Letter from the Chairman of the Board & President

Hans W. Kertess

*Chairman of the Board*

Julian Sluyters

*President & Chief Executive Officer*

Dear Stockholders/Shareholders:

After three years of generally moderate growth, the US economy contracted during the first quarter of 2014. Despite this, US equities rallied sharply. The US bond market also posted a positive return during the reporting period.

For the six month reporting period ended June 30, 2014:

n PCM Fund, Inc. returned 5.58% on net asset value ( NAV ) and 9.61% on market price.

n PIMCO Dynamic Credit Income Fund returned 8.39% on NAV and 10.32% on market price.

After several years of positive growth, severe winter weather in parts of the US constrained the US economy in early 2014. Looking back, gross domestic product ( GDP ), the value of goods and services produced in the country, the broadest measure of US economic activity and the principal indicator of economic performance, expanded at a revised 3.5% annual pace during the fourth quarter of 2013. GDP contracted at an annual pace of 2.1% during the first quarter of 2014. However, this appeared to be a temporary setback, as the US Commerce Department's initial estimate showed that GDP expanded at a 4.0 % annual pace during the second quarter of 2014.

The Federal Reserve (the Fed ) maintained an accommodative monetary

stance during the reporting period. Announcements and actions related to the reduction of the Fed's monthly asset purchase program contributed to bond-yield volatility over the January to June period. The markets have also been scrutinizing Fed statements related to when interest rates would begin to rise. In June, the Fed repeated that it would not raise rates in the near future, saying that it likely will be appropriate to maintain the current target range for the federal funds rate for a considerable time after the purchase program ends, especially if projected inflation continues to run below the Committee's 2 percent longer-run goal, and provided that longer-term inflation expectations remain well anchored.

## Outlook

We remain optimistic on the US economic recovery, as the first-quarter GDP decline was followed by a meaningful bounce during the second quarter.

Federal Reserve officials have tied the outlook for monetary policy to incoming economic data. Based on our forecasts for growth we believe that Fed asset purchases could end in the fourth quarter of 2014, with lift-off in the fed funds rate possible in mid-2015.

## Fund Insights

PCM Fund, Inc.

PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### PCM Fund, Inc.

For the six-month reporting period ended June 30, 2014, PCM Fund, Inc. (the Fund ) returned 5.58% on NAV and 9.61% on market price, outperforming the unmanaged Barclays CMBS Investment Grade Index<sup>1</sup> (the benchmark index ), which returned 2.62% during the reporting period.

The US fixed income market experienced periods of volatility during the six-month reporting period ended June 30, 2014. This was triggered by a number of factors, including mixed economic data, Fed asset purchase tapering and numerous geopolitical issues. All told, short-term Treasury yields rose during the reporting period, whereas longer-term Treasury yields declined. Longer-term Treasury yields fell from their peak in late 2013, as investor risk aversion increased due to concerns about moderating global growth and uncertainties overseas. The benchmark 10-year Treasury bond began the fiscal period yielding 3.04% and ended the period at 2.53%.

The spread sectors (non-US Treasuries) posted positive returns and generally outperformed equal-duration Treasuries over the six months ended June 30, 2014. In particular, high yield corporate bonds performed well, as the Barclays Global High Yield Index gained 6.06% during the reporting period. In contrast, the overall US fixed income market (as measured by the Barclays US Aggregate Index) rose 3.93%, whereas the commercial mortgage-backed securities ( CMBS ) market, as measured by the

benchmark index, returned 2.62%. The CMBS market benefited from strong investor demand, a strengthening economic environment and improving commercial real estate valuations. Within the CMBS market, lower rated securities outperformed higher rated investments, as fixed-rate BBB CMBS generated strong results than fixed-rate AAA CMBS.

### Spread sectors drive results

The Fund s exposure to the Banking sector contributed to performance during the reporting period. It generated strong results given improving fundamentals, muted volatility and a continuation of the gradual economic recovery. Also contributing to the Fund s performance was an allocation to non-agency mortgage-backed securities. The sector benefited from generally robust demand from investors looking to generate incremental yield in the relatively low interest rate environment. A lack of new supply and overall improvement in housing prices also supported the sector.

Detracting from performance was the Fund s allocation to super-senior CMBS as CMBS positioned high in the capital structure underperformed the lower rated (less senior) portion of the CMBS capital structure.

### PIMCO Dynamic Credit Income Fund

For the six months ended June 30, 2014, PIMCO Dynamic Credit Income Fund (the Fund ) returned 8.39% on NAV and 10.32% on market price. In comparison, the 80% Barclays Investment Grade Index/20% BofA High Yield

1. The Barclays CMBS Investment Grade Index is an index designed to mirror commercial mortgage-backed securities of investment grade quality (Baa3/BBB-/BBB- or above) using Moody's, S&P, and Fitch respectively, with maturity of at least one year.

4 Semi-Annual Report | June 30, 2014

Index (the benchmark index ) returned 5.67%, while the Barclays Global Credit Index, the BofA Merrill Lynch Global High Yield BB/B Constrained Index and the Credit Suisse Leveraged Loan Index returned 5.45%, 5.83% and 2.77%, respectively, during the same period.

The US fixed income market experienced periods of volatility during the six-month reporting period ended June 30, 2014. This was triggered by a number of factors, including mixed economic data, Fed asset purchase tapering and numerous geopolitical issues. All told, short-term Treasury yields rose during the reporting period, whereas longer-term Treasury yields declined. Longer-term Treasury yields fell from their peak in late 2013, as investor risk aversion increased due to concerns about moderating global growth and uncertainties overseas. The benchmark 10-year Treasury bond began the fiscal period yielding 3.04% and ended the period at 2.53%. The spread sectors (non-US Treasuries) posted positive returns and generally outperformed equal-duration Treasuries over the six months ended June 30, 2014.

### **Sector exposure positive for performance**

An allocation to non-agency mortgage-backed securities was a significant contributor to performance. The sector was supported by positive supply supply/demand technicals and improving housing prices. The Fund's security selection within financials benefited results, as those bonds outperformed the broader credit market during the reporting period. Also within the credit market, the Fund's overweightings to raw materials, media/cable and energy/pipelines were positive, as these sectors outperformed the broad credit market. A tactical exposure to emerging markets ( EM ) contributed to results, as EM bonds outperformed the overall credit market during the reporting period. The EM asset class was supported by declining yields and tightening spreads. Finally, a tactical exposure to the Australian dollar contributed to performance.

On the downside, an underweight to US duration, especially to the long end of the yield curve, was negative as US rates generally declined during the six month reporting period.

## Performance & Statistics

PCM Fund, Inc.

PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited) (continued)

\* Bond ratings apply to the underlying holdings of the Funds and not the Funds themselves and are divided into categories ranging from highest to lowest credit quality, determined for purposes of this presentation by using ratings provided by Moody's Investors Service, Inc. (Moody's). The Funds use ratings provided by Moody's for this purpose, among other reasons, because of the access to background information and other materials provided by Moody's, as well as the Funds' consideration of industry practice. When a bond is not rated by Moody's, it is designated in the chart above as NR for not rated. Credit quality ratings assigned by a rating agency are subjective opinions, not statements of fact, and are subject to change periodically, even as frequently as daily. Ratings assigned by Moody's or another rating agency are not absolute standards of credit quality and do not evaluate market risk. Rating agencies may fail to make timely changes in credit ratings, and an issuer's current financial condition may be better or worse than a rating indicates. In formulating investment decisions for the Funds, Pacific Investment Management Company LLC, the sub-adviser to the Funds, develops its own analysis of the credit quality and risks associated with individual debt instruments, rather than relying exclusively on rating agencies or third-party research.

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all dividends and distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about each Fund, market conditions, supply and demand for each Fund's shares, or changes in each Fund's dividends.

An investment in each Fund involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one time public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets attributable to shareholders less total liabilities divided by the number of shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly dividend per share (comprised of net investment income) by the market price per common share at June 30, 2014.

(3) Represents Reverse Repurchase Agreements (Leverage) that may be outstanding, as a percentage of total managed assets. Total managed assets refer to the total assets (including assets attributable to leverage minus accrued liabilities (other than liabilities representing leverage)).

**Notes to Schedule of Investments:**

- (a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$59,454,182, representing 45.6% of net assets.
- (b) Illiquid.
- (c) These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the LIBOR or the prime rate offered by one or more major United States banks, or the certificate of deposit rate. These securities are generally considered to be restricted as the Fund is ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of senior loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty. The interest rate disclosed reflects the rate in effect on June 30, 2014.
- (d) 144A Exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (e) When-issued or delayed-delivery. To be settled/delivered after June 30, 2014.
- (f) In default.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

- (g) Fair-Valued Securities with an aggregate value of \$3,902,592, representing 3.0% of net assets. See Note 1(a) and Note 1(b) in the Notes to Financial Statements.
- (h) All or partial amount segregated for the benefit of the counterparty as collateral for derivatives.
- (i) All or partial amount transferred for the benefit of the counterparty as collateral for reverse repurchase agreements.
- (j) Restricted. The aggregate acquisition cost of such securities is \$9,655,640. The aggregate value is \$9,442,906, representing 7.2% of net assets.
- (k) Variable or Floating Rate Security Securities with an interest rate that changes periodically. The interest rate disclosed reflects the rate in effect on June 30, 2014.
- (l) Rates reflect the effective yields at purchase date.
- (m) Non-income producing.

(n) Credit default swap agreements outstanding at June 30, 2014:

**OTC sell protection swap agreements:**

Swap Counterparty/ Referenced Debt Issuer	Notional Amount (000s)(1)	Credit Spread	Termination Date	Payments Received	Value(2)	Upfront Premiums Received	Unrealized Appreciation
Royal Bank of Scotland:							
ABX.HE AA 06-1	\$6,719		7/25/45	0.32%	\$(1,447,511)	\$(3,947,965)	\$2,500,454
ABX.HE AAA 07-1	2,379		8/25/37	0.09%	(548,380)	(1,177,691)	629,311
					\$(1,995,891)	\$(5,125,656)	\$3,129,765

Credit Spread not quoted for asset-backed securities.

- (1) This represents the maximum potential amount the Fund could be required to make available as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

## Schedule of Investments

PCM Fund, Inc.

June 30, 2014 (unaudited) (continued)

(2) The quoted market prices and resulting values for credit default swap agreements serve as an indicator of the status at June 30, 2014 of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement have been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(o) At June 30, 2014, the Fund held \$50,000 in cash as collateral for derivative contracts. Cash collateral held may be invested in accordance with the Fund's investment strategy.

(p) Open reverse repurchase agreements at June 30, 2014:

	2,308,893	Analytical Model	Estimated Recovery Value	\$100.75	

Paydown shortfall.

\* Other financial instruments are derivatives, such as swap agreements, which are valued at the unrealized appreciation (depreciation) of the instrument.

**Schedule of Investments**

PCM Fund, Inc.

June 30, 2014 (unaudited) (continued)

\*\* Transferred out of Level 2 into Level 3 because an evaluated price from a third-party pricing vendor was not available.

\*\*\* Transferred out of Level 3 into Level 2 because an evaluated price with observable inputs from a third-party pricing vendor became available.

The net change in unrealized appreciation/depreciation of Level 3 investments held at June 30, 2014, was \$70,966. Net realized gain (loss) and net change in unrealized appreciation/depreciation are reflected on the Statement of Operations.

(s) The following is a summary of the derivative instruments categorized by risk exposure:  
The effect of derivatives on the Statement of Assets and Liabilities at June 30, 2014:

Location	Credit Contracts
<b>Asset derivatives:</b>	
Unrealized appreciation of OTC swaps	\$3,129,765

The effect of derivatives on the Statement of Operations for the six months ended June 30, 2014:

Location	Credit Contracts
<b>Net realized gain on:</b>	
Swaps	\$518,494
<b>Net change in unrealized appreciation/depreciation of:</b>	
Swaps	\$47,155

The average volume (measured at each fiscal quarter-end) of derivative activity during the six months ended June 30, 2014:

Credit Default Swap Agreements(1)

Sell  
\$11,183

(1) Notional Amount (in thousands)

Financial Assets and Derivative Assets, and Collateral Received at June 30, 2014:

	<b>Net Assets 100.0%</b>	<b>\$3,442,740,554</b>

**Notes to Schedule of Investments:**

- (a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$2,684,669,997, representing 78.0% of net assets.
- (b) Illiquid.
- (c) These securities generally pay interest at rates which are periodically pre-determined by reference to a base lending rate plus a premium. These base lending rates are generally either the lending rate offered by one or more major European banks, such as the LIBOR or the prime rate offered by one or more major United States banks, or the certificate of deposit rate. These securities are generally considered to be restricted as the Fund is ordinarily contractually obligated to receive approval from the Agent bank and/or borrower prior to disposition. Remaining maturities of senior loans may be less than the stated maturities shown as a result of contractual or optional payments by the borrower. Such prepayments cannot be predicted with certainty. The interest rate disclosed reflects the rate in effect on June 30, 2014.
- (d) 144A Exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (e) When-issued or delayed-delivery. To be settled/delivered after June 30, 2014.
- (f) In default.
- (g) Fair-Valued Securities with an aggregate value of \$94,343,229, representing 2.7% of net assets. See Note 1(a) and Note 1(b) in the Notes to Financial Statements.

- (h) Perpetual maturity. The date shown, if any, is the next call date. For Corporate Bonds & Notes the interest rate is fixed until the first call date and variable thereafter.
- (i) Inflationary Bonds Principal amount of security is adjusted for inflation/deflation.
- (j) All or partial amount segregated for the benefit of the counterparty as collateral for derivatives.
- (k) All or partial amount transferred for the benefit of the counterparty as collateral for reverse repurchase agreements.
- (l) Restricted. The aggregate acquisition cost of such securities is \$316,711,020. The aggregate value is \$331,568,787, representing 9.6% of net assets.
- (m) Dividend rate is fixed until the first call date and variable thereafter.
- (n) Variable or Floating Rate Security Securities with an interest rate that changes periodically. The interest rate disclosed reflects the rate in effect on June 30, 2014.
- (o) Rates reflect the effective yields at purchase date.
- (p) Total return swap agreements on convertible securities outstanding at June 30, 2014:

Swap Counterparty	Pay/Receive	Underlying Asset	# of Units	Financing Rate	Maturity Date	Notional Amount	Upfront Premiums Paid	Unrealized Appreciation	Asset	Liability

- (1) This represents the maximum potential amount the Fund could be required to make available as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (2) The quoted market prices and resulting values for credit default swap agreements serve as an indicator of the status at June 30, 2014 of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement have been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Credit Contracts	1,475,687	Analytical Model	Estimated Recovery Value	\$151.54

\* Other financial instruments are derivatives, such as swap agreements and forward foreign currency contracts, which are valued at the unrealized appreciation (depreciation) of the instrument.

\*\*

Transferred out of Level 2 into Level 3 because an evaluated price with observable inputs from a third-party pricing vendor was not available.

\*\*\* Transferred out of Level 3 into Level 2 because an evaluated price with observable inputs from a third-party pricing vendor became available.

The net change in unrealized appreciation/depreciation of Level 3 investments held at June 30, 2014, was \$2,543,390. Net realized gain (loss) and net change in unrealized appreciation/depreciation are reflected on the Statement of Operations.

(x) The following is a summary of the derivative instruments categorized by risk exposure: The effect of derivatives on the Statement of Assets and Liabilities at June 30, 2014:

Location	Interest Rate Contracts	Credit Contracts	Foreign Exchange Contracts	Total
<b>Asset derivatives:</b>				
Unrealized appreciation of OTC swaps	\$	\$5,254,825	\$	\$5,254,825
Receivable for variation margin on centrally cleared swaps*	474,258			474,258

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies

PCM Fund, Inc. ( PCM ) and PIMCO Dynamic Credit Income Fund ( Dynamic Credit Income ), (each a Fund and collectively the Funds ) commenced operations on September 2, 1993 and January 31, 2013, respectively. Prior to commencing operations, the Funds had no operations other than matters relating to their organization as non-diversified, closed-end management investment companies registered under the Investment Company Act of 1940, as amended, and the rules and regulations thereunder. Dynamic Credit Income sold and issued 4,189 shares at an aggregate price of \$100,012 to Allianz Asset Management of America L.P. ( AAM ). PCM is organized as a Maryland corporation. Dynamic Credit Income is organized as a Massachusetts business trust. Allianz Global Investors Fund Management LLC ( AGIFM or the Investment Manager ) and Pacific Investment Management Company LLC ( PIMCO or the Sub-Adviser ) serve as the Funds investment manager and sub-adviser, respectively, and are indirect, wholly-owned subsidiaries of AAM. AAM is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. PCM has the authority to issue 300 million shares of \$0.001 par value common stock. Dynamic Credit Income has authorized unlimited amount of shares with \$0.00001 par value.

Dynamic Credit Income issued 121,000,000 shares in its initial public offering. An additional 16,204,500 shares were issued in connection with the underwriter s over-allotment option. These shares were all issued at \$25.00 per share before an underwriting discount of \$1.125 per share. Offering costs of \$1,895,440 (representing approximately \$0.01 per share) were offset against the proceeds of the offering and over-allotment option and have been charge to paid-in capital in excess of par. The

Sub-Adviser paid all organizational costs of approximately \$25,000.

PCM s primary investment objective is to achieve high current income. Capital gain from the disposition of investments is a secondary objective of the Fund. Dynamic Credit Income s primary investment objective is to seek current income. Capital appreciation is a secondary objective of the Fund. There can be no assurance that the Funds will meet their stated objectives.

The preparation of the Funds financial statements in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ) requires the Funds management to make estimates and assumptions that affect the reported amounts and disclosures in the Funds financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

The following is a summary of significant accounting policies consistently followed by the Funds:

**(a) Valuation of Investments**

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services. The Funds' investments are valued

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Centrally cleared swaps and exchange traded futures are valued at the price determined by the relevant exchange. Securities purchased on a when-issued or delayed-delivery basis are marked to market daily until settlement at the forward settlement date.

The Board of Directors/Trustees (the Board) has adopted procedures for valuing portfolio securities and other financial instruments in circumstances where market quotes are not readily available, and has delegated the responsibility for applying the valuation methods to the Investment Manager and Sub-Adviser. The Funds' Valuation Committee was established by the Board to oversee the implementation of the Funds' valuation methods and to make fair value determinations on behalf of the Board, as instructed. The Sub-Adviser monitors the continued appropriateness of methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Sub-Adviser determines that a valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board shall review the appropriateness of the valuation methods and these methods may be amended or

supplemented from time to time by the Valuation Committee.

Benchmark pricing procedures are used as the basis for setting the base price of a fixed-income security and for subsequently adjusting the price proportionally to market value changes of a pre-determined security deemed to be comparable in duration, generally a U.S. Treasury or sovereign note based on country of issuance. The base price may be a broker-dealer quote, transaction price, or an internal value as derived by analysis of market data. The base price of the security may be reset on a periodic basis based on the availability of market data and procedures approved by the Valuation Committee. The validity of the fair value is reviewed by the Sub-Adviser on a periodic basis and may be amended as the availability of market data indicates a material change.

Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing premium or discount based on their value on the 61<sup>st</sup> day prior to maturity, if the original term to maturity exceeded 60 days.

Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the net asset value (NAV) of each Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange (NYSE) is closed.

The prices used by the Funds to value investments may differ from the value that would be realized if the investments were sold, and these differences could be material to the Funds' financial statements. Each Fund's NAV is

### 1. Organization and Significant Accounting Policies (continued)

normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the NYSE on each day the NYSE is open for business.

#### (b) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- n Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access
- n Level 2 valuations based on other significant observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates or other market corroborated inputs
- n Level 3 valuations based on significant unobservable inputs (including the Sub-Adviser's or Valuation Committee's own assumptions and securities whose price was determined by using a single broker's quote)

The valuation techniques used by the Funds to measure fair value during the six months ended June 30, 2014 were intended to maximize the use of observable inputs and to minimize the use of unobservable inputs.

The Funds' policy is to recognize transfers between levels at the end of the reporting period. An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to the fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume

and level of activity for an asset or liability and regardless of the valuation techniques used. Investments categorized as Level 1 or 2 as of period end may have been transferred between Levels 1 and 2 since the prior period due to changes in the valuation method utilized in valuing the investments.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities within Level 2 and Level 3, in accordance with U.S. GAAP.

**Equity Securities (Common and Preferred Stock)** Equity securities traded in inactive markets are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity

securities are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**U.S. Treasury Obligations** U.S. Treasury obligations are valued by independent pricing services based on pricing models that evaluate the mean between the most recently quoted bid and ask price. The models also take into consideration data received from active market makers and broker-dealers, yield curves, and the spread over comparable U.S. Treasury issues. The spreads change daily in response to market conditions and are generally obtained from the new issue market and broker-dealer

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

sources. To the extent that these inputs are observable, the values of U.S. Treasury obligations are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Government Sponsored Enterprise and Mortgage-Backed Securities** Government sponsored enterprise and mortgage-backed securities are valued by independent pricing services using pricing models based on inputs that include issuer type, coupon, cash flows, mortgage prepayment projection tables and Adjustable Rate Mortgage evaluations that incorporate index data, periodic and life caps and the next coupon reset date. To the extent that these inputs are observable, the values of government sponsored enterprise and mortgage-backed securities are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Municipal Bonds** Municipal bonds are valued by independent pricing services based on pricing models that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable, the values of municipal bonds are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Corporate Bonds & Notes** Corporate bonds & notes are generally comprised of two main categories: investment grade bonds and high yield bonds. Investment grade bonds are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, live trading levels, recently

executed transactions in securities of the issuer or comparable issuers, and option adjusted spread models that include base curve and spread curve inputs. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. High yield bonds are valued by independent pricing services based primarily on broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of corporate bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Asset-Backed Securities and Collateralized Mortgage Obligations** Asset-backed securities and collateralized mortgage obligations are valued by independent pricing services using pricing models based on a security's average life volatility. The models also take into account tranche characteristics such as coupon, average life, collateral types, ratings, the issuer and tranche type, underlying collateral and performance of the collateral, and discount margin for certain floating rate issues. To the extent that these inputs are observable, the values of asset-backed securities and collateralized mortgage obligations are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Forward Foreign Currency Contracts** Forward foreign currency contracts are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, actual trading information and foreign currency exchange rates gathered

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

from leading market makers and foreign currency exchange trading centers throughout the world. To the extent that these inputs are observable, the values of forward foreign currency contracts are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Credit Default Swaps** Credit default swaps traded over-the-counter ( OTC ) are valued by independent pricing services using pricing models that take into account, among other factors, information received from market makers and broker-dealers, default probabilities from index specific credit spread curves, recovery rates, and cash flows.

Centrally cleared credit default swaps are valued at the price determined by the relevant exchange. To the extent that these inputs are observable, the values of credit default swaps are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Interest Rate Swaps** OTC interest rate swaps are valued by independent pricing services using pricing models that are based on real-time intraday snapshots of relevant interest rate curves that are built using the most actively traded securities for a given maturity. The pricing models also incorporate cash and money market rates. In addition, market data pertaining to interest rate swaps is monitored regularly to ensure that interest rates are properly depicting the current market rate. Centrally cleared interest rate swaps are valued at the price determined by the relevant exchange. To the extent that these inputs are observable, the values of interest rate swaps are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Total Return Swaps** OTC total return swaps are valued by independent pricing services using pricing models that take into account among other factors, index spread curves, nominal values, modified duration values and cash flows. To the extent that these inputs are observable, the values of OTC total return swaps are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

**Senior Loans** Senior Loans are valued by independent pricing services based on the average of quoted prices received from multiple dealers or valued relative to other benchmark securities when broker-dealer quotes are unavailable. These quoted prices are based on interest rates, yield curves, option adjusted spreads and credit spreads. To the extent that these inputs are observable, the values of Senior Loans are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

#### (c) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Securities purchased and sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date. Realized gains and losses on investments are determined on an identified cost basis. Interest income adjusted for the accretion of discount and amortization of premiums is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income. Dividend income is recorded on the ex-dividend date. Consent fees

relating to corporate actions and commitment fees received relating to unfunded purchase commitments are recorded as miscellaneous income upon receipt. Paydown gains and losses are netted and recorded as interest income on the Statements of Operations.

**64** Semi-Annual Report | June 30, 2014

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

#### (d) Federal Income Taxes

The Funds intend to distribute all of their taxable income and to comply with the other requirements of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. In accordance with provisions set forth under U.S. GAAP, the Investment Manager has reviewed the Funds' tax positions for all open tax years. As of June 30, 2014, the Funds have recorded no liability for net unrecognized tax benefits relating to uncertain income tax positions they have taken. The Funds' federal income tax returns for the prior three years, as applicable, remain subject to examination by the Internal Revenue Service.

#### (e) Dividends and Distributions

PCM declares dividends from net investment income to stockholders monthly and distributions of net realized capital gains, if any, are paid at least annually.

Dynamic Credit Income declares monthly distributions from net investment income but may fund a portion of its distributions with gains from the sale of portfolio securities and other sources.

The Funds record dividends and distributions on the ex-dividend date. The amount of dividends from net investment income and distributions from net realized capital gains is

determined in accordance with federal income tax regulations, which may differ from GAAP. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment; temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions to shareholders/stockholders from return of capital. A Fund may engage in investment strategies, including the use of derivatives, to, among other things, generate current, distributable income without regard to possible declines in the Fund's net asset value. A Fund's income and gain-generating strategies, including certain derivatives strategies, may generate current income and gains for distributions even in situations when the Fund has experienced a decline in net assets, including losses due to adverse changes in securities markets or the Fund's portfolio of investments, including derivatives.

#### (f) Foreign Currency Translation

Dynamic Credit Income's accounting records are maintained in U.S. dollars as follows: (1) the foreign currency market values of investments and other assets and liabilities denominated in foreign currencies are translated at the prevailing exchange rate at the end of the period; and (2) purchases and sales, income and expenses are translated at the prevailing exchange rate on the respective dates of such transactions. The resulting net foreign currency gain (loss) is included in the Fund's Statement of Operations.

Dynamic Credit Income does not generally isolate that portion of the results of operations arising as a result of changes in foreign currency exchange rates from the fluctuations

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

arising from changes in the market prices of securities. Accordingly, such foreign currency gain (loss) is included in net realized and unrealized gain (loss) on investments. However, the Fund does isolate the effect of fluctuations in foreign currency exchange rates when determining the gain (loss) upon the sale or maturity of foreign currency denominated debt obligations pursuant to U.S. federal income tax regulations; such amount is categorized as foreign currency gain (loss) for both financial reporting and income tax reporting purposes.

#### (g) Senior Loans

The Funds may purchase assignments of, and participations in, Senior Loans originated, negotiated and structured by a U.S. or foreign commercial bank, insurance company, finance company or other financial institution (the Agent) for a lending syndicate of financial institutions (the Lender). When purchasing an assignment, the Funds succeed to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning Lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning Lender. The Funds may also enter into unfunded loan commitments, which are contractual obligations for future funding. Unfunded loan commitments may include revolving credit facilities, which may obligate the Funds to supply additional cash to the borrower on demand. Unfunded loan commitments represent a future obligation in full, even though a percentage of the principal amounts may never be utilized by the borrower.

#### (h) Repurchase Agreements

The Funds are parties to Master Repurchase Agreements ( Master Repo Agreements ) with select counterparties. The Master Repo Agreements maintain provisions for initiation, income payments, events of default, and maintenance of collateral.

The Funds enter into transactions, under the terms of the Master Repo Agreements, with their custodian bank or securities brokerage firms whereby they purchase securities under agreements to resell such securities at an agreed upon price and date ( repurchase agreements ). The Funds, through their custodian, take possession of securities collateralizing the repurchase agreement. Such agreements are carried at the contract amount in the financial statements, which is considered to represent fair value. Collateral pledged (the securities received), which consists primarily of U.S. government obligations and asset-backed securities, is held by the custodian bank for the benefit of the Funds until maturity of the repurchase agreement. Provisions of the repurchase agreements and the procedures adopted by the Funds require that the market value of the collateral, including accrued interest thereon, be sufficient in the event of default by the counterparty. If the counterparty defaults under the Master Repo Agreements, and the value of the collateral declines or if the counterparty enters an insolvency proceeding, realization of the collateral by the Funds may be delayed or limited.

**(i) Reverse Repurchase Agreements**

In a reverse repurchase agreement, the Funds sell securities to a bank or broker-dealer and agree to repurchase the securities at a mutually agreed upon date and price. Generally, the effect of such a transaction is that the Funds can recover and reinvest all or most of the cash invested in portfolio securities involved during the term of the reverse repurchase agreement

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

and still be entitled to the returns associated with those portfolio securities. Such transactions are advantageous if the interest cost to the Funds of the reverse repurchase transaction is less than the returns the Funds obtain on investments purchased with the cash. To the extent the Funds do not cover their positions in reverse repurchase agreements (by segregating liquid assets at least equal in amount to the forward purchase commitment), the Funds' uncovered obligations under the agreements will be subject to the Funds' limitations on borrowings. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Fund is obligated to repurchase under the agreements may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Funds' use of the proceeds of the agreement may be restricted pending determination by the other party, or its trustee or receiver, whether to enforce the Funds' obligation to repurchase the securities.

#### (j) Equity-Linked Securities

The Funds may purchase equity-linked securities, also known as participation notes. Participation notes are used to gain exposure to issuers in certain countries with a costly or lengthy registration process. They are generally traded over-the-counter and constitute general unsecured contractual obligations of the banks or broker-dealers that issue them. Generally, banks and broker-dealers associated with non-U.S.-based brokerage firms buy securities listed on certain foreign exchanges and then issue participation notes which are designed to replicate the performance of certain issuers and markets. To the extent that the Funds invest in equity-linked securities whose return corresponds to the performance of a foreign

securities index or one or more foreign stocks, investing in equity-linked securities will involve risks similar to the risks of investing in foreign securities. In addition, the Funds bear the risk that the issuer of an equity-linked security may default on its obligation under the terms of the arrangement with the counterparty.

#### (k) Warrants

The Funds may receive warrants. Warrants are securities that are usually issued together with a debt security or preferred stock and that give the holder the right to buy a proportionate amount of common stock at a specified price. Warrants may be freely transferable and are often traded on major exchanges. Warrants normally have a life that is measured in years and entitle the holder to buy common stock of a company at a price that is usually higher than the market price at the time the warrant is issued. Warrants may entail greater risks than certain other types of investments. Generally, warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. If the market price of the underlying stock does not exceed the exercise price during the life of the warrant, the warrant will expire worthless. Warrants may increase the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Similarly, the percentage increase or decrease in the value of an equity security warrant may be greater than the percentage increase or decrease in the value of the underlying common stock. Warrants may relate to the purchase of equity or debt securities. Debt obligations with warrants attached to purchase equity securities have many characteristics of convertible

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

securities and their prices may, to some degree, reflect the performance of the underlying stock. Debt obligations also may be issued with warrants attached to purchase additional debt securities at the same coupon rate. A decline in interest rates would permit a Fund to sell such warrants at a profit. If interest rates rise, these warrants would generally expire with no value.

#### (l) When-Issued/Delayed-Delivery Transactions

When-issued or delayed-delivery transactions involve a commitment to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery purchases are outstanding, the Funds will set aside and maintain until the settlement date in a designated account, liquid assets in an amount sufficient to meet the purchase price. When purchasing a security on a delayed-delivery basis, the Funds assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations; consequently, such fluctuations are taken into account when determining the NAV. The Funds may dispose of or renegotiate a delayed-delivery transaction after it is entered into, and may sell when-issued securities before they are delivered, which may result in a realized gain or loss. When a security is sold on a delayed-delivery basis, the Funds do not participate in future gains and losses with respect to the security.

#### (m) Sale-Buybacks

A Fund may enter into financing transactions referred to as sale-buybacks. A sale-buyback transaction consists of a sale of a security by a Fund to a financial institution, the counterparty, with a simultaneous agreement to repurchase the same or substantially the same security at an agreed-upon price and date. A Fund is not

entitled to receive principal and interest payments, if any, made on the security sold to the counterparty during the term of the agreement. The agreed-upon proceeds for securities to be repurchased by a Fund are reflected as a liability on the Statements of Assets and Liabilities. A Fund will recognize net income represented by the price differential between the price received for the transferred security and the agreed-upon repurchase price. This is commonly referred to as the price drop. A price drop consists of (i) the foregone interest and inflationary income adjustments, if any, a Fund would have otherwise received had the security not been sold and (ii) the negotiated financing terms between a Fund and the counterparty. Foregone interest and inflationary income adjustments, if any, are recorded as components of interest income on the Statements of Operations. Interest payments based upon negotiated financing terms made by a Fund to counterparties are recorded as a component of interest expense on the Statements of Operations. In periods of increased demand for the security, a Fund may receive a fee for use of the security by the counterparty, which may result in interest income to the Fund. A Fund will segregate assets determined to be liquid by the Investment Manager or otherwise cover its obligations under sale-buyback transactions.

#### (n) Securities Traded on To-Be-Announced Basis

The Funds may from time to time purchase securities on a to-be-announced ( TBA ) basis. In a TBA transaction, the Funds commit to purchasing or selling securities for which all specific information is not yet known at the time of the trade, particularly the face amount and maturity date of the underlying security transactions. Securities purchased on a TBA basis are not settled until they are delivered to the Funds, normally 15 to 45 days later. Beginning on the date the Funds enter into a

---

**Notes to Financial Statements**

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

TBA transaction, cash, U.S. government securities or other liquid securities are segregated in an amount equal in value to the purchase price of the TBA security. These transactions are subject to market fluctuations, and their current value is determined in the same manner as for other securities.

**(o) Mortgage-Related and Other Asset-Backed Securities**

Investments in mortgage-related or other asset-backed securities include mortgage pass-through securities, collateralized mortgage obligations ( CMOs ), commercial mortgage-backed securities, mortgage dollar rolls, CMO residuals, stripped mortgage-backed securities ( SMBSs ) and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. The value of some mortgage-related or asset-backed securities may be particularly sensitive to changes in prevailing interest rates. Early repayment of principal on some mortgage-related securities may expose the Funds to a lower rate of return upon reinvestment of principal. The value of these securities may fluctuate in response to the market's perception of the creditworthiness of the issuers. The decline in liquidity and prices of these types of securities may make it more difficult to determine fair market value. Additionally, although mortgages and mortgage-related securities are generally supported by some form of government or private guarantee and/or insurance, there is no assurance that private guarantors or insurers will meet their obligations.

**(p) U.S. Government Agencies or Government-Sponsored Enterprises**

Securities issued by U.S. Government agencies or government-sponsored enterprises may not be guaranteed by the U.S. Treasury. The

Government National Mortgage Association ( GNMA or Ginnie Mae ), a wholly-owned U.S. Government corporation, is authorized to guarantee, with the full faith and credit of the U.S. Government, the timely payment of principal and interest on securities issued by institutions approved by GNMA and backed by pools of mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Government-related guarantors not backed by the full faith and credit of the U.S. Government include the Federal National Mortgage Association ( FNMA or Fannie Mae ) and the Federal Home Loan Mortgage Corporation ( FHLMC or Freddie Mac ). Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but its participation certificates are not backed by the full faith and credit of the U.S. Government.

**(q) Special Purpose Vehicle**

The PCILS I LLC (the PCILS Subsidiary ), a Delaware LLC, was incorporated as a wholly owned subsidiary acting as an investment vehicle for Dynamic Credit Income in order to effect certain investments for Dynamic Credit Income

consistent with Dynamic Credit Income's investment objectives and policies as specified in its prospectus and statement of additional information. Dynamic Credit Income's investment portfolio has been consolidated and includes the portfolio holdings of Dynamic Credit Income and the PCILS Subsidiary. The consolidated financial statements include the accounts of Dynamic Credit Income and the PCILS Subsidiary. All inter-company transactions and balances have been eliminated. As of the date of this report, the only asset held by the PCILS Subsidiary was the AMPAM Parks Mechanical, Inc. senior loan,

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 1. Organization and Significant Accounting Policies (continued)

as reflected in Dynamic Credit Income's Consolidated Schedule of Investments. This structure was established so that the loan could be held by a separate legal entity from Dynamic Credit Income.

#### (r) Restricted Securities

The Funds are permitted to invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expenses, and prompt sale at an acceptable price may be difficult.

#### (s) Interest Expense

Interest expense primarily relates to the Funds' participation in reverse repurchase agreement transactions. Interest expense is recorded as it is incurred.

### 2. Principal Risks

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Funds are also exposed to other risks such as, but not limited to, interest rate, foreign currency, credit and leverage risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As nominal interest rates rise, the values of certain fixed income securities held by the Funds are likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates,

usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.* yield) movements. Interest rate changes can be sudden and unpredictable, and the Funds may lose money as a result of movements in interest rates. The Funds may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended.

Variable and floating rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate securities will not generally increase in value if interest rates decline. Inverse floating rate securities may decrease in value if interest rates increase. Inverse floating rate securities may also exhibit greater price volatility than a fixed rate obligation with similar credit quality. When a Fund holds variable or floating rate securities, a decrease (or, in the case

of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the NAV of the Funds' shares.

Mortgage-related and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. Generally, rising interest rates tend to extend the duration of fixed rate mortgage-related securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, if a Fund holds mortgage-related securities, it may exhibit additional volatility since individual mortgage holders are less likely to exercise prepayment options, thereby putting additional downward pressure on the value of these securities and potentially causing

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 2. Principal Risks (continued)

the Fund to lose money. This is known as extension risk. Mortgage-backed securities can be highly sensitive to rising interest rates, such that even small movements can cause an investing Fund to lose value. Mortgage-backed securities, and in particular those not backed by a government guarantee, are subject to credit risk. In addition, adjustable and fixed rate mortgage-related securities are subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce the returns of the Funds because the Funds may have to reinvest that money at the lower prevailing interest rates. The Funds' investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Payment of principal and interest on asset-backed securities may be largely dependent upon the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets.

The Funds are exposed to credit risk, which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

To the extent Dynamic Credit Income directly invests in foreign currencies or in securities that trade in, and receive revenues in, foreign currencies, or in derivatives that provide exposure to foreign currencies, it will be subject to the risk that those currencies will decline in

value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including economic growth, inflation, changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or the imposition of currency controls or other political developments in the United States or abroad. As a result, Dynamic Credit Income's investments in foreign currency-denominated securities may reduce the returns of the Fund.

Dynamic Credit Income is subject to elements of risk not typically associated with investments in the U.S., due to concentrated investments in foreign issuers located in a specific country or region. Such concentrations will subject the Fund to additional risks resulting from future political or economic conditions in such country or region and the possible imposition of adverse governmental laws or currency exchange restrictions affecting such country or region, which could cause the securities and their markets to be less liquid and prices more volatile than those of comparable U.S. companies.

The market values of securities may decline due to general market conditions (market risk) which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, adverse changes to credit markets or adverse investor

sentiment. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity-related investments

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 2. Principal Risks (continued)

generally have greater market price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. Credit ratings downgrades may also negatively affect securities held by the Funds. Even when markets perform well, there is no assurance that the investments held by the Funds will increase in value along with the broader market. In addition, market risk includes the risk that geopolitical events will disrupt the economy on a national or global level.

The Funds are exposed to counterparty risk, or the risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss to the Funds could exceed the value of the financial assets recorded in the Funds' financial statements. Financial assets, which potentially expose the Funds to counterparty risk, consist principally of cash due from counterparties and investments. The Sub-Adviser seeks to minimize the Funds' counterparty risk by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Funds have received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

The Funds are exposed to risks associated with leverage. Leverage may cause the value of the Funds' stock to be more volatile than if the Funds did not use leverage. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Funds' portfolio securities. The Funds may engage in transactions or purchase instruments that give

rise to forms of leverage. Obligations to settle reverse repurchase agreements may be detrimental to the Funds' performance. In addition, to the extent the Funds employ leverage, dividend and interest costs may not be recovered by any appreciation of the securities purchased with the leverage proceeds and could exceed the Funds' investment returns, resulting in greater losses.

The Funds hold defaulted securities that may involve special considerations including bankruptcy proceedings, other regulatory and legal restrictions affecting the Funds' ability to trade, and the availability of prices from independent pricing services or dealer quotations. Defaulted securities are often illiquid and may not be actively traded. Sale of securities in bankrupt companies at an acceptable price may be difficult and differences compared to the value of the securities used by the Funds could be material. A Fund may incur additional expenses to the extent it is required to seek recovery upon a portfolio security's default in the payment of principal or interest. In any bankruptcy proceeding relating to a defaulted investment, a Fund may lose its entire investment or may be required to accept cash or securities with a value substantially less than its original investment.

The Funds are party to International Swaps and Derivatives Association, Inc. Master Agreements ( ISDA Master Agreements ) with select counterparties that govern transactions, over-the-counter derivatives and foreign exchange contracts entered into by the Funds and those counterparties. The ISDA Master Agreements contain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination

include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions

**72** Semi-Annual Report | June 30, 2014

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 2. Principal Risks (continued)

under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements of the Funds.

The considerations and factors surrounding the settlement of certain purchases and sales made on a delayed-delivery basis are governed by Master Securities Forward Transaction Agreements ( Master Forward Agreements ) between Dynamic Credit Income and select counterparties. The Master Forward Agreements maintain provisions for, among other things, initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral.

The counterparty risk associated with certain contracts may be reduced by master netting arrangements to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Funds' overall exposure to counterparty risk with respect to transactions subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

PCM had security transactions outstanding with a Lehman Brothers entity as the counterparty at the time the relevant Lehman Brothers entity filed for bankruptcy protection or was placed in administration. The security transactions associated with Lehman Brothers, Inc. ( SLH ) as counterparty were written down to their estimated recoverable values. Adjustments to anticipated losses for security transactions associated with SLH have been incorporated as net realized gain (loss) on PCM's Statement of Operations. The remaining balances due from SLH are included in receivable from/payable to broker on PCM's Statement of Assets and Liabilities. The estimated recoverable value of receivables is determined by an independent broker quote.

### 3. Financial Derivative Instruments

Disclosure about derivatives and hedging activities requires qualitative disclosure regarding objectives and strategies for using derivatives, quantitative disclosure about fair value amounts of gains and losses on derivatives, and disclosure about credit-risk-related contingent features in derivative agreements. The disclosure requirements distinguish between derivatives, which are accounted for as hedges, and those that do not qualify for such accounting. Although the Funds at times use derivatives for hedging purposes, the Funds reflect derivatives at fair value and recognize changes in fair value through the Funds' Statements of Operations, and such derivatives do not qualify for hedge accounting treatment.

#### (a) Swap Agreements

Swap agreements are bilaterally negotiated agreements between the Funds and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market or event-linked returns at specified, future intervals. Swap agreements may be privately negotiated in the over-the-counter market ( OTC swaps ) or may be executed in a multilateral or other trade facility platform, such as a registered commodities exchange ( centrally cleared swaps ). The

Funds may enter into credit default, cross-currency, interest rate, total return, variance and other forms of swap agreements in order to, among other things, manage their exposure to credit, currency and interest rate risk. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

OTC swap payments received or made at the beginning of the measurement period, if any, are reflected as such on the Funds' Statements

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

### 3. Financial Derivative Instruments (continued)

of Assets and Liabilities and represent payments made or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). These upfront payments are recorded as realized gains or losses on the Funds' Statements of Operations upon termination or maturity of the swap. A liquidation payment received or made at the termination of the swap is recorded as realized gain or loss on the Funds' Statements of Operations. Net periodic payments received or paid by the Funds are included as part of realized gains or losses on the Funds' Statements of Operations. Changes in market value, if any, are reflected as a component of net changes in unrealized appreciation/depreciation on the Funds' Statements of Operations. Daily changes in valuation of centrally cleared swaps, if any, are recorded as a receivable or payable, as applicable, for variation margin on centrally cleared swaps on the Funds' Statements of Assets and Liabilities.

Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of the amounts recognized on the Funds' Statements of Assets and Liabilities. Such risks include the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavorable changes in interest rates.

**Credit Default Swap Agreements** Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to

receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As the sellers of protection on credit default swap agreements, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the sellers, the Funds would effectively add leverage to their investment portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amount of the swap.

If the Funds are sellers of protection and a credit event occurs, as defined under the terms of that particular swap agreement, a Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Funds are buyers of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Funds will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are assumed by market makers considering either industry standard recovery rates or entity specific factors and considerations until a credit event occurs. If a credit event has occurred, the recovery value is

determined by a facilitated

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 3. Financial Derivative Instruments (continued)

auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value.

Credit default swap agreements on corporate or sovereign issues involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Funds use credit default swaps on corporate or sovereign issues to provide a measure of protection against defaults of the issuers (*i.e.*, to reduce risk where the Funds own or have exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default.

Credit default swap agreements on asset-backed securities involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit events. Unlike credit default swaps on corporate or sovereign issues, deliverable obligations in most instances would be limited to the specific referenced obligation as performance for asset-backed securities can vary across deals. Prepayments, principal paydowns, and other writedown or loss events on the underlying mortgage loans will reduce the outstanding principal balance of the referenced obligation. These reductions may be temporary or permanent as defined under the terms of the swap agreement and the notional amount of

the swap agreement will be adjusted by corresponding amounts. The Funds use credit default swaps on asset-backed securities to provide a measure of protection against defaults of the referenced obligation or to take an active long or short position with respect to the likelihood of a particular referenced obligation's default.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index, or in the case of a tranching index credit default swap, the credit event is settled based on the name's weight in the index that falls within the tranche for which the Funds bear exposure. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Funds use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps

to

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 3. Financial Derivative Instruments (continued)

achieve a similar effect. Credit-default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate or sovereign issues as of period end are disclosed in the Notes to Schedules of Investments, serve as an indicator of the current status of the payment/performance risk, and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that the Funds as sellers of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of June 30, 2014 for which the Funds are sellers of protection are disclosed in the Notes to Schedules of Investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon

entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Funds for the same referenced entity or entities.

**Total Return Swap Agreements** Total return swap agreements involve commitments to pay interest in exchange for a market-linked return, both based on notional amounts. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Funds will receive a payment from or make a payment to the counterparty.

**Interest Rate Swap Agreements** Interest rate swap agreements involve the exchange by the Funds with a counterparty of its respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments, with respect to the notional amount of principal. Certain forms of interest rate swap agreements may include: (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or cap, (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or floor, (iii) interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels, (iv) callable interest rate swaps, under which the counterparty may terminate the swap transaction in whole at zero cost by a predetermined date and time prior to the maturity date, (v) spreadlocks, which allow the interest rate swap users to lock in the forward

differential (or spread) between the interest rate swap rate and a specified benchmark, or (vi) basis swaps, under which two parties can

---

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

### 3. Financial Derivative Instruments (continued)

exchange variable interest rates based on different money markets.

#### (b) Forward Foreign Currency Contracts

A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Dynamic Credit Income enters into forward foreign currency contracts for the purpose of hedging against foreign currency risk arising from the investment or anticipated investment in securities denominated in foreign currencies. Dynamic Credit Income also enters into these contracts for purposes of increasing exposure to a foreign currency or shifting exposure to foreign currency fluctuations from one country to another. The market value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. All commitments are marked to market daily at the applicable exchange rates and any resulting unrealized appreciation or depreciation is recorded. Realized gains or losses are recorded at the time the forward contract matures or by delivery of the currency. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. In addition, these contracts may involve market risk in excess of the unrealized appreciation (depreciation) reflected in the Fund's Statement of Assets and Liabilities.

#### (c) Futures Contracts

The Funds may use futures contracts to manage their exposure to the securities markets or the movements in interest rates and currency values. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Upon entering into such a contract, the Funds are required to pledge to the broker an amount of cash or securities equal to the

minimum initial margin requirements of the exchange. Pursuant to the contracts, the Funds agree to receive from or pay to the broker an amount of cash or securities equal to the daily fluctuation in the value of the contracts. Such receipts or payments are known as variation margin and are recorded by the Funds as unrealized appreciation or depreciation. When the contracts are closed, the Funds record a realized gain or loss equal to the difference between the value of the contracts at the time they were opened and the value at the time they were closed. Any unrealized appreciation or depreciation recorded is simultaneously reversed. The use of futures transactions involves various risks, including the risk of an imperfect correlation in the movements in the price of futures contracts, interest rates and underlying hedging assets, and possible inability or unwillingness of counterparties to meet the terms of their contracts.

### 4. Investment Manager/Sub-Adviser

Each Fund has an Investment Management Agreement (each an Agreement) with the Investment Manager. Subject to the supervision of each Fund's Board, the Investment Manager is responsible for managing, either directly or through

others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to each Agreement, the Investment Manager receives an annual fee, payable monthly, at an annual rate of 0.80% and 1.15% of the average daily total managed assets for PCM and Dynamic Credit Income, respectively. Total managed assets refer to the total assets of each Fund (including assets attributable to any reverse repurchase agreements and borrowings) minus accrued liabilities (other than liabilities representing reverse repurchase agreements and borrowings). For these purposes, borrowings includes amounts of leverage attributable to such instruments as reverse repurchase agreements.

The Investment Manager has retained the Sub-Adviser to manage the Funds' investments. Subject

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 4. Investment Manager/Sub-Adviser (continued)

to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Funds' investment decisions. The Investment Manager, not the Funds, pays a portion of the fees it

receives as Investment Manager to the Sub-Adviser in return for its services.

Please see Note 8 for a discussion of recently approved changes to the Funds' Investment Management and sub-advisory arrangements.

### 5. Investments in Securities

For the six months ended June 30, 2014, purchases and sales of investments, other than short-term securities were:

	U.S. Government Obligations		All Other	
	Purchases	Sales	Purchases	Sales
PCM Fund, Inc.	\$ 1,174,372	\$ 1,602,250	\$ 22,297,931	\$ 14,925,876
Dynamic Credit Income	18,319,875	53,916,953	2,515,579,840	1,268,121,511

### 6. Income Tax Information

At June 30, 2014, the aggregate cost basis and the net unrealized appreciation (depreciation) of investments for federal income tax purposes were:

	Federal Tax	Unrealized	Unrealized	Net
	Cost Basis	Appreciation	Depreciation	Unrealized Appreciation
PCM Fund, Inc.	\$ 174,680,645	\$ 28,986,042	\$ 4,665,326	\$ 24,320,716
Dynamic Credit Income	5,701,901,897	272,024,194	61,368,245	210,655,949

Differences, if any, between book and tax cost basis were attributable to wash sale loss deferrals, basis adjustments to Interest only securities held by the Funds, differences in the book and tax treatment of bond amortization and sale-buyback adjustment.

## 7. Fund Events

On January 29, 2014, Mr. Alfred Murata replaced Mr. Mark Seidner as lead portfolio manager primarily responsible for the day-to-day management of Dynamic Credit Income. Mr. Murata is a managing director and portfolio manager in the Newport Beach office on the mortgage credit team. Prior to joining PIMCO in 2001, he researched and implemented exotic equity and interest rate derivatives at Nikko

Financial Technologies. He has 14 years of investment experience and holds a PH. D. in engineering-economic systems and operations

research from Stanford University. He also earned a J.D. from Stanford Law School and is a member of the State Bar of California. Mr. Murata has been part of the portfolio management team of Dynamic Income since its inception in 2013.

## Notes to Financial Statements

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

June 30, 2014 (unaudited)

### 8. Subsequent Events

In preparing these financial statements, the Funds' management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

On July 1, 2014, the following dividends were declared to common stockholders/shareholders payable August 1, 2014 to stockholders/shareholders of record on July 11, 2014.

PCM Fund, Inc.	\$0.08 per common share
Dynamic Credit Income	\$0.15625 per common share

On August 1, 2014, the following dividends were declared to common stockholders/shareholders payable September 2, 2014 to shareholders of record on August 11, 2014.

PCM Fund, Inc.	\$0.08 per common share
Dynamic Credit Income	\$0.15625 per common share

At special meetings of shareholders held on June 9, 2014 and July 31, 2014 (following earlier adjournments), PCM's and Dynamic Credit Income's shareholders, respectively, approved a new investment management agreement (the Agreement) between each Fund and PIMCO, pursuant to which PIMCO will replace AGIFM as the investment manager to the Funds. Under the Agreement, PIMCO will continue to provide the day-to-day portfolio management services it currently provides to the Funds as their sub-adviser and will also assume responsibility for the supervisory and administrative services currently provided by AGIFM to the Funds as their investment manager. The same investment professionals that are currently responsible for managing the Funds' portfolios will continue to do so following the proposed transition, and PIMCO personnel will replace AGIFM personnel as Fund officers and in other roles to provide and oversee the administrative, accounting/financial reporting, compliance, legal, marketing, transfer agency, shareholder servicing and other services required for the daily operations of the Funds. It is currently expected that the Agreement will

become effective at the close of business on September 5, 2014.

Although the management fee rate to be paid to PIMCO by PCM under the Agreement is higher than the management fee rate imposed under PCM's current investment management agreement, the unified fee arrangement under the Agreement covers the Funds' portfolio management and administrative services covered under the current agreement and also requires PIMCO, at its expense, to procure most other supervisory and administrative services required by the Funds that are currently paid for or incurred by the Funds directly outside of the current agreements. The management

fee rate to be paid by Dynamic Credit Income is the same under the Agreement the corresponding current agreement, though PIMCO (and not the Fund) will be required to procure most other supervisory and administrative services required by that Fund.

There were no other subsequent events identified that require recognition or disclosure.

Approval of an Investment Management Agreement between Dynamic Credit Income and Pacific Investment Management Company LLC	58,025,925	1,650,406	11,197,705

**Proxy Voting Policies & Procedures:**

A description of the policies and procedures that the Funds have adopted to determine how to vote proxies relating to portfolio securities and information about how the Funds voted proxies relating to portfolio securities held during the most recent twelve month period ended June 30 is available (i) without charge, upon request, by calling the Funds shareholder servicing agent at (800) 254-5197; (ii) on the Funds website at [us.allianzgi.com/closedendfunds](http://us.allianzgi.com/closedendfunds); and (iii) on the Securities and Exchange Commission website at [www.sec.gov](http://www.sec.gov).

**Corporate Change:**

On March 14, 2014, Julian Sluyters became President and Chief Executive Officer of each Fund.

**Change in Investment Policy:**

PCM has adopted the following investment policy:

PCM may invest up to 20% of its total assets in common stocks and other equity securities from time to time, including those it has received through the conversion of a convertible security held by the Fund or in connection with the restructuring of a debt security.

The following risks are associated with the policy described above:

The market price of common stocks and other equity securities may go up or down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally,

particular industries represented in those markets, or the issuer itself. The values of equity securities may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities generally have greater price volatility than bonds and other debt securities.

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

**Consideration of the Proposed Investment Management Agreement**

At a meeting of the Board of Trustees/Directors of each Fund (the Board or the Trustees/Directors ) on December 10, 2013, the Board received a preliminary presentation from PIMCO regarding the proposed transition of the Funds investment management and administrative services from AGIFM to PIMCO and agreed that PIMCO should prepare materials regarding the proposed investment management agreement between PIMCO and the Funds (the Proposed Agreement ) and related arrangements for formal consideration at the Board s next regularly scheduled meeting. On February 4, 2014, the Board held a special in-person meeting with members of PIMCO s senior management and other PIMCO personnel proposed to serve as officers of the Funds to discuss the proposed transition. On February 25, 2014, the non-interested Trustees/Directors (the Independent Trustees/Directors ) met separately via conference call with their counsel to discuss materials provided by PIMCO regarding the Proposed Agreement and related arrangements, and representatives from PIMCO attended a portion of that meeting to respond to questions from the Independent Trustees/Directors and to field requests for supplemental information regarding the proposed arrangements. The Board then held an in-person meeting with management on March 10-11, 2014 to consider approval of the Proposed Agreement and related arrangements (the meetings of the Board discussed herein collectively referred to as the Meetings ). Following careful consideration of the matter as described in more detail herein, the Board of each Fund, including all of the Independent Trustees/Directors, approved the Proposed Agreement for the Fund for an initial one-year term, subject to approval of the Proposed Agreement for the Fund by its shareholders. The information, material factors and conclusions that formed the basis for the

Board s approvals for each Fund are described below. As noted, the Independent Trustees/Directors were assisted in their evaluation of the Proposed Agreement by independent legal counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the Meetings.

In connection with their deliberations regarding the approval of the Proposed Agreement, the Trustees/Directors, including the Independent Trustees/Directors, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Trustees/Directors considered the nature, quality and extent of the various investment management, administrative and other services to be provided to each Fund by PIMCO under the Proposed Agreement.

In connection with the Meetings, the Trustees/Directors received and relied upon materials provided by PIMCO (or AGIFM, as applicable) which included, among other items: (i) information provided by Lipper Inc. ( Lipper ), an independent third party, on the total return investment performance (based on net assets) of the Funds for various time periods, the investment performance of a group of funds with investment classifications/objectives comparable to those of the Funds identified by Lipper (the Lipper performance universe ) and, in the case of Dynamic Credit Income, the performance of an applicable benchmark index, (ii) information provided by Lipper on the Funds management fees under the investment management agreement between each Fund and AGIFM (the Current Agreements ) and other expenses and the management fees and other expenses of comparable funds identified by Lipper, (iii) information provided by PIMCO on the Funds proposed management fee rates and

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

total expense ratios under the Proposed Agreement in comparison to data provided by Lipper on the management fees and total expense ratios of comparable funds identified by Lipper, (iv) information on the aggregate management fees and total expenses paid by each Fund under its Current Agreement during calendar year 2013 and the *pro forma* aggregate management fees and total expenses that would have been paid by each Fund under the Proposed Agreement during calendar year 2013, (v) the estimated profitability to AGIFM as investment manager to PCM for the one-year period ended December 31, 2012, to PIMCO as sub-adviser to PCM for the one-year period ended December 31, 2012 and to PIMCO as sub-adviser to each of the Funds for the one-year period ended December 31, 2013, (vi) estimates of what the profitability to PIMCO would have been under the Proposed Agreement for the one-year period ended December 31, 2013 and what the profitability to PIMCO under the Proposed Agreement is estimated to be for the calendar years ending December 31, 2014, 2015 and 2016, (vii) information provided by PIMCO on PCM's risk-adjusted returns and each Fund's total returns and yield over various time periods, (viii) descriptions of various functions and services to be performed or procured by PIMCO for the Funds under the Proposed Agreement, such as portfolio management, compliance monitoring, portfolio trading, custody, transfer agency, dividend disbursement, recordkeeping, tax, legal, audit, valuation and other administrative and shareholder services and (ix) information regarding the overall organization of PIMCO, including information regarding senior management, portfolio managers and other personnel who will provide investment management, administrative and other services to the Funds under the Proposed Agreement. The Trustees noted that because Dynamic Credit Income commenced

operations on January 31, 2013, certain information provided to the Board as of December 31, 2013 with respect to Dynamic Credit Income was provided on an annualized basis.

The Trustees /Directors' conclusions as to the approval of the Proposed Agreement for each Fund were based on a comprehensive consideration of all information provided to the Trustees/Directors and were not the result of any single factor. Some of the factors that figured particularly in the Trustees /Directors' deliberations are described below, although individual Trustees/Directors may have evaluated the information presented differently from one another, attributing different weights to various factors.

As part of their review, the Trustees/Directors examined PIMCO's ability to provide high quality investment management and other services to the Funds. Among other information, the Trustees/Directors considered the investment philosophy and research and decision-making processes of PIMCO; the experience of key advisory personnel of PIMCO responsible for portfolio management of the Funds; the ability of PIMCO to attract and retain capable personnel; and the capability of the senior management and staff of PIMCO. In addition, the Trustees/Directors reviewed the quality of PIMCO's services with respect to regulatory compliance and compliance with the investment policies of the Funds and conditions that might affect PIMCO's ability to provide high quality services to the Funds in the future under the Proposed Agreement, including PIMCO's financial condition and operational stability. The Trustees/Directors took into account their familiarity and experience with PIMCO as the sub-adviser and portfolio manager for each Fund to date, and noted that the same investment professionals who are currently responsible for managing each Fund's portfolio will continue to do so following the proposed

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

## PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

transition. They further noted that each Fund will continue to have the same investment objective(s) and policies following the proposed transition.

The Trustees/Directors also considered the nature of certain supervisory and administrative services that PIMCO would be responsible for providing to the Funds under the Proposed Agreement. The Trustees/Directors noted PIMCO's belief that a number of operational and administrative efficiencies are expected to result from the arrangements under the Proposed Agreement. The Trustees/Directors considered PIMCO's representation that it could offer the Funds an integrated set of high-quality investment management, administrative and distribution/aftermarket support services under a single platform, which PIMCO believes will allow for greater efficiencies and enhanced coordination among various investment management and administrative functions. The Trustees/Directors also took into account that the fund administration group at PIMCO, then comprised of approximately 140 professionals worldwide, provided administrative services for approximately \$860 billion in assets under management globally (as of October 31, 2013), including over 150 PIMCO open-end funds and ETFs which, like the Funds, are U.S. registered investment companies, and that PIMCO has substantial prior experience in the administration of U.S. registered closed-end funds, including PCM prior to 2009. The Trustees/Directors also considered PIMCO's representation that the PIMCO fund administration group is well integrated with all critical functions related to the PIMCO funds business, including portfolio management, compliance, legal, accounting and tax, account management, marketing, shareholder communications/services and technology, and noted PIMCO's belief that the Funds and their shareholders will benefit by having all such services provided under one roof by the highly experienced team at PIMCO. Moreover,

the Trustees/Directors noted that the proposed PIMCO-only management structure for the Funds aligns with the two pillar approach adopted by Allianz SE with respect to other PIMCO and Allianz Global Investors products globally, and considered PIMCO's view that the change will facilitate clearer branding and marketing of the Funds and will help to avoid potential confusion among intermediaries, analysts and investors as to whether the Funds are PIMCO and/or Allianz Global Investors products. Based on the foregoing, the Trustees/Directors concluded that PIMCO's investment process, research capabilities and philosophy were well suited to each Fund given its investment objective(s) and policies, and that PIMCO would be able to provide high quality supervisory and administrative services to the Funds and meet any reasonably foreseeable obligations under the Proposed Agreement.

In assessing the reasonableness of each Fund's proposed unified management fee rate under the Proposed Agreement, the Trustees/Directors considered, among other information, (i) each Fund's current and proposed contractual management fee rate, (ii) each Fund's total expense ratio under its Current Agreement and under the Proposed Agreement calculated on average net assets and on average managed assets, taking into account the effects of the Fund's leverage outstanding for calendar year 2013, and (iii) the aggregate management fees and estimated total expenses paid by each Fund under its Current Agreement during calendar year 2013 and estimates of the *pro forma* aggregate management fees and total expenses that would have been paid by each Fund under the Proposed Agreement if it had been in place during calendar year 2013. In this regard, the Trustees/Directors noted that, although the proposed management fee rate to be paid to PIMCO by PCM under the Proposed Agreement is higher than the management fee rate imposed under that Fund's Current Agreement,

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

the proposed unified fee arrangement under the Proposed Agreement covers the Fund's portfolio management and administrative services covered under the Current Agreement and also requires PIMCO, at its expense, to procure most other supervisory and administrative services required by the Funds that are currently paid for or incurred by the Funds directly outside of the Current Agreements (such fees and expenses, Operating Expenses). The Trustees further noted that the proposed management fee for Dynamic Credit Income is the same under the Proposed Agreement and the corresponding Current Agreement, though PIMCO (and not the Fund) would be required to pay or incur that Fund's Operating Expenses under the Proposed Agreement, which Operating Expenses are currently paid for or incurred by the Fund directly.

In addition, the Trustees/Directors took into account PIMCO's explanation that, in determining the proposed unified management fee rate to be paid to PIMCO by each Fund under the Proposed Agreement, PIMCO reviewed the Fund's total expenses, including its current contractual management fee and other expenses currently borne by the Fund outside of the applicable Current Agreement, and the Fund's leverage outstanding during calendar year 2013, and proposed a management fee rate that PIMCO estimated would result in the Fund's total expenses paid by common shareholders being lower under the Proposed Agreement than under the corresponding Current Agreement (based on calendar year 2013 expenses). The Trustees/Directors noted that PIMCO estimated that the proposed new arrangement would result in an overall savings to common shareholders of each Fund under ordinary circumstances. The Directors further considered PIMCO's explanation that, in developing the proposed unified fee structure for PCM, PIMCO, after discussions with the

Board, determined a 20% reduction to the Fund's actual Operating Expenses for calendar year 2013, converted that amount to basis points and rounded to the next lowest half or whole basis point in arriving at a proposed unified fee rate for the Fund. With respect to Dynamic Credit Income, after discussions with the Trustees, PIMCO determined to propose a unified management fee rate under the Proposed Agreement at the same rate that is currently charged under the Current Agreement for that Fund, such that PIMCO will bear all Operating Expenses for that Fund under the proposed unified fee structure with no increase in the fee rate charged under the current non-unified fee structure. The Board considered PIMCO's statement that the proposed unified fee rates are designed to allow the Funds and their common shareholders to share up front in operational efficiencies PIMCO will attempt to realize with respect to the Funds' Operating Expenses as a result of the proposed transition.

The Trustees/Directors also took into account other expected benefits to shareholders of the proposed unified fee structure under the Proposed Agreement. In this regard, the Trustees/Directors noted PIMCO's view that the proposed new unified fee structure would be beneficial for common shareholders because it provides a management fee (including Operating Expenses) structure that is essentially fixed as a percentage of managed assets, making it more predictable under ordinary circumstances in comparison to the current fee and expense structure, under which the Funds' Operating Expenses (including certain third-party fees and expenses) not covered by the Current Agreements can vary over time. The Trustees/Directors also considered that the proposed unified fee structure generally insulates the Funds and common shareholders from increases in applicable third-party and certain other expenses because PIMCO, rather than the Funds, would bear the risk of such

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

increases (though the Trustees/Directors also noted that PIMCO would benefit from any reductions in such expenses).

The Trustees/Directors were advised that PIMCO does not manage any funds or accounts which have an investment strategy or return profile bearing any reasonable similarity to those of the Funds.

The Trustees/Directors also took into account that the use of certain forms leverage by the Funds, such as through the use of reverse repurchase agreements, increases the amount of management fees payable by the Funds under both the Current Agreements and the Proposed Agreement (because the Funds' fees are calculated, and under the Proposed Agreement would continue to be calculated, based on total managed assets, including assets attributable to certain forms of leverage). The Trustees/Directors took into account that, under both the Current Agreements and the Proposed Agreement, PIMCO has a financial incentive for the Funds to have certain forms of leverage outstanding, which may create a conflict of interest between PIMCO, on the one hand, and the Funds' common shareholders, on the other. The Directors further noted that this incentive will be greater with respect to PCM under the Proposed Agreement in comparison to that Fund's Current Agreement because the contractual management fee rate to be paid by PCM under the Proposed Agreement is higher than under its Current Agreement, and the total fees paid to PIMCO by PCM under the Proposed Agreement will therefore vary more with increases and decreases in applicable leverage incurred by the Fund than under the Fund's Current Agreement. In this regard, the Trustees/Directors considered information provided by PIMCO and related presentations as to why each Fund's use of leverage continues to be appropriate and in the best interests of the respective Fund under current market conditions. The Directors also reviewed

information provided by PIMCO relating to the estimated impact on PCM's management fees and Operating Expenses of increasing such Fund's leverage to the maximum practical level that could be attained without further Board approval, as calculated under both the Current Agreement (pursuant to which the Fund would pay management fees to PIMCO and separately pay Operating Expenses) and the Proposed Agreement (pursuant to which the Fund would pay the unified fee to PIMCO, which includes Operating Expenses), and noted the increase in PCM's net expenses under the Proposed Agreement under these circumstances was not substantial. The Trustees noted that, because the management fee rate paid by Dynamic Credit Income is the same under both the Proposed Agreement and the corresponding Current Agreement, an increase in that Fund's leverage would have the same effect on that Fund's total operating expenses under each Agreement. The Trustees/Directors also considered PIMCO's representation that it will use leverage for the Funds solely as it determines to be in the best interests of the Funds from an investment perspective and without regard to the level of compensation PIMCO receives.

With respect to each Fund, the Trustees/Directors reviewed, among other information, comparative information showing the proposed unified fee rate of the Fund under the Proposed Agreement, calculated both on average net assets and on average managed assets, against its Lipper expense group and the Fund's estimated total expense ratio (excluding interest expense) calculated on average net assets and average managed assets under the Proposed Agreement against its Lipper expense group. It was noted that the total expense ratio comparisons reflect the effect of expense waivers/reimbursements (although none were proposed for the Funds). The Trustees/Directors noted that only leveraged closed-end funds were considered for inclusion in the

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

Lipper expense groups presented for comparison with the Funds.

The Trustees/Directors noted that, for each Fund the proposed unified fee rate for the Fund was above the median management fee of the other funds in its expense group provided by Lipper, considered both calculated on average net assets and on average managed assets. However, in this regard, the Trustees/Directors took into account that each Fund's proposed unified management fee rate covers substantially all of the Fund's Operating Expenses and therefore would tend to be higher than the management fee rates of other funds in the expense groups provided by Lipper, which generally do not have a unified fee structure and bear Operating Expenses separately in addition to the management fee. The Trustees/Directors determined that a review of each Fund's total expense ratio with the total expense ratios of peer funds would generally provide more meaningful comparisons than considering contractual management fee rates in isolation.

The Directors also reviewed, among other information, comparative information showing the total return performance of common shares of PCM (based on net asset value) against its Lipper performance universe for the one-year, three-year, five-year and ten-year periods ended December 31, 2013. For Dynamic Credit Income, the Trustees reviewed comparative information showing the performance of Dynamic Credit Income's common shares from the period from Dynamic Credit Income's inception (January 31, 2013) through December 31, 2013. In addition, with respect to Dynamic Credit Income, the Trustees also reviewed, among other information, supplemental comparative information showing the performance of Dynamic Credit Income against peer funds selected by PIMCO for the one-year period, the period since April 30, 2013 and the period since the

inception of Dynamic Credit Income (to the extent the peer fund was in existence) to February 28, 2014. Fund-specific performance results for the Funds reviewed by the Trustees/Directors are discussed below.

The following summarizes comparative performance and fee and expense information considered for each Fund. The comparative performance information was prepared and provided by Lipper and, in the case of the supplemental comparative information for Dynamic Credit Income described above, by PIMCO, and was not independently verified by the Trustees/Directors. Due to the passage of time, these performance results may differ from the performance results for more recent periods.

The comparative expense information reviewed by the Trustees/Directors was based on information provided by PIMCO with respect to the Funds and information provided by Lipper with respect to the other funds in the expense groups. With respect to Dynamic Credit Income, PIMCO also provided comparative expense information against peer funds selected by PIMCO. The total expense ratio information for each Fund discussed below was estimated by PIMCO assuming that the Proposed Agreement had been in effect for the 2013 calendar year, taking into account the effects of the Fund's leverage outstanding for calendar year 2013. The fee and expense information was prepared and provided by Lipper or PIMCO (as noted) and was not independently verified by the Trustees/Directors.

**Dynamic Credit Income**

With respect to the Fund's common share total return performance (based on net asset value) relative to its respective Lipper performance universe, the Trustees noted that the Fund had first quintile performance for the period since inception through December 31, 2013.

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of six closed-end funds, including the Fund. The Trustees also noted that the average net assets of the common shares of the funds in the group ranged from \$122.4 million to \$2.745 billion, and that no funds in the group were larger in asset size than the Fund. With respect to the Fund's estimated total expense ratio (excluding interest expense) calculated on average net assets, the Trustees noted that the Fund's estimated total expense ratio was above the median total expense ratio of the group of funds presented for comparison.

In addition to the Lipper peer group information, the Board considered fee and expense information for the Fund in comparison to a group of closed-end funds that PIMCO identified as being competitor funds in the marketplace and private funds with similar investment strategies to those of the Fund. The Trustees noted that the Fund's estimated total expense ratio (excluding interest expense) was below the median total expense (excluding interest expense) ratio of the group of closed-end funds presented for comparison by PIMCO.

**PCM**

With respect to the Fund's common share total return performance (based on net asset value) relative to its respective Lipper performance universe, the Directors noted that the Fund had first quintile performance for the one-year, three-year, five-year and ten-year periods ended December 31, 2013.

The Directors noted that the expense group for the Fund provided by Lipper consisted of a total of seven closed-end funds, including the Fund. The Directors also noted that the average net assets of the common shares of the funds in the group ranged from \$74.6 million to \$487.3 million, and that four of the funds in the group were larger in asset size than the Fund. With

respect to the Fund's estimated total expense ratio (excluding interest expense) calculated on average net assets, the Directors noted that the Fund's estimated total expense ratio was below the median total expense ratio of the group of funds presented for comparison.

In addition to their review of Fund performance based on net asset value, the Trustees/Directors also considered the market value performance of each Fund's common shares and related share price premium and/or discount information based on the materials provided by Lipper and PIMCO.

The Trustees/Directors also considered profitability analyses provided by PIMCO, which included the estimated profitability to AGIFM as investment manager to PCM for the one-year period ended December 31, 2012 (such estimate having been prepared by AGIFM); estimated profitability to PIMCO as sub-adviser to PCM for the one-year period ended December 31, 2012; estimated profitability to PIMCO as sub-adviser to each of the Funds for the one-year period ended December 31, 2013; *pro forma* estimated profitability to PIMCO for the one-year period ended December 31, 2013 assuming the Proposed Agreement had been in effect; and *pro forma* estimated profitability to PIMCO under the Proposed Agreement for the calendar years ending December 31, 2014, 2015 and 2016. PIMCO provided profitability estimates under the Proposed Agreement reflecting a range of assumptions as to the allocation of internal expenses to its management of the Funds versus other types of products and services, and also estimated profitability both reflecting and not reflecting the amortization of the initial structuring fee payments PIMCO has made to third parties with respect to Dynamic Credit Income. Based on the profitability analyses provided by PIMCO,

the Trustees/Directors determined, taking into account the various assumptions made, that such profitability did not appear to be excessive.

**90** Semi-Annual Report | June 30, 2014

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

The Trustees/Directors also took into account that, as closed-end Funds, the Funds do not currently intend to raise additional assets, so the assets of the Funds will grow (if at all) principally through the investment performance of each Fund. Therefore, the Trustees/Directors did not consider potential economies of scale as a principal factor in assessing the fee rates payable by each Fund under the Proposed Agreement, although they did take into account that the proposed unified fee rates reflect estimated reductions in Operating Expenses designed to allow the Funds to share up front in operational efficiencies PIMCO will attempt to realize as a result of the proposed transition.

Additionally, the Trustees/Directors considered so-called fall-out benefits to PIMCO, such as reputational value derived from serving as investment manager to the Funds and research, statistical and quotation services PIMCO may receive from broker-dealers executing the Funds portfolio transactions on an agency basis.

After reviewing these and other factors described herein, the Trustees/Directors concluded, with respect to each Fund, within the context of their overall conclusions regarding the Proposed Agreement and based upon the information provided and related representations made by PIMCO, that they were satisfied with PIMCO's responses and efforts relating to the investment management and performance of the Fund. They also concluded that they were satisfied with PIMCO's information and responses as to its resources and capabilities to serve as investment manager and administrator of each Fund under the Proposed Agreement following the transition. The Trustees/Directors also concluded that the fees payable by each Fund under the Proposed Agreement represent reasonable compensation in light of the nature, extent and quality of services to be provided or procured by PIMCO under the Proposed Agreement. Based

on their evaluation of factors that they deemed to be material, including those factors described above, the Trustees/Directors, including the Independent Trustees/Directors, unanimously concluded that the approval of the Proposed Agreement was in the interests of each Fund and its shareholders, and determined to recommend the same for approval by shareholders.

**Consideration of the Continuation of the Current Investment Management and Portfolio Management Agreements with respect to PCM**

The Investment Company Act of 1940, as amended, requires that both the full Board of Directors and a majority of the Independent Directors, voting separately, approve the Fund's Management Agreement with the Investment Manager (the Advisory Agreements) and Portfolio Management Agreement between the Investment Manager and the Sub-Adviser (the Sub-Advisory Agreements, and, together with the Advisory Agreements, the Current Agreements). As discussed under Consideration of the Proposed Investment Management Agreement above, the Directors approved the Proposed Agreement between PCM and PIMCO on March 10-11, 2014, which, as it was subsequently approved by shareholders of the Fund, will become effective for the Fund at a date and time mutually agreeable to the Fund, PIMCO and AGIFM in order to effect an efficient transition for the Fund and its shareholders. When the Proposed Agreement takes effect with respect to the Fund, PIMCO will replace AGIFM as the investment manager of the Fund and PIMCO will no longer serve as the Fund's sub-adviser, and the Current Agreements with respect to the Fund will terminate. However, the current terms of the Current Agreements with respect to PCM terminate before the Proposed Agreement is expected to take effect, and, therefore, the Directors were also asked to approve the continuance of PCM's Current

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

Agreements for an additional term (which will expire upon the effectiveness of the Proposed Agreement, which has since been approved by shareholders). Accordingly, the Directors met in person on June 23-24, 2014 (the contract review meeting ) for the specific purpose of considering whether to approve the continuation of the Advisory Agreements and the Sub-Advisory Agreements. The Independent Directors were assisted in their evaluation of the Current Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the contract review meetings.

In connection with their deliberations regarding the continuation of the Current Agreements, the Directors, including the Independent Directors, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Directors considered the nature, quality, and extent of the various investment management, administrative and other services performed by the Investment Manager or the Sub-Adviser under the applicable Agreement.

In connection with their contract review meeting, the Directors relied upon materials provided by the Investment Manager and the Sub-Adviser for the contract review meeting or for prior meetings which included, among other items: (i) information provided by Lipper Inc. ( Lipper ), an independent third party, on the total return investment performance (based on net assets) of the Fund for various time periods and the investment performance of a group of funds with investment classifications/objectives comparable to those of the Fund identified by Lipper (the Lipper performance universe ), (ii) information provided by Lipper on the Fund's management fees and other expenses and the management fees and other expenses of comparable funds

identified by Lipper, (iii) the estimated profitability to the Investment Manager from its relationship with the Fund for the one-year period ended December 31, 2013, (iv) descriptions of various functions performed by the Investment Manager and the Sub-Adviser for the Fund, such as portfolio management, compliance monitoring and portfolio trading practices, and (v) information regarding the overall organization of the Investment Manager and the Sub-Adviser, including information regarding senior management, portfolio managers and other personnel providing investment management, administrative and other services to the Fund.

The Directors' conclusions as to the continuation of the Current Agreements were based on a comprehensive consideration of all information provided to the Directors and were not the result of any single factor. Some of the factors that figured particularly in the Directors' deliberations are described below, although individual Directors may have evaluated the information presented differently from one another, attributing different weights to various factors.

In addition, it was noted that the Directors considered matters bearing on the Fund and its advisory arrangements at their meetings throughout the year, including a review of performance data at each regular meeting.

As part of their review, the Directors examined the Investment Manager's and the Sub-Adviser's abilities to provide high-quality investment management and other services to the Fund. Among other information, the Directors considered the investment philosophy and research and decision-making processes of the Sub-Adviser; the experience of key advisory personnel of the Sub-Adviser responsible for portfolio management of the Fund; the ability of the Investment Manager and the Sub-Adviser to attract and retain capable personnel; and the

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

capability of the senior management and staff of the Investment Manager and the Sub-Adviser. In addition, the Directors reviewed the quality of the Investment Manager's and the Sub-Adviser's services with respect to regulatory compliance and compliance with the investment policies of the Fund; the nature and quality of certain administrative services the Investment Manager is responsible for providing to the Fund; and conditions that might affect the Investment Manager's or the Sub-Adviser's ability to provide high-quality services to the Fund in the future under the Current Agreements, including each organization's respective financial condition and operational stability. Based on the foregoing, the Directors concluded that the Sub-Adviser's investment process, research capabilities and philosophy were well suited to the Fund given its investment objective and policies, and that the Investment Manager and the Sub-Adviser would be able to continue to meet any reasonably foreseeable obligations under the Current Agreements.

In assessing the reasonableness of the Fund's fees under the Current Agreements, the Directors considered, among other information, the Fund's management fee and its total expense ratio as a percentage of average net assets attributable to common shares and as a percentage of total managed assets (including assets attributable to common shares and leverage outstanding combined), and the management fee and total expense ratios of a peer expense group of funds based on information provided by Lipper. The Fund-specific fee and expense results discussed below were prepared and provided by Lipper and were not independently verified by the Directors.

The Directors specifically took note of how the Fund compared to its Lipper peers as to performance, management fee expense and total net expenses. The Directors noted that

while the Fund is not currently charged a separate administration fee (recognizing that their management fees include a component for administrative services), it was not clear in all cases whether the peer funds in the Lipper category were separately charged such a fee by their investment managers, so that the total expense ratio (rather than any individual expense component) represented the most relevant comparison. It was noted that the total expense ratio comparisons reflect the effect of expense waivers/reimbursements (although none exist for the Fund).

The Directors noted that the expense group for the Fund provided by Lipper consisted of a total of seven closed-end funds, including the Fund. The Directors also noted that the average net assets of the common shares of the funds in the group ranged from \$74.6 million to \$487.3 million, and that four of the funds in the group were larger in asset size than the Fund. The Directors noted that the Fund's management fee was above the median management fee of the other funds in its expense group provided by Lipper calculated on common share assets, but was at the median management fee calculated on common share and leveraged assets combined. With respect to the Fund's total expense ratio (excluding interest expense) calculated on average net assets, the Directors noted that the Fund's estimated total expense ratio was below the median total expense ratio of the group of funds presented for comparison.

Fund-specific performance results for the one-year, three-year, five-year and ten-year periods ended December 31, 2013 reviewed by the Directors are discussed under "Consideration of the Proposed Investment Management Agreement" above.

In addition to their review of Fund performance based on net asset value, the Directors also considered the market value performance of

---

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

PCM Fund, Inc./PIMCO Dynamic Credit Income Fund

the Fund's common shares and related share price premium and/or discount information based on the materials provided by Lipper and management.

The Directors were advised that PIMCO does not manage any funds or accounts which have an investment strategy or return profile bearing any reasonable similarity to those of the Fund.

The Trustees also took into account that the use of leverage by the Fund, such as through the use of reverse repurchase agreements, increases the amount of management fees payable by the Fund under the Current Agreements (because the Fund's fees are calculated based on total managed assets, including assets attributable to certain forms of leverage). The Directors took into account that the Investment Manager and the Sub-Adviser have a financial incentive for the Fund to have certain forms of leverage outstanding, which may create a conflict of interest between the Investment Manager and the Sub-Adviser, on the one hand, and the Fund's common shareholders, on the other. In this regard, the Directors considered information provided by the Investment Manager and the Sub-Adviser and related presentations as to why the Fund's use of leverage continues to be appropriate and in the best interests of the Fund under current market conditions. The Directors also considered PIMCO's representation that it will use leverage for the Fund solely as it determines to be in the best interests of the Fund from an investment perspective and without regard to the level of compensation the Investment Manager or the Sub-Adviser receive.

Based on a profitability analysis provided by the Investment Manager, the Directors also considered the estimated profitability to the Investment Manager from its relationship with the Fund and determined that such profitability did not appear to be excessive.

The Directors also took into account that, as a closed-end investment company, the Fund does not currently intend to raise additional assets, so the assets of the Fund will grow (if at all) principally through the investment performance of the Fund. Therefore, the Directors did not consider potential economies of scale as a principal factor in assessing the fee rates payable under the Current Agreements.

Additionally, the Directors considered so-called "fall-out benefits" to the Investment Manager and the Sub-Adviser, such as reputational value derived from serving as Investment Manager and Sub-Adviser to the Fund and research, statistical and quotation services the Investment Manager and Sub-Adviser may receive from broker-dealers executing the Fund's portfolio transactions on an agency basis.

After reviewing these and other factors described herein, the Directors concluded, within the context of their overall conclusions regarding the Current Agreements and based on the information provided and related representations made by management, that they were satisfied with the Investment Manager's and the Sub-Adviser's responses and efforts relating to the investment performance of the Fund. The Directors also concluded that the fees payable under each Current Agreement represent reasonable compensation in light of the nature, extent and quality of services provided by the Investment Manager or Sub-Adviser, as the case may be. Based on their evaluation of factors that they deemed to be material, including those factors described above, the Directors, including the Independent Directors, unanimously concluded that the continuation of the Current Agreements was in the interests of the Fund and its shareholders, and should be approved.
