TIME WARNER CABLE REPORTS

2014 FIRST-QUARTER RESULTS

Best Residential Subscriber Performance in Five Years

Highlighted by Net Addition of 148,000 Customer Relationships

Diluted EPS Increased 27% to \$1.70 per Share

TWC Maxx Rollout Has Begun in Parts of NYC and LA

NEW YORK, April 24, 2014 Time Warner Cable Inc. (NYSE: TWC) today reported financial results for its first quarter ended March 31, 2014.

Time Warner Cable Chief Executive Officer Rob Marcus said: I m very pleased with our performance this quarter. Our residential subscriber growth was the best in five years and our business services revenue growth was close to 25 percent. These results underscore our commitment to deliver on our financial and operating plan as we prepare for our merger with Comcast.

HIGHLIGHTS

Financial Highlights

First-quarter 2014 revenue grew 2.0% year over year, driven primarily by growth of 24.4% in business services revenue and 10.8% growth in residential high-speed data revenue.

Adjusted OIBDA increased 3.6% to nearly \$2.0 billion. Operating Income increased 3.0% to nearly \$1.1 billion.

Adjusted Diluted EPS increased 26.2% to \$1.78. Diluted EPS increased 26.9% to \$1.70.

First-quarter 2014 average monthly revenue per residential customer relationship (ARPU) grew 0.6% to \$105.45.

Residential high-speed data ARPU increased 8.7% to \$46.32.

Operational Highlights

Overall first-quarter residential subscriber performance was the best in five years.

- i Residential customer relationship net additions of 148,000 most in over seven years
- i Residential triple play net additions of 82,000 most since first quarter 2012
- i Residential high-speed data net additions of 269,000 most since first quarter 2008
- i Residential voice net additions of 107,000 most since first quarter 2012
- i Residential video net loss of 34,000 least in five years

TWC Maxx rollout, including high-speed data speed increases to as much as 300 Mbps, has now begun in parts of New York City and Los Angeles.

TWC's cloud-based guide with an advanced VOD portal was installed on 4.3 million set-top boxes at the end of the first quarter.

IntelligentHome net additions of 13,000 marked the best quarter ever; 57,000 customers at the end of the first quarter.

CHANGES IN BASIS OF PRESENTATION

Effective in the first quarter of 2014, the Company determined it has three reportable segments: Residential Services, Business Services and Other Operations. Additionally, during the first quarter of 2014, the Company revised its categorization of operating costs and expenses to be consistent with how such costs and expenses are presented to management and to provide a more meaningful presentation. The Company has recast its financial information and disclosures for prior periods to include (i) disclosure of segment results, which are discussed further below in Detailed Segment Results and Note 3 to the accompanying consolidated financial statements, and (ii) the revised categorization of operating costs and expenses, which had no impact on total operating costs and expenses, Operating Income or net income attributable to TWC shareholders for any period presented.

CONSOLIDATED REVENUE AND PROFITABILITY RESULTS

Revenue for the first quarter of 2014 increased 2.0% year over year primarily as a result of revenue growth at the Business Services and Other Operations segments, partially offset by a decrease at the Residential Services segment.

Adjusted Operating Income before Depreciation and Amortization (Adjusted OIBDA) for the first quarter of 2014 increased 3.6% driven by revenue growth, partially offset by a 1.1% year-over-year increase in operating expenses.

(in millions; unaudited)

Other operating	1,162	1,246	(84)		(6.7%)
Total operating costs and expenses	\$ 3,602	\$ 3,563	\$ 39		1.1%

The increase in operating expenses was primarily due to increased sales and marketing costs at the Residential Services and Business Services segments; higher programming costs at the Residential Services segment; and growth in costs associated with advertising inventory sold on behalf of other video distributors at the Other Operations segment; partially offset by a decline in voice costs at the Residential Services and Business Services segments and lower costs associated with the Company's shared functions. The growth in total operating expenses also benefited from a \$34 million decrease in pension expense.

Average monthly programming costs per total video subscriber grew 10.1% year over year to \$36.51 for the first quarter of 2014.

Operating Income for the first quarter of 2014 increased 3.0% primarily due to higher Adjusted OIBDA and lower depreciation expense, partially offset by higher merger-related and restructuring costs. Merger-related and restructuring costs for the first quarter of 2014 included Comcast merger-related costs of \$62 million (employee retention costs of \$29 million and advisory and legal fees of \$33 million), DukeNet Communications merger-related costs of \$1 million and \$17 million of restructuring costs primarily associated with employee terminations and other exit costs.

DETAILED SEGMENT RESULTS

Residential Services

Residential Services revenue declined as a result of decreases in video and voice revenue, partially offset by an increase in high-speed data revenue.

Residential video revenue decreased primarily due to a year-over-year decline in video subscribers.

The growth in residential high-speed data revenue was the result of an increase in average revenue per subscriber, primarily due to increases in prices and equipment rental charges and a greater percentage of subscribers purchasing higher-priced tiers of service, as well as growth in high-speed data subscribers.

Residential voice revenue decreased due to lower average revenue per subscriber and fewer voice subscribers compared to the prior year.

Adjusted OIBDA ^(a)	\$ 2,132	\$ 2,171	\$ (39)	(1.8%)

(a) Refer to Note 4 to the accompanying consolidated financial statements for a definition of Adjusted OIBDA. The decrease in Adjusted OIBDA was driven by the decrease in revenue discussed above, partially offset by a 0.2% decrease in operating costs and expenses as a result of lower other operating costs, partially offset by increases in sales and marketing costs and programming costs.

Sales and marketing costs increased 19.9% to \$385 million primarily due to increased marketing activities as well as headcount growth and higher compensation costs per employee, particularly in retention.

Programming costs (which include intercompany expense from the Other Operations segment for programming costs associated with the Company's Los Angeles Lakers regional sports networks, local sports, news and lifestyle channels and, beginning in 2014, SportsNet LA, a third-party regional sports network carrying the Los Angeles Dodgers baseball games and other sports programming) grew 2.9% to \$1.3 billion primarily due to an increase in average monthly programming costs per video subscriber, partially offset by a decline in video subscribers. Average monthly programming costs per residential video subscriber grew 10.2% year over year to \$37.69 for the first quarter of 2014, primarily driven by contractual rate increases.

Other operating costs decreased 34.8% to \$167 million primarily due to declines in voice costs and bad debt expense. Voice costs were down \$61 million due to the in-sourcing of voice transport, switching and interconnection services, as well as a year-over-year decline in voice subscribers.

The increase in Adjusted OIBDA was driven by growth in revenue, partially offset by a 7.1% increase in operating costs and expenses, primarily related to growth in costs associated with advertising inventory sold on behalf of other video distributors.

Shared Functions

Operating costs associated with broad corporate functions (e.g., accounting and finance, information technology, executive management, legal and human resources) or functions supporting more than one reportable segment that are centrally managed (e.g., facilities, network operations, vehicles and procurement) as well as other activities not directly attributable to a reportable segment decreased 1.2% year over year to \$727 million for the first quarter of 2014. This decrease was driven by operating efficiencies, including decreased headcount, particularly in information technology.

CONSOLIDATED NET INCOME

Net Income Attributable to TWC Shareholders was \$479 million, or \$1.71 per basic common share and \$1.70 per diluted common share, for the first quarter of 2014 compared to \$401 million, or \$1.35 per basic common share and \$1.34 per diluted common share, for the first quarter of 2013.

Adjusted Net Income Attributable to TWC Shareholders and **Adjusted Diluted EPS**, which exclude certain items affecting the comparability of TWC's results for 2014 and 2013 detailed in Note 2 to the accompanying consolidated financial statements, were \$503 million and \$1.78, respectively, for the first quarter of 2014 compared to \$423 million and \$1.41, respectively, for the first quarter of 2013. Adjusted Diluted EPS for the first quarter of 2014 benefited from lower average common shares outstanding as a result of share repurchases under the Company's stock repurchase program.

SELECTED BALANCE SHEET AND CASH FLOW INFORMATION

Free Cash Flow for the first three months of 2014 decreased 4.8% to \$629 million from \$661 million in the first three months of 2013, due mainly to an increase in capital expenditures. **Capital Expenditures**, which totaled \$834 million for the first three months of 2014, increased primarily due to the Company's investments to improve network reliability, upgrade older customer premise equipment and expand its network to additional residences, commercial buildings and cell towers. **Cash Provided by Operating Activities** for the first three months of 2014 was \$1.4 billion, a 0.2% increase from the first three months of 2013. This slight increase was primarily driven by higher Adjusted OIBDA and lower net interest payments, partially offset by an increase in working capital requirements.

RETURN OF CAPITAL

Time Warner Cable returned \$422 million to shareholders during the first quarter of 2014. During the first quarter of 2014, share repurchases totaled \$208 million or 1.5 million shares of common stock prior to the suspension of the TWC stock repurchase program on February 13, 2014 as a result of the Company's entry into the merger agreement with Comcast. As of March 31, 2014, \$2.7 billion remained under the Company's share repurchase authorization. Time Warner Cable also paid a regular dividend of \$0.75 per share of common stock, \$214 million in aggregate, during the first quarter of 2014.

Non-GAAP Financial Measures

The Company refers to certain financial measures that are not presented in accordance with U.S. generally accepted accounting principles (GAAP), including OIBDA, Adjusted OIBDA, Adjusted net income attributable to TWC shareholders, Adjusted Diluted EPS and Free Cash Flow. Refer to Note 4 to the accompanying consolidated financial statements for a discussion of the Company's use of non-GAAP financial measures.

1. COMCAST MERGER

On February 12, 2014, Time Warner Cable Inc. (TWC or the Company) entered into an Agreement and Plan of Merger with Comcast Corporation (Comcast) whereby the Company agreed to merge with and into a 100% owned subsidiary of Comcast (the Comcast merger). Upon completion of the Comcast merger, all of the outstanding shares of the Company will be cancelled and each issued and outstanding share will be converted into the right to receive 2.875 shares of Class A common stock of Comcast. The Comcast merger, which is expected to close by the end of 2014, is subject to the approval of the Company's and Comcast's stockholders, regulatory approvals and certain other closing conditions. Charter Communications, Inc., which in January 2014 disclosed an unsolicited bid to acquire the Company, has indicated that it intends to solicit proxies from the Company's stockholders in opposition to the Comcast merger.

3. RECONCILIATION OF ADJUSTED OIBDA TO OPERATING INCOME AND OTHER SEGMENT INFORMATION

Consolidated information for the three months ended March 31, 2014 and 2013 is as follows:

<i>(in millions)</i>	1st Quarter			
	2014	2013	Change	
			\$	%
Adjusted OIBDA ^(a)	\$ 1,980	\$ 1,912	\$ 68	3.6%

Amortization	(33)	(32)	(1)	3.1%
Operating Income	\$ 1,092	\$ 1,060	\$ 32	3.0%

(a) Refer to Note 4 for definitions of OIBDA and Adjusted OIBDA.

(b) Adjusted OIBDA margin is defined as Adjusted OIBDA as a percentage of total revenue.

Effective in the first quarter of 2014, the Company determined it has three reportable segments. The Company has recast its financial information and disclosures for the prior period to reflect the segment disclosures as if the current presentation had been in effect throughout all periods presented.

The Company classifies its operations into the following reportable segments:

Residential Services, which principally consists of video, high-speed data and voice services provided to residential customers as well as other residential services, including home automation and monitoring.

Business Services, which principally consists of data, video and voice services provided to business customers as well as other business services, including enterprise-class, cloud-enabled hosting, managed applications and services.

Other Operations, which principally consists of (i) Time Warner Cable Media (TWC Media), the advertising arm of TWC, (ii) TWC-owned and/or operated regional sports networks (RSNs) and local sports, news and lifestyle channels (e.g., Time Warner Cable News NY1) and (iii) other operating revenues and costs, including those derived from the Advance/Newhouse Partnership and home shopping network-related services. The business units reflected in the Other Operations segment individually do not meet the thresholds to be reported as separate reportable segments.

In addition to the above reportable segments, the Company has shared functions (referred to as Shared Functions) that include activities not attributable to a specific reportable segment. Shared Functions consists of operating costs and

expenses associated with broad corporate functions (e.g., accounting and finance, information technology, executive management, legal and human resources) or functions supporting more than one reportable segment that are centrally managed (e.g., facilities, network operations, vehicles and procurement) as well as other activities not attributable to a reportable segment. As such, the reportable segment results reflect how management views such segments in assessing financial performance and allocating resources and are not necessarily indicative of the results of operations that each segment would have achieved had they operated as stand-alone entities during the periods presented.

In evaluating the profitability of the Company's segments, the components of net income (loss) below OIBDA, as defined below, are not separately evaluated by management at the segment level. Due to the nature

of the Company's operations, a majority of its assets, including its distribution systems, are utilized across the Company's operations and are not segregated by segment. In addition, segment assets are not reported to, or used by, management to allocate resources or assess the performance of the Company's segments. Accordingly, the Company has not disclosed asset information by segment.

Segment information for the three months ended March 31, 2014 and 2013 is as follows:

(in millions)

	1st Quarter 2014					
	Residential Services Segment	Business Services Segment	Other Operations Segment	Shared Functions	Intersegment Eliminations	Total Consolidated

Depreciation						(789)
Amortization						(32)
Operating Income						\$ 1,060

(a) All revenue included in Intersegment Eliminations is associated with the Other Operations segment.

(b) Refer to Note 4 for definitions of OIBDA and Adjusted OIBDA.

Intersegment Eliminations relates to the programming provided to the Residential Services and Business Services segments by the Company's RSNs and local sports, news and lifestyle channels. These services are reflected as programming expense for the Residential Services and Business Services segments and as revenue for the Other Operations segment.

4. USE OF NON-GAAP FINANCIAL MEASURES

In discussing its consolidated and segment performance, the Company may use certain measures that are not calculated and presented in accordance with U.S. generally accepted accounting principles (GAAP). These measures include OIBDA, Adjusted OIBDA, Adjusted net income attributable to TWC shareholders, Adjusted Diluted EPS and Free Cash Flow, which the Company defines as follows:

OIBDA (Operating Income before Depreciation and Amortization) means Operating Income before depreciation of tangible assets and amortization of intangible assets.

Adjusted OIBDA means OIBDA excluding the impact, if any, of noncash impairments of goodwill, intangible and fixed assets; gains and losses on asset sales; and merger-related and restructuring costs.

Adjusted net income attributable to TWC shareholders means net income attributable to TWC shareholders (as defined under GAAP) excluding the impact, if any, of noncash impairments of goodwill, intangible and fixed assets and investments; gains and losses on asset sales; merger-related and restructuring costs; changes in the Company's equity award reimbursement obligation to Time Warner; and certain changes to income tax provision; as well as the impact of taxes on the above items. Similarly, *Adjusted Diluted EPS* means net income per diluted common share attributable to TWC common shareholders excluding the above items.

Free Cash Flow means cash provided by operating activities (as defined under GAAP) excluding the impact, if any, of cash provided or used by discontinued operations, plus (i) any income taxes paid on investment sales and (ii) any excess tax benefit from equity-based compensation, less (i) capital expenditures, (ii) cash paid for other intangible assets (excluding those associated with business combinations), (iii) partnership distributions to third parties and (iv) principal payments on capital leases.

Management uses OIBDA and Adjusted OIBDA, among other measures, in evaluating the Company's consolidated and segment performance because they eliminate the effects of (i) considerable amounts of noncash depreciation and amortization and (ii) items not within the control of the Company's operations managers (such as income tax provision, other income (expense), net, and interest expense, net). Adjusted OIBDA further eliminates the effects of certain noncash items identified in the definition of Adjusted OIBDA above. Management also uses these measures to allocate resources and capital to the segments. Adjusted OIBDA is also a significant performance measure used in the Company's annual incentive compensation programs. Adjusted net income attributable to TWC shareholders and Adjusted Diluted EPS are considered important indicators of the operational strength of the Company as these measures eliminate amounts that do not reflect the fundamental performance of the Company. The Company utilizes Adjusted Diluted EPS, among other measures, to evaluate its performance both on an absolute basis and relative to its peers and the broader market. Management believes that Free Cash Flow is an important indicator of the Company's ability to generate cash, reduce net debt, pay dividends, repurchase common stock and make strategic investments,

after the payment of cash taxes, interest and other cash items. In addition, all of these measures are commonly used by analysts, investors and others in evaluating the Company's performance and liquidity.

These measures have inherent limitations. For example, OIBDA and Adjusted OIBDA do not reflect capital expenditures or the periodic costs of certain capitalized assets used in generating revenue. To compensate for

TIME WARNER CABLE INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Unaudited)

such limitations, management evaluates performance through Free Cash Flow, which reflects capital expenditure decisions, and net income attributable to TWC shareholders, which reflects the periodic costs of capitalized assets. Adjusted OIBDA does not reflect any of the items noted as exclusions in the definition of Adjusted OIBDA above. To compensate for these limitations, management evaluates performance through OIBDA and net income attributable to TWC shareholders, which do reflect such items. OIBDA and Adjusted OIBDA also fail to reflect the significant costs borne by the Company for income taxes and debt servicing costs, the results of the Company's equity investments and other non-operational income or expense. Additionally, Adjusted net income attributable to TWC shareholders and Adjusted Diluted EPS do not reflect certain charges that affect the operating results of the Company and they involve judgment as to whether items affect fundamental operating performance. Management compensates for these limitations by using other analytics such as a review of net income attributable to TWC shareholders. Free Cash Flow, a liquidity measure, does not reflect payments made in connection with investments and acquisitions, which reduce liquidity. To compensate for this limitation, management evaluates such investments and acquisitions through other measures such as return on investment analyses.

These non-GAAP measures should be considered in addition to, not as substitutes for, the Company's Operating Income, net income attributable to TWC shareholders and various cash flow measures (e.g., cash provided by operating activities), as well as other measures of financial performance and liquidity reported in accordance with GAAP, and may not be comparable to similarly titled measures used by other companies.
