PROSPECTUS

**10,434,782 Common Shares**

This is the initial public offering of common shares of beneficial interest, \$0.01 par value per share, of Physicians Realty Trust. We are a self-managed healthcare real estate company recently organized to acquire, selectively develop, own and manage healthcare properties that are leased to physicians, hospitals and healthcare delivery systems. We invest in real estate that is integral to providing high quality healthcare services. Our properties typically are on a campus with a hospital or other healthcare facilities or strategically located and affiliated with a hospital or other healthcare facilities. Our management team has significant public healthcare real estate investment trust ( REIT ) experience and long established relationships with physicians, hospitals and healthcare delivery system decision makers that we believe will provide quality investment opportunities to generate attractive risk-adjusted returns to our shareholders.

Prior to this offering there has been no public market for our common shares. Our common shares have been approved for listing, subject to official notice of issuance, on the New York Stock Exchange under the symbol DOC.

We intend to elect and qualify to be taxed as a real estate investment trust, or REIT, for U.S. federal income tax purposes commencing with our short taxable year ending December 31, 2013. Our common shares are subject to restrictions on ownership and transfer that are intended, among other purposes, to assist us in qualifying and maintaining our qualification as a REIT. Our charter, subject to certain exceptions, limits ownership to no more than 9.8% in value or number of shares, whichever is more restrictive, of the outstanding shares of any class or series of our shares of beneficial interest.

**We are an emerging growth company under the federal securities laws and will be subject to reduced public company reporting requirements. Investing in our common shares involves a high degree of risk. See Risk Factors beginning on page 21 of this prospectus.**

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.**

	Per Share	Total
Public offering price	\$ 11.50	\$ 119,999,993
Underwriting discounts and commissions(1)	\$ 0.805	\$ 8,400,000
Proceeds, before expenses, to us	\$ 10.695	\$ 111,599,993

## Edgar Filing: Physicians Realty Trust - Form 424B4

(1) See Underwriting for additional disclosure regarding the underwriting discounts and commissions and other expenses payable to the underwriters by us.

We have granted the underwriters an option to purchase up to 1,565,216 additional common shares at the public offering price, less the underwriting discount, to cover over-allotments. If the underwriters exercise this option in full, the total underwriting discounts and commissions will be \$9,659,998 and our total proceeds, before expenses, will be \$128,339,979.

Delivery of the common shares in book-entry form will be made on or about July 24, 2013.

**PROSPECTUS SUMMARY**

*This summary highlights key aspects of this offering. This summary is not complete and does not contain all of the information that you should consider before making your investment decision. You should carefully read this entire prospectus, including the more detailed information set forth under the caption "Risk Factors," the historical and pro forma financial statements, including the related notes thereto, appearing elsewhere in this prospectus, and any free writing prospectus provided or approved by us before investing in our common shares.*

*Unless the context otherwise requires or indicates, references in this prospectus to we, us, our, our company, and Physicians Realty refer to Physicians Realty Trust, a Maryland real estate investment trust, together with its consolidated subsidiaries, including Physicians Realty L.P., a Delaware limited partnership, which we refer to in this prospectus as our operating partnership, and the historical business and operations of four healthcare real estate funds that we have classified for accounting purposes as our Predecessor and which we sometimes refer to as the Ziegler Funds.*

*Unless the context otherwise requires or indicates, the information set forth in this prospectus assumes that (i) the formation transactions described in detail elsewhere in this prospectus have been completed, (ii) the underwriters' option to acquire additional common shares is not exercised, and (iii) the value of each common unit of limited partnership interest in our operating partnership, or OP unit, issuable in the formation transactions is equivalent to the initial public offering price of one common share.*

**Overview**

We are a self-managed healthcare real estate company recently organized to acquire, selectively develop, own and manage healthcare properties that are leased to physicians, hospitals and healthcare delivery systems. We invest in real estate that is integral to providing high quality healthcare services. Our properties are typically located on a campus with a hospital or other healthcare facilities or strategically located and affiliated with a hospital or other healthcare facilities. We believe the impact of government programs and continuing trends in the healthcare industry create attractive opportunities for us to invest in health care related real estate. Our management team has significant public healthcare REIT experience and has long established relationships with physicians, hospitals and healthcare delivery system decision makers that we believe will provide quality investment and growth opportunities. Our principal investments will include medical office buildings, outpatient treatment facilities, acute and post-acute care hospitals, as well as other real estate integral to health care providers. We seek to generate attractive risk-adjusted returns for our shareholders through a combination of stable and increasing dividends and potential long-term appreciation in the value of our properties and our common shares.

Our initial portfolio will consist of 19 medical office buildings located in ten states with approximately 528,048 net leasable square feet, which as of March 31, 2013 were approximately 83.1% leased with a weighted average remaining lease term of 7 years. As of March 31, 2013, approximately 46% of the net leasable square footage of our initial properties is affiliated with a healthcare delivery system and approximately 49% of the net leasable square footage of our initial properties is located within approximately  $\frac{1}{4}$  mile of a hospital campus. Approximately 96% of our annualized base rent payments as of March 31, 2013 is from triple net leases, pursuant to which our tenants are responsible for all operating expenses relating to the property, including but not limited to real estate taxes, utilities, property insurance, routine maintenance and repairs, and property management. This structure helps insulate us from increases in certain operating expenses and provides more predictable cash flow. Our leases typically include rent escalation provisions designed to provide us with annual growth in our rental revenues. As of March 31, 2013, leases representing 2.4%, 4.2% and 2.1% of leasable square feet in our initial portfolio will expire in 2013, 2014 and 2015, respectively.

## **Table of Contents**

Our initial portfolio was acquired or developed by healthcare real estate funds managed by B.C. Ziegler & Company, or Ziegler, a specialty investment banking firm focused on the healthcare industry, and another subsidiary of The Ziegler Companies, Inc. As part of our formation transactions, the Ziegler Funds will contribute their ownership interests in these properties, as well as certain operating assets and liabilities, to our operating partnership in exchange for OP units and our assumption or repayment of mortgage debt related to the properties. The principals at Ziegler responsible for establishing these funds and managing the properties will become senior members of our management team upon completion of our formation transactions.

We are a Maryland real estate investment trust and intend to elect to be taxed as a REIT for U.S. federal income tax purposes beginning with our short taxable year ending December 31, 2013.

## **Our Objectives and Growth Strategy**

Our principal business objective is to provide attractive risk-adjusted returns to our shareholders through a combination of (i) sustainable and increasing rental income and cash flow that generates reliable, increasing dividends, and (ii) potential long-term appreciation in the value of our properties and common shares. Our primary strategies to achieve our business objective are to invest in, own and manage a diversified portfolio of high quality healthcare properties and pay careful attention to our tenants' real estate strategies, which we believe will drive high retention, high occupancy and reliable, increasing rental revenue and cash flow.

We intend to grow our portfolio of high-quality healthcare properties leased to physicians, hospitals, healthcare delivery systems and other healthcare providers primarily through acquisitions of existing healthcare facilities that provide stable revenue growth and predictable long-term cash flows. We may also selectively finance the development of new healthcare facilities through joint venture or fee arrangements with premier healthcare real estate developers. Generally, we only expect to make investments in new development properties when approximately 70% or more of the development property has been pre-leased before construction commences. We will seek to invest in properties where we can develop strategic alliances with financially sound healthcare providers and healthcare delivery systems that offer need-based healthcare services in sustainable healthcare markets. We will focus our investment activity on the following types of healthcare properties:

medical office buildings

outpatient treatment and diagnostic facilities

physician group practice clinics

ambulatory surgery centers

specialty hospitals and treatment centers

acute care hospitals

post acute care hospitals and long-term care facilities

We may opportunistically invest in senior housing properties, including skilled nursing, assisted living and independent senior living facilities. Consistent with our intent to qualify as a REIT, we may also opportunistically invest in companies that provide healthcare services, in joint venture entities with operating partners, structured to comply with the REIT Investment Diversification Act of 2007 ( RIDEA ).

In connection with our review and consideration of healthcare real estate investment opportunities, we generally take into account a variety of market considerations, including:

## Edgar Filing: Physicians Realty Trust - Form 424B4

Whether the property is anchored by a financially-sound healthcare delivery system or whether tenants have strong affiliation to a healthcare delivery system;

2

## Table of Contents

the performance of the local healthcare delivery system and its future prospects;

property location, with a particular emphasis on proximity to healthcare delivery systems;

demand for medical office buildings and healthcare related facilities, current and future supply of competing properties, and occupancy and rental rates in the market;

population density and growth potential;

ability to achieve economies of scale with our existing medical office buildings and healthcare related facilities or anticipated investment opportunities; and

existing and potential competition from other healthcare real estate owners and operators.

### **Our Management Team**

Our senior executive officers have extensive experience investing in and developing healthcare related real estate through several real estate, credit and healthcare cycles. John Thomas, our President and Chief Executive Officer, most recently served as Executive Vice President-Medical Facilities Group of Health Care REIT (NYSE: HCN ) where he was responsible for managing over \$5 billion of medical facilities and oversaw the acquisition and development of medical properties valued in excess of \$2.5 billion from 2009 to 2012. Prior to Health Care REIT, Mr. Thomas held senior healthcare executive management positions with the Sisters of Mercy Health System of St. Louis, Inc. and Baylor Health Care System. Mr. Thomas's experience includes managing medical office, outpatient care facilities, hospitals and research life science facilities. John Sweet, our Executive Vice President and Chief Investment Officer, established and manages the Ziegler Funds, whose properties will comprise our initial portfolio. Prior to re-joining Ziegler in 2005 to establish the Ziegler Funds, Mr. Sweet was a co-founder of Windrose Medical Properties Trust ( Windrose ), a publicly-held healthcare REIT, which completed its initial public offering in August 2002. Mr. Sweet assisted in the creation and initial public offering of Windrose as an independent consultant and subsequent to its initial public offering joined the company as the Vice President Business Development where he was responsible for identifying and negotiating the acquisition of medical office buildings. Mr. Lucey, our Senior Vice President Principal Accounting and Reporting Officer, has more than twenty years of public company financial experience, of which more than ten of those years have been in the senior living healthcare industry. Since 2005, Mr. Lucey has served as the Director of Financial Reporting for Assisted Living Concepts, Inc. (NYSE: ALC ), a senior housing operator with over 200 locations in 20 states and annual revenues of approximately \$230 million. Prior to Assisted Living Concepts, Mr. Lucey served as the Manager of Financial Reporting for Case New Holland from 2003 to 2005 and as a Division Controller at Monster Worldwide from 2001 to 2003. From 1996 to 2001, Mr. Lucey was the Director of Financial Reporting for Alterra Healthcare Corporation (now Brookdale Living Communities, NYSE: BKD ). Mr. Lucey's experience includes initial public offerings, as well as various equity and debt offerings and mergers and acquisitions. Mark Theine, our Senior Vice President of Asset and Investment Management, has been the senior asset manager of the Ziegler Funds since September 2005. We believe our management team's long established, trusted relationships with physicians, hospitals and healthcare delivery system decision makers, provides to us and our shareholders a competitive advantage in sourcing attractive investment opportunities and growth opportunities. Our management team and trustees also have relationships and access to state and federal policy makers to stay informed with health care policy directions that may affect our investment decisions and management.

Our shared services agreement with Ziegler will provide us with access to Ziegler's proprietary research and market analysis of the healthcare industry, as well as office space, IT support, accounting support and similar services, helping us to manage our overhead costs prudently. Founded in 1902, Ziegler is a national underwriter of tax exempt bonds for not-for-profit senior living providers, hospitals, and healthcare care delivery systems. In addition to its research team that provides research on over 500 healthcare organizations, Ziegler has over 60 investment banking professionals focused on the healthcare industry. We believe Ziegler's industry knowledge and relationships will help us identify and evaluate investment opportunities.

**Table of Contents**

**Healthcare Industry and Healthcare Real Estate Overview and Market Opportunity**

The nature of healthcare delivery continues to evolve due to the impact of government programs, regulatory changes and consumer preferences. We believe these changes have increased the need for capital among healthcare providers and increased pressure on these providers to integrate more efficient real estate solutions in order to enhance the delivery of quality healthcare. In particular, we believe the following factors and trends are creating an attractive environment in which to invest in healthcare properties.

***\$2.8 Trillion Healthcare Industry Projected to Grow to \$4.8 Trillion (and 19.6% of U.S. GDP) by 2021***

According to the U.S. Department of Health and Human Services, or HHS, healthcare spending accounted for 17.9% of U.S. gross domestic product, or GDP, in 2012. The general aging of the population, driven by the Baby Boomer generation and advances in medical technology and services which increase life expectancy, are key drivers of the growth in healthcare expenditures. The anticipated continuing increase in demand for healthcare services, together with an evolving complex and costly regulatory environment, changes in medical technology and reductions in government reimbursements are expected to pressure capital-constrained healthcare providers to find cost effective solutions for their real estate needs.

We believe the demand by healthcare providers for healthcare real estate will increase as health spending in the United States continues to increase. As shown in the chart below, national healthcare expenditures continue to rise and are projected to grow from an estimated \$2.8 trillion in 2012 to \$4.8 trillion by 2021 representing an average annual rate of growth of 5.7%, reaching a projected 19.6% of GDP in 2021.

***Aging Population***

The aging of the U.S. population has a direct effect on the demand for healthcare as older persons generally utilize healthcare services at a rate well in excess of younger people. Between 2010 and 2050, the U.S. population over 65 years of age is projected to more than double from 40.2 million to nearly 88.5 million and the 85 and older population is expected to more than triple, from 5.7 million in 2010 to 19.0 million, as reflected in the chart below. The number of older Americans is also growing as a percentage

**Table of Contents**

of the total U.S. population with the number of persons older than 65 estimated to comprise 13.0% of the total U.S. population in 2010 and projected to grow to 20.2% by 2050.

**Projected U.S. Population Aged 65+ (1900-2050)**

***Affordable Care Act (30 Million More Insured and Increased Market Certainty)***

The Patient Protection and Affordable Care Act of 2010, or the Affordable Care Act, constitutes a significant overhaul of many aspects of healthcare regulations and health insurance. We believe this evolution of U.S. health care policy creates the framework for healthcare services over the near term. The Affordable Care Act requires every American to have health insurance by 2014 or be subjected to a tax. Those who cannot afford health insurance will be offered insurance subsidies or Medicaid coverage. The U.S. Census Bureau estimates that approximately 50 million Americans did not have healthcare insurance in 2009. HHS predicts the Affordable Care Act will result in an additional 30 million Americans having healthcare insurance by 2020 which we believe will substantially increase the demand for healthcare services.

The Affordable Care Act also contains provisions which are designed to lower reimbursement amounts under Medicare and tie reimbursement levels to the quality of services provided. We believe these and other provisions of the Affordable Care Act will increase the pressure on healthcare providers to become more efficient in their business models, invest capital in their businesses, lower costs and improve the quality of care, which in turn will drive health care systems to monetize their real estate assets and create demand for new, modern and specialized facilities.

***Clinical Care Continues to Shift to Outpatient Care***

As shown in the chart below, procedures traditionally performed in hospitals, such as certain types of surgery, are increasingly moving to outpatient facilities driven by advances in clinical science, shifting consumer preferences, limited or inefficient space in existing hospitals and lower costs in the outpatient environment. This continuing shift toward delivering healthcare services in an outpatient environment rather than a traditional hospital environment increases the need for additional outpatient facilities and smaller, more specialized and efficient hospitals. Studies by the Medicare Payment Advisory Commission and others have shown that healthcare is delivered more cost effectively and with higher patient satisfaction when it is provided on an outpatient basis. Increasingly, hospital admissions are reserved for the critically ill, and less critical patients are treated on an outpatient basis with recuperation in their own homes. We believe the

**Table of Contents**

recently enacted Affordable Care Act and health care market trends toward outpatient care will continue to push health care services out of larger, older, inefficient hospitals and into newer, more efficient and conveniently located outpatient facilities and smaller specialized hospitals. We believe that increased specialization within the medical field is also driving demand for medical facilities designed specifically for particular specialties and that physicians want to locate their practices in medical office space that is in or adjacent to these facilities.

**Cumulative Change in Total Admissions and Total Outpatient Visits<sup>(1)</sup>**

**Table of Contents**

***Physician Employment by Healthcare Delivery System Trend Improves Credit***

As shown in the chart below, the total number of physicians is growing and the number and percentage of physicians employed by healthcare delivery systems and by large physician groups has increased in recent years, and this increase is expected to accelerate due to, among other factors, declining physician reimbursement and the increasing costs of practice due to changes under the Affordable Care Act, other healthcare regulations, expensive information technology and malpractice insurance. We also believe the continuing trends in hospital systems consolidation will accelerate the integration of physician practice groups and other clinicians with hospitals. We believe physician employment by healthcare delivery systems and large group practices increases the demand for efficient real estate solutions and can lead to an improvement in the credit quality of our physician tenants and target physician tenants.

***Healthcare Industry Employment Growth***

According to the U.S. Department of Labor's Bureau of Labor Statistics, the healthcare industry was the largest industry in the United States in 2010 providing nearly 14 million jobs. While total U.S. employment dropped by over 2% between 2000 and 2010, health care employment grew by more than 25% during the same period. The Bureau of Labor Statistics estimates that healthcare sector employment is projected to grow from over 14 million jobs in 2010 to nearly 18.3 million jobs in 2020, an increase of 30%, compared to only 13% growth for jobs in all other employment sectors. Of the approximately 4.3 million new healthcare jobs expected between 2010 and 2020, 63% are projected to arise in ambulatory settings (offices of health practitioners, home health, and other non-institutional settings) with office employment projected to increase by nearly 1.4 million jobs and hospital employment projected to increase by over 940,000 jobs between 2010 and 2020. We believe the continued growth in employment in the healthcare industry, and in particular the ambulatory sector, will lead to growth in demand for medical office buildings and other facilities that serve the healthcare industry.

**Table of Contents**

***Monetization and Modernization***

According to Stifel Nicolaus, hospitals and health systems own and control approximately 80% of the medical office buildings and outpatient facilities in the United States. We expect the need for capital and the growth in demand for healthcare at lower cost to cause many hospitals to seek to monetize their real estate through sale/leaseback or other arrangements as they seek capital for their physician integration and growth strategies. Hospitals also are seeking to become more efficient in the face of declining reimbursement and changing patient demographics by developing new, smaller, specialty healthcare facilities, as well as modernizing existing general acute care facilities.

***Highly Fragmented Market***

According to the Journal of Real Estate Portfolios research report on Slicing, Dicing, and Scoping the Size of the U.S. Commercial Real Estate Market, there is more than \$1 trillion in U.S. healthcare real estate and less than 10% of all medical office/outpatient care facilities currently are owned by public REITs and even a smaller percentage of hospitals. While a large percentage of these assets are not desirable for institutional investment, we believe the market of desirable, institutional quality assets in our target asset classes is large and there is growing demand by healthcare providers for new, high quality specialized space. We believe the current highly fragmented ownership of these target assets by, including hospital systems, physician groups, local developers and smaller private investors, provides a significant source of investment opportunities for the foreseeable future.

Stifel Nicolaus estimates the value of the total supply of medical office buildings and out-patient facilities at approximately \$414 billion, with approximately \$262 billion available for private investment, and is expected to grow at approximately \$4.5 billion per year. In estimating facilities available for private investment, Stifel Nicolaus excludes medical office buildings and outpatient facilities located on hospital campuses or other property owned by government and buildings housing small physician practices that are likely not attractive to institutional investors. According to Healthcare Real Estate Insights, in 2012, there were sales of 455 medical office buildings (transactions in excess of \$5 million) with total dollar volume of such transactions of \$5.52 billion and total square footage of 26.5 million.

## **Table of Contents**

### ***Limited New Supply***

We believe construction of medical office buildings and other healthcare facilities has been relatively constrained by the recent recession and uncertainty in U.S. healthcare policy, while available space was absorbed and physicians, hospitals and healthcare delivery systems planned for the implementation of the Affordable Care Act. According to Marcus and Millichap's mid-year Medical Office Research report, approximately 9 million square feet of new medical office space was delivered in 2012, which is significantly lower than the square feet of medical office space delivered from 2007 to 2009, when medical office inventory grew collectively by nearly 60 million square feet. We believe the low levels of new medical office space delivered and increasing demand in recent years will create a positive environment for both occupancy and rental rates in the near term and longer term. We believe these trends will result in an increase in the number of quality properties meeting our investment criteria.

### **Competitive Strengths**

We believe our management team's extensive public REIT and healthcare experience distinguishes us from many other real estate companies, both public and private. Specifically, our company's competitive strengths include, among others:

*Strong Relationships with Physicians and Healthcare Delivery Systems.* We believe our management team has developed a reputation among physicians, hospitals and healthcare delivery system decision makers of accessibility, reliability and trustworthiness. We believe this will result in attractive investment opportunities for us and high tenant satisfaction, leading to high occupancy rates, tenant retention and increasing cash flow from our properties.

*Experienced Senior Management Team.* Our senior management team has over 50 years of healthcare delivery system executive and related experience in healthcare real estate, finance, law, policy and clinical business development. Our management team's experience providing full service real estate solutions for the healthcare industry gives us a deep understanding of the dynamics and intricacies associated with insurance reimbursement practices, government regulation, cross-referrals, clinical interdependencies and patient behaviors. These same factors drive the profitability of the healthcare delivery systems with whom we will be strategically aligned.

*Investment Focus.* We believe that healthcare-related real estate rents and valuations are less susceptible to changes in the general economy than many other types of commercial real estate due to

**Table of Contents**

demographic trends and the need-based rise in healthcare expenditures, even during economic downturns. For this reason, we believe healthcare-related real estate investments could potentially offer a more stable return to investors when compared to other types of real estate investments.

*Nimble Management Execution.* We expect to focus on individual investment opportunities of \$25 million or less in off market or lightly marketed transactions, with few transactions exceeding \$50 million. We are establishing our company to identify and execute on these types and size of transactions efficiently, which we believe provides us an advantage over other healthcare real estate investors, such as the larger health care REITs, that focus on larger properties or portfolios in more competitively marketed investment opportunities.

*Access to State and Federal Healthcare Policy Makers.* Our management team and trustees have relationships and access to state and federal policy makers to stay informed with health care policy directions that may affect the investment decisions and management of the company.

*Strong Healthcare Delivery System Affiliation and Diverse Medical Tenant Base in Initial Properties.* As of March 31, 2013, approximately 46% of the net leasable square footage of our initial properties is affiliated with a healthcare delivery system and approximately 49% of the net leasable square footage of our initial properties is located within approximately  $\frac{1}{4}$  mile of a hospital campus. We believe that a healthcare delivery system anchored property with a diversified, clinically interdependent tenant mix is essential to the success of any healthcare facility, and our management team's understanding of the dynamics associated with tenant mix and clinical interdependency will be a key to our success. At March 31, 2013, the leases for our initial properties have a weighted average remaining lease term of approximately 7 years and only 8.8% of our annualized rent expires over the following three years.

## **Table of Contents**

- (1) Calculated by multiplying (a) base rent payments for the month ended March 31, 2013, by (b) 12.
- (2) On January 22, 2013, Northside Hospital entered into a lease for 7,522 square feet at the Austell Medical Office Building that commenced on May 1, 2013 (the Northside Lease ) for a term of 10 years, 10 months and provides for initial annualized base rent of \$120,352. Upon execution of the Northside Lease, the Austell Medical Office Building was 87.0% leased.
- (3) Taking into account the lease described above that was effective subsequent to March 31, 2013, our initial portfolio is 84.5% leased with an annualized base rent of \$9,677,940.

### **Our Acquisition Targets**

We currently are in discussions regarding a number of properties that meet our investment criteria. In particular, we have recently entered into two non-binding letters of intent with respect to the properties described below. We have not completed our diligence process on these properties nor have we begun negotiation of definitive purchase and sale or lease agreements, and several other conditions must be met in order for us to complete these acquisitions. As a result, management does not deem any of these potential acquisitions to be probable at the current time.

*Surgical Hospital New Orleans, Louisiana.* This property is a 57,000 square foot, 42-bed acute care surgical hospital with six operating rooms. Constructed in 2006, this Joint Commission accredited, Medicare certified hospital was established by a group of surgeons and currently is co-owned by 30 physicians on the active medical staff of the hospital. The hospital specializes in ortho/neuro spine surgery, orthopedics, weight loss surgery and other scheduled general surgery procedures. The hospital is certified as a Medicare Center of Excellence for Weight Loss Surgery. In 2012, this hospital was rated 23rd in Becker's Hospital Review Top 50 Hospitals with the Best Patient Ratings. The report, published in February 2012, is based on the Hospital Consumer Assessment of Healthcare Providers and Systems survey (HCAPHS). The hospital does not have an emergency room. If we acquire the hospital, we intend to simultaneously enter into a new 15 year, absolute net lease. We also expect to offer to the physician group that currently owns the hospital, or to individual physicians, the opportunity to acquire up to 49% of the equity interests in our subsidiary that will own the property.

*Surgical Hospital and Medical Office Building El Paso, Texas.* This property is a 77,000 square foot, 40-bed acute care hospital with six operating rooms. The adjacent medical office building contains approximately 40,000 rentable square feet which is 100% leased by the hospital and occupied by hospital services and physicians on the medical staff of the hospital, who currently sub-lease space from the hospital. Constructed in 2007, this Joint Commission accredited, Medicare certified hospital currently is jointly owned by a national operator of surgical hospitals and surgical centers and over 60 physicians on the medical staff of the hospital. The hospital has a small emergency room as required by State of Texas regulations. If we acquire the hospital and the medical office building, we intend to simultaneously enter into a new 15 year, absolute net lease with respect to the hospital and a new five year triple-net lease for 100% of the rentable space in the medical office building.

As of the date of this prospectus, we are reviewing a number of potential acquisition and investment opportunities and we are in active discussions with the owners of seven medical office buildings located in six states containing more than 250,000 rentable square feet in the aggregate. All of these medical office buildings currently are 100% occupied by the owners of the buildings, which include primary care and specialist physician practice groups (e.g., general surgeons, orthopedic surgeons, cardiologists, gastroenterologists and neurosurgeons). Three of these buildings contain licensed treatment facilities, including two ambulatory surgery centers and one cardiac cath lab. We are also in discussions with the owners of two freestanding surgical centers containing an aggregate of approximately 120,000 square feet of space. Both of these surgical center properties are owned and occupied by physicians who have clinical practice space or otherwise practice in the facilities. In connection with any acquisition of these properties, we will seek to enter into new long term leases in sale-leaseback transactions with the physician groups that occupy and use the facilities in their medical practices. We have not entered into a letter of intent or any other documentation with respect to any of these properties and there can be no assurance we will enter into any such agreements or acquire any of these properties.

---

## **Table of Contents**

### **Credit Facility**

We have negotiated the principal terms of a proposed senior secured revolving credit facility with a maximum borrowing capacity of \$75 million that we expect to have in place following completion of this offering. This facility will be syndicated on a best efforts basis by Regions Capital Markets as the lead arranger. This facility is expected to have a three year term with an extension option for an additional twelve months subject to our meeting certain typical conditions, the reappraisal of the pledged properties and the payment of a fee. We expect the facility to have an accordion feature that may, upon a commitment of the existing or new lenders to increase funding, provide for up to an additional \$75 million of borrowing capacity. We expect the interest rate on the facility will be a LIBOR based rate ranging from LIBOR plus 265 basis points to LIBOR plus 340 basis points with certain tranches at Regions Bank prime rate plus 165 basis points to prime plus 240 basis points. We expect to use this facility primarily to finance future acquisitions and developments, fund tenant improvements and capital expenditures, repay other indebtedness and provide for working capital and other general corporate purposes. See Management's Discussion & Analysis of Financial Condition and Results of Operation Credit Facility.

### **Implications of Being an Emerging Growth Company**

We qualify as an emerging growth company, as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act. An emerging growth company may take advantage of specified reduced reporting requirements and are relieved of certain other significant requirements that are otherwise generally applicable to public companies. As an emerging growth company, among other things:

we are exempt from the requirement to obtain an attestation and report from our auditors on the assessment of our internal control over financial reporting pursuant to the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act;

we are permitted to provide less extensive disclosure about our executive compensation arrangements;

we are not required to give our shareholders non-binding advisory votes on executive compensation or golden parachute arrangements; and

we have elected not to use an extended transition period for complying with new or revised accounting standards and such election is irrevocable.

We may take advantage of these provisions for up to five years or such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company if we have more than \$1 billion in annual revenues, have more than \$700 million in market value of our common shares held by non-affiliates, or issue more than \$1 billion of non-convertible debt securities over a three-year period.

### **Summary Risk Factors**

*An investment in our common shares involves a high degree of risk. You should carefully read and consider the risks discussed below and under the caption Risk Factors beginning on page 21 of this prospectus before investing in our common shares.*

We are newly formed and have no operating history, and there is no assurance that we will be able to achieve our investment objectives.

Our initial portfolio is concentrated in medical office buildings leased to healthcare providers, making us more vulnerable economically than if our investments were diversified across different industries.

## Edgar Filing: Physicians Realty Trust - Form 424B4

We may not be successful in identifying and consummating suitable investment opportunities which may impede our growth and negatively affect our cash available for distribution to shareholders.

The healthcare industry is heavily regulated, and new laws or regulations, changes to existing laws or regulations, loss of licensure or failure to obtain licensure could adversely impact our company and the ability of our tenants to make rent payments to us.

## **Table of Contents**

Required payments of principal and interest on borrowings may leave us with insufficient cash to operate our properties or to pay the distributions currently contemplated or necessary to qualify as a REIT and may expose us to the risk of default under our debt obligations.

Our failure to qualify and maintain our qualification as a REIT would result in higher taxes and reduced cash available for distribution to our shareholders.

The share ownership restrictions of the Internal Revenue Code of 1986, as amended, or the Code, applicable to REITs and the 9.8% share ownership limit in our declaration of trust may inhibit market activity in our shares and restrict our business combination opportunities.

There is currently no public market for our common shares, an active trading market for our common shares may never develop following this offering and the trading volume and price of our common shares may be volatile which could result in a substantial or complete loss of your investment.

The historical performance of our Predecessor will not, and the pro forma financial statements included in this prospectus may not, be indicative of our future results.

### **Our Formation Transactions**

Prior to or substantially simultaneous with the completion of this offering, we will undertake the transactions described below, which we refer to as the formation transactions. The formation transactions are subject to customary closing conditions, including the closing of this offering. These transactions are described in more detail under the captions Structure and Formation of Our Company and Certain Relationships and Related Transactions in this prospectus.

We will sell 10,434,782 common shares in this offering and an additional 1,565,216 shares if the underwriters exercise their additional allotment option in full. We will contribute the net proceeds of this offering to our operating partnership in exchange for partnership interests in our operating partnership.

Our operating partnership will acquire from the Ziegler Funds equity interests in the entities that directly or indirectly own interests in 19 properties, as well as certain operating assets and liabilities in exchange for an aggregate of 2,744,000 OP units, valued at approximately \$31.6 million.

We will acquire a 50% joint venture equity interest in the Arrowhead Commons property not owned by the Ziegler Funds for approximately \$850,000, resulting in our 100.0% ownership of this property.

Our operating partnership intends to use approximately \$36.9 million of the net proceeds of this offering to repay approximately \$36.9 million of outstanding indebtedness secured by certain of the initial properties. We will also assume approximately \$47.1 million of existing mortgage debt related to the properties that we acquire. As a result, we expect to have approximately \$47.1 million of total debt outstanding upon completion of our formation transactions and this offering and approximately \$70.9 million of cash.

Messrs. Sweet and Theine, currently the principal managers of the Ziegler Funds and our initial properties, will become our Executive Vice President and Chief Investment Officer and Senior Vice President of Asset and Investment Management, respectively.

## Edgar Filing: Physicians Realty Trust - Form 424B4

We will enter into employment agreements with our executive officers and issue an aggregate of 250,000 restricted common shares to our officers and trustees pursuant to our Physicians Realty Trust 2013 Equity Incentive Plan ( 2013 Equity Incentive Plan ). See Executive Compensation.

In accordance with the terms of our operating partnership s partnership agreement, holders of OP units issued in the formation transactions will have certain registration rights covering the resale of our common shares issued or issuable, at our option, in exchange for their OP units.

**Table of Contents**

**Our Structure**

Upon completion of this offering and the formation transactions, we will be a holding company, and our primary assets will be our ownership interest in our operating partnership. The following diagram depicts our ownership structure immediately following completion of this offering and the formation transactions:

**Our Tax Status**

We intend to elect and qualify to be taxed as a REIT for U.S. federal income tax purposes commencing with our taxable year ending December 31, 2013. Our qualification as a REIT will depend upon our ability to meet, on a continuing basis, through actual investment and operating results, various complex requirements. Under the Code, REITs are subject to numerous organizational and operational requirements, including a requirement that they distribute each year at least 90% of their REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gains. We believe that we will be organized in conformity with the requirements for qualification as a REIT under the Code and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT for federal income tax purposes commencing with our taxable year ending December 31, 2013. See Material U.S. Federal Income Tax Considerations.

**Restrictions on Ownership of Our Shares**

In order to help us qualify as a REIT, among other purposes, our declaration of trust, subject to certain exceptions, restricts the number of our shares of beneficial interest that a person may beneficially or constructively own. Our declaration of trust provides that, subject to certain exceptions, no person may

## **Table of Contents**

beneficially or constructively own more than 9.8%, in value or in number of shares, whichever is more restrictive, of the outstanding shares of any class or series of our shares of beneficial interest. A more complete description of our shares of beneficial interest, including restrictions upon the ownership and transfer thereof, is presented under the caption "Description of Shares of Beneficial Interest" in this prospectus.

### **Conflicts of Interest**

Mr. Sweet, our Executive Vice President and Chief Investment Officer, Mr. Theine, our Senior Vice President of Asset and Investment Management and Mark Baumgartner, who will become a trustee upon completion of this offering, are currently employees of Ziegler and Messrs. Sweet and Baumgartner have direct or indirect interests in one or more of the Ziegler Funds from which we will acquire interests in the entities that own our initial properties. Messrs. Sweet and Theine will become employees of our company upon completion of this offering. We did not conduct arm's-length negotiations with respect to all of the terms of the formation transactions. In the course of structuring the formation transactions, Messrs. Thomas, Sweet, Theine and Baumgartner had the ability to influence the type and level of benefits that they and certain other trustees and officers will receive from us. In addition, subject to very limited exceptions, we did not use any recent third-party appraisals of the properties to be acquired by us in the formation transactions in determining the number of OP units to be exchanged for those properties. As a result, the price to be paid by us for these properties in the formation transactions may exceed the fair market value of those properties.

### **Distribution Policy**

We intend to pay regular quarterly distributions to holders of our common shares and make regular quarterly distributions to holders of OP units in our operating partnership. Generally, we expect to distribute 100% of our REIT taxable income so as to avoid the tax imposed upon undistributed REIT taxable income. Distributions made by us will be authorized by our board of trustees in its sole discretion out of funds legally available therefor and will be dependent upon a number of factors, including restrictions under applicable law and our capital requirements. Our initial quarterly distributions will be based on the operations of the properties in our initial portfolio and we expect to distribute substantially all of our cash available for distribution from these properties to the holders of our common shares.

### **Corporate Information**

We were formed as a Maryland real estate investment trust on April 9, 2013. Our corporate offices are located at 250 East Wisconsin Avenue, Suite 1900, Milwaukee, WI 53202. Our telephone number is 414-978-6494. Our internet website is [www.docreit.com](http://www.docreit.com). The information contained on, or accessible through, this website, or any other website, is not incorporated by reference into this prospectus and should not be considered a part of this prospectus.

**Table of Contents**

**The Offering**

Common shares offered by us	10,434,782 shares <sup>(1)</sup>
Common shares to be outstanding after this offering	10,684,782 shares <sup>(2)</sup>
Common shares and OP units to be outstanding after completion of this offering and the formation transactions	13,428,782 shares and OP units <sup>(2)</sup>
Use of proceeds	<p>We estimate that we will receive net proceeds from this offering of approximately \$109.8 million, or approximately \$128.3 million if the underwriters' over-allotment option is exercised in full, after deducting the underwriting discount and estimated offering expenses payable by us. We intend to use the net proceeds of this offering as follows:</p> <p style="padding-left: 40px;">approximately \$36.9 million to repay existing mortgage indebtedness secured by certain of our initial properties, including accrued interest;</p> <p style="padding-left: 40px;">approximately \$900,000 to pay certain debt transfer fees and fees relating to our anticipated credit facility;</p> <p style="padding-left: 40px;">approximately \$850,000 to purchase the 50.0% joint venture equity interest in the Arrowhead Commons property not owned by the Ziegler Funds, resulting in our 100.0% ownership of this property; and</p> <p style="padding-left: 40px;">the balance for general corporate and working capital purposes, including payment of expenses associated with our formation transactions and possible future acquisitions and development activities. Pending application of net proceeds of this offering, we intend to invest the net proceeds in interest-bearing accounts, money market accounts and interest-bearing securities in a manner that is consistent with our intention to qualify for taxation as a REIT.</p>
Risk Factors	<p>An investment in our common shares involves a high degree of risk. You should carefully read and consider the risks discussed under the caption "Risk Factors" beginning on page 21 and all other information in this prospectus before investing in our common shares.</p>
NYSE symbol	DOC

(1) Excludes up to 1,565,216 common shares that may be issued by us upon exercise of the underwriters' over-allotment option and 2,744,000 common shares that may be issued by us upon redemption of 2,744,000 OP units expected to be outstanding upon completion of the formation transactions.

## Edgar Filing: Physicians Realty Trust - Form 424B4

- (2) Includes 250,000 restricted common shares that will be granted to our officers and trustees under our 2013 Equity Incentive Plan upon completion of this offering that are subject to vesting over a three year period and 2,744,000 OP units expected to be outstanding upon completion of the formation transactions. Excludes up to 1,565,216 common shares that may be issued by us upon exercise of the underwriters over-allotment option and 350,000 common shares available for future issuance under our 2013 Equity Incentive Plan.

**Table of Contents**

**SUMMARY FINANCIAL DATA**

The following table shows summary consolidated pro forma financial data for our company and combined historical financial data for our Predecessor for the periods indicated. Our Predecessor, which is not a legal entity, is comprised of the four Ziegler Funds that own directly or indirectly interests in entities that own 19 medical office properties. Upon completion of this offering and the formation transactions, we will acquire these interests in the entities from the Ziegler Funds. In addition, we will acquire the remaining 50% equity interest in the Arrowhead Commons property using proceeds from this offering as part of the formation transactions. We have not presented historical information for our company because we have not had any corporate activity since our formation other than the issuance of 1,000 common shares in connection with the initial capitalization of our company.

You should read the following selected consolidated pro forma and combined historical financial data together with the discussion under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations, and the consolidated pro forma financial data and combined historical financial statements and related notes thereto included elsewhere in this prospectus.

The following summary combined historical balance sheet data as of December 31, 2012 and 2011 and the combined historical statements of operations data and cash flows data for the two-year period ended December 31, 2012 have been derived from the audited combined historical financial statements of our Predecessor. These financial statements have been audited by Plante & Moran, PLLC, an independent registered public accounting firm whose report with respect thereto is included elsewhere in this prospectus with the combined balance sheets as of December 31, 2012 and 2011 and the related combined statements of operations and cash flows for the two-year period ended December 31, 2012, and the related notes thereto.

Our Predecessor's combined historical balance sheet data as of March 31, 2013 and our Predecessor's combined historical statements of operations data and cash flow for the three months ended March 31, 2013 and March 31, 2012 have been derived from the unaudited combined historical financial statements of our Predecessor.

The pro forma financial data for our company for the year ended December 31, 2012 and March 31, 2013 give effect to this offering, the formation transactions (including acquisition of our initial properties from the Ziegler Funds) and the use of proceeds from this offering as of the beginning of the periods presented for the statement of operations data and as of December 31, 2012 and March 31, 2013 for the balance sheet data.

The combined historical financial data for our Predecessor is not indicative of our future financial position or results of operations. Furthermore, our pro forma financial information is not necessarily indicative of what our actual financial position and results of operations would have been as of the dates and for the periods indicated, nor do our interim results and pro forma financial information purport to represent our future financial position or results of operations.

(1) Funds from operations, or FFO, is a widely recognized measure of REIT performance. Although FFO is not computed in accordance with generally accepted accounting principles, or GAAP, we believe that information regarding FFO is helpful to shareholders and potential investors because it facilitates an understanding of the operating performance of our initial properties without giving effect to real estate depreciation and amortization, which assumes that the value of real estate assets diminishes ratably over time. Because real estate values have historically increased or decreased with market conditions, we believe that FFO provides a more meaningful and accurate indication of our performance. We calculate FFO in accordance with the April 2002 National Policy Bulletin of the National Association of Real Estate Investment Trusts, or NAREIT, which we refer to as the White Paper. The White Paper defines FFO as net income (computed in accordance with GAAP) before noncontrolling interests of holders of OP units, excluding gains (or losses) on sales of depreciable operating property and extraordinary items (computed in accordance with GAAP), plus real estate related depreciation and amortization (excluding amortization of deferred financing costs), and after adjustments for unconsolidated partnerships and joint ventures. Our FFO computation may not be comparable to FFO reported by other REITs that do not compute FFO in accordance with the White Paper definition or that interpret the White Paper definition differently than we do. The GAAP measure that we believe to be most directly comparable to FFO, net income (loss), includes depreciation and amortization expenses, gains or losses on property sales and noncontrolling interests. In computing FFO, we eliminate these items because, in our view, they are not indicative of the results from the operations of our properties. To facilitate a clear understanding of our historical operating result, FFO should be examined in conjunction with net income (determined in accordance with GAAP) as presented in the financial statements included elsewhere in this prospectus. FFO does not represent cash generated from operating activities in accordance with GAAP, should not be considered to be an alternative to net income (loss) (determined in accordance with GAAP) as a measure of our liquidity and is not indicative of funds available for our cash needs, including our ability to make cash distributions to shareholders.

**Table of Contents**

**RISK FACTORS**

*An investment in our common shares involves a high degree of risk. In addition to all other information contained in this prospectus, you should carefully consider the following risk factors before purchasing our common shares. The occurrence of any of the following risks might cause you to lose all or part of your investment. The risks set forth below represent those risks and uncertainties that we believe are material to our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares. Some statements in this prospectus, including statements in the following risk factors, constitute forward-looking statements. Please refer to the section captioned *Cautionary Note Regarding Forward-Looking Statements*.*

*We have grouped these risk factors into the following general categories:*

*Risks related to our business;*

*Risks related to the healthcare industry;*

*Risks related to the real estate industry;*

*Risks related to financings;*

*Risks related to our formation and structure;*

*Risks related to our qualification and operation as a REIT, and*

*Risks related to this offering.*

**Risks Related to Our Business**

***We are newly formed and have no operating history; therefore there is no assurance that we will be able to achieve our investment objectives.***

We are newly formed and have no operating history. We are subject to all of the business risks and uncertainties associated with any new business, including the risk that we will not achieve our investment objectives as described in this prospectus and that the value of your investment could decline substantially. Our financial condition and results of operations will depend on many factors, including the availability of investment opportunities, readily accessible short and long-term financing, conditions in the financial markets and economic conditions generally. There can be no assurance that we will be able to generate sufficient cash flow over time to pay our operating expenses and make distributions to shareholders.

***Our real estate investments are concentrated in healthcare properties, making us more vulnerable economically than if our investments were diversified in other segments of the economy.***

We will acquire, own, manage, operate and selectively develop properties for lease to physicians, hospitals and healthcare delivery systems. We are subject to risks inherent in concentrating investments in real estate, and the risks resulting from a lack of diversification become even greater as a result of our business strategy to concentrate our investments in the healthcare sector. Any adverse effects that result from these risks could be more pronounced than if we diversified our investments outside of healthcare properties. Given our concentration in this sector, our tenant base is especially concentrated and dependent upon the healthcare industry generally, and any industry downturn could adversely affect the ability of our tenants to make lease payments and our ability to maintain current rental and occupancy rates. Our tenant mix could become even more concentrated if a significant portion of our tenants practice in a particular medical field or are reliant upon a particular healthcare delivery

## Edgar Filing: Physicians Realty Trust - Form 424B4

system. Accordingly, a downturn in the healthcare industry generally, or in the healthcare related facility specifically, could adversely affect our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

---

**Table of Contents**

*Some of our initial properties are located in Georgia, with a further concentration in and around Atlanta, and changes in this market may materially adversely affect us.*

Of our 19 initial properties, the five properties located in Georgia provided approximately \$3.2 million, or approximately 34% of our total annualized rent as of March 31, 2013. These properties are concentrated in and around Atlanta. As a result of this geographic concentration, we are particularly exposed to downturns in this local economy or other changes in local real estate market conditions. Any material change in the current payment programs or regulatory, economic, environmental or competitive conditions in this area could have a disproportionate effect on our overall business results. In the event of negative economic or other changes in this market, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares may be adversely affected.

*We may not realize the benefits that we anticipate from focusing on healthcare properties that are strategically aligned with a healthcare delivery system and from the relationships established through such strategic alignments.*

As part of our business strategy, we focus on healthcare properties that are strategically aligned with a healthcare delivery system by (i) seeking to acquire, own, manage, and develop healthcare properties that are located on medical campuses where the underlying land is owned by a healthcare delivery system or by us, or (ii) seeking to acquire, own, manage, and develop healthcare properties located in close proximity to a healthcare delivery system or strategically aligned with a healthcare delivery system through leasing or other arrangements. We may not realize the benefits that we anticipate as a result of these strategic relationships. In particular, we may not obtain or realize increased rents, long-term tenants, or reduced tenant turnover rates as compared to healthcare properties that are not strategically aligned. Moreover, building a portfolio of healthcare properties that are strategically aligned does not assure the success of any given property. The associated healthcare delivery system may not be successful and the strategic alignment that we seek for our healthcare properties could dissolve, and we may not succeed in replacing them. If we do not realize the benefits that we anticipate from this focus and those strategic alignments dissolve and we are not successful in replacing them, our reputation, business, financial results and prospects may be adversely affected.

*The bankruptcy, insolvency or weakened financial position of our tenants could seriously harm our operating results and financial condition.*

We will receive substantially all of our revenue as rent payments from tenants under leases of space in our healthcare properties, with our five largest tenants based upon rental revenue representing approximately \$3.6 million, or 37.4%, of the annualized rent from our initial properties as of March 31, 2013. We have no control over the success or failure of our tenants' businesses and, at any time, any of our tenants may experience a downturn in its business that may weaken its financial condition. Additionally, private or governmental payors may lower the reimbursement rates paid to our tenants for their healthcare services. For example, the Affordable Care Act provides for significant reductions to Medicare and Medicaid payments. As a result, our tenants may delay lease commencement or renewal, fail to make rent payments when due or declare bankruptcy. Any leasing delays, lessee failures to make rent payments when due or tenant bankruptcies could result in the termination of the tenant's lease and, particularly in the case of a large tenant, or a significant number of tenants, may have a material adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares. In addition, to the extent a tenant vacates specialized space in one of our properties (such as imaging space, ambulatory surgical space, or inpatient hospital space), re-leasing the vacated space could be more difficult than re-leasing more generic office space, as there are fewer users for such specialized healthcare space in a typical market than for more traditional office space.

Any bankruptcy filings by or relating to one of our tenants could bar all efforts by us to collect pre-bankruptcy debts from that tenant or seize its property, unless we receive an order permitting us to do so from a

---

**Table of Contents**

bankruptcy court, which we may be unable to obtain. A tenant bankruptcy could also delay our efforts to collect past due balances under the relevant leases and could ultimately preclude full collection of these sums. If a tenant assumes the lease while in bankruptcy, all pre-bankruptcy balances due under the lease must be paid to us in full. However, if a tenant rejects the lease while in bankruptcy, we would have only a general unsecured claim for pre-petition damages. Any unsecured claim that we hold may be paid only to the extent that funds are available and only in the same percentage as is paid to all other holders of unsecured claims. It is possible that we may recover substantially less than the full value of any unsecured claims that we hold, if any, which may have an adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares. Furthermore, dealing with a tenant bankruptcy or other default may divert management's attention and cause us to incur substantial legal and other costs.

***Adverse economic or other conditions in the geographic markets in which we conduct business could negatively affect our occupancy levels and rental rates and therefore our operating results.***

Our operating results depend upon our ability to maintain and increase occupancy levels and rental rates at our properties. Adverse economic or other conditions in the geographic markets in which we operate, including periods of economic slowdown or recession, industry slowdowns, periods of deflation, relocation of businesses, changing demographics, earthquakes and other natural disasters, fires, terrorist acts, civil disturbances or acts of war and other man-made disasters which may result in uninsured or underinsured losses, and changes in tax, real estate, zoning and other laws and regulations, may lower our occupancy levels and limit our ability to increase rents or require us to offer rental concessions. The failure of our properties to generate revenues sufficient to meet our cash requirements, including operating and other expenses, debt service and capital expenditures, may have an adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

***We may have difficulty finding suitable replacement tenants in the event of a tenant default or non-renewal of our leases, especially for our properties located in smaller markets.***

We cannot predict whether our tenants will renew existing leases beyond their current terms. Nearly all of our initial properties are subject to leases which have multi-year terms. As of March 31, 2013, leases representing 2.4%, 4.2% and 2.1% of leasable square feet at our initial properties will expire in 2013, 2014 and 2015, respectively. If any of our leases are not renewed, we would attempt to lease those properties to another tenant. In case of non-renewal, we generally have advance notice before expiration of the lease term to arrange for repositioning of the properties and our tenants are required to continue to perform all of their obligations (including the payment of all rental amounts) for the non-renewed assets until such expiration. However, following expiration of a lease term or if we exercise our right to replace a tenant in default, rental payments on the related properties could decline or cease altogether while we reposition the properties with a suitable replacement tenant. We also might not be successful in identifying suitable replacement tenants or entering into leases with new tenants on a timely basis or on terms as favorable to us as our current leases, or at all, and we may be required to fund certain expenses and obligations (e.g., real estate taxes, debt costs and maintenance expenses) to preserve the value of, and avoid the imposition of liens on, our properties while they are being repositioned. Our ability to reposition our properties with a suitable tenant could be significantly delayed or limited by state licensing, receivership, certificate of need or other laws, as well as by the Medicare and Medicaid change-of-ownership rules. We could also incur substantial additional expenses in connection with any licensing, receivership or change-of-ownership proceedings. In addition, our ability to locate suitable replacement tenants could be impaired by the specialized healthcare uses or contractual restrictions on use of the properties, and we may be required to spend substantial amounts to adapt the properties to other uses. Any such delays, limitations and expenses could adversely impact our ability to collect rent, obtain possession of leased properties or otherwise exercise remedies for tenant default and could have a material adverse effect on us.

All of these risks may be greater in the smaller markets, where there may be fewer potential replacement tenants, making it more difficult to replace tenants, especially for specialized space, like hospital or outpatient treatment facilities located in our properties, and could have a material adverse effect on us.

## **Table of Contents**

***We may be unable to successfully acquire or develop properties and expand our operations into new or existing markets.***

We intend to explore acquisitions or developments of properties in new and existing geographic markets. These acquisitions and developments could divert management's attention from our existing properties, and we may be unable to retain key employees or attract highly qualified new employees. In addition, we may not possess familiarity with the dynamics and prevailing conditions of any new geographic markets which could adversely affect our ability to successfully expand into or operate within those markets. For example, new markets may have different insurance practices, reimbursement rates and local real estate, zoning and development regulations than those with which we are familiar. We may find ourselves more dependent on third parties in new markets because our distance could hinder our ability to directly and efficiently manage and otherwise monitor new properties in new markets. Our expansion into new markets could result in unexpected costs or delays as well as lower occupancy rates and other adverse consequences. We may not be successful in identifying suitable properties or other assets which meet our acquisition or development criteria or in consummating acquisitions or developments on satisfactory terms or at all for a number of reasons, including, among other things, unsatisfactory results of our due diligence investigations, failure to obtain financing for the acquisition or development on favorable terms or at all, and our misjudgment of the value of the opportunities. We may also be unable to successfully integrate the operations of acquired properties, maintain consistent standards, controls, policies and procedures, or realize the anticipated benefits of the acquisitions within the anticipated timeframe or at all. If we are unsuccessful in expanding into new or our existing markets, it could adversely affect our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

***We may not be successful in identifying and completing off-market acquisitions and other suitable acquisitions or investment opportunities, which may impede our growth and adversely affect our business, financial condition and results of operations and our ability to make distributions to our shareholders.***

An important component of our growth strategy is to acquire properties before they are widely marketed by the owners, or off-market. Facilities that are acquired off-market are typically more attractive to us as a purchaser because of the absence of a formal marketing process, which could lead to higher prices or other unattractive terms. If we cannot obtain off-market deal flow in the future, our ability to locate and acquire facilities at attractive prices could be adversely affected. We expect to compete with many other entities engaged in real estate investment activities for acquisitions of healthcare properties, including national, regional and local operators, acquirers and developers of healthcare-related real estate properties. The competition for healthcare-related real estate properties may significantly increase the price that we must pay for healthcare properties or other assets that we seek to acquire, and our competitors may succeed in acquiring those properties or assets themselves. In addition, our potential acquisition targets may find our competitors to be more attractive because they may have greater resources, may be willing to pay more for the properties or may have a more compatible operating philosophy. In particular, larger REITs targeting healthcare properties may enjoy significant competitive advantages that result from, among other things, a lower cost of capital, enhanced operating efficiencies more personnel and market penetration and familiarity with markets. In addition, the number of entities and the amount of funds competing for suitable investment properties may increase. This competition will result in increased demand for these assets and therefore increased prices paid for them. Those higher prices for healthcare properties or other assets may adversely affect our returns from our investments.

***Some of our initial properties and properties we acquire in the future are and may be subject to ground lease or other restrictions on the use of the space. If we are required to undertake significant capital expenditures to procure new tenants, then our business and results of operations may suffer.***

Two of our initial properties, representing approximately 15.6% of our total leasable square feet and 20.2% of our annualized revenue for the period ended March 31, 2013, are subject to ground leases that contain certain restrictions. These restrictions include limits on our ability to re-let our initial properties to tenants not affiliated

---

**Table of Contents**

with the healthcare delivery system that owns the underlying property, rights of purchase and rights of first offer and refusal with respect to sales of the property and limits on the types of medical procedures that may be performed. In addition, lower than expected rental rates upon re-letting could impede our growth. We may not be able to re-let space on terms that are favorable to us or at all. Further, we may be required to undertake significant capital expenditures to renovate or reconfigure space to attract new tenants. If we are unable to promptly re-let our initial properties, if the rates upon such re-letting are significantly lower than expected or if we are required to undertake significant capital expenditures in connection with re-letting, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares may be adversely affected.

***Our healthcare properties, the associated healthcare delivery systems with which our healthcare properties are strategically aligned and our tenants may be unable to compete successfully.***

Our healthcare properties and the associated healthcare delivery systems with which our healthcare properties are strategically aligned often face competition from nearby hospitals and other healthcare properties that provide comparable services. Any of our properties may be materially and adversely affected if the healthcare delivery system with which it is strategically aligned is unable to compete successfully. There are numerous factors that determine the ability of a healthcare delivery system to compete successfully, most of which are outside of our control.

Similarly, our tenants face competition from other medical practices and service providers at nearby hospitals and other healthcare properties. From time to time and for reasons beyond our control, managed care organizations may change their lists of preferred hospitals or in-network physicians. Physicians also may change hospital affiliations. If competitors of our tenants or competitors of the associated healthcare delivery systems with which our healthcare properties are strategically aligned have greater geographic coverage, improve access and convenience to physicians and patients, provide or are perceived to provide higher quality services, recruit physicians to provide competing services at their facilities, expand or improve their services or obtain more favorable managed care contracts, our tenants may not be able to successfully compete. Any reduction in rental revenues resulting from the inability of our tenants or the associated healthcare delivery systems with which our healthcare properties are strategically aligned to compete in providing medical services and/or receiving sufficient rates of reimbursement for healthcare services rendered could have an adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

***Our investments in development projects may not yield anticipated returns which could directly affect our operating results and reduce the amount of funds available for distributions.***

A component of our growth strategy is exploring development opportunities, some of which may arise through strategic joint ventures. In deciding whether to make an investment in a particular development, we make certain assumptions regarding the expected future performance of that property. To the extent that we consummate development opportunities, our investment in these projects will be subject to the following risks:

We may be unable to obtain financing for development projects on favorable terms or at all;

We may not complete development projects on schedule or within budgeted amounts;

We may encounter delays in obtaining or fail to obtain all necessary zoning, land use, building, occupancy, environmental and other governmental permits and authorizations, or underestimate the costs necessary to develop the property to market standards;

Development or construction delays may provide tenants the right to terminate preconstruction leases or cause us to incur additional costs;

Volatility in the price of construction materials or labor may increase our development costs;

**Table of Contents**

Hospitals or health systems may maintain significant decision-making authority with respect to the development schedule;

We may incorrectly forecast risks associated with development in new geographic regions;

Tenants may not lease space at the quantity or rental rate levels projected;

Demand for our development project may decrease prior to completion, including due to competition from other developments; and

Lease rates and rents at newly developed properties may fluctuate based on factors beyond our control, including market and economic conditions.

If our investments in development projects do not yield anticipated returns for any reason, including those set forth above, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares may be adversely affected.

***We currently have, and may in the future make, investments in joint ventures, which could be adversely affected by our lack of decision-making authority, our reliance upon our joint venture partners' financial condition, any disputes that may arise between us and our joint venture partners and our exposure to potential losses from the actions of our joint venture partners.***

We currently have, and may in the future make, co-investments with third parties through partnerships, joint ventures or other entities, acquiring noncontrolling interests in or sharing responsibility for the management of the affairs of a property, partnership, joint venture or other entity. Joint ventures generally involve risks not present with respect to our wholly-owned properties, including the following:

Our joint venture partners may make management, financial and operating decisions with which we disagree or that are not in our best interest;

We may be prevented from taking actions that are opposed by our joint venture partners;

Our ability to transfer our interest in a joint venture to a third party may be restricted;

Our joint venture partners might become bankrupt or fail to fund their share of required capital contributions which may delay construction or development of a healthcare related facility or increase our financial commitment to the joint venture;

Our joint venture partners may have business interests or goals with respect to the healthcare related facility that conflict with our business interests and goals which could increase the likelihood of disputes regarding the ownership, management or disposition of the healthcare related facility;

Disputes may develop with our joint venture partners over decisions affecting the healthcare related facility or the joint venture which may result in litigation or arbitration that would increase our expenses and distract our officers and/or trustees from focusing their time and effort on our business and possibly disrupt the daily operations of the healthcare related facility; and

We may suffer losses as a result of the actions of our joint venture partners with respect to our joint venture investments.

## Edgar Filing: Physicians Realty Trust - Form 424B4

Joint venture investments involve risks that may not be present with other methods of ownership. In addition to those risks identified above, our partner might at any time have economic or other business interests or goals that are or become inconsistent with our interests or goals; that we could become engaged in a dispute with our partner, which could require us to expend additional resources to resolve such disputes and could have an adverse impact on the operations and profitability of the joint venture; and that our partner may be in a position to take action or withhold consent contrary to our instructions or requests. In addition, our ability to transfer our interest in a joint venture to a third party may be restricted. Although currently not applicable to our

---

**Table of Contents**

existing joint venture arrangements, in the future, in certain instances, we or our partner may have the right to trigger a buy-sell arrangement, which could cause us to sell our interest, or acquire our partner's interest, at a time when we otherwise would not have initiated such a transaction. Our ability to acquire our partner's interest may be limited if we do not have sufficient cash, available borrowing capacity or other capital resources. In such event, we may be forced to sell our interest in the joint venture when we would otherwise prefer to retain it. Joint ventures may require us to share decision-making authority with our partners, which could limit our ability to control the properties in the joint ventures. Even when we have a controlling interest, certain major decisions may require partner approval, such as the sale, acquisition or financing of a property.

***RIDEA and operating properties.***

We may invest in hospitals or other providers that are tenants of our properties, structured, where applicable, in compliance with RIDEA or other applicable REIT laws or regulations. If so, we will be exposed to various operational risks with respect to those operating properties that may increase our costs or adversely affect our ability to generate revenues. These risks include fluctuations in patient volume and occupancy, Medicare and Medicaid reimbursement, if applicable, and private pay rates; economic conditions; competition; federal, state, local, and industry-regulated licensure, certification and inspection laws, regulations, and standards; the availability and increases in cost of general and professional liability insurance coverage; state regulation; the availability and increases in cost of labor (as a result of unionization or otherwise) and other risks applicable to operating businesses. Any one or a combination of these factors may adversely affect our revenue and operations.

***We may not be able to control our operating costs or our expenses may remain constant or increase, even if our revenue does not increase, which could cause our results of operations to be adversely affected.***

Factors that may adversely affect our ability to control operating costs include the need to pay for insurance and other operating costs, including real estate taxes, which could increase over time, the need periodically to repair, renovate and re-let space, the cost of compliance with governmental regulation, including zoning and tax laws, the potential for liability under applicable laws, interest rate levels and the availability of financing. Certain costs associated with real estate investments may not be reduced even if a healthcare related facility is not fully occupied or other circumstances cause our revenues to decrease. If our operating costs increase as a result of any of the foregoing factors, our results of operations may be adversely affected.

***Uninsured losses or losses in excess of our insurance coverage could adversely affect our financial condition and our cash flows.***

We maintain comprehensive liability, fire, flood, earthquake, wind (as deemed necessary or as required by our lenders), extended coverage and rental loss insurance with respect to our initial properties. Certain types of losses, however, may be either uninsurable or not economically insurable, such as losses due to earthquakes, riots, acts of war or terrorism. Should an uninsured loss occur, we could lose both our investment in and anticipated profits and cash flows from a healthcare related facility. If any such loss is insured, we may be required to pay a significant deductible on any claim for recovery of such a loss prior to our insurer being obligated to reimburse us for the loss, or the amount of the loss may exceed our coverage for the loss. In addition, future lenders may require such insurance, and our failure to obtain such insurance could constitute a default under loan agreements. We may determine not to insure some or all of our properties at levels considered customary in our industry and which would expose us to an increased risk of loss. As a result, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares may be adversely affected.

***Environmental compliance costs and liabilities associated with owning, leasing, developing and operating our properties may affect our results of operations.***

Under various U.S. federal, state and local laws, ordinances and regulations, current and prior owners and tenants of real estate may be jointly and severally liable for the costs of investigating, remediating and

---

**Table of Contents**

monitoring certain hazardous substances or other regulated materials on or in such property. In addition to these costs, the past or present owner or tenant of a property from which a release emanates could be liable for any personal injury or property damage that results from such releases, including for the unauthorized release of asbestos-containing materials and other hazardous substances into the air, as well as any damages to natural resources or the environment that arise from such releases. These environmental laws often impose such liability without regard to whether the current or prior owner or tenant knew of, or was responsible for, the presence or release of such substances or materials. Moreover, the release of hazardous substances or materials, or the failure to properly remediate such substances or materials, may adversely affect the owner's or tenant's ability to lease, sell, develop or rent such property or to borrow by using such property as collateral. Persons who transport or arrange for the disposal or treatment of hazardous substances or other regulated materials may be liable for the costs of removal or remediation of such substances at a disposal or treatment facility, regardless of whether or not such facility is owned or operated by such person.

Certain environmental laws impose compliance obligations on owners and tenants of real property with respect to the management of hazardous substances and other regulated materials. For example, environmental laws govern the management and removal of asbestos-containing materials and lead-based paint. Failure to comply with these laws can result in penalties or other sanctions. If we incur substantial costs to comply with these environmental laws or we are held liable under these laws, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares may be adversely affected.

*Costs associated with complying with the Americans with Disabilities Act of 1990 may result in unanticipated expenses.*

Under the Americans with Disabilities Act of 1990, or the ADA, all places of public accommodation are required to meet certain U.S. federal requirements related to access and use by disabled persons. A number of additional U.S. federal, state and local laws may also require modifications to our healthcare properties, or restrict certain further renovations of the buildings, with respect to access thereto by disabled persons. Noncompliance with the ADA could result in the imposition of fines, an award of damages to private litigants and/or an order to correct any non-complying feature which could result in substantial capital expenditures. We have not conducted a detailed audit or investigation of all of our initial properties to determine our compliance, and we cannot predict the ultimate cost of compliance with the ADA or other legislation. If one or more of our initial properties is not in compliance with the ADA or other related legislation, then we would be required to incur additional costs to bring the facility into compliance. If we incur substantial costs to comply with the ADA or other related legislation, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares may be adversely affected.

*Acquiring outstanding mortgages or other debt secured by a healthcare related facility or land suitable for development as a healthcare related facility may expose us to risks of costs and delays in acquiring the underlying property.*

We may decide to acquire outstanding mortgages or other debt secured by a healthcare related facility or land suitable for development as a healthcare related facility from lenders and investors if we believe we can ultimately foreclose or otherwise acquire ownership of the underlying property in the near-term through foreclosure, deed-in-lieu of foreclosure or other means. However, if we do acquire such debt, borrowers may seek to assert various defenses to our foreclosure or other actions and we may not be successful in acquiring the underlying property on a timely basis, or at all, in which event we could incur significant costs and experience significant delays in acquiring such properties, all of which could adversely affect our financial performance and reduce our expected returns from such investments. In addition, we may not earn a current return on such investments particularly if the mortgage or other debt that we acquire is in default.

---

**Table of Contents**

***We have now, and may have in the future, exposure to contingent rent escalators, which can hinder our growth and profitability.***

We receive a significant portion of our revenues by leasing our assets under long-term triple-net leases in which the rental rate is generally fixed with annual escalations. Leases in the future may contain escalators contingent upon the achievement of specified revenue parameters or based on changes in the Consumer Price Index. If, as a result of weak economic conditions or other factors, the revenues generated by our triple-net leased properties do not meet the specified parameters or the Consumer Price Index does not increase, our growth and profitability will be hindered by these leases.

***We may not be able to maintain or expand our relationships with our existing and future hospital and healthcare delivery system clients.***

The success of our business depends, to a large extent, on our current and future relationships with hospital and healthcare delivery system clients. We invest a significant amount of time to develop, maintain and be responsive to these relationships, and our relationships have helped us to secure acquisition and development opportunities, as well as other advisory, property management and projects, with both new and existing clients. If our relationships with hospital or health system clients deteriorate, or if a conflict of interest or non-compete arrangement prevents us from expanding these relationships, our ability to secure new acquisition and development opportunities or other advisory, property management and hospital project management projects could be adversely impacted and our professional reputation within the industry could be damaged.

***Sequestration and legislation to address the federal government's projected operating deficit could have a material adverse effect on our tenants' liquidity, financial condition or results of operations.***

Deficit reduction legislation generally referred to as Sequestration recently took effect, including a 2% reduction in Medicare reimbursement to hospitals and other Medicare providers. President Obama and members of the U.S. Congress have recently proposed various spending cuts and tax reform initiatives to reduce the federal government's projected operating deficit. Some of these initiatives could result in changes (including substantial reductions in funding) to Medicare, Medicaid or Medicare Advantage Plans. Although the President has signed legislation to fund the federal government through the remainder of the fiscal year ending September 30, 2013, future federal legislation relating to deficit reduction that reduces reimbursement payments to healthcare providers could have a material adverse effect on our tenants' liquidity, financial condition or results of operations, which could adversely affect their ability to satisfy their obligations to us.

***Upon completion of this offering and the formation transactions, we expect to have approximately \$0.4 million of indebtedness pursuant to a loan on which the lender has agreed to not exercise its rights for default through September 30, 2013, after which the lender may exercise its rights to foreclose on the property, which could adversely affect our business, financial condition and results of operations.***

One of the properties in our initial portfolio, Summerfield Square, is subject to a loan which we expect to have an outstanding balance of approximately \$0.4 million upon completion of the offering. As of March 31, 2013, the entity that owned Summerfield Square, which we expect to acquire in connection with the formation transactions, was in default under the loan agreement evidencing such loan that required the entity to, among other things, repay the principal amount due by the maturity date of March 18, 2012.

The lender for this loan has waived this default through September 30, 2013 under a forbearance agreement, but there can be no assurance that the lender will not exercise its rights after September 30, 2013. If the lender were to exercise its rights to foreclose on the property after September 30, 2013, our business, financial condition and results of operation could be adversely affected.

---

**Table of Contents**

***Our independent registered public accountants have reported to us that, at December 31, 2012, we had material weaknesses in our internal control over financial reporting.***

In connection with the audit of the combined financial statements of our Predecessor for the year ended December 31, 2012, our independent registered public accountants identified a material weakness deficiency in our internal control over financial reporting. A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the combined financial statements will not be prevented or detected on a timely basis.

The issues identified by our independent registered public accountants related to the timing of data collection from our property managers, resulting in a limited amount of review of this financial information by our Predecessor's management, and a recommendation to adopt formal procedures and process to identify potential impairment issues of the Predecessor's properties. We have already taken steps to address these data collection and controls with our property managers, implement formal procedures and processes to adequately review this financial information, and will have a formal procedure and process to identify potential impairment issues, if any, with our properties going forward.

Material weaknesses and significant deficiencies that may be identified in the future will need to be addressed as part of the evaluation of our internal controls over financial reporting under Section 404 of the Sarbanes-Oxley Act, which will not apply to us until our annual report on Form 10-K for the year ending December 31, 2014.

**Risks Related to the Healthcare Industry**

***The healthcare industry is heavily regulated, and new laws or regulations, changes to existing laws or regulations, loss of licensure or failure to obtain licensure could adversely impact our company and result in the inability of our tenants to make rent payments to us.***

The healthcare industry is heavily regulated by U.S. federal, state and local governmental authorities. Our tenants generally will be subject to laws and regulations covering, among other things, licensure, certification for participation in government programs, billing for services, privacy and security of health information and relationships with physicians and other referral sources. In addition, new laws and regulations, changes in existing laws and regulations or changes in the interpretation of such laws or regulations could negatively affect our financial condition and the financial condition of our tenants. These changes, in some cases, could apply retroactively. The enactment, timing or effect of legislative or regulatory changes cannot be predicted.

The Affordable Care Act, will change how healthcare services are covered, delivered and reimbursed through expanded coverage of uninsured individuals and reduced Medicare program spending. In addition, the new law reforms certain aspects of health insurance, expands existing efforts to tie Medicare and Medicaid payments to performance and quality and contains provisions intended to strengthen fraud and abuse enforcement. The complexities and ramifications of the Affordable Care Act are significant and will be implemented in a phased approach that began in 2010. At this time, it is difficult to predict the full effects of the Affordable Care Act and its impact on our business, our revenues and financial condition and those of our tenants due to the law's complexity, lack of implementing regulations or interpretive guidance, gradual implementation and possible amendment. Further, we are unable to foresee how individuals and businesses will respond to the choices afforded them by the Affordable Care Act. The Affordable Care Act could adversely affect the reimbursement rates received by our tenants, the financial success of our tenants and strategic partners and consequently us.

Many states also regulate the construction of healthcare facilities, the expansion of healthcare facilities, the construction or expansion of certain services, including by way of example specific bed types and medical

## **Table of Contents**

equipment, as well as certain capital expenditures through certificate of need, or CON, laws. Under such laws, the applicable state regulatory body must determine a need exists for a project before the project can be undertaken. If one of our tenants seeks to undertake a CON-regulated project, but is not authorized by the applicable regulatory body to proceed with the project, the tenant would be prevented from operating in its intended manner.

Failure to comply with these laws and regulations could adversely affect us directly and our tenants' ability to make rent payments to us which may have an adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

### ***Adverse trends in healthcare provider operations may negatively affect our lease revenues and our ability to make distributions to our shareholders.***

The healthcare industry is currently experiencing, among other things:

changes in the demand for and methods of delivering healthcare services;

changes in third party reimbursement methods and policies;

consolidation and pressure to integrate within the healthcare industry through acquisitions and joint ventures; and

increased scrutiny of billing, referral and other practices by U.S. federal and state authorities.

These factors may adversely affect the economic performance of some or all of our tenants and, in turn, our lease revenues, which may have a material adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

### ***Reductions in reimbursement from third-party payors, including Medicare and Medicaid, could adversely affect the profitability of our tenants and hinder their ability to make rent payments to us or renew their lease.***

Sources of revenue for our tenants typically include the U.S. federal Medicare program, state Medicaid programs, private insurance payors and health maintenance organizations. Healthcare providers continue to face increased government and private payor pressure to control or reduce healthcare costs and significant reductions in healthcare reimbursement, including reduced reimbursements and changes to payment methodologies under the Affordable Care Act. The Congressional Budget Office, or CBO, estimates the reductions required by the Affordable Care Act over the next ten years will include \$415 billion in cuts to Medicare fee-for-service payments, the majority of which will come from hospitals, and that some hospitals will become insolvent as a result of the reductions. In some cases, private insurers rely upon all or portions of the Medicare payment systems to determine payment rates which may result in decreased reimbursement from private insurers. The Affordable Care Act will likely increase enrollment in plans offered by private insurers who choose to participate in state-run exchanges, but the Affordable Care Act also imposes new requirements for the health insurance industry, including prohibitions upon excluding individuals based upon pre-existing conditions which may increase private insurer costs and, thereby, cause private insurers to reduce their payment rates to providers.

The slowdown in the United States economy has negatively affected state budgets, thereby putting pressure on states to decrease spending on state programs including Medicaid. The need to control Medicaid expenditures may be exacerbated by the potential for increased enrollment in state Medicaid programs due to unemployment and declines in family incomes. Historically, states have often attempted to reduce Medicaid spending by limiting benefits and tightening Medicaid eligibility requirements. Many states have adopted, or are considering the adoption of, legislation designed to enroll Medicaid recipients in managed care programs and/or impose additional taxes on hospitals to help finance or expand the states' Medicaid systems. Potential reductions to Medicaid program spending in response to state budgetary pressures could negatively impact the ability of our tenants to successfully operate their businesses.

## **Table of Contents**

Efforts by payors to reduce healthcare costs will likely continue which may result in reductions or slower growth in reimbursement for certain services provided by some of our tenants. A reduction in reimbursements to our tenants from third-party payors for any reason could adversely affect our tenants' ability to make rent payments to us which may have a material adverse effect on our businesses, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

*Our tenants and our company are subject to fraud and abuse laws, the violation of which by a tenant may jeopardize the tenant's ability to make rent payments to us.*

There are various federal and state laws prohibiting fraudulent and abusive business practices by healthcare providers who participate in, receive payments from or are in a position to make referrals in connection with government-sponsored healthcare programs, including the Medicare and Medicaid programs. Our lease arrangements with certain tenants may also be subject to these fraud and abuse laws.

These laws include without limitation:

the Federal Anti-Kickback Statute, which prohibits, among other things, the offer, payment, solicitation or receipt of any form of remuneration in return for, or to induce, the referral of any federal or state healthcare program patients;

the Federal Physician Self-Referral Prohibition (commonly called the Stark Law), which, subject to specific exceptions, restricts physicians who have financial relationships with healthcare providers from making referrals for designated health services for which payment may be made under Medicare or Medicaid programs to an entity with which the physician, or an immediate family member, has a financial relationship;

the False Claims Act, which prohibits any person from knowingly presenting false or fraudulent claims for payment to the federal government, including under the Medicare and Medicaid programs;

the Civil Monetary Penalties Law, which authorizes the Department of Health and Human Services to impose monetary penalties for certain fraudulent acts; and

state anti-kickback, anti-inducement, anti-referral and insurance fraud laws which may be generally similar to, and potentially more expansive than, the federal laws set forth above.

Violations of these laws may result in criminal and/or civil penalties that range from punitive sanctions, damage assessments, penalties, imprisonment, denial of Medicare and Medicaid payments and/or exclusion from the Medicare and Medicaid programs. In addition, the Affordable Care Act clarifies that the submission of claims for items or services generated in violation of the Anti-Kickback Statute constitutes a false or fraudulent claim under the False Claims Act. The federal government has taken the position, and some courts have held, that violations of other laws, such as the Stark Law, can also be a violation of the False Claims Act. Additionally, certain laws, such as the False Claims Act, allow for individuals to bring whistleblower actions on behalf of the government for violations thereof. Imposition of any of these penalties upon one of our tenants or strategic partners could jeopardize that tenant's ability to operate or to make rent payments or affect the level of occupancy in our healthcare properties, which may have a material adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares. Further, we enter into leases and other financial relationships with healthcare delivery systems that are subject to or impacted by these laws. We also have other investors who are healthcare providers in certain of our subsidiaries that own our healthcare properties. If any of our relationships, including those related to the other investors in our subsidiaries, are found not to comply with these laws, we and our physician investors may be subject to civil and/or criminal penalties.

## **Table of Contents**

***Our healthcare-related tenants may be subject to significant legal actions that could subject them to increased operating costs and substantial uninsured liabilities, which may affect their ability to pay their rent payments to us, and we could be subject to healthcare industry violations.***

As is typical in the healthcare industry, our tenants may often become subject to claims that their services have resulted in patient injury or other adverse effects. Many of these tenants may have experienced an increasing trend in the frequency and severity of professional liability and general liability insurance claims and litigation asserted against them. The insurance coverage maintained by these tenants may not cover all claims made against them nor continue to be available at a reasonable cost, if at all. In some states, insurance coverage for the risk of punitive damages arising from professional liability and general liability claims and/or litigation may not, in certain cases, be available to these tenants due to state law prohibitions or limitations of availability. As a result, these types of tenants of our healthcare properties and healthcare-related facilities operating in these states may be liable for punitive damage awards that are either not covered or are in excess of their insurance policy limits.

We also believe that there has been, and will continue to be, an increase in governmental investigations of certain healthcare providers, particularly in the area of Medicare/Medicaid false claims, as well as an increase in enforcement actions resulting from these investigations. Insurance is not available to cover such losses. Any adverse determination in a legal proceeding or governmental investigation, any settlements of such proceedings or investigations in excess of insurance coverage, whether currently asserted or arising in the future, could have a material adverse effect on a tenant's financial condition. If a tenant is unable to obtain or maintain insurance coverage, if judgments are obtained or settlements reached in excess of the insurance coverage, if a tenant is required to pay uninsured punitive damages, or if a tenant is subject to an uninsurable government enforcement action or investigation, the tenant could be exposed to substantial additional liabilities, which may affect the tenant's ability to pay rent, which in turn could have a material adverse effect on our business, financial condition and results of operations, our ability to pay distributions to our shareholders and the trading price of our common shares. We could also be subject to costly government investigations or other enforcement actions which could have a material adverse effect on our business, financial condition and results of operations, our ability to pay distributions to our shareholders and the trading price of our common shares.

### **Risks Related to the Real Estate Industry**

***Our operating performance is subject to risks associated with the real estate industry.***

Real estate investments are subject to various risks and fluctuations and cycles in value and demand, many of which are beyond our control. Certain events may decrease cash available for distributions as well as the value of our initial properties. These events include, but are not limited to:

vacancies or our inability to rent space on favorable terms, including possible market pressures to offer tenants rent abatements, tenant improvements, early termination rights or tenant-favorable renewal options;

inability to collect rent from tenants;

competition from other real estate investors with significant capital, including other real estate operating companies, REITs and institutional investment funds;

reductions in the level of demand for healthcare properties and changes in the demand for certain healthcare-related properties;

increases in the supply of medical office space;

increases in expenses associated with our real estate operations, including, but not limited to, insurance costs, third party management fees, energy prices, real estate assessments and other taxes and costs of compliance with laws, regulations and

Edgar Filing: Physicians Realty Trust - Form 424B4

governmental policies, and restrictions on our ability to pass such expenses on to our tenants; and

## **Table of Contents**

changes in, and changes in enforcement of, laws, regulations and governmental policies associated with real estate, including, without limitation, health, safety, environmental, zoning and tax laws, governmental fiscal policies and the ADA.

In addition, periods of economic slowdown or recession, such as the recent U.S. economic downturn, rising interest rates or declining demand for real estate, or the public perception that any of these events may occur, could result in a general decline in rents or an increased incidence of defaults under existing leases. If we cannot operate our properties to meet our financial expectations, our business, financial condition, results of operations, cash flow, per share trading price of our common shares and ability to satisfy our debt service obligations and to make distributions to our shareholders could be adversely affected.

### ***Illiquidity of real estate investments could significantly impede our ability to respond to adverse changes in the performance of our properties.***

Because real estate investments are relatively illiquid, our ability to promptly sell one or more of our properties in response to changing economic, financial and investment conditions is limited. The real estate market is affected by many factors, such as general economic conditions, availability of financing, interest rates and other factors, including supply and demand, that are beyond our control. We cannot predict whether we will be able to sell any of our initial properties for the price or on the terms set by us or whether any price or other terms offered by a prospective purchaser would be acceptable to us. We also cannot predict the length of time needed to find a willing purchaser and to close the sale of our initial properties. We may be required to expend funds to correct defects or to make improvements before a property can be sold. We cannot assure you that we will have funds available to correct those defects or to make those improvements.

In acquiring a property, including our initial properties, we may agree to transfer restrictions that materially restrict us from selling that property for a period of time or impose other restrictions, such as a limitation on the amount of debt that can be placed or repaid on that property. These transfer restrictions would impede our ability to sell a property even if we deem it necessary or appropriate. These facts and any others that would impede our ability to respond to adverse changes in the performance of our properties may have an adverse effect on our business, financial condition, results of operations, or ability to make distributions to our shareholders and the trading price of our common shares.

### ***Uncertain market conditions could cause us to sell our healthcare properties at a loss in the future.***

We intend to hold our various real estate investments until such time as we determine that a sale or other disposition appears to be advantageous to achieve our investment objectives. Our senior management team and our board of trustees may exercise their discretion as to whether and when to sell a healthcare related facility, and we will have no obligation to sell our buildings at any particular time. We generally intend to hold our healthcare properties for an extended period of time, and we cannot predict with any certainty the various market conditions affecting real estate investments that will exist at any particular time in the future. Because of the uncertainty of market conditions that may affect the future disposition of our healthcare properties, we may not be able to sell our buildings at a profit in the future or at all. We may incur prepayment penalties in the event that we sell a property subject to a mortgage earlier than we otherwise had planned. Additionally, we could be forced to sell healthcare properties at inopportune times which could result in us selling the affected building at a substantial loss. Accordingly, the extent to which you will receive cash distributions and realize potential appreciation on our real estate investments will, among other things, be dependent upon fluctuating market conditions. Any inability to sell a healthcare related facility could adversely impact our ability to make debt payments and distributions to our shareholders.

### ***Our assets may be subject to impairment charges.***

We will periodically evaluate our real estate investments and other assets for impairment indicators. The judgment regarding the existence of impairment indicators is based upon factors such as market conditions,

## Table of Contents

tenant performance and legal structure. For example, the termination of a lease by a major tenant may lead to an impairment charge. If we determine that an impairment has occurred, we would be required to make an adjustment to the net carrying value of the asset which could have an adverse effect on our results of operations and FFO in the period in which the impairment charge is recorded.

### **Risks Related to Financings**

*Required payments of principal and interest on borrowings may leave us with insufficient cash to operate our initial properties or to pay the distributions currently contemplated or necessary to qualify as a REIT and may expose us to the risk of default under our debt obligations.*

On March 31, 2013, on a pro forma basis, we had approximately \$47.1 million of outstanding indebtedness, all of which was secured by mortgages on certain of our initial properties. We also expect to incur additional debt to fund future investments, including borrowings under an anticipated senior secured credit facility. Additionally, we do not anticipate that our internally generated cash flow will be adequate to repay our existing indebtedness upon maturity, and, therefore, we expect to repay our indebtedness through refinancings and future offerings of equity and debt securities, either of which we may be unable to secure on favorable terms or at all. Our level of debt and the limitations imposed upon us by our debt agreements could have adverse consequences, including the following:

Our cash flow may be insufficient to meet our required principal and interest payments;

We may be unable to borrow additional funds as needed or on favorable terms, including to make acquisitions;

We may be unable to refinance our indebtedness at maturity or the refinancing terms may be less favorable than the terms of our original indebtedness;

Because a portion of our debt bears, or is expected to bear, interest at variable rates, an increase in interest rates could materially increase our interest expense;

We may fail to effectively hedge against interest rate volatility;

We may be forced to dispose of one or more of our initial properties, possibly on disadvantageous terms if we are able to do so at all;

After debt service, the amount available for distributions to our shareholders is reduced;

Our leverage could place us at a competitive disadvantage compared to our competitors who have less debt;

We may experience increased vulnerability to economic and industry downturns, reducing our ability to respond to changing business and economic conditions;

We may default on our obligations and the lenders or mortgagees may foreclose on our initial properties that secure their loans and receive an assignment of rents and leases;

## Edgar Filing: Physicians Realty Trust - Form 424B4

We may violate financial covenants which would cause a default on our obligations;

We may inadvertently violate non-financial restrictive covenants in our loan documents, such as covenants that require us to maintain the existence of entities, maintain insurance policies and provide financial statements, which would entitle the lenders to accelerate our debt obligations; and

Our default under any one of our mortgage loans with cross-default or cross-collateralization provisions could result in default on other indebtedness or result in the foreclosures of other initial properties.

## **Table of Contents**

The realization of any or all of these risks may have an adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

***We will rely upon external sources of capital to fund future capital needs, and, if we encounter difficulty in obtaining such capital, we may not be able to make future acquisitions necessary to grow our business or meet maturing obligations.***

In order to qualify as a REIT under the Code, we will be required, among other things, to distribute each year to our shareholders at least 90% of our taxable income, without regard to the deduction for dividends paid and excluding net capital gain. Because of this distribution requirement, we may not be able to fund all of our future capital needs from cash retained from operations, including capital needed to make investments and to satisfy or refinance maturing obligations. As a result, we expect to rely upon external sources of capital, including debt and equity financing, to fund future capital needs. If we are unable to obtain needed capital on satisfactory terms or at all, we may not be able to make the investments needed to expand our business or to meet our obligations and commitments as they mature. Our access to capital will depend upon a number of factors over which we have little or no control, including general market conditions, the market's perception of our current and potential future earnings and cash distributions and the market price of our common shares. We may not be in a position to take advantage of attractive investment opportunities for growth if we are unable to access the capital markets on a timely basis on favorable terms.

***We could become highly leveraged in the future because our organizational documents contain no limitations on the amount of debt that we may incur.***

Our organizational documents contain no limitations on the amount of indebtedness that we or our operating partnership may incur. We could alter the balance between our total outstanding indebtedness and the value of our properties at any time. If we become more highly leveraged, the resulting increase in outstanding debt could adversely affect our ability to make debt service payments, to pay our anticipated distributions and to make the distributions required to qualify as a REIT. The occurrence of any of the foregoing risks could adversely affect our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

***Increases in interest rates may increase our interest expense and adversely affect our cash flows and our ability to service our indebtedness and to make distributions to our shareholders.***

We expect to have approximately \$6.5 million of variable-rate indebtedness outstanding that has not been swapped for a fixed interest rate upon the closing of this offering and the formation transactions, and we expect that more of our indebtedness in the future, including borrowings under an anticipated senior secured credit facility, will be subject to variable interest rates. Increases in interest rates on any variable rate indebtedness will increase our interest expense, which could adversely affect our cash flow and our ability to pay distributions.

***Failure to hedge effectively against interest rate changes may adversely affect our results of operations.***

In certain cases, we may seek to manage our exposure to interest rate volatility by using interest rate hedging arrangements. Hedging involves risks, such as the risk that the counterparty may fail to honor its obligations under an arrangement, that the arrangements may not be effective in reducing our exposure to interest rate changes and that a court could rule that such an agreement is not legally enforceable. In addition, we may be limited in the type and amount of hedging transactions that we may use in the future by our need to satisfy the REIT income tests under the Code. Failure to hedge effectively against interest rate changes may have an adverse effect on our business, financial condition, results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

---

**Table of Contents**

*We may not be able to obtain a credit facility on favorable terms, or at all.*

We are in the process of seeking to obtain a senior secured credit facility. We may not succeed in obtaining such a credit facility on the terms described in Management's Discussion and Analysis of Financial Condition and Results of Operations - Credit Facility, on other terms or at all. We also cannot accurately predict the size of such a credit facility if we are able to obtain it. Our failure to obtain a credit facility could adversely affect our ability to manage our cash flow, grow our business and implement our business plan.

*Our ability to issue equity to expand our business will depend, in part, upon the market price of our common shares, and our failure to meet market expectations with respect to our business could negatively affect the market price of our common shares and thereby limit our ability to raise capital.*

The availability of equity capital to us will depend, in part, upon the market price of our common shares which, in turn, will depend upon various market conditions and other factors that may change from time to time, including:

the extent of investor interest;

our ability to satisfy the distribution requirements applicable to REITs;

the general reputation of REITs and the attractiveness of their equity securities in comparison to other equity securities, including securities issued by other real estate-based companies;

our financial performance and that of our tenants;

analyst reports about us and the REIT industry;

general stock and bond market conditions, including changes in interest rates on fixed income securities, which may lead prospective purchasers of our common shares to demand a higher annual yield from future distributions;

a failure to maintain or increase our dividend which is dependent, in large part, upon FFO which, in turn, depends upon increased revenue from additional acquisitions and rental increases; and

other factors such as governmental regulatory action and changes in REIT tax laws.

Our failure to meet the market's expectation with regard to future earnings and cash distributions would likely adversely affect the market price of our common shares and, as a result, the cost and availability of equity capital to us.

**Risks Related to Our Formation and Structure**

*We did not use third-party appraisals of our initial properties to determine the consideration to be paid in the formation transactions. As a result, the value of the consideration for our initial properties in the formation transactions may exceed their aggregate fair market value.*

We did not use third-party appraisals or obtain any independent third-party valuations or fairness opinions in establishing the consideration for the initial properties being contributed in connection with the formation transactions. Our operating partnership will issue OP units and assume certain indebtedness secured by the initial properties in exchange for the contribution of the initial properties. The number of OP units issued in exchange for the Ziegler Funds' contribution of interests in the initial properties is based upon a fixed valuation which may exceed the book

## Edgar Filing: Physicians Realty Trust - Form 424B4

value of such assets, and this valuation may also exceed the fair market value of such assets. The initial public offering price of our common shares will be determined in consultation with the underwriters based upon the history and prospects for the healthcare industry, our financial information, our management and our business potential and earning prospects, the prevailing securities markets at the time of this offering, and the then-current market prices of, and the demand for, publicly-traded shares of generally comparable companies.

---

## **Table of Contents**

The initial public offering price does not necessarily bear any relationship to the book value or the fair market value of the assets being contributed in the formation transactions. As a result, the value of the OP units issued by us in the formation transactions also may exceed the fair market value of the contributed assets.

*We may assume unknown liabilities in connection with the formation transactions which could result in unexpected liabilities and expenses.*

As part of the formation transactions, we (through our operating partnership) will receive certain assets or interests in certain assets subject to existing liabilities, some of which may be unknown to us at the time of the formation transactions. Unknown liabilities might include liabilities for cleanup or remediation of undisclosed environmental conditions, claims of tenants, vendors or other persons dealing with the entities prior to this offering (including those that had not been asserted or threatened prior to this offering), tax liabilities, and accrued but unpaid liabilities incurred in the ordinary course of business. Our recourse with respect to such liabilities may be limited. Depending upon the amount or nature of such liabilities, our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our shares may be adversely affected.

*Our title insurance policies may not cover all title defects.*

Each of our initial properties is insured by a title insurance policy. We will not, however, obtain new owner's title insurance policies in connection with the acquisition of all of our initial properties in the formation transactions. In some instances, these title insurance policies are effective as of the time of the acquisition or later refinancing of the relevant property by the Ziegler Funds. As such, it is possible that there may be title defects that have arisen since such acquisition or refinancing for which we will have no title insurance coverage. If there were a material title defect related to any of our properties that is not adequately covered by a title insurance policy, we could lose some or all of our capital invested in and our anticipated profits from such property.

*We will not obtain new Phase I environmental site assessments in connection with our formation transactions, and the assessments our Predecessor obtained before acquisition of these properties do not provide assurance that we will not be exposed to environmental liabilities at our properties.*

We will not obtain new Phase I environmental site assessments with respect to all of our initial properties prior to the formation transactions. No assurances can be given that any of the prior Phase I environmental site assessments previously obtained by the Ziegler Funds identify all environmental conditions impacting the properties because material environmental conditions may have developed since the Phase I environmental site assessments were conducted. The Phase I environmental site assessments are also of limited scope and do not include comprehensive asbestos, lead-based paint or lead in drinking water assessments. Therefore, the initial properties developed earlier than 1989 may contain such hazardous substances. Comprehensive mold and radon assessments also were not conducted and some of the initial properties were identified in areas with radon levels above action levels for residential buildings by the Environmental Protection Agency. We also cannot guarantee that a prior owner or tenant of our initial properties or that an adjacent property owner has not created a material environmental condition that is unknown to us or that there are no other unknown material environmental conditions as to any one or more of our initial properties. There also exists the risk that material environmental conditions, liabilities or compliance concerns may arise in the future. The realization of any or all of these risks may have an adverse effect on our business, financial condition and results of operations, our ability to make distributions to our shareholders and the trading price of our common shares.

*We will have no direct operations and will rely upon funds received from our operating partnership to meet our obligations.*

We will conduct substantially all of our operations through our operating partnership. After giving effect to this offering, we will own approximately 79.6% of the OP units of our operating partnership and apart from this

## **Table of Contents**

ownership interest, we will not have any independent operations. As a result, we will rely upon distributions from our operating partnership to pay any dividends that we might declare on our common shares. We will also rely upon distributions from our operating partnership to meet our obligations, including tax liability on taxable income allocated to us from our operating partnership (which might make distributions to us not equal to the tax on such allocated taxable income). Shareholders' claims will consequently be structurally subordinated to all existing and future liabilities and obligations (whether or not for borrowed money) of our operating partnership and its subsidiaries. Therefore, in the event of our bankruptcy, liquidation or reorganization, claims of our shareholders will be satisfied only after all of our and our operating partnership's and its subsidiaries' liabilities and obligations have been paid in full.

***We are an emerging growth company, and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our common shares less attractive to investors.***

The Jumpstart Our Business Startups Act, or the JOBS Act, contains provisions that, among other things, relax certain reporting requirements for emerging growth companies, including certain requirements relating to accounting standards and compensation disclosure. We are classified as an emerging growth company. For as long as we are an emerging growth company, which may be up to five full fiscal years, we may take advantage of exemptions from various reporting and other requirements that are applicable to other public companies that are not emerging growth companies, including the requirements to:

provide an auditor's attestation report on management's assessment of the effectiveness of our system of internal control over financial reporting pursuant to Section 404;

comply with any new or revised financial accounting standards applicable to public companies until such standards are also applicable to private companies;

comply with any new requirements adopted by the Public Company Accounting Oversight Board, or the PCAOB, requiring mandatory audit firm rotation or a supplement to the auditor's report in which the auditor would be required to provide additional information about the audit and the financial statements of the issuer;

comply with any new audit rules adopted by the PCAOB after April 5, 2012 unless the SEC determines otherwise;

provide certain disclosure regarding executive compensation required of larger public companies; or

hold shareholder advisory votes on executive compensation.

We cannot predict if investors will find our common shares less attractive because we will not be subject to the same reporting and other requirements as other public companies. If some investors find our common shares less attractive as a result, there may be a less active trading market for our common shares, the per share trading price of our common shares could decline and may be more volatile.

***We will incur new costs as a result of becoming a public company, and such costs may increase if and when we cease to be an emerging growth company.***

As a public company, we will incur significant legal, accounting, insurance and other expenses that we have not incurred as a private company, including costs associated with public company reporting requirements. The expenses incurred by public companies generally for reporting and corporate governance purposes have been increasing. We expect compliance with these public reporting requirements and associated rules and regulations to increase expenses, particularly after we are no longer an emerging growth company, although we are currently unable to estimate these costs with any degree of certainty. We could be an emerging growth company for up to five years, although circumstances could cause us to lose that status earlier, which could result in our incurring additional costs applicable to public companies that are not emerging growth companies.

## **Table of Contents**

### ***We will be subject to the requirements of the Sarbanes-Oxley Act of 2002.***

As long as we remain an emerging growth company, we will be permitted to gradually comply with certain of the on-going reporting and disclosure obligations of public companies pursuant to the Sarbanes-Oxley Act of 2002. See We are an emerging growth company, and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our common shares less attractive to investors.

However, after we are no longer an emerging growth company under the JOBS Act, management will be required to deliver a report that assesses the effectiveness of our internal controls over financial reporting, pursuant to Section 302 of the Sarbanes-Oxley Act. Section 404 of the Sarbanes-Oxley Act may require our auditors to deliver an attestation report on the effectiveness of our internal controls over financial reporting in conjunction with their opinion on our audited financial statements as of December 31 subsequent to the year in which the registration statement (of which this prospectus forms a part) relating to this offering becomes effective. Substantial work on our part is required to implement appropriate processes, document the system of internal control over key processes, assess their design, remediate any deficiencies identified and test their operation. This process is expected to be both costly and challenging. We cannot give any assurances that material weaknesses will not be identified in the future in connection with our compliance with the provisions of Section 302 and 404 of the Sarbanes-Oxley Act. The existence of any material weakness described above would preclude a conclusion by management and our independent auditors that we maintained effective internal control over financial reporting. Our management may be required to devote significant time and expense to remediate any material weaknesses that may be discovered and may not be able to remediate any material weakness in a timely manner. The existence of any material weakness in our internal control over financial reporting could also result in errors in our financial statements that could require us to restate our financial statements, cause us to fail to meet our reporting obligations and cause investors to lose confidence in our reported financial information, all of which could lead to a decline in the per share trading price of our common shares.

### ***Our business could be harmed if key personnel terminate their employment with us or if we are unsuccessful in integrating new personnel into our operations.***

Our success depends, to a significant extent, on the continued services of Mr. Thomas, our President and Chief Executive Officer, Mr. Sweet, our Executive Vice President and Chief Investment Officer, Mr. Lucey, our Senior Vice President Principal Accounting and Reporting Officer and Mr. Theine, our Senior Vice President of Asset and Investment Management. We do not maintain key person life insurance on any of our officers. Our ability to continue to acquire and develop healthcare properties depends upon the significant relationships that our senior management team has developed over many years.

Although we have entered into employment agreements with Messrs. Thomas, Sweet, Lucey and Theine, we cannot provide any assurance that any of them will remain employed by us. Our ability to retain our senior management team, or to attract suitable replacements should any member of the senior management team leave, is dependent on the competitive nature of the employment market. The loss of services of, or the failure to successfully integrate one or more new members of, our senior management team could adversely affect our business and our prospects.

### ***Our use of OP units as currency to acquire properties could result in shareholder dilution and/or limit our ability to sell such properties, which could have a material adverse effect on us.***

In the future we may acquire properties or portfolios of properties through tax deferred contribution transactions in exchange for OP units, which may result in shareholder dilution. This acquisition structure may have the effect of, among other things, reducing the amount of tax depreciation we could deduct over the tax life of the acquired properties, and may require that we agree to protect the contributors' ability to defer recognition of taxable gain through restrictions on our ability to dispose of the acquired properties or the allocation of partnership debt to the contributors to maintain their tax bases. These restrictions could limit our ability to sell properties at a time, or on terms, that would be favorable absent such restrictions.

## **Table of Contents**

*We may pursue less vigorous enforcement of the terms of the contribution and other agreements because of conflicts of interest with certain of our officers and trustees, and the terms of those agreements may be less favorable to us than they might otherwise be in an arm's-length transaction.*

The contribution agreements with the Ziegler Funds relating to the contribution to our operating partnership of the indirect interests in certain properties and assets comprising our initial properties, will contain very limited representations and warranties and will have no express indemnification rights in the event of a breach of those agreements. In addition, we will enter into a shared services agreement with Ziegler pursuant to which Ziegler will provide certain support services to us, including providing office space and administrative support, accounting support, information technology services, which will include hosting and maintaining a separate and secure website, email service and other software necessary to operate our business. Furthermore, Mr. Sweet, who will become our Executive Vice President and Chief Investment Officer upon completion of this offering, currently serves as an officer of the Ziegler Funds. Consequently, he has a fiduciary duty to act in the best interests of the Ziegler Funds until he becomes an officer of our company, and we have an interest in maintaining a positive relationship with Mr. Sweet pending our acquisition of our initial portfolio. Further, Mr. Baumgartner, one of our trustees, is an officer with Ziegler and will have a conflict with respect to any matters that require consideration by our board of trustees that occur between us and Ziegler. Even if we have actionable rights, we may choose not to enforce, or to enforce less vigorously, our rights under these agreements or under other agreements we may have with these parties, including employment agreements, because of our desire to maintain positive relationships with the individuals who are parties to these agreements.

*Conflicts of interest could arise as a result of our UPREIT structure.*

Conflicts of interest could arise in the future as a result of the relationships between us and our affiliates, on the one hand, and our operating partnership or any partner thereof, on the other. Our trustees and officers have duties to us under applicable Maryland law in connection with their management of our company. At the same time, we, as general partner, have fiduciary duties to our operating partnership and to the limited partners under Delaware law in connection with the management of our operating partnership. Our duties, as general partner, to our operating partnership and its limited partners may come into conflict with the duties of our trustees and officers.

Unless otherwise provided for in the relevant partnership agreement, Delaware law generally requires a general partner of a Delaware limited partnership to adhere to fiduciary duty standards under which it owes its limited partners the highest duties of good faith, fairness and loyalty and which generally prohibits such general partner from taking any action or engaging in any transaction as to which it has a conflict of interest.

Additionally, the partnership agreement expressly limits our liability by providing that we, as the general partner of the operating partnership, and our trustees or officers will not be liable or accountable in damages to our operating partnership, the limited partners or assignees for errors in judgment, mistakes of fact or law or for any act or omission if the general partner or such trustee or officer acted in good faith. In addition, our operating partnership is required to indemnify us, our affiliates and each of our respective officers and trustees, to the fullest extent permitted by applicable law against any and all losses, claims, damages, liabilities (whether joint or several), expenses (including, without limitation, attorneys' fees and other legal fees and expenses), judgments, fines, settlements and other amounts arising from any and all claims, demands, actions, suits or proceedings, civil, criminal, administrative or investigative, that relate to the operations of the operating partnership, provided that our operating partnership will not indemnify any such person for (1) acts or omissions committed in bad faith or that were the result of active and deliberate dishonesty, (2) any transaction for which such person received an improper personal benefit in money, property or services, or (3) in the case of a criminal proceeding, the person had reasonable cause to believe the act or omission was unlawful.

The provisions of Delaware law that allow the common law fiduciary duties of a general partner to be modified by a partnership agreement have not been resolved in a court of law, and we have not obtained an opinion of counsel covering the provisions set forth in the partnership agreement that purport to waive or restrict our fiduciary duties that would be in effect under common law were it not for the partnership agreement.

---

**Table of Contents**

***Our declaration of trust restricts the ownership and transfer of our outstanding shares of beneficial interest which may have the effect of delaying, deferring or preventing a transaction or change of control of our company.***

In order for us to qualify as a REIT, no more than 50% of the value of our outstanding shares of beneficial interest may be owned, beneficially or constructively, by five or fewer individuals at any time during the last half of each taxable year other than our initial REIT taxable year. Subject to certain exceptions, our declaration of trust prohibits any shareholder from owning beneficially or constructively more than 9.8% in value or number of shares, whichever is more restrictive, of the outstanding shares of any class or series of our shares of beneficial interest. The constructive ownership rules under the Code are complex and may cause the outstanding shares owned by a group of related individuals or entities to be deemed to be constructively owned by one individual or entity. As a result, the acquisition of less than 9.8% of our outstanding shares of any class or series by an individual or entity could cause that individual or entity to own constructively in excess of 9.8% of the outstanding shares of any class or series of our shares of beneficial interest and to be subject to our declaration of trust's ownership limit. Our declaration of trust also prohibits, among other prohibitions, any person from owning our shares of beneficial interest that would result in our being closely held under Section 856(h) of the Code or otherwise cause us to fail to qualify as a REIT. Any attempt to own or transfer shares of our beneficial interest in violation of these restrictions may result in the shares being automatically transferred to a charitable trust or may be void.

***Certain provisions of Maryland law could inhibit changes of control, which may discourage third parties from conducting a tender offer or seeking other change of control transactions that could involve a premium price for our common shares or that our shareholders otherwise believe to be in their best interests.***

Certain provisions of the Maryland General Corporation Law, or MGCL, applicable to Maryland real estate investment trusts may have the effect of inhibiting a third party from making a proposal to acquire us or of impeding a change of control under circumstances that otherwise could provide our common shareholders with the opportunity to realize a premium over the then-prevailing market price of such shares, including:

business combination provisions that, subject to limitations, prohibit certain business combinations between us and an interested shareholder (defined generally as any person who beneficially owns 10% or more of the voting power of our shares or an affiliate or associate of ours who was the beneficial owner, directly or indirectly, of 10% or more of the voting power of our shares at any time within the two-year period immediately prior to the date in question) or an affiliate thereof for five years after the most recent date on which the shareholder becomes an interested shareholder, and thereafter imposes certain minimum price and/or supermajority shareholder voting requirements on these combinations; and

control share provisions that provide that holders of control shares of our company (defined as shares that, when aggregated with all other shares controlled by the shareholder, entitle the shareholder to exercise one of three increasing ranges of voting power in electing trustees) acquired in a control share acquisition (defined as the direct or indirect acquisition of ownership or control of issued and outstanding control shares, subject to certain exceptions) have no voting rights with respect to their control shares, except to the extent approved by our shareholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding all interested shares.

Pursuant to the statute, our board of trustees has by resolution exempted any business combination between us and any other person from the business combination provisions of the MGCL, provided that the business combination is first approved by our board of trustees (including a majority of trustees who are not affiliates or associates of such person). In addition, our bylaws contain a provision exempting any and all acquisitions of our shares from the control share provisions of the MGCL. However, our board of trustees may at any time alter or repeal the resolution exempting certain businesses from the business combination provisions of the MGCL and we may at any time amend or eliminate the provision of our bylaws exempting acquisitions of our shares from the control share provisions of the MGCL.

---

**Table of Contents**

Certain provisions of the MGCL permit our board of trustees, without shareholder approval and regardless of what is currently provided in our declaration of trust or bylaws, to implement certain corporate governance provisions, some of which (for example, a classified board) are not currently applicable to us. If implemented, these provisions may have the effect of limiting or precluding a third party from making an unsolicited acquisition proposal for us or of delaying, deferring or preventing a change in control of us under circumstances that otherwise could provide our common shareholders with the opportunity to realize a premium over the then current market price. Our declaration of trust contains a provision whereby we elect, at such time as we become eligible to do so, to be subject to the provisions of Title 3, Subtitle 8 of the MGCL relating to the filling of vacancies on our board of trustees. See Certain Provisions of Maryland Law and of Our Declaration of Trust and Bylaws.

***We could increase the number of authorized shares, classify and reclassify unissued shares and issue shares without shareholder approval.***

Our board of trustees, without shareholder approval, has the power under our declaration of trust to amend our declaration of trust to increase or decrease the aggregate number of shares or the number of shares of any class or series that we are authorized to issue, and to authorize us to issue authorized but unissued common shares or preferred shares. In addition, under our declaration of trust, our board of trustees has the power to classify or reclassify any unissued common or preferred shares into one or more classes or series of shares and set or change the preference, conversion or other rights, voting powers, restrictions, limitations as to dividends and other distributions, qualifications or terms or conditions of redemption for such newly classified or reclassified shares. See Description of Shares of Beneficial Interest Power to Increase or Decrease Authorized Shares of Beneficial Interest and Issue Additional Common Shares and Preferred Shares. As a result, we may issue series or classes of common shares or preferred shares with preferences, dividends, powers and rights, voting or otherwise, that are senior to, or otherwise conflict with, the rights of holders of our common shares. Although our board of trustees has no such intention at the present time, it could establish a class or series of preferred shares that could, depending on the terms of such class or series, delay, defer or prevent a transaction or a change of control that might involve a premium price for our common shares or that our shareholders otherwise believe to be in their best interests.

***We may change our business, investment and financing strategies without shareholder approval.***

We may change our business, investment and financing strategies without a vote of, or notice to, our shareholders, which could result in our making investments and engaging in business activities that are different from, and possibly riskier than, the investments and businesses described in this prospectus. In particular, a change in our investment strategy, including the manner in which we allocate our resources across our portfolio or the types of assets in which we seek to invest, may increase our exposure to real estate market fluctuations. In addition, we may in the future increase the use of leverage at times and in amounts that we, in our discretion, deem prudent, and such decision would not be subject to shareholder approval. Furthermore, our board of trustees may determine that healthcare properties do not offer the potential for attractive risk-adjusted returns for an investment strategy. Changes to our strategies with regards to the foregoing could adversely affect our financial condition, results of operations and our ability to make distributions to our shareholders.

***Our rights and the rights of our shareholders to take action against our trustees and officers are limited, which could limit your recourse in the event that we take certain actions which are not in your best interests.***

Our declaration of trust eliminates the liability of our trustees and officers to us and our shareholders for money damages, except for liability resulting from:

actual receipt of an improper benefit or profit in money, property or services; or

active and deliberate dishonesty by the trustee or officer that was established by a final judgment as being material to the cause of action adjudicated.

---

**Table of Contents**

Our declaration of trust authorizes us to indemnify our present and former trustees and officers for actions taken by them in those and other capacities to the maximum extent permitted by Maryland present and former law. Our bylaws obligate us to indemnify each present and former trustee or officer, to the maximum extent permitted by Maryland law, in the defense of any proceeding to which he or she is made, or threatened to be made, a party by reason of his or her service to us. In addition, we may be obligated to advance the defense costs incurred by our trustee and officers. We will also enter into indemnification agreements with our officers and trustees granting them express indemnification rights. As a result, we and our shareholders may have more limited rights against our trustees and officers than might otherwise exist absent the current provisions in our declaration of trust, bylaws and indemnification agreements or that might exist with other companies.

Our declaration of trust contains provisions that make removal of our trustees difficult, which could make it difficult for our shareholders to effect changes to our management and may prevent a change in control of our company that is in the best interests of our shareholders. Our declaration of trust provides that a trustee may only be removed for cause upon the affirmative vote of holders of two-thirds of all the votes entitled to be cast generally in the election of trustees. Vacancies may be filled only by a majority of the remaining trustees in office, even if less than a quorum. These requirements make it more difficult to change our management by removing and replacing trustees and may prevent a change in control of our company that is in the best interests of our shareholders.

***Certain provisions in the partnership agreement of our operating partnership may delay or prevent unsolicited acquisitions of us.***

Provisions in the partnership agreement of our operating partnership may delay, or make more difficult, unsolicited acquisitions of us or changes of our control. These provisions could discourage third parties from making proposals involving an unsolicited acquisition of us or change of our control, although some shareholders might consider such proposals, if made, desirable. These provisions include, among others:

redemption rights;

a requirement that we may not be removed as the general partner of our operating partnership without our consent;

transfer restrictions on OP units;

our ability, as general partner, in some cases, to amend the partnership agreement and to cause the operating partnership to issue units with terms that could delay, defer or prevent a merger or other change of control of us or our operating partnership without the consent of the limited partners; and

the right of the limited partners to consent to direct or indirect transfers of the general partnership interest, including as a result of a merger or a sale of all or substantially all of our assets, in the event that such transfer requires approval by our common shareholders.

Our declaration of trust and bylaws, Maryland law and the partnership agreement of our operating partnership also contain other provisions that may delay, defer or prevent a transaction or a change of control that might involve a premium price for our common shares or that our shareholders otherwise believe to be in their best interest. See Description of the Partnership Agreement of Physicians Realty L.P. Restrictions on Transfers by the General Partner, Certain Provisions of Maryland Law and of Our Declaration of Trust and Bylaws Removal of Trustees, Business Combinations, Control Share Acquisitions, Subtitle 8, Advance Notice of Trustee Nominations and New Business, Anti-takeover Effect of Certain Provisions of Maryland Law and of Our Declaration of Trust and Bylaws and Description of the Partnership Agreement of Physicians Realty L.P.

---

**Table of Contents**

***Compensation awards to our management may not correlate to or correspond with our financial results or share price.***

The compensation, nominating and governance committee of our board of trustees will be responsible for overseeing our compensation and employee benefit plans and practices, including our incentive compensation and equity-based compensation plans. Our compensation, nominating and governance committee will have significant discretion in structuring compensation packages and may make compensation decisions based upon any number of factors. As a result, compensation awards may not correlate to or correspond with our financial results or the share price of our common shares. We may give bonuses, grant equity awards and otherwise highly compensate our management even if we are performing poorly.

***Our operating partnership may issue additional OP units to third parties without the consent of our shareholders, which would reduce our ownership percentage in our operating partnership and could have a dilutive effect on the amount of distributions made to us by our operating partnership and, therefore, the amount of distributions we can make to our shareholders.***

After giving effect to this offering, we will own 79.6% of the outstanding partnership interests in our operating partnership. Our operating partnership may, in connection with our acquisition of properties or otherwise, issue additional OP units to third parties. Such issuances would reduce our ownership percentage in our operating partnership and could affect the amount of distributions made to us by our operating partnership and, therefore, the amount of distributions we can make to our shareholders. Because you will not directly own OP units, you will not have any voting rights with respect to any such issuances or other partnership level activities of our operating partnership.

**Risks Related to Our Qualification and Operation as a REIT**

***Failure to qualify as a REIT, or failure to remain qualified as a REIT, would cause us to be taxed as a regular corporation, which would substantially reduce funds available for distributions to our shareholders.***

We believe that our organization and proposed method of operation will enable us to meet the requirements for qualification and taxation as a REIT commencing with our taxable year ending December 31, 2013. However, we cannot assure you that we will qualify and remain qualified as a REIT. In connection with this offering, we will receive an opinion from Baker & McKenzie LLP that, commencing with our taxable year ending December 31, 2013, we will be organized in conformity with the requirements for qualification and taxation as a REIT under the U.S. federal income tax laws and our proposed method of operations will enable us to satisfy the requirements for qualification and taxation as a REIT under the U.S. federal income tax laws for our taxable year ending December 31, 2013 and subsequent taxable years. Investors should be aware that Baker & McKenzie LLP's opinion is based upon customary assumptions, will be conditioned upon certain representations made by us as to factual matters, including representations regarding the nature of our assets and the conduct of our business, is not binding upon the Internal Revenue Service, or the IRS, or any court and speaks as of the date issued. In addition, Baker & McKenzie LLP's opinion will be based on existing U.S. federal income tax law governing qualification as a REIT, which is subject to change either prospectively or retroactively. Moreover, our qualification and taxation as a REIT depend upon our ability to meet on a continuing basis, through actual annual operating results, certain qualification tests set forth in the federal tax laws. Baker & McKenzie LLP will not review our compliance with those tests on a continuing basis. Accordingly, no assurance can be given that our actual results of operations for any particular taxable year will satisfy such requirements.

If we fail to qualify as a REIT in any taxable year, we will face serious tax consequences that will substantially reduce the funds available for distributions to our shareholders because:

we would not be allowed a deduction for dividends paid to shareholders in computing our taxable income and would be subject to U.S. federal income tax at regular corporate rates;

we could be subject to the federal alternative minimum tax and possibly increased state and local taxes; and

---

**Table of Contents**

unless we are entitled to relief under certain U.S. federal income tax laws, we could not re-elect REIT status until the fifth calendar year after the year in which we failed to qualify as a REIT.

In addition, if we fail to qualify as a REIT, we will no longer be required to make distributions. As a result of all these factors, our failure to qualify as a REIT could impair our ability to expand our business and raise capital, and it would adversely affect the value of our shares of beneficial interest. See *Material U.S. Federal Income Tax Considerations* for a discussion of material U.S. federal income tax consequences relating to us and our common shares.

***Even if we qualify as a REIT, we may face other tax liabilities that reduce our cash flows.***

Even if we qualify for taxation as a REIT, we may be subject to certain federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes. In addition, our taxable REIT subsidiary, or TRS, will be subject to regular corporate federal, state and local taxes. Any of these taxes would decrease cash available for distributions to shareholders.

***Failure to make required distributions would subject us to U.S. federal corporate income tax.***

We intend to operate in a manner so as to qualify as a REIT for U.S. federal income tax purposes. In order to qualify as a REIT, we generally are required to distribute at least 90% of our REIT taxable income, determined without regard to the dividends paid deduction and excluding any net capital gain, each year to our shareholders. To the extent that we satisfy this distribution requirement, but distribute less than 100% of our REIT taxable income, we will be subject to U.S. federal corporate income tax on our undistributed taxable income. In addition, we will be subject to a 4% nondeductible excise tax if the actual amount that we pay out to our shareholders in a calendar year is less than a minimum amount specified under the Code.

***Complying with REIT requirements may cause us to forego otherwise attractive opportunities or liquidate otherwise attractive investments.***

To qualify as a REIT for federal income tax purposes, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our shareholders and the ownership of our shares of beneficial interest. In order to meet these tests, we may be required to forego investments we might otherwise make. Thus, compliance with the REIT requirements may hinder our performance.

In particular, we must ensure that at the end of each calendar quarter, at least 75% of the value of our assets consists of cash, cash items, government securities and qualified real estate assets. The remainder of our investment in securities (other than government securities, securities of TRSs and qualified real estate assets) generally cannot include more than 10% of the outstanding voting securities of any one issuer or more than 10% of the total value of the outstanding securities of any one issuer. In addition, in general, no more than 5% of the value of our assets (other than government securities, securities of TRSs and qualified real estate assets) can consist of the securities of any one issuer, and no more than 25% of the value of our total assets can be represented by the securities of one or more TRSs. If we fail to comply with these requirements at the end of any calendar quarter, we must correct the failure within 30 days after the end of the calendar quarter or qualify for certain statutory relief provisions to avoid losing our REIT qualification and suffering adverse tax consequences. As a result, we may be required to liquidate otherwise attractive investments. These actions could have the effect of reducing our income and amounts available for distribution to our shareholders.

***The prohibited transactions tax may limit our ability to dispose of our properties.***

A REIT's net income from prohibited transactions is subject to a 100% tax. In general, prohibited transactions are sales or other dispositions of property other than foreclosure property, held primarily for sale to

---

**Table of Contents**

customers in the ordinary course of business. We may be subject to the prohibited transaction tax equal to 100% of net gain upon a disposition of real property. Although a safe harbor to the characterization of the sale of real property by a REIT as a prohibited transaction is available, we cannot assure you that we can comply with the safe harbor or that we will avoid owning property that may be characterized as held primarily for sale to customers in the ordinary course of business. Consequently, we may choose not to engage in certain sales of our properties or may conduct such sales through any TRS that we may form, which would be subject to federal and state income taxation.

***We may pay taxable dividends in our common shares and cash, in which case shareholders may sell our common shares to pay tax on such dividends, placing downward pressure on the market price of our common shares.***

We may distribute taxable dividends that are payable in cash and common shares at the election of each shareholder. The IRS has issued private letter rulings to other REITs treating certain distributions that are paid partly in cash and partly in shares as taxable dividends that would satisfy the REIT annual distribution requirement and qualify for the dividends paid deduction for U.S. federal income tax purposes. Those rulings may be relied upon only by taxpayers to whom they were issued, but we could request a similar ruling from the IRS. In addition, the IRS issued a revenue procedure creating a temporary safe harbor that authorized publicly traded REITs to make elective cash/share dividends, but that temporary safe harbor has expired. Accordingly, it is unclear whether and to what extent we will be able to make taxable dividends payable in cash and common shares.

If we made a taxable dividend payable in cash and common shares, taxable shareholders receiving such dividends will be required to include the full amount of the dividend as ordinary income to the extent of our current and accumulated earnings and profits, as determined for U.S. federal income tax purposes. As a result, shareholders may be required to pay income tax with respect to such dividends in excess of the cash dividends received. If a U.S. shareholder sells the common shares that it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our common shares at the time of the sale. Furthermore, with respect to certain non-U.S. shareholders, we may be required to withhold U.S. federal income tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in common shares. If we made a taxable dividend payable in cash and our common shares and a significant number of our shareholders determine to sell our common shares in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common shares. We do not currently intend to pay taxable dividends using both our common shares and cash, although we may choose to do so in the future.

***The ability of our board of trustees to revoke our REIT qualification without shareholder approval may cause adverse consequences to our shareholders.***

Our declaration of trust provides that our board of trustees may revoke or otherwise terminate our REIT election, without the approval of our shareholders, if it determines that it is no longer in our best interest to continue to qualify as a REIT. If we cease to qualify as a REIT, we would become subject to U.S. federal income tax on our taxable income and would no longer be required to distribute most of our taxable income to our shareholders, which may have adverse consequences on our total return to our shareholders.

***Any ownership of a TRS we may form in the future will be subject to limitations and our transactions with a TRS will cause us to be subject to a 100% penalty tax on certain income or deductions if those transactions are not conducted on arm's-length terms.***

Overall, no more than 25% of the value of a REIT's assets may consist of stock or securities of one or more TRSs. In addition, the Code limits the deductibility of interest paid or accrued by a TRS to its parent REIT to assure that the TRS is subject to an appropriate level of corporate taxation. The Code also imposes a 100% excise

**Table of Contents**

tax on certain transactions between a TRS and its parent REIT that are not conducted on an arm's-length basis. Furthermore, we will monitor the value of our respective investments in any TRS that we may form for the purpose of ensuring compliance with TRS ownership limitations and will structure our transactions with any TRS on terms that we believe are arm's length to avoid incurring the 100% excise tax described above. There can be no assurance, however, that we will be able to comply with the 25% REIT subsidiaries limitation or to avoid application of the 100% excise tax.

***The formation of a TRS lessee would increase our overall tax liability.***

We may, in the future, form one or more TRS lessees to lease qualified health care properties from us. Any TRS lessee we may form will be subject to federal and state income tax on its taxable income, which will consist of the revenues from the qualified health care properties leased by the TRS lessee, net of the operating expenses for such properties and rent payments to us. Accordingly, although our ownership of a TRS lessee would allow us to participate in the operating income from our properties leased to the TRS lessee on an after tax basis in addition to receiving rent, that operating income would be fully subject to federal and state income tax. The after-tax net income of a TRS lessee would be available for distribution to us.

***If leases of our properties are not respected as true leases for federal income tax purposes, we would fail to qualify as a REIT and would be subject to higher taxes and have less cash available for distribution to our shareholders.***

To qualify as a REIT, we must satisfy two gross income tests, under which specified percentages of our gross income must be derived from certain sources, such as rents from real property. Rents paid to our operating partnership by third-party lessees and any TRS lessee that we may form in the future pursuant to the leases of our properties will constitute substantially all of our gross income. In order for such rent to qualify as rents from real property for purposes of the gross income tests, the leases must be respected as true leases for federal income tax purposes and not be treated as service contracts, joint ventures or some other type of arrangement. If our leases are not respected as true leases for federal income tax purposes, we would fail to qualify as a REIT.

***If a TRS lessee failed to qualify as a TRS or the facility operators engaged by a TRS lessee did not qualify as eligible independent contractors, we would fail to qualify as a REIT and would be subject to higher taxes and have less cash available for distribution to our shareholders.***

Rent paid by a lessee that is a related party tenant of ours will not be qualifying income for purposes of the two gross income tests applicable to REITs. We may, in the future, lease certain of our properties that qualify as qualified health care properties to a TRS lessee. So long as that TRS lessee qualifies as a TRS, it will not be treated as a related party tenant with respect to our properties that are managed by an independent facility operator that qualifies as an eligible independent contractor. We would seek to structure any future arrangements with a TRS lessee such that the TRS lessee would qualify to be treated as a TRS for federal income tax purposes, but there can be no assurance that the IRS would not challenge the status of a TRS for federal income tax purposes or that a court would not sustain such a challenge. If the IRS were successful in disqualifying a TRS lessee from treatment as a TRS, it is possible that we would fail to meet the asset tests applicable to REITs and a significant portion of our income would fail to qualify for the gross income tests. If we failed to meet either the asset or gross income tests, we would likely lose our REIT qualification for federal income tax purposes.

Additionally, if the facility operators engaged by a TRS lessee do not qualify as eligible independent contractors, we would fail to qualify as a REIT. Each of the facility operators that would enter into a management contract with any TRS lessee must qualify as an eligible independent contractor under the REIT rules in order for the rent paid to us by such a TRS lessee to be qualifying income for purposes of the REIT gross income tests. Among other requirements, in order to qualify as an eligible independent contractor a facility

---

## **Table of Contents**

operator must not own, directly or indirectly, more than 35% of our outstanding shares and no person or group of persons can own more than 35% of our outstanding shares and the ownership interests of the facility operator, taking into account certain ownership attribution rules. The ownership attribution rules that apply for purposes of these 35% thresholds are complex. Although we would monitor ownership of our shares by any facility operators and their owners, there can be no assurance that these ownership levels will not be exceeded.

### ***You may be restricted from acquiring or transferring certain amounts of our common shares.***

The share ownership restrictions of the Code for REITs and the 9.8% share ownership limit and other restrictions on ownership and transfer of our shares contained in our declaration of trust may inhibit market activity in our shares of beneficial interest and restrict our business combination opportunities.

In order to qualify as a REIT for each taxable year after 2013, five or fewer individuals, as defined in the Code, may not own, beneficially or constructively, more than 50% in value of our issued and outstanding shares of beneficial interest at any time during the last half of a taxable year. Attribution rules in the Code determine if any individual or entity beneficially or constructively owns our shares of beneficial interest under this requirement. Additionally, at least 100 persons must beneficially own our shares of beneficial interest during at least 335 days of a taxable year for each taxable year after 2013. To help insure that we meet these tests, our declaration of trust restricts the acquisition and ownership of shares of our beneficial interest.

Our declaration of trust, with certain exceptions, authorizes our trustees to take such actions as are necessary and desirable to preserve our qualification as a REIT. Unless exempted by our board of trustees, our declaration of trust prohibits any person from beneficially or constructively owning more than 9.8% in value or number of shares, whichever is more restrictive, of the outstanding shares of any class or series of our shares of beneficial interest. Our board of trustees may not grant an exemption from this restriction to any proposed transferee whose ownership in excess of 9.8% of the number or value of our outstanding shares would result in our failing to qualify as a REIT. This as well as other restrictions on transferability and ownership will not apply, however, if our board of trustees determines that it is no longer in our best interests to continue to qualify as a REIT.

### ***Dividends payable by REITs do not qualify for the reduced tax rates available for some dividends.***

The maximum tax rate applicable to qualified dividend income payable to U.S. shareholders that are taxed at individual rates is 20%. Dividends payable by REITs, however, generally are not eligible for the reduced rates on qualified dividend income. The more favorable rates applicable to regular corporate qualified dividends could cause investors who are taxed at individual rates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could adversely affect the value of the shares of REITs, including our common shares.

### ***We may be subject to adverse legislative or regulatory tax changes that could reduce the market price of our common shares.***

At any time, the U.S. federal income tax laws governing REITs or the administrative interpretations of those laws may be amended. We cannot predict when or if any new U.S. federal income tax law, regulation or administrative interpretation, or any amendment to any existing U.S. federal income tax law, regulation or administrative interpretation, will be adopted, promulgated or become effective and any such law, regulation, or interpretation may take effect retroactively. We and our shareholders could be adversely affected by any such change in the U.S. federal income tax laws, regulations or administrative interpretations.

### ***If our operating partnership failed to qualify as a partnership for federal income tax purposes, we would cease to qualify as a REIT and suffer other adverse consequences.***

We believe that our operating partnership will be treated as a partnership for federal income tax purposes. As a partnership, our operating partnership will not be subject to federal income tax on its income. Instead, each of its partners, including us, will be allocated, and may be required to pay tax with respect to, its share of our

## **Table of Contents**

operating partnership's income. We cannot assure you, however, that the IRS will not challenge the status of our operating partnership or any other subsidiary partnership in which we own an interest as a partnership for federal income tax purposes, or that a court would not sustain such a challenge. If the IRS were successful in treating our operating partnership or any such other subsidiary partnership as an entity taxable as a corporation for federal income tax purposes, we would fail to meet the gross income tests and certain of the asset tests applicable to REITs and, accordingly, we would likely cease to qualify as a REIT. Also, the failure of our operating partnership or any subsidiary partnerships to qualify as a partnership could cause it to become subject to federal and state corporate income tax, which would reduce significantly the amount of cash available for debt service and for distribution to its partners, including us.

### **Risks Related to This Offering**

***There has been no public market for our common shares prior to this offering and an active trading market for our common shares may not develop following this offering.***

Prior to this offering, there has not been any public market for our common shares, and there can be no assurance that an active trading market will develop or be sustained or that our common shares will be resold at or above the initial public offering price. The initial public offering price of our common shares will be determined by agreement among us and the underwriters, but there can be no assurance that our common shares will not trade below the initial public offering price following the completion of this offering. See **Underwriting**. The market value of our common shares could be substantially affected by general market conditions, including the extent to which a secondary market develops for our common shares following the completion of this offering, the extent of institutional investor interest in us, the general reputation of REITs and the attractiveness of their equity securities in comparison to other equity securities (including securities issued by other real estate-based companies), our financial performance and general stock and bond market conditions.

***We may be unable to make distributions at expected levels, which could result in a decrease in the market price of our common shares.***

Our initial quarterly distributions will be based on the operations of the properties in our initial portfolio and we expect to distribute substantially all of our cash available for distribution from these properties to the holders of our common shares. If sufficient cash is not available for distribution from our operations, we may have to fund distributions from working capital, borrow to provide funds for such distributions, or reduce the amount of such distributions. To the extent we borrow to fund distributions, our future interest costs would increase, thereby reducing our earnings and cash available for distribution from what they otherwise would have been. If cash available for distribution generated by our assets is less than our current estimate, or if such cash available for distribution decreases in future periods from expected levels, our inability to make the expected distributions could result in a decrease in the market price of our common shares. In the event the underwriters' over-allotment option is exercised, pending investment of the proceeds therefrom, our ability to pay such distributions out of cash from our operations may be further materially adversely affected.

All distributions will be made at the discretion of our board of trustees and will be based upon, among other factors, our historical and projected results of operations, financial condition, cash flows and liquidity, maintenance of our REIT qualification and other tax considerations, capital expenditure and other expense obligations, debt covenants, contractual prohibitions or other limitations and applicable law and such other matters as our board of trustees may deem relevant from time to time. We may not be able to make distributions in the future, and our inability to make distributions, or to make distributions at expected levels, could result in a decrease in the market price of our common shares.

***The market price and trading volume of our common shares may be volatile following this offering.***

Even if an active trading market develops for our common shares, the per share trading price of our common shares may be volatile. In addition, the trading volume in our common shares may fluctuate and cause significant

**Table of Contents**

price variations to occur, and investors in our common shares may from time to time experience a decrease in the value of their shares, including decreases unrelated to our operating performance or prospects. If the per share trading price of our common shares declines significantly, you may be unable to resell your shares at or above the public offering price. We cannot assure you that the per share trading price of our common shares will not fluctuate or decline significantly in the future.

Some of the factors that could negatively affect our share price or result in fluctuations in the price or trading volume of our common shares include:

actual or anticipated variations in our quarterly operating results or dividends;

changes in our funds from operations or earnings estimates;

publication of research reports about us or the real estate industry;

increases in market interest rates that lead purchasers of our shares to demand a higher yield;

changes in market valuations of similar companies;

adverse market reaction to any additional debt we incur in the future;

additions or departures of key management personnel;

actions by institutional shareholders;

speculation in the press or investment community;

the realization of any of the other risk factors presented in this prospectus;

the extent of investor interest in our securities;

the general reputation of REITs and the attractiveness of our equity securities in comparison to other equity securities, including securities issued by other real estate-based companies;

our underlying asset value;

investor confidence in the stock and bond markets generally;

## Edgar Filing: Physicians Realty Trust - Form 424B4

changes in tax laws;

future equity issuances;

failure to meet earnings estimates;

failure to meet and maintain REIT qualification;

changes in our credit ratings; and

general market and economic conditions.

In the past, securities class-action litigation has often been instituted against companies following periods of volatility in the price of their common stock. This type of litigation could result in substantial costs and divert our management's attention and resources, which could have a material adverse effect on us, including our financial condition, results of operations, cash flow and the per share trading price of our common shares.

***We may use a portion of the net proceeds from this offering to make distributions to our shareholders, which would, among other things, reduce our cash available to develop or acquire properties and may reduce the returns on your investment in our common shares.***

Prior to the time we have fully invested the net proceeds of this offering, we may fund distributions to our shareholders out of the net proceeds of this offering, which would reduce the amount of cash we have available to acquire properties and may reduce the returns on your investment in our common shares. The use of these net

---

**Table of Contents**

proceeds for distributions to shareholders could adversely affect our financial results. In addition, funding distributions from the net proceeds of this offering may constitute a return of capital to our shareholders, which would have the effect of reducing each shareholder's tax basis in our common shares.

*You will experience immediate and material dilution in connection with the purchase of our common shares in this offering.*

As of March 31, 2013, the aggregate historical combined net tangible book value of our Predecessor was approximately \$12.5 million, or \$4.56 per common share held by the Ziegler Funds, assuming the redemption of all OP units in exchange for our common shares on a one-for-one basis. As a result, the pro forma net tangible book value per common share after the completion of this offering and the formation transactions will be less than the initial public offering price. The purchasers of our common shares offered hereby will experience immediate and substantial dilution of \$2.22 per share in the pro forma net tangible book value per share of our common shares. See "Dilution".

*The combined financial statements of our Predecessor and our unaudited pro forma financial statements may not be representative of our financial statements as an independent public company.*

The combined financial statements of our Predecessor and our unaudited pro forma financial statements that are included in this prospectus do not necessarily reflect what our financial position, results of operations or cash flows would have been had we been an independent entity during the periods presented. Furthermore, this financial information is not necessarily indicative of what our results of operations, financial position or cash flows will be in the future. It is not possible for us to accurately estimate all adjustments that may reflect all the significant changes that will occur in our cost structure, funding and operations as a result of this offering and the formation transactions, including potential increased costs associated with reduced economies of scale and increased costs associated with being an independent publicly traded company. See "Summary Selected Financial and Other Data" and the combined financial statements of our predecessor and our unaudited pro forma financial statements, as well as "Management's Discussion and Analysis of Financial Condition and Results of Operations," appearing elsewhere in this prospectus.

*Increases in market interest rates may have an adverse effect on the trading prices of our common shares as prospective purchasers of our common shares may expect a higher dividend yield and as an increased cost of borrowing may decrease our funds available for distribution.*

One of the factors that will influence the trading prices of our common shares will be the dividend yield on the common shares (as a percentage of the price of our common shares) relative to market interest rates. An increase in market interest rates, which are currently at low levels relative to historical rates, may lead prospective purchasers of our common shares to expect a higher dividend yield (with a resulting decline in the trading prices of our common shares) and higher interest rates would likely increase our borrowing costs and potentially decrease funds available for distribution. Thus, higher market interest rates could cause the market price of our common shares to decrease.

*The number of our common shares available for future issuance or sale could materially adversely affect the per share trading price of our common shares.*

We are offering 10,434,782 common shares as described in this prospectus. Upon completion of this offering and the formation transactions, we will have outstanding approximately 10,684,782 common shares. Of these shares, the shares sold in this offering will be freely tradable, except for any shares purchased in this offering by our affiliates, as that term is defined by Rule 144 under the Securities Act. Upon completion of this offering and the formation transactions, the Ziegler Funds, will beneficially own OP units which will be redeemable at the option of the holders beginning approximately one year following completion of this offering, for cash, or at our option, for common shares, on a one-for-one basis. We have agreed to register the shares issuable upon redemption of the OP units so that such shares will be freely tradable under the securities laws.

## **Table of Contents**

We cannot predict whether future issuances or sales of our common shares or the availability of shares for resale in the open market will decrease the per share trading price of our common shares. The per share trading price of our common shares may decline significantly when the restrictions on resale by certain of our shareholders lapse or when the OP units become redeemable.

*Our issuance of equity securities, including OP units, or the perception that such issuances might occur could materially adversely affect us, including the per share trading price of our common shares.*

The exercise of the underwriters' overallotment option, the redemption of OP units for common shares, the vesting of any restricted shares granted to certain trustees, executive officers and other employees under our 2013 Equity Incentive Plan, the issuance of our common shares or OP units in connection with future property, portfolio or business acquisitions and other issuances of our common shares could have an adverse effect on the per share trading price of our common shares, and the existence of units, options or our common shares issuable under our 2013 Equity Incentive Plan or upon redemption of OP units may adversely affect the terms upon which we may be able to obtain additional capital through the sale of equity securities. In addition, future issuances of our common shares may be dilutive to existing shareholders.

*Future offerings of debt, which would be senior to our common shares upon liquidation, or preferred equity securities which may be senior to our common shares for purposes of dividend distributions or upon liquidation, may materially adversely affect us, including the per share trading price of our common shares.*

In the future, we may attempt to increase our capital resources by making additional offerings of debt or equity securities (or causing our operating partnership to issue debt securities), including medium-term notes, senior or subordinated notes and classes or series of preferred shares. Upon liquidation, holders of our debt securities and preferred shares and lenders with respect to other borrowings will be entitled to receive our available assets prior to distribution to the holders of our common shares. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common shares and may result in dilution to owners of our common shares. Holders of our common shares are not entitled to preemptive rights or other protections against dilution. Our preferred shares, if issued, could have a preference on liquidating distributions or a preference on dividend payments that could limit our ability to pay dividends or other distributions to the holders of our common shares. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, our shareholders bear the risk that our future offerings could reduce the per share trading price of our common shares and dilute their interest in us.

*If securities analysts do not publish research or reports about our industry or if they downgrade our common shares or the healthcare-related real estate sector, the price of our common shares could decline.*

The trading market for our common shares will rely in part upon the research and reports that industry or financial analysts publish about us or our industry. We have no control over these analysts. Furthermore, if one or more of the analysts who do cover us downgrades our shares or our industry, or the stock of any of our competitors, the price of our common shares could decline. If one or more of these analysts ceases coverage of our company, we could lose attention in the market which in turn could cause the price of our common shares to decline.

**Table of Contents**

**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

We make statements in this prospectus that are forward-looking statements within the meaning of the federal securities laws. In particular, statements pertaining to our capital resources, property performance and results of operations contain forward-looking statements. Likewise, our pro forma financial statements and all of our statements regarding anticipated growth in our funds from operations and anticipated market conditions, demographics and results of operations are forward-looking statements. You can identify forward-looking statements by the use of forward-looking terminology such as believes, expects, may, will, should, seeks, approximately, intends, plans, pro forma, anticipates or the negative of these words and phrases or similar words or phrases which are predictions of or indicate future events or trends and which do not relate solely to historical matters. You can also identify forward-looking statements by discussions of strategy, plans or intentions.

Forward-looking statements involve numerous risks and uncertainties and you should not rely on them as predictions of future events. Forward-looking statements depend on assumptions, data or methods which may be incorrect or imprecise and we may not be able to realize them. We do not guarantee that the transactions and events described will happen as described (or that they will happen at all). The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements:

general economic conditions;

adverse economic or real estate developments, either nationally or in the markets in which our properties are located;

our failure to generate sufficient cash flows to service our outstanding indebtedness;

fluctuations in interest rates and increased operating costs;

the availability, terms and deployment of debt and equity capital, including our anticipated credit facility;

our ability to make distributions on our shares of beneficial interest;

general volatility of the market price of our common shares;

our lack of operating history;

changes in our business or strategy;

our dependence upon key personnel whose continued service is not guaranteed;

our ability to identify, hire and retain highly qualified personnel in the future;

the degree and nature of our competition;

changes in governmental regulations, tax rates and similar matters;

defaults on or non-renewal of leases by tenants;

decreased rental rates or increased vacancy rates;

difficulties in identifying healthcare properties to acquire and completing acquisitions;

competition for investment opportunities;

our failure to successfully develop, integrate and operate acquired properties and operations;

the impact of our investment in joint ventures;

the financial condition and liquidity of, or disputes with, joint venture and development partners;

**Table of Contents**

our ability to operate as a public company;

changes in GAAP;

lack of or insufficient amounts of insurance;

other factors affecting the real estate industry generally;

our failure to qualify and maintain our qualification as a REIT for U.S. federal income tax purposes;

limitations imposed on our business and our ability to satisfy complex rules in order for us to qualify as a REIT for U.S. federal income tax purposes; and

changes in governmental regulations or interpretations thereof, such as real estate and zoning laws and increases in real property tax rates and taxation of REITs.

While forward-looking statements reflect our good faith beliefs, they are not guarantees of future performance. We disclaim any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes after the date of this prospectus, except as required by applicable law. You should not place undue reliance on any forward-looking statements that are based on information currently available to us or the third parties making the forward-looking statements. For a further discussion of these and other factors that could impact our future results, performance or transactions, see the section below entitled Risk Factors.

**Table of Contents****USE OF PROCEEDS**

After deducting the underwriting discount and commissions and estimated expenses of this offering payable by us, including approximately \$1 million that we will reimburse to one of the Ziegler Funds for organizational, legal, accounting and similar expenses in connection with this offering and the formation transactions, we expect to receive net proceeds from this offering of approximately \$109.8 million, or approximately \$128.3 million if the underwriters' overallotment option is exercised in full. All references to LIBOR below refer to the London Interbank Offered Rate.

We intend to contribute the net proceeds of this offering to our operating partnership in exchange for OP units in our operating partnership, and our operating partnership intends use the net proceeds received from us as described below:

approximately \$36.9 million to repay anticipated outstanding indebtedness on ten of the properties in our initial portfolio as described in the table below, including accrued interest;

Property	Amount to be Repaid <sup>(1)</sup> (in thousands)	Interest Rate	Maturity Date
Arrowhead Commons	\$ 2,237	LIBOR + 3.25%	10/25/13
Austell Medical Office Building	\$ 1,618	6.25%	07/10/13
Decatur Medical Office Building	\$ 2,377	LIBOR + 3.25%	10/25/13
El Paso Medical Office Building	\$ 2,136	LIBOR + 3.25%	10/25/13
Farmington Professional Pavilion	\$ 854	LIBOR + 3.25%	10/25/13
Ingham Medical Center	\$ 2,330	LIBOR + 1.60%	07/26/13
New Albany Professional Building	\$ 2,158	LIBOR + 2.40%	02/01/18
Northpark Trail	\$ 1,108	LIBOR + 3.25%	10/25/13
Summerfield Square	\$ 455	4.25%	03/18/12
Summit Healthplex (Senior Debt)	\$ 17,225	LIBOR + 3.05%	07/01/13
Summit Healthplex (Mezzanine Debt)	\$ 4,400	12.00%	07/03/13
<b>Total</b>	<b>\$ 36,898</b>		

(1) Repayment amount based on estimated principal amount to be outstanding upon closing of this offering.

approximately \$900,000 to pay transfer fees and other costs for certain debt secured by certain of the properties in our initial portfolio that we will assume as part of the formation transactions and to pay certain fees related to our anticipated credit facility;

approximately \$850,000 to purchase the 50.0% joint venture equity interest in the Arrowhead Commons property not owned by the Ziegler Funds, resulting in our 100.0% ownership of this property; and

the balance for general corporate and working capital purposes, including payment of expenses associated with our formation transactions and possible future acquisitions and development activities.

Pending application of net proceeds of this offering, we intend to invest the net proceeds in interest-bearing accounts, money market accounts and interest-bearing securities in a manner that is consistent with our intention to qualify for taxation as a REIT. Such investments may include, for example, government and government agency certificates, government bonds, certificates of deposit, interest-bearing bank deposits, money market accounts and mortgage loan participations.

## Edgar Filing: Physicians Realty Trust - Form 424B4

See our pro forma financial statements elsewhere in this prospectus for additional information regarding the use of proceeds.

---

**Table of Contents**

**DISTRIBUTION POLICY**

We intend to make regular quarterly distributions to our common shareholders following completion of the offering. We intend to distribute at least 90% of our taxable income each year (subject to certain adjustments as described below) to our shareholders in order to qualify as a REIT under the Code and generally expect to distribute 100% of our REIT taxable income so as to avoid the excise tax on undistributed REIT taxable income.

Distributions made by us will be authorized and determined by our board of trustees in its sole discretion out of funds legally available therefor. Our initial quarterly distributions will be based upon the operations of the properties in our initial portfolio and we expect to distribute substantially all of our cash available for distribution from these properties following completion of the offering. As we deploy the proceeds from the offering and other financings into the acquisition of additional properties that meet our investment criteria, we expect that our board of trustees, in authorizing and determining the amounts of distributions, will consider a variety of factors, including:

actual results of operations and our cash available for distribution;

the timing of the investment of the net proceeds of this offering;

debt service requirements and any restrictive covenants in our loan agreements;

capital expenditure requirements for our properties;

our taxable income;

the annual distribution requirement under the REIT provisions of the Code;

our operating expenses; and

other factors that our board of trustees may deem relevant.

We anticipate that, at least initially, our distributions will exceed our then current and accumulated earnings and profits as determined for U.S. federal income tax primarily due to depreciation and amortization that we expect to incur. Therefore, a portion of these distributions may represent a return of capital for federal income tax purposes. Distributions in excess of our current and accumulated earnings and profits and not treated by us as a distribution will not be taxable to a taxable U.S. shareholder under current U.S. federal income tax law to the extent those distributions do not exceed the shareholder's adjusted tax basis in his or her common shares, but rather will reduce the adjusted basis of the common shares. Therefore, the gain (or loss) recognized on the sale of the common shares or upon our liquidation will be increased (or decreased) accordingly. To the extent those distributions exceed a taxable U.S. shareholder's adjusted tax basis in his or her common shares, they generally will be treated as a capital gain realized from the taxable disposition of those shares. The percentage of our shareholder distributions that exceeds our current and accumulated earnings and profits may vary substantially from year to year. For a more complete discussion of the tax treatment of distributions to holders of our common shares, see [Material U.S. Federal Income Tax Considerations](#).

Our actual results of operations will be affected by a number of factors, including the revenue we receive from our properties, our operating expenses, interest expense, the ability of our tenants to meet their obligations and unanticipated expenditures. For more information regarding risk factors that could materially adversely affect our actual results of operations, please see [Risk Factors](#).

Although we have no current intention to do so, we may in the future also choose to pay distributions in the form of our own shares. See [Material U.S. Federal Income Tax Considerations](#) [Distribution Requirements](#) and [Risk Factors](#) [Risks Related to Our Qualification and Operation](#)

## Edgar Filing: Physicians Realty Trust - Form 424B4

as a REIT We may pay taxable dividends in our common shares and cash, in which case shareholders may sell our common shares to pay tax on such dividends, placing downward pressure on the market price of our common shares.

**Table of Contents**

**CAPITALIZATION**

The following table sets forth (i) our historical capitalization, (ii) our Predecessor's historical capitalization and (iii) our unaudited pro forma capitalization on an as adjusted basis to give effect to our formation transactions, this offering and the use of net proceeds as set forth in Use of Proceeds. You should read this table in conjunction with Use of Proceeds, Selected Financial Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes appearing elsewhere in this prospectus.

	As of March 31, 2013		
	Historical	Predecessor	Pro Forma As Adjusted
	(In thousands, except share amounts)		
Mortgages and other secured loans <sup>(1)</sup>		\$ 84,261	\$ 47,122
Non-controlling interest in Operating Partnership
