BFC Financial and BBX Capital: Summary

This overview tells you what we do rather than who we are and how we are approaching our business. It is important to note:

First, our culture is entrepreneurial. Our objective is to make portfolio investments based on the fundamentals: quality real estate, the right operating companies and partnering with good people.

Second, our goal is to increase value over time as opposed to focusing on quarterly or yearly earnings. Since we expect our investments to be longer term, we anticipate and are willing to accept that our earnings are likely to be

uneven. While capital markets generally encourage short term goals, our objective is long term growth as measured by increases in book value per share over time.
