S. Issuing Lender and U.S. Swingline Lender. The Amended Credit Agreement provided for a U.S. revolving credit facility of up to \$225,000 that was to mature in December 2011 and a Canadian revolving credit facility of up to \$15,000 (with Integrated Production Services Ltd., one of our wholly-owned subsidiaries, as the borrower thereof (Canadian Borrower)) that was to mature in December 2011. The Amended Credit Agreement included a provision for a commitment increase, as defined therein, which permitted us to effect up to two separate increases in the aggregate commitments under the Amended Credit Agreement by designating one or more existing lenders or other banks or financial institutions, subject to the bank's sole discretion as to participation, to provide additional aggregate financing up to \$75,000, with each committed increase equal to at least \$25,000 in the U.S., or \$5,000 in Canada, and in accordance with other provisions as stipulated in the Amended Credit Agreement. Certain portions of the credit facilities were available to be borrowed in U.S. dollars, Canadian dollars and other currencies approved by the lenders. Subject to certain limitations set forth in the Amended Credit Agreement, we had the ability to elect how interest under the Amended Credit Agreement would be computed. Interest under the Amended Credit Agreement could be determined by reference to (1) the London Inter-bank Offered Rate, or LIBOR, plus an applicable margin between 3.75% and 4.25% per annum (with the applicable margin depending upon our Excess Availability Amount, as defined in the Amended Credit Agreement) or (2) the Base Rate (which means the higher of the Prime Rate, Federal Funds Rate plus 0.50%, 3 month LIBOR plus 1.00% and 3.50%), plus the applicable margin, as described above. If an event of default existed or continued under the Amended Credit Agreement, advances would bear interest as described above with an applicable margin rate of 4.25% plus 2.00%. Interest was payable monthly.

We incurred unused commitment fees under the Amended Credit Agreement ranging from 0.50% to 1.00% based on the average daily balance of amounts outstanding.

Letters of credit outstanding under the Amended Credit Agreement incurred fees equal to the applicable margin, as described above. If an event of default existed or continued, such fee would have been equal to the applicable margin plus 2.00%.

Under the Amended Credit Agreement, the only financial covenant to which we were subject was a Fixed Charge Coverage Ratio covenant, which must have exceeded 1.10 to 1.00. This covenant became effective only if our Excess Availability Amount, as defined under the Amended Credit Agreement, plus certain qualified cash and cash equivalents is less than \$50,000.

For a further description of the terms of our Amended Credit Agreement, including the provisions to calculate our U.S. and Canadian borrowing base, financial covenants requirements and events of default, see our Annual Report on Form 10-K for the year ended December 31, 2010.

Table of Contents

New Credit Agreement, effective June 13, 2011:

On June 13, 2011, we entered into a Third Amended and Restated Credit Agreement among us, a subsidiary of the Company that is designated as a borrower under the Canadian facility, if any (the Canadian Borrower), the lenders party thereto, Wells Fargo Bank, National Association, as the U.S. administrative agent, U.S. issuing lender and U.S. swingline lender, and the other persons from time to time party thereto (the New Credit Agreement), which amends and restates the Amended Credit Agreement. Defined terms not otherwise described herein shall have the meanings given to them in the New Credit Agreement.

The New Credit Agreement modifies the Amended Credit Agreement by, among other things:

changing the structure of the credit facility from an asset-based facility to a cash flow facility;

substituting Wells Fargo Bank, National Association, for Wells Fargo Capital Finance, LLC (f/k/a Wells Fargo Foothill, LLC), as U.S. administrative agent, and appointing Wells Fargo Bank, National Association, as U.S. issuing lender and U.S. swingline lender; and

increasing our U.S. revolving credit facility from \$225,000 to \$300,000 and terminating the existing Canadian revolving credit facility (subject to our option to convert and reallocate any portion of the U.S. revolving credit facility then held by HSBC Bank USA, N.A., into a Canadian revolving credit facility upon satisfaction of certain conditions, including obtaining the consent of HSBC Bank USA, N.A., to such conversion and reallocation)

Subject to certain limitations set forth in the New Credit Agreement, we have the option to determine how interest is computed by reference to either (i) the London Inter-bank Offered Rate, or LIBOR, plus an applicable margin between 2.25% and 3.00% based on the Total Debt Leverage Ratio (as defined in the New Credit Agreement), or (ii) the Base Rate (which means the higher of the Prime Rate, Federal Funds Rate plus 0.50%, or the daily one-month LIBOR plus 1.00%), plus an applicable margin between 1.25% and 2.00% based on the Total Debt Leverage Ratio (as defined in the New Credit Agreement). Advances under the Canadian revolving credit facility, if any, will bear interest as described in the New Credit Agreement. If an event of default exists or continues under the New Credit Agreement, advances may bear interest at the rates described above, plus 2.00%. Interest is payable in arrears on a quarterly basis.

Additionally, the New Credit Agreement, among other things:

permits us to effect up to two separate increases in the aggregate commitments under the credit facility, of at least \$50,000 per commitment increase, and of up to \$150,000 in the aggregate;

requires us to comply with a Total Debt Leverage Ratio covenant, which prohibits us from permitting the Total Debt Leverage Ratio (as defined in the New Credit Agreement), at the end of each fiscal quarter, to be greater than 4.00 to 1.00;

requires us to comply with a Senior Debt Leverage Ratio covenant, which prohibits us from permitting the Senior Debt Leverage Ratio (as defined in the New Credit Agreement), at the end of each fiscal quarter, to be greater than 2.50 to 1.00 and

Table of Contents

requires us to comply with a Consolidated Interest Coverage Ratio covenant, which prohibits us from permitting the ratio of, as of the last day of each fiscal quarter, (i) the consolidated EBITDA of Complete and its consolidated Restricted Subsidiaries (as defined in the New Credit Agreement), calculated for the four fiscal quarters then ended, to (ii) the consolidated interest expense of Complete and its consolidated Restricted Subsidiaries for the four fiscal quarters then ended, to be less than 2.75 to 1.00.

We were in compliance with these debt covenant requirements as of September 30, 2011.

The term of the credit facilities provided for under the New Credit Agreement will continue until the earlier of (i) June 13, 2016 or (ii) the earlier termination in whole of the U.S. lending commitments (or Canadian lending commitments, if any) as further described in the New Credit Agreement. Events of default under the New Credit Agreement remain substantially the same as under the Amended Credit Agreement.

The obligations under the U.S. portion of the New Credit Agreement are secured by first priority security interests on substantially all of the assets (other than certain excluded assets) of Complete and any Domestic Restricted Subsidiary (as defined in the New Credit Agreement), whether now owned or hereafter acquired including, without limitation: (i) all equity interests issued by any domestic subsidiary, (ii) 100% of equity interests issued by first tier foreign subsidiaries but, in any event, no more than 66% of the outstanding voting securities issued by any first tier foreign subsidiary, and (iii) the Existing Mortgaged Properties (as defined in the New Credit Agreement). Additionally, all of the obligations under the U.S. portion of the New Credit Agreement will be guaranteed by Complete and each existing and subsequently acquired or formed Domestic Restricted Subsidiary. The obligations under the Canadian portion of the New Credit Agreement, if any, will be secured by substantially all of the assets (other than certain excluded assets) of Complete and any Restricted Subsidiary (other than our Mexican subsidiary), as further described in the New Credit Agreement. Additionally, all of the obligations under the Canadian portion of the New Credit Agreement, if any, will be guaranteed by Complete as well as certain of our subsidiaries. Subject to certain limitations, we will have the right to designate certain newly acquired and existing subsidiaries as unrestricted subsidiaries under the New Credit Agreement, and the assets of such unrestricted subsidiaries will not serve as security for either the U.S. portion or the Canadian portion, if any, of the New Credit Agreement.

There were no borrowings outstanding under the New Credit Agreement as of September 30, 2011. There were letters of credit outstanding under the U.S. revolving portion of the facility totaling \$22,278, which reduced the available borrowing capacity as of September 30, 2011. We incurred fees related to our letters of credit as of September 30, 2011 at 1.50% per annum. For the nine months ended September 30, 2011, fees related to our letters of credit were calculated using a 360-day provision, at 3.75% per annum prior to the amendment on June 13, 2011, and ranged from 1.50% per annum to 1.66% thereafter resulting in a weighted average interest rate of 2.14 % per annum for the nine-month period ended September 30, 2011. Our available borrowing capacity under the revolving credit facility at September 30, 2011 was \$277,722.

We will incur unused commitment fees under the New Credit Agreement ranging from 0.375% to 0.50% based on the average daily balance of amounts outstanding. The unused commitment fees were calculated at 0.375% as of September 30, 2011. For the nine months ended September 30, 2011, the weighted average interest rate associated with unused commitments was 0.57% per annum.

We recorded deferred financing fees associated with the New Credit Agreement totaling \$2,477. These fees will be amortized to expense, along with the remaining balance of deferred financing fees associated with the prior amendments to this facility, over the term of the facility which matures in June 2016.

- (b) On December 6, 2006, we issued 8.0% senior notes with a face value of \$650,000 through a private placement of debt. These notes mature in 10 years, on December 15, 2016, and require semi-annual interest payments, paid in arrears and calculated based on an annual rate of 8.0%, on June 15 and December 15, of each year, which commenced on June 15, 2007. There was no

Table of Contents

discount or premium associated with the issuance of these notes. The senior notes are guaranteed by all of our current domestic subsidiaries. The senior notes have covenants which, among other things: (1) limit the amount of additional indebtedness we can incur; (2) limit restricted payments such as a dividend; (3) limit our ability to incur liens or encumbrances; (4) limit our ability to purchase, transfer or dispose of significant assets; (5) limit our ability to purchase or redeem stock or subordinated debt; (6) limit our ability to enter into transactions with affiliates; (7) limit our ability to merge with or into other companies or transfer all or substantially all of our assets; and (8) limit our ability to enter into sale and leaseback transactions. We have the option to redeem all or part of these notes on or after December 15, 2011. Additionally, we may redeem some or all of the notes prior to December 15, 2011 at a price equal to 100% of the principal amount of the notes plus a make-whole premium.

Pursuant to a registration rights agreement with the holders of our 8.0% senior notes, on June 1, 2007, we filed a registration statement on Form S-4 with the SEC which enabled these holders to exchange their notes for publicly registered notes with substantially identical terms. These holders exchanged 100% of the notes for publicly traded notes on July 25, 2007. On August 28, 2007, we entered into a supplement to the indenture governing the 8.0% senior notes, whereby additional domestic subsidiaries became guarantors under the indenture. Effective April 1, 2009, we entered into a second supplement to this indenture whereby additional domestic subsidiaries became guarantors under the indenture.

8. Stockholders equity:*(a) Stock-based Compensation Stock Options:*

We maintain option plans under which we grant stock-based compensation to employees, officers and directors to purchase our common stock. The exercise price of each option is based on the fair value of the company's stock at the date of grant. Options may be exercised over a five or ten-year period and generally a third of the options vest on each of the first three anniversaries from the grant date. Upon exercise of stock options, we issue our common stock.

We calculate stock compensation expense for our stock-based compensation awards by measuring the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award, with limited exceptions, by using an option pricing model to determine fair value. A further description can be found in our Annual Report on Form 10-K as of December 31, 2010.

On January 31, 2011, the Compensation Committee of our Board of Directors approved the annual grant of stock options and non-vested restricted stock to certain employees, officers and directors. Pursuant to this authorization, we issued 428,960 shares of non-vested restricted stock at a grant price of \$27.94. We expect to recognize compensation expense associated with this grant of non-vested restricted stock totaling \$11,982 ratably over the three-year vesting period. We granted an additional 23,500 shares of non-vested restricted stock in May 2011 and expect to recognize compensation expense associated with these grants totaling \$718 ratably over the three-year vesting period. In addition, we granted 231,300 stock options to purchase shares of our common stock at an exercise price of \$27.94. These stock options vest ratably over a three-year period. We will recognize compensation expense associated with these stock option grants over the vesting period. The fair value of the stock options granted during the nine months ended September 30, 2011 was determined by applying a Black-Scholes option pricing model based on the following assumptions:

	Nine Months Ended September 30, 2011
Assumptions:	
Risk-free rate	0.96% to 1.92%
Expected term (in years)	3.7 to 5.1
Volatility	54.1%
Calculated fair value per option	\$11.32 to \$13.53

We calculated the expected volatility of our common stock based on our historical volatility, adjusted for certain qualitative factors, over the expected term of the options. This volatility factor was used to calculate the fair market value of stock option grants made during the nine months ended September 30, 2011.

Table of Contents

We projected a rate of stock option forfeitures based upon historical experience and management assumptions related to the expected term of the options. After adjusting for these forfeitures, we expect to recognize expense totaling \$2,782 over the vesting period of these 2011 stock option grants. For the quarter and nine months ended September 30, 2011, we have recognized expense related to these stock option grants totaling \$232 and \$618, respectively, which represents a reduction of net income before taxes. The impact on net income for the quarter and nine months ended September 30, 2011 was a decrease of \$144 and \$384, respectively, with no impact on diluted earnings per share as reported. The unrecognized compensation costs related to the non-vested portion of these awards was \$2,164 as of September 30, 2011 and will be recognized over the applicable remaining vesting periods.

For the quarters ended September 30, 2011 and 2010, we recognized compensation expense associated with all stock option awards totaling \$578 and \$488, respectively, resulting in a decrease in net income of \$360 and \$298, respectively. The impact of this compensation expense on earnings per share was a \$0.01 reduction in diluted earnings per share for each of the quarters ended September 30, 2011 and 2010. For the nine months ended September 30, 2011 and 2010, we recognized compensation expense associated with all stock option awards totaling \$1,734 and \$1,831, respectively, resulting in a decrease in net income of \$1,079 and \$1,118, respectively. This resulted in a \$0.02 reduction in earnings per share for each of the nine-month periods ended September 30, 2011 and 2010. Total unrecognized compensation expense associated with outstanding stock option awards at September 30, 2011 was \$3,503 or \$2,179, net of tax.

The following tables provide a roll forward of stock options from December 31, 2010 to September 30, 2011 and a summary of stock options outstanding by exercise price range at September 30, 2011:

	Options Outstanding	
	Number	Weighted Average Exercise Price
Balance at December 31, 2010	3,141,580	\$ 12.68
Granted	231,300	\$ 27.94
Exercised	(929,852)	\$ 17.16
Cancelled		\$
Balance at September 30, 2011	2,443,028	\$ 12.42

Range of Exercise Price	Options Outstanding			Options Exercisable		
	Outstanding at September 30, 2011	Weighted Average Remaining Life (months)	Weighted Average Exercise Price	Exercisable at September 30, 2011	Weighted Average Remaining Life (months)	Weighted Average Exercise Price
\$5.00	60,000	20	\$ 5.00	60,000	20	\$ 5.00
\$6.41 - \$8.16	1,251,134	66	\$ 6.55	953,657	60	\$ 6.59
\$11.66 - \$12.53	483,964	96	\$ 12.47	143,765	87	\$ 12.32
\$15.90	61,900	76	\$ 15.90	61,900	64	\$ 15.90
\$17.67 - \$19.87	137,863	64	\$ 19.73	137,863	64	\$ 19.73
\$23.27 - \$24.00	122,367	55	\$ 23.97	122,367	55	\$ 23.97
\$26.26 - \$27.94	276,300	105	\$ 27.68	45,000	68	\$ 26.35
\$29.88	40,000	80	\$ 29.88	40,000	80	\$ 29.88
\$34.19	9,500	81	\$ 34.19	9,500	81	\$ 34.19
	2,443,028	75	\$ 12.42	1,574,052	62	\$ 11.25

The total intrinsic value of stock options exercised during the quarter and nine months ended September 30, 2011 was \$865 and \$15,952, respectively. The total intrinsic value of all in-the-money vested outstanding stock options at September 30, 2011 was \$13,644. Assuming all stock options outstanding at September 30, 2011 were vested, the total intrinsic value of all in-the-money outstanding stock options would have

been \$19,513.

(b) Non-vested Restricted Stock:

We present the amortization of non-vested restricted stock as an increase in additional paid-in capital. At September 30, 2011, amounts not yet recognized related to non-vested restricted stock totaled \$14,106, which represented the unamortized expense associated with awards of non-vested stock granted to

Table of Contents

employees, officers and directors under our compensation plans, including \$12,531 related to grants during the nine months ended September 30, 2011. We recognized compensation expense associated with non-vested restricted stock totaling \$2,869 and \$2,428 for the quarters ended September 30, 2011 and 2010, respectively, and \$8,056 and \$6,740 for the nine months ended September 30, 2011 and 2010, respectively.

The following table summarizes the change in non-vested restricted stock from December 31, 2010 to September 30, 2011:

	Non-vested Restricted Stock	
	Number	Weighted Average Grant Price
Balance at December 31, 2010	1,672,854	\$ 11.12
Granted	452,460	\$ 28.08
Vested	(843,377)	\$ 10.79
Forfeited	(11,216)	\$ 21.49
Balance at September 30, 2011	1,270,721	\$ 17.29

(c) Treasury Shares:

In accordance with the provisions of the 2008 Incentive Award Plan, as amended, holders of non-vested restricted stock were given the option to either remit to us the required withholding taxes associated with the vesting of restricted stock, or to authorize us to purchase shares equivalent to the cost of the withholding tax and to remit the withholding taxes on behalf of the holder. Pursuant to this provision, we purchased the following shares of our common stock during the nine months ended September 30, 2011:

Period	Shares Purchased	Average Price Paid per Share	Extended Amount
January 1 31, 2011	199,510	\$ 27.45	\$ 5,476
February 1 28, 2011			
March 1 31, 2011	1,374	\$ 28.22	39
April 1 30, 2011	426	\$ 29.72	13
May 1 31, 2011	1,065	\$ 30.80	33
June 1 30, 2011	644	\$ 30.90	20
July 1 31, 2011	1,326	\$ 37.11	49
August 1 31, 2011	353	\$ 37.33	13
September 1 - 30, 2011			
	204,698		\$ 5,643

9. Earnings per share:

We compute basic earnings per share by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per common and potential common share includes the weighted average of additional shares associated with the incremental effect of dilutive employee stock options and non-vested restricted stock, as determined using the treasury stock method prescribed by the Financial Accounting Standards Board (FASB) guidance on earnings per share. The following table reconciles basic and diluted weighted average shares used in the computation of earnings per share for the quarters and nine months ended September 30, 2011 and 2010:

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

	Quarter Ended		Nine Months Ended	
	September 30,	September 30,	September 30,	September 30,
	2011	2010	2011	2010
	(In thousands)			
Weighted average basic common shares outstanding	78,004	76,130	77,578	75,957
Effect of dilutive securities:				
Employee stock options	998	751	1,052	628
Non-vested restricted stock	443	911	450	810
Weighted average diluted common and potential common shares outstanding	79,445	77,792	79,080	77,395

Table of Contents

We excluded the impact of anti-dilutive potential common shares from the calculation of diluted weighted average shares for the quarter and nine months ended September 30, 2011 and 2010. If these potential common shares were included in the calculation, the impact would have been a decrease in diluted weighted average shares outstanding of 34,563 shares and 47,870 shares for the quarters ended September 30, 2011 and 2010, respectively, and 35,156 shares and 257,781 shares for the nine months ended September 30, 2011 and 2010, respectively.

10. Discontinued operations:

On July 6, 2011, we sold our Southeast Asian products business, through which we provided oilfield equipment sales, rentals and refurbishment services, to MTQ Corporation Limited (MTQ), a Singapore firm which provides engineering services to oilfield and industrial equipment users and manufacturers. Proceeds from the sale of this business totaled \$21,913, of which \$2,613 represented cash on hand at July 6, 2011 which was transferred to us in October 2011 pursuant to the final settlement. We recorded a loss on the sale of this business of \$136 as of September 30, 2011.

Although this sale did not represent a material disposition of assets relative to our total assets as presented in the accompanying balance sheets, the Southeast Asia products business did represent a significant portion of the assets and operations which were attributable to our product sales business segment for the periods presented, and therefore, we accounted for it as discontinued operations. We revised our financial statements and reclassified the assets and liabilities of the Southeast Asia products business as discontinued operations as of the date of each balance sheet presented and removed the results of operations of the Southeast Asia products business from net income from continuing operations, and presented these separately as income from discontinued operations, net of tax, for each of the accompanying statements of operations.

Additionally, because our Southeast Asian products business represented over 85% of the Product Sales segment revenue, we have restructured our reportable segments to better reflect our current operations. Our remaining product sales business has been combined with our Drilling Services segment. A reconciliation of the original presentation of our reportable segments for the quarter and nine months ended September 30, 2010 to the current reportable segments is presented below in Note 11, Segment information.

The following table summarizes the operating results for this disposal group for the quarters and nine-month periods ended September 30, 2011 and 2010:

	Pro Forma Results			
	Quarter Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Revenue	\$	\$ 8,339	\$ 13,766	\$ 24,069
Income before taxes	\$	\$ 571	\$ 1,681	\$ 3,343
Taxes	\$	\$ 707	\$ 242	\$ 1,149
Net income (loss)	\$	\$ (136)	\$ 1,439	\$ 2,194
Earnings per share information:				
Basic	\$	\$ (0.00)	\$ 0.02	\$ 0.03
Diluted	\$	\$ (0.01)	\$ 0.01	\$ 0.03

The following table presents the assets and liabilities of this disposal group as of July 6, 2011 and December 31, 2010.

	July 6, 2011	December 31, 2010
Current assets:		
Cash	\$ 2,613	\$ 7,546
Accounts receivable	\$ 6,805	\$ 3,664
Inventory, net	\$ 5,264	\$ 5,147
Prepaid expenses	\$ 455	\$ 343

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

Current assets of discontinued operations	\$ 15,137	\$ 16,700
Long-term assets:		
Property, plant and equipment, net	\$ 4,963	\$ 5,096

Table of Contents

Goodwill	\$ 2,858	\$ 2,858
Other long-term assets	\$ 941	\$ 943
Long-term assets of discontinued operations	\$ 8,762	\$ 8,897
Current liabilities		
Accounts payable	\$ 2,774	\$ 597
Accrued liabilities	\$ 781	\$ 2,244
Income taxes payable	\$ 431	\$
Current liabilities of discontinued operations	\$ 3,986	\$ 2,841
Long-term liabilities of discontinued operations:		
Deferred income taxes	\$ 42	\$ 33

We have included cash held by the disposal group as a component of current assets of discontinued operations for the accompanying balance sheet at December 31, 2010, rather than including this amount as cash and cash equivalents of the consolidated entity at December 31, 2010. For cash flow statement presentation, the sources and uses of cash for this disposal group are presented as operating, investing and financing cash flows, as applicable, combined with such cash flows for continuing operations, as permitted by US GAAP.

11. Segment information:

We report segment information based on how our management organizes the operating segments to make operational decisions and to assess financial performance. We evaluate performance and allocate resources based on net income (loss) from continuing operations before net interest expense, taxes, depreciation and amortization, non-controlling interest and impairment loss (Adjusted EBITDA). The calculation of Adjusted EBITDA should not be viewed as a substitute for calculations under U.S. GAAP, in particular net income. Adjusted EBITDA is included in this Quarterly Report on Form 10-Q because our management considers it an important supplemental measure of our performance and believes that it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry, some of which present EBITDA when reporting their results. We regularly evaluate our performance as compared to other companies in our industry that have different financing and capital structures and/or tax rates by using Adjusted EBITDA. In addition, we use Adjusted EBITDA in evaluating acquisition targets. Management also believes that Adjusted EBITDA is a useful tool for measuring our ability to meet our future debt service, capital expenditures and working capital requirements, and Adjusted EBITDA is commonly used by us and our investors to measure our ability to service indebtedness. Adjusted EBITDA is not a substitute for the U.S. GAAP measures of earnings or cash flow and is not necessarily a measure of our ability to fund our cash needs. It should be noted that companies calculate EBITDA (including Adjusted EBITDA) differently and, therefore, EBITDA has material limitations as a performance measure because it excludes interest expense, taxes, depreciation and amortization. Adjusted EBITDA calculated by us may not be comparable to the EBITDA (or Adjusted EBITDA) calculation of another company and also differs from the calculation of EBITDA under our credit facilities (see Note 7, Long-term debt, for a description of the calculation of EBITDA under our existing credit facility, as amended). See the table below for a reconciliation of Adjusted EBITDA to operating income (loss) by segment.

Prior to July 1, 2011, we had three reportable operating segments: completion and production services (C&PS), drilling services and product sales. During July 2011, as a result of the sale of our Southeast Asian business, we restructured our reportable segments to better reflect our current operations. Our Southeast Asian business is accounted for as discontinued operations and we have combined the remaining product sales business with our drilling services segment.

The accounting policies of our reporting segments are the same as those used to prepare our consolidated financial statements as of September 30, 2011. Inter-segment transactions are accounted for on a cost recovery basis.

Segment assets	\$ 1,800,576	\$	\$	\$ 1,800,576

(1) The \$2,858 represents goodwill associated with Southeast Asia.

We do not allocate net interest expense or tax expense to the operating segments. The following table reconciles operating income as reported above to net income from continuing operations for the quarters and nine months ended September 30, 2011 and 2010:

	Quarters Ended		Nine Months Ended	
	September 30, 2011	September 30, 2010	September 30, 2011	September 30, 2010
Segment operating income	\$ 108,572	\$ 66,483	\$ 282,153	\$ 114,540
Interest expense	12,917	14,151	40,709	43,653
Interest income	(180)	(73)	(407)	(249)
Income taxes	36,513	20,814	91,420	28,609
Net income from continuing operations	\$ 59,322	\$ 31,591	\$ 150,431	\$ 42,527

The following table summarizes the change in the carrying amount of goodwill by segment for the nine months ended September 30, 2011:

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

	C&PS	Drilling Services	Product Sales	Total
Balance at December 31, 2010	\$ 244,138	\$ 3,537	\$ 2,858	\$ 250,533
Less: goodwill associated with discontinued operations			(2,858)	(2,858)
Adjusted balance at December 31, 2010	244,138	3,537		247,675
Acquisition (a) and other	4,462			4,462
Balance at September 30, 2011	\$ 248,600	\$ 3,537	\$	\$ 252,137

(a) For a description of our business acquisition as of September 30, 2011, see Note 2, Business acquisition.

12. Financial instruments:

The financial instruments recognized in the balance sheet consist of cash and cash equivalents, trade accounts receivable, accounts payable and accrued liabilities, long-term debt and senior notes. The fair value of all financial instruments approximates their carrying amounts due to their current maturities or market rates of interest, except the senior notes which were issued in December 2006 with a fixed 8% coupon rate. At September 30, 2011, the fair value of these notes was \$650,000 based on the published closing price.

Table of Contents

A significant portion of our trade accounts receivable is from companies in the oil and gas industry, and as such, we are exposed to normal industry credit risks. We evaluate the credit-worthiness of our major new and existing customers based on their financial condition and generally do not require collateral. For the quarter and nine months ended September 30, 2011, we had two customers who provided approximately 18% and 8% of our total revenue.

13. Legal matters and contingencies:

In the normal course of our business, we are a party to various pending or threatened claims, lawsuits and administrative proceedings seeking damages or other remedies concerning our commercial operations, products, employees and other matters, including warranty and product liability claims and occasional claims by individuals alleging exposure to hazardous materials, on the job injuries and fatalities as a result of our products or operations. Many of the claims filed against us relate to motor vehicle accidents which can result in the loss of life or serious bodily injury. Some of these claims relate to matters occurring prior to our acquisition of businesses. In certain cases, we are entitled to indemnification from the sellers of such businesses.

Although we cannot know or predict with certainty the outcome of any claim or proceeding or the effect such outcomes may have on us, we believe that any liability resulting from the resolution of any of these matters, individually, or in the aggregate, to the extent not otherwise provided for or covered by insurance, will not have a material adverse effect on our financial position, results of operations or liquidity.

We have historically incurred additional insurance premiums related to a cost-sharing provision of our general liability insurance policy, and we cannot be certain that we will not incur additional costs until either existing claims become further developed or until the limitation periods expire for each respective policy year. Any such additional premiums should not have a material adverse effect on our financial position, results of operations or liquidity.

See Note 16, Subsequent events, for disclosure of two lawsuits that were filed against us after September 30, 2011.

14. Guarantor and Non-Guarantor Condensed Consolidating Financial Statements:

The following tables present the financial data required pursuant to SEC Regulation S-X Rule 3-10(f), which includes: (1) unaudited condensed consolidating balance sheets as of September 30, 2011 and December 31, 2010; (2) unaudited condensed consolidating statements of operations for the quarters and nine months ended September 30, 2011 and 2010 and (3) unaudited condensed consolidating statements of cash flows for the nine months ended September 30, 2011 and 2010.

15. Recent accounting pronouncements and authoritative literature:

On March 30, 2010, the President of the United States signed the Health Care and Education Reconciliation Act of 2010, which is a reconciliation bill that amends the Patient Protection and Affordable Care Act that was signed by the President on March 23, 2010. Certain provisions of this law became effective during 2010. We have reviewed our health insurance plan provisions with third-party consultants and continue to evaluate our position relative to the changes in the law. We do not believe that the provisions which have taken effect will have a significant impact on the operation of our existing health insurance plan. However, future provisions under the law which become effective in subsequent periods may impact our health insurance plan and our overall financial position. We are evaluating these provisions as they become effective and continue to seek guidance from the FASB and SEC related to the implications of this new legislation on accounting and disclosure requirements. We expect that this legislation will have an impact on our financial position, results of operations and cash flows, but we cannot determine the extent of the impact at this time.

Table of Contents

In December 2010, the FASB provided additional guidance related to business combinations to require each public entity that presents comparative financial statements to disclose the revenue and earnings of the combined entity as if the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. In addition, this amendment expands the supplemental pro forma disclosures related to such a business combination to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. This guidance should be applied prospectively for business combinations for which the acquisition date is on or after January 1, 2011, for calendar-year reporting entities. We adopted this standard on January 1, 2011 with no material impact on our financial position, results of operations or cash flows.

In December 2010, the FASB issued additional guidance related to accounting for intangible assets and goodwill. The amendments in this update modify Step One of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step Two of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance and examples, which require that goodwill of a reporting unit be tested for impairment between annual test dates if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. This update is effective for public entities with fiscal years beginning after December 15, 2010 and interim periods within those years. We adopted this standard effective January 1, 2011. We do not expect this guidance to have a material effect on our financial position, results of operations or cash flows.

In May 2011, the FASB issued guidance pertaining to fair value measurement that included a common definition of fair value and information to assist reporting entities to measure and disclose fair value with regards to U.S. GAAP and International Financial Reporting Standards (IFRS) convergence issues. This guidance becomes effective for interim and annual periods beginning on or after December 15, 2011, with early adoption prohibited. We are currently evaluating the impact that this accounting guidance may have on our consolidated financial position, results of operations and cash flows.

In June 2011, the FASB issued guidance pertaining to the presentation of comprehensive income. This guidance, which is effective retrospectively for interim and annual periods beginning on or after December 15, 2011 with early adoption permitted, requires the presentation of total comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We do not expect the adoption of this guidance to have a material impact on our consolidated financial position, results of operations and cash flows.

In September 2011, the FASB issued an update to existing guidance on the assessment of goodwill impairment. This update simplifies the assessment of goodwill for impairment by allowing companies to consider qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing the two-step impairment test required under the existing standards. This guidance also clarifies the examples of events or circumstances that would be considered in a goodwill impairment evaluation. We have elected to early adopt this update to be effective for the fiscal year beginning January 1, 2011. The adoption of this update did not have a material impact on our condensed consolidated financial statements.

16. Subsequent events:

On October 9, 2011, we became party to a merger agreement between Superior Energy Services, Inc. (SPN), a Delaware corporation, SPN Fairway Acquisition, Inc., a newly formed Delaware corporation which is an indirect wholly-owned subsidiary of SPN, and us. Pursuant to this agreement, each share of our common stock issued and outstanding immediately prior to the effective date of the merger will be converted automatically into the right to receive 0.945 shares of common stock, par value \$0.001 per share, of SPN and \$7.00 in cash. Pursuant to the agreement, we will merge with and into SPN Fairway Acquisition, Inc., which will be the surviving corporation and an indirect wholly-owned subsidiary of SPN. The completion of the merger is expected as early as December 2011, subject to

Table of Contents

approvals of SPN s and our stockholders. On November 2, 2011, the Federal Trade Commission informed both us and SPN that the Hart-Scott Rodino Antitrust Act waiting period was terminated effective November 2, 2011. For terms of the agreement, including circumstances under which the merger agreement can be terminated and the ramifications of such a termination, as well as other terms and conditions, refer to the agreement and plan of merger filed as Exhibit 2.1 to our Current Report on Form 8-K with the Securities and Exchange Commission on October 11, 2011.

On October 14, 2011 and October 26, 2011, putative class action complaints captioned Hetherington v. Winkler, et al., C.A. No. 6935-VCP (Hetherington Complaint), and Walsh v. Winkler, et al., C.A. No. 6984-VCP (Walsh Complaint), respectively, were filed in the Court of Chancery of the State of Delaware on behalf of an alleged class of Complete stockholders. On November 1, 2011, a putative class action complaint captioned City of Monroe Employees Retirement System v. Complete Production Services, Inc. et al., 2011-66385 (City of Monroe Complaint) was filed in the District Court of Harris County, Texas, on behalf of an alleged class of Complete Stockholders. The complaints name as defendants all members of our board of directors, our company, SPN and SPN Fairway Acquisition, Inc. The plaintiffs allege that the defendants breached their fiduciary duties to our stockholders in connection with the proposed merger, or aided and abetted the other defendants breaches of their fiduciary duties. The complaints allege that the proposed merger between us and SPN involves an unfair price, an inadequate sales process and unreasonable deal protection devices. The Hetherington Complaint claims that defendants agreed to the transaction to benefit SPN and that neither our company, nor our board of directors, have adequately explained the reason for the proposed merger. The Walsh Complaint claims that defendants acted for their personal interests rather than the interests of our stockholders. The City of Monroe complaint claims that defendants engaged in self-dealing and failed to seek maximum value for stockholders. All three complaints seek injunctive relief including to enjoin the merger, rescissory damages in the event the merger is completed, and an award of attorneys and other fees and costs, in addition to other relief. We and our board of directors believe that the plaintiffs allegations lack merit and intend to contest them vigorously.

On October 25, 2011, we purchased all the issued and outstanding equity interests of Rising Star Services, L.P., a company based in Odessa, Texas which provides hydraulic fracturing, cementing and acidizing services throughout the Permian Basin. Total consideration paid at closing was \$77,817, net of cash acquired and subject to a final working capital adjustment. The agreement includes additional contingent consideration up to \$6,500, which, if earned, would be payable within two years of the transaction date. We are currently evaluating the preliminary purchase price allocation associated with this transaction, but expect to record goodwill of approximately \$37,500 in October 2011, all of which would be allocated to our completion and production services business segment. We believe that this acquisition expands our geographic reach into the Permian Basin and enhances our pressure pumping service offerings.

On October 31, 2011, we acquired substantially all of the assets of two fluid handling businesses based in northern Wyoming, for a total of \$16,522 in cash. We are currently evaluating the preliminary purchase price allocation associated with this transaction, but expect to record goodwill of approximately \$8,500 in October 2011, all of which would be allocated to our completion and production services business segment. We believe that this acquisition expands our fluid handling position and supplements our trucking business in the northern Niobrara Basin.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain statements and information in this Quarterly Report on Form 10-Q may constitute forward-looking statements within the meaning of the Private Securities Litigation Act of 1995. These forward-looking statements are based on our current expectations, assumptions, estimates and projections about us and the oil and gas industry. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate. These forward-looking statements involve risks and uncertainties that may be outside of our control and could cause actual results to differ materially from those in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to: market prices for oil and gas, the level of oil and gas drilling, economic and competitive conditions, capital expenditures, regulatory changes and other uncertainties. Other factors that could cause our actual results to differ from our projected results are described in: (1) Part II, Item 1A. Risk Factors and elsewhere in this report, (2) our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, (3) our reports and registration statements filed from time to time with the SEC and (4) other announcements we make from time to time. In light of these risks, uncertainties and assumptions, the forward-looking events discussed below may not occur. Unless otherwise required by law, we undertake no obligation to update publicly any forward-looking statements, even if new information becomes available or other events occur in the future.

The words believe, may, estimate, continue, anticipate, intend, plan, expect and similar expressions are intended to identify forward-looking statements. All statements other than statements of current or historical fact contained in this Quarterly Report on Form 10-Q are forward-looking statements.

Reference to Complete, the Company, we, our and similar phrases used throughout this Quarterly Report on Form 10-Q relate collectively to Complete Production Services, Inc. and its consolidated subsidiaries.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the accompanying unaudited consolidated financial statements and related notes as of September 30, 2011 and for the quarters and nine months ended September 30, 2011 and 2010, included elsewhere herein.

Overview

We are a leading provider of specialized services and products focused on helping oil and gas companies develop hydrocarbon reserves, reduce operating costs and enhance production. We focus on basins within North America that we believe have attractive long-term potential for growth, and we deliver targeted, value-added services and products required by our customers within each specific basin. We believe our range of services and products positions us to meet the many needs of our customers at the wellsite, from drilling and completion through production and eventual abandonment. We manage our operations from regional field service facilities located throughout the U.S. Rocky Mountain region, Texas, Oklahoma, Louisiana, Arkansas, Pennsylvania, western Canada and Mexico.

We previously operated in three business segments, Completion and Production services, Drilling Services, and Product sales. In July 2011, we sold our Southeast Asian products business which represented over 85% of the Product Sales segment revenue. Therefore, we have restructured our reportable segments to better reflect our current operations. We are accounting for our Southeast Asian business as discontinued operations. The remainder of the Product sales business has been combined into our Drilling Services segment.

Completion and Production Services. Through our completion and production services segment, we establish, maintain and enhance the flow of oil and gas throughout the life of a well. This segment is divided into the following primary service lines:

Intervention Services. Well intervention requires the use of specialized equipment to perform an array of wellbore services. Our fleet of intervention service equipment includes coiled tubing units, pressure pumping units, nitrogen units, well service rigs, snubbing units and a variety of support equipment. Our intervention services provide customers with innovative solutions to increase production of oil and gas.

Table of Contents

Downhole and Wellsite Services. Our downhole and wellsite services include electric-line, slickline, production optimization, production testing, rental and fishing services.

Fluid Handling. We provide a variety of services to help our customers obtain, move, store and dispose of fluids that are involved in the development and production of their reservoirs. Through our fleet of specialized trucks, frac tanks and other assets, we provide fluid transportation, heating, pumping and disposal services for our customers.

Drilling Services. Through our drilling services segment, we provide services and equipment that initiate or stimulate oil and gas production by providing land drilling and specialized rig logistics services. We also provide repair work and fabrication services for our customers at a business located in Gainesville, Texas.

General

The primary factors influencing demand for our services and products are the level of drilling and workover activity of our customers and the complexity of such activity, which in turn, depends on current and anticipated future oil and gas prices, production depletion rates and the resultant levels of cash flows generated and allocated by our customers to their drilling and workover budgets. As a result, demand for our services and products is cyclical, substantially depends on activity levels in the North American oil and gas industry and is highly sensitive to current and expected oil and natural gas prices.

We consider the drilling and well service rig counts to be an indication of spending by our customers in the oil and gas industry for exploration and development of new and existing hydrocarbon reserves. These spending levels are a primary driver of our business, and we believe that our customers tend to invest more in these activities when oil and gas prices are at higher levels, are increasing, or are expected to increase. The following tables summarize average North American drilling and well service rig activity, as measured by Baker Hughes Incorporated (BHI) and the Cameron International Corporation/Guiberson /AESC Service Rig Count for Active Rigs :

AVERAGE RIG COUNTS

Table of Contents

Outlook

Oilfield market conditions improved throughout 2010 and through the first nine months of 2011 due to higher oil prices, which are encouraging increased investments in oil plays and in gas fields that have meaningful natural gas liquids content. At current commodity prices, overall activity levels are anticipated to increase near-term. Oil and natural gas liquid focused activity is expected to continue increasing in the service intensive unconventional resource plays while dry natural gas directed activity is expected to remain subdued as a result of ample supplies.

We believe our customers will continue to rely upon service providers with local knowledge and a proven ability to effectively execute complex services on more service intensive, longer-lateral horizontal wells, particularly in oil and liquid-rich basins where our customers are shifting a greater portion of their activities. Our business has transitioned from a predominantly gas-oriented business, to a majority oil and liquids-oriented business. We believe we are well positioned in high-growth basins and that our core services, which include pressure pumping, coiled tubing, well servicing and fluid handling, will continue to directly benefit from an increasing level of service intensity.

Our long-term growth strategy has been to add like-kind equipment, expand our service offerings through internal capital investment and accelerate our growth by acquiring complementary businesses which expand our service offerings in a current operating area or extend our geographical footprint into targeted basins. Furthermore, we continue to evaluate our existing service and product offerings and seek to dispose of businesses which are deemed to be non-core services, when market conditions and the terms for such transactions are deemed favorable. For 2011, we expect to spend approximately \$425 million for capital investment and we continue to seek strategic acquisitions.

On October 9, 2011, we became party to a merger agreement between Superior Energy Services, Inc. (SPN), a Delaware corporation, SPN Fairway Acquisition, Inc., a newly formed Delaware corporation which is an indirect wholly-owned subsidiary of SPN, and us. Pursuant to this agreement, each share of our common stock issued and outstanding immediately prior to the effective date of the merger will be converted automatically into the right to receive 0.945 shares of common stock, par value \$0.001 per share, of SPN and \$7.00 in cash. Pursuant to the agreement, we will merge with and into SPN Fairway Acquisition, Inc., which will be the surviving corporation and an indirect wholly-owned subsidiary of SPN. The completion of the merger is expected as early as December 2011, subject to approvals of SPN's and our stockholders. On November 2, 2011, the Federal Trade Commission informed both us and SPN that the Hart-Scott Rodino Antitrust Act waiting period was terminated effective November 2, 2011. For terms of the agreement, including circumstances under which the merger agreement can be terminated and the ramifications of such a termination, as well as other terms and conditions, refer to the agreement and plan of merger filed as Exhibit 2.1 to our Current Report on Form 8-K with the Securities and Exchange Commission on October 11, 2011.

Acquisitions

On May 11, 2011, we completed the purchase of the hydraulic snubbing and production testing assets of a business with operations in the Marcellus, Eagle Ford and Barnett Shales. We paid a total of \$15.6 million in cash for these assets, which included goodwill of \$4.4 million. The entire purchase price was allocated to the completion and production services business segment. We believe this acquisition will supplement our hydraulic snubbing and production testing service offerings in Pennsylvania and Texas.

On October 25, 2011, we purchased all the issued and outstanding equity interests of Rising Star Services, L.P., a company based in Odessa, Texas which provides hydraulic fracturing, cementing and acidizing services throughout the Permian Basin. Total consideration paid at closing was \$77.8 million, net of cash acquired and subject to a final working capital adjustment. The agreement includes additional contingent consideration up to \$6.5 million, which, if earned, would be payable within two years of the transaction date. We are currently evaluating the preliminary purchase price allocation associated with this transaction, but expect to record goodwill of approximately \$37.5 million in October 2011, all of which would be allocated to our completion and production services business segment. We believe that this acquisition expands our geographic reach into the Permian Basin and enhances our pressure pumping service offerings.

On October 31, 2011, we acquired substantially all of the assets of two fluid handling businesses based in northern Wyoming, for a total of \$16.5 million in cash. We are currently evaluating the preliminary purchase price allocation associated with this transaction, but expect to record goodwill of approximately \$8.5 million in October 2011, all of which would be allocated to our completion and production services business segment. We believe that this acquisition expands our fluid handling position and supplements our trucking business in the northern Niobrara Basin.

Table of Contents**Discontinued Operations**

On July 6, 2011, we sold our Southeast Asian products business, through which we provided oilfield equipment sales, rentals and refurbishment services, to MTQ Corporation Limited (MTQ), a Singapore firm which provides engineering services to oilfield and industrial equipment users and manufacturers. Proceeds from the sale of this business totaled \$21.9 million, of which \$2.6 million represented cash on hand at July 6, 2011 which was transferred to us in October 2011 pursuant to the final settlement. We recorded a loss on the sale of this business of \$0.1 million as of September 30, 2011.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires the use of estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, and provide a basis for making judgments about the carrying value of assets and liabilities that are not readily available through open market quotes. Estimates and assumptions are reviewed periodically, and actual results may differ from those estimates under different assumptions or conditions. We must use our judgment related to uncertainties in order to make these estimates and assumptions.

For a description of our critical accounting policies and estimates as well as certain sensitivity disclosures related to those estimates, see our Annual Report on Form 10-K for the year ended December 31, 2010. Our critical accounting policies and estimates have not changed materially during the nine months ended September 30, 2011.

As mentioned above, in July 2011, we sold our Southeast Asian products business and are accounting for this disposal group as discontinued operations. The remainder of the Product Sales business has been combined into our Drilling Services segment. A reconciliation of the original presentation of our reportable segments for the quarter and nine months ended September 30, 2010 to the current reportable segments is presented in Note 11, Segment information, in our notes to consolidated financial statements included elsewhere in this Form 10-Q.

Total	\$ 428,985	\$ 249,338	\$ 179,647	72%

Corporate includes amounts related to corporate personnel costs, other general expenses and stock-based compensation charges.

Adjusted EBITDA consists of net income (loss) from continuing operations before net interest expense, taxes, depreciation and amortization, non-controlling interest and impairment loss. Adjusted EBITDA is a non-GAAP measure of performance. We use Adjusted EBITDA as the primary internal management measure for evaluating performance and allocating additional resources. The following table reconciles Adjusted EBITDA for the quarters and nine months ended September 30, 2011 and 2010 to the most comparable U.S. GAAP measure, operating income (loss). The calculation of Adjusted EBITDA is different from the calculation of EBITDA, as defined and used in our credit facilities. For a discussion of the calculation of EBITDA as defined under our existing credit facilities, see Note 7, Long-term debt included in the notes to consolidated financial statements included elsewhere in this Quarterly Report.

Reconciliation of Adjusted EBITDA to Most Comparable U.S. GAAP Measure Operating Income (Loss)

Depreciation and amortization	\$ 118,641	\$ 14,653	\$ 1,504	\$ 134,798
Operating income (loss)	\$ 131,968	\$ 11,969	\$ (29,397)	\$ 114,540

We do not allocate net interest expense or tax expense to our operating segments. The following table reconciles operating income as reported above to net income from continuing operations for the quarters and nine months ended September 30, 2011 and 2010:

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

	Quarters Ended		Nine Months Ended	
	September 30,		September 30,	
	2011	2010	2011	2010
Segment operating income	\$ 108,572	\$ 66,483	\$ 282,153	\$ 114,540
Interest expense	12,917	14,151	40,709	43,653
Interest income	(180)	(73)	(407)	(249)
Income taxes	36,513	20,814	91,420	28,609
Net income from continuing operations	\$ 59,322	\$ 31,591	\$ 150,431	\$ 42,527

Below is a discussion of our operating results by segment for these periods.

Table of Contents**Quarter Ended September 30, 2011 Compared to the Quarter Ended September 30, 2010 (Unaudited)***Revenue*

Revenue for the quarter ended September 30, 2011 increased by \$180.0 million, or 44%, to \$590.3 million from \$410.3 million for the same period in 2010. The changes by segment were as follows:

Completion and Production Services. Segment revenue increased \$174.2 million, or 48%, for the quarter primarily due to an increase in activity levels in the oil and gas industry. We experienced favorable year-over-year improvements for most of our business lines, especially our pressure pumping, coiled tubing and fluid handling businesses as higher demand for our services, resulted in better utilization and pricing of our existing equipment. We invested in additional operating equipment, including pressure pumping frac fleets, coiled tubing units and fluid handling assets, which we placed into service during the past twelve months. We completed several small acquisitions in 2010 and one acquisition in May 2011, which also contributed to the revenue growth for this segment.

Drilling Services. Segment revenue increased \$5.9 million, or 12%, during the quarter primarily due to increased activity levels in the oil and gas industry and improved utilization and pricing for our rig relocation and contract drilling businesses.

Service Expenses

Service expenses include labor costs associated with the execution and support of our services, materials used in the performance of those services and other costs directly related to the support and maintenance of equipment. These expenses increased \$121.4 million, or 47%, to \$379.2 million for the quarter ended September 30, 2011 from \$257.8 million for the quarter ended September 30, 2010. The following table summarizes service expenses as a percentage of revenues for the quarters ended September 30, 2011 and 2010:

Segment:	Service Expenses as a Percentage of Revenue		
	9/30/11	Quarter Ended 9/30/10	Change
Completion and production services	64%	62%	2%
Drilling services	67%	69%	(2%)
Total	64%	63%	1%

Total service expenses as a percentage of overall revenue increased slightly when comparing the quarter ended September 30, 2011 to the same period in 2010, as improvements in asset utilization and pricing were offset by higher labor and fuel costs.

Selling, General and Administrative Expenses

Selling, general and administrative expenses include salaries and other related expenses for our selling, administrative, finance, information technology and human resource functions. Selling, general and administrative expenses increased \$12.4 million, or 30%, for the quarter ended September 30, 2011 to \$53.8 million from \$41.4 million during the quarter ended September 30, 2010. This increase was primarily related to higher payroll related costs resulting from increased headcount, higher incentive compensation costs based on favorable operating results and the reinstatement of matching contributions to our 401(k) and deferred compensation plans, as well as a foreign exchange loss due to the devaluation of the Mexican Peso against the U.S. dollar and higher outside service costs relating to the impending merger and other matters. The quarter ended September 30, 2010 also benefited from the recovery of bad debt. As a percentage of revenues, selling, general and administrative expense was 9% and 10% for the quarters ended September 30, 2011 and 2010, respectively.

Table of Contents

Depreciation and Amortization

Depreciation and amortization expense increased \$4.1 million, or 9%, to \$48.7 million for the quarter ended September 30, 2011 from \$44.6 million for the quarter ended September 30, 2010. The increase in depreciation and amortization expense was primarily related to capital investment in equipment which was placed into service during the twelve-month period from October 2010 through September 2011 as well as additional depreciation and amortization expense associated with equipment and identifiable intangible assets associated with two acquisitions during the fourth quarter of 2010 and one in May 2011. As a percentage of revenue, depreciation and amortization expense decreased to 8% from 11% for the quarters ended September 30, 2011 and 2010, respectively.

Interest expense

Interest expense decreased 9%, or \$1.3 million, to \$12.9 million for the quarter ended September 2011 compared to \$14.2 million for the quarter ended September 30, 2010. The overall decrease in interest expense was largely due to lower fees associated with an amendment to our revolving credit facilities in June 2011, as well as an increase in capitalized interest associated with construction in progress, which increased significantly in 2011 as we increased our investments in capital equipment.

Taxes

We recorded a provision of \$36.5 million for the quarter ended September 30, 2011 at an effective rate of approximately 38% and a provision of \$20.8 million for the quarter ended September 30, 2010 at an effective rate of approximately 40%. The lower tax rate for the nine months ended September 30, 2011 was due to a greater benefit from the domestic production activities deduction relative to 2010, as well as the mix of earnings amongst the various tax jurisdictions in which we operate.

Discontinued operations

We recorded a loss of \$0.1 million during the quarter ended September 30, 2011 associated with the sale of our Southeast Asian products business in July 2011. Net income earned from this disposal group during the same period in 2010 was \$1.4 million.

Nine Months Ended September 30, 2011 Compared to the Nine Months Ended September 30, 2010 (Unaudited)

Revenue

Revenue for the nine months ended September 30, 2011 increased by \$559.2 million, or 53%, to \$1,623.7 million from \$1,064.5 million for the same period in 2010. The changes by segment were as follows:

Completion and Production Services. Segment revenue increased \$526.4 million, or 56%, for the nine months ended September 30, 2011 compared to the same period in 2010 primarily due to an increase in activity levels in the oil and gas industry. We experienced favorable year-over-year improvements for most of our business lines, especially our pressure pumping, coiled tubing and fluid handling businesses as higher demand for our services resulted in better utilization and pricing of our existing equipment. We invested in equipment, including pressure pumping frac fleets, coiled tubing units and fluid handling assets, which we placed into service during the past twelve months. In addition, we acquired several small businesses during 2010 and one business in May 2011 which contributed to our revenue growth in this segment.

Drilling Services. Segment revenue increased \$32.8 million, or 26%, for the nine months ended September 30, 2011 compared to the same period in 2010, primarily due to increased activity levels in the oil and gas industry and improved utilization and pricing in our rig logistics and contract drilling businesses.

Table of Contents*Service Expenses*

Service expenses include labor costs associated with the execution and support of our services, materials used in the performance of those services and other costs directly related to the support and maintenance of equipment. These expenses increased \$352.3 million, or 51%, to \$1,042.3 million for the nine months ended September 30, 2011 from \$690.0 million for the same period in 2010. The following table summarizes service expenses as a percentage of revenues for the nine months ended September 30, 2011 and 2010:

Segment:	Service Expenses as a Percentage of Revenue		
	9/30/11	Nine Months Ended 9/30/10	Change
Completion and production services	64%	64%	
Drilling services	68%	71%	(3%)
Total	64%	65%	(1%)

Service expenses as a percentage of revenue decreased slightly for the nine months ended September 30, 2011 compared to the same period in 2010, as improvements in asset utilization and pricing were partially offset by higher labor and fuel costs.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased \$27.4 million, or 22% to \$152.5 million, for the nine months ended September 30, 2011 compared to \$125.1 million for the same period in 2010. This increase was primarily related to higher payroll related costs resulting from increases in headcount, merit increases which were awarded during the second quarter of 2011, an increase in incentive compensation based on higher earnings and the reinstatement of matching contributions to our 401(k) and deferred compensation plans. We also experienced higher insurance costs in 2011, as well as increased outside service costs relating to the impending merger and other matters, an increase in bad debt expense and an increase in losses on the disposition of assets. As a percentage of revenues, selling, general and administrative expense was 9% and 12% for the nine months ended September 30, 2011 and 2010, respectively.

Depreciation and Amortization

Depreciation and amortization expense increased \$12.0 million, or 9%, to \$146.8 million for the nine months ended September 30, 2011 from \$134.8 million for the nine months ended September 30, 2010. The increase in depreciation and amortization expense was primarily related to capital investment in equipment which was placed into service during the twelve-month period from October 2010 through September 2011. In addition, we acquired several small businesses in 2010 which contributed a full nine months of depreciation and amortization expense for the nine months ended September 30, 2011 but had a less significant impact for the same period in 2010, and we acquired a small business in May 2011 which contributed depreciation expense as well as amortization expense associated with intangible assets. As a percentage of revenue, depreciation and amortization expense decreased to 9% from 13% for the nine months ended September 30, 2011 and 2010, respectively.

Interest Expense

Interest expense decreased 7%, or \$3.0 million, to \$40.7 million for the nine months ended September 2011 compared to \$43.7 million for the same period in 2010. The overall decrease in interest expense was primarily due to lower fees associated with an amendment to our revolving credit facilities in June 2011, as well as an increase in capitalized interest associated with construction in progress, which increased significantly in 2011 compared to 2010 as we increased our investments in capital equipment.

Table of Contents*Taxes*

We recorded a tax provision of \$91.4 million for the nine months ended September 30, 2011 at an effective rate of approximately 38% and a tax provision of \$28.6 million for the nine months ended September 30, 2010 at an effective rate of approximately 40%. The lower effective rate for the nine months ended September 30, 2011 was due to a greater benefit received in 2011 from the domestic production activities deduction relative to 2010, as well as the mix of earnings amongst the various tax jurisdictions in which we operate.

Discontinued operations

On July 6, 2011, we sold our Southeast Asian products business. During the nine months ended September 30, 2011, we recorded net income of \$2.2 million associated with this business, which included a loss on the disposal of \$0.1 million. Net income earned from this disposal group during the same period in 2010 was \$3.4 million.

Liquidity and Capital Resources

As of September 30, 2011, we had working capital, net of cash, of \$333.3 million and cash and cash equivalents of \$208.3 million, compared to working capital, net of cash, of \$284.4 million and cash and cash equivalents of \$119.1 million at December 31, 2010, excluding cash associated with discontinued operations. Our working capital, net of cash, increased at September 30, 2011 compared to December 31, 2010 primarily due to an increase in trade receivables, partially offset by an increase in payables, reflecting an overall increase in oilfield activity levels.

We anticipate that cash generated from operations and our current cash balance will be sufficient to fund the majority of our cash requirements for the next twelve months, however borrowings under our amended revolving credit facility, future debt offerings and/or future public equity offerings may also be used to fund future acquisitions or to satisfy our other liquidity needs. We believe that funds from these sources will be sufficient to meet both our short-term working capital requirements and our long-term capital requirements. If our plans or assumptions change, or are inaccurate, or if we make further acquisitions, we may have to raise additional capital. Our ability to fund planned capital expenditures and to make acquisitions will depend upon our future operating performance, and more broadly, on the availability of equity and debt financing, which will be affected by prevailing economic conditions in our industry, and general financial, business and other factors, some of which are beyond our control. In addition, new debt obtained could include service requirements based on higher interest paid and shorter maturities and could impose a significant burden on our results of operations and financial condition. The issuance of additional equity securities could result in significant dilution to stockholders.

The following table summarizes cash flows by type for the periods indicated (in thousands):

	Nine Months Ended	
	September 30,	
	2011	2010
Cash flows provided by (used in):		
Operating activities	\$ 326,703	\$ 170,770
Investing activities	(249,699)	(106,751)
Financing activities	12,822	1,090

Net cash provided by operating activities increased \$155.9 million for the nine months ended September 30, 2011, compared to the same period in 2010. This increase in operating cash flows in 2011 reflects an increase in cash receipts associated with increased sales as demand for our services and products increased during the period. In addition, we entered into several long-term contracts to provide pressure pumping services and deployed significant assets. We believe our long-term take-or-pay contracts will provide a relatively stable cash flow.

Net cash used in investing activities increased by \$142.9 million for the nine months ended September 30, 2011 compared to the same period in 2010. This increase primarily resulted from a significant increase in investment in capital expenditures, including several frac fleets and coiled tubing units placed into service in 2011, and investment in drilling rigs, primarily during the third quarter of 2011. These expenditures were offset by the proceeds of \$19.3 million from the sale of our Southeast Asian business in July 2011.

Table of Contents

Net cash provided by financing activities increased \$11.7 million for the nine months ended September 30, 2011, compared to the same period in 2010. The primary source of funds was proceeds from the issuance of common stock associated with the exercise of employee stock options, partially offset by the purchase of treasury shares in settlement of tax liabilities associated with stock-based compensation. We also paid financing fees of \$2.5 million in 2011 in conjunction with the amendment of our credit facility. In addition, we paid \$1.1 million to settle a note payable associated with the financing of insurance premiums during the nine months ended September 30, 2010.

We believe that our cash balance, operating cash flows and borrowing capacity will be sufficient to fund our operations for the next twelve months.

Dividends

We did not pay dividends on our \$0.01 par value common stock during the nine months ended September 30, 2011 or during the years ended December 31, 2010, 2009 and 2008. We do not intend to pay dividends in the foreseeable future, but rather plan to build our cash balance near-term and reinvest such funds in our business. Our credit facility contains restrictive debt covenants which limit our ability to pay dividends on our common stock.

Description of Our Indebtedness

Senior Notes.

On December 6, 2006, we issued 8.0% senior notes with a face value of \$650.0 million through a private placement of debt. These notes mature in 10 years, on December 15, 2016, and require semi-annual interest payments, paid in arrears and calculated based on an annual rate of 8.0%, on June 15 and December 15, of each year, which commenced on June 15, 2007. There was no discount or premium associated with the issuance of these notes. The senior notes are guaranteed by all of our current domestic subsidiaries. The senior notes have covenants which, among other things: (1) limit the amount of additional indebtedness we can incur; (2) limit restricted payments such as a dividend; (3) limit our ability to incur liens or encumbrances; (4) limit our ability to purchase, transfer or dispose of significant assets; (5) limit our ability to purchase or redeem stock or subordinated debt; (6) limit our ability to enter into transactions with affiliates; (7) limit our ability to merge with or into other companies or transfer all or substantially all of our assets; and (8) limit our ability to enter into sale and leaseback transactions. We have the option to redeem all or part of these notes on or after December 15, 2011. Additionally, we may redeem some or all of the notes prior to December 15, 2011 at a price equal to 100% of the principal amount of the notes plus a make-whole premium.

Pursuant to a registration rights agreement with the holders of our 8.0% senior notes, on June 1, 2007, we filed a registration statement on Form S-4 with the SEC which enabled these holders to exchange their notes for publicly registered notes with substantially identical terms. These holders exchanged 100% of the notes for publicly traded notes on July 25, 2007. On August 28, 2007, we entered into a supplement to the indenture governing the 8.0% senior notes, whereby additional domestic subsidiaries became guarantors under the indenture. Effective April 1, 2009, we entered into a second supplement to this indenture whereby additional domestic subsidiaries became guarantors under the indenture.

Credit Facility.

Prior to June 13, 2011, we maintained a senior secured facility (the Amended Credit Agreement) with Wells Fargo Bank, National Association, as U.S. Administrative Agent, HSBC Bank Canada, as Canadian Administrative Agent, and certain other financial institutions which was structured as an asset-based facility subject to borrowing base restrictions. In connection with the facility, Wells Fargo Capital Finance, LLC (formerly known as Wells Fargo Foothill, LLC) served as U.S. Administrative Agent and also served as U.S. Issuing Lender and U.S. Swingline Lender. The Amended Credit Agreement provided for a U.S. revolving credit facility of up to \$225.0 million that was to mature in December 2011 and a Canadian revolving credit facility of up to \$15.0 million (with Integrated Production Services Ltd., one of our wholly-owned subsidiaries, as the borrower thereof (Canadian Borrower)) that was to mature in December 2011. The Amended Credit Agreement included a provision for a commitment increase, as defined therein, which permitted us to effect up to two separate increases in the aggregate commitments under the Amended Credit Agreement by designating one or more existing lenders or other banks or financial institutions, subject to the bank's sole discretion as to participation, to provide additional aggregate financing up to \$75.0 million, with each committed increase equal to at least \$25.0 million in the

Table of Contents

U.S., or \$5.0 million in Canada, and in accordance with other provisions as stipulated in the Amended Credit Agreement. Certain portions of the credit facilities were available to be borrowed in U.S. dollars, Canadian dollars and other currencies approved by the lenders.

Subject to certain limitations set forth in the Amended Credit Agreement, we had the ability to elect how interest under the Amended Credit Agreement would be computed. Interest under the Amended Credit Agreement could be determined by reference to (1) the London Inter-bank Offered Rate, or LIBOR, plus an applicable margin between 3.75% and 4.25% per annum (with the applicable margin depending upon our Excess Availability Amount, as defined in the Amended Credit Agreement) or (2) the Base Rate (which means the higher of the Prime Rate, Federal Funds Rate plus 0.50%, 3 month LIBOR plus 1.00% and 3.50%), plus the applicable margin, as described above. If an event of default existed or continued under the Amended Credit Agreement, advances would bear interest as described above with an applicable margin rate of 4.25% plus 2.00%. Interest was payable monthly.

We incurred unused commitment fees under the Amended Credit Agreement ranging from 0.50% to 1.00% based on the average daily balance of amounts outstanding.

Letters of credit outstanding under the Amended Credit Agreement incurred fees equal to the applicable margin, as described above. If an event of default existed or continued, such fee would have been equal to the applicable margin plus 2.00%.

Under the Amended Credit Agreement, the only financial covenant to which we were subject was a Fixed Charge Coverage Ratio covenant, which must have exceeded 1.10 to 1.00. This covenant became effective only if our Excess Availability Amount, as defined under the Amended Credit Agreement, plus certain qualified cash and cash equivalents is less than \$50.0 million.

For a further description of the terms of our Amended Credit Agreement, including the provisions to calculate our U.S. and Canadian borrowing base, financial covenants requirements and events of default, see our Annual Report on Form 10-K for the year ended December 31, 2010.

New Credit Agreement, effective June 13, 2011:

On June 13, 2011, we entered into a Third Amended and Restated Credit Agreement among us, a subsidiary of the Company that is designated as a borrower under the Canadian facility, if any (the Canadian Borrower), the lenders party thereto, Wells Fargo Bank, National Association, as the U.S. administrative agent, U.S. issuing lender and U.S. swingline lender, and the other persons from time to time party thereto (the New Credit Agreement), which amends and restates the Amended Credit Agreement. Defined terms not otherwise described herein shall have the meanings given to them in the New Credit Agreement.

The New Credit Agreement modifies the Amended Credit Agreement by, among other things:

changing the structure of the credit facility from an asset-based facility to a cash flow facility;

substituting Wells Fargo Bank, National Association, for Wells Fargo Capital Finance, LLC (f/k/a Wells Fargo Foothill, LLC), as U.S. administrative agent, and appointing Wells Fargo Bank, National Association, as U.S. issuing lender and U.S. swingline lender; and

increasing our U.S. revolving credit facility from \$225.0 million to \$300.0 million and terminating the existing Canadian revolving credit facility (subject to our option to convert and reallocate any portion of the U.S. revolving credit facility then held by HSBC Bank USA, N.A., into a Canadian revolving credit facility upon satisfaction of certain conditions, including obtaining the consent of HSBC Bank USA, N.A., to such conversion and reallocation).

Table of Contents

Subject to certain limitations set forth in the New Credit Agreement, we have the option to determine how interest is computed by reference to either (i) the London Inter-bank Offered Rate, or LIBOR, plus an applicable margin between 2.25% and 3.00% based on the Total Debt Leverage Ratio (as defined in the New Credit Agreement), or (ii) the Base Rate (which means the higher of the Prime Rate, Federal Funds Rate plus 0.50%, or the daily one-month LIBOR plus 1.00%), plus an applicable margin between 1.25% and 2.00% based on the Total Debt Leverage Ratio (as defined in the New Credit Agreement). Advances under the Canadian revolving credit facility, if any, will bear interest as described in the New Credit Agreement. If an event of default exists or continues under the New Credit Agreement, advances may bear interest at the rates described above, plus 2.00%. Interest is payable in arrears on a quarterly basis.

Additionally, the New Credit Agreement, among other things:

permits us to effect up to two separate increases in the aggregate commitments under the credit facility, of at least \$50.0 million per commitment increase, and of up to \$150.0 million in the aggregate;

requires us to comply with a Total Debt Leverage Ratio covenant, which prohibits us from permitting the Total Debt Leverage Ratio (as defined in the New Credit Agreement), at the end of each fiscal quarter, to be greater than 4.00 to 1.00;

requires us to comply with a Senior Debt Leverage Ratio covenant, which prohibits us from permitting the Senior Debt Leverage Ratio (as defined in the New Credit Agreement), at the end of each fiscal quarter, to be greater than 2.50 to 1.00 and

requires us to comply with a Consolidated Interest Coverage Ratio covenant, which prohibits us from permitting the ratio of, as of the last day of each fiscal quarter, (i) the consolidated EBITDA of Complete and its consolidated Restricted Subsidiaries (as defined in the New Credit Agreement), calculated for the four fiscal quarters then ended, to (ii) the consolidated interest expense of Complete and its consolidated Restricted Subsidiaries for the four fiscal quarters then ended, to be less than 2.75 to 1.00.

We were in compliance with these debt covenant requirements as of September 30, 2011.

The term of the credit facilities provided for under the New Credit Agreement will continue until the earlier of (i) June 13, 2016 or (ii) the earlier termination in whole of the U.S. lending commitments (or Canadian lending commitments, if any) as further described in the New Credit Agreement. Events of default under the New Credit Agreement remain substantially the same as under the Amended Credit Agreement.

The obligations under the U.S. portion of the New Credit Agreement are secured by first priority security interests on substantially all of the assets (other than certain excluded assets) of Complete and any Domestic Restricted Subsidiary (as defined in the New Credit Agreement), whether now owned or hereafter acquired including, without limitation: (i) all equity interests issued by any domestic subsidiary, (ii) 100% of equity interests issued by first tier foreign subsidiaries but, in any event, no more than 66% of the outstanding voting securities issued by any first tier foreign subsidiary, and (iii) the Existing Mortgaged Properties (as defined in the New Credit Agreement). Additionally, all of the obligations under the U.S. portion of the New Credit Agreement will be guaranteed by Complete and each existing and subsequently acquired or formed Domestic Restricted Subsidiary. The obligations under the Canadian portion of the New Credit Agreement, if any, will be secured by substantially all of the assets (other than certain excluded assets) of Complete and any Restricted Subsidiary (other than our Mexican subsidiary), as further described in the New Credit Agreement. Additionally, all of the obligations under the Canadian portion of the New Credit Agreement, if any, will be guaranteed by Complete as well as certain of our subsidiaries. Subject to certain limitations, we will have the right to designate certain newly acquired and existing subsidiaries as unrestricted subsidiaries under the New Credit Agreement, and the assets of such unrestricted subsidiaries will not serve as security for either the U.S. portion or the Canadian portion, if any, of the New Credit Agreement.

Table of Contents

There were no borrowings outstanding under the New Credit Agreement as of September 30, 2011. There were letters of credit outstanding under the U.S. revolving portion of the facility totaling \$22.3 million, which reduced the available borrowing capacity as of September 30, 2011. We incurred fees related to our letters of credit as of September 30, 2011 at 1.50% per annum. For the nine months ended September 30, 2011, fees related to our letters of credit were calculated using a 360-day provision, at 3.75% per annum prior to the amendment on June 13, 2011, and ranged from 1.50% to 1.66% per annum thereafter, resulting in a weighted average interest rate of 2.14% per annum for the nine-month period ended September 30, 2011. Our available borrowing capacity under the revolving credit facility at September 30, 2011 was \$277.7 million.

We will incur unused commitment fees under the New Credit Agreement ranging from 0.375% to 0.50% based on the average daily balance of amounts outstanding. The unused commitment fees were calculated at 0.375% as of September 30, 2011. For the nine months ended September 30, 2011, the weighted average interest rate associated with unused commitments was 0.57% per annum.

We recorded deferred financing fees associated with the New Credit Agreement in the quarter ended September 2011 totaling \$2.5 million. These fees will be amortized to expense, along with the remaining balance of deferred financing fees associated with the prior amendments to this facility, over the term of the facility which matures in June 2016.

Outstanding Debt and Commitments

Our contractual commitments at September 30, 2011 are substantially the same as those at December 31, 2010. However, we have entered into agreements to purchase certain equipment for use in our business during the remainder of 2011 which totaled in excess of \$124.2 million at September 30, 2011, compared to \$45.4 million at December 31, 2010. The manufacture of this equipment requires lead-time and we generally are committed to accept this equipment at the time of delivery, unless arrangements have been made to cancel delivery in accordance with the purchase agreement terms. We believe that our cash on hand, available borrowing capacity under our credit facilities and our operating cash flows should be sufficient to fund our firm purchase commitments.

We expect to continue to acquire complementary companies and evaluate potential acquisition targets. We may use cash from operations, proceeds from future debt or equity offerings and borrowings under our amended revolving credit facility for this purpose. However, our ability to acquire such businesses could be impacted by the impending merger with SPN.

Recent Accounting Pronouncements and Authoritative Guidance

On March 30, 2010, the President of the United States signed the Health Care and Education Reconciliation Act of 2010, which is a reconciliation bill that amends the Patient Protection and Affordable Care Act that was signed by the President on March 23, 2010. Certain provisions of this law became effective during 2010. We have reviewed our health insurance plan provisions with third-party consultants and continue to evaluate our position relative to the changes in the law. We do not believe that the provisions which have taken effect will have a significant impact on the operation of our existing health insurance plan. However, future provisions under the law which become effective in subsequent periods may impact our health insurance plan and our overall financial position. We are evaluating these provisions as they become effective and continue to seek guidance from the FASB and SEC related to the implications of this new legislation on accounting and disclosure requirements. We expect that this legislation will have an impact on our financial position, results of operations and cash flows, but we cannot determine the extent of the impact at this time.

In December 2010, the FASB provided additional guidance related to business combinations to require each public entity that presents comparative financial statements to disclose the revenue and earnings of the combined entity as if the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. In addition, this amendment expands the

Table of Contents

supplemental pro forma disclosures related to such a business combination to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. This guidance should be applied prospectively for business combinations for which the acquisition date is on or after January 1, 2011, for calendar-year reporting entities. We adopted this standard on January 1, 2011 with no material impact on our financial position, results of operations or cash flows.

In December 2010, the FASB issued additional guidance related to accounting for intangible assets and goodwill. The amendments in this update modify Step One of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step Two of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with the existing guidance and examples, which require that goodwill of a reporting unit be tested for impairment between annual test dates if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. This update is effective for public entities with fiscal years beginning after December 15, 2010 and interim periods within those years. We adopted this standard effective January 1, 2011. We do not expect this guidance to have a material effect on our financial position, results of operations or cash flows.

In May 2011, the FASB issued guidance pertaining to fair value measurement that included a common definition of fair value and information to assist reporting entities to measure and disclose fair value with regards to U.S. GAAP and International Financial Reporting Standards (IFRS) convergence issues. This guidance becomes effective for interim and annual periods beginning on or after December 15, 2011, with early adoption prohibited. We are currently evaluating the impact that this accounting guidance may have on our consolidated financial position, results of operations and cash flows.

In June 2011, the FASB issued guidance pertaining to the presentation of comprehensive income. This guidance, which is effective retrospectively for interim and annual periods beginning on or after December 15, 2011 with early adoption permitted, requires the presentation of total comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We do not expect the adoption of this guidance to have a material impact on our consolidated financial position, results of operations and cash flows.

In September 2011, the FASB issued an update to existing guidance on the assessment of goodwill impairment. This update simplifies the assessment of goodwill for impairment by allowing companies to consider qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before performing the two-step impairment test required under the existing standards. This guidance also clarifies the examples of events or circumstances that would be considered in a goodwill impairment evaluation. We have elected to early adopt this update to be effective for the fiscal year beginning January 1, 2011. The adoption of this update did not have a material impact on our condensed consolidated financial statements.

Off Balance Sheet Arrangements

We have entered into operating lease arrangements for our light vehicle fleet, certain of our specialized equipment and for our office and field operating locations in the normal course of business. The terms of the facility leases range from monthly to ten years. The terms of the light vehicle leases range from three to four years. The terms of the specialized equipment leases range from monthly to seven years.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The demand, pricing and terms for oil and gas services provided by us are largely dependent upon the level of activity for the U.S. and Canadian oil and gas industry. Industry conditions are influenced by numerous factors over which we have no control, including, but not limited to: the supply of and demand for oil and gas; the level of prices, and expectations about future prices, of oil and gas; the cost of exploring for, developing, producing and delivering oil and gas; the expected rates of declining current production;

Table of Contents

the discovery rates of new oil and gas reserves; available pipeline and other transportation capacity; weather conditions; domestic and worldwide economic conditions; political instability in oil-producing countries; technical advances affecting energy consumption; the price and availability of alternative fuels; the ability of oil and gas producers to raise equity capital and debt financing; and merger and divestiture activity among oil and gas producers.

The level of activity in the U.S. and Canadian oil and gas exploration and production industry is volatile. No assurance can be given that our expectations of trends in oil and gas production activities will reflect actual future activity levels or that demand for our services will be consistent with the general activity level of the industry. Any prolonged substantial reduction in oil and gas prices would likely affect oil and gas exploration and development efforts and therefore affect demand for our services. A material decline in oil and gas prices or U.S. and Canadian activity levels could have a material adverse effect on our business, financial condition, results of operations and cash flows.

For the nine months ended September 30, 2011, approximately 4% of our revenues and approximately 4% of our total assets were denominated in Canadian dollars, our functional currency in Canada. As a result, a material decrease in the value of the Canadian dollar relative to the U.S. dollar may negatively impact our revenues, cash flows and net income. Each one percentage point change in the value of the Canadian dollar would have impacted our revenues for the nine months ended September 30, 2011 by approximately \$0.6 million. We do not currently use hedges or forward contracts to offset this risk.

Our Mexican operation uses the U.S. dollar as its functional currency, and as a result, all transactions and translation gains and losses are recorded currently in the statement of operations. The balance sheet amounts are translated into U.S. dollars at the exchange rate at the end of the month and the income statement amounts are translated at the average exchange rate for the month. We estimate that a hypothetical one percentage point change in the value of the Mexican peso relative to the U.S. dollar would have impacted our revenues for the nine months ended September 30, 2011 by approximately \$0.6 million. Currently, we conduct a portion of our business in Mexico in the local currency, the Mexican peso.

Item 4. Controls and Procedures.

Our management, under the supervision of and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as such terms are defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. In designing and evaluating our disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management was required to apply its judgment in evaluating and implementing possible controls and procedures. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of September 30, 2011 at the reasonable assurance level.

In 2010, our management approved a plan to implement new accounting software which replaced our existing accounting systems at several of our operating divisions in a phased approach. Two divisions converted during the fourth quarter of 2010 and two other divisions converted in 2011. In addition, we implemented a new chart of accounts which was adopted as these divisions converted to the new software. Although we believe the new software will enhance our internal controls over financial reporting and we believe that we have taken the necessary steps to maintain appropriate internal control over financial reporting during and after this period of system change, we continuously monitor controls through and around the system to provide reasonable assurance that our controls are effective.

There have been no changes in our internal control over financial reporting during the quarter ended September 30, 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings.**

On October 14, 2011 and October 26, 2011, putative class action complaints captioned Hetherington v. Winkler, et al., C.A. No. 6935-VCP (Hetherington Complaint), and Walsh v. Winkler, et al., C.A. No. 6984-VCP (Walsh Complaint), respectively, were filed in the Court of Chancery of the State of Delaware on behalf of an alleged class of Complete stockholders. On November 1, 2011, a putative class action complaint captioned City of Monroe Employees Retirement System v. Complete Production Services, Inc. et al., 2011-66385 (City of Monroe Complaint) was filed in the District Court of Harris County, Texas, on behalf of an alleged class of Complete Stockholders. The complaints name as defendants all members of our board of directors, our company, Superior Energy Services, Inc. (SPN) and SPN Fairway Acquisition, Inc. The plaintiffs allege that the defendants breached their fiduciary duties to our stockholders in connection with the proposed merger, or aided and abetted the other defendants' breaches of their fiduciary duties. The complaints allege that the proposed merger between us and SPN involves an unfair price, an inadequate sales process and unreasonable deal protection devices. The Hetherington Complaint claims that defendants agreed to the transaction to benefit SPN and that neither our company, nor our board of directors, have adequately explained the reason for the proposed merger. The Walsh Complaint claims that defendants acted for their personal interests rather than the interests of our stockholders. The City of Monroe complaint claims that defendants engaged in self-dealing and failed to seek maximum value for stockholders. All three complaints seek injunctive relief including to enjoin the merger, rescissory damages in the event the merger is completed, and an award of attorneys' and other fees and costs, in addition to other relief. We and our board of directors believe that the plaintiffs' allegations lack merit and intend to contest them vigorously.

In the normal course of our business, we are a party to various pending or threatened claims, lawsuits and administrative proceedings seeking damages or other remedies concerning our commercial operations, products, employees and other matters, including warranty and product liability claims and occasional claims by individuals alleging exposure to hazardous materials, on the job injuries and fatalities as a result of our products or operations. Many of the claims filed against us relate to motor vehicle accidents which can result in the loss of life or serious bodily injury. Some of these claims relate to matters occurring prior to our acquisition of businesses. In certain cases, we are entitled to indemnification from the sellers of such businesses.

Although we cannot know or predict with certainty the outcome of any claim or proceeding or the effect such outcomes may have on us, we believe that any liability resulting from the resolution of any of these matters, individually, or in the aggregate, to the extent not otherwise provided for or covered by insurance, will not have a material adverse effect on our financial position, results of operations or liquidity.

We have historically incurred additional insurance premiums related to a cost-sharing provision of our general liability insurance policy, and we cannot be certain that we will not incur additional costs until either existing claims become further developed or until the limitation periods expire for each respective policy year. Any such additional premiums should not have a material adverse effect on our financial position, results of operations or liquidity.

Item 1A. Risk Factors.

Our business faces many risks. Any of the risks discussed elsewhere in this Quarterly Report on Form 10-Q or our other SEC filings, could have a material impact on our business, financial position or results of operations. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also impair our business operations. For a detailed discussion of the risk factors that should be understood by any investor contemplating investment in our stock, please refer to the section entitled Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010. There has been no material change to the risk factors as set forth in our Annual Report on Form 10-K for the year ended December 31, 2010, except for the following:

Our pending merger with SPN may not be completed and may result in significant disruptions to our business.

On October 9, 2011, we entered into a definitive agreement with SPN under which we will merge with a wholly-owned subsidiary of SPN and our outstanding common shares will be cancelled in exchange for 0.945 shares of Superior common stock and \$7.00 in cash. The transaction is subject to approval of our and SPN's stockholders and clearance by the relevant antitrust authorities, as well as other conditions described in the merger agreement. These conditions might not be satisfied and the proposed merger might not be completed. In the event that the proposed merger is not completed:

Edgar Filing: Complete Production Services, Inc. - Form 10-Q

Our relationships with our employees, customers and business partners may be adversely affected or disrupted as a result of uncertainties with regard to our business and prospects;

We may be required to pay a termination fee of up to \$70 million to SPN in specific circumstances if the merger agreement is terminated;

We will still be required to pay significant transaction costs related to the proposed merger, such as legal, financial advisor, accounting, and other fees; and

The market price of shares of our common stock may decline to the extent that the current market price of those shares reflects a market assumption that the proposed merger will be completed.

In response to the announcement of the merger, customers may delay or defer purchasing decisions. Any delay or deferral of purchasing decisions by customers could negatively affect our business and results of operations. Similarly, regardless of whether the merger is completed or not, our current and prospective employees may experience uncertainty about their future role with SPN until SPN's strategies with regard to us are announced or executed. This may adversely affect our ability to attract and retain key management and employees. During the pendency of the merger, our management's attention from our day-to-day business may be diverted as they focus on completing the merger.

Any of these events could adversely affect our business, cash flows, and operating results.

We may be subject to future changes in the law regarding the regulation of hydraulic fracturing. Any changes in laws or government regulations could increase our costs of doing business.

Our hydraulic fracturing and fluid handling operations are subject to a range of applicable federal, state and local laws, including those discussed under the heading "Environmental Matters" in Item 1 of our Annual Report on Form 10-K as of December 31, 2010. Our hydraulic fracturing and fluid handling operations are designed and operated to minimize the risk, if any, of subsurface migration of hydraulic fracturing fluids and spillage or mishandling of hydraulic fracturing fluids, however, a proven case of subsurface migration of hydraulic fracturing fluids or a case of spillage or mishandling of hydraulic fracturing fluids during these activities could potentially subject us to civil and/or criminal liability and the possibility of substantial costs, including environmental remediation, depending on the circumstances of the underground migration, spillage, or mishandling, the nature and scope of the underground migration, spillage, or mishandling, and the applicable laws and regulations.

The practice of hydraulically fracturing formations to stimulate the production of natural gas and oil has come under increased scrutiny, and this increased scrutiny has included allegations of subsurface migration of fracturing fluids and the spillage of fracturing fluids. Importantly, however, the vast majority of those cases have been unsubstantiated, and to our knowledge, few, if any, documented cases of contamination exist. If proven to have happened, however, an incident of contamination could lead to civil/criminal liability and the possibility of substantial costs, including environmental remediation, depending on the nature of any proven damages and the applicable laws and regulations.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

In accordance with the provisions of the 2008 Incentive Award Plan, as amended, holders of unvested restricted stock were given the option to either remit to us the required withholding taxes associated with the vesting of restricted stock, or to authorize us to purchase shares equivalent to the cost of the withholding tax and to remit the withholding taxes on behalf of the holder. Such purchases for the quarter ended September 30, 2011 are summarized in the following table:

Period		(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of shares that May Yet Be Purchased Under the Plans or Programs
July 1	31, 2011	1,326	\$37.11	*	*
August 1	31, 2011	353	\$37.33	*	*
September 1	30, 2011			*	*

*We do not have a publicly announced stock repurchase program. We had 1,207,721 shares of non-vested restricted stock outstanding at September 30, 2011. The holders of these shares have the option to either remit taxes due related to the vesting of these shares or to authorize us to purchase the shares at the current market value in a sufficient amount to settle the related tax withholding. The amount purchased will depend on the market value at the time and whether or not the holders choose to surrender shares in settlement of the related tax withholding.
