(1) Ratios are annualized

(2) As discussed in the section "Comparison of Operating Results for the Three and Six Months Ended June 30, 2012 and June 30, 2011" under "Provision for Loan Losses", during the fourth quarter of 2011, the Company modified its charge-off policy on problem loans secured by real estate, which accelerated the recognition of loan charge-offs. Without the additional cumulative charge-offs of \$7.7 million and \$5.7 million at June 30, 2012 and December 31, 2011, respectively, the Company would have reported the following asset quality ratios as of June 30, 2012 and December 31, 2011, respectively: non-performing loans as a percent of total loans receivable of 3.31% and 3.12%; non-performing assets as a percent of total assets of 2.41% and 2.24%; allowance for loan losses as a percent of total loans receivable of 1.61% and 1.50%; and allowance for loan losses as a percent of total non-performing loans of 48.86% and 48.12%.

---

## Table of Contents

### Summary

OceanFirst Financial Corp. is the holding company for OceanFirst Bank (the Bank), a community bank serving Ocean and Monmouth Counties in New Jersey. The term the Company refers to OceanFirst Financial Corp., OceanFirst Bank and all of the Bank's subsidiaries on a consolidated basis. The Company's results of operations are primarily dependent on net interest income, which is the difference between the interest income earned on interest-earning assets, such as loans and investments, and the interest expense on interest-bearing liabilities, such as deposits and borrowings. The Company also generates non-interest income such as income from loan sales, loan servicing, loan originations, merchant credit card services, deposit accounts, trust and asset management services, the sale of investment products and other fees. The Company's operating expenses primarily consist of compensation and employee benefits, occupancy and equipment, marketing, data processing, federal deposit insurance and general and administrative expenses. The Company's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory agencies.

Interest-earning assets, both loans and securities, are generally priced against longer-term indices, while interest-bearing liabilities, primarily deposits and borrowings, are generally priced against shorter-term indices. In late 2011 and into the first half of 2012, the Company's net interest margin contracted as compared to prior linked periods. Due to the low interest rate environment, high loan refinance volume has caused yields on loans and mortgage-backed securities to trend downward. At the same time, the Company's asset mix has shifted as higher-yielding loans have decreased due to prepayments and the sale of newly originated 30-year fixed-rate one-to-four family loans while lower yielding securities have increased. Based upon current economic conditions, the Federal Reserve has indicated that it intends to keep interest rates at current levels through 2014. As a result, management expects the low interest rate environment to continue beyond 2012, causing further pressure on the net interest margin. In addition to the interest rate environment, the Company's results are affected by national and local economic conditions. Recent economic indicators point to some improvement in the economy, which expanded moderately in 2011 and the first half of 2012, and in overall labor market conditions as the national unemployment rate in 2012 has improved over prior year levels. Despite these signs, the overall economy remains weak and the unemployment rate remains at elevated levels. Additionally, housing values remain significantly below their peak levels in 2006. These economic conditions have generally had an adverse impact on the Company's results of operations.

Highlights of the Company's financial results for the three and six months ended June 30, 2012 were as follows:

Total assets decreased to \$2.288 billion at June 30, 2012, from \$2.302 billion at December 31, 2011. Loans receivable, net decreased \$14.1 million at June 30, 2012, as compared to December 31, 2011 primarily due to prepayments and sale of newly originated 30-year fixed-rate one-to-four family loans. Cash and due from banks decreased by \$37.6 million, as the cash and due from banks was invested in investment and mortgage-backed securities, which collectively increased by \$40.7 million, to \$570.9 million at June 30, 2012 as compared to \$530.2 million at December 31, 2011.

Deposits increased by \$2.3 million at June 30, 2012, as compared to December 31, 2011. Federal Home Loan Bank (FHLB) advances decreased \$19.0 million, to \$247.0 million at June 30, 2012 from \$266.0 million at December 31, 2011.

Diluted earnings per share increased 7.1%, to \$0.30 for the quarter ended June 30, 2012, from \$0.28 for the corresponding prior year quarter. The improvement was primarily due to a decrease in the provision for loan losses, an increase in other income and a decrease in operating expenses.

Net interest income for the three months ended June 30, 2012 decreased to \$18.4 million, as compared to \$19.6 million in the same prior year period, reflecting a lower net interest margin partly offset by greater interest-earning assets. The net interest margin decreased to 3.39% for the three months ended June 30, 2012, as compared to 3.67% for the corresponding prior year period.

The provision for loan losses was \$1.7 million for the three months ended June 30, 2012, as compared to \$2.2 million in the same prior year period. The Company's non-performing loans remained fairly stable, totaling \$44.2 million at June 30, 2012, a \$224,000 increase from \$44.0 million at December 31, 2011.

The Company remains well-capitalized with a tangible common equity ratio of 9.57%.

Return on average stockholders' equity was 9.79% for the three months ended June 30, 2012, as compared to 9.87% for the corresponding prior year period.

**Table of Contents****Analysis of Net Interest Income**

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income depends upon the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them.

The following table sets forth certain information relating to the Company for the three and six months ended June 30, 2012 and 2011. The yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods shown except where noted otherwise. Average balances are derived from average daily balances. The yields and costs include certain fees which are considered adjustments to yields.

(1) Amounts are recorded at average amortized cost.

(2) Amount is net of deferred loan fees, undisbursed loan funds, discounts and premiums and estimated loss allowances and includes loans held for sale and non-performing loans.

(3) Net interest rate spread represents the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average interest-earning assets.

---

## **Table of Contents**

### **Comparison of Financial Condition at June 30, 2012 and December 31, 2011**

Total assets at June 30, 2012 were \$2.288 billion, a decrease of \$14.6 million, or 0.6%, compared to \$2.302 billion at December 31, 2011.

Cash and due from banks decreased by \$37.6 million, to \$39.9 million at June 30, 2012, as compared to \$77.5 million at December 31, 2011. The cash and due from banks was invested in investment and mortgage-backed securities, which collectively increased by \$40.7 million, to \$570.9 million at June 30, 2012, as compared to \$530.2 million at December 31, 2011.

Loans receivable, net decreased by \$14.1 million, to a balance of \$1.549 billion at June 30, 2012, as compared to a balance of \$1.563 billion at December 31, 2011, primarily due to prepayments and sale of newly originated 30-year fixed-rate one-to-four family loans.

Total deposits increased \$2.3 million to \$1.708 billion at June 30, 2012, from \$1.706 billion at December 31, 2011. The mix of deposits changed as non-interest bearing deposits and savings deposits increased by \$42.5 million and \$13.5 million, respectively, while interest-bearing checking and time deposits decreased \$31.1 million and \$27.5 million. FHLB advances decreased by \$19.0 million to \$247.0 million at June 30, 2012, as compared to \$266.0 million at December 31, 2011 due to excess liquidity.

Stockholders' equity at June 30, 2012 increased to \$218.8 million, as compared to \$216.8 million at December 31, 2011, primarily due to net income and a reduction in accumulated other comprehensive loss, partly offset by the cash dividend on common stock and by the repurchase of 513,737 shares of common stock for \$7.3 million.

### **Comparison of Operating Results for the Three and Six Months Ended June 30, 2012 and June 30, 2011**

#### *General*

Net income for the three months ended June 30, 2012 increased to \$5.4 million, as compared to net income of \$5.1 million for the corresponding prior year period. Diluted earnings per share increased 7.1%, to \$0.30 for the three months ended June 30, 2012, as compared to \$0.28 for the corresponding prior year period. Net income for the six months ended June 30, 2012 increased to \$11.0 million, as compared to \$10.2 million for the corresponding prior year period. Diluted earnings per share increased 8.9%, to \$0.61 for the six months ended June 30, 2012, as compared to \$0.56 for the corresponding prior year period.

#### *Interest Income*

Interest income for the three and six months ended June 30, 2012 was \$22.0 million and \$44.9 million, respectively, as compared to \$24.2 million and \$48.5 million for the three and six months ended June 30, 2011. The yield on interest-earning assets declined to 4.06% and 4.13%, respectively, for the three and six months ended June 30, 2012, as compared to 4.53% for the same prior year periods. For the six months ended June 30, 2012, the yield on loans receivable benefited from a single large commercial loan prepayment fee of \$219,000 which increased the yield on interest-earning assets by 2 basis points for the six months ended June 30, 2012. Average interest-earning assets increased by \$33.1 million, or 1.5%, and \$28.3 million, or 1.3%, respectively, for the three and six months ended June 30, 2012, as compared to the same prior year periods. The increases in average interest-earning assets were primarily due to the increases in average investment and mortgage-backed securities, which collectively increased \$66.9 million and \$71.9 million, respectively, and the increases in average short-term investments which increased \$42.1 million and \$35.0 million. These increases were partly offset by a decrease in average loans receivable, net, of \$75.6 million and \$78.6 million, respectively.

#### *Interest Expense*

Interest expense for the three and six months ended June 30, 2012 was \$3.7 million and \$7.4 million, respectively, as compared to \$4.6 million and \$9.5 million for the three and six months ended June 30, 2011. The cost of interest-bearing liabilities decreased to 0.78% and 0.79%, respectively, for the three and six months ended June 30, 2012 as compared to 0.97% and 1.00% in the same prior year periods. Average interest-bearing liabilities decreased by \$28.7 million and \$23.0 million, respectively, for the three and six months ended June 30, 2012, as compared to the same prior year periods. The decreases were due to declines in average borrowed funds of \$39.2 million and \$30.8 million, respectively, and average time deposits of \$17.8 million and \$20.6 million as compared to the same prior year periods, partly offset by increases in average transaction deposits of \$28.2 million and \$28.4 million.

---

**Table of Contents***Net Interest Income*

Net interest income for the three and six months ended June 30, 2012 decreased to \$18.4 million and \$37.5 million, respectively, as compared to \$19.6 million and \$39.0 million in the same prior year periods, reflecting a lower net interest margin partly offset by greater interest-earning assets. The net interest margin decreased to 3.39% and 3.45%, respectively, for the three and six months ended June 30, 2012, from 3.67% and 3.64% in the same prior year periods due to a change in the mix of average interest-earning assets from higher-yielding loans receivable into lower-yielding short-term investments, investment securities and mortgage-backed securities. High loan refinance volume also caused yields on loans to trend downward.

*Provision for Loan Losses*

For the three and six months ended June 30, 2012, the provision for loan losses was \$1.7 million and \$3.4 million, respectively, as compared to \$2.2 million and \$3.9 million in the corresponding prior year periods. The higher amounts for the three and six months ended June 30, 2011 were related to a significant increase in non-performing loans for those time periods. Non-performing loans remained fairly stable, increasing \$224,000, or 0.5%, at June 30, 2012, to \$44.2 million from \$44.0 million at December 31, 2011. Net charge-offs for the three and six months ended June 30, 2012 were \$2.3 million and \$4.0 million, respectively, as compared to \$1.2 million and \$2.1 million in the same prior year periods. During the fourth quarter of 2011, the Company modified its charge-off policy on problem loans secured by real estate which accelerated the recognition of loan charge-offs. The Company now takes charge-offs in the period the loan, or portion thereof, is deemed uncollectable, generally after the loan becomes 120 days delinquent and a recent appraisal is received which reflects a collateral shortfall. Previously, specific valuation reserves were established until the loan charge-off was recorded upon final resolution of the collateral.

*Other Income*

Other income increased to \$4.5 million and \$8.9 million, respectively, for the three and six months ended June 30, 2012, as compared to \$3.9 million and \$7.4 million in the same prior year periods primarily due to an increase in the net gain on the sale of investment securities and loans, higher fees and service charges, and, for the six months ended June 30, 2012, a reduction in the net loss from other real estate operations. For the three and six months ended June 30, 2012, the Company recognized a gain of \$226,000 on the sale of equity securities. For the three and six months ended June 30, 2012, the net gain on the sale of loans increased \$338,000 and \$550,000, respectively, due to increases in loan sale volume and strong gain on sale margins. However, the net gain on the sale of loans for the three and six months ended June 30, 2012 was adversely affected by an increase of \$100,000 and \$250,000, respectively, in the reserve for repurchased loans primarily due to an increase in repurchase requests on loans previously sold to investors. For the three and six months ended June 30, 2012, fees and service charges increased \$44,000 and \$266,000, respectively, due to increases in trust revenue, merchant service fees and retail checking account fees. Finally, the net loss from real estate operations decreased \$304,000 for the six months ended June 30, 2012, as compared to the same prior year period. The prior year amount included write-downs in the value of properties previously acquired.

*Operating Expenses*

Operating expenses decreased by 3.9%, to \$12.9 million, and by 2.7%, to \$25.8 million, respectively, for the three and six months ended June 30, 2012, as compared to \$13.4 million and \$26.5 million for the corresponding prior year periods. Compensation and employee benefits costs decreased by \$320,000, or 4.5%, to \$6.8 million for the three months ended June 30, 2012 and by \$525,000, or 3.7%, to \$13.6 million, for the six months ended June 30, 2012, as compared to the corresponding prior year periods. The decreases were primarily due to the increase in mortgage loan closings from prior year levels. Higher loan closings in the current year increased deferred loan expense which is reflected as a decrease in compensation expense. Additionally, Federal deposit insurance expense for the three and six months ended June 30, 2012 decreased by \$201,000 and \$410,000, respectively, from the corresponding prior year periods due to a lower assessment rate and a change in the assessment methodology from deposit-based to a total liability-based assessment.

*Provision for Income Taxes*

Income tax expense was \$3.0 million and \$6.1 million, respectively, for the three and six months ended June 30, 2012, as compared to \$2.9 million and \$5.7 million for the same prior year periods. The effective tax rate was 35.8% and 35.7%, respectively, for the three and six months ended June 30, 2012, as compared to 35.9% in both prior year periods.

**Liquidity and Capital Resources**

The Company's primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from the sale of loans, FHLB and other borrowings and, to a lesser extent, investment maturities. While scheduled amortization of loans is a

## Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by interest rates, economic conditions and competition. The Company has other sources of liquidity if a need for additional funds arises, including various lines of credit.

**Table of Contents**

At June 30, 2012, the Company had \$22.0 million in overnight borrowings from the FHLB as compared to no overnight borrowings at December 31, 2011. The Company periodically utilizes overnight borrowings to fund short-term liquidity needs. The Company had total FHLB borrowings, including overnight borrowings, of \$247.0 million at June 30, 2012, a decrease from \$266.0 million at December 31, 2011.

The Company's cash needs for the six months ended June 30, 2012 were primarily satisfied by principal payments on loans and mortgage-backed securities, proceeds from the sale of mortgage loans held for sale and proceeds from maturities of investment securities available for sale. The cash was principally utilized for loan originations, the purchase of investment and mortgage-backed securities and to reduce FHLB borrowings. The Company's cash needs for the six months ended June 30, 2011 were primarily satisfied by principal payments on loans and mortgage-backed securities, proceeds from the sale of mortgage loans held for sale and increased FHLB borrowings. The cash was principally utilized for loan originations, the purchase of investment and mortgage-backed securities and deposit outflow.

In the normal course of business, the Company routinely enters into various off-balance-sheet commitments, primarily relating to the origination and sale of loans. At June 30, 2012, outstanding commitments to originate loans totaled \$79.7 million; outstanding unused lines of credit totaled \$230.7 million; and outstanding commitments to sell loans totaled \$17.7 million. The Company expects to have sufficient funds available to meet current commitments arising in the normal course of business.

Time deposits scheduled to mature in one year or less totaled \$151.1 million at June 30, 2012. Based upon historical experience management estimates that a significant portion of such deposits will remain with the Company.

The Company has a detailed contingency funding plan and comprehensive reporting of trends on a monthly and quarterly basis. Management also monitors cash on a daily basis to determine the liquidity needs of the Bank. Additionally, management performs multiple liquidity stress test scenarios on a quarterly basis. The Bank continues to maintain significant liquidity under all stress scenarios.

Under the Company's stock repurchase program, shares of OceanFirst Financial Corp. common stock may be purchased in the open market and through other privately negotiated transactions, from time-to-time, depending on market conditions. The repurchased shares are held as treasury stock for general corporate purposes. For the six months ended June 30, 2012, the Company repurchased 513,737 shares of common stock at a total cost of \$7.3 million compared with no repurchases for the six months ended June 30, 2011. At June 30, 2012, there were 263,415 shares remaining to be repurchased under the existing stock repurchase program.

Cash dividends on common stock declared and paid during the first six months of 2012 were \$4.3 million, as compared to \$4.4 million in the same prior year period. On July 18, 2012, the Board of Directors declared a quarterly cash dividend of twelve cents (\$0.12) per common share. The dividend is payable on August 10, 2012 to stockholders of record at the close of business on July 30, 2012.

The primary sources of liquidity specifically available to OceanFirst Financial Corp., the holding company of OceanFirst Bank, are capital distributions from the banking subsidiary and the issuance of preferred and common stock and long-term debt. For the first six months of 2012, the Company received a dividend payment of \$11.0 million from the Bank. At June 30, 2012, the Company had received notice from the Federal Reserve Bank of Philadelphia that it does not object to the payment of \$5.6 million in dividends from the Bank to the Company over the next quarter although the Federal Reserve reserved the right to revoke its decision at any time if a safety and soundness concern arises throughout the period. The Company's ability to continue to pay dividends will be largely dependent upon capital distributions from the Bank, which may be adversely affected by capital constraints imposed by the applicable regulations. The Company cannot predict whether the Bank will be permitted under applicable regulations to pay a dividend to the Company. If the Bank is unable to pay dividends to the Company, the Company may not have the liquidity necessary to pay a dividend in the future or pay a dividend at the same rate as historically paid, or be able to meet current debt obligations. At June 30, 2012, OceanFirst Financial Corp. held \$16.5 million in cash and \$4.8 million in investment securities available for sale.

As of June 30, 2012, the Bank exceeded all regulatory capital requirements as follows (in thousands):

|                           | Actual     |       | Required  |       |
|---------------------------|------------|-------|-----------|-------|
|                           | Amount     | Ratio | Amount    | Ratio |
| Tangible capital          | \$ 216,164 | 9.45% | \$ 34,285 | 1.50% |
| Core capital              | 216,164    | 9.45  | 91,427    | 4.00  |
| Tier 1 risk-based capital | 216,164    | 14.57 | 59,301    | 4.00  |
| Total risk-based capital  | 233,821    | 15.76 | 118,601   | 8.00  |

**Table of Contents**

The Bank is considered a well-capitalized institution under the Prompt Corrective Action Regulations.

At June 30, 2012, the Company maintained tangible common equity of \$218.8 million, for a tangible common equity to assets ratio of 9.57%.

**Off-Balance-Sheet Arrangements and Contractual Obligations**

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate, and liquidity risk or to optimize capital. Customer transactions are used to manage customers' requests for funding. These financial instruments and commitments include unused lines of credit and commitments to extend credit. The Company also has outstanding commitments to sell loans amounting to \$17.7 million.

The following table shows the contractual obligations of the Company by expected payment period as of June 30, 2012 (in thousands):

| Contractual Obligation                     | Total      | Less than<br>one year | 1-3 years  | 3-5 years | More than<br>5 years |
|--|------------|-----------------------|------------|-----------|----------------------|
| Debt Obligations                           | \$ 341,899 | \$ 135,399            | \$ 144,000 | \$ 40,000 | \$ 22,500            |
| Commitments to Originate Loans             | 79,677     | 79,677                |            |           |                      |
| Commitments to Fund Unused Lines of Credit | 230,677    | 230,677               |            |           |                      |

Commitments to originate loans and commitments to fund unused lines of credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company's exposure to credit risk is represented by the contractual amount of the instruments.

**Non-Performing Assets**

The following table sets forth information regarding the Company's non-performing assets consisting of non-performing loans and Other Real Estate Owned (OREO). It is the policy of the Company to cease accruing interest on loans 90 days or more past due or in the process of foreclosure.

|                                    | June 30,<br>2012 | December 31,<br>2011 |

## Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

|  |       |       |
|--|-------|-------|
| Allowance for loan losses as a percent of total loans receivable   | 1.12% | 1.15% |
| Allowance for loan losses as percent of total non-performing loans | 39.92 | 41.42 |
| Non-performing loans as a percent of total loans receivable        | 2.82  | 2.77  |
| Non-performing assets as a percent of total assets                 | 2.08  | 2.00  |

Included in the non-performing loan total at June 30, 2012 was \$16.3 million of troubled debt restructured loans, as compared to \$14.5 million of troubled debt restructured loans at December 31, 2011. Non-performing loans are concentrated in one-to-four family loans which comprise 62.7% of the total. At June 30, 2012, the average weighted loan-to-value ratio of non-performing one-to-four family loans, after any related charge-offs, was 61% using appraisal values at time of origination and 82% using updated appraisal values. Appraisals are updated for all non-performing loans secured by real estate and

---

**Table of Contents**

subsequently updated annually if the loan remains delinquent for an extended period. At June 30, 2012, the average weighted loan-to-value ratio of the total one-to-four family loan portfolio was 59% using appraisal values at time of origination. Based upon sales data for the first half of 2012 from the Ocean and Monmouth Counties Multiple Listing Service, home values in the Company's primary market area have declined by approximately 20% from the peak of the market in 2006. Individual home values may move more or less than the average based upon the specific characteristics of the property. There can be no assurance that home values will not decline further, possibly resulting in losses to the Company. The largest non-performing loan relationship consists of several credits totaling \$6.4 million. The loans are collateralized by commercial and residential real estate, all business assets and also carry a personal guarantee. An appraisal performed in May 2011 values the real estate collateral at \$9.1 million. In November 2011, the Company entered into a troubled debt restructuring with the borrower which reduced the interest rate in exchange for additional collateral. The Company's non-performing loans remain at elevated levels partly due to the extended foreclosure process in the State of New Jersey. The protracted foreclosure process delays the Company's ability to resolve non-performing loans through the sale of the underlying collateral. Of the non-performing one-to-four family loans at June 30, 2012, 71% were originated by alternative Bank delivery channels which were previously shuttered. Subsequent to June 30, 2012, the Company sold its largest non-performing one-to-four family mortgage loan at a modest recovery above its carrying value of \$2.6 million.

The Company classifies loans and other assets in accordance with regulatory guidelines. At June 30, 2012, the Company had \$10.3 million in loans designated as Special Mention, \$74.0 million in loans classified as Substandard and \$1.2 million in loans and other assets classified as Doubtful, as compared to \$11.5 million, \$63.1 million and \$74,600, respectively, at December 31, 2011. The largest Special Mention loan at June 30, 2012 is a commercial real estate mortgage to a local builder for \$1.8 million. The loan is well collateralized by residential property and several vacant lots. The largest Substandard loan relationship is comprised of several credit facilities to a building supply company with an aggregate balance of \$9.5 million, which was current as to payments, but criticized due to poor, but improving, operating results. The loans are collateralized by commercial real estate and other business assets. The largest Doubtful asset with a balance of \$1.2 million is a portion of a commercial real estate loan to a self-storage facility. The remaining balance, also \$1.2 million, is rated Substandard. In September 2011, the Company entered into a troubled debt restructuring with the borrower which reduced the interest rate and extended the payment term. All scheduled payments under the restructured terms have been made since that date. In addition to loan classifications, the Company classified investment securities with an amortized cost of \$25.0 million and a carrying value of \$19.5 million as Substandard, which represents the amount of investment securities with a credit rating below investment grade from one of the internationally recognized credit rating services. These securities are all current as to principal and interest payments.

**Critical Accounting Policies**

Note 1 to the Company's Audited Consolidated Financial Statements for the year ended December 31, 2011 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011 (the 2011 Form 10-K), as supplemented by this report, contains a summary of significant accounting policies. Various elements of these accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. Certain assets are carried in the consolidated statements of financial condition at fair value or the lower of cost or fair value. Policies with respect to the methodologies used to determine the allowance for loan losses, the reserve for repurchased loans and the valuation of Mortgage Servicing Rights and judgments regarding securities impairment are the most critical accounting policies because they are important to the presentation of the Company's financial condition and results of operations. These judgments and policies involve a higher degree of complexity and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions and estimates could result in material differences in the results of operations or financial condition. These critical accounting policies and their application are reviewed periodically and, at least annually, with the Audit Committee of the Board of Directors.

**Private Securities Litigation Reform Act Safe Harbor Statement**

In addition to historical information, this quarterly report contains certain forward-looking statements within the meaning of the Private Securities Reform Act of 1995 which are based on certain assumptions and describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words believe, expect, intend, anticipate, estimate, project, will, may, view, opportunity, potential, or similar expressions or expressions of probability or confidence. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and the subsidiaries include, but are not limited to, changes in interest rates, general economic conditions, levels of unemployment in the Bank's lending area, real estate market values in the Bank's lending area, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government including policies of the U.S. Treasury and the Board of Governors of the Federal Reserve System, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area and accounting principles and guidelines. These risks and uncertainties are further discussed in the 2011 Form 10-K and subsequent securities filings and should be considered in evaluating forward-looking statements and undue reliance should not be placed on these statements. The Company does not undertake and specifically disclaims any obligation to publicly release the result of any revisions which may be made to any

**Table of Contents**

forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. Further description of the risks and uncertainties to the business are included in Item 1, Business and Item 1A, Risk Factors of the Company's 2011 Form 10-K and Item 1A of this Form 10-Q.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The Company's interest rate sensitivity is monitored through the use of an interest rate risk (IRR) model. The following table sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at June 30, 2012, which were anticipated by the Company, based upon certain assumptions, to reprice or mature in each of the future time periods shown.

At June 30, 2012, the Company's one-year gap was negative 2.52% as compared to negative 0.03% at December 31, 2011.

| At June 30, 2012<br>(dollars in thousands)   | 3 Months<br>or Less | More than<br>3 Months to<br>1 Year | More than<br>1 Year to<br>3 Years | More than<br>3 Years to<br>5 Years | More than<br>5 Years | Total             |

(1) Interest-earning assets are included in the period in which the balances are expected to be redeployed and/or repriced as a result of anticipated prepayments, scheduled rate adjustments, and contractual maturities.

(2) For purposes of the gap analysis, loans receivable includes loans held for sale and non-performing loans gross of the allowance for loan losses, unamortized discounts and deferred loan fees.

(3) Interest sensitivity gap represents the difference between interest-earning assets and interest-bearing liabilities.

## Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

Additionally, the table below sets forth the Company's exposure to interest rate risk as measured by the change in net portfolio value ( NPV ) and net interest income under varying rate shocks as of June 30, 2012 and December 31, 2011. All methods used to measure interest rate sensitivity involve the use of assumptions, which may tend to oversimplify the manner in which actual yields and costs respond to changes in market interest rates. The Company's interest rate sensitivity should be reviewed in conjunction with the financial statements and notes thereto contained in the 2011 Form 10-K.

**Item 4. Controls and Procedures**

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective. Disclosure controls and procedures are the controls and other procedures that are designed to ensure that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (SEC) (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. In addition, based on that evaluation, there were no changes in the Company's internal control over financial reporting during the quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

See accompanying Notes to Unaudited Consolidated Financial Statements.

**Table of Contents****OceanFirst Financial Corp.****Notes To Unaudited Consolidated Financial Statements****Note 1. Basis of Presentation**

The accompanying unaudited consolidated financial statements include the accounts of OceanFirst Financial Corp. (the Company) and its wholly-owned subsidiary, OceanFirst Bank (the Bank), and its wholly-owned subsidiaries, Columbia Home Loans, LLC (Columbia), OceanFirst REIT Holdings, Inc., OceanFirst Services, LLC and 975 Holdings, LLC. The operations of Columbia were shuttered in late 2007.

The interim consolidated financial statements reflect all normal and recurring adjustments which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and six months ended June 30, 2012 are not necessarily indicative of the results of operations that may be expected for all of 2012. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statements of financial condition and the results of operations for the period. Actual results could differ from these estimates.

Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC).

These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report to Stockholders on Form 10-K for the year ended December 31, 2011.

**Note 2. Earnings per Share**

The following reconciles shares outstanding for basic and diluted earnings per share for the three and six months ended June 30, 2012 and 2011 (in thousands):

|  | Three months ended<br>June 30, |        | Six months ended<br>June 30, |        |
|--|--------------------------------|--------|------------------------------|--------|
|  | 2012                           | 2011   | 2012                         | 2011   |
| Weighted average shares issued net of Treasury shares                            | 18,468                         | 18,845 | 18,560                       | 18,837 |
| Less: Unallocated ESOP shares  | (484)                          | (519)  | (489)                        | (523)  |
| Unallocated incentive award shares and shares held by deferred compensation plan | (95)                           | (145)  | (94)                         | (142)  |
| Average basic shares outstanding   | 17,889                         | 18,181 | 17,977                       | 18,172 |
| Add: Effect of dilutive securities:  |                                |        |                              |        |
| Shares held by deferred compensation plan  | 41                             | 50     | 41                           | 49     |
| Average diluted shares outstanding   | 17,930                         | 18,231 | 18,018                       | 18,221 |

For the three months ended June 30, 2012 and 2011, antidilutive stock options of 1,975,000 and 1,904,000, respectively, were excluded from earnings per share calculations. For the six months ended June 30, 2012 and 2011 antidilutive stock options of 2,009,000 and 1,840,000, respectively, were excluded from earning per share calculation.

**Note 3. Investment Securities Available for Sale**

The amortized cost and estimated market value of investment securities available for sale at June 30, 2012 and December 31, 2011 are as follows (in thousands):

**Table of Contents**

At June 30, 2012, the amortized cost, estimated market value and credit rating of the individual corporate debt securities in an unrealized loss position for greater than one year are as follows (in thousands):

| Security Description | Amortized Cost | Estimated Market Value | Credit Rating<br>Moody's/S&P |
|----------------------|----------------|------------------------|------------------------------|
| BankAmerica Capital  | \$ 15,000      | \$ 12,070              | Ba2/BB+                      |
| Chase Capital        | 10,000         | 7,215                  | Baa2/BBB                     |
| Wells Fargo Capital  | 5,000          | 3,988                  | A3/A-                        |
| Huntington Capital   | 5,000          | 3,810                  | Baa3/BB+                     |
| Keycorp Capital      | 5,000          | 3,811                  | Baa3/BBB-                    |
| PNC Capital          | 5,000          | 4,002                  | Baa2/BBB                     |
| State Street Capital | 5,000          | 3,908                  | A3/BBB+                      |
| SunTrust Capital     | 5,000          | 3,630                  | Baa3/BB+                     |
|                      | \$ 55,000      | \$ 42,434              |                              |

At June 30, 2012, the market value of each corporate debt security was below cost. However, the estimated market value of the corporate debt securities portfolio increased over prior periods. The corporate debt securities are issued by other financial institutions with credit ratings ranging from a high of A3 to a low of Ba2 as rated by one of the internationally recognized credit rating services. These floating-rate securities were purchased during the period May 1998 to September 1998 and have paid coupon interest continuously since issuance. Floating-rate debt securities such as these pay a fixed interest rate spread over 90-day LIBOR. Subsequent to purchase, the required spread increased for these types of securities causing a decline in the market price. The Company concluded that unrealized losses on available for sale securities were only temporarily impaired at June 30, 2012. In concluding that the impairments were only temporary, the Company considered several factors in its analysis. The Company noted that each issuer made all the contractually due payments when required. There were no defaults on principal or interest payments and no interest payments were deferred. All of the financial institutions were also considered well-capitalized. Based on management's analysis of each individual security, the issuers appear to have the ability to meet debt service requirements for the foreseeable future. Furthermore, although these investment securities are available for sale, the Company does not have the intent to sell these securities and it is more likely than not that the Company will not be required to sell the securities. The Company has held the securities continuously since 1998 and expects to receive its full principal at maturity in 2028 or prior if called by the issuer. The Company has historically not actively sold investment securities and does not utilize the securities portfolio as a source of liquidity. The Company's long range liquidity plans indicate adequate sources of liquidity outside the securities portfolio.

Capital markets in general and the market for these corporate securities in particular have been disrupted since the second half of 2007. In its analysis, the Company considered that the severity and duration of unrecognized losses was at least partly due to the illiquidity caused by market disruptions. Since that time, markets have stabilized partly due to steps taken by the U.S. Treasury, the Federal Reserve Board, the Federal Deposit Insurance Corporation and foreign central banks to restore liquidity and confidence in the capital markets. Each of these issuers has been able to raise capital in recent years and the fair values of these securities have increased since the lows reached in the second half of 2008.

Due to the reasons noted above, especially the continuing restoration of the capital markets, the improved valuation of the corporate securities portfolio from the 2008 lows, the capital position of the issuers and the uninterrupted payment of all contractually due interest, management has determined that only a temporary impairment existed at June 30, 2012.

**Note 4. Mortgage-Backed Securities Available for Sale**

The amortized cost and estimated market value of mortgage-backed securities available for sale at June 30, 2012 and December 31, 2011 are as follows (in thousands):

| June 30, 2012 | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Estimated Market Value |
|---------------|----------------|------------------------|-------------------------|------------------------|
|---------------|----------------|------------------------|-------------------------|------------------------|

There were no gains or losses realized on the sale of mortgage-backed securities available for sale for the three and six months ended June 30, 2012 and 2011.

The contractual maturities of mortgage-backed securities available for sale vary; however, the effective lives are expected to be shorter than the contractual maturity date due to principal prepayments.

The estimated market value and unrealized loss for mortgage-backed securities available for sale at June 30, 2012 and December 31, 2011, segregated by the duration of the unrealized loss are as follows (in thousands).

| June 30, 2012 | Less than 12 months |                      | 12 months or longer |                      | Total           |                      |

| FHLMC             | \$ 24,662           | \$ (48)              | \$                  | \$                   | \$ 24,662       | \$ (48)              |
| FNMA              | 15,348              | (21)                 |                     |                      | 15,348          | (21)                 |
|                   | \$ 40,010           | \$ (69)              | \$                  | \$                   | \$ 40,010       | \$ (69)              |

The mortgage-backed securities in loss positions are issued and guaranteed by either FHLMC or FNMA, corporations which are chartered by the United States Government and whose debt obligations are typically rated AA+ by one of the internationally-recognized credit rating services. FHLMC and FNMA have been under the conservatorship of the Federal Housing Financial Agency since September 8, 2008. The conservatorships have no specified termination date. Also, FHLMC and FNMA have entered into Stock Purchase Agreements, which following the issuance of Senior Preferred Stock and Warrants to the United States Treasury, provide FHLMC and FNMA funding commitments from the United States Treasury. The Company considers the unrealized losses to be the result of changes in interest rates which over time can have both a positive and negative impact on the estimated market value of the mortgage-backed securities. Although these mortgage-backed securities are available for sale, the Company does not intend to sell these securities and it is more likely than not that the Bank will not be required to sell the securities before recovery of their amortized cost. As a result, the Company concluded that unrealized losses on these available for sale securities were only temporarily impaired at June 30, 2012.

**Table of Contents****Note 5. Loans Receivable, Net**

Loans receivable, net at June 30, 2012 and December 31, 2011 consisted of the following (in thousands):

|   | June 30,<br>2012    | December 31, 2011   |
|---|---------------------|---------------------|
| <b>Real estate:</b>                           |                     |                     |

| Allowance for loan losses                     | (17,657)            | (18,230)            |
| <b>Loans receivable, net</b>                  | <b>\$ 1,548,935</b> | <b>\$ 1,563,019</b> |

At June 30, 2012 and December 31, 2011, loans in the amount of \$44,232,000 and \$44,008,000, respectively, were three or more months delinquent or in the process of foreclosure and the Company was not accruing interest income on these loans. There were no loans ninety days or greater past due and still accruing interest. Non-accrual loans include both smaller balance homogenous loans that are collectively evaluated for impairment and individually classified impaired loans.

The Company defines an impaired loan as all non-accrual commercial real estate, multi-family, land, construction and commercial loans in excess of \$250,000. Impaired loans also include all loans modified as troubled debt restructurings. At June 30, 2012, the impaired loan portfolio totaled \$30,009,000 for which there was a specific allocation in the allowance for loan losses of \$2,195,000. At December 31, 2011, the impaired loan portfolio totaled \$28,491,000 for which there was a specific allocation in the allowance for loan losses of \$2,165,000. The average balance of impaired loans was \$29,369,000 and \$28,843,000 for the three and six months ended June 30, 2012, respectively, and was \$24,301,000 and \$20,771,000 for the three and six months ended June 30, 2011.

An analysis of the allowance for loan losses for the three and six months ended June 30, 2012 and 2011 is as follows (in thousands):

|                                 | Three months ended<br>June 30, |                  | Six months ended<br>June 30, |                  |

|  | \$ 44,232                                | \$ 44,008         |

As used in these footnotes, loans Originated by mortgage company are mortgage loans originated under the Bank's underwriting guidelines by the Bank's shuttered mortgage company, and retained as part of the Bank's mortgage portfolio. These loans have significantly higher delinquency rates than similar loans originated by the Bank. Loans Originated by mortgage company non-prime are subprime or Alt-A loans which were originated for sale into the secondary market.

The Company categorizes all commercial and commercial real estate loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation and current economic trends, among other factors. This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

**Special Mention.** Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Bank's credit position at some future date.

**Substandard.** Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the borrower or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

**Doubtful.** Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

**Table of Contents**

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass related loans. Loans not rated are included in groups of homogeneous loans. As of June 30, 2012 and December 31, 2011, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows (in thousands):

|                          | Pass       | Special<br>Mention | Substandard | Doubtful | Total      |
|--------------------------|------------|--------------------|-------------|----------|------------|

|                                      | \$ 727,889              | \$ 140,491                       | \$ 4,873                    | \$ 6,657 | \$ 192,918 |

The Company classifies certain loans as troubled debt restructurings ( TDR ) when credit terms to a borrower in financial difficulty are modified. The modifications may include a reduction in rate, an extension in term and/or the capitalization of past due amounts. Included in the non-accrual loan total at June 30, 2012 and December 31, 2011 were \$16,317,000 and \$14,491,000, respectively, of troubled debt restructurings. At June 30, 2012 and December 31, 2011, the Company has allocated \$2,146,000 and \$1,985,000, respectively, of specific reserves to loans which are classified as troubled debt restructurings. Non-accrual loans which become troubled debt restructurings are returned to accrual status after six months of performance. In addition to the troubled debt restructurings included in non-accrual loans, the Company also has loans

## Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

classified as troubled debt restructuring which are accruing at June 30, 2012 and December 31, 2011, which totaled \$12,522,000 and \$13,118,000, respectively. Troubled debt restructurings with six months of performance are considered in the allowance for loan losses similar to other performing loans. Troubled debt restructurings which are non-accrual or classified are considered in the allowance for loan losses similar to other non-accrual or classified loans.

The following table presents information about troubled debt restructurings which occurred during the three and six months ended June 30, 2012 and troubled debt restructurings modified within the previous year and which defaulted during the three and six months ended June 30, 2012.

|  | 2012                           | 2011   | 2012                         | 2011   |
| Balance at beginning of period           | \$ 855                         | \$ 809 | \$ 705                       | \$ 809 |
| Provision charged to operations          | 100                            |        | 250                          |        |
| Loss on loans repurchased or settlements |                                |        |                              |        |
| Balance at end of period                 | \$ 955                         | \$ 809 | \$ 955                       | \$ 809 |

The reserve for repurchased loans was established to provide for expected losses related to outstanding loan repurchase requests and additional repurchase requests which may be received on loans previously sold to investors. In establishing the reserve for repurchased loans, the Company considered all types of sold loans. At June 30, 2012, there were 10 outstanding loan repurchase requests, which the Company is disputing, on loans with a total principal balance of \$3.1 million as compared to four outstanding loan repurchase requests on loans with a principal balance of \$1.2 million at December 31, 2011. The Company prepares a comprehensive analysis of the adequacy of the reserve for repurchased loans at each quarter-end. The reserve includes a specific loss estimate on the outstanding loan repurchase requests based on the estimated fair value of the underlying collateral modified by the likelihood of loss which was estimated based on historical experience. The reserve also includes a general loss estimate based on an estimate of loans likely to be returned for repurchase and the estimated loss on those loans. In establishing the reserve, the Company considers recent and historical experience, product type and volume of loan sales and the general economic environment.

**Table of Contents****Note 7. Deposits**

The major types of deposits at June 30, 2012 and December 31, 2011 were as follows (in thousands):

| Type of Account           | June 30,<br>2012 | December 31, 2011 |
|---------------------------|------------------|-------------------|
| Non-interest-bearing      | \$ 184,928       | \$ 142,436        |
| Interest-bearing checking | 911,347          | 942,402           |
| Money market deposit      | 127,944          | 123,105           |
| Savings                   | 242,761          | 229,241           |
| Time deposits             | 241,396          | 268,899           |
| Total deposits            | \$ 1,708,376     | \$ 1,706,083      |

Included in time deposits at June 30, 2012 and December 31, 2011, is \$61,280,000 and \$77,053,000, respectively, in deposits of \$100,000 and over.

**Note 8. Recent Accounting Pronouncements**

Accounting Standards Update No. 2011-05, *Comprehensive Income* requires that all non-owner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. The option to present components of other comprehensive income as part of the statement of changes in stockholders' equity was eliminated. The standard is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 and did not have a material effect on the Company's consolidated financial statements. The Company has included a separate Consolidated Statements of Comprehensive Income as part of these financial statements.

Accounting Standards Update No. 2011-04, *Fair Value Measurement, Amendments to achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs* develops common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRSs). The amendments are effective for interim and annual periods beginning after December 15, 2011. The adoption of this Accounting Standard Update did not have a material effect on the Company's consolidated financial statements.

Accounting Standards Update No. 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*, amends Topic 860 (Transfers and Servicing) where an entity may or may not recognize a sale upon the transfer of financial assets subject to repurchase agreements, based on whether or not the transferor has maintained effective control. In the assessment of effective control, Accounting Standard Update 2011-03 has removed the criteria that requires transferors to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee. Other criteria applicable to the assessment of effective control have not been changed. This guidance is effective for prospective periods beginning on or after December 15, 2011. Early adoption is prohibited. The adoption of this Accounting Standard Update did not have a material effect on the Company's consolidated financial statements.

**Note 9. Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair market measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or the most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

The Company uses valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a

discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability and developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability and developed based on the best information available in the circumstances. In that regard, a

## **Table of Contents**

fair value hierarchy has been established for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Movements within the fair value hierarchy are recognized at the end of the applicable reporting period. There were no transfers between the levels of the fair value hierarchy for the three and six months ended June 30, 2012. The fair value hierarchy is as follows:

**Level 1 Inputs** Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

**Level 2 Inputs** Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlations or other means.

**Level 3 Inputs** Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

## **Assets and Liabilities Measured at Fair Value**

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis, that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

### **Investments and Mortgage-Backed Securities**

Securities classified as available for sale are reported at fair value utilizing Level 1 and Level 2 inputs. In general, fair value is based upon quoted market prices, where available. Most of the Company's investment and mortgage-backed securities, however, are fixed income instruments that are not quoted on an exchange, but are bought and sold in active markets. Prices for these instruments are obtained through third party pricing vendors or security industry sources that actively participate in the buying and selling of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities, but comparing the securities to benchmark or comparable securities.

Fair value estimates are made at a point in time, based on relevant market data as well as the best information available about the security. Illiquid credit markets have resulted in inactive markets for certain of the Company's securities. As a result, there is limited observable market data for these assets. Fair value estimates for securities for which limited observable market data is available are based on judgments regarding current economic conditions, liquidity discounts, credit and interest rate risks, and other factors. These estimates involve significant uncertainties and judgments and cannot be determined with precision. As a result, such calculated fair value estimates may not be realizable in a current sale or immediate settlement of the security.

The Company utilizes third party pricing services to obtain market values for its corporate bonds. Management's policy is to obtain and review all available documentation from the third party pricing service relating to their market value determinations, including their methodology and summary of inputs. Management reviews this documentation, makes inquiries of the third party pricing service and makes a determination as to the level of the valuation inputs. Based on the Company's review of the available documentation from the third party pricing service, management concluded that Level 2 inputs were utilized. The significant observable inputs include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities and observations of equity and credit default swap curves related to the issuer.

### **Other Real Estate Owned and Impaired Loans**

Other real estate owned and loans measured for impairment based on the fair value of the underlying collateral are recorded at estimated fair value, less estimated selling costs of 20%. Fair value is based on independent appraisals.

**Table of Contents**

The following table summarizes financial assets and financial liabilities measured at fair value as of June 30, 2012 and December 31, 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

|  | Fair Value Measurements at Reporting Date Using: |                |                |                |
|--|--|----------------|----------------|----------------|
|  | Total Fair Value                                 | Level 1 Inputs | Level 2 Inputs | Level 3 Inputs |
| <b>June 30, 2012</b>   |  |                |                |                |
| Items measured on a recurring basis:   |  |                |                |                |
| Investment securities available for sale:  |  |                |                |                |
| U.S. Agency obligations  | \$ 129,084                                       | \$             | \$ 129,084     | \$             |

| Loans measured for impairment based on the fair value of the underlying collateral | 8,773  |                |                | 8,773          |

**Assets and Liabilities Disclosed at Fair Value**

A description of the valuation methodologies used for assets and liabilities disclosed at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy is set forth below.

**Cash and Due from Banks**

For cash and due from banks, the carrying amount approximates fair value.

**Federal Home Loan Bank of New York Stock**

The fair value for Federal Home Loan Bank of New York stock is its carrying value since this is the amount for which it could be redeemed. There is no active market for this stock and the Company is required to maintain a minimum investment based upon the outstanding balance of mortgage related assets and outstanding borrowings.

**Loans**

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential mortgage, construction, consumer and commercial. Each loan category is further segmented into fixed and adjustable rate interest terms.

## Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

Fair value of performing and non-performing loans was estimated by discounting the future cash flows, net of estimated prepayments, at a rate for which similar loans would be originated to new borrowers with similar terms. Fair values estimated in this manner do not fully incorporate an exit price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

### Deposits Other than Time Deposits

The fair value of deposits with no stated maturity, such as non-interest-bearing demand deposits, savings, and interest-bearing checking accounts and money market accounts are, by definition, equal to the amount payable on demand. The related insensitivity of the majority of these deposits to interest rate changes creates a significant inherent value which is not reflected in the fair value reported.

### Time Deposits

The fair value of time deposits are based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

**Table of Contents****Securities Sold Under Agreements to Repurchase with Retail Customers**

Fair value approximates the carrying amount as these borrowings are payable on demand and the interest rate adjusts monthly.

**Borrowed Funds**

Fair value estimates are based on discounting contractual cash flows using rates which approximate the rates offered for borrowings of similar remaining maturities.

The book value and estimated fair value of the Bank's significant financial instruments not recorded at fair value as of June 30, 2012 and December 31, 2011 are presented in the following tables (in thousands):

| June 30, 2012  | Book Value | Fair Value Measurements at Reporting Date Using: |                |                |
|--|------------|--|----------------|----------------|

| Securities sold under agreements to repurchase with retail customers | 66,101     | 66,101   |                |                |
| Federal Home Loan Bank advances and other borrowings                 | 293,500    |  | 301,778        |                |

**Limitations**

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because a limited market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other significant unobservable inputs. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial assets or liabilities include deferred tax assets, and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

**Note 10. Subsequent Event**

On August 2, 2012, the Company and Vito R. Nardelli agreed that he will resign as President and Chief Operating Officer effective August 31, 2012. Upon Mr. Nardelli's resignation, John R. Garbarino, the Company's Chairman and CEO, will

**Table of Contents**

assume Mr. Nardelli's responsibilities as the principal operating officer of the Company on an interim basis. Under the terms of the Separation Agreement with Mr. Nardelli, the Company will recognize a pre-tax expense of \$1.0 million in the third quarter of 2012.

**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

The Company is not engaged in any legal proceedings of a material nature at the present time. From time to time, the Company is a party to routine legal proceedings within the normal course of business. Such routine legal proceedings in the aggregate are believed by management to be immaterial to the Company's financial condition or results of operations.

**Item 1A. Risk Factors**

For a summary of risk factors relevant to the Company, see Part I, Item 1A, "Risk Factors," in the 2011 Form 10-K. There were no material changes to risk factors relevant to the Company's operations since December 31, 2011.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

On October 31, 2011, the Company announced its intention to repurchase up to 942,306 shares or 5% of its outstanding common stock. Information regarding the Company's common stock repurchases for the three month period ended June 30, 2012 is as follows:

| Period                               | Total<br>Number of<br>Shares<br>Purchased | Average Price<br>Paid per<br>Share | Total Number of<br>Shares<br>Purchased as<br>Part of Publicly<br>Announced Plans or<br>Programs | Maximum<br>Number of<br>Shares<br>that May Yet Be<br>Purchased Under<br>the<br>Plans or Programs |
|--------------------------------------|---|------------------------------------|---|--|
| April 1, 2012 through April 30, 2012 | 22,500                                    | 14.28                              | 22,500  | 641,152  |
| May 1, 2012 through May 31, 2012     | 232,537                                   | 14.48                              | 232,537   | 408,615  |
