FreightCar America, Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

(In thousands, except for share and per share data)

Note 1 Description of the Business

FreightCar America, Inc. (FreightCar) operates primarily in North America through its direct and indirect subsidiaries, JAC Operations, Inc., Johnstown America, LLC, Freight Car Services, Inc., JAIX Leasing Company (JAIX), FreightCar Roanoke, LLC, FreightCar Alabama, LLC and FreightCar (Shanghai) Trading Co., Ltd. (herein collectively referred to as the Company), and manufactures a wide range of railroad freight cars, supplies railcar parts and leases freight cars. The Company designs and builds high-quality railcars, including coal cars, bulk commodity cars, covered hopper cars, intermodal and non-intermodal flat cars, mill gondola cars, coil steel cars and boxcars. The Company is headquartered in Chicago, Illinois and has facilities in the following locations: Cherokee, Alabama; Danville, Illinois; Grand Island, Nebraska; Johnstown, Pennsylvania; Roanoke, Virginia; and Shanghai, People s Republic of China.

The Company and its direct and indirect subsidiaries are all Delaware corporations or Delaware limited liability companies except FreightCar (Shanghai) Trading Co., Ltd., which is organized in the People s Republic of China. The Company s direct and indirect subsidiaries are all wholly owned.

Note 2 Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts of FreightCar America, Inc. and subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. The foregoing financial information has been prepared in accordance with the accounting principles generally accepted in the United States of America (GAAP) and rules and regulations of the U.S. Securities and Exchange Commission (the SEC) for interim financial reporting. The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. The results of operations for the three months ended March 31, 2016 are not necessarily indicative of the results to be expected for the full year. The accompanying interim financial information is unaudited; however, the Company believes the financial information reflects all adjustments (consisting of items of a normal recurring nature) necessary for a fair presentation of financial position, results of operations and cash flows in conformity with GAAP. The 2015 year-end balance sheet data was derived from the audited financial statements as of December 31, 2015. Certain information and note disclosures normally included in the Company s annual financial statements prepared in accordance with GAAP have been condensed or omitted. These interim financial statements should be read in conjunction with the audited financial statements contained in the Company s annual report on Form 10-K for the year ended December 31, 2015.

Note 3 Recent Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (the FASB) issued Accounting Standards Update (ASU) 2016-09, *Compensation - Stock Compensation (Topic 718) Improvements to Employee Share-Based Payment Accounting*, to simplify the accounting for stock compensation. The ASU focuses on income tax accounting, award classification, estimating forfeitures and cash flow presentation. This standard is effective for fiscal years, and interim

periods within those fiscal years, beginning after December 15, 2016, with early adoption permitted. The Company is currently evaluating the impact that this guidance will have on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*, which requires a lessee to record a right-of-use asset and a lease liability for all leases with a term greater than twelve months regardless of whether the lease is classified as an operating lease or a financing lease. Leases with a term of twelve months or less will be accounted for in a similar manner to existing guidance for operating leases. This standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. Entities are required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. The Company is currently assessing the impact of this standard on the Company's financial position, results of operations and cash flows.

Table of Contents

In July 2015, the FASB issued ASU 2015-11, *Inventory (Topic 330)*, which requires entities to measure most inventory at the lower of cost and net realizable value, thereby simplifying the current guidance under which an entity must measure inventory at the lower of cost or market. Under ASU 2015-11, inventory is measured at the lower of cost and net realizable value, which eliminates the need to determine replacement cost and evaluate whether it is above the ceiling (net realizable value) or below the floor (net realizable value less normal profit margin). ASU 2015-11 defines net realizable value as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. This standard is effective prospectively for annual reporting periods beginning after December 15, 2016 (early adoption is permitted). The Company is currently evaluating the impact that this guidance will have on its consolidated financial statements and related disclosures.

In April 2015, the FASB issued ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which changes the presentation of debt issuance costs in financial statements. ASU 2015-03 requires an entity to present such costs in the balance sheet as a direct deduction from the related debt liability rather than as an asset. Amortization of the debt issuance costs will continue to be reported as interest expense. This standard is effective retrospectively for annual reporting periods beginning after December 15, 2016 (early adoption is permitted). The adoption of these changes is not expected to have a material impact on the consolidated financial position, results of operations or cash flows of the Company.

In February 2015, the FASB issued ASU 2015-02, *Consolidation (Topic 810) Amendments to the Consolidation Analysis*, which changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. All legal entities are subject to reevaluation under the revised consolidation model. The new guidance affects the following areas: (1) limited partnerships and similar legal entities; (2) evaluating fees paid to a decision maker or a service provider as a variable interest; (3) the effect of fee arrangements on the primary beneficiary determination; (4) the effect of related parties on the primary beneficiary determination; and (5) certain investment funds. This standard is effective for fiscal years beginning after December 15, 2015 and interim periods within those fiscal years. The adoption of these changes did not have a material impact on the consolidated financial position, results of operations or cash flows of the Company.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which was further clarified in March 2016. The ASU outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most prior revenue recognition guidance, including industry-specific guidance. The ASU is based on the principle that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to fulfill a contract. Entities have the option of using either a full retrospective or a modified retrospective approach for the adoption of the new standard. The ASU is effective for annual reporting periods beginning after December 15, 2017 and early adoption as of December 15, 2016 is permitted. The Company is currently assessing the impact of this standard on the Company's financial position, results of operations and cash flows.

Note 4 Segment Information

On September 30, 2015, the Company sold its railcar repair and maintenance services business. Through September 30, 2015, the Company's operations comprised two reportable segments, Manufacturing and Services. As of October 1, 2015, the Company's operations comprise two operating segments, Manufacturing and Parts, and one reportable segment, Manufacturing. The Company's Manufacturing segment includes new railcar manufacturing, used railcar sales, railcar leasing and major railcar rebuilds. The Company's Parts operating segment is not expected to be of

continuing significance for separate reporting and has been combined with corporate and other non-operating activities as Corporate and Other. Prior period segment information has been recast to include general railcar repair and maintenance and inspections and parts sales in Corporate and Other.

Segment operating income is an internal performance measure used by the Company's Chief Operating Decision Maker to assess the performance of each segment in a given period. Segment operating income includes all external revenues attributable to the segments as well as operating costs and income that management believes are directly attributable to the current production of goods and services. The Company's management reporting package does not include interest revenue, interest expense or income taxes allocated to individual segments and these items are not considered as a component of segment operating income. Segment assets represent operating assets and exclude intersegment accounts, deferred tax assets and income tax receivables. The Company does not allocate cash and cash equivalents to its operating segments as the

Table of Contents

Company's treasury function is managed at the corporate level. Intersegment revenues were not material in any period presented.

Consolidated deferred income taxes, long-term	11,560	34,722

Consolidated assets	\$ 376,401	\$ 406,904
----------------------------	------------	------------

(1) Results for the three months ended March 31, 2016 included a \$14,306 gain on the settlement of a postretirement benefit plan obligation, net of plaintiffs' attorneys' fees (see note 12).

Note 5 Fair Value Measurements

The following table sets forth by level within the fair value hierarchy the Company's financial assets that were recorded at fair value on a recurring basis.

Recurring Fair Value Measurements	As of March 31, 2016			
	Level 1	Level 2	Level 3	Total
ASSETS:				
Cash equivalents	\$ 145	\$	\$	\$ 145
Restricted certificates of deposit	\$ 5,168	\$	\$	\$ 5,168
Escrow receivable	\$	\$	\$ 1,910	\$ 1,910

Table of Contents**Recurring Fair Value Measurements**

As of December 31, 2015

	Level			Total
	Level 1	Level 2	3	
ASSETS:				
Cash equivalents	\$ 33,150	\$	\$	\$ 33,150
Restricted certificates of deposit	\$ 6,896	\$	\$	\$ 6,896
Escrow receivable	\$	\$	\$ 1,910	\$ 1,910

No non-financial assets were recorded at fair value on a non-recurring basis at each of March 31, 2016 and December 31, 2015.

Note 6 Marketable Securities

The Company's current investment policy is to invest in cash, certificates of deposit, U.S. treasury securities, U.S. government agency obligations and money market funds invested in U.S. government securities. Marketable securities as of March 31, 2016 and December 31, 2015 of \$20,989 and \$26,951, respectively, consisted of U.S. treasury securities held to maturity and certificates of deposit with original maturities of greater than 90 days and up to one year. Due to the short-term nature of these securities and their low interest rates, there is no material difference between their fair market values and amortized costs.

Note 7 Inventories

Inventories, net of reserve for excess and slow-moving items, consist of the following:

	March 31, 2016	December 31, 2015
Work in process	\$ 127,658	\$ 108,099
Finished new railcars	4,393	2,538
Parts inventory	4,312	4,717
Total inventories, net	\$ 136,363	\$ 115,354

Inventory on the Company's condensed consolidated balance sheets includes reserves of \$4,137 and \$3,793 relating to excess or slow-moving inventory for parts and work in process at March 31, 2016 and December 31, 2015, respectively.

Note 8 Leased Railcars

Railcars available for lease, net at March 31, 2016 was \$24,544 (cost of \$27,954 and accumulated depreciation of \$3,410) and at December 31, 2015 was \$24,729 (cost of \$27,954 and accumulated depreciation of \$3,225). The Company's lease utilization rate for railcars in its lease fleet was 73% as of each of March 31, 2016 and December 31, 2015.

Leased railcars at March 31, 2016 are subject to lease agreements with external customers with terms of up to six years and are accounted for as operating leases.

Future minimum rental revenues on leased railcars at March 31, 2016 are as follows:

Nine months ending December 31, 2016	\$ 1,280
Year ending December 31, 2017	1,706
Year ending December 31, 2018	1,118
Year ending December 31, 2019	1,001
Year ending December 31, 2020	1,001
Thereafter	275
	\$ 6,381

Table of Contents**Note 9 State and Local Incentives**

The Company records state and local incentives when there is reasonable assurance that the incentive will be received and the Company is able to comply with the conditions attached to the incentives received. State incentives related to assets are recorded as deferred income and recognized on a straight-line basis over the useful life of the related assets.

During the year ended December 31, 2015, the Company received cash payments of \$15,733 for Alabama state and local incentives related to the Company's capital investment and employment levels at its Cherokee, Alabama (Shoals) facility. Under the incentive agreements, a certain portion of the incentives may be repayable by the Company if targeted levels of employment are not maintained for a period of six years from the grant date of the incentive. The Company's level of employment at its Shoals facility currently exceeds and is expected to continue to exceed the minimum targeted levels of employment. In the event that any portion of the incentives is required to be repaid by the Company, the amount of such repayment is unlikely to exceed the deferred liability balance at March 31, 2016.

The changes in deferred income from these incentives for the three months ended March 31, 2016 and 2015, are as follows:

	Three Months Ended March 31,	
	2016	2015
Balance at the beginning of the period	\$ 14,318	\$
State and local incentives received during the period		4,907
Recognition of state and local incentives as reduction of cost of sales	(532)	(175)
Balance at the end of the period, including current portion	\$ 13,786	\$ 4,732

Note 10 Accumulated Other Comprehensive Income (Loss)

The changes in accumulated other comprehensive income (loss) consist of the following:

	Pre-Tax	Tax	Net of Tax
<u>Three months ended March 31, 2016</u>			
Pension liability activity:			
Reclassification adjustment for amortization of net loss (pre-tax cost of sales of \$(10) and selling, general and administrative expenses of \$135)	\$ 125	\$ 44	\$ 81
Postretirement liability activity:			
Actuarial loss	(1,689)	(594)	(1,095)
Settlement gain	37,190	13,076	24,114
Reclassification adjustment for settlement income (pre-tax gain on settlement of postretirement benefit plan obligation)	(15,606)	(5,487)	(10,119)
	108	39	69

Reclassification adjustment for amortization of net loss
 (pre-tax cost of sales of \$96 and selling, general and
 administrative expenses of \$12)

Reclassification adjustment for amortization of prior service cost (pre-tax cost of sales of \$4)	4	1	3
------------------------------------------------------------------------------------------------------	---	---	---

\$ 20,132	\$ 7,079	\$ 13,053
-----------	----------	-----------

Table of Contents

	Pre-Tax	Tax	Net of Tax
Three months ended March 31, 2015			
Pension liability activity:			
Reclassification adjustment for amortization of net loss (pre-tax cost of sales of \$83 and selling, general and administrative expenses of \$27)	\$ 110	\$ 47	\$ 63
Postretirement liability activity:			
Reclassification adjustment for amortization of net loss (pre-tax cost of sales of \$142 and selling, general and administrative expenses of \$20)	162	66	96
Reclassification adjustment for amortization of prior service cost (pre-tax cost of sales of \$9 and selling, general and administrative expenses of \$1)	10	4	6
	\$ 282	\$ 117	\$ 165

The components of accumulated other comprehensive loss consist of the following:

	March 31, 2016	December 31, 2015
Unrecognized pension cost, net of tax of \$6,385 and \$6,429	\$ (10,403)	\$ (10,484)
Unrecognized postretirement income (cost), net of tax of \$573 and \$6,461	2,378	(10,594)
	\$ (8,025)	\$ (21,078)

Note 11 Stock-Based Compensation

The Company recognizes stock-based compensation expense for stock option awards based on the fair value of the award on the grant date using the Black-Scholes option valuation model. Expected life in years for all stock options awards was determined using the simplified method. The Company believes that it is appropriate to use the simplified method in determining the expected life for options because the Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate the expected term for stock options. Expected volatility was based on the historical volatility of the Company's stock. The risk-free interest rate was based on the U.S. Treasury bond rate for the expected life of the option. The expected dividend yield was based on the latest annualized dividend rate and the current market price of the underlying common stock on the date of the grant. The Company recognizes stock-based compensation for restricted stock awards over the vesting period based on the fair market value of the stock on the date of the award, calculated as the average of the high and low trading prices for the Company's common stock on the award date.

In January 2015 and January 2016, the Company granted performance shares with performance measurement periods of January 1, 2015 through December 31, 2017 and January 1, 2016 through December 31, 2018, respectively. The shares will vest and be earned at the end of each performance measurement period, if at all, based on the Company's three-year cumulative basic earnings per share, provided that a minimum three-year average return on invested capital goal is also met or exceeded. The earnings per share thresholds and return on invested capital goals were established

by the Company's board of directors on the grant dates. The Company recognizes stock-based compensation cost for performance shares over the vesting period based on the fair market value of the Company's stock on the award date multiplied by the estimated number of shares to be awarded based on the probable outcome of the performance conditions. As of March 31, 2016, the probable outcome of the performance conditions for both grants was estimated to be at the target level.

Total stock-based compensation for the three months ended March 31, 2016 and 2015, was \$229 and \$603, respectively.

As of March 31, 2016, there was \$1,259 of unearned compensation expense related to stock options and restricted stock awards, which will be recognized over the remaining requisite service period of 35 months.

Table of Contents**Note 12 Employee Benefit Plans**

The Company has qualified, defined benefit pension plans that were established to provide benefits to certain employees. These plans are frozen and participants are no longer accruing benefits. Generally, contributions to the plans are not less than the minimum amounts required under the Employee Retirement Income Security Act of 1974, as amended (ERISA) and not more than the maximum amount that can be deducted for federal income tax purposes. The plans' assets are held by independent trustees and consist primarily of equity and fixed income securities.

The Company also historically provided certain postretirement health care benefits for certain of its salaried and hourly retired employees. Generally, employees may become eligible for health care benefits if they retire after attaining specified age and service requirements. These benefits are subject to deductibles, co-payment provisions and other limitations.

A substantial portion of the Company's postretirement benefit plan obligation related to an expired settlement agreement with the Union representing employees at the Company's and its predecessors' Johnstown manufacturing facilities. The terms of that settlement agreement (the 2005 Settlement Agreement) required the Company to pay until November 30, 2012 certain monthly amounts toward the cost of retiree health care coverage. The Company terminated, effective November 1, 2013, its contributions for medical coverage and life insurance benefits to affected retirees. On August 20, 2015, the Company reached a settlement agreement with the Union and the other plaintiffs in connection with the disputed retiree medical and life insurance benefits (see Note 13). The Company's recorded postretirement benefit plan obligation through December 31, 2015 assumed for accounting purposes a continuation of those monthly payments after November 30, 2012 because the status of the settlement had not yet met the requirements for settlement accounting. A transaction meets the criteria to be accounted for as a settlement when a transaction is irrevocable, relieves the employer of primary responsibility for the benefit obligation, and eliminates significant risks related to the obligation and the assets used to effect the settlement. Settlement accounting was triggered when the Company made the cash settlement payment of \$31,616 (including \$166 of interest) on March 25, 2016. The settlement resulted in a pre-tax gain of \$14,306 (net of plaintiffs' attorneys' fees of \$1,300) and a reduction in the postretirement benefit obligation of approximately \$68,806.

The components of net periodic benefit cost (benefit) for the three months ended March 31, 2016 and 2015, are as follows:

	Three Months Ended March 31, 2016 2015	
Pension Benefits		
Interest cost	\$ 582	\$ 580
Expected return on plan assets	(686)	(761)
Amortization of unrecognized net loss	125	110
	\$ 21	\$ (71)

**Three Months
Ended**

	March 31,	
	2016	2015
Postretirement Benefit Plan		
Service cost	\$ 15	\$ 17
Interest cost	738	743
Settlement income	(15,606)	
Amortization of prior service cost	4	10
Amortization of unrecognized net loss	108	162
	\$ (14,741)	\$ 932

The Company made no contributions to the Company's defined benefit pension plans for each of the three months ended March 31, 2016 and 2015. The Company expects to make no contributions to its pension plans in 2016.

The Company made contributions to the Company's postretirement benefit plan of \$112 and \$96 for salaried retirees for the three months ended March 31, 2016 and 2015, respectively. The Company expects to make \$405 in contributions (including contributions already made) to its postretirement benefit plan in 2016 for salaried retirees. As a result of the settlement payment described above, the Company has no further postretirement benefit obligation for hourly retirees.

Table of Contents

The Company also maintains qualified defined contribution plans, which provide benefits to employees based on employee contributions, employee earnings or certain subsidiary earnings, with discretionary contributions allowed. Expenses related to these plans were \$686 and \$602 for the three months ended March 31, 2016 and 2015, respectively.

Note 13 Contingencies

The Company is involved in various warranty and repair claims and, in certain cases, related pending and threatened legal proceedings with its customers in the normal course of business. In the opinion of management, the Company's potential losses in excess of the accrued warranty and legal provisions, if any, are not expected to be material to the Company's consolidated financial condition, results of operations or cash flows.

On July 8, 2013, the Company filed a Complaint for Declaratory Judgment (the "Complaint") in the United States District Court for the Northern District of Illinois, Eastern Division (the "Illinois Court"). The case named as defendants the United Steel, Paper & Forestry, Rubber, Manufacturing, Energy, Allied Industrial & Services Workers International Union, AFL-CIO, CLC (the "USW"), as well as approximately 650 individual Retiree Defendants (as defined in the Complaint). On July 9, 2013, the USW and certain Retiree Defendants (collectively, the "Pennsylvania Plaintiffs") filed a putative class action in the United States District Court for the Western District of Pennsylvania (the "Pennsylvania Court"), captioned as *Zanghi, et al. v. FreightCar America, Inc., et al.*, Case No. 3:13-cv-146. Both of the complaints related to the Company's decision to terminate welfare benefits previously provided to the Retiree Defendants.

On August 20, 2015, the Company reached a settlement agreement with the USW and the other plaintiffs. Pursuant to the settlement agreement, the parties agreed that (1) USW will create a voluntary employee's beneficiary association trust fund (the "VEBA") that will administer the payment of health and welfare benefits to class members and will be administered independently of the Company, (2) the Company will make a one-time contribution to the VEBA of \$31,450, (3) the Company will pay an award for plaintiffs' attorneys' fees in the amount of \$1,300, (4) if the Company fails to make the required payments to the VEBA prior to February 16, 2016, interest on the unpaid amounts will accrue at a rate of 5% per annum, subject to a cap of \$250, and (5) class members will fully and finally release all claims against the Company in accordance with the terms of the settlement agreement. The Pennsylvania Court granted final approval of the settlement on January 19, 2016. The plaintiffs had until February 18, 2016 to file an appeal of the court order granting final approval of the settlement. On February 17, 2016, certain class members requested a 30-day extension to file an appeal, which the Pennsylvania Court denied on February 22, 2016. The Company made the cash settlement payment of \$31,616 (including \$166 of interest) on March 25, 2016.

On April 17, 2015 and September 30, 2015, National Steel Car Limited ("NSC") filed Complaints for Patent Infringement against the Company in the United States District Court for the Northern District of Illinois (Eastern Division) in Chicago, Illinois. The complaints assert five United States patents against certain aggregate gondola freight cars sold to Martin-Marietta Materials, Inc. and Progress Rail Services. The complaints seek injunctive relief and an unspecified amount of damages. On January 29, 2016, NSC amended the complaints, alleging that 18 offers to sell made by the Company also infringed NSC's patents. The Company filed its answer to NSC's amended complaint on February 16, 2016, responding to NSC's newly raised allegations and adding new affirmative defenses as well as counterclaims for non-infringement and invalidity. The Company also filed *Inter Partes* Review petitions in March 2016 with the U.S. Patent and Trademark Office's Patent Trial and Appeal Board for two of the five asserted patents. The Company believes that the complaints are without merit and intends to vigorously defend against the allegations. While the ultimate outcome of these proceedings cannot be determined at this time, it is the opinion of management that the resolution of these actions will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

In addition to the foregoing, the Company is involved in certain other pending and threatened legal proceedings, including commercial disputes and workers' compensation and employee matters arising out of the conduct of its business. While the ultimate outcome of these other legal proceedings cannot be determined at this time, it is the opinion of management that the resolution of these other actions will not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Table of Contents**Note 14 Earnings Per Share**

Shares used in the computation of the Company's basic and diluted earnings per common share are reconciled as follows:

	Three Months Ended March 31,	
	2016	2015
Weighted average common shares outstanding	12,252,131	12,020,622
Dilutive effect of employee stock options and nonvested share awards		
Weighted average diluted common shares outstanding	12,252,131	12,020,622

Weighted average diluted common shares outstanding include the incremental shares that would be issued upon the assumed exercise of stock options and the assumed vesting of nonvested share awards. For the three months ended March 31, 2016 and 2015, 595,722 and 881,619 shares, respectively, were not included in the weighted average common shares outstanding calculation as they were anti-dilutive.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.
OVERVIEW

You should read the following discussion in conjunction with our condensed consolidated financial statements and related notes included elsewhere in this quarterly report on Form 10-Q. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about our business and operations. Our actual results may differ materially from those currently anticipated and expressed in such forward-looking statements. See Cautionary Statement Regarding Forward-Looking Statements.

We are a diversified manufacturer of railcars and railcar components. We design and manufacture a broad variety of railcar types for transportation of bulk commodities and containerized freight products primarily in North America, including open top hoppers, covered hoppers and gondolas along with intermodal and non-intermodal flat cars. We and our predecessors have been manufacturing railcars since 1901. Over the last several years, we have introduced a number of new or redesigned railcar types. We believe we are the leading manufacturer of aluminum-bodied railcars, including coal cars, in North America, based on the number of railcars delivered.

Our railcar manufacturing facilities are located in Cherokee, Alabama (Shoals), Danville, Illinois and Roanoke, Virginia. Our Shoals facility is an important part of our long-term growth strategy as we continue to expand our railcar product and service offerings outside of our traditional coal car market. While our Danville facility will continue to support our coal car products, our Roanoke and Shoals facilities allow us to produce a broader variety of railcars in a cost-effective and efficient manner. We will continue to adjust salaried and hourly labor personnel levels at all of our facilities to coincide with production requirements. Given the challenged coal market and the completion of our recent rebuild program, operations at our Danville facility have been significantly curtailed in 2016.

We also refurbish and rebuild railcars and sell forged, cast and fabricated parts for all of the railcars we produce, as well as those manufactured by others. Between November 2010, when we acquired the business assets of DTE Rail Services, Inc., and September 2015, when we sold our repair and maintenance services business, we provided railcar repair and maintenance for all types of freight railcars through our FCRS subsidiary. We also lease freight cars through our JAIX Leasing Company subsidiary.

Through September 30, 2015, the Company's operations comprised two reportable segments, Manufacturing and Services. As of October 1, 2015, the Company's operations comprise two operating segments, Manufacturing and Parts, and one reportable segment, Manufacturing. The Company's Manufacturing segment includes new railcar manufacturing, used railcar sales, railcar leasing and major railcar rebuilds. The Company's Parts operating segment is not expected to be of continuing significance for separate reporting and has been combined with corporate and other non-operating activities as Corporate and Other.

Total orders for railcars in the first quarter of 2016 were 150 units, offset by cancellations of previously recorded orders of 646 units, compared to 1,336 units ordered in the first quarter of 2015. All of the orders for the first quarter of 2016 and first quarter of 2015 were for new railcars. Railcar deliveries totaled 1,609 units, all of which were new railcars, in the first quarter of 2016 compared to 1,059 units, consisting of 651 new railcars and 408 rebuilt railcars, in the first quarter of 2015. Total backlog of unfilled orders was 7,735 units at March 31, 2016, compared to 9,840 units at December 31, 2015. Our backlog as of March 31, 2016 and December 31, 2015 included a variety of railcar types almost all of which were orders for non-coal cars. The estimated sales value of the backlog was \$759 million and \$926 million, respectively, as of March 31, 2016 and December 31, 2015.

RESULTS OF OPERATIONS

Three Months Ended March 31, 2016 compared to Three Months Ended March 31, 2015

Revenues

Our consolidated revenues for the three months ended March 31, 2016 were \$148.6 million compared to \$92.8 million for the three months ended March 31, 2015. Manufacturing segment revenues for the first quarter of 2016 were \$146.1 million compared to \$85.1 million for the first quarter of 2015. The increase in Manufacturing segment revenues for the 2016 period compared to the 2015 period reflects the increase in the number of railcars delivered and a higher mix of new versus rebuilt

Table of Contents

railcars, partially offset by lower average sales prices. Railcar deliveries for the first quarter of 2015 were impacted by a series of production line changeovers and inefficiencies, primarily at our Shoals facility, as well as weather disruptions. Corporate and Other revenues for the three months ended March 31, 2016 were \$2.5 million compared to \$7.7 million for the three months ended March 31, 2015, which included revenue from the sold repair and maintenance business.

Gross Profit

Our consolidated gross profit margin was 10.7% for the three months ended March 31, 2016 compared to 4.9% for the three months ended March 31, 2015. Our consolidated gross profit for the three months ended March 31, 2016 was \$15.9 million compared to \$4.6 million for the three months ended March 31, 2015, reflecting increases in gross profit from our Manufacturing segment of \$12.5 million, which were partially offset by decreases in gross profit from Corporate and Other of \$1.2 million. The increase in gross profit for our Manufacturing segment for the three months ended March 31, 2016 compared to the three months ended March 31, 2015 reflects the increase in deliveries, a higher mix of new versus rebuilt railcars and improvement in production efficiencies, which were partially offset by lower average sales prices. Gross profit for our Manufacturing segment for the first quarter of 2015 included approximately \$1.4 million of costs associated with the continued ramp up of the additional production line at our Shoals facility. The decrease in gross profit for Corporate and Other for the first quarter of 2016 compared to the first quarter of 2015 reflects the sale of the Company's repair and maintenance business.

Selling, General and Administrative Expenses

Consolidated selling, general and administrative expenses for the three months ended March 31, 2016 were \$10.6 million compared to \$8.8 million for the three months ended March 31, 2015. Selling, general and administrative expenses for the three months ended March 31, 2016 included increases in severance, legal costs and third-party sales commissions, which were partially offset by reductions due to the sale of the Company's services business. Manufacturing segment selling, general and administrative expenses for the three months ended March 31, 2016 were \$3.4 million compared to \$3.1 million for the three months ended March 31, 2015 primarily due to higher third-party sales commissions. Corporate and Other selling, general and administrative expenses were \$7.2 million for the three months ended March 31, 2016 compared to \$5.8 million for the three months ended March 31, 2015. The increase in Corporate and Other selling, general and administrative expenses reflected increases in severance and legal costs, which were partially offset by decreases in selling, general and administrative expenses due to the sale of the Company's services business.

Gain on Sale of Railcars Available for Lease

Gain on sale of railcars available for lease for the three months ended March 31, 2015 was \$1.2 million and represented the gain on sale of leased railcars with a net book value of \$6.4 million.

Gain on Settlement of Postretirement Benefit Obligation

On March 25, 2016, we made a one-time payment of \$31.7 million to settle our postretirement benefit obligation for our hourly retirees resulting in a pre-tax gain of \$14.3 million (net of plaintiffs' attorneys' fees of \$1.3 million) and a reduction in our postretirement benefit obligation of approximately \$68.8 million. See Note 12 to the condensed consolidated financial statements.

Operating Income (Loss)

Our consolidated operating income for the three months ended March 31, 2016 was \$19.6 million compared to an operating loss of \$3.1 million for the three months ended March 31, 2015. Operating income for the three months ended March 31, 2016 included the pre-tax gain on the settlement of a postretirement benefit obligation of \$14.3 million. Operating income for the Manufacturing segment was \$12.8 million for the three months ended March 31, 2016 compared to \$1.9 million for the three months ended March 31, 2015, reflecting the increase in deliveries, a higher mix of new versus rebuilt railcars and improvements in production efficiencies, which were partially offset by lower average sales prices. Manufacturing segment operating income for the three months ended March 31, 2015 included approximately \$1.4 million of costs associated with the continued ramp up of the additional production line at our Shoals facility. Corporate and Other operating income was \$6.8 million for the three months ended March 31, 2016 compared to operating loss of \$5.0 million for the three months ended March 31, 2015. The increase in Corporate and Other operating income reflects the gain on settlement of a postretirement benefit obligation, partially offset by increases in severance and legal costs and decreases in operating income due to the sale of the Company's service business.

Table of Contents**Income Taxes**

Our income tax provision was \$7.0 million for the three months ended March 31, 2016 compared to an income tax benefit of \$1.0 million for the three months ended March 31, 2015. Our effective tax rate for the three months ended March 31, 2016 was 35.5% compared to 33.6% for the three months ended March 31, 2015. The increase in the effective tax rate was due to certain tax credits not expected to recur at the same level in 2016, partially offset by a lower state blended rate in the 2016 period.

Net Income (Loss)

As a result of the foregoing, our net income was \$12.7 million for the three months ended March 31, 2016 compared to a net loss of \$2.1 million for the three months ended March 31, 2015. For the three months ended March 31, 2016, our diluted earnings per share was \$1.03 compared to a diluted net loss per share of \$0.17 for the three months ended March 31, 2015.

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity for the three months ended March 31, 2016 and 2015, were our cash and cash equivalent balances on hand, our securities held to maturity and our revolving credit facility.

We entered into a \$50.0 million senior secured revolving credit facility (the "Revolving Credit Facility") pursuant to a Credit Agreement dated as of July 26, 2013 (the "Credit Agreement") by and among us and certain of our subsidiaries, as borrowers, and Bank of America, N.A., as lender. The Revolving Credit Facility can be used for general corporate purposes, including working capital. As of March 31, 2016, we had no borrowings under the Revolving Credit Facility. The Credit Agreement also contains a sub-facility for letters of credit not to exceed the lesser of \$30.0 million and the amount of the senior secured revolving credit facility at such time. As of March 31, 2016, we had \$5.2 million in outstanding letters of credit under the Revolving Credit Facility and therefore had \$44.8 million available for borrowing under the Revolving Credit Facility. The Credit Agreement has a term ending on July 26, 2016 and revolving loans outstanding thereunder will bear interest at a rate of LIBOR plus an applicable margin of 1.50% or at a base rate, as selected by us. Base rate loans will bear interest at the highest of (a) the federal funds rate plus 0.50%, (b) the prime rate or (c) LIBOR plus 1.00%. We are required to pay a non-utilization fee of between 0.10% and 0.30% on the unused portion of the revolving loan commitment depending on our quarterly average balance of unrestricted cash and our consolidated leverage ratio. Borrowings under the Revolving Credit Facility are secured by a first priority perfected security interest in substantially all of our and our subsidiaries' assets excluding railcars held by our railcar leasing subsidiary, JAIX. We also have pledged all of the equity interests in our direct and indirect domestic subsidiaries as security for the Revolving Credit Facility. The Credit Agreement has both affirmative and negative covenants, including, without limitation, a covenant requiring minimum consolidated net liquidity of \$35.0 million and limitations on indebtedness, liens and investments. The Credit Agreement also provides for customary events of default. We are currently evaluating renewal or refinancing alternatives for our current revolving loan agreement and expect to have a new agreement in place by July 26, 2016.

As of December 31, 2015, we had \$6.9 million in outstanding letters of credit under the Revolving Credit Facility and therefore had \$43.1 million available for borrowing under the Revolving Credit Facility. As of December 31, 2015, we had no borrowings under the Revolving Credit Facility.

Our restricted cash and restricted certificates of deposit balance was \$5.2 million as of March 31, 2016 and \$6.9 million as of December 31, 2015, and consisted of cash and certificates of deposit used to collateralize standby letters of credit with respect to performance guarantees and to support our worker's compensation insurance claims. The

decrease in restricted cash and restricted certificates of deposit balance as of March 31, 2016 compared to December 31, 2015 was a result of decreases in standby letters of credit with respect to performance guarantees and our corresponding obligation to collateralize them. The standby letters of credit outstanding as of March 31, 2016 are scheduled to expire at various dates through January 31, 2018. We expect to establish restricted cash balances and restricted certificates of deposit in future periods to minimize bank fees related to standby letters of credit.

Based on our current level of operations and known changes in planned volume based on our backlog, we believe that our operating cash flows, our marketable securities and our cash balances, together with amounts available under our revolving credit facility, will be sufficient to meet our expected liquidity needs. Our long-term liquidity is contingent upon future operating performance and our ability to continue to meet financial covenants under our revolving credit facility and any other indebtedness. We may also require additional capital in the future to fund working capital as demand for railcars increases, payments for contractual obligations, organic growth opportunities, including new plant and equipment and development of railcars, joint ventures, international expansion and acquisitions, and these capital requirements could be substantial.

Table of Contents

We historically provided pension and retiree welfare benefits to certain salaried and hourly employees upon their retirement. Benefits under our pension plans are now frozen and will not be impacted by increases due to future service. The most significant assumptions used in determining our net periodic benefit costs are the discount rate used on our pension and postretirement welfare obligations and expected return on pension plan assets. As of December 31, 2015, our benefit obligation under our defined benefit pension plans was \$53.4 million, which exceeded the fair value of plan assets by \$6.7 million. We made no contributions to our defined benefit pension plans during 2015 and we do not expect to make any contributions to our defined benefit pension plans in 2016. The Pension Protection Act of 2006 provides for changes to the method of valuing pension plan assets and liabilities for funding purposes as well as minimum funding levels. Our defined benefit pension plans are in compliance with the minimum funding levels established in the Pension Protection Act. Funding levels will be affected by future contributions, investment returns on plan assets, growth in plan liabilities and interest rates. Assuming that the plans are fully funded as that term is defined in the Pension Protection Act, we will be required to fund the ongoing growth in plan liabilities on an annual basis.

As of December 31, 2015, our benefit obligation under our postretirement benefit plan was \$72.9 million, which exceeded the fair value of plan assets by \$72.9 million. We made contributions to our postretirement benefit plan of \$0.1 million for salaried retirees for the three months ended March 31, 2016 and expect to make \$0.4 million in contributions (including contributions already made) to our postretirement benefit plan in 2016 for salaried retirees. As a result of the previously described \$31.6 million settlement payment, we have no further postretirement benefit obligation for hourly retirees. As of March 31, 2016, our benefit obligation under our postretirement benefit plan was \$6.4 million for salaried retirees.

Based upon our operating performance and capital requirements, we may, from time to time, be required to raise additional funds through additional offerings of our common stock and through long-term borrowings. There can be no assurance that long-term debt, if needed, will be available on terms attractive to us, or at all. Furthermore, any additional equity financing may be dilutive to stockholders and debt financing, if available, may involve restrictive covenants. Our failure to raise capital if and when needed could have a material adverse effect on our results of operations and financial condition.

Contractual Obligations

The following table summarizes our contractual obligations as of March 31, 2016 and the effect that these obligations and commitments would be expected to have on our liquidity and cash flow in future periods:

Contractual Obligations	Total	Payments Due by Period			After 5 Years
		1 Year	2-3 Years	4-5 Years	
Operating leases	\$ 67,695	\$ 10,027	\$ 19,884	\$ 20,508	\$ 17,276
Material and component purchases	13,611	7,510	6,101		
Total	\$ 81,306	\$ 17,537	\$ 25,985	\$ 20,508	\$ 17,276

Material and component purchases consist of non-cancelable agreements with suppliers to purchase materials used in the manufacturing process. The estimated amounts above may vary based on the actual quantities and price.

The above table excludes \$4.4 million related to a reserve for unrecognized tax benefits and accrued interest and penalties at March 31, 2016 because the timing of the payout of these amounts cannot be determined. We are also required to make minimum contributions to our pension plans and postretirement welfare plans as described above.

Table of Contents**Cash Flows**

The following table summarizes our net cash (used in) provided by operating activities, investing activities and financing activities for the three months ended March 31, 2016 and 2015:

	Three Months ended March 31,	
	2016	2015
	<i>(In thousands)</i>	
Net cash (used in) provided by:		
Operating activities	\$ (16,945)	\$ (78,505)
Investing activities	5,281	7,854
Financing activities	(1,181)	(1,206)
Total	\$ (12,845)	\$ (71,857)

Operating Activities. Our net cash provided by or used in operating activities reflects net income or loss adjusted for non-cash charges and changes in operating assets and liabilities. Cash flows from operating activities are affected by several factors, including fluctuations in business volume, contract terms for billings and collections, the timing of collections on our contract receivables, processing of bi-weekly payroll and associated taxes, and payments to our suppliers. As some of our customers accept delivery of new railcars in train-set quantities, variations in our sales lead to significant fluctuations in our operating profits and cash from operating activities. We do not usually experience business credit issues, although a payment may be delayed pending completion of closing documentation.

Our net cash used in operating activities for the three months ended March 31, 2016 was \$16.9 million compared to \$78.5 million for the three months ended March 31, 2015. Net cash used in operating activities for the three months ended March 31, 2016 reflects the cash payment of \$31.6 million and payment of plaintiffs attorneys fees of \$1.3 million for settlement of the postretirement benefit obligation for our hourly retirees. The settlement payments were partially offset by changes in working capital during the three months ended March 31, 2016. Net cash used in operating activities for the three months ended March 31, 2015 was driven primarily by an increase in working capital, including a \$78.3 million increase in inventory. The increase in inventory for the three months ended March 31, 2015 included increases to support higher production levels and \$23.7 million in finished railcars that were not yet delivered to customers.

Investing Activities. Net cash provided by investing activities for the three months ended March 31, 2016 was \$5.3 million compared to \$7.9 million for the three months ended March 31, 2015. Net cash provided by investing activities for the three months ended March 31, 2016 included proceeds from maturity of securities of \$6.0 million and maturity of restricted certificates of deposit (net of purchases) of \$1.7 million, which were partially offset by purchases of property, plant and equipment of \$2.4 million. Net cash provided by investing activities for the three months ended March 31, 2015 included proceeds from sale of railcars available for lease of \$7.6 million and state and local incentives received of \$4.9 million, which were partially offset by purchases of restricted certificates of deposit of \$0.3 million (net of maturities) and purchases of property, plant and equipment of \$4.3 million.

Financing Activities. Net cash used in financing activities for each of the three months ended March 31, 2016 and 2015, was \$1.2 million. Net cash used in financing activities for each of the three months ended March 31, 2016 and 2015, primarily included cash dividends paid to our stockholders.

Capital Expenditures

Our capital expenditures were \$2.4 million in the three months ended March 31, 2016 compared to \$4.3 million in the three months ended March 31, 2015. Capital expenditures were primarily purchases of equipment and other improvements for our Shoals facility. Excluding unforeseen expenditures, management expects that total capital expenditures will be approximately \$12 million for 2016 (including amounts already paid).

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains certain forward-looking statements including, in particular, statements about our plans, strategies and prospects. We have used the words may, will, expect, anticipate, believe, estimate, plan, intend and similar expressions in this report to identify forward-looking statements. We have based these forward-looking statements on our current views with respect to future events and financial performance. Our actual results could differ materially from those projected in the forward-looking statements.

Table of Contents

Our forward-looking statements are subject to risks and uncertainties, including:

the cyclical nature of our business;

the competitive nature of our industry;

our reliance upon a small number of customers that represent a large percentage of our sales;

the variable purchase patterns of our customers and the timing of completion, delivery and customer acceptance of orders;

the availability and price of used railcars offered for sale and new or used railcars offered for lease;

fluctuating costs of raw materials, including steel and aluminum, and delays in the delivery of raw materials;

limitations on the supply of railcar components;

international economic and political risks to the extent we expand our sales of products and services internationally;

the risk of lack of acceptance of our new railcar offerings by our customers;

our reported backlog may not indicate what our future sales will be;

potential significant warranty claims;

acquisitions may fail to perform to expectations or we may fail to successfully integrate acquired businesses into our existing business;

the risk of losing key personnel;

shortages of skilled labor;

risks relating to our relationship with our unionized employees and their unions;

our reliance on a single supplier for our roll-formed center sills;

the risk of equipment failures, delays in deliveries or extensive damage to our facilities;

the risk that we are unable to renew our lease arrangements at our manufacturing facilities at commercially acceptable terms;

the risk of failing to adequately protect our intellectual property;

cybersecurity risks relating to our information technology and other systems;

our ability to maintain relationships with our suppliers of railcar components;

the cost of complying with environmental laws and regulations; and

various covenants in the agreements governing our indebtedness that limit our management's discretion in the operation of our businesses.

Our actual results could be different from the results described in or anticipated by our forward-looking statements due to the inherent uncertainty of estimates, forecasts and projections and may be better or worse than anticipated. Given these uncertainties, you should not rely on forward-looking statements. Forward-looking statements represent our estimates and assumptions only as of the date that they were made. We expressly disclaim any duty to provide updates to forward-looking statements, and the estimates and assumptions associated with them, in order to reflect changes in circumstances or expectations or the occurrence of unanticipated events except to the extent required by applicable securities laws. All of the forward-looking statements are qualified in their entirety by reference to the factors discussed under Item 1A, "Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2015 filed with the Securities and Exchange Commission.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We have a \$50.0 million senior secured revolving credit facility, the proceeds of which can be used for general corporate purposes, including working capital. On an annual basis, a 1% change in the interest rate in our revolving credit facility will increase or decrease our interest expense by \$10,000 for every \$1.0 million of outstanding borrowings. As of March 31, 2016, we had \$5.2 million in outstanding letters of credit under the Revolving Credit Facility and therefore had \$44.8 million available for borrowing under the Revolving Credit Facility.

The production of railcars and our operations require substantial amounts of aluminum and steel. The cost of aluminum, steel and all other materials (including scrap metal) used in the production of our railcars represents a significant majority of our direct manufacturing costs. Our business is subject to the risk of price increases and periodic delays in the delivery of aluminum, steel and other materials, all of which are beyond our control. Any fluctuations in the price or availability of aluminum or steel, or any other material used in the production of our

railcars, may have a material adverse effect on our business, results of operations or financial condition. In addition, if any of our suppliers were unable to continue its business or were to seek bankruptcy relief, the availability or price of the materials we use could be adversely affected. When market conditions permit us to do so, we negotiate contracts with our customers that allow for variable pricing to protect us against future changes in the cost of raw materials. When raw material prices increase rapidly or to levels significantly higher than normal, we may not be able to pass price increases through to our customers, which could adversely affect our operating margins and cash flows.

Table of Contents

We are not exposed to any significant foreign currency exchange risks as our general policy is to denominate foreign sales and purchases in U.S. dollars.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our Chief Executive Officer and Principal Financial Officer, our management evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the period covered by this quarterly report on Form 10-Q (the Evaluation Date). Based upon that evaluation, our Chief Executive Officer and Principal Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

The Company is involved in various warranty and repair claims and, in certain cases, related pending and threatened legal proceedings with its customers in the normal course of business. In the opinion of management, the Company's potential losses in excess of the accrued warranty and legal provisions, if any, are not expected to be material to the Company's consolidated financial condition, results of operations or cash flows.

On July 8, 2013, the Company filed a Complaint for Declaratory Judgment (the Complaint) in the United States District Court for the Northern District of Illinois, Eastern Division (the Illinois Court). The case named as defendants the United Steel, Paper & Forestry, Rubber, Manufacturing, Energy, Allied Industrial & Services Workers International Union, AFL-CIO, CLC (the USW), as well as approximately 650 individual Retiree Defendants (as defined in the Complaint). On July 9, 2013, the USW and certain Retiree Defendants (collectively, the Pennsylvania Plaintiffs) filed a putative class action in the United States District Court for the Western District of Pennsylvania (the Pennsylvania Court), captioned as *Zanghi, et al. v. FreightCar America, Inc., et al.*, Case No. 3:13-cv-146. Both of the complaints related to the Company's decision to terminate welfare benefits previously provided to the Retiree Defendants.

On August 20, 2015, the Company reached a settlement agreement with the USW and the other plaintiffs. Pursuant to the settlement agreement, the parties agreed that (1) USW will create a voluntary employee's beneficiary association trust fund (the VEBA) that will administer the payment of health and welfare benefits to class members and will be administered independently of the Company, (2) the Company will make a one-time contribution to the VEBA of \$31.5 million, (3) the Company will pay an award for plaintiffs' attorneys' fees in the amount of \$1.3 million, (4) if the Company fails to make the required payments to the VEBA prior to February 16, 2016, interest on the unpaid amounts

will accrue at a rate of 5% per annum, subject to a cap of \$250,000, and (5) class members will fully and finally release all claims against the Company in accordance with the terms of the settlement agreement. The Pennsylvania Court granted final approval of the settlement on January 19, 2016. The plaintiffs had until February 18, 2016 to file an appeal of the court order granting final approval of the settlement. On February 17, 2016 certain class members requested a 30-day extension to file an appeal, which the Pennsylvania Court denied on February 22, 2016. The Company made the cash settlement payment of \$31.6 million (including \$0.2 million of interest) on March 25, 2016.

On April 17, 2015 and September 30, 2015, National Steel Car Limited (NSC) filed complaints for Patent Infringement against the Company in the United States District Court for the Northern District of Illinois (Eastern Division) in Chicago, Illinois. The complaints assert five United States patents against certain aggregate gondola freight cars sold to Martin

Table of Contents

Marietta Materials, Inc. and Progress Rail Services. The complaints seek injunctive relief and an unspecified amount of damages. On January 29, 2016, NSC amended the complaints, alleging that 18 offers to sell made by the Company also infringed NSC's patents. The Company filed its answer to NSC's amended complaint on February 16, 2016, responding to NSC's newly raised allegations and adding new affirmative defenses as well as counterclaims for non-infringement and invalidity. The Company also filed *Inter Partes* Review petitions in March 2016 with the U.S. Patent and Trademark Office's Patent Trial and Appeal Board for two of the five asserted patents. The Company believes that the complaints are without merit and intends to vigorously defend against the allegations. While the ultimate outcome of these proceedings cannot be determined at this time, it is the opinion of management that the resolution of these actions will not have a material adverse effect on the Company's financial position, results of operations or cash flows.

In addition to the foregoing, we are involved in certain other pending and threatened legal proceedings, including commercial disputes and workers' compensation and employee matters arising out of the conduct of our business. While the ultimate outcome of these other legal proceedings cannot be determined at this time, it is the opinion of management that the resolution of these other actions will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 1A. Risk Factors.

There have been no material changes from the risk factors previously disclosed in Item 1A of our 2015 annual report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.

Edgar Filing: FreightCar America, Inc. - Form 10-Q
