Item 1. Reports to Stockholders.

SECTION 19(B) DISCLOSURE

October 31, 2015 (Unaudited)

Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund (each a Fund and collectively, the Funds), acting pursuant to a Securities and Exchange Commission (SEC) exemptive order and with the approval of each Fund s Board of Trustees (the Board), have adopted a plan, consistent with each Fund s investment objectives and policies to support a level distribution of income, capital gains and/or return of capital (the Plan). In accordance with the Plan, Clough Global Allocation Fund distributes \$0.120 per share on a monthly basis, Clough Global Equity Fund distributes \$0.115 per share on a monthly basis and Clough Global Opportunities Fund distributes \$0.100 per share on a monthly basis.

The fixed amount distributed per share is subject to change at the discretion of each Fund s Board. Under the Plan, each Fund will distribute all available investment income to its shareholders, consistent with each Fund s primary investment objectives and as required by the Internal Revenue Code of 1986, as amended (the Code). If sufficient investment income is not available on a monthly basis, each Fund will distribute long-term capital gains and/or return of capital to shareholders in order to maintain a level distribution. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential distribution rate increases or decreases to enable each Fund to comply with the distribution requirements imposed by the Code.

Shareholders should not draw any conclusions about each Fund s investment performance from the amount of these distributions or from the terms of the Plan. Each Fund s total return performance on net asset value is presented in its financial highlights table.

The Board may amend, suspend or terminate each Fund s Plan without prior notice if it deems such action to be in the best interest of either the Fund or its shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if a Fund s stock is trading at or above net asset value) or widening an existing trading discount. Each Fund is subject to risks that could have an adverse impact on its ability to maintain level distributions. Examples of potential risks include, but are not limited to, economic downturns impacting the markets, increased market volatility, companies suspending or decreasing corporate dividend distributions and changes in the Code. Please refer to each Fund s prospectus for a more complete description of its risks.

Please refer to Additional Information for a cumulative summary of the Section 19(a) notices for each Fund s current fiscal period. Section 19(a) notices for each Fund, as applicable, are available on the Clough Global Closed-End Funds website www.cloughglobal.com.

Clough Global Funds Shareholder Letter

October 31, 2015 (Unaudited)

To Our Investors:

Clough Global Allocation Fund (GLV)

During the twelve months ended October 31, 2015, the Clough Global Allocation Fund s total return, assuming reinvestment of all distributions, was 1.61% based on the net asset value and 2.57% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 5.20% and 2.43% respectively over the same period. During the twelve months ended October 31, 2015, the Fund paid \$1.41 per share in distributions. As of October 31st, the Fund had an annualized dividend distribution rate on the market price of 10.37%.

Clough Global Equity Fund (GLQ)

During the twelve months ended October 31, 2015, the Clough Global Equity Fund s total return, assuming reinvestment of all distributions, was 0.76% based on the net asset value and -0.98% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 5.20% and 2.43% respectively over the same period. During the twelve months ended October 31, 2015, the Fund paid \$1.36 per share in distributions. As of October 31st, the Fund had an annualized dividend distribution rate on the market price of 10.53%.

Clough Global Opportunities Fund (GLO)

During the twelve months ended October 31, 2015, the Clough Global Opportunities Fund s total return, assuming reinvestment of all distributions, was 1.13% based on the net asset value and 1.93% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 5.20% and 2.43% respectively over the same period. During the twelve months ended October 31, 2015, the Fund paid \$1.19 per share in distributions. As of October 31st, the Fund had an annualized dividend distribution rate on the market price of 10.58%.

For the year ending October 31, 2015, the Global Allocation Fund finished up 1.61%, the Global Equity Fund finished up 0.76%, and the Global Opportunities Fund finished up 1.13%.

The Consumer Discretionary sector was the largest contributor to performance. Homebuilders such as DR Horton, jewelry retailer Signet, and theater operator IMAX were top contributors within the consumer sector. The Information Technology sector was also a significant help to performance including names like Salesforce.com and Facebook.

Our investments in some homebuilders have been profitable, but nowhere near the extent had we thought likely at this point in the cycle. They were up modestly in a strong tape this month. Disappointing pending home sales were reported for September, but that was due to supply shortages. Fundamentals at some companies in the field are strong, with major firms reporting double digit order

and backlog growth, and we still think pent up demand is likely to cause a breakout in single family housing activity in 2016 and 2017.

Detractors to performance were in the Energy and Financial sectors. Two holdings on the long side in Lumber Liquidators and Calpine also hurt performance. The Funds no longer hold the former but are sticking with the latter as we believe the fundamentals and cash flow generation are strong.

The short book was strong in the first half of 2015 as positions designed to benefit from a strong dollar and collapsing commodities markets outperformed. These positions became a drag in the last quarter when a sharp—snap back—rally in energy equipment suppliers and industrial commodity producers took back earlier profits. We believe these rallies won—t last. For one, the renewed raise in the dollar—s foreign exchange value only aggravates the deflationary world in which commodity producers exist. Industrial and precious metal prices have already reversed in a weak rally and many have declined to new lows. Profits for many of these companies are in secular decline.

Free cash flow is becoming a powerful stock selection tool on both the long and short sides. There are companies that generate excess free cash flow after funding dividends and capital spending requirements and there are those that do not. Those that do we call compounders companies which can grow shareholder value year in and year out. We have seen any number of instances where companies facing fundamental decline have aggravated the destruction of shareholder value by leveraging to purchase shares at prices higher than what their stock sells for today. Many of the former, companies generating sufficient free cash flow to fund necessary capex and add to cash holdings, performed well. Interestingly, free cash flow is negative for the corporate sector as a whole so far in 2015, and companies which are taking on debt to support buybacks and dividends are typically moving onto our short/hedge list. The more the leveraged loan market comes under stress, the greater the short side opportunity becomes.

The comparable to free cash flow in the financial sector is excess capital and one holding in which we see that accreting is Citigroup Inc. The company is in a unique position of building excess capital while being able to buy back stock at a discount to its tangible book value. It also faces a market share opportunity as weaker competitive global banks shrink operations. Such examples include Standard Charter and Credit Suisse, both of whom recently announced capital raises and business restructuring. Deutsche Bank and Unicredit also announced staff and asset reductions.

Broadly speaking, our current short book is focused on industries in which we believe earnings will likely suffer from chronic industry overinvestment. Examples include energy, suppliers to smartphone manufacturers, and excess capacity in the European airline industry.

According to a Simmons & Co. analyst, dividend and capital spending by the major oil companies will exceed cash flow by \$90 billion in 2015 even after all announced capital spending cuts. The most

www.cloughglobal.com

Clough Global Funds Shareholder Letter

October 31, 2015 (Unaudited)

vulnerable service companies we see are the deep water drillers. The companies must take delivery of excess rigs ordered during the period of higher oil prices but now face few new contract opportunities.

Finally, we still hold firm in our belief that we are in a low interest rate environment, regardless of the possible upcoming Fed rate hike in December. We are long duration in the form of 30 year US treasuries and will continue to build this position when temporary rise in yields provide an attractive entry point.

If you have any questions about your investment, please call 1-877-256-8445.

Sincerely,

Charles I. Clough, Jr.

Robert M. Zdunczyk

Past performance is no guarantee of future results.

This letter is provided for informational purposes only and is not an offer to purchase or sell shares. Clough Global Allocation Fund, Clough Global Equity Fund and Clough Opportunities Fund are closed-end funds, which are traded on the New York Stock Exchange AMEX, and does not continuously issue shares for sale as open-end mutual funds do. The market price of a closed end Fund is based on the market s value.

The information in this letter represents the opinions of the individual Portfolio Managers and is not intended to be a forecast of future events, a guarantee of future results, or investment advice. Past performance is no guarantee of future results.

Tangible Book Value: Computed by deducting intangible assets, start-up expenses, and deferred financing costs from the firm s normal book value (BV).

MSCI World Index: a stock market index of world stocks. It is maintained by MSCI Inc. and is often used as a common benchmark for world or global stock funds. The index includes a collection of stocks of all the developed markets in the world as defined by MSCI.

S&P~500~Index: Broad-based measurement of changes in stock market conditions based on the average performance of 500 widely held common stocks commonly known as the Standard & Poor $s~500^{\circ}$ or $S\&P~500^{\circ}$.

It is not possible to invest directly in an index.

The net asset value (NAV) of a closed-end fund is the market price of the underlying investments (i.e., stocks and bonds) in the fund s portfolio, minus liabilities, divided by the total number of fund shares outstanding. However, the fund also has a market price; the value of which it trades on an exchange. This market price can be more or less than its NAV.

Annual Report | October 31, 2015

33

⁽¹⁾ The Board announced, on September 12, 2014, approval to change the fiscal year-end of the Fund from March 31 to October 31 (See Note 1).

⁽²⁾ Total investment return is calculated assuming a purchase of a common share at the opening on the first day and a sale at the closing on the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at price obtained under the Fund s dividend reinvestment plan. Total investment returns do not reflect brokerage commissions on the purchase or sale of the Fund s common shares. Past performance is not a guarantee of future results. Total returns for the period indicated are not annualized.

⁽³⁾ Annualized.

⁽⁴⁾ Portfolio turnover rate for periods less than one full year have not been annualized.

See Notes to the Financial Statements.

⁽¹⁾ The Board announced, on September 12, 2014, approval to change the fiscal year-end of the Fund from March 31 to October 31 (See Note 1).

⁽²⁾ Total investment return is calculated assuming a purchase of a common share at the opening on the first day and a sale at the closing on the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at price obtained under the Fund s dividend reinvestment plan. Total investment returns do not reflect brokerage commissions on the purchase or sale of the Fund s common shares. Past performance is not a guarantee of future results. Total returns for the period indicated are not annualized.

⁽³⁾ Annualized.

⁽⁴⁾ Portfolio turnover rate for periods less than one full year have not been annualized.

Clough Global Funds

Notes to Financial Statements

October 31, 2015

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING AND OPERATING POLICIES

Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund, are closed-end management investment companies registered under the Investment Company Act of 1940 (the 1940 Act). The Funds were organized under the laws of the state of Delaware by an Amended Agreement and Declaration of Trust dated April 27, 2004 and January 25, 2005, respectively for Clough Global Allocation Fund and Clough Global Equity Fund, and an Agreement and Declaration of Trust dated January 12, 2006, for Clough Global Opportunities Fund. The Funds were previously registered as non-diversified investment companies. As a result of ongoing operations, each of the Funds became a diversified company. The Funds may not resume operating in a non-diversified manner without first obtaining shareholder approval. Each Fund s investment objective is to provide a high level of total return. Each Declaration of Trust provides that the Board of Trustees may authorize separate classes of shares of beneficial interest. The common shares of Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund are listed on the NYSE MKT and trade under the ticker symbols GLV , GLQ and GLO respectively. The Board of Trustees of each Fund announced, on September 12, 2014, that it had approved a change to the Funds fiscal year-end from March 31 to October 31.

The following is a summary of significant accounting policies followed by the Funds. These policies are in conformity with U.S. generally accepted accounting principles (GAAP). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements during the reporting period. Management believes the estimates and security valuations are appropriate; however, actual results may differ from those estimates, and the security valuations reflected in the financial statements may differ from the value the Funds ultimately realize upon sale of the securities. Each Fund is considered an investment company for financial reporting purposes under GAAP.

The net asset value per share of each Fund is determined no less frequently than daily, on each day that the New York Stock Exchange (NYSE or the Exchange) is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). Trading may take place in foreign issues held by the Fund at times when a Fund is not open for business. As a result, each Fund s net asset value may change at times when it is not possible to purchase or sell shares of a Fund.

Investment Valuation: Securities, including futures contracts, held by each Fund for which exchange quotations are readily available are valued at the last sale price, or if no sale price or if traded on the over-the-counter market, at the mean of the bid and asked prices on such day. Most securities listed on a foreign exchange are valued at the last sale price at the close of the exchange on which the security is primarily traded. In certain countries market maker prices are used since they are the most representative of the daily trading activity. Market maker prices are usually the mean between the bid and ask prices. Certain markets are not closed at the time that the Funds price their portfolio securities. In these situations, snapshot prices are provided by the individual pricing services or other alternate sources at the close of the NYSE as appropriate. Securities not traded on a particular day are valued at the mean between the last reported bid and the asked quotes, or the last sale price when appropriate; otherwise fair value will be determined by the board-appointed fair valuation committee. Debt securities for which the over-the-counter market is the primary

market are normally valued on the basis of prices furnished by one or more pricing services or dealers at the mean between the latest available bid and asked prices. As authorized by the Board of Trustees, debt securities (including short-term obligations that will mature in 60 days or less) may be valued on the basis of valuations furnished by a pricing service which determines valuations based upon market transactions for normal, institutional-size trading units of securities or a matrix method which considers yield or price of comparable bonds provided by a pricing service. Over-the-counter options are valued at the mean between bid and asked prices provided by dealers. Exchange-traded options are valued at closing settlement prices. Total return swaps are priced based on valuations provided by a Board approved independent third party pricing agent. If a total return swap price cannot be obtained from an independent third party pricing agent the Fund shall seek to obtain a bid price from at least one independent and/or executing broker.

If the price of a security is unavailable in accordance with the aforementioned pricing procedures, or the price of a security is unreliable, e.g., due to the occurrence of a significant event, the security may be valued at its fair value determined by management pursuant to procedures adopted by the Board of Trustees. For this purpose, fair value is the price that a Fund reasonably expects to receive on a current sale of the security. Due to the number of variables affecting the price of a security, however; it is possible that the fair value of a security may not accurately reflect the price that a Fund could actually receive on a sale of the security.

A three-tier hierarchy has been established to classify fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

Clough Global Funds

Notes to Financial Statements

October 31, 2015

Various inputs are used in determining the value of each Fund s investments as of the reporting period end. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

- Level 1 Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that a Fund has the ability to access at the measurement date;
- Level 2 Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 Significant unobservable prices or inputs (including the Fund's own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used as of October 31, 2015, in valuing each Fund s investments carried at value. The Funds recognize transfers between the levels as of the end of the period in which the transfer occurred. There were no transfers between Levels 1 and 2 during the year ended October 31, 2015.

In the event a Board approved independent pricing service is unable to provide an evaluated price for a security or Clough Capital Partners L.P. (the Adviser or Clough) believes the price provided is not reliable, securities of each Fund may be valued at fair value as described above. In these instances the Adviser may seek to find an alternative independent source, such as a broker/dealer to provide a price quote, or by using evaluated pricing models similar to the techniques and models used by the independent pricing service. These fair value measurement techniques may utilize unobservable inputs (Level 3).

On a monthly basis, the Fair Value Committee of each Fund meets and discusses securities that have been fair valued during the preceding month in accordance with the Funds Fair Value Procedures and reports quarterly to the Board of Trustees on the results of those meetings.

Annual Report | October 31, 2015

39

^{*} For detailed industry descriptions, see the accompanying Statement of Investments.

^{**} Swap contracts and futures contracts are reported at their unrealized appreciation/(depreciation) at measurement date, which represents the change in the contract s value from trade date.

Clough Global Funds

Notes to Financial Statements

October 31, 2015

For the year ended October 31, 2015, the Funds did not have significant unobservable inputs (Level 3) used in determining fair value. Therefore, a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value is not applicable.

Foreign Securities: Each Fund may invest a portion of its assets in foreign securities. In the event that a Fund executes a foreign security transaction, the Fund will generally enter into a foreign currency spot contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The accounting records of each Fund are maintained in U.S. dollars. Prices of securities denominated in foreign currencies are translated into U.S. dollars at the closing rates of exchange at period end. Amounts related to the purchase and sale of foreign securities and investment income are translated at the rates of exchange prevailing on the respective dates of such transactions.

The effect of changes in foreign currency exchange rates on investments is reported with investment securities realized and unrealized gains and losses in the Funds Statements of Operations.

A foreign currency spot contract is a commitment to purchase or sell a foreign currency at a future date, at a negotiated rate. Each Fund may enter into foreign currency spot contracts to settle specific purchases or sales of securities denominated in a foreign currency and for protection from adverse exchange rate fluctuation. Risks to a Fund include the potential inability of the counterparty to meet the terms of the contract.

The net U.S. dollar value of foreign currency underlying all contractual commitments held by a Fund and the resulting unrealized appreciation or depreciation are determined using prevailing forward foreign currency exchange rates. Unrealized appreciation and depreciation on foreign currency spot contracts are reported in the Funds Statements of Assets and Liabilities as a receivable or a payable and in the Funds Statements of Operations with the change in unrealized appreciation or depreciation on translation of assets and liabilities denominated in foreign currencies. These spot contracts are used by the broker to settle investments denominated in foreign currencies.

A Fund may realize a gain or loss upon the closing or settlement of the foreign transactions, excluding investment securities. Such realized gains and losses are reported with all other foreign currency gains and losses in the Statements of Operations.

Short Sales: Each Fund may sell a security it does not own in anticipation of a decline in the fair value of that security. When a Fund sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. A gain, limited to the price at which a Fund sold the security short, or a loss, unlimited in size, will be recognized upon the termination of the short sale.

Each Fund s obligation to replace the borrowed security will be secured by collateral deposited with the broker-dealer, usually cash, U.S. government securities or other liquid securities. Each Fund will also be required to designate on its

books and records similar collateral with its custodian to the extent, if any, necessary so that the aggregate collateral value is at all times at least equal to the current market value of the security sold short. The cash amount is reported on the Statements of Assets and Liabilities as Deposit with broker for securities sold short which is held with one counterparty. Each Fund is obligated to pay interest to the broker for any debit balance of the margin account relating to short sales. The interest incurred by the Funds is reported on the Statements of Operations as Interest expense margin account. Interest amounts payable are reported on the Statements of Assets and Liabilities as Interest payable margin account.

Each Fund may also sell a security short if it owns at least an equal amount of the security sold short or another security convertible or exchangeable for an equal amount of the security sold short without payment of further compensation (a short sale against-the-box). In a short sale against-the-box, the short seller is exposed to the risk of being forced to deliver stock that it holds to close the position if the borrowed stock is called in by the lender, which would cause gain or loss to be recognized on the delivered stock. Each Fund expects normally to close its short sales against-the-box by delivering newly acquired stock. Since the Funds intend to hold securities sold short for the short term, these securities are excluded from the purchases and sales of investment securities in Note 4 and the Fund s Portfolio Turnover in the Financial Highlights.

Derivatives Instruments and Hedging Activities: The following discloses the Funds use of derivative instruments and hedging activities.

The Funds investment objectives not only permit the Funds to purchase investment securities, they also allow the Funds to enter into various types of derivative contracts, including, but not limited to, purchased and written options, swaps, futures and warrants. In doing so, the Funds will employ strategies in differing combinations to permit them to increase, decrease, or change the level or types of exposure to market factors. Central to those strategies are features inherent to derivatives that make them more attractive for this purpose than equity securities; they require little or no initial cash investment, they can focus exposure on only certain selected risk factors, and they may not require the ultimate receipt or delivery of the underlying security (or securities) to the contract. This may allow the Funds to pursue their objectives more quickly and efficiently than if they were to make direct purchases or sales of securities capable of affecting a similar response to market factors.

40 www.cloughglobal.com

Clough Global Funds

Notes to Financial Statements

October 31, 2015

Risk of Investing in Derivatives: The Funds use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market. In instances where the Funds are using derivatives to decrease or hedge exposures to market risk factors for securities held by the Funds, there are also risks that those derivatives may not perform as expected, resulting in losses for the combined or hedged positions.

Derivatives may have little or no initial cash investment relative to their market value exposure and therefore can produce significant gains or losses in excess of their cost. This use of embedded leverage allows the Funds to increase their market value exposure relative to their net assets and can substantially increase the volatility of the Funds performance.

Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivative and the Funds. Typically, the associated risks are not the risks that the Funds are attempting to increase or decrease exposure to, per their investment objectives, but are the additional risks from investing in derivatives.

Examples of these associated risks are liquidity risk, which is the risk that the Funds will not be able to sell the derivative in the open market in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Funds. Associated risks can be different for each type of derivative and are discussed by each derivative type in the notes that follow.

Each Fund may acquire put and call options and options on stock indices and enter into stock index futures contracts, certain credit derivatives transactions and short sales in connection with its equity investments. In connection with a Fund s investments in debt securities, it may enter into related derivatives transactions such as interest rate futures, swaps and options thereon and certain credit derivatives transactions. Derivatives transactions of the types described above subject a Fund to increased risk of principal loss due to imperfect correlation or unexpected price or interest rate movements. Each Fund also will be subject to credit risk with respect to the counterparties to the derivatives contracts purchased by a Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivatives contract due to financial difficulties, each Fund may experience significant delays in obtaining any recovery under the derivatives contract in a bankruptcy or other reorganization proceeding. Each Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

Market Risk Factors: In addition, in pursuit of their investment objectives, certain Funds may seek to use derivatives, which may increase or decrease exposure to the following market risk factors:

Equity Risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

Foreign Exchange Rate Risk: Foreign exchange rate risk relates to the change in the U.S. dollar value of a security held that is denominated in a foreign currency. The value of a foreign currency denominated security will decrease as the dollar appreciates against the currency, while the value of the foreign currency denominated security will increase

as the dollar depreciates against the currency.

Option Writing/Purchasing: Each Fund may purchase or write (sell) put and call options. One of the risks associated with purchasing an option among others, is that a Fund pays a premium whether or not the option is exercised. Additionally, a Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid. Each Fund is obligated to pay interest to the broker for any debit balance of the margin account relating to options. Each Fund pledges cash or liquid assets as collateral to satisfy the current obligations with respect to written options. The interest incurred on the Funds is reported on the Statements of Operations as Interest expense margin account. Interest amounts payable by the Funds are reported on the Statements of Assets and Liabilities as Interest payable margin account.

When a Fund writes an option, an amount equal to the premium received by a Fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by a Fund on the expiration date as realized gains. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is recorded as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether a Fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by a Fund. Each Fund, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option.

Futures Contracts: Each Fund may enter into futures contracts. A futures contract is an agreement to buy or sell a security or currency (or to deliver a final cash settlement price in the case of a contract relating to an index or otherwise not calling for physical delivery at the end of trading in the contract) for a set price at a future date. If a Fund buys a security futures contract, the Fund enters into a contract to purchase the underlying security and is said to be long under the contract. If a Fund sells a security futures contact, the Fund enters into a contract to sell the underlying security and is said to be short under the contract. The price at which the contract trades (the contract price) is determined by relative buying and selling interest on a regulated exchange. Futures contracts are marked to market daily and an appropriate payable or receivable for the change in value (variation margin) is recorded by the Fund. Such payables or receivables are recorded for financial statement purposes as variation margin payable or variation margin receivable by each Fund. Each Fund pledges cash or liquid assets as collateral to satisfy the current obligations with respect to futures contracts. The cash amount is reported on the Statements of Assets and Liabilities as Deposit with broker for futures contracts which is held with one counterparty.

The Funds enter into such transactions for hedging and other appropriate risk-management purposes or to increase return. While a Fund may enter into futures contracts for hedging purposes, the use of futures contracts might result in a poorer overall performance for the Fund than if it had not engaged in any such transactions. If, for example, the Fund had insufficient cash, it might have to sell a portion of its underlying portfolio of securities in order to meet daily variation margin requirements on its futures contracts or options on futures contracts at a time when it might be disadvantageous to do so. There may be an imperfect correlation between the Funds portfolio holdings and futures contracts entered into by the Fund, which may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss.

Futures contract transactions may result in losses substantially in excess of the variation margin. There can be no guarantee that there will be a correlation between price movements in the hedging vehicle and in the portfolio securities being hedged. An incorrect correlation could result in a loss on both the hedged securities in a Fund and the hedging vehicle so that the portfolio return might have been greater had hedging not been

attempted. There can be no assurance that a liquid market will exist at a time when the Fund seeks to close out a futures contract. Lack of a liquid market for any reason may prevent a Fund from liquidating an unfavorable position, and the Fund would remain obligated to meet margin requirements until the position is closed. In addition, the Fund could be exposed to risk if the counterparties to the contracts are unable to meet the terms of their contracts. With exchange-traded futures contracts, there is minimal counterparty credit risk to the Funds since futures contracts are exchange-traded and the exchange s clearinghouse, as counterparty to all exchange-traded futures contracts, guarantees the futures contracts against default.

Swaps: During the year each Fund engaged in total return swaps. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. Each Fund may utilize swap agreements as a means to gain exposure to certain assets and/or to hedge or protect the Fund from adverse movements in securities prices or interest rates. Each Fund is subject to equity risk and interest rate risk in the normal course of pursuing its investment objective through investments in swap contracts. Swap agreements entail the risk that a party will default on its payment obligation to a Fund. If the other party to a swap defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If each Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund s total return.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period. A Fund s maximum risk of loss from counterparty risk or credit risk is the discounted value of the payments to be received from/paid to the counterparty over the contract s remaining life, to the extent that the amount is positive. The risk is mitigated by having a netting arrangement between a Fund and the counterparty and by the posting of collateral to a Fund to cover the Fund s exposure to the counterparty. Each Fund pledges cash or liquid assets as collateral to satisfy the current obligations with respect to swap contracts. The cash amount is reported on the Statements of Assets and Liabilities as Deposit with brokers for total return swap contracts which is held with two counterparties.

International Swaps and Derivatives Association, Inc. Master Agreements (ISDA Master Agreements) govern OTC financial derivative transactions entered into by a Fund and those counterparties. The ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to early terminate could be material to the financial statements.

During the year ended October 31, 2015, the Funds invested in swap agreements consistent with the Funds investment strategies to gain exposure to certain markets or indices.

Warrants/Rights: Each Fund may purchase or otherwise receive warrants or rights. Warrants and rights generally give the holder the right to receive, upon exercise, a security of the issuer at a set price. Funds typically use warrants

and rights in a manner similar to their use of purchased options on securities, as described in options above. Risks associated with the use of warrants and rights are generally similar to risks associated with the use of purchased options. However, warrants and rights often do not have standardized terms, and may have longer maturities and may be less liquid than exchange-traded options. In addition, the terms of warrants or rights may limit each Fund s ability to exercise the warrants or rights at such times and in such quantities as each Fund would otherwise wish. Each Fund held no rights at the end of the year.
