Letter to shareholders

Dear Shareholder,

We thank you for your investment in Western Asset/Claymore Inflation-Linked Opportunities & Income Fund. As investment adviser for the Fund, we are pleased to submit the Fund's annual shareholder report for the twelve-month reporting period ended December 31, 2013.

For the twelve-month period ended December 31, 2013, the Fund returned -8.74% based on its net asset value (NAV) and -11.77% based on its New York Stock Exchange (NYSE) market price per share. The Fund's unmanaged benchmarks, the Barclays U.S. Government Inflation-Linked 1-10 Year Indexⁱⁱ and the Barclays U.S. Government Inflation-Linked All Maturities Indexⁱⁱⁱ, returned -5.59% and -9.26%, respectively, for the same period. All Fund returns cited—whether based on NAV or market price—assume the reinvestment of all distributions. Past performance does not guarantee future results. The market price of the Fund's shares fluctuates from time to time, and it may be higher or lower than the Fund's NAV.

The largest contributor to the Fund's absolute performance during the reporting period was our exposures to non-inflation-protected securities, as they substantially outperformed U.S. Treasury Inflation Protected Securities (TIPS^{iv}) during the first half of the year. We held a range of securities, including investment grade and high-yield corporate bonds and emerging market debt. Together with nominal U.S. Treasuries, they contributed to absolute performance for portions of the reporting period.

The Fund's allocation to non-agency mortgage-backed securities was also beneficial. They were supported by attractive yields, continued principal paydowns and signs of improvement in the housing market.

As of December 31, 2013, the Fund's market price of \$11.27 per share represented a discount of 14.88% to its NAV of \$13.24 per share. In each month of 2013, the Fund provided its investors with a distribution of \$0.0335 per share. The most recent distribution represents an annualized distribution rate of 3.57% based on the Fund's last closing market price of \$11.27 as of December 31, 2013.

The Fund's investment objective is to provide current income. Capital appreciation, when consistent with current income, is a

secondary objective. Under the Fund's investment policies, under normal market conditions and at the time of purchase, the Fund will invest:

At least 80% of its total managed assets^y in inflation-linked securities

No more than 40% of its total managed assets in below investment grade securities

Up to 100% of its total managed assets in non-U.S. dollar investments, which gives the Fund the flexibility to invest up to 100% of its total assets in non-U.S. dollar inflation-linked securities (up to 100% of its non-U.S. dollar exposure may be unhedged)

Each of the foregoing policies is a non-fundamental policy that may be changed without shareholder approval. The Fund has also adopted the following non-fundamental policy, which, to the extent required by applicable law, may only be changed after notice to shareholders: under normal market conditions, the Fund will invest at least 80% of its total managed assets in inflation-protected securities and non-inflation-protected securities and instruments with the potential to enhance the Fund's income. The Fund will not invest in bonds that are below investment grade quality at the time of purchase. Up to 20% of the Fund's portfolio securities may represent corporate debt securities of investment grade quality at the time of their purchase that are not inflation-linked securities. To the extent permitted by the foregoing policies, the Fund may invest in emerging market debt securities. Reverse repurchase agreements and other forms of leverage will not exceed 38% of the Fund's total managed assets. The Fund currently expects that the average effective duration^h of its portfolio will range between zero and fifteen years, although this target duration may change from time to time. The Fund may enter into credit default swap contracts for investment purposes, to manage its credit risk or to add leverage.

Shareholders have the opportunity to reinvest their dividends from the Fund through the Dividend Reinvestment Plan (DRIP), which is described in detail on page 47 of this report. In general, if shares are trading at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the monthly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund's common shares is at a premium above NAV, the DRIP reinvests participants' dividends in newly-issued common shares at NAV, subject to an IRS limitation that the purchase price cannot be more than 5% below the market price per share. The DRIP provides a cost-effective means to accumulate additional shares.

We appreciate your investment and look forward to serving your investment needs in the future. For the most up-to-date information on your investment, please visit the Fund's website at guggenheiminvestments.com/wiw.

Sincerely,

Guggenheim Funds Investment Advisors, LLC

January 31, 2014

Letter to shareholders (cont d)

- ⁱ Net asset value (NAV) is calculated by subtracting total liabilities, including liabilities associated with financial leverage (if any) from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund's market price as determined by supply of and demand for the Fund's shares.

- ⁱⁱ The Barclays U.S. Government Inflation-Linked 1-10 Year Index measures the performance of the intermediate U.S. TIPS market.

- ⁱⁱⁱ The Barclays U.S. Government Inflation-Linked All Maturities Index measures the performance of the U.S. TIPS market. The Index includes TIPS with one or more years remaining maturity with total outstanding issue size of \$500 million or more.

- ^{iv} U.S. Treasury Inflation Protected Securities (TIPS) are inflation-indexed securities issued by the U.S. Treasury in five-year, ten-year and twenty-year maturities. The principal is adjusted to the Consumer Price Index, the commonly used measure of inflation. The coupon rate is constant, but generates a different amount of interest when multiplied by the inflation-adjusted principal.

- ^v Total managed assets equals the total assets of the Fund (including any assets attributable to leverage) minus accrued liabilities (other than liabilities representing leverage).

- ^{vi} Effective duration measures the expected sensitivity of market price to changes in interest rates, taking into account the effects of structural complexities. (For example, some bonds can be prepaid by the issuer.)

IV Western Asset/Claymore Inflation-Linked Opportunities & Income Fund

Investment commentary

Economic review

The U.S. economy continued to grow over the twelve months ended December 31, 2013 (the reporting period). Looking back, U.S. gross domestic product (GDP) growth, as reported by the U.S. Department of Commerce, was 1.1% during the first quarter of 2013. The economic expansion then accelerated, as GDP growth was 2.5% during the second quarter. This was partially due to increases in exports and non-residential fixed investments, along with a smaller decline in federal government spending versus the previous quarter. The economy gained further momentum during the third quarter, with GDP growth of 4.1%, its best reading since the fourth quarter of 2011. Stronger growth was driven, in part, by an increase in private inventory investment, a deceleration in imports and accelerating state and local government spending. The U.S. Department of Commerce's initial reading for fourth quarter 2013 GDP growth, released after the reporting period ended, was 3.2%. Slower growth was due to several factors, including a deceleration in private inventory investment, declining federal government spending and less residential fixed investments.

The U.S. job market improved during the reporting period, although unemployment remained elevated from a historical perspective. When the period began, unemployment, as reported by the U.S. Department of Labor, was 7.9%. Unemployment fell to 7.7% in February 2013 and generally edged lower over the remainder of the period, falling to 6.7% in December. This represented the lowest level since October 2008. However, falling unemployment during the period was partially due to a decline in the workforce participation rate, which was 62.8% in December, its lowest level since 1978. In addition, the number of longer-term unemployed continues to be high, as roughly 37.7% of the 10.4 million Americans looking for work in December 2013 had been out of work for more than six months.

While sales of existing-homes declined at times throughout the reporting period given rising mortgage rates, they moved higher at the end of the year. According to the National Association of Realtors (NAR), existing-home sales rose 1.0% on a seasonally adjusted basis in December 2013 versus the previous month, although they were 0.6% lower than in December 2012. However, existing homes sales in 2013 were 9.1% higher than the previous year and 2013's sales were the strongest since 2006. In addition, the NAR reported that the median existing-home price for all housing types was \$198,100 in December 2013, up 9.9% from December 2012. The inventory of homes available for sale in December 2013 was 11% lower than the previous month at a 4.6 month supply at the current sales pace but 1.6% higher than in December 2012.

The manufacturing sector expanded during the majority of the reporting period, although it experienced a temporary soft patch. Based on the Institute for Supply Management's Purchasing Managers' Index (PMI), manufacturing expanded during the first four months of the reporting period. It then contracted in May 2013, with a PMI of 49.0 (a reading below 50 indicates a contraction, whereas a reading above 50 indicates an expansion). This represented the PMI's lowest reading since June 2009. However, the contraction was a short-term setback, as the PMI rose over the next seven months and peaked at 57.3 in November,

Investment commentary (cont d)

the best reading since April 2011. The PMI then moderated somewhat in December 2013, edging back to a still strong 57.0.

The Federal Reserve Board (Fedⁱ) took a number of actions as it sought to meet its dual mandate of fostering maximum employment and price stability. As has been the case since December 2008, the Fed kept the federal funds rate^{iv} at a historically low range between zero and 0.25%. At its meeting in December 2012, the Fed announced that it would continue purchasing \$40 billion per month of agency mortgage-backed securities (MBS), as well as initially purchasing \$45 billion per month of longer-term Treasuries. At its meeting that ended on June 19, 2013, the Fed did not make any material changes to its official policy statement. However, in a press conference following the meeting, Fed Chairman Bernanke said the Committee currently anticipates that it would be appropriate to moderate the monthly pace of purchases later this year. In a surprise to many investors, at its meeting that ended on September 18, 2013, the Fed did not taper its asset purchase program and said that it decided to await more evidence that progress will be sustained before adjusting the pace of its purchases. At its meeting that concluded on December 18, 2013, the Fed announced that it would begin reducing its monthly asset purchases, saying Beginning in January 2014, the Committee will add to its holdings of agency mortgage-backed securities at a pace of \$35 billion per month rather than \$40 billion per month, and will add to its holdings of longer-term Treasury securities at a pace of \$40 billion per month rather than \$45 billion per month. At the Fed's meeting that concluded on January 29, 2014, after the reporting period ended, it announced that in February 2014 it would further taper its asset purchases, to a total of \$65 billion a month (\$30 billion per month of agency mortgage-backed securities and \$35 billion per month of longer-term Treasury securities).

As always, thank you for your confidence in our stewardship of your assets.

Sincerely,

Western Asset Management Company

January 31, 2014

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results.

ⁱ Gross domestic product (GDP) is the market value of all final goods and services produced within a country in a given period of time.

ⁱⁱ The Institute for Supply Management's PMI is based on a survey of purchasing executives who buy the raw materials for manufacturing at more than 350 companies. It offers an early reading on the health of the manufacturing sector.

ⁱⁱⁱ The Federal Reserve Board (Fed) is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.

^{iv} The federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day.

Fund overview

Q. What is the Fund's investment strategy?

A. The Fund's investment objective is to provide current income. Capital appreciation, when consistent with current income, is a secondary investment objective. Under normal market conditions and at the time of purchase, the Fund will invest at least 80% of its total managed assetsⁱ in inflation-linked securities. The Fund may also invest up to 40% of its total managed assets in below investment grade securities. The Fund may invest up to 100% of its total managed assets in non-U.S. dollar investments which gives the Fund flexibility to invest up to 100% of its total managed assets in non-U.S. dollar inflation-linked securities (up to 100% of its non-U.S. dollar exposure may be unhedged). The Fund currently expects that the average effective durationⁱⁱ of its portfolio will range between zero and fifteen years, although this target duration may change from time to time. There can be no assurance that the Fund will achieve its investment objectives.

At Western Asset Management Company (Western Asset), the Fund's investment adviser, we utilize a fixed-income team approach, with decisions derived from interaction among various investment management sector specialists. The sector teams are comprised of Western Asset's senior portfolio management personnel, research analysts and an in-house economist. Under this team approach, management of client fixed-income portfolios will reflect a consensus of interdisciplinary views within the Western Asset organization.

Q. What were the overall market conditions during the Fund's reporting period?

A. The spread sectors (non-Treasuries) experienced several periods of heightened risk aversion but largely outperformed equal-durationⁱⁱⁱ Treasuries over the twelve months ended December 31, 2013. However, most spread sectors posted negative absolute returns during the reporting period. Risk aversion was prevalent at times given mixed economic data, geopolitical issues, signs of shifting monetary policy by the Federal Reserve Board (Fed^v) and the U.S. government's sixteen-day partial shutdown which ended on October 16, 2013. The uncertainty created by the Fed's policy shift during the summer was particularly painful for U.S. Treasury Inflation Protected Securities (TIPS^{iv}) investors and the market was amongst the worst performers for the year as a whole.

Both short- and long-term Treasury yields moved higher during the twelve months ended December 31, 2013. Two-year Treasury yields rose from 0.25% at the beginning of the period to 0.38% at the end of the period. Their peak of 0.52% occurred on September 5, 2013 and they were as low as 0.20% in late April and early May 2013. Ten-year Treasury yields were 1.78% at the beginning of the period and reached a low of 1.66% in early May 2013. Their peak of 3.04% occurred on December 31, 2013, as fixed-income investors reacted negatively to the Fed's announcement that it would start tapering its asset purchase program. This was the highest level for the ten-year Treasury since July 2011. All told, the Barclays U.S. Aggregate Index^{vi} returned -2.02% for the twelve months ended December 31, 2013, its first calendar year decline since 1999.

Inflation was generally well contained during the reporting period. For the twelve months ended December 31, 2013, the seasonally unadjusted rate of inflation, as

Fund overview (cont d)

measured by the Consumer Price Index for All Urban Consumers (CPI-Uⁱⁱ) was 1.5%. The CPI-U less food and energy was 1.7% over the same time frame. Given benign inflation and sharply rising interest rates, U.S. TIPS generated very weak results. During the twelve months ended December 31, 2013, the Barclays U.S. TIPS Index^{viii} returned -8.61%.

Q. How did we respond to these changing market conditions?

A. A number of adjustments were made to the Fund during the reporting period. We decreased our allocation to investment grade corporate bonds and the Fund's cash position. We also eliminated the Fund's exposure to high-yield corporate bonds. In contrast, we increased the Fund's allocation to U.S. TIPS as their yields rose, finding value in a range of maturities through the second half of the year. We also modestly increased the Fund's allocations to emerging market debt and non-agency mortgage-backed securities (MBS).

The Fund employed U.S Treasury futures and options on U.S Treasury futures, as well as Euro-Bund futures and options on Euro-Bund futures to manage its yield curve^{ix} positioning and duration. The use of these instruments contributed to performance. Credit default swaps were used to manage our credit exposure. The use of these instruments detracted from performance. Currency forwards, which were utilized to manage our currency exposures, were also additive for results.

Finally, as real yields rose sharply and remained high, we began to introduce leverage into the portfolio during the fourth quarter of 2013. We ended the period with leverage as a percentage of gross assets of roughly 19%.

Performance review

For the twelve months ended December 31, 2013, Western Asset/Claymore Inflation-Linked Opportunities & Income Fund returned -8.74% based on its net asset value (NAV) and -11.77% based on its New York Stock Exchange (NYSE) market price per share. The Fund's unmanaged benchmarks, the Barclays U.S. Government Inflation-Linked 1-10 Year Index^{xi} and the Barclays U.S. Government Inflation-Linked All Maturities Index^{xii}, returned -5.59% and -9.26%, respectively, for the same period. The Barclays World Government Inflation-Linked All Maturities Index^{xiii} and the Fund's Custom Benchmark^{iv} returned -4.84% and -8.85%, respectively, over the same time frame.

During the twelve-month period, the Fund made distributions to shareholders totaling \$0.40 per share*. The performance table shows the Fund's twelve-month total return based on its NAV and market price as of December 31, 2013. **Past performance is no guarantee of future results.**

Performance Snapshot as of December 31, 2013

Price Per Share	12-Month
\$13.24 (NAV)	Total Return**
\$11.27 (Market Price)	-8.74%
	-11.77%

All figures represent past performance and are not a guarantee of future results.

**** Total returns are based on changes in NAV or market price, respectively. Returns reflect the deduction of all Fund expenses, including management fees, operating**

* Distributions paid by the Fund may be comprised of income, capital gains and/or return of capital. For the character of distributions paid during the fiscal year ended December 31, 2013, please refer to page 19 of this report.

expenses, and other Fund expenses. Returns do not reflect the deduction of brokerage commissions or taxes that investors may pay on distributions or the sale of shares.

Total return assumes the reinvestment of all distributions, at NAV.

Total return assumes the reinvestment of all distributions in additional shares in accordance with the Fund's Dividend Reinvestment Plan.

Q. What were the leading contributors to performance?

A. The largest contributor to the Fund's absolute performance during the reporting period was our exposures to non-inflation-protected securities, as they substantially outperformed U.S. TIPS during the first half of the year. We held a range of securities, including investment grade and high-yield corporate bonds and emerging market debt. Together with nominal U.S. Treasuries, they contributed to absolute performance for portions of the reporting period.

The Fund's allocation to non-agency MBS was also beneficial. They were supported by attractive yields, continued principal paydowns and signs of improvement in the housing market.

Q. What were the leading detractors from performance?

A. The largest detractor from the Fund's absolute performance for the period was its allocation to TIPS. They performed poorly given sharply rising bond yields, benign inflation and weak demand in the face of benign inflation. Given the inflation protection objective of the Fund, it will always hold significant exposure to U.S. TIPS. However, given our dislike of the level of real yields at the beginning of the year, our defensive exposure somewhat offset the weak results from our U.S. TIPS.

Elsewhere, several government-related bonds were a drag on the Fund's performance, including its allocations to sovereigns issued by the Republic of Turkey, Brazil and Peru.

Thank you for your investment in Western Asset/Claymore Inflation-Linked Opportunities & Income Fund. As always, we appreciate that you have chosen us to manage your assets and we remain focused on achieving the Fund's investment goals.

Sincerely,

Western Asset Management Company

January 24, 2014

***RISKS:** Bonds are subject to a variety of risks, including interest rate, credit and inflation risks. As interest rates rise, bond prices fall, reducing the value of a fixed-income investment's price. The Fund is subject to the additional risks associated with inflation-protected securities, including liquidity risk, prepayment risk, extension risk and deflation risk. Investments in foreign companies, including emerging markets, involve risks beyond those inherent solely in domestic investments. Leverage may cause a fund to be more volatile than if the fund had not been leveraged, which may increase the risk of investment loss. To the extent that the Fund invests in asset-backed, mortgage-backed or mortgage-related securities, its exposure to prepayment and extension risks may be greater than investments in other fixed-income securities. International investments are subject to currency fluctuations as well as social, economic and political risks. These risks are magnified in emerging markets.*

Fund overview (cont d)

Portfolio holdings and breakdowns are as of December 31, 2013 and are subject to change and may not be representative of the portfolio managers' current or future investments. Please refer to pages 9 through 15 for a list and percentage breakdown of the Fund's holdings.

The mention of sector breakdowns is for informational purposes only and should not be construed as a recommendation to purchase or sell any securities. The information provided regarding such sectors is not a sufficient basis upon which to make an investment decision. Investors seeking financial advice regarding the appropriateness of investing in any securities or investment strategies discussed should consult their financial professional. The Fund's top five sector holdings (as a percentage of net assets) as of December 31, 2013 were: U.S. Treasury Inflation Protected Securities (96.6%), Corporate Bonds & Notes (14.9%), Sovereign Bonds (8.6%), Collateralized Mortgage Obligations (1.3%) and Non-U.S. Treasury Inflation Protected Securities (1.2%). The Fund's portfolio composition is subject to change at any time.

All investments are subject to risk including the possible loss of principal. Past performance is no guarantee of future results. All index performance reflects no deduction for fees, expenses or taxes. Please note that an investor cannot invest directly in an index.

The information provided is not intended to be a forecast of future events, a guarantee of future results or investment advice. Views expressed may differ from those of the firm as a whole.

- ⁱ Total managed assets equals the total assets of the Fund (including any assets attributable to leverage) minus accrued liabilities (other than liabilities representing leverage).
- ⁱⁱ Effective duration measures the expected sensitivity of market price to changes in interest rates, taking into account the effects of structural complexities. (For example, some bonds can be prepaid by the issuer.)
- ⁱⁱⁱ Duration is the measure of the price sensitivity of a fixed-income security to an interest rate change of 100 basis points. Calculation is based on the weighted average of the present values for all cash flows.
- ^{iv} The Federal Reserve Board (Fed) is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices, and a sustainable pattern of international trade and payments.
- ^v U.S. Treasury Inflation Protected Securities (TIPS) are inflation-indexed securities issued by the U.S. Treasury in five-year, ten-year and twenty-year maturities. The principal is adjusted to the Consumer Price Index, the commonly used measure of inflation. The coupon rate is constant, but generates a different amount of interest when multiplied by the inflation-adjusted principal.
- ^{vi} The Barclays U.S. Aggregate Index is a broad-based bond index comprised of government, corporate, mortgage- and asset-backed issues, rated investment grade or higher, and having at least one year to maturity.
- ^{vii} The Consumer Price Index for All Urban Consumers (CPI-U) is a measure of the average change in prices over time of goods and services purchased by households, which covers approximately 87% of the total population and includes, in addition to wage earners and clerical worker households, groups such as professional, managerial and technical workers, the self-employed, short-term workers, the unemployed and retirees and others not in the labor force.
- ^{viii} The Barclays U.S. TIPS Index represents an unmanaged market index made up of U.S. Treasury Inflation-Linked Index securities.
- ^{ix} The yield curve is the graphical depiction of the relationship between the yield on bonds of the same credit quality but different maturities.
- ^x Net asset value (NAV) is calculated by subtracting total liabilities and outstanding preferred stock (if any) from the closing value of all securities held by the Fund (plus all other assets) and dividing the result (total investments) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund's market price as determined by supply of and demand for the Fund's shares.
- ^{xi} The Barclays U.S. Government Inflation-Linked 1-10 Year Index measures the performance of the intermediate U.S. TIPS market.
- ^{xii} The Barclays U.S. Government Inflation-Linked All Maturities Index measures the performance of the U.S. TIPS market. The Index includes TIPS with one or more years remaining maturity with total outstanding issue size of \$500 million or more.
- ^{xiii} The Barclays World Government Inflation-Linked All Maturities Index measures the performance of the major government inflation-linked bond markets.
- ^{xiv} The Custom Benchmark is comprised of 90% Barclays U.S. Government Inflation-Linked All Maturities Index, 5% Barclays U.S. Credit Index and 5% JPMorgan Emerging Markets Bond Index Plus (EMBI+). The Barclays U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are investment grade (rated Baa3/BBB- or higher). The EMBI+ is a total return index that tracks the traded market for U.S. dollar-denominated Brady and other similar sovereign restructured bonds traded in the emerging markets.

Fund at a glance (unaudited)

Investment breakdown (%) as a percent of total investments

The bar graph above represents the composition of the Fund's investments as of December 31, 2013 and December 31, 2012 and does not include derivatives such as written options, forward foreign currency contracts, futures contracts and swap contracts. The Fund is actively managed. As a result, the composition of the Fund's investments is subject to change at any time.
Represents less than 0.1%.

Spread duration (unaudited)

Economic exposure December 31, 2013

Spread duration measures the sensitivity to changes in spreads. The spread over Treasuries is the annual risk-premium demanded by investors to hold non-Treasury securities. Spread duration is quantified as the % change in price resulting from a 100 basis points change in spreads. For a security with positive spread duration, an increase in spreads would result in a price decline and a decline in spreads would result in a price increase. This chart highlights the market sector exposure of the Fund's sectors relative to the selected benchmark sectors as of the end of the reporting period.

Effective duration (unaudited)

Interest rate exposure December 31, 2013

Effective duration measures the sensitivity to changes in relevant interest rates. Effective duration is quantified as the % change in price resulting from a 100 basis points change in interest rates. For a security with positive effective duration, an increase in interest rates would result in a price decline and a decline in interest rates would result in a price increase. This chart highlights the interest rate exposure of the Fund's sectors relative to the selected benchmark sectors as of the end of the reporting period.

Purchased Options 0.0%				
U.S. Treasury 10-Year Notes Futures, Put @ \$122.50 (Cost \$162,269)		1/24/14	429	160,875
Total Investments 122.7% (Cost \$1,013,610,277#)				993,978,860
Liabilities in Excess of Other Assets (22.7%)				(183,749,750)
Total Net Assets 100.0%				\$ 810,229,110

Face amount denominated in U.S. dollars, unless otherwise noted.

(a) All or a portion of this security is held by the counterparty as collateral for open reverse repurchase agreements.

(b) Variable rate security. Interest rate disclosed is as of the most recent information available.

(c) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to guidelines approved by the Board of Trustees, unless otherwise noted.

(d) Security has no maturity date. The date shown represents the next call date.

(e) Payment-in-kind security for which the issuer has the option at each interest payment date of making interest payments in cash or additional debt securities.

Aggregate cost for federal income tax purposes is \$1,018,126,363.

Net investment income ¹	0.16	0.28	0.51	0.36	0.40
Net realized and unrealized gain (loss)	(1.45)	0.76	1.01	0.45	1.65
Total income (loss) from operations	(1.29)	1.04	1.52	0.81	2.05
Less distributions from:					
Net investment income	(0.16)	(0.32)	(0.53)	(0.41)	(0.44)
Net realized gains	(0.24)	(0.05)			
Return of capital				(0.07)	(0.06)
Total distributions	(0.40)	(0.37)	(0.53)	(0.48)	(0.50)
Net asset value, end of year	\$13.24	\$14.93	\$14.26	\$13.27	\$12.94
Market price, end of year	\$11.27	\$13.20	\$12.61	\$12.53	\$12.04
Total return, based on NAV^{2,3}	(8.74)%	7.35%	11.61%	6.30%	18.40%
Total return, based on Market Price⁴	(11.77)%	7.64%	4.90%	8.12%	19.91%
Net assets, end of year (000s)	\$810,229	\$913,241	\$872,639	\$811,717	\$791,708
Ratios to average net assets:⁵					
Gross expenses	0.75%	0.69%	0.68%	0.75%	0.95%
Net expenses ⁶	0.75	0.69	0.68	0.75	0.95
Net investment income	1.11	1.92	3.70	2.75	3.27
Portfolio turnover rate	112%	91%	61%	48%	41%

¹ Per share amounts have been calculated using the average shares method.

² Performance figures may reflect compensating balance arrangements, fee waivers and/or expense reimbursements. In the absence of compensating balance arrangements, fee waivers and/or expense reimbursements, the total return would have been lower. Past performance is no guarantee of future results.

³ The total return calculation assumes that distributions are reinvested at NAV. Past performance is no guarantee of future results.

⁴ The total return calculation assumes that distributions are reinvested in accordance with the Fund's dividend reinvestment plan. Past performance is no guarantee of future results.

⁵ Gross expenses reflects operating expenses prior to any compensating balance arrangements, fee waivers and/or expense reimbursements. Net expenses reflects expenses less any compensating balance arrangements, fee waivers and/or expense reimbursements.

⁶ The impact of compensating balance arrangements, if any, was less than 0.01%.

See Notes to Financial Statements.

Notes to financial statements

1. Organization and significant accounting policies

Western Asset/Claymore Inflation-Linked Opportunities & Income Fund (the Fund) is registered under the Investment Company Act of 1940, as amended (1940 Act), as a diversified, closed-end management investment company. The Fund commenced operations on February 25, 2004.

The Fund's primary investment objective is to provide current income for its shareholders. Capital appreciation, when consistent with current income, is a secondary investment objective.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP). Estimates and assumptions are required to be made regarding assets, liabilities and changes in net assets resulting from operations when financial statements are prepared. Changes in the economic environment, financial markets and any other parameters used in determining these estimates could cause actual results to differ. Subsequent events have been evaluated through the date the financial statements were issued.

(a) Investment valuation. The valuations for fixed income securities (which may include, but are not limited to, corporate, government, municipal, mortgage-backed, collateralized mortgage obligations and asset-backed securities) and certain derivative instruments are typically the prices supplied by independent third party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Short-term fixed income securities that will mature in 60 days or less are valued at amortized cost, unless it is determined that using this method would not reflect an investment's fair value. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. When the Fund holds securities or other assets that are denominated in a foreign currency, the Fund will normally use the currency exchange rates as of 4:00 p.m. (Eastern Time). If independent third party pricing services are unable to supply prices for a portfolio investment, or if the prices supplied are deemed by the manager to be unreliable, the market price may be determined by the manager using quotations from one or more broker/dealers or at the transaction price if the security has recently been purchased and no value has yet been obtained from a pricing service or pricing broker. When reliable prices are not readily available, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund values these securities as determined in accordance with procedures approved by the Fund's Board of Trustees.

The Board of Trustees is responsible for the valuation process and has delegated the supervision of the daily valuation process to the Legg Mason North American Fund Valuation

Committee (the Valuation Committee). The Valuation Committee, pursuant to the policies adopted by the Board of Trustees, is responsible for making fair value determinations, evaluating the effectiveness of the Fund's pricing policies, and reporting to the Board of Trustees. When determining the reliability of third party pricing information for investments owned by the Fund, the Valuation Committee, among other things, conducts due diligence reviews of pricing vendors, monitors the daily change in prices and reviews transactions among market participants.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making fair value determinations. Examples of possible methodologies include, but are not limited to, multiple of earnings; discount from market of a similar freely traded security; discounted cash-flow analysis; book value or a multiple thereof; risk premium/yield analysis; yield to maturity; and/or fundamental investment analysis. The Valuation Committee will also consider factors it deems relevant and appropriate in light of the facts and circumstances. Examples of possible factors include, but are not limited to, the type of security; the issuer's financial statements; the purchase price of the security; the discount from market value of unrestricted securities of the same class at the time of purchase; analysts' research and observations from financial institutions; information regarding any transactions or offers with respect to the security; the existence of merger proposals or tender offers affecting the security; the price and extent of public trading in similar securities of the issuer or comparable companies; and the existence of a shelf registration for restricted securities.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Trustees, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such back testing monthly and fair valuation occurrences are reported to the Board of Trustees quarterly.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach and/or income approach, depending on the type of security and the particular circumstance. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable securities. The income approach uses valuation techniques to discount estimated future cash flows to present value.

GAAP establishes a disclosure hierarchy that categorizes the inputs to valuation techniques used to value assets and liabilities at measurement date. These inputs are summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)
The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.

Notes to financial statements (cont d)

The following is a summary of the inputs used in valuing the Fund's assets and liabilities carried at fair value:

Description	ASSETS			Total
	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Long-term investments :				
U.S. Treasury inflation protected securities		\$ 782,589,679		\$ 782,589,679
Asset-backed securities		357,775		357,775
Collateralized mortgage obligations		10,155,618		10,155,618
Corporate bonds & notes		120,347,420		120,347,420
Non-U.S. Treasury inflation protected securities		10,035,531		10,035,531
U.S. government & agency obligations		537,775		537,775
Sovereign bonds		69,794,187		69,794,187
Purchased options	\$ 160,875			160,875
Total investments	\$ 160,875	\$ 993,817,985		\$ 993,978,860
Other financial instruments:

Total other financial instruments	\$ 3,008,879	\$ 153,925		\$ 3,162,804
Total	\$ 3,169,754	\$ 993,971,910		\$ 997,141,664

Description	LIABILITIES			Total
	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Other financial instruments:				
Written options	\$ 20,109			\$ 20,109
Futures contracts	806,223			806,223
Forward foreign currency contracts		\$ 35,055		35,055
OTC credit default swaps on credit indices buy protection		2,165,904		2,165,904
Total	\$ 826,332	\$ 2,200,959		\$ 3,027,291

See Schedule of Investments for additional detailed categorizations.

Values include any premiums paid or received with respect to swap contracts.

(b) Repurchase agreements. The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, the Fund acquires a debt security subject to an obligation of the seller to repurchase, and of the Fund to resell, the security at an agreed-upon price and time, thereby determining the yield during the Fund's holding period. When entering into repurchase agreements, it is the Fund's policy that its custodian or a third party custodian, acting on the Fund's behalf, take possession of

the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction maturity exceeds one business day, the value of the collateral is marked-to-market and measured against the value of the agreement in an effort to ensure the adequacy of the collateral. If the counterparty defaults, the Fund generally has the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Reverse repurchase agreements. The Fund may enter into reverse repurchase agreements. Under the terms of a typical reverse repurchase agreement, a fund sells a security subject to an obligation to repurchase the security from the buyer at an agreed-upon time and price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of the proceeds of the agreement may be restricted pending a determination by the counterparty, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. In entering into reverse repurchase agreements, the Fund will maintain cash, U.S. government securities or other liquid debt obligations at least equal in value to its obligations with respect to reverse repurchase agreements or will take other actions permitted by law to cover its obligations.

(d) Futures contracts. The Fund uses futures contracts generally to gain exposure to, or hedge against, changes in interest rates or gain exposure to, or hedge against, changes in certain asset classes. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

Upon entering into a futures contract, the Fund is required to deposit cash or cash equivalents with a broker in an amount equal to a certain percentage of the contract amount. This is known as the initial margin and subsequent payments (variation margin) are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. For certain futures, including foreign denominated futures, variation margin is not settled daily, but is recorded as a net variation margin payable or receivable. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. The daily changes in contract value are recorded as unrealized gains or losses in the Statement of Operations and the Fund recognizes a realized gain or loss when the contract is closed.

Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

(e) Written options. When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability, the value of which is marked-to-market daily to reflect the current market value of the option written. If the option expires, the premium

Notes to financial statements (cont'd)

received is recorded as a realized gain. When a written call option is exercised, the difference between the premium received plus the option exercise price and the Fund's basis in the underlying security (in the case of a covered written call option), or the cost to purchase the underlying security (in the case of an uncovered written call option), including brokerage commission, is recognized as a realized gain or loss. When a written put option is exercised, the amount of the premium received is subtracted from the cost of the security purchased by the Fund from the exercise of the written put option to form the Fund's basis in the underlying security purchased. The writer or buyer of an option traded on an exchange can liquidate the position before the exercise of the option by entering into a closing transaction. The cost of a closing transaction is deducted from the original premium received resulting in a realized gain or loss to the Fund.

The risk in writing a covered call option is that the Fund may forego the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. The risk in writing an uncovered call option is that the Fund is exposed to the risk of loss if the market price of the underlying security increases. In addition, there is the risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

(f) Forward foreign currency contracts. The Fund enters into a forward foreign currency contract to hedge against foreign currency exchange rate risk on its non-U.S. dollar denominated securities or to facilitate settlement of a foreign currency denominated portfolio transaction. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price with delivery and settlement at a future date. The contract is marked-to-market daily and the change in value is recorded by the Fund as an unrealized gain or loss. When a forward foreign currency contract is closed, through either delivery or offset by entering into another forward foreign currency contract, the Fund recognizes a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it is closed.

Forward foreign currency contracts involve elements of market risk in excess of the amounts reflected on the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the forward foreign currency contract. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

(g) Swap agreements. The Fund invests in swaps for the purpose of managing its exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with other portfolio transactions. Swap agreements are privately negotiated in the over-the-counter market (OTC Swaps) or may be executed on a registered exchange (Centrally Cleared Swaps). Unlike Centrally Cleared Swaps, the Fund has credit exposure to the counterparties of OTC Swaps.

Swap contracts are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). The daily change in valuation of Centrally Cleared Swaps, if any, is recorded as a receivable or payable for variation margin on the Statement of Assets and Liabilities. Gains or losses are realized upon termination of the swap agreement. Collateral, in the form of restricted cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Securities posted as collateral for swap contracts are identified in the Schedule of Investments and restricted cash, if any, is identified on the Statement of Assets and Liabilities. Risks may exceed amounts recorded in the Statement of Assets and Liabilities. These risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms, and the possible lack of liquidity with respect to the swap agreements.

OTC swap payments received or made at the beginning of the measurement period are reflected as a premium or deposit, respectively, on the Statement of Assets and Liabilities. These upfront payments are amortized over the life of the swap and are recognized as realized gain or loss in the Statement of Operations. Net periodic payments received or paid by the Fund are recognized as a realized gain or loss in the Statement of Operations.

The Fund's maximum exposure in the event of a defined credit event on a credit default swap to sell protection is the notional amount. As of December 31, 2013, the Fund did not hold any credit default swaps to sell protection.

For average notional amounts of swaps held during the year ended December 31, 2013, see Note 4.

Credit default swaps

The Fund enters into credit default swap (CDS) contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate or sovereign issuers, on a specified obligation, or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide protection against defaults of the issuers (i.e., to reduce risk where the Fund has exposure to an issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of values from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund is subject to investment exposure on the notional amount of the swap. As a buyer of protection, the Fund generally receives an amount up to the notional value of the swap if a credit event occurs.

Notes to financial statements (cont d)

Implied spreads are the theoretical prices a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of credit default swap agreements on corporate or sovereign issues are disclosed in the Notes to Financial Statements and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for credit derivatives. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract as well as the annual payment rate, serve as an indication of the current status of the payment/performance risk.

The Fund's maximum risk of loss from counterparty risk, as the protection buyer, is the fair value of the contract (this risk is mitigated by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty). As the protection seller, the Fund's maximum risk is the notional amount of the contract. Credit default swaps are considered to have credit risk-related contingent features since they require payment by the protection seller to the protection buyer upon the occurrence of a defined credit event.

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk in excess of the related amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

(h) Inflation-indexed bonds. Inflation-indexed bonds are fixed-income securities whose principal value or interest rate is periodically adjusted according to the rate of inflation. As the index measuring inflation changes, the principal value or interest rate of inflation-indexed bonds will be adjusted accordingly. Inflation adjustments to the principal amount of inflation-indexed bonds are reflected as an increase or decrease to investment income on the Statement of Operations. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

(i) Foreign currency translation. Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

The Fund does not isolate that portion of the results of operations resulting from fluctuations in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, including gains and losses on forward foreign currency contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the values of assets and liabilities, other than investments in securities, on the date of valuation, resulting from changes in exchange rates.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

(j) Loan participations. The Fund may invest in loans arranged through private negotiation between one or more financial institutions. The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement related to the loan, or any rights of off-set against the borrower and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any off-set between the lender and the borrower.

(k) Stripped securities. The Fund may invest in Stripped Securities, a term used collectively for components, or strips, of fixed income securities. Stripped securities can be principal only securities (PO), which are debt obligations that have been stripped of unmatured interest coupons, or interest only securities (IO), which are unmatured interest coupons that have been stripped from debt obligations. The market value of Stripped Securities will fluctuate in response to changes in economic conditions, rates of pre-payment, interest rates and the market's perception of the securities. However, fluctuations in response to interest rates may be greater in Stripped Securities than for debt obligations of comparable maturities that pay interest currently. The amount of fluctuation may increase with a longer period of maturity.

The yield to maturity on IO's is sensitive to the rate of principal repayments (including prepayments) on the related underlying debt obligation and principal payments may have a

Notes to financial statements (cont'd)

material effect on yield to maturity. If the underlying debt obligation experiences greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IOs.

(l) Credit and market risk. The Fund invests in high-yield and emerging market instruments that are subject to certain credit and market risks. The yields of high-yield and emerging market debt obligations reflect, among other things, perceived credit and market risks. The Fund's investments in securities rated below investment grade typically involve risks not associated with higher rated securities including, among others, greater risk related to timely and ultimate payment of interest and principal, greater market price volatility and less liquid secondary market trading. The consequences of political, social, economic or diplomatic changes may have disruptive effects on the market prices of investments held by the Fund. The Fund's investments in non-U.S. dollar denominated securities may also result in foreign currency losses caused by devaluations and exchange rate fluctuations.

Investments in securities that are collateralized by residential real estate mortgages are subject to certain credit and liquidity risks. When market conditions result in an increase in default rates of the underlying mortgages and the foreclosure values of underlying real estate properties are materially below the outstanding amount of these underlying mortgages, collection of the full amount of accrued interest and principal on these investments may be doubtful. Such market conditions may significantly impair the value and liquidity of these investments and may result in a lack of correlation between their credit ratings and values.

(m) Foreign investment risks. The Fund's investments in foreign securities may involve risks not present in domestic investments. Since securities may be denominated in foreign currencies, may require settlement in foreign currencies or pay interest or dividends in foreign currencies, changes in the relationship of these foreign currencies to the U.S. dollar can significantly affect the value of the investments and earnings of the Fund. Foreign investments may also subject the Fund to foreign government exchange restrictions, expropriation, taxation or other political, social or economic developments, all of which affect the market and/or credit risk of the investments.

(n) Counterparty risk and credit-risk-related contingent features of derivative instruments. The Fund may invest in certain securities or engage in other transactions, where the Fund is exposed to counterparty credit risk in addition to broader market risks. The Fund may invest in securities of issuers, which may also be considered counterparties as trading partners in other transactions. This may increase the risk of loss in the event of default or bankruptcy by the counterparty or if the counterparty otherwise fails to meet its contractual obligations. The Fund's investment manager attempts to mitigate counterparty risk by (i) periodically assessing the creditworthiness of its trading partners, (ii) monitoring and/or limiting the amount of its net exposure to each individual counterparty based on its assessment and (iii) requiring collateral from the counterparty for certain transactions. Market events and changes in overall economic conditions may impact the assessment of

such counterparty risk by the investment manager. In addition, declines in the values of underlying collateral received may expose the Fund to increased risk of loss.

The Fund has entered into master agreements with certain of its derivative counterparties that provide for general obligations, representations, agreements, collateral, events of default or termination and credit related contingent features. The credit related contingent features include, but are not limited to, a percentage decrease in the Fund's net assets or NAV over a specified period of time. If these credit related contingent features were triggered, the derivatives counterparty could terminate the positions and demand payment or require additional collateral.

Collateral requirements differ by type of derivative. Collateral or margin requirements are set by the broker or exchange clearing house for exchange traded derivatives while collateral terms are contract specific for over-the-counter traded derivatives. Cash collateral that has been pledged to cover obligations of the Fund under derivative contracts, if any, will be reported separately in the Statement of Assets and Liabilities. Securities pledged as collateral, if any, for the same purpose are noted in the Schedule of Investments.

Absent an event of default by the counterparty or a termination of the agreement, the terms of the master agreements do not result in an offset of reported amounts of financial assets and financial liabilities in the Statement of Assets and Liabilities across transactions between the Fund and the applicable counterparty. The enforceability of the right to offset may vary by jurisdiction.

As of December 31, 2013, the Fund held written options, forward foreign currency contracts and OTC credit default swaps with credit related contingent features which had a liability position of \$2,221,068. If a contingent feature in the master agreements would have been triggered, the Fund would have been required to pay this amount to its derivatives counterparties. As of December 31, 2013, the Fund had posted with its counterparties cash and/or securities as collateral to cover the net liability of these derivatives amounting to \$2,100,000, which could be used to reduce the required payment.

(o) Security transactions and investment income. Security transactions are accounted for on a trade date basis. Interest income, adjusted for amortization of premium and accretion of discount, is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date. Foreign dividend income is recorded on the ex-dividend date or as soon as practicable after the Fund determines the existence of a dividend declaration after exercising reasonable due diligence. The cost of investments sold is determined by use of the specific identification method. To the extent any issuer defaults or a credit event occurs that impacts the issuer, the Fund may halt any additional interest income accruals and consider the realizability of interest accrued up to the date of default or credit event.

(p) Distributions to shareholders. Distributions from net investment income of the Fund, if any, are declared and paid on a monthly basis. Distributions of net realized gains, if any, are declared at least annually. Pursuant to its Managed Distribution Policy, the Fund intends to make regular monthly distributions to shareholders at a fixed rate per common

Notes to financial statements (cont d)

share, which rate may be adjusted from time to time by the Fund's Board of Trustees. Under the Fund's Managed Distribution Policy, if, for any monthly distribution, the value of the Fund's net investment income and net realized capital gain is less than the amount of the distribution, the difference will be distributed from the Fund's net assets (and may constitute a return of capital). Shareholders will be informed of the tax characteristics of the distributions after the close of the 2013 fiscal year. The Board of Trustees may modify, terminate or suspend the Managed Distribution Policy at any time, including when certain events would make part of the return of capital taxable to shareholders. Any such modification, termination or suspension could have an adverse effect on the market price of the Fund's shares. Distributions to shareholders of the Fund are recorded on the ex-dividend date and are determined in accordance with income tax regulations, which may differ from GAAP.

(q) Compensating balance arrangements. The Fund has an arrangement with its custodian bank whereby a portion of the custodian's fees is paid indirectly by credits earned on the Fund's cash on deposit with the bank.

(r) Federal and other taxes. It is the Fund's policy to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986 (the Code), as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute its taxable income and net realized gains, if any, to shareholders in accordance with timing requirements imposed by the Code. Therefore, no federal or state income tax provision is required in the Fund's financial statements.

Management has analyzed the Fund's tax positions taken on income tax returns for all open tax years and has concluded that as of December 31, 2013, no provision for income tax is required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

(s) Reclassification. GAAP requires that certain components of net assets be reclassified to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset values per share. During the current year, the following reclassifications have been made:

	Undistributed Net Investment Income	Undistributed Realized Gain
(a)	\$ 361,634	\$ (361,634)

^(a) Reclassifications are due to foreign currency transactions treated as ordinary income for tax purposes and book/tax differences in the treatment of swaps.

2. Investment management agreement and other transactions with affiliates

The Fund has entered into an Investment Advisory Agreement with Guggenheim Funds Investment Advisors, LLC (Investment Adviser), which provides for payment of a monthly fee computed at the annual rate of 0.60% of the Fund's average weekly assets. The

Investment Adviser has, in turn, entered into an Investment Management Agreement with Western Asset Management Company (Investment Manager), pursuant to which the Investment Manager provides investment management services to the Fund. In exchange for the services provided by the Investment Manager, the Investment Adviser pays a portion of the fees it receives from the Fund to the Investment Manager, at the annual rate of 0.27% of the Fund's average weekly assets. Average weekly assets means the average weekly value of the total assets of the Fund (including any assets attributable to leverage) minus accrued liabilities (other than liabilities representing leverage). For purposes of calculating average weekly assets, liabilities associated with any instrument or transactions used by the Investment Manager to leverage the Fund's portfolio (whether or not such instruments or transactions are covered as described in the prospectus) is considered a liability.

Western Asset Management Company Limited (Western Asset London), Western Asset Management Company Pte. Ltd. (Western Asset Singapore) and Western Asset Management Company Ltd (Western Asset Japan) are also the Fund's investment managers. Western Asset London, Western Asset Singapore and Western Asset Japan provide certain investment management services to the Fund relating to currency transactions and investment in non-U.S. denominated securities. Western Asset London, Western Asset Singapore and Western Asset Japan do not receive any compensation from the Fund.

Under an administrative agreement with the Fund, Legg Mason Partners Fund Advisor, LLC (LMPFA) (Administrator), an affiliate of the Investment Manager, provides certain administrative and accounting functions for the Fund. The Fund pays the Administrator a monthly fee at an annual rate of 0.04% of the Fund's average weekly assets, subject to an annual minimum fee of \$225,000.

3. Investments

During the year ended December 31, 2013, the aggregate cost of purchases and proceeds from sales of investments (excluding short-term investments) and U.S Government & Agency Obligations were as follows:

	Investments	U.S. Government & Agency Obligations
Purchases	\$ 176,103,619	\$ 1,031,627,722
Sales	141,904,565	868,123,749

At December 31, 2013, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were as follows:

Gross unrealized appreciation	\$ 16,342,151
Gross unrealized depreciation	(40,489,654)
Net unrealized depreciation	\$ (24,147,503)

Notes to financial statements (cont d)

Transactions in reverse repurchase agreements for the Fund during the year ended December 31, 2013 were as follows:

Average Daily Balance*	Weighted Average Interest Rate*	Maximum Amount Outstanding
\$150,055,435	0.18%	\$ 262,155,757

* Averages based on the number of days that Fund had reverse repurchase agreements outstanding.

Interest rates on reverse repurchase agreements ranged from 0.14% to 0.25% during the year ended December 31, 2013. Interest expense incurred on reverse repurchase agreements totaled \$74,040.

At December 31, 2013, the Fund had the following open reverse repurchase agreements:

Counterparty	Rate	Effective Date	Maturity Date	Face Amount
Barclays Capital	0.22%	10/16/2013	1/15/2014	\$ 28,753,355
Deutsche Bank	0.25%	10/16/2013	1/15/2014	37,050,000
Morgan Stanley	0.15%	10/28/2013	1/15/2014	27,247,500
Deutsche Bank	0.17%	11/26/2013	2/12/2014	37,050,000
Morgan Stanley	0.17%	11/26/2013	2/12/2014	37,279,412
Barclays Capital	0.18%	11/26/2013	2/12/2014	28,860,294
				\$ 196,240,561

On December 31, 2013, the total market value of underlying collateral (refer to the Schedule of Investments for positions held at the counterparty as collateral for reverse repurchase agreements) for open reverse repurchase agreements was \$199,352,522.

During the year ended December 31, 2013, written option transactions for the Fund were as follows:

	Number of Contracts	Premiums
Written options, outstanding as of December 31, 2012	200	\$ 146,225
Options written	15,731	4,865,386
Options closed	(11,477)	(3,696,141)
Options exercised	(1,517)	(530,038)
Options expired	(2,508)	(733,201)
Written options, outstanding as of December 31, 2013	429	\$ 52,231

At December 31, 2013, the Fund had the following open futures contracts:

	Number of Contracts	Expiration Date	Basis Value	Market Value	Unrealized Gain (Loss)
Contracts to Buy:					
U.S. Treasury 5-Year Notes	857	3/14	\$ 103,057,035	\$ 102,250,812	\$ (806,223)
Contracts to Sell:					
U.S. Treasury 10-Year Notes	873	3/14	108,489,945	107,419,922	1,070,023
U.S. Treasury Ultra Long-Term Bonds	1,049	3/14	136,538,669	134,599,813	1,938,856
					3,008,879
Net unrealized gain on open futures contracts					\$ 2,202,656

At December 31, 2013, the Fund had the following open forward foreign currency contracts:

Foreign Currency	Counterparty	Local Currency	Market Value	Settlement Date	Unrealized Gain (Loss)
Contracts to Buy:					
Brazilian Real	Bank of America N.A.	9,538,702	\$ 4,018,646	1/27/14	\$ (28,665)
Contracts to Sell:					
Brazilian Real	Bank of America N.A.	19,077,404	8,037,291	1/27/14	(6,390)
Canadian Dollar	Citibank N.A.	7,930,820	7,457,588	2/18/14	123,139
Canadian Dollar	Credit Suisse First Boston Inc.	2,152,048	2,023,636	2/18/14	30,786
					147,535
					\$ 118,870

Net unrealized gain on open forward foreign currency contracts

At December 31, 2013, the Fund held the following open swap contracts:

OTC CREDIT DEFAULT SWAPS ON CREDIT INDICES BUY PROTECTION

Swap Counterparty (Reference Entity)	Notional Amount ²	Termination Date	Periodic Payments Made By The Fund	Market Value ³	Upfront Premiums Paid (Received)	Unrealized Depreciation
Barclays Capital Inc. (Markit CDX.NA.HY.20 Index)	\$ 22,750,000	6/20/18	5.000% quarterly	\$ (2,165,904)	\$ (635,029)	\$ (1,530,875)

¹ If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or the underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or the underlying securities comprising the referenced index.

² The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

³ The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement been closed/sold as of the period end. Decreasing market values (sell protection) or increasing market values (buy protection) when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Percentage shown is an annual percentage rate.

4. Derivative instruments and hedging activities

GAAP requires enhanced disclosure about an entity's derivative and hedging activities.

Below is a table, grouped by derivative type, that provides information about the fair value and the location of derivatives within the Statement of Assets and Liabilities at December 31, 2013.

	ASSET DERIVATIVES ¹		
	Interest Rate Risk	Foreign Exchange Risk	Total
Purchased options ²	\$ 160,875		\$ 160,875
Futures contracts ³	3,008,879		3,008,879
Forward foreign currency contracts		\$ 153,925	153,925
Total	\$ 3,169,754	\$ 153,925	\$ 3,323,679

Notes to financial statements (cont d)

LIABILITY DERIVATIVES¹

	Interest Rate Risk	Foreign Exchange Risk	Credit Risk	Total
Written options	\$ 20,109			\$ 20,109
Futures contracts ³	806,223			806,223
OTC swap contracts ⁴			\$ 2,165,904	2,165,904
Forward foreign currency contracts		\$ 35,055		35,055
Total	\$ 826,332	\$ 35,055	\$ 2,165,904	\$ 3,027,291

¹ Generally, the balance sheet location for asset derivatives is receivables/net unrealized appreciation (depreciation) and for liability derivatives is payables/net unrealized appreciation (depreciation).

² Market value of purchased options is reported in Investments at value in the Statement of Assets and Liabilities.

³ Includes cumulative appreciation (depreciation) of futures contracts as reported in the footnotes. Only variation margin is reported within the receivables and/or payables on the Statement of Assets and Liabilities.

⁴ Values include premiums paid (received) on swap contracts which are shown separately in the Statement of Assets and Liabilities.

The following tables provide information about the effect of derivatives and hedging activities on the Fund's Statement of Operations for the year ended December 31, 2013. The first table provides additional detail about the amounts and sources of gains (losses) realized on derivatives during the period. The second table provides additional information about the change in unrealized appreciation (depreciation) resulting from the Fund's derivatives and hedging activities during the period.

AMOUNT OF REALIZED GAIN (LOSS) ON DERIVATIVES RECOGNIZED

	Interest Rate Risk	Foreign Exchange Risk	Credit Risk	Total
Purchased options ¹	\$ (2,546,119)			\$ (2,546,119)
Written options	3,388,082			3,388,082
Futures contracts	(924,431)			(924,431)
Purchased options on futures ¹	215,411			215,411
Written options on futures	596,077			596,077
OTC swap contracts			\$ (3,211,553)	(3,211,553)
Forward foreign currency contracts		\$ 1,220,725		1,220,725
Total	\$ 729,020	\$ 1,220,725	\$ (3,211,553)	\$ (1,261,808)

¹ Net realized gain (loss) from purchased options is reported in net realized gain (loss) from investment transactions in the Statement of Operations.

CHANGE IN UNREALIZED APPRECIATION (DEPRECIATION) ON DERIVATIVES RECOGNIZED

	Interest Rate Risk	Foreign Exchange Risk	Credit Risk	Total
Purchased options ¹	\$ (1,394)			\$ (1,394)
Written options	48,397			48,397
Futures contracts	1,817,464			1,817,464
OTC swap contracts			\$ (1,686,377)	(1,686,377)
Forward foreign currency contracts		\$ 801,456		801,456

Total	\$ 1,864,467	\$ 801,456	\$ (1,686,377)	\$ 979,546
--------------	---------------------	-------------------	-----------------------	-------------------

¹ The change in unrealized appreciation (depreciation) from purchased options is reported in the change in net unrealized appreciation (depreciation) from investments in the Statement of Operations.

During the year ended December 31, 2013, the volume of derivative activity for the Fund was as follows:

	Average Market Value
Purchased options	\$ 279,213
Written options	250,213
Futures contracts (to buy)	65,100,852
Futures contracts (to sell)	43,964,513
Forward foreign currency contracts (to buy)	14,167,914
Forward foreign currency contracts (to sell)	31,914,266
	Average Notional Balance
Credit default swap contracts (to buy protection)	\$ 32,550,000
Credit default swap contracts (to sell protection)	2,930,769

At December 31, 2013, there were no open positions held in this derivative.

The following table presents by financial instrument, the Fund's derivative assets net of the related collateral held by the Fund at December 31, 2013:

	Gross Amount of Derivative Assets in the Statement of Assets and Liabilities ¹	Collateral Received ^{2,3}	Net Amount
Purchased options ⁴	\$ 160,875		\$ 160,875
Futures contracts ⁵	562,253		562,253
Forward foreign currency contracts	153,925		153,925
Total	\$ 877,053		\$ 877,053

The following table presents by financial instrument, the Fund's derivative liabilities net of the related collateral pledged by the Fund at December 31, 2013:

	Gross Amount of Derivative Liabilities in the Statement of Assets and Liabilities ¹	Collateral Pledged ²	Net Amount
Written options	\$ 20,109		\$ 20,109
OTC swap contracts	2,165,904	\$ (2,100,000)	65,904
Forward foreign currency contracts	35,055		35,055
Total	\$ 2,221,068	\$ (2,100,000)	\$ 121,068

¹ Absent an event of default or early termination, derivative assets and liabilities are presented gross and not offset in the Statement of Assets & Liabilities.

² Gross amounts not offset in the Statement of Assets and Liabilities.

³ In some instances, the actual collateral received and/or pledged may be more than the amount shown here due to overcollateralization.

⁴ Market value of purchased options is shown in investments at value in the Statement of Assets and Liabilities.

⁵ Amount represents the current day's variation margin as reported in the Statement of Assets and Liabilities. It differs from the cumulative appreciation (depreciation) presented in the previous table.

Notes to financial statements (cont d)

5. Common shares

Of the 61,184,134 shares of common stock outstanding at December 31, 2013, the Investment Managers owned 0 shares.

6. Trustee compensation

Each Independent Trustee receives a fee of \$20,000 for serving as a Trustee of the Fund and a fee of \$1,500 and related expenses for each meeting of the Board of Trustees attended. The Chairman of the Board receives an additional \$5,000 for serving in that capacity. The Audit Committee Chairman and the Governance and Nominating Committee Chairman each receive an additional \$3,000 for serving in their respective capacities. Members of the Audit Committee and the Governance and Nominating Committee receive \$500 for each committee meeting attended.

7. Distributions

On January 2, 2014, the Fund's Board of Trustees (the Board) declared a distribution in the amount of \$0.0335 per share, payable on January 31, 2014 to shareholders of record on January 15, 2014.

On February 3, 2014, the Board declared a distribution in the amount of \$0.0335 per share, payable on February 28, 2014 to shareholders of record on February 14, 2014.

8. Income tax information and distributions to shareholders

The tax character of distributions paid during the fiscal years ended December 31 was as follows:

	2013	2012
Distributions Paid From:		
Ordinary income	\$ 9,574,393	\$ 19,450,312
Net long-term capital gains	15,021,629	3,096,042
Total distributions	\$ 24,596,022	\$ 22,546,354

As of December 31, 2013, the components of accumulated earnings on a tax basis were as follows:

Undistributed ordinary income - net	\$ 246,568
Undistributed long-term capital gains - net	676,504
Total undistributed earnings	\$ 923,072
Other book/tax temporary differences ^(a)	(11,718,253)
Unrealized appreciation (depreciation) ^(b)	(23,352,470)
Total accumulated earnings (losses) - net	\$ (34,147,651)

^(a) Other book/tax temporary differences are attributable primarily to the tax deferral of losses on straddles, the realization for tax purposes of unrealized gains (losses) on certain futures and foreign currency contracts, book/tax differences in the accrual of income on Treasury Inflation Protected securities and book/tax differences in the timing of the deductibility of various expenses.

^(b) The difference between book-basis and tax-basis unrealized appreciation (depreciation) is attributable primarily to the tax deferral of losses on wash sales.

9. Recent accounting pronouncement

The Fund has adopted the disclosure provisions of Financial Accounting Standards Board (FASB) Accounting Standards Update 2011-11 (ASU 2011-11), *Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities* along with the related scope clarification provisions of FASB Accounting Standards Update 2013-01 (ASU 2013-01) entitled *Balance Sheet (Topic 210) Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11 is intended to enhance disclosures on the offsetting of financial assets and liabilities by requiring entities to disclose both gross and net information about financial instruments and transactions that are either offset in the statement of assets and liabilities or subject to a master netting agreement or similar arrangement. ASU 2013-01 limits the scope of ASU 2011-11 s disclosure requirements on offsetting to financial assets and financial liabilities related to derivatives, repurchase and reverse repurchase agreements, and securities lending and securities borrowing transactions.

Report of independent registered public accounting firm

To the Board of Trustees and Shareholders of

Western Asset/Claymore Inflation-Linked Opportunities & Income Fund:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets, and the financial highlights present fairly, in all material respects, the financial position of Western Asset/Claymore Inflation-Linked Opportunities & Income Fund (the Fund) at December 31, 2013, the results of its operations, the changes in its net assets and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Fund's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2013 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

Board approval of management and

subadvisory agreements (unaudited)

The Independent Trustees considered the Investment Advisory Agreement (the *Advisory Agreement*) between the Fund and Guggenheim Funds Investment Advisors, LLC (*Guggenheim*) and the Investment Management Agreements (each a *Management Agreement* and together with the *Advisory Agreement*, the *Agreements*) between Guggenheim and Western Asset Management Company (*Western Asset*), and separately between Guggenheim, Western Asset and each of Western Asset Management Company Limited (*WAML*), Western Asset Management Company Pte. Ltd. in Singapore (*Western Singapore*) and Western Asset Management Company Ltd in Japan (*Western Japan*, and together with *Western Singapore* and *WAML* the *Non-U.S. Managers* and together with *Western Asset*, the *Managers*) with respect to the Fund at a meeting held on November 7, 2013. At a meeting held on November 22, 2013, the Independent Trustees reported to the full Board of Trustees their considerations and recommendation with respect to the *Agreements*, and the Board of Trustees, including a majority of the Independent Trustees, considered and approved renewal of the *Agreements*.

In considering the *Management Agreements*, the Trustees noted that although *Western Asset*'s business is operated through separate legal entities, such as the *Non-U.S. Managers*, its business is highly integrated and senior investment personnel at *Western Asset* have supervisory oversight responsibility over the investment decisions made by the *Non-U.S. Managers*. Therefore, in connection with their deliberations noted below, the Trustees primarily focused on the information provided by *Western Asset* when considering the approval of the *Management Agreements*. The Trustees also noted that the Fund does not pay any management fees directly to any of the *Non-U.S. Managers* because *Western Asset* pays the *Non-U.S. Managers* for services provided to the Fund out of the management fee *Western Asset* receives from *Guggenheim*.

In arriving at their decision to renew the *Agreements*, the Trustees met with representatives of *Guggenheim* and *Western Asset*; reviewed a variety of information prepared by *Guggenheim* and *Western Asset* and materials provided by Lipper Inc. (*Lipper*) and counsel to the Independent Trustees; reviewed performance and expense information for peer groups of comparable funds, selected and prepared by *Lipper*, and certain other products available from *Western Asset* for investments in U.S. TIPS, including separate accounts managed by *Western Asset*; and requested and reviewed additional information as necessary. These reviews were in addition to information obtained by the Trustees at their regular quarterly meetings with respect to the Fund's performance and other relevant matters, such as information on public trading in the Fund's shares and differences between the Fund's share price and net asset value per share, and related discussions with *Guggenheim*'s and *Western Asset*'s personnel.

As part of their review, the Trustees examined *Guggenheim*'s ability to provide high quality oversight and administrative and shareholder support services to the Fund, and the *Managers*' ability to provide high quality investment management services to the Fund. The Trustees considered the experience of *Guggenheim*'s personnel in providing the types of services

Board approval of management and subadvisory agreements (unaudited) (continued)

that Guggenheim is responsible for providing to the Fund, such as oversight of the Fund and the Managers with respect to portfolio management, and written and oral communications with the closed-end fund analyst community, investment advisers and current and prospective shareholders; the ability of Guggenheim to attract and retain capable personnel; the capability and integrity of Guggenheim's senior management and staff; and the level of skill required to provide such services to the Fund. The Trustees also considered the investment philosophy and research and decision-making processes of the Managers; the experience of their key advisory personnel responsible for management of the Fund; the ability of the Managers to attract and retain capable research and advisory personnel; the capability and integrity of the Managers senior management and staff; and the level of skill required to manage the Fund, noting in particular the substantial complexities in purchasing fixed income securities of below-investment-grade quality and emerging-markets debt instruments. In addition, the Trustees reviewed the quality of Guggenheim's and the Managers' services with respect to regulatory compliance and compliance with the investment policies of the Fund and conditions that might affect Guggenheim's and the Managers' ability to provide high quality services to the Fund in the future, including their business reputations, financial conditions and operational stabilities. Based on the foregoing, the Trustees concluded that the Managers investment process, research capabilities and philosophy were well suited to the Fund given its investment objectives and policies, that Guggenheim's various services were valuable to the Fund and that the Managers would be able to meet any reasonably foreseeable obligations under the Agreements.

In reviewing the quality of the services provided to the Fund, the Trustees also reviewed a comparison of the performance of the Fund to the performance of a group of closed-end bond funds (all of which, except for one, were leveraged through the use of reverse repurchase agreements). The Trustees noted that the Fund had met its primary objective of producing current income to shareholders, and that the performance of the Fund exceeded its peer average for the one-year period, was approximately equal to its peer average for the five-year period, and was lower than its peer average performance for the three-year period ended August 31, 2013. The Trustees concluded that the Managers' management of the Fund would continue to be in the best interests of the shareholders.

The Trustees also considered the advisory fee payable by the Fund to Guggenheim, the management fee payable by Guggenheim to Western Asset, the management fees payable by Western Asset to the Non-U.S. Managers and the total expenses payable by the Fund. They reviewed information concerning fees paid to investment advisers of similarly-managed funds, the fees paid by Guggenheim's other closed-end fund clients, as well as fees paid by Western Asset's other clients, including separate accounts managed by Western Asset. The Trustees observed that the advisory fee paid by the Fund to Guggenheim was lower than the average of the fees paid by the funds in its peer group and that the total expenses for the Fund were lower than the average of the funds in its peer group. The Trustees considered that the advisory fee paid by the Fund to Guggenheim was below the average of the fees paid to Guggenheim by other closed-end fund clients; that Guggenheim

was responsible for payment of the management fees to the Managers; and that the net fee retained by Guggenheim was below its fees from other closed-end fund clients. The Trustees noted that although the management fee paid by Guggenheim to Western Asset was higher than the fees paid by clients of Western Asset for accounts with similar investment strategies, the administrative and operational responsibilities for Western Asset with respect to the Fund were also relatively higher and the Fund's investment strategy included investments in asset classes other than U.S. TIPS, which was generally not the case for Western Asset's other clients. In light of these differences, the Trustees concluded that the management fees relative to the fees paid by Western Asset's other clients were reasonable.

The Trustees further evaluated the benefits of the advisory relationship to the Managers, including, among others, the profitability of the relationship to Guggenheim and the Managers; the direct and indirect benefits that Guggenheim and the Managers may receive from their relationship with the Fund, including the fallout benefits, such as reputational value derived from serving as investment manager or adviser to the Fund; and the affiliation between the Managers and Legg Mason Partners Funds Advisor, LLC, the Fund's administrator. In that connection, the Trustees concluded that the Guggenheim's and the Managers' profitability was consistent with levels of profitability that had been determined by courts not to be excessive. The trustees noted that Western Asset does not have soft dollar arrangements.

Finally, the Trustees considered, in light of the profitability information provided by Guggenheim and the Managers, the extent to which economies of scale would be realized by the Managers as the assets of the Fund grow. The Trustees concluded that, because the Fund is a closed-end fund and does not make a continuous offer of its securities, the Fund's size was relatively fixed and it would be unlikely that the Managers would realize economies of scale from the Fund's growth. The Trustees further noted that, as Guggenheim's and the Managers' profitability was consistent with levels of profitability that had been determined by courts not to be excessive, any economies of scale that may currently exist were being appropriately shared with shareholders.

In their deliberations with respect to these matters, the Independent Trustees were advised by their independent counsel, who are independent of the Managers within the meaning of the Securities and Exchange Commission rules regarding the independence of counsel. The Independent Trustees weighed each of the foregoing matters in light of the advice given to them by their independent counsel as to the law applicable to the review of investment advisory contracts. In arriving at a decision, the Trustees, including the Independent Trustees, did not identify any single matter as all-important or controlling, and the foregoing summary does not detail all the matters considered. The Trustees judged the terms and conditions of the Agreements, including the investment advisory fees, in light of all of the surrounding circumstances.

Based upon their review, the Trustees, including all of the Independent Trustees, determined, in the exercise of their business judgment, that they were satisfied with the

Board approval of management and subadvisory agreements (unaudited) (cont d)

quality of investment advisory services being provided by the Managers and the advisory, oversight, administrative and after-market support services being provided by Guggenheim; that the fees to be paid to the Managers under the relevant Agreements were fair and reasonable given the scope and quality of the services rendered by each Manager; and that reaffirming their prior approval of the Agreements was in the best interest of the Fund and its shareholders.

Additional information (unaudited)

Information about Trustees and Officers

The business and affairs of Western Asset/Claymore Inflation-Linked Opportunities & Income Fund (the Fund) are conducted by management under the supervision and subject to the direction of its Board of Trustees. Except as noted below, the business address of each Trustee and Officer is c/o Western Asset Management Company, 385 East Colorado Boulevard, Pasadena, CA 91101. Information pertaining to the Trustees and Officers of the Fund is set forth below.

Independent Trustees

Michael Larson

¹ Each Trustee also serves as a Trustee of Western Asset/Claymore Inflation-Linked Securities & Income Fund, a closed-end investment company, which is considered part of the same Fund Complex as the Fund. The Investment Manager serves as investment adviser to Western Asset/Claymore Inflation-Linked Opportunities & Income Fund. Messrs. Nyberg and Toupin also serve as Trustees of Guggenheim Enhanced Equity Strategy Fund, Managed Duration Investment Grade Municipal Fund, Fiduciary/Claymore MLP Opportunity Fund, Guggenheim Enhanced Equity Income Fund, Guggenheim Strategic Opportunities Fund, Guggenheim Equal Weight Enhanced Equity Income Fund, Guggenheim Credit Allocation Fund and Guggenheim Build American Bonds Managed Duration Trust, each of which is a closed-end management investment company, Claymore Exchange-Traded Fund Trust (consisting of 30 separate portfolios) and Claymore Exchange-Traded Fund Trust 2 (consisting of 11 separate portfolios), each an open-end management investment company. Additionally, Mr. Nyberg serves as a Trustee for Advent Claymore Convertible Securities and Income Fund, Advent/Claymore Enhanced Growth & Income Fund and Advent Claymore Securities and Income Fund II, each a closed-end investment company. Mr. Fuller serves as Director/Trustee to 161 other portfolios associated with Legg Mason & Co., LLC or its affiliates. Legg Mason & Co., LLC is an affiliate of the Investment Manager.

² Member of the Audit Committee of the Board of Trustees.

³ Member of the Governance and Nominating Committee of the Board of Trustees.

⁴ Mr. Fuller is an interested person (as defined above) of the Fund because of his positions with subsidiaries of, and ownership of shares of common stock of, Legg Mason, Inc., the parent company of the Investment Manager.

⁵ Each officer shall hold office until his or her respective successor is chosen and qualified, or in each case until he or she sooner dies, resigns, is removed with or without cause or becomes disqualified.

Annual principal executive officer and principal financial officer certifications (unaudited)

The Fund's Principal Executive Officer (PEO) has submitted to the NYSE the required annual certification and the Fund also has included the certifications of the Fund's PEO and Principal Financial Officer required by Section 302 of the Sarbanes-Oxley Act in the Fund's Form N-CSR filed with the SEC for the period of this report.

Dividend reinvestment plan (unaudited)

The Fund and American Stock Transfer & Trust Company LLC (Agent), as the Transfer Agent and Registrar of WIW, offer a convenient way to add shares of WIW to your account. WIW offers to all common shareholders a Dividend Reinvestment Plan (Plan). Under the Plan, cash distributions (e.g., dividends and capital gains) on the common shares are automatically invested in shares of WIW unless the shareholder elects otherwise by contacting the Agent at the address set forth below.

As a participant in the Dividend Reinvestment Plan, you will automatically receive your dividend or net capital gains distribution in newly issued shares of WIW, if the market price of the shares on the date of the distribution is at or above the net asset value (NAV) of the shares, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market. The number of shares to be issued to you will be determined by dividing the amount of the cash distribution to which you are entitled (net of any applicable withholding taxes) by the greater of the NAV per share on such date or 95% of the market price of a share on such date. If the market price of a share on such distribution date is below the NAV, less estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market, the Agent will, as agent for the participants, buy shares of WIW through a broker on the open market. All common shares acquired on your behalf through the Plan will be automatically credited to an account maintained on the books of the Agent.

Additional information regarding the plan

WIW will pay all costs applicable to the Plan, except for brokerage commissions for open market purchases by the Agent under the Plan, which will be charged to participants. All shares acquired through the Plan receive voting rights and are eligible for any stock split, stock dividend, or other rights accruing to shareholders that the Board of Trustees may declare.

You may terminate participation in the Plan at any time by giving notice to the Agent. Such termination will be effective prior to the record date next succeeding the receipt of such instructions or by a later date of termination specified in such instructions. Upon termination, a participant will receive a certificate for the full shares credited to his or her account or may request the sale of all or part of such shares. Fractional shares credited to a terminating account will be paid for in cash at the current market price at the time of termination.

Dividends and other distributions invested in additional shares under the Plan are subject to income tax just as if they had been received in cash. After year end, dividends paid on the accumulated shares will be included in the Form 1099-DIV information return to the Internal Revenue Service and only one Form 1099-DIV will be sent to participants each year.

Inquiries regarding the Plan, as well as notices of termination, should be directed to American Stock Transfer & Trust Company LLC, 6201 15th Avenue, Brooklyn, NY 11219. Investor Relations telephone number 1-888-888-0151.

Dividend reinvestment plan (unaudited) (cont d)

Schedule of portfolio holdings

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. You may obtain a free copy of the Fund's Form N-Q by calling 1-800-345-7999, by visiting the Fund's website (<http://guggenheiminvestments.com/wiw>), or by writing to the Fund, or you may obtain a copy of this report (and other information relating to the Fund) from the SEC's website (<http://www.sec.gov>). Additionally, the Fund's Form N-Q can be viewed or copied at the SEC's Public Reference Room in Washington D.C. Information about the operation of the Public Reference Room can be obtained by calling 1-800-SEC-0330.

Important tax information (unaudited)

The Fund paid the following distributions during the taxable year ended December 31, 2013:

Record Date	Payable Date	Total Distribution Paid	Ordinary Income Per Share	Long-term Capital Gains Per Share	Federal Obligation Interest Percentage (Notes 1 & 2)
1/15/2013	1/31/2013	0.033500	0.033500		43.72%
2/15/2013	2/28/2013	0.033500	0.033500		43.72%
3/21/2013	3/28/2013	0.033500	0.008948	0.024552	43.72%
4/15/2013	4/30/2013	0.033500	0.008948	0.024552	43.72%
5/15/2013	5/31/2013	0.033500	0.008948	0.024552	43.72%
6/14/2013	6/28/2013	0.033500	0.008948	0.024552	43.72%
7/15/2013	7/31/2013	0.033500	0.008948	0.024552	43.72%
8/15/2013	8/30/2013	0.033500	0.008948	0.024552	43.72%
9/13/2013	9/30/2013	0.033500	0.008948	0.024552	43.72%
10/15/2013	10/31/2013	0.033500	0.008948	0.024552	43.72%
11/15/2013	11/29/2013	0.033500	0.008948	0.024552	43.72%
12/13/2013	12/31/2013	0.033500	0.008948	0.024552	43.72%

(1)The Federal obligation interest is expressed as a percentage of the ordinary income distribution per share.

(2)This Fund has met the quarterly asset requirements for California, Connecticut and New York resident shareholders.

The law varies in each state as to whether and what percentage of dividend income attributable to Federal obligations is exempt from state income tax. We recommend that you consult with your tax adviser to determine if any portion of the dividends you received is exempt from state income taxes.

Privacy and Security Notice

Your Privacy and the Security of Your Personal Information is Very Important to the Funds

This Privacy and Security Notice (the **Privacy Notice**) addresses the Funds' privacy and data protection practices with respect to nonpublic personal information the Funds receive. The provisions of this Privacy Notice apply to your information both while you are a shareholder and after you are no longer invested with the Funds.

The Type of Nonpublic Personal Information the Funds Collect About You

The Funds collect and maintain nonpublic personal information about you in connection with your shareholder account. Such information may include, but is not limited to:

Personal information included on applications or other forms;

Account balances, transactions, and mutual fund holdings and positions;

Online account access user IDs, passwords, security challenge question responses; and

Information received from consumer reporting agencies regarding credit history and creditworthiness (such as the amount of an individual's total debt, payment history, etc.).

How the Funds Use Nonpublic Personal Information About You

The Funds do not sell or share your nonpublic personal information with third parties or with affiliates for their marketing purposes, or with other financial institutions or affiliates for joint marketing purposes, unless you have authorized the Funds to do so. The Funds do not disclose any nonpublic personal information about you except as may be required to perform transactions or services you have authorized or as permitted or required by law. The Funds may disclose information about you to:

Employees, agents, and affiliates on a **need to know** basis to enable the Funds to conduct ordinary business or comply with obligations to government regulators;

Service providers, including the Funds' affiliates, who assist the Funds as part of the ordinary course of business (such as printing, mailing services, or processing or servicing your account with us) or otherwise perform services on the Funds' behalf, including companies that may perform marketing services solely for the Funds;

The Funds' representatives such as legal counsel, accountants and auditors; and

Fiduciaries or representatives acting on your behalf, such as an IRA custodian or trustee of a grantor trust.

Except as otherwise permitted by applicable law, companies acting on the Funds' behalf are contractually obligated to keep nonpublic personal information the Funds provide to them confidential and to use the information the Funds share only to provide the services the Funds ask them to perform.

NOT PART OF THE ANNUAL REPORT

Privacy and Security Notice (cont d)

The Funds may disclose nonpublic personal information about you when necessary to enforce their rights or protect against fraud, or as permitted or required by applicable law, such as in connection with a law enforcement or regulatory request, subpoena, or similar legal process. In the event of a corporate action or in the event a Fund service provider changes, the Funds may be required to disclose your nonpublic personal information to third parties. While it is the Funds' practice to obtain protections for disclosed information in these types of transactions, the Funds cannot guarantee their privacy policy will remain unchanged.

Keeping You Informed of the Funds' Privacy and Security Practices

The Funds will notify you annually of their privacy policy as required by federal law. While the Funds reserve the right to modify this policy at any time they will notify you promptly if this privacy policy changes.

The Funds' Security Practices

The Funds maintain appropriate physical, electronic and procedural safeguards designed to guard your nonpublic personal information. The Funds' internal data security policies restrict access to your non-public personal information to authorized employees, who may use your nonpublic personal information for Fund business purposes only.

Although the Funds strive to protect your nonpublic personal information, they cannot ensure or warrant the security of any information you provide or transmit to them, and you do so at your own risk. In the event of a breach of the confidentiality or security of your nonpublic personal information, the Funds will attempt to notify you as necessary so you can take appropriate protective steps. If you have consented to the Funds using electronic communications or electronic delivery of statements, they may notify you under such circumstances using the most current email address you have on record with them.

In order for the Funds to provide effective service to you, keeping your account information accurate is very important. If you believe that your account information is incomplete, not accurate or not current, or if you have questions about the Funds' privacy practices, write the Funds using the contact information on your account statements, email the Funds by clicking on the Funds' website at guggenheiminvestments.com, or contact the Fund at 1-800-345-7999.

ITEM 2. CODE OF ETHICS.

The registrant has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The Audit Committee of the Registrant's Board of Trustees is comprised solely of Trustees who are independent (as such term has been defined by the Securities and Exchange Commission (SEC) in regulations implementing Section 407 of the Sarbanes-Oxley Act of 2002 (the Regulations)). In addition, the Board of Trustees of the Registrant has determined that Mr. Ronald E. Toupin, Jr. qualifies as an audit committee financial expert (as such term has been defined in the Regulations) based on its review of his pertinent experience, knowledge and education.

(Under applicable securities laws, a person who is determined to be an audit committee financial expert will not be deemed an expert for any purpose, including without limitation for the purposes of Section 11 of the Securities Act of 1933, as amended, as a result of being designated or identified as an audit committee financial expert. The designation or identification of a person as an audit committee financial expert does not impose on such person any duties, obligations, or liabilities that are greater than the duties, obligations, and liabilities imposed on such person as a member of the audit committee and Board of Trustees in the absence of such designation or identification. The designation or identification of a person as an audit committee financial expert does not affect the duties, obligations or liability of any other member of the audit committee or Board of Trustees.)

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

a) Audit Fees. The aggregate fees billed in the previous fiscal years ending December 31, 2012 and December 31, 2013 (the Reporting Periods) for professional services rendered by the Registrant's principal accountant (the Auditor) for the audit of the Registrant's annual financial statements, or services that are normally provided by the Auditor in connection with the statutory and regulatory filings or engagements for the Reporting Periods, were \$27,563 in December 31, 2012 and \$41,738 in December 31, 2013.

b) Audit-Related Fees. There were no fees billed in the Reporting Periods for assurance and related services by the Auditor that are reasonably related to the performance of the audit of the Registrant's financial statements and are not reported under paragraph (a) of this Item 4.

In addition, there were no Audit-Related Fees billed in the Reporting Period for assurance and related services by the Auditor to the Registrant's investment adviser (not including any sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by or under common control with the investment adviser that provides ongoing services to the Western Asset/Claymore Inflation-Linked Opportunities & Income Fund (service affiliates), that were reasonably related to the performance of the annual audit of the service affiliates.

c) Tax Fees. The aggregate fees billed in the Reporting Periods for professional services rendered by the Auditor for tax compliance, tax advice and tax planning (Tax Services) were \$4,250 in December 31, 2012 and \$4,335 in December 31, 2013. These services consisted of (i) review or preparation of U.S. federal, state, local and excise tax returns; (ii) U.S. federal, state and local tax planning, advice and assistance regarding statutory, regulatory or administrative developments, and (iii) tax advice regarding tax qualification matters and/or treatment of various financial instruments held or proposed to be acquired or held.

There were no fees billed for tax services by the Auditors to service affiliates during the Reporting Periods that required pre-approval by the Audit Committee.

d) All Other Fees. The aggregate fees for other fees billed in the Reporting Periods for products and services provided by the Auditor were \$1,094 in December 31, 2012 and \$1,075 in December 31, 2013, other than the services reported in paragraphs (a) through (c) of this Item 4 for the Western Asset/Claymore Inflation-Linked Opportunities & Income Fund.

All Other Fees. There were no other non-audit services rendered by the Auditor to Legg Mason Partners Fund Advisors, LLC (LMPFA), and any entity controlling, controlled by or under common control with LMPFA that provided ongoing services to Western Asset/Claymore Inflation-Linked Opportunities & Income Fund requiring pre-approval by the Audit Committee in the Reporting Period.

e) Audit Committee's pre-approval policies and procedures described in paragraph (c) (7) of Rule 2-01 of Regulation S-X.

(1) The Charter for the Audit Committee (the Committee) of the Board of each registered investment company (the Fund) advised by LMPFA or one of their affiliates (each, an Adviser) requires that the Committee shall approve (a) all audit and permissible non-audit services to be provided to the Fund and (b) all permissible non-audit services to be provided by the Fund's independent auditors to the Adviser and any Covered Service Providers if the engagement relates directly to the operations and financial reporting of the Fund. The Committee may implement policies and procedures by which such services are approved other than by the full Committee.

The Committee shall not approve non-audit services that the Committee believes may impair the independence of the auditors. As of the date of the approval of this Audit Committee Charter, permissible non-audit services include any professional services (including tax services), that are not prohibited services as described below, provided to the Fund by the independent auditors, other than those provided to the Fund in connection with an audit or a review of the financial statements of the Fund. Permissible non-audit services may not include: (i) bookkeeping or other services related to the accounting records or financial statements of the Fund; (ii) financial information systems design and implementation; (iii) appraisal or valuation services, fairness opinions or contribution-in-kind reports; (iv) actuarial services; (v) internal audit outsourcing services; (vi) management functions or human resources; (vii) broker or dealer, investment adviser or investment banking services; (viii) legal services and expert services unrelated to the audit; and (ix) any other service the Public Company Accounting Oversight Board determines, by regulation, is impermissible.

Pre-approval by the Committee of any permissible non-audit services is not required so long as: (i) the aggregate amount of all such permissible non-audit services provided to the Fund, the Adviser and any service providers controlling, controlled by or under common control with the Adviser that provide ongoing services to the Fund (Covered Service Providers) constitutes not more than 5% of the total amount of revenues paid to the independent auditors during the fiscal year in which the permissible non-audit services are provided to (a) the Fund, (b) the Adviser and (c) any entity controlling, controlled by or under common control with the Adviser that provides ongoing services to the Fund during the fiscal year in which the services are provided that would have to be approved by the Committee; (ii) the permissible non-audit services were not recognized by the Fund at the time of the engagement to be non-audit services; and (iii) such services are promptly brought to the attention of the Committee and approved by the Committee (or its delegate(s)) prior to the completion of the audit.

(2) For the Western Asset/Claymore Inflation-Linked Opportunities & Income Fund, the percentage of fees that were approved by the audit committee, with respect to: Audit-Related Fees were 100% and 100% for December 31, 2012 and December 31, 2013; Tax Fees were 100% and 100% for December 31, 2012 and December 31, 2013; and Other Fees were 100% and 100% for December 31, 2012 and December 31, 2013.

f) N/A

g) Non-audit fees billed by the Auditor for services rendered to Western Asset/Claymore Inflation-Linked Opportunities & Income Fund, LMPFA and any entity controlling, controlled by, or under common control with LMPFA that provides ongoing services to Western Asset/Claymore Inflation-Linked Opportunities & Income Fund during the reporting period were \$256,353 in December 31, 2012 and \$240,000 in December 31, 2013.

h) Yes. Western Asset/Claymore Inflation-Linked Opportunities & Income Fund's Audit Committee has considered whether the provision of non-audit services that were rendered to Service Affiliates, which were not pre-approved (not requiring pre-approval), is compatible with maintaining the Accountant's independence. All services provided by the Auditor to the Western Asset/Claymore Inflation-Linked Opportunities & Income Fund or to Service Affiliates, which were required to be pre-approved, were pre-approved as required.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

- a) *Registrant has a separately - designated standing Audit Committee established in accordance with Section 3(a)(58)(A) of the Exchange Act. The Audit Committee consists of the following Board members:*

Michael Larson

Ronald A. Nyberg

Ronald E. Toupin, Jr.

- b) Not applicable.

ITEM 6. SCHEDULE OF INVESTMENTS.

Included herein under Item 1.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Proxy Voting Guidelines and Procedures

The Proxy Voting Policies and Procedures govern in determining how proxies relating to the fund's portfolio securities are voted and are provided below. Information regarding how each fund voted proxies (if any) relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge (1) by calling 1-800-345-7999, (2) on the fund's website at <http://www.guggenheimfunds.com/wiw> and (3) on the SEC's website at <http://www.sec.gov>.

Background

Western Asset Management Company (WA), Western Asset Management Company Limited (WAML), Western Asset Management Company Ltd (WAMCL) and Western Asset Management Company Pte. Ltd. (WAMC) (together Western Asset) have adopted and implemented policies and procedures that we believe are reasonably designed to ensure that proxies are voted in the best interest of clients, in accordance with our fiduciary duties and SEC Rule 206(4)-6 under the Investment Advisers Act of 1940 (Advisers Act). Our authority to vote the proxies of our clients is established through investment management agreements or comparable documents, and our proxy voting guidelines have been tailored to reflect these specific contractual obligations. In addition to SEC requirements governing advisers, our proxy voting policies reflect the long-standing fiduciary standards and responsibilities for ERISA accounts. Unless a manager of ERISA assets has been expressly precluded from voting proxies, the Department of Labor has determined that the responsibility for these votes lies with the Investment Manager.

In exercising its voting authority, Western Asset will not consult or enter into agreements with officers, directors or employees of Legg Mason Inc. or any of its affiliates (except that WA, WAML, WAMCL and WAMC may so consult and agree with each other) regarding the voting of any securities owned by its clients.

Policy

Western Asset's proxy voting procedures are designed and implemented in a way that is reasonably expected to ensure that proxy matters are handled in the best interest of our clients. While the guidelines included in the procedures are intended to provide a benchmark for voting standards, each vote is ultimately cast on a case-by-case basis, taking into consideration Western Asset's contractual obligations to our clients and all other relevant facts and circumstances at the time of the vote (such that these guidelines may be overridden to the extent Western Asset deems appropriate).

Procedures

Responsibility and Oversight

The Western Asset Compliance Department (Compliance Department) is responsible for administering and overseeing the proxy voting process. The gathering of proxies is coordinated through the Corporate Actions area of Investment Support (Corporate Actions). Research analysts and portfolio managers are responsible for determining appropriate voting positions on each proxy utilizing any applicable guidelines contained in these procedures.

Client Authority

Prior to August 1, 2003, all existing client investment management agreements (IMAs) will be reviewed to determine whether Western Asset has authority to vote client proxies. At account start-up, or upon amendment of an IMA, the applicable client IMA are similarly reviewed. If an agreement is silent on proxy voting, but contains an overall delegation of discretionary authority or if the account represents assets of an ERISA plan, Western Asset will assume responsibility for proxy voting. The Client Account Transition Team maintains a matrix of proxy voting authority.

Proxy Gathering

Registered owners of record, client custodians, client banks and trustees (Proxy Recipients) that receive proxy materials on behalf of clients should forward them to Corporate Actions. Prior to August 1, 2003, Proxy Recipients of existing clients will be reminded of the appropriate routing to Corporate Actions for proxy materials received and reminded of their responsibility to forward all proxy materials on a timely basis. Proxy Recipients for new clients (or, if Western Asset becomes aware that the applicable Proxy Recipient for an existing client has changed, the Proxy Recipient for the existing client) are notified at start-up of appropriate routing to Corporate Actions of proxy materials received and reminded of their responsibility to forward all proxy materials on a timely basis. If Western Asset personnel other than Corporate Actions receive proxy materials, they should promptly forward the materials to Corporate Actions.

Proxy Voting

Once proxy materials are received by Corporate Actions, they are forwarded to the Compliance Department for coordination and the following actions:

- a. Proxies are reviewed to determine accounts impacted.
- b. Impacted accounts are checked to confirm Western Asset voting authority.
- c. Compliance Department staff reviews proxy issues to determine any material conflicts of interest. (See conflicts of interest section of these procedures for further information on determining material conflicts of interest.)

- d. If a material conflict of interest exists, (i) to the extent reasonably practicable and permitted by applicable law, the client is promptly notified, the conflict is disclosed and Western Asset obtains the client's proxy voting instructions, and (ii) to the extent that it is not reasonably practicable or permitted by applicable law to notify the client and obtain such instructions (e.g., the client is a mutual fund or other commingled vehicle or is an ERISA plan client), Western Asset seeks voting instructions from an independent third party.
- e. Compliance Department staff provides proxy material to the appropriate research analyst or portfolio manager to obtain their recommended vote. Research analysts and portfolio managers determine votes on a case-by-case basis taking into account the voting guidelines contained in these procedures. For avoidance of doubt, depending on the best interest of each individual client, Western Asset may vote the same proxy differently for different clients. The analyst's or portfolio manager's basis for their decision is documented and maintained by the Compliance Department.
- f. Compliance Department staff votes the proxy pursuant to the instructions received in (d) or (e) and returns the voted proxy as indicated in the proxy materials.

Timing

Western Asset personnel act in such a manner to ensure that, absent special circumstances, the proxy gathering and proxy voting steps noted above can be completed before the applicable deadline for returning proxy votes.

Recordkeeping

Western Asset maintains records of proxies voted pursuant to Section 204-2 of the Advisers Act and ERISA DOL Bulletin 94-2. These records include:

- a. A copy of Western Asset's policies and procedures.
- b. Copies of proxy statements received regarding client securities.
- c. A copy of any document created by Western Asset that was material to making a decision how to vote proxies.
- d. Each written client request for proxy voting records and Western Asset's written response to both verbal and written client requests.
- e. A proxy log including:
 - 1. Issuer name;
 - 2. Exchange ticker symbol of the issuer's shares to be voted;
 - 3. Council on Uniform Securities Identification Procedures (CUSIP) number for the shares to be voted;
 - 4. A brief identification of the matter voted on;

- 5. Whether the matter was proposed by the issuer or by a shareholder of the issuer;

- 6. Whether a vote was cast on the matter;

- 7. A record of how the vote was cast; and

- 8. Whether the vote was cast for or against the recommendation of the issuer's management team.

Records are maintained in an easily accessible place for five years, the first two in Western Asset's offices.

Disclosure

Part II of the WA Form ADV, the WAML Form ADV, the WAMCL Form ADV and WAMC Form ADV, each, contain a description of Western Asset's proxy policies. Prior to August 1, 2003, Western Asset will deliver Part II of

its revised Form ADV to all existing clients, along with a letter identifying the new disclosure. Clients will be provided a copy of these policies and procedures upon request. In addition, upon request, clients may receive reports on how their proxies have been voted.

Conflicts of Interest

All proxies are reviewed by the Compliance Department for material conflicts of interest. Issues to be reviewed include, but are not limited to:

1. Whether Western Asset (or, to the extent required to be considered by applicable law, its affiliates) manages assets for the company or an employee group of the company or otherwise has an interest in the company;
2. Whether Western Asset or an officer or director of Western Asset or the applicable portfolio manager or analyst responsible for recommending the proxy vote (together, "Voting Persons") is a close relative of or has a personal or business relationship with an executive, director or person who is a candidate for director of the company or is a participant in a proxy contest; and
3. Whether there is any other business or personal relationship where a Voting Person has a personal interest in the outcome of the matter before shareholders.

Voting Guidelines

Western Asset's substantive voting decisions turn on the particular facts and circumstances of each proxy vote and are evaluated by the designated research analyst or portfolio manager. The examples outlined below are meant as guidelines to aid in the decision making process.

Guidelines are grouped according to the types of proposals generally presented to shareholders. Part I deals with proposals which have been approved and are recommended by a company's board of directors; Part II deals with proposals submitted by shareholders for inclusion in proxy statements; Part III addresses issues relating to voting shares of investment companies; and Part IV addresses unique considerations pertaining to foreign issuers.

I. Board Approved Proposals

The vast majority of matters presented to shareholders for a vote involve proposals made by a company itself that have been approved and recommended by its board of directors. In view of the enhanced corporate governance practices currently being implemented in public companies, Western Asset generally votes in support of decisions reached by independent boards of directors. More specific guidelines related to certain board-approved proposals are as follows:

1. Matters relating to the Board of Directors

Western Asset votes proxies for the election of the company's nominees for directors and for board-approved proposals on other matters relating to the board of directors with the following exceptions:

- a. Votes are withheld for the entire board of directors if the board does not have a majority of independent directors or the board does not have nominating, audit and compensation committees composed solely of independent directors.
- b. Votes are withheld for any nominee for director who is considered an independent director by the company and who has received compensation from the company other than for service as a director.
- c. Votes are withheld for any nominee for director who attends less than 75% of board and committee meetings without valid reasons for absences.

- d. Votes are cast on a case-by-case basis in contested elections of directors.

2. Matters relating to Executive Compensation

Western Asset generally favors compensation programs that relate executive compensation to a company's long-term performance. Votes are cast on a case-by-case basis on board-approved proposals relating to executive compensation, except as follows:

- a. Except where the firm is otherwise withholding votes for the entire board of directors, Western Asset votes for stock option plans that will result in a minimal annual dilution.
- b. Western Asset votes against stock option plans or proposals that permit replacing or repricing of underwater options.
- c. Western Asset votes against stock option plans that permit issuance of options with an exercise price below the stock's current market price.
- d. Except where the firm is otherwise withholding votes for the entire board of directors, Western Asset votes for employee stock purchase plans that limit the discount for shares purchased under the plan to no more than 15% of their market value, have an offering period of 27 months or less and result in dilution of 10% or less.

3. Matters relating to Capitalization

The management of a company's capital structure involves a number of important issues, including cash flows, financing needs and market conditions that are unique to the circumstances of each company. As a result, Western Asset votes on a case-by-case basis on board-approved proposals involving changes to a company's capitalization except where Western Asset is otherwise withholding votes for the entire board of directors.

- a. Western Asset votes for proposals relating to the authorization of additional common stock.
- b. Western Asset votes for proposals to effect stock splits (excluding reverse stock splits).
- c. Western Asset votes for proposals authorizing share repurchase programs.

4. Matters relating to Acquisitions, Mergers, Reorganizations and Other Transactions

Western Asset votes these issues on a case-by-case basis on board-approved transactions.

5. Matters relating to Anti-Takeover Measures

Western Asset votes against board-approved proposals to adopt anti-takeover measures except as follows:

- a. Western Asset votes on a case-by-case basis on proposals to ratify or approve shareholder rights plans.
- b. Western Asset votes on a case-by-case basis on proposals to adopt fair price provisions.

6. Other Business Matters

Western Asset votes for board-approved proposals approving such routine business matters such as changing the company's name, ratifying the appointment of auditors and procedural matters relating to the shareholder meeting.

- a. Western Asset votes on a case-by-case basis on proposals to amend a company's charter or bylaws.
- b. Western Asset votes against authorization to transact other unidentified, substantive business at the meeting.

II. Shareholder Proposals

SEC regulations permit shareholders to submit proposals for inclusion in a company's proxy statement. These proposals generally seek to change some aspect of a company's corporate governance structure or to change some aspect of its business operations. Western Asset votes in accordance with the recommendation of the company's board of directors on all shareholder proposals, except as follows:

1. Western Asset votes for shareholder proposals to require shareholder approval of shareholder rights plans.
2. Western Asset votes for shareholder proposals that are consistent with Western Asset's proxy voting guidelines for board-approved proposals.
3. Western Asset votes on a case-by-case basis on other shareholder proposals where the firm is otherwise withholding votes for the entire board of directors.

III. Voting Shares of Investment Companies

Western Asset may utilize shares of open or closed-end investment companies to implement its investment strategies. Shareholder votes for investment companies that fall within the categories listed in Parts I and II above are voted in accordance with those guidelines.

1. Western Asset votes on a case-by-case basis on proposals relating to changes in the investment objectives of an investment company taking into account the original intent of the fund and the role the fund plays in the clients' portfolios.
2. Western Asset votes on a case-by-case basis all proposals that would result in increases in expenses (e.g., proposals to adopt 12b-1 plans, alter investment advisory arrangements or approve fund mergers) taking into account comparable expenses for similar funds and the services to be provided.

IV. Voting Shares of Foreign Issuers

In the event Western Asset is required to vote on securities held in foreign issuers—i.e. issuers that are incorporated under the laws of a foreign jurisdiction and that are not listed on a U.S. securities exchange or the NASDAQ stock market, the following guidelines are used, which are premised on the existence of a sound corporate governance and disclosure framework. These guidelines, however, may not be appropriate under some circumstances for foreign issuers and therefore apply only where applicable.

1. Western Asset votes for shareholder proposals calling for a majority of the directors to be independent of management.
2. Western Asset votes for shareholder proposals seeking to increase the independence of board nominating, audit and compensation committees.
3. Western Asset votes for shareholder proposals that implement corporate governance standards similar to those established under U.S. federal law and the listing requirements of U.S. stock exchanges, and that do not otherwise violate the laws of the jurisdiction under which the company is incorporated.
4. Western Asset votes on a case-by-case basis on proposals relating to (1) the issuance of common stock in excess of 20% of a company's outstanding common stock where shareholders do not have preemptive rights, or (2) the issuance of common stock in excess of 100% of a company's outstanding common stock where shareholders have preemptive rights.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

NAME AND ADDRESS	PRINCIPAL OCCUPATION(S) DURING PAST 5 YEARS
Stephen A. Walsh Western Asset 385 East Colorado Blvd. Pasadena, CA 91101	Co-portfolio manager of the fund; Deputy Chief Investment Officer of Western Asset from 2000 to 2008; Chief Investment Officer of Western Asset since 2008.
Keith J. Gardner Western Asset 385 East Colorado Blvd. Pasadena, CA 91101	Co-portfolio manager of the fund; portfolio manager and research analyst at Western Asset since 1994.
Michael C. Buchanan Western Asset 385 East Colorado Blvd. Pasadena, CA 91101	Co-portfolio manager of the fund; Managing Director and head of U.S. Credit Products from 2003-2005 at Credit Suisse Asset Management
Paul E. Wynn Western Asset 385 East Colorado Blvd. Pasadena, CA 91101	Co-portfolio manager of the fund; portfolio manager at Western Asset for more than five years
Dennis J. McNamara Western Asset 385 East Colorado Blvd. Pasadena, CA	Co-portfolio manager of the fund; portfolio manager at Western Asset for more than five years

(a)(2): DATA TO BE PROVIDED BY FINANCIAL CONTROL

The following tables set forth certain additional information with respect to the fund's portfolio managers for the fund. Unless noted otherwise, all information is provided as of December 31, 2013.

Other Accounts Managed by Portfolio Managers

The table below identifies the number of accounts (other than the fund) for which the fund's portfolio managers have day-to-day management responsibilities and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. For each category, the number of accounts and total assets in the accounts where fees are based on performance is also indicated.

Portfolio	Registered	Other Pooled	Other
	Investment Companies	Investment Vehicles	
Stephen A. Walsh	106 registered investment companies with \$192.2 billion in total assets under management	242 Other pooled investment vehicles with \$89.0 billion in assets under management ¹	712 Other accounts with \$169.4 billion in total assets under management ²
Keith J. Gardner	30 registered investment companies with \$24.5 billion in total assets under management	29 Other pooled investment vehicles with \$12.8 billion in assets under management ³	162 Other accounts with \$36.5 billion in total assets under management ⁴
Michael C. Buchanan	42 registered investment Companies with \$32.9 billion in total assets Under management	57 Other pooled investment vehicles with \$31.2 billion in assets under management ⁵	194 Other accounts with \$48.2 billion in total assets under management ⁶
Paul E. Wynn	5 registered investment Companies with \$2.2 billion in total assets Under management	6 Other pooled investment vehicles with \$0.8 billion in assets under management	26 Other accounts with \$3.8 billion in total assets under management ⁷
Dennis J. McNamara	36 registered investment Company with \$148.7 billion in total assets Under management	22 Other pooled investment vehicles with \$10.1 billion in assets under management ⁸	135 Other accounts with \$47.9 billion in total assets under management ⁹

1 Includes 9 accounts managed, totaling \$1.6 billion, for which advisory fee is performance based.

2 Includes 57 accounts managed, totaling \$15.5 billion, for which advisory fee is performance based.

3 Includes 1 account managed, totaling \$141.0 million, for which advisory fee is performance based.

4 Includes 19 accounts managed, totaling \$7.2 billion, for which advisory fee is performance based.

5 Includes 4 accounts managed, totaling \$0.9 billion, for which advisory fee is performance based.

6 Includes 20 accounts managed, totaling \$7.3 billion, for which advisory fee is performance based.

7 Includes 4 accounts managed, totaling \$35.0 million, for which advisory fee is performance based.

8 Includes 1 account managed, totaling \$0.3 billion, for which advisory fee is performance based.

9 Includes 8 accounts managed, totaling \$1.5 billion, for which advisory fee is performance based.

The numbers above reflect the overall number of portfolios managed by employees of Western Asset Management Company (Western Asset). Mr. Walsh is involved in the management of all the Firm's portfolios, but he is not solely responsible for particular portfolios. Western Asset's investment discipline emphasizes a team approach that combines the efforts of groups of specialists working in different market sectors. He is responsible for overseeing implementation of Western Asset's overall investment ideas and coordinating the work of the various sector teams. This structure ensures that client portfolios benefit from a consensus that draws on the expertise of all team members.

(a)(3): Portfolio Manager Compensation

With respect to the compensation of the portfolio managers, Western Asset's compensation system assigns each employee a total compensation range, which is derived from annual market surveys that benchmark each role with its job function and peer universe. This method is designed to reward employees with total compensation reflective of the external market value of their skills, experience, and ability to produce desired results. Standard compensation includes competitive base salaries, generous employee benefits, and a retirement plan.

In addition, the subadviser's employees are eligible for bonuses. These are structured to closely align the interests of employees with those of the subadviser, and are determined by the professional's job function and pre-tax performance as measured by a formal review process. All bonuses are completely discretionary. The principal factor considered is a portfolio manager's investment performance versus appropriate peer groups and benchmarks (e.g., a securities index and with respect to a fund, the benchmark set forth in the fund's Prospectus to which the fund's average annual total returns are compared or, if none, the benchmark set forth in the fund's annual report). Performance is reviewed on a 1, 3 and 5 year basis for compensation with 3 years having the most emphasis. The subadviser may also measure a portfolio manager's pre-tax investment performance against other benchmarks, as it determines appropriate. Because portfolio managers are generally responsible for multiple accounts (including the funds) with similar investment strategies, they are generally compensated on the performance of the aggregate group of similar accounts, rather than a specific account. Other factors that may be considered when making bonus decisions include client service, business development, length of service to the subadviser, management or supervisory responsibilities, contributions to developing business strategy and overall contributions to the subadviser's business.

Finally, in order to attract and retain top talent, all professionals are eligible for additional incentives in recognition of outstanding performance. These are determined based upon the factors described above and include Legg Mason stock options and long-term incentives that vest over a set period of time past the award date.

Potential Conflicts of Interest

Conflicts of Interest

The manager, subadvisers and portfolio managers have interests which conflict with the interests of the fund. There is no guarantee that the policies and procedures adopted by the manager, the subadvisers and the fund will be able to identify or mitigate these conflicts of interest.

Some examples of material conflicts of interest include:

Allocation of Limited Time and Attention. A portfolio manager who is responsible for managing multiple funds and/or accounts may devote unequal time and attention to the management of those funds and/or accounts. A portfolio manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those funds and accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. Such a portfolio manager may make general determinations across multiple funds, rather than tailoring a unique approach for each fund. The effects of this conflict may be more pronounced where funds and/or accounts overseen by a particular portfolio manager have different investment strategies.

Allocation of Limited Investment Opportunities; Aggregation of Orders. If a portfolio manager identifies a limited investment opportunity that may be suitable for multiple funds and/or accounts, the opportunity may be allocated among these several funds or accounts, which may limit the fund's ability to take full advantage of the investment opportunity. Additionally, a subadviser may aggregate transaction orders for multiple accounts for purpose of execution. Such aggregation may cause the price or brokerage costs to be less favorable to a particular client than if similar transactions were not being executed concurrently for other accounts. In addition, a subadviser's trade allocation policies may result in the fund's orders not being fully executed or being delayed in execution.

Pursuit of Differing Strategies. At times, a portfolio manager may determine that an investment opportunity may be appropriate for only some of the funds and/or accounts for which he or she exercises investment responsibility, or may decide that certain of the funds and/or accounts should take differing positions with respect to a particular security. In these cases, the portfolio manager may place separate transactions for one or more funds or accounts which may affect the market price of the security or the execution of the transaction, or both, to the detriment or benefit of one or more other funds and/or accounts. For example, a portfolio manager may determine that it would be in the interest of another account to sell a security that the fund holds long, potentially resulting in a decrease in the market value of the security held by the fund.

Cross Trades. Portfolio managers may manage funds that engage in cross trades, where one of the manager's funds or accounts sells a particular security to another fund or account managed by the same manager. Cross trades

may pose conflicts of interest because of, for example, the possibility that one account sells a security to another account at a higher price than an independent third party would pay or otherwise enters into a transaction that it would not enter into with an independent party, such as the sale of a difficult-to-obtain security.

Selection of Broker/Dealers. Portfolio managers may select or influence the selection of the brokers and dealers that are used to execute securities transactions for the funds and/or accounts that they supervise. In addition to executing trades, some brokers and dealers provide subadvisers with brokerage and research services. These services may be taken into account in the selection of brokers and dealers whether a broker is being selected to effect a trade on an agency basis for a commission or (as is normally the case for the funds) whether a dealer is being selected to effect a trade on a principal basis. This may result in the payment of higher brokerage fees and/or execution at a less favorable price than might have otherwise been available. The services obtained may ultimately be more beneficial to certain of the manager's funds or accounts than to others (but not necessarily to the funds that pay the increased commission or incur the less favorable execution). A decision as to the selection of brokers and dealers could therefore yield disproportionate costs and benefits among the funds and/or accounts managed.

Variation in Financial and Other Benefits. A conflict of interest arises where the financial or other benefits available to a portfolio manager differ among the funds and/or accounts that he or she manages. If the amount or structure of the investment manager's management fee and/or a portfolio manager's compensation differs among funds and/or accounts (such as where certain funds or accounts pay higher management fees or performance-based management fees), the portfolio manager might be motivated to help certain funds and/or accounts over others. Similarly, the desire to maintain assets under management or to enhance the portfolio manager's performance record or to derive other rewards, financial or otherwise, could influence the portfolio manager in affording preferential treatment to those funds and/or accounts that could most significantly benefit the portfolio manager. A portfolio manager may, for example, have an incentive to allocate favorable or limited opportunity investments or structure the timing of investments to favor such funds and/or accounts. Also, a portfolio manager's or the manager's or a subadviser's desire to increase assets under management could influence the portfolio manager to keep a fund open for new investors without regard to potential benefits of closing the fund to new investors. Additionally, the portfolio manager might be motivated to favor funds and/or accounts in which he or she has an ownership interest or in which the investment manager and/or its affiliates have ownership interests. Conversely, if a portfolio manager does not personally hold an investment in the fund, the portfolio manager's conflicts of interest with respect to the fund may be more acute.

Related Business Opportunities. The investment manager or its affiliates may provide more services (such as distribution or recordkeeping) for some types of funds or accounts than for others. In such cases, a portfolio manager may benefit, either directly or indirectly, by devoting disproportionate attention to the management of funds and/or accounts that provide greater overall returns to the investment manager and its affiliates.

(a)(4): Portfolio Manager Securities Ownership

The table below identifies the dollar range of securities beneficially owned by each portfolio managers as of December 31, 2013.

Portfolio Manager(s)	Dollar Range of Portfolio Securities Beneficially Owned
