Item 1.01 Entry into a Material Definitive Agreement
Research Collaboration and License Agreement

On March 14, 2014, Five Prime Therapeutics, Inc. (FivePrime) entered into a Research Collaboration and License Agreement (the Collaboration Agreement) with Bristol-Myers Squibb Company (BMS) pursuant to which FivePrime and BMS will collaborate in carrying out a research program to (i) discover novel interacting proteins in two undisclosed immune checkpoint pathways (the Checkpoint Pathways) using Five Prime 's target discovery platform; (ii) further the understanding of target biology with respect to targets in these Checkpoint Pathways; and (iii) discover and pre-clinically develop compounds suitable for development for human therapeutic uses in against targets in these Checkpoint Pathways.

The initial three-year research term under the Collaboration Agreement will end in March 2017. BMS has the option to extend the research term for two additional one-year terms.

Pursuant to the Collaboration Agreement, BMS will make an upfront payment of \$20 million to FivePrime and provide \$9.5 million in research funding over the course of the initial three-year research term. FivePrime will be eligible to receive up to \$240 million per collaboration target in specified developmental, regulatory and commercialization contingent payments comprising aggregate developmental contingent payments of up to \$53 million, aggregate regulatory contingent payments of up to \$74 million and aggregate commercialization contingent payments of up to \$113 million. FivePrime will also be eligible to receive up to \$60 million in sales-based contingent payments per collaboration product.

For each commercialized product covered by the Collaboration Agreement that is directed toward a target in the Checkpoint Pathways, BMS is also obligated to pay FivePrime tiered mid-single digit to low double-digit percentage royalties, subject to reduction in certain circumstances, on net sales of such product for the longer of (i) 12 years after the first commercial sale of such product, (ii) the life of certain patents covering such product or (iii) the date on which any applicable regulatory, pediatric, orphan drug or data exclusivity with respect to such product expires. FivePrime cannot determine the date on which BMS 's potential royalty payment obligations to FivePrime would expire because BMS has not yet commercialized any products under the Collaboration Agreement and therefore FivePrime cannot identify the date of the first commercial sale or any related patents covering such product.

Unless earlier terminated by either party, the Collaboration Agreement will expire on a product-by-product and country-by-country basis upon the expiration of all of BMS 's payment obligations under the Collaboration Agreement. BMS may terminate the Collaboration Agreement in its entirety, or on a collaboration target-by-collaboration target basis at any time with advance written notice. Either party may terminate the Collaboration Agreement in its entirety, or on a collaboration target-by-collaboration target basis with written notice for the other party 's material breach if such party fails to cure the breach. Either party also may terminate the Collaboration Agreement in its entirety upon certain insolvency events involving the other party.
