DCT INDUSTRIAL TRUST INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

Note 1 Organization

DCT Industrial Trust Inc. is a leading industrial real estate company specializing in the acquisition, development, leasing and management of bulk distribution and light industrial properties located in high-volume distribution markets in the United States and Mexico. As used herein,

DCT Industrial Trust, DCT, the Company, we, our and us refer to DCT Industrial Trust Inc. and its consolidated subsidiaries and partners except where the context otherwise requires. We were formed as a Maryland corporation in April 2002 and have elected to be treated as a real estate investment trust (REIT) for United States (U.S.) federal income tax purposes. We are structured as an umbrella partnership REIT under which substantially all of our current and future business is, and will be, conducted through a majority owned and controlled subsidiary, DCT Industrial Operating Partnership LP (the operating partnership), a Delaware limited partnership, for which DCT Industrial Trust Inc. is the sole general partner. We own our properties through our operating partnership and its subsidiaries. As of September 30, 2012, we owned approximately 92% of the outstanding equity interests in our operating partnership.

As of September 30, 2012, the Company owned interests in approximately 75.2 million square feet of properties leased to approximately 840 customers, including:

58.0 million square feet comprising 388 consolidated properties owned in our operating portfolio which were 91.8% occupied;

16.7 million square feet comprising 51 unconsolidated properties which were 84.2% occupied and operated on behalf of five institutional capital management partners;

0.2 million square feet comprising two consolidated properties under redevelopment; and

0.3 million square feet comprising two consolidated buildings in development.

The Company also has four consolidated buildings and one unconsolidated expansion project under construction and several projects in predevelopment. See Notes to Consolidated Financial Statements Note 3 Investment in Properties for further detail related to our development activity.

Note 2 Summary of Significant Accounting Policies

Interim Financial Information

The accompanying unaudited Consolidated Financial Statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP) and with the instructions to Form 10-Q and Article 10 of Regulation S-X for interim financial information. Accordingly, these statements do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, the accompanying unaudited Consolidated Financial Statements include all adjustments, consisting of normal recurring items, necessary for their fair presentation in conformity with GAAP. Interim results are not necessarily indicative of results for a full year. The information included in this Form 10-Q should be read in conjunction with our audited Consolidated Financial Statements as of December 31, 2011 and related notes thereto as filed on Form 10-K on February 29, 2012.

Basis of Presentation

The accompanying Consolidated Financial Statements include the financial position, results of operations and cash flows of the Company, its wholly-owned qualified REIT and taxable REIT subsidiaries, the operating partnership and its consolidated joint ventures, in which it has a

Edgar Filing: DCT Industrial Trust Inc. - Form 10-Q

controlling interest. Third-party equity interests in the operating partnership and consolidated joint ventures are reflected as noncontrolling interests in the Consolidated Financial

Table of Contents

Statements. We also have noncontrolling partnership interests in unconsolidated institutional capital management and other joint ventures, which are accounted for under the equity method. All significant intercompany amounts have been eliminated.

Principles of Consolidation

We hold interests in both consolidated and unconsolidated joint ventures. All joint ventures over which we have financial and operating control, and variable interest entities (VIE s) in which we have determined that we are the primary beneficiary, are included in the Consolidated Financial Statements. We use the equity method of accounting for joint ventures over which we do not have a controlling interest or where we do not exercise significant control over major operating and management decisions, but where we exercise significant influence and include our share of earnings or losses of these joint ventures in our consolidated net loss.

We analyze our joint ventures in accordance with GAAP to determine whether they are VIE s and, if so, whether we are the primary beneficiary. Our judgment with respect to our level of influence or control over an entity and whether we are the primary beneficiary of a VIE involves consideration of various factors including the form of our ownership interest, our representation on the entity s board of directors, the size of our investment (including loans) and our ability to participate in major decisions. Our ability to correctly assess our influence or control over an entity affects the presentation of these investments in the Consolidated Financial Statements and, consequently, our financial position and results of operations.

Reclassifications

Certain items in our Consolidated Financial Statements for 2011 have been reclassified to conform to the 2012 presentation.

Use of Estimates

The preparation of the Consolidated Financial Statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Capitalization of Costs

We capitalize costs directly related to the development, predevelopment, redevelopment or improvement of our investment in real estate, referred to as capital projects and other activities included within this paragraph. Costs associated with our capital projects are capitalized as incurred. If the project is abandoned, these costs are expensed during the period in which the project is abandoned. Costs considered for capitalization include, but are not limited to, construction costs, interest, real estate taxes and insurance, if appropriate. We capitalize indirect costs such as personnel, office and administrative expenses that are directly related to our development projects based on an estimate of the time spent on the construction and development activities. These costs are capitalized only during the period in which activities necessary to ready an asset for its intended use are in progress and such costs are incremental and identifiable to a specific activity to get the asset ready for its intended use. We determine when the capitalization period begins and ends through communication with project and other managers responsible for the tracking and oversight of individual projects. In the event that the activities to ready the asset for its intended use are suspended, the capitalization period will cease until such activities are resumed. In addition, we capitalize initial direct costs incurred for successful origination of new leases. Costs incurred for maintaining and repairing our properties, which do not extend their useful lives, are expensed as incurred.

Interest is capitalized based on actual capital expenditures from the period when development or redevelopment commences until the asset is ready for its intended use, at the weighted average borrowing rate during the period. We also capitalize interest on our qualifying investments in unconsolidated joint ventures based on the average capital invested in a venture during the period when the venture has activities in progress necessary to commence its planned principle operations, at our weighted average borrowing rate during the period. A qualifying investment is an investment in an unconsolidated joint venture provided that our investee s activities include the use of funds to acquire qualifying assets, such as development or predevelopment activities, and planned principle operations have not commenced.

Table of Contents

Discontinued Operations

We classify certain properties and related assets and liabilities as held for sale when certain criteria are met. At such time, the respective assets and liabilities are presented separately on our Consolidated Balance Sheets. We include liabilities related to assets held for sale that will be transferred in the transaction in Liabilities related to assets held for sale. Assets held for sale are reported at the lower of carrying value or estimated fair value less estimated costs to sell. The operating results of such properties are presented in Income (loss) from discontinued operations in current periods and all comparable periods presented. Depreciation is not recorded on properties held for sale; however, depreciation expense recorded prior to classification as held for sale is included in Income (loss) from discontinued operations. Gains on sales of real estate assets are recognized if the specific transaction terms and any continuing involvement in the form of management or financial assistance meet the various sale recognition criteria as defined by GAAP. If the criteria are not met, we defer the gain until such time that the criteria for sale recognition have been met. Net gains on sales and any impairment losses associated with assets held for sale are presented in Income (loss) from discontinued operations when recognized.

Fair Value

The Financial Accounting Standards Board (FASB) issued guidance related to accounting for fair value measurements which defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Fair value is defined as the exit price or price at which an asset (in its highest and best use) would be sold or liability assumed by an informed market participant in a transaction that is not distressed and is executed in the most advantageous market. This guidance provides a framework of how to determine such measurements on reported balances which are required or permitted to be measured at fair value under existing accounting pronouncements and emphasizes that fair value is a market-based rather than an entity-specific measurement. Therefore, our fair value measurement is determined based on the assumptions that market participants would use to price the asset or liability. As a basis for considering market participant assumptions in fair value measurements, this guidance establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions based on the best information available in the circumstances (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates and yield curves that are observable at commonly quoted intervals, and the contracted sales price for assets held for sale. Level 3 inputs are unobservable inputs for the asset or liability that are typically based on management's own assumptions, as there is little, if any, related observable market activity. In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Investment in Properties

We record the assets, liabilities and noncontrolling interests associated with property acquisitions which qualify as business combinations at their respective acquisition-date fair values which are derived using a market, income or replacement cost approach, or a combination thereof. Acquisition-related costs associated with business combinations are expensed as incurred. As defined by GAAP, a business is an integrated set of activities and assets that is capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs, or other economic benefits directly to investors or other owners, members, or participants. We do not consider acquisitions of land or unoccupied buildings to be business combinations. Rather, these transactions are treated as asset acquisitions and recorded at cost.

The fair value of identifiable tangible assets such as land, building, building and land improvements and tenant improvements is determined on an as-if-vacant basis. Management considers Level 3 inputs such as the replacement cost of such assets, appraisals, property condition reports, market data and other related information in determining the fair value of the tangible assets. The difference between the fair value and the face value of debt assumed in connection with an acquisition is recorded as a premium or discount and amortized to Interest expense

Table of Contents

over the life of the debt assumed. The valuation of assumed liabilities is based on the current market rate for similar liabilities. The recorded fair value of intangible lease assets includes Level 3 inputs and represents the value associated with in-place leases which include leasing commissions, legal and other costs, as well as an intangible asset or liability resulting from in-place leases being above or below the market rental rates over the lease term on the date of the acquisition. Intangible lease assets or liabilities are amortized over the reasonably assured lease term of the remaining in-place leases as an adjustment to Rental revenues or Real estate related depreciation and amortization depending on the nature of the intangible.

We have certain properties which we have acquired or removed from service with the intention to redevelop the property. Buildings under redevelopment require significant construction activities prior to being placed back into service. We generally do not depreciate properties classified as redevelopment until the date that the redevelopment properties are ready for their intended use.

Real estate, including land, building, building and land improvements, tenant improvements, leasehold improvements, leasing costs and intangible lease assets and liabilities are stated at historical cost less accumulated depreciation and amortization, unless circumstances indicate that the cost cannot be recovered, in which case, the carrying value of the property is reduced to estimated fair value.

Depreciation and Useful Lives of Real Estate Assets

Depreciation and amortization are computed on a straight-line basis over the estimated useful lives of the related assets or liabilities. Our ability to assess the useful lives of our real estate assets accurately is critical to the determination of the appropriate amount of depreciation and amortization expense recorded and the carrying values of the underlying assets. Any change to the estimated depreciable lives of these assets would have an impact on the depreciation and amortization expense we recognize.

The following table reflects the standard depreciable lives typically used to compute depreciation and amortization. However, such depreciable lives may be different based on the estimated useful life of such assets or liabilities. The carrying value of assets sold or retired and the related accumulated depreciation and/or amortization is derecognized and the resulting gain or loss, if any, is recorded during the period in which such sale or retirement occurs.

Description	Standard Depreciable Life
Land	Not depreciated
Building	20 - 40 years
Building and land improvements	5 - 20 years
Tenant improvements	Shorter of lease term or useful life
Leasehold improvements	5 - 20 years
Leasing costs	Lease term
Other intangible lease assets	Average term of leases for property
Above/below market rent assets/liabilities	Reasonably assured lease term

Depreciation is not recorded on real estate assets currently held for sale or contribution, in pre-development, or being developed or redeveloped until the building is substantially completed and ready for its intended use, not later than one year from cessation of major construction activity.

Impairment of Properties

Investments in properties classified as held for use are carried at cost and evaluated for impairment at least annually and when events or changes in circumstances indicate that the carrying amounts of these assets may not be fully recoverable. Examples of such changes in circumstances include the point at which we deem a building to be held for sale, our intended hold period changes, or when a building remains vacant significantly longer than expected. For investments in properties that we intend to hold long-term, the recoverability is based on the estimated future undiscounted cash flows. If the asset carrying value is not supported on an undiscounted cash flow basis, the amount of impairment is measured as the difference between the carrying value and the fair value of the asset and is reflected in Impairment losses on the Consolidated Statements of Operations. The determination of fair value of real estate assets to be held for use is derived using the discounted cash flow method and involves a number of management assumptions relating to future economic events that could materially affect the determination of the

Table of Contents

ultimate value, and therefore, the carrying amounts of our real estate. Such assumptions are Level 3 inputs and include, but are not limited to, projected vacancy rates, rental rates, property operating expenses and capital expenditures. The capitalization rate is also a significant driving factor in determining the property valuation and requires management's judgment of factors such as market knowledge, historical experience, lease terms, tenant financial strength, economy, demographics, environment, property location, visibility, age, physical condition and expected return requirements, among other things. The aforementioned factors are taken as a whole by management in determining the valuation of investment property. The valuation is sensitive to the actual results of any of these uncertain factors, either individually or taken as a whole. Should the actual results differ from management's estimates, the valuation could be negatively affected and may result in additional impairments recorded in the Consolidated Financial Statements.

Investments in properties classified as held for sale are measured at the lower of their carrying amount or fair value (typically, the contracted sales price, a Level 2 input) less estimated costs to sell. Impairment of assets held for sale is a component of Income (loss) from discontinued operations in the Consolidated Statements of Operations and is further detailed in Note 13 Discontinued Operations and Assets Held for Sale.

Investments in and Advances to Unconsolidated Joint Ventures

We account for our investments in and advances to unconsolidated joint ventures under the equity method because we exercise significant influence over, but do not control, these entities. Under the equity method, these investments (including advances to joint ventures) are initially recorded at cost and are subsequently adjusted to reflect our proportionate share of net earnings or losses of each of the joint ventures, distributions received, contributions made and certain other adjustments, as appropriate. Such investments are included in Investments in and advances to unconsolidated joint ventures in our Consolidated Balance Sheets. Distributions from these investments that are related to earnings from operations are included as operating activities and distributions that are related to capital transactions are included as investing activities in our Consolidated Statements of Cash Flows.

Impairment of Investments in Unconsolidated Joint Ventures

We evaluate our investments in unconsolidated entities for impairment whenever events or changes in circumstances indicate that there may be an other-than-temporary decline in value. To do so, we calculate the estimated fair value of the investment using a market, income or replacement cost approach, or combination thereof. The amount of impairment recognized, if any, would be the excess of the investment's carrying amount over its estimated fair value. We consider various factors to determine if a decline in the value of the investment is other-than-temporary. These factors are Level 2 and 3 inputs and include but are not limited to, age of the venture, our intent and ability to retain our investment in the entity, the financial condition and long-term prospects of the entity, expected term of the investment and the relationships with the other joint venture partners and its lenders. If we believe that the decline in the fair value is temporary, no impairment is recorded. The aforementioned factors are taken as a whole by management in determining the valuation of our investment property. Should the actual results differ from management's estimates, the valuation could be negatively affected and may result in a negative impact on the Consolidated Financial Statements.

Derivative Instruments and Hedging Activities

We record derivatives at fair value which are presented on a gross basis in Other Assets or Other Liabilities in our Consolidated Balance Sheets. Accounting for changes in the fair value of derivatives depends on the intended use of the derivative and the designation of the derivative, whether we have elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Derivatives may also be designated as hedges of the foreign currency exposure of a net investment in a foreign operation. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge.

Table of Contents

As of September 30, 2012, we did not have any hedges in place however, during the three months ended September 30, 2012 we settled one cash flow hedge. For derivatives designated as cash flow hedges, the effective portion of the changes in the fair value of the derivative is initially reported in Accumulated other comprehensive loss in our Consolidated Statement of Changes in Equity (i.e., not included in earnings) and subsequently reclassified into earnings when the hedged transaction affects earnings or the hedging relationship is no longer effective at which time the ineffective portion of the derivative's changes in fair value is recognized directly into earnings. We assess the effectiveness of each hedging relationship whenever financial statements are issued or earnings are reported and at least every three months. We do not use derivatives for trading or speculative purposes.

Our objective in using derivatives is to manage our exposure to interest rate volatility associated with our forecasted debt issuances including refinancing of our fixed-rate debt and certain variable rate borrowings. To accomplish this objective, we primarily use treasury locks, forward-starting swaps and interest rate swaps as part of our cash flow hedging strategy. These derivatives are designed to mitigate the risk of future interest rate fluctuations by providing a future fixed interest rate for a limited, pre-determined period of time.

Revenue Recognition

We record rental revenues on a straight-line basis under which contractual rent increases are recognized evenly over the full lease term. Certain properties have leases that provide for tenant occupancy during periods where no rent is due or where minimum rent payments change during the term of the lease. Accordingly, we record receivables from tenants that we expect to collect over the remaining lease term rather than currently, which are recorded as a straight-line rent receivable. When we acquire a property, the terms of existing leases are considered to commence as of the acquisition date for the purposes of this calculation. The total increase to Rental revenues due to straight-line rent adjustments was approximately \$1.3 million and \$4.4 million, for the three and nine months ended September 30, 2012, respectively, and \$1.7 million and \$6.7 million, for the same periods in 2011, respectively.

Tenant recovery income includes payments and amounts due from tenants pursuant to their leases for real estate taxes, insurance and other recoverable property operating expenses and is recognized as Rental revenues during the same period the related expenses are incurred. Tenant recovery income recognized as Rental revenues was approximately \$14.4 million and \$39.7 million, for the three and nine months ended September 30, 2012, respectively and \$12.3 million and \$34.5 million for the same periods in 2011, respectively.

We maintain an allowance for estimated losses that may result from the inability of our tenants to make required payments. If a tenant fails to make contractual payments beyond any allowance, we may recognize additional bad debt expense in future periods equal to the net outstanding balances. As of September 30, 2012 and December 31, 2011, our allowance for doubtful accounts was approximately \$1.3 million.

In connection with property acquisitions qualifying as business combinations, we may acquire leases with rental rates above or below the market rental rates. Such differences are recorded as an intangible lease asset or liability and amortized to Rental revenues over the reasonably assured term of the related leases. The unamortized balances of these assets and liabilities associated with the early termination of leases are fully amortized to their respective revenue line items in our Consolidated Statements of Operations over the shorter of the expected life of such assets and liabilities or the remaining lease term. The total net impact to Rental revenues due to the amortization of above and below market rents was an increase of approximately \$0.2 million and \$0.6 million for the three and nine months ended September 30, 2012, respectively, and \$0.1 million and \$0.3 million for the same periods in 2011, respectively.

Early lease termination fees are recorded in Rental revenues on a straight-line basis over the estimated remaining contractual lease term or upon collection if collectability is not assured. The total net impact to Rental revenues due to early lease termination fees was an increase of approximately \$0.2 million and \$0.4 million for the three and nine months ended September 30, 2012, respectively and \$0.3 million and \$0.4 million for the same periods in 2011, respectively.

We earn revenues from asset management fees, acquisition fees, property management fees and fees for other services pursuant to joint venture and other agreements. These are included in our Consolidated Statements of Operations in Institutional capital management and other fees. We recognize revenues from asset management fees, acquisition fees, property management fees and fees for other services when the related fees are earned and are realized or realizable.

Table of Contents

Stock-Based Compensation

On October 10, 2006, we established the Long-Term Incentive Plan, as amended, to grant restricted stock, stock options and other awards to our personnel and directors. Awards granted under this plan are measured at fair value on the grant date and amortized to compensation expense on a straight-line basis over the service period during which the awards fully vest. Such expense is included in General and administrative expense in our Consolidated Statements of Operations. Options issued under the Long-Term Incentive Plan are valued using the Black-Scholes option pricing model, which relies on assumptions we make related to the expected term of the options, volatility, dividend yield and risk free interest rate.

New Accounting Standards

During the second quarter of 2011, the FASB issued Accounting Standards Update No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS, which generally aligns the principles for fair value measurements and the related disclosure requirements under US GAAP and International Financial Reporting Standards (IFRS). This standard requires new disclosures, with a particular focus on Level 3 measurements, including; quantitative information about the significant unobservable inputs used for all Level 3 measurements; qualitative discussion about the sensitivity of recurring Level 3 measurements to changes in the unobservable inputs disclosed, including the interrelationship between inputs and a description of the company's valuation processes. This standard also requires disclosure of any transfers between Levels 1 and 2 of the fair value hierarchy; information about when the current use of a non-financial asset measured at fair value differs from its highest and best use and the hierarchy classification for items whose fair value is not recorded on the balance sheet but is disclosed in the notes. This standard was effective for interim and annual periods beginning after December 15, 2011. In conjunction with the adoption of this standard, we made an accounting policy election to measure the credit risk of our derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio. We adopted this standard effective January 1, 2012.

Also during the second quarter of 2011, the FASB issued Accounting Standards Update No. 2011-05, Presentation of Comprehensive Income, which eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders' equity. Entities had the option to present the components of net income and other comprehensive income either in a single continuous statement or in two separate but consecutive statements. This standard requires retrospective application and was effective for interim and annual periods beginning after December 15, 2011. We adopted this standard on January 1, 2012 and have presented the components of net income and other comprehensive income in two separate but consecutive statements.

Table of Contents**Note 3 Investment in Properties**

Our consolidated investment in properties consist of operating properties, redevelopment properties, properties under development, properties in pre-development and land held for future development or other purposes. The following table provides our historical cost of our investment in properties (in thousands).

	September 30, 2012	December 31, 2011
Operating properties	\$ 3,084,837	\$ 3,100,172
Properties under redevelopment	9,995	4,284
Properties under development	53,415	9,525
Properties in pre-development including land held	54,104	47,082
Total Investment in Properties	3,202,351	3,161,063
Less accumulated depreciation and amortization	(613,418)	(589,314)
Net Investment in Properties	\$ 2,588,933	\$ 2,571,749

Acquisition Activity

During the nine months ended September 30, 2012, we acquired 12 buildings comprising 2.0 million square feet. These properties located in the Phoenix, Atlanta, Chicago, Houston, Miami, Dallas, New Jersey, Southern California and Seattle markets were acquired for a total purchase price of approximately \$107.4 million. We have incurred acquisition costs of approximately \$1.0 million during the nine months ended September 30, 2012, included in General and administrative in our Consolidated Statement of Operations.

During the nine months ended September 30, 2011, we acquired 20 buildings comprising 2.2 million square feet and controlling interests in three buildings totaling 0.4 million square feet. These properties are located in the Southern California, New Jersey, Miami, Orlando, Chicago, Phoenix, Atlanta, Denver and Houston markets. These properties and controlling interests were acquired from unrelated third-parties, except as disclosed in Note 10 Related Party Transactions for a total purchase price of approximately \$133.5 million. We have consolidated the three properties in which we acquired controlling interests and, as a result, we recorded \$143.3 million on our balance sheet, in the aggregate, for these three properties and the 20 other properties that we acquired during the nine months ended September 30, 2011. This amount included \$9.8 million attributable to the noncontrolling interests share of the three properties that we did not acquire. We incurred acquisition costs of approximately \$1.6 million during the nine months ended September 30, 2011, included in General and administrative in our Consolidated Statement of Operations.

Development Activity*2012 Development Activity*

As of September 30, 2012, seven projects were under construction in our Baltimore/Washington D.C., Chicago, Houston, Miami and Southern California markets. We have leased two buildings in Baltimore/Washington D.C. which total approximately 0.2 million square feet of which 0.1 million square feet stabilized in July 2012. During the three months ended September 30, 2012, we purchased a shell-complete building in Houston, which is now in lease up, which totals approximately 0.3 million square. We are continuing construction of an approximately 0.2 million square foot building on the first of two parcels of land we acquired last year in Miami and have begun construction of another 0.2 million square foot building on the second parcel of land. These projects are expected to be shell-complete in the fourth quarter of 2012 and the second quarter of 2013, respectively, and are 90% and 74% leased, respectively. We are continuing construction of a 0.6 million square foot building on the 32.6 acre land parcel we purchased earlier this year in Chicago, which is expected to be completed in the fourth quarter of 2012. We also began construction of a 0.2 million square foot expansion of an unconsolidated building in Southern California, which is expected to be completed in the fourth quarter of 2012 and is 100% leased. Finally, we began construction of a 0.1 million square foot building, which is being built to sell in Baltimore/Washington D.C. This project is expected to be completed in 2013. The total costs incurred on these projects as of September 30, 2012 was \$65.1 million.

Table of Contents*2011 Development Activity*

During the nine months ended September 30, 2011, we acquired three land parcels totaling 81.9 acres in the Miami, Southern California and Cincinnati markets for a total price of \$20.0 million.

Disposition Activity

During the nine months ended September 30, 2012, we sold 31 operating properties totaling approximately 2.0 million square feet to third-parties in the Atlanta, Charlotte, New Jersey, Houston and Dallas markets, for combined gross proceeds of \$85.5 million. We recognized gains of approximately \$12.3 million on the disposition of 18 operating properties, including a portfolio of properties in Houston. We recognized an impairment loss of approximately \$11.4 million on a portfolio of 13 properties in Atlanta. All gains and impairments associated with these sales are reflected in Income (loss) from discontinued operations in the Consolidated Financial Statements. We did not have any dispositions during the nine months ended September 30, 2011.

Intangible Lease Assets and Liabilities

Aggregate amortization expense for intangible lease assets recognized in connection with property acquisitions (excluding assets and liabilities related to above and below market rents; see Note 2 Summary of Significant Accounting Policies for additional information) was approximately \$2.4 million and \$8.0 million for the three and nine months ended September 30, 2012 and \$2.8 million and \$8.5 million for the same periods in 2011, respectively. Our intangible lease assets included the following as of September 30, 2012 and December 31, 2011 (in thousands).

	September 30, 2012			December 31, 2011		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Other intangible lease assets	\$ 68,738	\$ (32,293)	\$ 36,445	\$ 77,692	\$ (38,549)	\$ 39,143
Above market rent	\$ 5,617	\$ (4,715)	\$ 902	\$ 7,087	\$ (5,191)	\$ 1,896
Below market rent	\$ (26,610)	\$ 7,767	\$ (18,843)	\$ (26,905)	\$ 8,008	\$ (18,897)

The following table describes the estimated net amortization of such intangible assets and liabilities for the next five years and thereafter. In addition, the table describes the net impact on rental revenues due to the amortization of above and below market rents for the next five years and thereafter (in thousands).

For the Period Ended December 31,	Estimated Net Amortization of Lease Intangible Assets	Estimated Net Increase to Rental Revenues Related to Above and Below Market Rents
Remainder of 2012	\$ 2,096	\$ (291)
2013	7,256	(1,459)
2014	5,758	(1,286)
2015	4,461	(1,060)
2016	3,282	(843)
Thereafter	13,592	(13,002)
Total	\$ 36,445	\$ (17,941)

Table of Contents**Note 4 Investments in and Advances to Unconsolidated Joint Ventures**

We enter into joint ventures primarily for purposes of developing industrial real estate and to establish commingled investment vehicles with institutional partners. Our investments in these joint ventures are included in Investments in and advances to unconsolidated joint ventures in our Consolidated Balance Sheets. The following table summarizes our unconsolidated joint ventures as of September 30, 2012 and December 31, 2011 (dollars in thousands).

	DCT Ownership as of September 30, 2012	Number of Buildings	Unconsolidated Investments in and Advances as of	
Unconsolidated Joint Ventures			September 30, 2012	December 31, 2011
Institutional Joint Ventures:				
DCT/SPF Industrial Operating LLC ⁽¹⁾	20.0%	13	\$ 42,855	\$ 45,510
TRT-DCT Venture I ⁽²⁾	3.6%	14	587	548
TRT-DCT Venture II ⁽³⁾	11.4%	5	2,042	2,172
TRT-DCT Venture III ⁽³⁾⁽⁴⁾	10.0%	4	1,237	1,491
DCT Fund I LLC ⁽⁵⁾	20.0%	6	(922)	(313)
Subtotal Institutional Joint Ventures		42	45,799	49,408
Other:				
Stirling Capital Investments (SCLA) ⁽⁶⁾	50.0%	6	70,982	58,629
IDI/DCT, LLC ⁽³⁾	50.0%	3	27,831	28,240
IDI/DCT Buford, LLC (land only)	75.0%		3,031	3,001
Subtotal Other		9	101,844	89,870
Total		51	\$ 147,643	\$ 139,278

⁽¹⁾ During the third quarter of 2012, DCT/SPF Industrial Operating LLC disposed of one property in the Cincinnati market for gross proceeds, net of joint venture interest, of \$2.9 million. We recognized a gain of \$0.8 million, inclusive of a previously deferred gain of approximately \$0.3 million, in Equity in earnings (loss) in unconsolidated joint ventures in our Consolidated Statement of Operations during the three and nine months ended September 30, 2012.

⁽²⁾ During the first quarter of 2012, our joint venture partner, Dividend Capital Total Reality Trust Inc., contributed one property into TRT-DCT Venture I. As a result of this activity, we made a capital contribution totaling \$0.2 million, which resulted in our equity ownership decreasing to 3.6% as of September 30, 2012, as compared to 4.4% as of December 31, 2011.

⁽³⁾ During 2011, our unconsolidated joint ventures completed dispositions of three properties in Cincinnati, Kansas City and Northern California for gross proceeds, net of joint venture partners' interest, of \$13.8 million. We recognized deferred gains upon disposition of these properties totaling \$0.7 million.

⁽⁴⁾ During the second quarter of 2012, TRT-DCT Venture III disposed of one property in the Louisville market for gross proceeds, net of joint venture partners' interest, of \$0.8 million. We recognized our portion of the gain of approximately \$0.2 million in Equity in earnings (loss) in unconsolidated joint ventures in our Consolidated Statement of Operations during the nine months ended September 30, 2012.

⁽⁵⁾ In accordance with the DCT Fund I s (the Fund) LLC agreement, the Fund terminated in February 2012 resulting in the Fund beginning the process of an orderly windup as outlined by the LLC agreement.

⁽⁶⁾ Although we contributed 100% of the initial cash equity capital required by the venture, our partners retain certain participation rights in the venture's available cash flows.

Table of Contents**Guarantees**

There are no lines of credit or side agreements related to, or between, our unconsolidated joint ventures and us, and there are no derivative financial instruments between our unconsolidated joint ventures and us. In addition, we believe we have no material exposure to financial guarantees.

Note 5 Financial Instruments and Hedging Activities**Fair Value of Financial Instruments**

As of September 30, 2012 and December 31, 2011, the fair values of cash and cash equivalents, restricted cash held in escrow, accounts receivable and accounts payable approximated their carrying values because of the short-term nature of these instruments. The estimated fair values of other financial instruments subject to fair value disclosures were determined based on available market information and valuation methodologies appropriate for these purposes. Considerable judgment and a high degree of subjectivity are involved in developing these estimates. Our estimates may differ from the actual amounts that we could realize upon disposition. The following table summarizes these financial instruments as of September 30, 2012 and December 31, 2011 (in thousands).

	Balances as of September 30, 2012		Balances as of December 31, 2011	
	Carrying Amounts	Estimated Fair Value	Carrying Amounts	Estimated Fair Value
Notes receivable ⁽¹⁾	\$ 231	\$ 232	\$ 1,053	\$ 1,058
Borrowings ⁽¹⁾ :				
Senior unsecured revolving credit facility	\$	\$	\$	\$
Fixed rate debt ⁽²⁾	\$ 1,125,216	\$ 1,244,533	\$ 1,077,783	\$ 1,218,321
Variable rate debt	\$ 175,000	\$ 175,000	\$ 175,000	\$ 174,979
Interest rate contracts:				
Interest rate swap ⁽³⁾	\$	\$	\$ (26,746)	\$ (26,746)

(1) The fair values of our notes receivable and borrowings were estimated using a discounted cash flow methodology. Credit spreads and market interest rates used to determine the fair value of these instruments are based on unobservable Level 3 inputs which management has determined to be its best estimate of current market values.

(2) The carrying amount of our fixed rate debt includes premiums and discounts as a result of the difference between the fair value and face value of debt assumed in connection with our acquisition activities.

(3) The fair value of our interest rate swap is determined using the market standard methodology of netting the discounted future fixed cash flows and the discounted expected variable cash flows based on an expectation of future interest rates derived from Level 2 observable market interest rate curves. We also incorporate a credit valuation adjustment, which is derived using unobservable Level 3 inputs, to appropriately reflect both our nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurement.

For further discussion on the fair value of our interest rate swap, see Note 2 Significant Accounting Policies.

The following table displays a reconciliation of liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the nine months ended September 30, 2012 and 2011. During the same periods, we had no assets measured at fair value on a recurring basis. The table also displays gains and losses due to changes in fair value, including both realized and unrealized, recognized in the Consolidated Statements of Operations for Level 3 liabilities. When assets and liabilities are transferred between levels, we recognize the transfer at the beginning of the period (in thousands).

Table of Contents

	During the Nine Months Ended September 30,	
	2012	2011
Level 3 Liabilities:		
Interest Rate Swaps:		
Beginning balance at January 1	\$ (26,746)	\$ (10,109)
Net unrealized loss included in accumulated other comprehensive loss	(6,127)	(15,247)
Realized loss recognized in interest expense	(677)	
Cash paid for settlement of hedge	33,550	
Ending balance at September 30	\$	\$ (25,356)

Hedging Activities

To manage interest rate risk for variable rate debt and issuances of fixed rate debt, we primarily use treasury locks and interest rate swaps as part of our cash flow hedging strategy. These derivatives are designed to mitigate the risk of future interest rate increases by providing a fixed interest rate for a limited, pre-determined period of time. During 2012, such derivatives have been used to hedge the variability in existing and future interest expense associated with existing variable rate borrowings and forecasted issuances of debt, which may include the issuances of new debt, as well as refinancing of existing debt upon maturity.

As of September 30, 2012, we did not have any hedges in place. In July 2012, we settled our forward-starting swap for \$33.6 million, which was in place to hedge the variability of cash flows associated with forecasted issuances of debt, contemporaneously with locking rate for \$90.0 million of debt which was funded in September 2012.

On a recurring basis, we measure our derivatives at fair value, which was a gross liability of approximately \$26.7 million as of December 31, 2011, respectively. This amount is included in Other Liabilities in our Consolidated Balance Sheet. The fair value of our derivatives was determined using Level 2 and 3 inputs. We utilize a third party derivative valuation expert to determine the fair value, including the Level 3 component of the swap liability, during each reporting period. The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges is recorded in Accumulated other comprehensive loss and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The ineffective portion of the change in fair value of the derivatives is recognized directly in earnings and is recorded as Interest expense in our Consolidated Statements of Operations. During the nine months ended September 30, 2012 we recognized \$0.7 million of ineffectiveness due to the change in estimated timing of debt issuance. During the three and nine months ended September 30, 2011, we recognized no ineffectiveness.

During the three and nine months ended September 30, 2012, we recorded approximately \$2.6 million and \$6.8 million of net unrealized losses, respectively, including the noncontrolling interests portions of \$0.2 million and \$0.5 million, respectively, in Accumulated other comprehensive loss as a result of the change in fair value of our outstanding hedges during the periods. During the three and nine months ended September 30, 2011, we recorded approximately \$12.1 million and \$15.2 million of net unrealized losses, respectively, including the noncontrolling interests portions of \$1.1 million and \$1.4 million, respectively, in Accumulated other comprehensive loss as a result of the change in fair value of our outstanding hedges during the periods.

As of September 30, 2012 and December 31, 2011 the Accumulated other comprehensive loss balance pertaining to the hedges were losses of approximately \$37.7 million and \$32.6 million, respectively, including the noncontrolling interests portion. Amounts reported in Accumulated other comprehensive loss related to derivatives will be amortized to Interest expense as interest payments are made on our current debt and anticipated debt issuances. During the next 12 months, we estimate that approximately \$4.0 million will be reclassified from Accumulated other comprehensive loss to Interest expense resulting in an increase in such expense.

Table of Contents

Note 6 Outstanding Indebtedness

As of September 30, 2012 our outstanding indebtedness of approximately \$1.3 billion consisted of mortgage notes and senior unsecured notes, excluding approximately \$54.5 million representing our proportionate share of non-recourse debt associated with unconsolidated joint ventures. As of December 31, 2011, our outstanding indebtedness of approximately \$1.3 billion consisted of mortgage notes and senior unsecured notes, excluding approximately \$61.7 million representing our proportionate share of non-recourse debt associated with unconsolidated joint ventures.

As of September 30, 2012, the gross book value of our consolidated properties was approximately \$3.2 billion and the gross book value of all properties securing our mortgage debt was approximately \$0.7 billion. As of December 31, 2011, the gross book value of our consolidated properties was approximately \$3.2 billion and the gross book value of all properties securing our mortgage debt was approximately \$0.7 billion. Our debt has various covenants with which we were in compliance as of September 30, 2012 and December 31, 2011.

Debt Issuances

In September 2012, we issued \$90.0 million of fixed rate, senior unsecured notes through a private placement offering. These senior unsecured notes mature in September 2022 and have a fixed interest rate of 4.21%. The notes require semi-annual interest payments. The proceeds from these notes were used to repay outstanding indebtedness and for general corporate purposes.

Debt Retirements and Assumptions

During the nine months ended September 30, 2012, we retired mortgage notes totaling approximately \$43.0 million previously scheduled to mature in September 2012, October 2012 and January 2013 using proceeds from the Company's senior unsecured revolving credit facility and proceeds from our equity offering.

In June 2012 we assumed two mortgage notes with outstanding balances of approximately \$4.5 million and \$2.5 million in connection with two property acquisitions. The assumed notes bear interest at 6.08% and 6.25%, respectively, and require monthly payments of principal and interest. The notes mature in August 2016 and July 2020, respectively.

Line of Credit

As of September 30, 2012 and December 31, 2011, we did not have any amounts outstanding on our senior unsecured revolving credit facility.

Note 7 Noncontrolling Interests

Noncontrolling interests are the portion of equity, or net assets, in a subsidiary not attributable, directly or indirectly, to a parent. Our noncontrolling interests primarily represent limited partnership interests in the operating partnership and equity interests held by third-party partners in consolidated real estate joint ventures, including related parties as discussed in Note 10 Related Party Transactions. Noncontrolling interests representing interests in the operating partnership primarily include limited partnership interest in our operating partnership (OP Units) and LTIP Units which are classified as permanent equity in accordance with GAAP and are included in Noncontrolling interests in the Consolidated Balance Sheets.

The following table illustrates the noncontrolling interests' share of consolidated net loss during the three and nine months ended September 30, 2012 and 2011 (in thousands).

Table of Contents

		Three Months Ended September 30,		Nine Months Ended September 30,	
		2012	2011	2012	2011
Noncontrolling interests	share of loss from continuing operations	\$ 409	\$ 1,082	\$ 2,030	\$ 3,634
Noncontrolling interests	share of income from discontinued operations	(1,122)	(67)	(160)	(249)
Net (income) loss attributable to noncontrolling interests		\$ (713)	\$ 1,015	\$ 1,870	\$ 3,385

OP Units

As of September 30, 2012 and December 31, 2011, we owned approximately 92% and 90%, respectively, of the outstanding equity interests in the operating partnership. Upon redemption by the unitholder, we have the option of redeeming the units of OP Units with cash or with shares of our common stock on a one-for-one basis, subject to adjustment.

During the three months ended September 30, 2012, 0.3 million OP Units were redeemed for approximately 0.3 million shares of common stock. During the nine months ended September 30, 2012, 4.0 million OP Units were redeemed for approximately \$2.8 million in cash and 3.5 million shares of common stock. During the three months ended September 30, 2011, 0.3 million OP Units were redeemed for approximately \$22,000 in cash and 0.3 million shares of common stock. During the nine months ended September 30, 2011, 1.0 million OP Units were redeemed for approximately \$75,000 in cash and 0.9 million shares of common stock.

As of September 30, 2012, there was a total of 21.3 million OP Units outstanding and redeemable, with a redemption value of approximately \$137.5 million based on the closing price of our common stock on September 30, 2012. As of December 31, 2011, 25.1 million OP Units were outstanding and redeemable with a redemption value of approximately \$128.5 million based on the closing price of our common stock on December 31, 2011.

LTIP Units

We may grant limited partnership interests in the operating partnership called LTIP Units. LTIP Units, which we grant either as free-standing awards or together with other awards under the Long-Term Incentive Plan, as amended, are valued by reference to the value of our common stock, and are subject to such conditions and restrictions as our compensation committee may determine, including continued employment or service, computation of financial metrics and achievement of pre-established performance goals and objectives. LTIP Units typically vest ratably over a period of four to five years depending on the grant. Vested LTIP Units can be converted to OP Units on a one-for-one basis.

During the nine months ended September 30, 2012, approximately 0.7 million LTIP Units were granted to certain senior executives, which vest over a four or five year period with a total fair value of \$3.9 million at the date of grant as determined by a lattice-binomial option-pricing model based on a Monte Carlo simulation using a volatility factor of 72% and risk-free interest rates of 0.82% and 1.04%. During the three and nine months ended September 30, 2012, 0.1 million and 0.2 million vested LTIP Units, respectively, were converted into 0.1 million and 0.2 million OP Units, respectively. As of September 30, 2012, approximately 2.4 million LTIP Units were outstanding of which 0.9 million were vested.

During the nine months ended September 30, 2011, 0.6 million LTIP Units were granted to senior executives which vest over a period of four to five years. The total fair value of the LTIP Units granted was \$3.0 million at their respective grant dates. The fair value for each grant was determined using a lattice-binomial option-pricing model based on a Monte Carlo simulation using volatility factors ranging from 67% to 71% and risk-free interest rates ranging from 0.85% to 2.18%. As of December 31, 2011, approximately 1.9 million LTIP Units were outstanding of which 0.9 million were vested.

Table of Contents

Note 8 Stockholders Equity

Common Stock

As of September 30, 2012, approximately 268.7 million shares of common stock were issued and outstanding.

On March 23, 2010, we registered a continuous equity offering program. Pursuant to this offering, we may sell up to 20 million shares of common stock for general corporate purposes from time-to-time through March 23, 2013 in at-the-market offerings or certain other transactions.

On September 12, 2012, we issued approximately 19.0 million shares of common stock in a public offering at a price of \$6.20 per share for net proceeds of \$112.6 million before offering expenses.

During the three and nine months ended September 30, 2012, we issued approximately 0.3 million and 3.5 million shares of common stock, respectively, related to the redemption of OP Units (see additional information in Note 7 Noncontrolling Interests above), and approximately 0.1 million and 0.2 million shares of common stock, respectively, related to vested shares of restricted stock, phantom shares and stock option exercises. During the three and nine months ended September 30, 2011, we issued approximately 0.3 million and 0.9 million shares of common stock, respectively, related to the redemption of OP Units (see additional information in Note 7 Noncontrolling Interests above), and approximately 0.1 million and 0.2 million shares of common stock, respectively, related to vested shares of restricted stock, phantom shares and stock option exercises.

The net proceeds from the sales of our securities are transferred to our operating partnership for a number of OP Units equal to the shares of common stock sold in our public offerings.

Equity-Based Compensation

Restricted Stock

Holders of restricted stock have voting rights and rights to receive dividends. Restricted stock may not be sold, assigned, transferred, pledged or otherwise disposed of and is subject to a risk of forfeiture prior to the expiration of the applicable vesting period. The restricted stock fair value on the date of grant is amortized on a straight-line basis as stock-based compensation expense over the service period during which term the stock fully vests. Restricted stock typically vests ratably over a period of four or five years, depending on the grant. During the three months ended September 30, 2012 we did not grant any restricted stock. During nine months ended September 30, 2012, we granted approximately 0.3 million shares of restricted stock to certain officers and employees at the weighted-average fair market value \$5.62 per share. During the three months ended September 30, 2011 we did not grant any restricted stock. During the nine months ended September 30, 2011, we granted approximately 0.2 million shares of restricted stock to certain officers and employees at the weighted-average fair market value of \$5.54 per share.

Stock Options

During the three and nine months ended September 30, 2012, we did not grant any stock options. During the three months ended September 30, 2011 we did not grant any stock options. During the nine months ended September 30, 2011, we granted approximately 0.4 million stock options at the weighted-average exercise price of \$5.55, which generally vest ratably over four years. The fair value of the aforementioned grants adjusted for estimated forfeitures totaled approximately \$0.7 million and is amortized over the service period.

Phantom Stock

During the nine months ended September 30, 2012 and 2011, we granted approximately 71,000 and 48,000 shares of phantom stock, which vest after one year. The fair value of the aforementioned grants adjusted for estimated forfeitures totaled approximately \$0.4 million and \$0.3 million and is amortized over the one year service period.

Note 9 Related Party Transactions

8th and Vineyard Consolidated Joint Venture

In May 2010, we entered into the 8th and Vineyard joint venture with Iowa Investments, LLC, an entity owned by one of our executives, to purchase 19.3 acres of land held for development in Southern California. Pursuant to the joint venture agreement, we will first receive a return of all capital along with a preferred return. Thereafter, Iowa Investments, LLC will receive a return of all capital along with a promoted interest. The land parcel acquired by 8th and Vineyard was purchased from an entity in which the same executive had a minority ownership. The total acquisition price of \$4.7 million was determined to be at fair value.

Southern California Consolidated Ventures

We entered into four agreements, two in December 2010 and two in January 2011, whereby we acquired a weighted average ownership interest, based on square feet, of approximately 48.4% in five bulk industrial buildings located in the Southern California market. Entities controlled by one of our executives have a weighted average ownership in these properties of approximately 43.7%, based on square feet, and the remaining 7.9% ownership is held by a third- party. Each venture partner will earn returns in accordance with their ownership interests. DCT has controlling rights including management of the operations of the properties and we have consolidated the properties in accordance with GAAP and accounted for the transactions as business combinations. The total acquisition price of \$46.3 million was determined to be at fair value.

Note 10 Earnings per Share

We use the two-class method of computing earnings per common share which is an earnings allocation formula that determines earnings per share for common stock and any participating securities according to dividends declared (whether paid or unpaid) and participation rights in undistributed earnings. Under the two-class method, earnings per common share are computed by dividing the sum of distributed earnings to common stockholders and undistributed earnings allocated to common stockholders by the weighted average number of common shares outstanding for the period.

A participating security is defined by GAAP as an unvested share-based payment award containing non-forfeitable rights to dividends and must be included in the computation of earnings per share pursuant to the two-class method. Nonvested restricted stock and LTIP Units are considered participating securities as these share-based awards contain non-forfeitable rights to dividends irrespective of whether the awards ultimately vest or expire.

The following table sets forth the computation of basic and diluted earnings per common share for the three and nine months ended September 30, 2012 and 2011 (in thousands, except per share amounts).

Table of Contents

		Three Months Ended September 30,		Nine Months Ended September 30,	
		2012	2011	2012	2011
Earnings per Common share Basic and Diluted					
Numerator					
Loss from continuing operations		\$ (4,645)	\$ (9,822)	\$ (18,467)	\$ (31,104)
(Income) loss from continuing operations attributable to noncontrolling interests		409	1,082	2,030	3,634
Loss from continuing operations attributable to common stockholders		(4,236)	(8,740)	(16,437)	(27,470)
Less: Distributed and undistributed earnings allocated to participating securities		(134)	(103)	(400)	(337)
Numerator for adjusted loss from continuing operations attributable to common stockholders		(4,370)	(8,843)	(16,837)	(27,807)
Income from discontinued operations		12,906	731	2,357	2,632
Noncontrolling interests share of income from discontinued operations		(1,122)	(67)	(160)	(249)
Numerator for income from discontinued operations attributable to common stockholders		11,784	664	2,197	2,383
Adjusted net income (loss) attributable to common stockholders		\$ 7,414	\$ (8,179)	\$ (14,640)	\$ (25,424)
Denominator					
Weighted average common shares outstanding basic and dilutive		253,657	245,805	249,381	241,548
Earnings per Common Share Basic and Diluted					
Loss from continuing operations		\$ (0.02)	\$ (0.03)	\$ (0.07)	\$ (0.12)
Income from discontinued operations		0.05	0.00	0.01	0.01
Net income (loss) attributable to common stockholders		\$ 0.03	\$ (0.03)	\$ (0.06)	\$ (0.11)

Potentially Dilutive Shares

For the three and nine months ended September 30, 2012, we excluded from diluted earnings per share the weighted average common share equivalents related to approximately 5.5 million and 5.6 million stock options and phantom stock, respectively, because their effect would be anti-dilutive. The same periods ended September 30, 2011 we excluded from earnings per share the weighted average common share equivalent related to approximately 5.7 million and 5.8 million stock options and phantom stock, respectively, because their effect would be anti-dilutive.

Note 11 Segment Information

The Company's segments are based on our internal reporting of operating results used to assess performance based on our properties geographical markets. Our markets are aggregated into three reportable regions or segments, East, Central and West, which are based on the geographical locations of our properties. Management considers rental revenues and property net operating income aggregated by segment to be the appropriate way to analyze performance. Certain reclassifications have been made to prior year results to conform to the current presentation related to our reorganization in 2011 which resulted in three reportable segments and for discontinued operations (see Note 13 Discontinued Operations and Assets Held for Sale for additional information).

Table of Contents

The following table reflects our total assets, net of accumulated depreciation and amortization, by segment, as of September 30, 2012 and December 31, 2011 (in thousands).

	September 30, 2012	December 31, 2011
Segments:		
East assets	\$ 910,127	\$ 936,305
Central assets	1,047,077	1,021,956
West assets	696,003	669,591
Total segment net assets	2,653,207	2,627,852
Non-segment assets:		
Non-segment cash and cash equivalents	33,863	11,624
Other non-segment assets ⁽¹⁾	168,186	153,822
Total assets	\$ 2,855,256	\$ 2,793,298

⁽¹⁾ Other non-segment assets primarily consists of corporate assets including investments in and advances to unconsolidated joint ventures, notes receivable, deferred loan costs, other receivables and other assets.

The following table sets forth the rental revenues of our segments in continuing operations and a reconciliation of our segment rental revenues to our reported consolidated total revenues for the three and nine months ended September 30, 2012 and 2011 (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
East	\$ 22,920	\$ 21,937	\$ 66,243	\$ 64,064
Central	28,582	25,069	81,984	73,025
West	15,825	14,003	46,547	40,289
 Rental revenues	 67,327	 61,009	 194,774	 177,378
Institutional capital management and other fees	937	1,004	3,143	3,153
 Total revenues	 \$ 68,264	 \$ 62,013	 \$ 197,917	 \$ 180,531

Table of Contents

The following table sets forth property net operating income of our segments in continuing operations and a reconciliation of our property NOI to our reported Loss from continuing operations for the three and nine months ended September 30, 2012 and 2011 (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
East	\$ 16,552	\$ 16,292	\$ 48,840	\$ 46,678
Central	19,927	17,124	57,190	50,031
West	11,604	10,381	34,721	29,965
Property NOI ⁽¹⁾	48,083	43,797	140,751	126,674
Institutional capital management and other fees	937	1,004	3,143	3,153
Real estate related depreciation and amortization	(30,862)	(30,495)	(92,112)	(88,181)
Casualty gains			141	
General and administrative	(6,838)	(6,346)	(19,136)	(20,465)
Impairment losses on investments in unconsolidated joint ventures				(1,934)
Equity in earnings (loss) of unconsolidated joint ventures, net	1,208	(967)	784	(3,450)
Interest expense	(17,299)	(16,515)	(51,769)	(46,539)
Interest and other income (expense)	194	(356)	354	(257)
Income tax benefit (expense) and other taxes	(68)	56	(623)	(105)
Loss from continuing operations	\$ (4,645)	\$ (9,822)	\$ (18,467)	\$ (31,104)

- (1) Property net operating income (property NOI) is defined as rental revenues, including reimbursements, less rental expenses and real estate taxes, which excludes institutional capital management fees, depreciation, amortization, casualty gains, impairment, general and administrative expenses, equity in earnings (loss) of unconsolidated joint ventures, interest expense, interest and other income and income tax benefit (expense) and other taxes. We consider property NOI to be an appropriate supplemental performance measure because property NOI reflects the operating performance of our properties and excludes certain items that are not considered to be controllable in connection with the management of the property such as depreciation, amortization, impairment, general and administrative expenses and interest expense. However, property NOI should not be viewed as an alternative measure of our financial performance since it excludes expenses which could materially impact our results of operations. Further, our property NOI may not be comparable to that of other real estate companies, as they may use different methodologies for calculating property NOI. Therefore, we believe net income (loss) attributable to common stockholders, as defined by GAAP, to be the most appropriate measure to evaluate our overall financial performance.

Included in the Central operating segment rental revenues for the three and nine months ended September 30, 2012 was approximately \$1.8 million and \$5.2 million, respectively, attributable to the Mexico operations. Included in the Central operating segment rental revenues for the three and nine months ended September 30, 2011 was approximately \$1.7 million and \$5.1 million, respectively, attributable to the Mexico operations. Included in the Central operating segment net assets as of September 30, 2012 and December 31, 2011 was approximately \$74.9 million and \$76.7 million, respectively, attributable to the Mexico operations.

Note 12 Discontinued Operations and Assets Held for Sale

We report results of operations from real estate assets that meet the definition of a component of an entity and have been sold, or meet the criteria to be classified as held for sale, as discontinued operations. During the three months ended September 30, 2012, we sold 15 operating properties, comprising 0.1 million square feet in the East operating

Table of Contents

segment and 1.1 million square feet in the Central operating segment to unrelated third-parties. Additionally, during the nine months ended September 30, 2012, we sold 16 operating properties comprising 0.7 million square feet, in the East segment to unrelated third-parties. The sale of these properties resulted in gains of approximately \$12.3 million and impairment losses of approximately \$11.4 million. During the year ended December 31, 2011, we sold 16 operating properties to unrelated third-parties. Six of these properties were in the Central operating segment and ten were in the East operating segment, together totaling approximately 2.7 million square feet. These sales resulted in gains of approximately \$12.0 million and impairment losses totaling \$7.8 million.

For the three and nine months ended September 30, 2011, loss from discontinued operations includes the results of operations for properties prior to the date of sale. We included all results of these operations in Income (loss) from discontinued operations. For further details of our policy on discontinued operations, impairment of assets held for sale and related fair value measurements, see Note 2 Summary of Significant Accounting Policies.

The following table summarizes the components of income (loss) from discontinued operations for the three and nine months ended September 30, 2012 and 2011 (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Rental revenues	\$ 1,010	\$ 4,957	\$ 5,608	\$ 14,183
Rental expenses and real estate taxes	(250)	(1,307)	(1,581)	(3,897)
Real estate related depreciation and amortization	(73)	(2,903)	(2,565)	(8,658)
Operating income	687	747	1,462	1,628
Casualty gains		54	70	1,298
Interest expense		(113)	(129)	(368)
Interest and other income (expense)	(8)	43	28	74
Operating income and other income (expense)	679	731	1,431	2,632
Gain on dispositions of real estate interests	12,227		12,348	
Impairment losses			(11,422)	
Income (loss) from discontinued operations	\$ 12,906	\$ 731	\$ 2,357	\$ 2,632

Note 13 Subsequent Events

GAAP requires an entity to disclose events that occur after the balance sheet date but before financial statements are issued or are available to be issued (subsequent events) as well as the date through which an entity has evaluated subsequent events. There are two types of subsequent events. The first type consists of events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements, (recognized subsequent events). The second type consists of events that provide evidence about conditions that did not exist at the date of the balance sheet but arose subsequent to that date (nonrecognized subsequent events). No significant recognized or nonrecognized subsequent events were noted.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

We make statements in this report that are considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, which are usually identified by the use of words such as anticipates, believes, estimates, expects, intends, may, plans, projects, seeks, variations of such words or similar expressions. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and are including this statement for purposes of complying with those safe harbor provisions. These forward-looking statements reflect our current views about our plans, intentions, expectations, strategies and prospects, which are based on the information currently available to us and on assumptions we have made. Although we believe that our plans, intentions, expectations, strategies and prospects as reflected in or suggested by those forward-looking statements are reasonable, we can give no assurance that the plans, intentions, expectations or strategies will be attained or achieved. Furthermore, actual results may differ materially from those described in the forward-looking statements and will be affected by a variety of risks and factors that are beyond our control including, without limitation:

national, international, regional and local economic conditions, including, in particular, the impact of the economic downturn and the strength of the economic recovery and the potential impact of the financial crisis in Europe;

the general level of interest rates and the availability of capital;

the competitive environment in which we operate;

real estate risks, including fluctuations in real estate values and the general economic climate in local markets and competition for tenants in such markets;

decreased rental rates or increasing vacancy rates;

defaults on or non-renewal of leases by tenants;

acquisition and development risks, including failure of such acquisitions and development projects to perform in accordance with projections;

the timing of acquisitions, dispositions and development;

natural disasters such as fires, floods, tornadoes, hurricanes and earthquakes;

energy costs;

the terms of governmental regulations that affect us and interpretations of those regulations, including the costs of compliance with those regulations, changes in real estate and zoning laws and increases in real property tax rates;

financing risks, including the risk that our cash flows from operations may be insufficient to meet required payments of principal, interest and other commitments;

lack of or insufficient amounts of insurance;

litigation, including costs associated with prosecuting or defending claims and any adverse outcomes;

the consequences of future terrorist attacks or civil unrest;

environmental liabilities, including costs, fines or penalties that may be incurred due to necessary remediation of contamination of properties presently owned or previously owned by us; and

other risks and uncertainties detailed in the section entitled "Risk Factors."

In addition, our current and continuing qualification as a real estate investment trust, or REIT, involves the application of highly technical and complex provisions of the Internal Revenue Code of 1986, or the Code, and depends on our ability to meet the various requirements imposed by the Code through actual operating results, distribution levels and diversity of stock ownership.

We assume no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. The reader should carefully review our financial statements and the notes thereto, as well as the section entitled "Risk Factors" in this Report.

Table of Contents

Overview

DCT Industrial Trust Inc. is a leading industrial real estate company specializing in the acquisition, development, leasing and management of bulk distribution and light industrial properties located in high-volume distribution markets in the United States and Mexico.

We were formed as a Maryland corporation in April 2002 and have elected to be treated as a real estate investment trust (REIT) for United States (U.S.) federal income tax purposes. As used herein, DCT Industrial Trust, DCT, the Company, we, our and us refer to DCT Industrial Trust Inc. and its consolidated subsidiaries and partnerships except where the context otherwise requires. We are structured as an umbrella partnership REIT under which substantially all of our current and future business is, and will be, conducted through a majority owned and controlled subsidiary, DCT Industrial Operating Partnership LP (the operating partnership), a Delaware limited partnership, for which DCT Industrial Trust Inc. is the sole general partner. We own our properties through our operating partnership and its subsidiaries. As of September 30, 2012, we owned approximately 92% of the outstanding equity interests in our operating partnership.

As of September 30, 2012, the Company owned interests in approximately 75.2 million square feet of properties leased to approximately 840 customers, including:

58.0 million square feet comprising 388 consolidated properties owned in our operating portfolio which were 91.8% occupied;

16.7 million square feet comprising 51 unconsolidated properties which were 84.2% occupied and operated on behalf of five institutional capital management partners;

0.2 million square feet comprising two consolidated properties under redevelopment; and

0.3 million square feet comprising two consolidated buildings in development.

The Company also has four consolidated buildings and one unconsolidated expansion project under construction and several projects in predevelopment. See Notes to Consolidated Financial Statements Note 3 Investment in Properties for further detail related to our development activity.

Our primary business objectives are to maximize long-term growth in earnings and Funds from Operations, or FFO, as defined on pages 43 and 44, and to maximize the value of our portfolio and the total return to our stockholders. In our pursuit of these long-term objectives, we seek to:

maximize cash flows from existing operations;

deploy capital into quality acquisitions and development opportunities which meet our asset, location and financial criteria; and

recycle capital by selling assets that no longer fit our investment criteria and reinvesting in higher return opportunities.

Outlook

We seek to maximize long-term earnings growth and value within the context of overall economic conditions, primarily through increasing rents and operating income at existing properties and acquiring and developing high-quality properties in major distribution markets.

Fundamentals for industrial real estate continue to modestly improve in response to general improvement in the economy. According to national statistics, net absorption (the net change in total occupied space) of industrial real estate turned positive in the second quarter of 2010 and national occupancy rates have increased each quarter since then. We expect moderate economic growth to continue throughout 2012, which should result in continued positive demand for warehouse space as companies expand their distribution and production platforms. Rental rates in

Edgar Filing: DCT Industrial Trust Inc. - Form 10-Q

our markets appeared to have bottomed and in a number of markets have begun to increase, although they do remain below peak levels. Consistent with recent experience and based on current market conditions, we expect average net effective rental rates on new leases signed in 2012 to be slightly higher than the rates on expiring leases. As positive net absorption of warehouse space continues, we expect the rental rate environment to continue to improve. According to a national research company, average market rental rates nationally are expected to continue to increase moderately in 2012 as vacancy rates drop below 10% of available supply.

Table of Contents

New development has begun to increase modestly in certain markets where fundamentals have improved more rapidly, however construction levels are still very modest in absolute terms and well below peak levels and we expect they will remain so until rental rates, other leasing fundamentals and the availability of financing improve sufficiently to justify new construction on a larger scale. With limited new supply in the near term, we expect that the operating environment will become increasingly favorable for landlords with meaningful improvement of rental and occupancy rates.

For DCT Industrial, we expect same store net operating income to be higher in 2012 than it was in 2011. The benefit of higher occupancy in 2012 is expected to be somewhat offset by the impact of declining net effective rental rates on leases signed in 2011.

In terms of capital investment, we will continue to pursue acquisitions of well-located distribution facilities at prices where we can apply our leasing experience and market knowledge to generate attractive returns. During the nine months ended September 30, 2012, we acquired 12 buildings comprising 2.0 million square feet and two parcels of land totaling approximately 60.4 acres for development for a total purchase price of approximately \$128.4 million. Going forward, we will pursue the acquisition of buildings and land and consider selective development of new buildings in markets where we perceive demand and market rental rates will provide attractive financial returns.

We anticipate having sufficient liquidity to fund our operating expenses, including costs to maintain our properties and distributions, though we may finance investments, including acquisitions and developments, with the issuance of new shares, proceeds from asset sales or through additional borrowings. Please see *Liquidity and Capital Resources* for additional discussion.

Inflation

Although the U.S. economy has recently been experiencing a slight increase of inflation rates, and a wide variety of industries and sectors are affected differently by changing commodity prices, inflation has not had a significant impact on us in our markets. Most of our leases require the tenants to pay their share of operating expenses, including common area maintenance, real estate taxes and insurance, thereby reducing our exposure to increases in costs and operating expenses resulting from inflation. In addition, most of our leases expire within five years which enables us to replace existing leases with new leases at then-existing market rates.

Significant Transactions During 2012

Summary of the nine months ended September 30, 2012

Acquisitions

During the nine months ended September 30, 2012, we acquired 12 buildings comprising 2.0 million square feet in the Phoenix, Atlanta, Chicago, Houston, Miami, Dallas, New Jersey, Southern California and Seattle markets for a total purchase price of approximately \$107.4 million.

Development Activities

As of September 30, 2012, seven projects were under construction in our Baltimore/Washington D.C., Chicago, Houston, Miami and Southern California markets. We have leased two buildings in Baltimore/Washington D.C. which total approximately 0.2 million square feet of which 0.1 million square feet stabilized in July 2012. During the three months ended September 30, 2012, we purchased a shell-complete building in Houston, which is now in lease up, which totals approximately 0.3 million square. We are continuing construction of an approximately 0.2 million square foot building on the first of two parcels of land we acquired last year in Miami and have begun construction of another 0.2 million square foot building on the second parcel of land. These projects are expected to be shell-complete in the fourth quarter of 2012 and the second quarter of 2013, respectively, and are 90% and 74% leased, respectively. We are continuing construction of a 0.6 million square foot building on the 32.6 acre land parcel we purchased earlier this year in Chicago, which is expected to be completed in the fourth quarter of 2012. We also began

Table of Contents

construction of a 0.2 million square foot expansion of an unconsolidated building in Southern California, which is expected to be completed in the fourth quarter of 2012 and is 100% leased. Finally, we began construction of a 0.1 million square foot building, which is being built to sell in Baltimore/Washington D.C. This project is expected to be completed in 2013. The total costs incurred on these projects as of September 30, 2012 was \$65.1 million.

Dispositions

During the nine months ended September 30, 2012, we sold 31 operating properties totaling approximately 2.0 million square feet to third-parties for combined gross proceeds of \$85.5 million.

Debt Activity

In September 2012, we issued \$90.0 million of fixed rate, senior unsecured notes through a private placement offering. These senior unsecured notes mature in September 2022 and have a fixed interest rate of 4.21%. The notes require semi-annual interest payments.

During the nine months ended September 30, 2012 we retired mortgage notes totaling approximately \$43.0 million previously scheduled to mature in September 2012, October 2012 and January 2013 using proceeds from the Company's senior unsecured revolving credit facility and proceeds from our equity offering.

In June 2012, we assumed two mortgage notes with outstanding balances of approximately \$4.5 million and \$2.5 million in connection with two property acquisitions. The assumed notes bear interest at 6.08% and 6.25%, respectively, and require monthly payments of principal and interest. The notes mature in August 2016 and July 2020, respectively.

Equity activity

On September 12, 2012, we issued approximately 19.0 million shares of common stock in a public offering at a price of \$6.20 per share for net proceeds of \$112.6 million before offering expenses.

Leasing Activity

The following table provides a summary of our leasing activity for the three and nine months ended September 30, 2012:

	Number of Leases Signed	Square Feet Signed (in thousands)	Net Effective Rent Per Square Foot ⁽¹⁾	GAAP Basis Rent Growth ⁽²⁾	Weighted Average Lease Term ⁽³⁾	Turnover Costs Per Square Foot ⁽⁴⁾	Weighted Average Retention
Third Quarter 2012	62	3,041	\$ 3.96	3.80%	61	\$ 2.86	70.20%
Year to date 2012	231	12,194	\$ 3.74	2.00%	55	\$ 1.78	72.80%

(1) Does not include month to month leases.

(2) Net effective rent is the average base rent calculated in accordance with GAAP, over the term of the lease.

Edgar Filing: DCT Industrial Trust Inc. - Form 10-Q

- (3) GAAP basis rent growth is a ratio of the change in monthly Net Effective Rent (on a GAAP basis, including straight-line rent adjustments as required by GAAP) compared to the Net Effective Rent (on a GAAP basis) of the comparable lease. New leases where there were no prior comparable leases, due to extended downtime or materially different lease structures, are excluded.
- (4) The lease term is in months. Assumes no exercise of lease renewal options, if any.
- (5) Turnover costs are comprised of the costs incurred or capitalized for improvements of vacant and renewal spaces, as well as the commissions paid and costs capitalized for leasing transactions. Turnover costs per square foot represent the total turnover costs expected to be incurred on the leases signed during the period and does not reflect actual expenditures for the period.
- (6) Represents the weighted average square feet of tenants renewing their respective leases.

During the three months ended September 30, 2012, we signed 31 leases with free rent, which were for 1.2 million square feet of property with total concessions of \$1.2 million. During the nine months ended September 30, 2012, we signed 105 leases with free rent, which were for 5.2 million square feet of property with total concessions of \$4.4 million.

Table of Contents

Customer Diversification

As of September 30, 2012, there were no customers that occupied more than 1.5% of our consolidated properties based on annualized base rent. The following table reflects our 10 largest customers, based on annualized base rent as of September 30, 2012, who occupy a combined 5.9 million square feet of our consolidated properties.

Customer	Percentage of Annualized Base Rent
Deutsche Post World Net (DHL & Exel)	1.5%
The Glidden Company	1.3%
United Parcel Service (UPS)	1.2%
YRC, LLC	1.2%
Technicolor	1.2%
Crayola, LLC	1.1%
Iron Mountain	1.1%
The Dial Corporation	1.0%
CEVA Logistics	1.0%
United Stationers Supply Company	0.9%
Total	11.5%

Although base rent is supported by long-term lease contracts, tenants who file bankruptcy have the legal right to reject any or all of their leases. In the event that a tenant with a significant number of leases in our properties files bankruptcy and cancels its leases, we could experience a reduction in our revenues and tenant receivables.

Reports have indicated that the parent company, YRC Worldwide, Inc., of one of our top ten tenants has encountered financial difficulties and therefore has the potential to file for bankruptcy. Their subsidiary, YRC, LLC currently leases three truck terminals in infill locations of Los Angeles, at below market rents totaling \$13.5 million, net of accumulated amortization as of September 30, 2012. YRC, LLC has paid all rents due and has no balances outstanding through September 30, 2012.

We continuously monitor the financial condition of our tenants. We communicate often with those tenants who have been late on payments or filed bankruptcy. We are not currently aware of any significant financial difficulties of any other tenants beyond those described above that would individually cause a material reduction in our revenues, and no tenant represents more than 5% of our annualized base rent.

Results of Operations

Summary of the three and nine months ended September 30, 2012 compared to the same periods ended September 30, 2011

DCT Industrial Trust is a leading industrial real estate company specializing in the acquisition, development, leasing and management of bulk distribution and light industrial properties located in high-volume distribution markets in the United States and Mexico. As of September 30, 2012, the Company owned interests in or had under development approximately 75.2 million square feet of properties leased to approximately 840 customers, including 16.7 million square feet managed on behalf of five institutional capital management joint venture partners. Also as of September 30, 2012, we consolidated 388 operating properties, two redevelopment properties and two development properties.

Comparison of the three months ended September 30, 2012 compared to the same period ended September 30, 2011

The following table illustrates the changes in rental revenues, rental expenses and real estate taxes, property net operating income, other revenue and other income (loss) and other expenses for the three months ended September 30, 2012 compared to the three months ended September 30, 2011. Our same store portfolio includes all operating properties that we owned for the entirety of both the current and prior year reporting periods for which the

Table of Contents

operations had been stabilized. Non-same store operating properties include properties not meeting the same store criteria and by definition exclude development and redevelopment properties. The same store portfolio for the periods presented totaled 359 operating properties and was comprised of 54.3 million square feet. A discussion of these changes follows in the table below (in thousands).

Net income (loss) attributable to common stockholders	\$ 7,548	\$ (8,076)	\$ 15,624

⁽¹⁾ Property net operating income, or property NOI, is defined as rental revenues, including reimbursements, less rental expenses and real estate taxes, which excludes institutional capital management fees, depreciation, amortization, casualty gains, impairment, general and administrative expenses, equity in earnings (loss) of unconsolidated joint ventures, interest expense, interest and other income (expenses) and income tax benefit (expense) and other taxes. We consider property NOI to be an appropriate supplemental performance measure because property NOI reflects the operating performance of our properties and excludes certain items that are not considered to be controllable in connection with the management of the property such as depreciation, amortization, impairment, general and administrative expenses and interest expense. However, property NOI should not be viewed as an alternative measure of our financial performance since

it excludes expenses which could materially

Table of Contents

impact our results of operations. Further, our property NOI may not be comparable to that of other real estate companies, as they may use different methodologies for calculating property NOI. We believe net income attributable to DCT common stockholders, as defined by GAAP, to be the most appropriate measure to evaluate our overall financial performance. For a reconciliation of our property net operating income to our reported Loss from continuing operations, see Notes to Consolidated Financial Statements, Note 12 Segment Information.

Rental Revenues

Rental revenues, which are comprised of base rent, straight-line rent, amortization of above and below market rent intangibles, tenant recovery income, early lease termination fees and other rental revenues, increased by \$6.3 million, or 10.4%, for the three months ended September 30, 2012 compared to the same period in 2011, primarily due to the following changes:

\$4.5 million increase in our non-same store rental revenues, including development and redevelopment properties, primarily as a result of an increase in the number of properties and an increase in average occupancy period over period. The average occupancy of the non-same store properties increased to 84.9% for the three months ended September 30, 2012 from 67.4% for the three months ended September 30, 2011. Since September 30, 2011, we acquired 14 operating properties and two development properties and completed development or redevelopment of two properties; and

\$1.8 million increase in total revenue in our same store portfolio due primarily to the following:

\$1.5 million increase in base rent primarily related to a 120 basis point increase in average occupancy period over period; and

\$1.0 million increase in operating expense recoveries related to the increase in occupancy; which was partially offset by

\$0.6 million decrease in other revenues primarily related to decrease in straight-line rental revenue.

The following table illustrates the various components of our total rental revenues for the three months ended September 30, 2012 and 2011 (in thousands).

	Three Months Ended September 30,		\$ Change
	2012	2011	
Base rent	\$ 50,495	\$ 45,885	\$ 4,610
Straight-line rent	1,294	1,734	(440)
Amortization of above and below market rent intangibles	230	140	(90)
Tenant recovery income	14,425	12,346	2,079
Other	697	652	45
Revenues related to early lease terminations	186	252	(66)
Total rental revenues	\$ 67,327	\$ 61,009	\$ 6,318

Rental Expenses and Real Estate Taxes

Rental expenses and real estate taxes increased by approximately \$2.0 million, or 11.8%, for the three months ended September 30, 2012 compared to the same period in 2011, primarily due to:

Edgar Filing: DCT Industrial Trust Inc. - Form 10-Q

\$1.3 million net increase in rental expenses and real estate taxes related to the properties acquired and development and redevelopment properties placed into operation during the period; and

\$0.7 million net increase in rental expenses and real estate taxes in our same store portfolio, which was primarily driven by increases in repairs and maintenance and property insurance.

Other Revenue and Other Income (Loss)

Total other revenue and other income (loss) increased by approximately \$2.7 million for the three months ended September 30, 2012 as compared to the same period in 2011, primarily due to:

Table of Contents

\$2.2 million increase in equity in earnings (loss) of unconsolidated joint ventures primarily as a result of increased earnings related to increases in occupancy and a gain recorded from the sale of a property in one of our joint ventures; and

\$0.6 million increase in interest and other income (expense) primarily related to gains as a result of foreign currency re-measurement of peso denominated cash balances.

Other Expenses

Other expenses increased by approximately \$1.8 million, or 3.3%, for the three months ended September 30, 2012 as compared to the same period in 2011, primarily as a result of:

\$0.8 million increase in interest expense primarily due to higher average borrowings;

\$0.5 million increase in general and administrative expenses primarily related to higher personnel costs, partially offset by increased capitalized overhead as a result of increased development, leasing and other capital activities;

\$0.4 million increase in depreciation expense resulting from real estate acquisitions and capital additions; and

\$0.1 million increase in income tax expense and other taxes.

Income from Discontinued Operations

Income from discontinued operations increased by \$12.2 million for the three months ended September 30, 2012 as compared to the same period in 2011. This increase is primarily related to the gain on dispositions totaling \$12.2 million recorded in 2012.

Noncontrolling Interests

Net (income) loss attributable to noncontrolling interests increased by approximately \$1.7 million for the three months ended September 30, 2012 as compared to the same period in 2011. This increase is related to the net loss in 2011 and net income in 2012, partially offset by a decrease in minority interest ownership percentage. We owned approximately 92% of our operating partnership as of September 30, 2012 compared to approximately 91% as of September 30, 2011.

Comparison of the nine months ended September 30, 2012 compared to the same period ended September 30, 2011

The following table illustrates the changes in rental revenues, rental expenses and real estate taxes, property net operating income, other revenue and other income (loss) and other expenses for the nine months ended September 30, 2012 compared to the nine months ended September 30, 2011. Our same store portfolio includes all operating properties that we owned for the entirety of both the current and prior year reporting periods for which the operations had been stabilized. Non-same store operating properties include properties not meeting the same store criteria and by definition exclude development and redevelopment properties. The same store portfolio for the periods presented totaled 343 operating properties and was comprised of 52.0 million square feet. A discussion of these changes follows in the table below (in thousands).

Net loss attributable to common stockholders	\$ (14,240)	\$ (25,087)	\$ 10,847

⁽¹⁾ For a discussion of why we view property net operating income to be an appropriate supplemental performance measure see page 31, above. For a reconciliation of our property net operating income to our reported Loss from continuing operations, see Notes to Consolidated Financial Statements, Note 11 Segment Information.

Table of Contents*Rental Revenues*

Rental revenues, which are comprised of base rent, straight-line rent, amortization of above and below market rent intangibles, tenant recovery income, early lease termination fees and other rental revenues, increased by \$17.4 million, or 9.8%, for the nine months ended September 30, 2012 compared to the same period in 2011, primarily due to the following changes:

\$14.8 million increase in our non-same store rental revenues including development and redevelopment properties, primarily as a result of an increase in the number of properties and an increase in average occupancy period over period. The average occupancy of the non-same store properties increased to 81.1% for the nine months ended September 30, 2012 from 54.0% for the nine months ended September 30, 2011. Since September 30, 2011, we acquired 14 operating properties and two development properties and completed development or redevelopment of two properties; and

\$2.6 million increase in total revenue in our same store portfolio due primarily to the following:

\$4.3 million increase in base rent primarily related to a 140 basis point increase in average occupancy period over period; and

\$1.9 million increase in operating expense recoveries resulting from higher average occupancy; which was partially offset by

\$3.4 million decrease in revenues related to straight-line rental adjustments.

The following table illustrates the various components of our total rental revenues for the nine months ended September 30, 2012 and 2011 (in thousands).

	Nine Months Ended September 30,		\$ Change
	2012	2011	
Base rent	\$ 147,875	\$ 133,724	\$ 14,151
Straight-line rent	4,447	6,707	(2,260)
Amortization of above and below market rent intangibles	571	296	275
Tenant recovery income	39,672	34,537	5,135
Other	1,808	1,679	129
Revenues related to early lease terminations	401	435	(34)
Total rental revenues	\$ 194,774	\$ 177,378	\$ 17,396

Rental Expenses and Real Estate Taxes

Rental expenses and real estate taxes increased by approximately \$3.3 million, or 6.5%, for the nine months ended September 30, 2012 compared to the same period in 2011, primarily due to:

\$3.7 million net increase in rental expenses and real estate taxes related to the properties acquired and development and redevelopment properties placed into operation during the period; which was partially offset by

\$0.3 million net decrease in rental expenses and real estate taxes in our same store portfolio, which was primarily driven by decreases in repairs and maintenance and non-recoverable expenses, partially offset by increases in insurance, utilities and property taxes.

Other Revenue and Other Income (Loss)

Total other revenue and other income (loss) increased by approximately \$5.0 million for the nine months ended September 30, 2012 as compared to the same period in 2011, primarily due to:

\$4.2 million increase in equity in earnings (loss) of unconsolidated joint ventures primarily as a result of an increase in occupancy for two of our development joint ventures, as well as gains recognized on the sale of two properties in our unconsolidated joint ventures;

Table of Contents

\$0.6 million increase in interest and other income (expense) primarily related to gains as a result of foreign currency re-measurement of peso denominated cash balances; and

\$0.1 million increase in casualty gains.

Other Expenses

Other expenses increased by approximately \$6.4 million, or 4.1%, for the nine months ended September 30, 2012 as compared to the same period in 2011, primarily as a result of:

\$5.2 million increase in interest expense primarily due to higher average borrowings and hedge ineffectiveness recognized during the nine months ended September 30, 2012 related to our settled hedge liability (see Notes to the Consolidated Financial Statements Note 5 Financial Instruments and Hedging Activities for further detail related to the hedge activity);

\$3.9 million increase in depreciation expense resulting from real estate acquisitions and capital additions; and

\$0.5 million increase in income tax expense and other taxes; which were partially offset by

\$1.9 million decrease in impairment losses on unconsolidated joint ventures related to an impairment recorded in 2011 on a property sold in an unconsolidated joint venture; and

\$1.3 million decrease in general and administrative expenses due primarily to decreased acquisition costs and higher capitalized overhead as a result of increased development, leasing and other capital activities.

Income from Discontinued Operations

Income from discontinued operations decreased by approximately \$0.3 million for the nine months ended September 30, 2012 as compared the same period in 2011. This change is primarily the result of a casualty gain recorded in 2011 on a property subsequently sold, partially offset by net gains on properties sold in 2012.

Noncontrolling Interests

Net loss attributable to noncontrolling interests decreased by approximately \$1.5 million due to a decrease of consolidated net loss, period over period, partially offset by an increase in our ownership of our operating partnership. We owned approximately 92% of our operating partnership as of September 30, 2012 compared to 91% as of September 30, 2011.

Table of Contents**Segment Summary for the three and nine months ended September 30, 2012 compared to the same periods ended September 30, 2011**

The Company's segments are based on our internal reporting of operating results used to assess performance based on our properties geographical markets. Our markets are aggregated into three reportable regions or segments, East, Central and West, which are based on the geographical locations of our properties. These regions are comprised of the markets by which management and their operating teams conduct and monitor business (see further detail on our Segments in Notes to the Consolidated Financial Statements,

Note 11 Segment Information). Management considers rental revenues and property net operating income aggregated by segment to be the appropriate way to analyze performance.

The following table illustrates the changes in our consolidated operating properties in continuing operations by segment as of, and for the three and nine months ended September 30, 2012 compared to September 30, 2011, respectively (dollar amounts and square feet in thousands).

	Number of buildings	Square feet	As of September 30, Occupancy at period end	Segment assets ⁽¹⁾	Three Months Ended September 30, Rental revenues ⁽²⁾	Property net operating income ⁽³⁾	Nine Months Ended September 30, Rental revenues ⁽²⁾	Property net operating income ⁽³⁾

⁽¹⁾ Segment assets include all assets held by operating properties included in a segment, less non-segment cash and cash equivalents.

⁽²⁾ Segment rental revenues include operating properties and revenues from development properties. Properties which were sold or held for sale during the period are not included in these results.

⁽³⁾ For the definition of property net operating income, or property NOI, and a reconciliation of our property net operating income to our reported Income (Loss) from Continuing Operations, see Notes to Consolidated Financial Statements, Note 11 Segment Information.

Table of Contents

The following table reflects our total assets, net of accumulated depreciation and amortization, by segment as of September 30, 2012 and 2011 (in thousands).

	September 30, 2012	September 30, 2011	Change
Segments:			
East assets	\$ 910,127	\$ 999,060	\$ (88,933)
Central assets	1,047,077	1,053,533	(6,456)
West assets	696,003	626,794	69,209
Total segment net assets	2,653,207	2,679,387	(26,180)
Non-segment assets:			
Non-segment cash and cash equivalents	33,863	13,266	20,597
Other non-segment assets ⁽¹⁾	168,186	153,800	14,386
Total assets	\$ 2,855,256	\$ 2,846,453	\$ 8,803

⁽¹⁾ Other non-segment assets primarily consists of corporate assets including investments in and advances to unconsolidated joint ventures, notes receivable, deferred loan costs, other receivables and other assets.

East Segment

East Segment assets decreased by \$88.9 million to \$910.1 million as of September 30, 2012 as compared to \$999.1 million as of September 30, 2011. This decrease is primarily the result of the disposition of 27 properties since September 30, 2011, partially offset by the acquisition of three properties and completion of development on two properties during the same period.

East Segment property NOI, after reclassification for discontinued operations, increased approximately \$0.3 million, for the three months ended September 30, 2012 as compared to the same period in 2011, primarily as a result of the acquisitions in the East operating segment during the period.

East Segment property NOI, after reclassification for discontinued operations, increased approximately \$2.2 million, for the nine months ended September 30, 2012 as compared to the same period in 2011, of which \$0.5 million is attributable to property acquisitions and the remainder of the increase is primarily a result of higher rental revenues.

Central Segment

Central Segment assets decreased by \$6.5 million, to \$1,047.1 million as of September 30, 2012 as compared to \$1,053.5 million as of September 30, 2011. This decrease primarily related to the disposition of 20 properties since September 30, 2011, partially offset by the acquisition of eight properties during the same period.

Central Segment property NOI, after reclassification for discontinued operations, increased approximately \$2.8 million, for the three months ended September 30, 2012 as compared to the same period in 2011, primarily as a result of:

Edgar Filing: DCT Industrial Trust Inc. - Form 10-Q

\$3.5 million increase in rental revenues, of which \$1.6 million is attributed to property acquisitions and \$1.9 million which is attributed to an increase in occupancy and higher rental revenues at existing properties; which was partially offset by

\$0.7 million increase in operating expenses primarily comprised of the following:

Table of Contents

\$0.4 million increase in property taxes, of which \$0.3 million was related to property taxes on acquisitions and the remainder related to increasing property tax expense on existing properties; and

\$0.3 million increase in various other operating expenses, including repairs and maintenance.

Central Segment property NOI, after reclassification for discontinued operations, increased approximately \$7.2 million, for the nine months ended September 30, 2012 as compared to the same period in 2011, primarily as a result of:

\$9.0 million increase in rental revenues, resulting from a \$2.6 million increase due to acquisitions and a \$6.4 million increase as a result of an increase in occupancy and higher rental revenues at existing properties; which was partially offset by

\$1.8 million increase in operating expenses, including a \$1.9 million increase in property taxes of which \$0.6 million is related to acquisitions, partially offset by a \$0.1 million decrease other operating expenses.

West Segment

West Segment assets increased by \$69.2 million, to \$696.0 million as of September 30, 2012 as compared to \$626.8 million as of September 30, 2011. This increase results primarily from the acquisition of five properties since September 30, 2011.

West Segment property NOI, after reclassification for discontinued operations, increased approximately \$1.2 million for the three months ended September 30, 2012 as compared to the same period in 2011 primarily as a result of the property acquisitions during the period.

West Segment property NOI, after reclassification for discontinued operations, increased approximately \$4.8 million for the nine months ended September 30, 2012 as compared to the same period in 2011 primarily as a result of:

\$6.3 million increase in rental revenues, resulting from a \$3.7 million increase due to acquisitions and a \$2.6 million increase as a result of an increase in occupancy and higher rental revenues at existing properties; which was partially offset by

\$1.5 million increase of operating expenses primarily related to a \$1.2 million increase in property taxes, \$0.5 million of which was related to an increase on property taxes from acquisitions and various other increases.

Liquidity and Capital Resources

Overview

We currently expect that our principal sources of working capital and funding for potential capital requirements for expansions and renovation of properties, developments, acquisitions, distributions to investors and debt service will include:

Cash flows from operations;

Edgar Filing: DCT Industrial Trust Inc. - Form 10-Q

Proceeds from capital recycling and dispositions;

Borrowings under our senior unsecured revolving credit facility;

Other forms of secured or unsecured financings;

Offerings of common stock or other securities;

Current cash balances; and

Distributions from our institutional capital management and other joint ventures.

Table of Contents

Our sources of capital will be used to meet our liquidity requirements and capital commitments, including operating activities, debt service obligations, equity holder distributions, capital expenditures at our properties, development funding requirements and future acquisitions. We expect to utilize the same sources of capital to meet our short-term and long-term liquidity requirements, and expect that these sources will be sufficient to meet our short-term liquidity needs.

Cash Flows

Cash and cash equivalents were \$37.6 million and \$12.8 million as of September 30, 2012 and December 31, 2011, respectively. Net cash provided by operating activities increased by \$2.1 million to \$77.6 million during the nine months ended September 30, 2012 compared to \$75.5 million during the same period in 2011. This change was primarily due to an increase in accounts payable during the periods.

Net cash used in investing activities decreased \$87.8 million to \$111.6 million during the nine months ended September 30, 2012 compared to \$199.4 million during the same period in 2011. This change was primarily due to an increase in cash inflows from dispositions during 2012 totaling \$81.8 million and a decrease in cash outflows related to acquisitions totaling \$25.9 million, partially offset by an increase in capital expenditures of \$11.1 million, an increase in contributions to and a decrease in distributions of investments in unconsolidated joint ventures together totaling \$6.0 million and a decrease in other investing activities of \$2.8 million.

Net cash provided by financing activities decreased by \$63.1 million to \$58.7 million during the nine months ended September 30, 2012 as compared to \$121.8 million during the same period in 2011. This decrease was primarily due to a reduction in net debt activity year over year totaling \$25.8 million, a \$33.6 million payment made to settle our cash flow hedge in 2012, an increase in our dividends and distributions paid of \$1.9 million to common stockholders and noncontrolling interests and an increase in redemption of noncontrolling interests totaling \$2.7 million, partially offset by changes in various other financing activities.

Common Stock

As of September 30, 2012, approximately 268.7 million shares of common stock were issued and outstanding.

On March 23, 2010, we registered a continuous equity offering program. Pursuant to this offering, we may sell up to 20 million shares of common stock for general corporate purposes from time-to-time through March 23, 2013 in at-the-market offerings or certain other transactions.

On September 12, 2012, we issued approximately 19.0 million shares of common stock in a public offering at a price of \$6.20 per share for net proceeds of \$112.6 million before offering expenses.

Distributions

During the three and nine months ended September 30, 2012, our board of directors declared distributions to stockholders totaling approximately \$20.5 million and \$59.0 million, respectively, including distributions to OP unitholders. During the same periods in 2011, our board of directors declared distributions to stockholders of approximately \$19.0 million and \$57.7 million, respectively. Existing cash balances, cash provided from operations and borrowings under our senior unsecured revolving credit facility were used for distributions paid during 2012 and 2011.

The payment of quarterly distributions is determined by our board of directors and may be adjusted at its discretion at any time. During October 2012, our board of directors declared quarterly cash dividends of \$0.07 per share and unit, payable on January 10, 2013 to stockholders and OP unitholders of record as of December 28, 2012.

Outstanding Indebtedness

As of September 30, 2012 our outstanding indebtedness of approximately \$1.3 billion consisted of mortgage notes and senior unsecured notes, excluding approximately \$54.5 million representing our proportionate share of non-recourse debt associated with unconsolidated joint ventures. As of December 31, 2011, our outstanding indebtedness of approximately \$1.3 billion consisted of mortgage notes and senior unsecured notes, excluding approximately \$61.7 million representing our proportionate share of non-recourse debt associated with unconsolidated joint ventures.

Table of Contents

As of September 30, 2012, the gross book value of our consolidated properties was approximately \$3.2 billion and the gross book value of all properties securing our mortgage debt was approximately \$0.7 billion. As of December 31, 2011, the gross book value of our consolidated properties was approximately \$3.2 billion and the gross book value of all properties securing our mortgage debt was approximately \$0.7 billion. Our debt has various covenants with which we were in compliance as of September 30, 2012 and December 31, 2011.

Our debt instruments require monthly or quarterly payments of interest and many require, or will ultimately require, monthly or quarterly repayments of principal. Currently, cash flows from operations are sufficient to satisfy these monthly and quarterly debt service requirements, excluding principal maturities, and we anticipate that cash flows from operations will continue to be sufficient to satisfy our monthly and quarterly debt service, excluding principal maturities. During the three and nine months ended September 30, 2012, our debt service, including principal payments and refinancing activities and interest payments, totaled \$30.5 million and \$100.5 million, respectively. During the three and nine months ended September 30, 2011, our debt service, including principal payments and refinancing activities and interest payments, totaled \$94.3 million and \$201.3 million, respectively.

Debt Issuance, Payoffs and Assumptions

In September 2012, we issued \$90.0 million of fixed rate, senior unsecured notes through a private placement offering. These senior unsecured notes mature in September 2022 and have a fixed interest rate of 4.21%. The notes require semi-annual interest payments.

During the nine months ended September 30, 2012 we retired mortgage notes totaling approximately \$43.0 million previously scheduled to mature in September 2012, October 2012 and January 2013 using proceeds from the Company's senior unsecured revolving credit facility and proceeds from our equity offering.

In June 2012, we assumed two non-recourse mortgage notes with outstanding balances of approximately \$4.5 million and \$2.5 million in connection with two property acquisitions. The assumed notes bear interest at 6.08% and 6.25%, respectively, and require monthly payments of principal and interest. The notes mature in August 2016 and July 2020, respectively.

Line of Credit

As of September 30, 2012 and December 31, 2011 we did not have any amounts outstanding on our senior unsecured revolving credit facility.

The senior unsecured revolving credit facility agreement contains various covenants with which we were in compliance with as of September 30, 2012.

Interest Rate Swap

As of September 30, 2012, we did not have any swaps in place. During the three months ended September 30, 2012, we settled our forward-starting swap, which was in place to hedge the variability of cash flows associated with forecasted issuances of debt, contemporaneously with locking rates for \$90.0 million of debt which we funded in September 2012. During the nine months ended September 30, 2012 we recognized \$0.7 million of ineffectiveness due to the change in estimated timing of debt issuance.

Table of Contents*Debt Maturities*

The following table sets forth the scheduled maturities of our debt, excluding unamortized premiums, as of September 30, 2012 (in thousands).

Year	Senior Unsecured Notes	Mortgage	Senior Unsecured Revolving Credit Facility	Total
2012	\$	\$ 12,904	\$	\$ 12,904
2013	175,000	39,519		214,519
2014	50,000	10,013		60,013
2015	215,000	48,384		263,384
2016	99,000	10,219		109,219
Thereafter	486,000	151,563		637,563
Total	\$ 1,025,000	\$ 272,602	\$	\$ 1,297,602

Financing Strategy

We do not have a formal policy limiting the amount of debt we incur, although we currently intend to operate so that our financial metrics are generally consistent with investment grade peers in the real estate industry. We continually evaluate our secured and unsecured leverage and among other relevant metrics, our fixed charge coverage. Our charter and our bylaws do not limit the indebtedness that we may incur. We are, however, subject to certain covenants which may limit our outstanding indebtedness.

Contractual Obligations

The following table reflects our contractual obligations as of September 30, 2012, specifically our obligations under long-term debt agreements, operating and ground lease agreements and purchase obligations (in thousands).

	Total	Payments due by Period			
		Less than 1 Year	1 - 3 Years	4-5 Years	More Than 5 Years
Contractual Obligations ⁽¹⁾					
Scheduled long-term debt maturities, including interest ⁽²⁾	\$ 1,638,135	\$ 266,947	\$ 443,182	\$ 241,911	\$ 686,095
Operating lease commitments	2,795	720	1,366	709	
Ground lease commitments ⁽³⁾	13,378	474	1,016	1,088	10,800
Total	\$ 1,654,308	\$ 268,141	\$ 445,564	\$ 243,708	\$ 696,895

⁽¹⁾ From time-to-time in the normal course of our business, we enter into various contracts with third-parties that may obligate us to make payments, such as maintenance agreements at our properties. Such contracts, in the aggregate, do not represent material obligations, are typically short-term and cancellable within 90 days and are not included in the table above. Also, excluded from the total are our estimated construction costs to complete development projects of approximately \$34.2 million, none of which is legally committed.

⁽²⁾ Variable interest rate payments are estimated based on the LIBOR rate at September 30, 2012.

⁽³⁾ Three of our buildings comprised of 0.7 million square feet reside on 38 acres of land which is leased from an airport authority.

Table of Contents***Off-Balance Sheet Arrangements***

As of September 30, 2012 and December 31, 2011, respectively, we had no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors, other than items discussed herein.

As of September 30, 2012, our proportionate share of the total construction loans of our unconsolidated development joint ventures, including undrawn amounts, was \$24.9 million; \$14.2 million is scheduled to mature by the end of 2012 and \$10.7 million is scheduled to mature by the end of 2013. Our proportionate share of the total construction loans, including undrawn amounts, of our unconsolidated development joint ventures includes 50% of the construction loans associated with the SCLA joint venture which are non-recourse to the venture partners.

Indebtedness and Other Off-Balance Sheet Arrangements

There are no lines of credit or side agreements related to, or between, our unconsolidated joint ventures and us, and there are no other derivative financial instruments between our unconsolidated joint ventures and us. In addition, we believe we have no material exposure to financial guarantees, except as discussed above.

We may elect to fund additional capital to a joint venture through equity contributions (generally on a basis proportionate to our ownership interests), advances or partner loans, although such funding is not required contractually or otherwise. As of September 30, 2012, our proportionate share of non-recourse debt associated with unconsolidated joint ventures is \$54.5 million. The maturities of our proportionate share of the non-recourse debt are summarized in the table below (in thousands):

Year	DCT's Proportionate Share of Secured Non-Recourse Debt in Unconsolidated Joint Ventures
2012	\$ 14,218
2013	10,666
2014	4,513
2015	2,279
2016	846
Thereafter	21,947
Total	\$ 54,469

Funds From Operations

We believe that net income attributable to common stockholders, as defined by GAAP, is the most appropriate earnings measure. However, we consider Funds from Operations (FFO), as defined by the National Association of Real Estate Investment Trusts (NAREIT), to be a useful supplemental, non-GAAP measure of DCT Industrial's operating performance. NAREIT developed FFO as a relative measure of performance of an equity REIT in order to recognize that the value of income-producing real estate historically has not depreciated on the basis determined under GAAP. FFO is generally defined as net income attributable to common stockholders, calculated in accordance with GAAP, plus real estate-related depreciation and amortization, less gains from dispositions of operating real estate held for investment purposes, plus impairment losses on depreciable real estate and impairments of in substance real estate investments in investees that are driven by measureable decreases in the fair value of the depreciable real estate held by the unconsolidated joint ventures and adjustments to derive our pro rata share of FFO of unconsolidated joint ventures. We exclude gains and losses on business combinations and include the gains or losses from dispositions of properties which were acquired or developed with the intention to sell or contribute to an investment fund in our definition of FFO. Although the NAREIT definition of FFO predates the guidance for accounting for gains and losses on business combinations, we believe that excluding such gains and losses is consistent with the key objective of FFO as a performance measure. We also present FFO excluding acquisition costs, debt modification costs and impairment losses on properties which are not depreciable. We believe that FFO excluding acquisition costs, debt modification costs and impairment losses on non-depreciable real estate is useful supplemental information regarding our operating

Table of Contents

performance as it provides a more meaningful and consistent comparison of our operating performance and allows investors to more easily compare our operating results. Readers should note that FFO captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic effect and could materially impact our results from operations. NAREIT's definition of FFO is subject to interpretation, and modifications to the NAREIT definition of FFO are common. Accordingly, our FFO may not be comparable to other REITs. FFO and FFO should be considered only as a supplement to net income as a measure of our performance.

The following table presents the calculation of our FFO reconciled from Net loss attributable to common stockholders for the periods indicated below on a historical basis (unaudited, amounts in thousands, except per share and unit data).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Reconciliation of net income (loss) attributable to common stockholders to FFO:				
Net income (loss) attributable to common stockholders	\$ 7,548	\$ (8,076)	\$ (14,240)	\$ (25,087)
Adjustments:				
Real estate related depreciation and amortization	30,934	33,398	94,676	96,839
Equity in (earnings) loss of unconsolidated joint ventures, net	(1,208)	967	(784)	3,450
Equity in FFO of unconsolidated joint ventures	2,590	1,083	7,883	2,119
Impairment losses on depreciable real estate			11,422	1,934
Gain on dispositions of real estate interests	(12,227)		(12,348)	
Noncontrolling interest in the above adjustments	(1,804)	(3,655)	(9,921)	(10,852)
FFO attributable to unitholders	2,276	2,413	7,377	6,936
FFO basic and diluted	\$ 28,109	\$ 26,130	\$ 84,065	\$ 75,339
FFO per common share and unit basic and diluted	\$ 0.10	\$ 0.10	\$ 0.31	\$ 0.28
FFO weighted average common shares and units outstanding:				
Common shares for earnings per share basic	253,657	245,805	249,381	241,548

Units	22,335	25,011	24,003	25,260
FFO weighted average common shares, participating securities and units outstanding basic	277,991	272,371	275,246	268,431
Dilutive common stock equivalents	663	429	618	468
FFO weighted average common shares, participating securities and units outstanding diluted	278,654	272,800	275,864	268,899

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the exposure to losses resulting from changes in market prices such as interest rates, foreign currency exchange rates and rental rates. Our future earnings and cash flows are dependent upon prevailing market rates. Accordingly, we manage our market risk by matching projected cash inflows from operating, investing and financing activities with projected cash outflows for debt service, acquisitions, capital expenditures, distributions to stockholders and OP unitholders and other cash requirements. The majority of our outstanding debt has fixed interest rates, which minimizes the risk of fluctuating interest rates.

Table of Contents

Interest Rate Risk

Our exposure to market risk includes interest rate fluctuations in connection with our senior unsecured revolving credit facility and other variable rate borrowings and forecasted fixed rate debt issuances, including refinancing of existing fixed rate debt. Interest rate risk may result from many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors that are beyond our control. To manage interest rate risk for variable rate debt and issuances of fixed rate debt, in the past we have primarily used treasury locks and forward-starting swaps as part of our cash flow hedging strategy. These derivatives are designed to mitigate the risk of future interest rate increases by providing a fixed interest rate for a limited, pre-determined period of time. During the nine months ended September 30, 2012 and 2011, such derivatives were in place to hedge some of the variable cash flows associated with forecasted issuances of debt that occurred during 2012, and to mitigate fluctuations in certain variable rate borrowings. We do not use derivatives for trading or speculative purposes and only enter into contracts with major financial institutions based on their credit rating and other factors. As of September 30, 2012, we did not have any derivatives in place. In July 2012, we settled our forward-starting swap for \$33.6 million which was in place to hedge the variability of cash flows associated with forecasted issuances of debt, contemporaneously with locking rates for \$90.0 million of debt which was funded in September 2012. During the nine months ended September 30, 2012, we recognized \$0.7 million of ineffectiveness due to the change in estimated timing of debt issuance on this hedge. As of December 31, 2011, our derivative had a fair value that resulted in a liability of \$26.7 million which was included in Other liabilities in our Consolidated Balance Sheet.

Our variable rate debt is subject to risk based upon prevailing market interest rates. As of September 30, 2012, we had approximately \$175.0 million of variable rate debt outstanding indexed to LIBOR rates. If there was a 10% change in prevailing market interest rates relevant to our remaining variable rate debt, interest expense during the nine months ended September 30, 2012 would have increased by approximately \$0.5 million. Additionally, if weighted average interest rates on our fixed rate debt were to have changed by 100 basis points due to refinancing, interest expense would have changed by approximately \$8.3 million during the nine months ended September 30, 2012.

As of September 30, 2012, the estimated fair value of our debt was approximately \$1.4 billion based on our estimate of the then-current market interest rates.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures; as such term is defined under Rule 13a-15(e) under the Exchange Act, as of September 30, 2012, the end of the period covered by this report. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that our disclosure controls and procedures will detect or uncover every situation involving the failure of persons within DCT Industrial Trust Inc. or its affiliates to disclose material information otherwise required to be set forth in our periodic reports. Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective as of September 30, 2012 in providing reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.
