REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Shareholders, Board of Directors and Management of

Ultrapar Participações S.A.

São Paulo SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Ultrapar Participações S.A. (the Company), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR), for the three-month period ended September 30, 2016, which comprises the balance sheet as of September 30, 2016 and the related statements of income and comprehensive income for the three and nine-month periods then ended and changes in equity and cash flows for the nine-month period then ended, including the explanatory notes.

The Company's Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with technical pronouncement CPC 21 (R1) Interim Financial Information and international standard IAS 34 Interim Financial Reporting, issued by the International Accounting Standards Board IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of the Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1) and international standard IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

We have also reviewed the individual and consolidated statements of value added (DVA) for the nine-month period ended September 30, 2016, prepared under the responsibility of the Company s Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR) and considered as supplemental information for International Financial Reporting Standards IFRSs, which do not require the presentation of the DVA. These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.

The accompanying individual and consolidated interim financial information has been translated into English for the convenience of readers outside Brazil.

a. Recognition of Income

Revenue is measured at the fair value of the consideration received or receivable, net of sales returns, discounts, and other deductions, if applicable.

Revenue from sales of fuels and lubricants is recognized when the products are delivered to gas stations and to large consumers. Revenue from sales of LPG is recognized when the products are delivered to customers at home, to independent dealers and to industrial and commercial customers. Revenue from sales of pharmaceuticals is recognized when the products are delivered to end user customers in own drugstores and when the products are delivered to independent resellers. Revenue from sales of chemical products is recognized when the products are delivered to industrial customers, depending of the freight mode of delivery. The revenue provided from storage services is recognized as services are performed.

c. Financial Assets

In accordance with IAS 32, IAS 39, and International Financial Reporting Standards (IFRS) 7 (CPC 38, 39 and 40 (R1)), the financial assets of the Company and its subsidiaries are classified in accordance with the following categories:

Measured at fair value through profit or loss: financial assets held for trading, that is, acquired or incurred principally for the purpose of selling or repurchasing in the near term, and derivatives. The balances are stated at fair value. The interest earned, the exchange variation, and changes in fair value are recognized in profit or loss.

Held to maturity: non-derivative financial assets with fixed or determinable payments, and fixed maturities for which the entity has the positive intention and ability to hold to maturity. The interest earned and the foreign currency exchange variation are recognized in profit or loss, and balances are stated at acquisition cost plus the interest earned, using the effective interest rate method.

Available for sale: non-derivative financial assets that are designated as available for sale or that are not classified into other categories at initial recognition. The balances are stated at fair value, and the interest earned and the foreign currency exchange variation are recognized in profit or loss. Differences between fair value and acquisition cost plus the interest earned are recognized in other comprehensive income in the Valuation adjustments . Accumulated gains and losses recognized in shareholders equity are reclassified to profit or loss in case of prepayment.

Loans and receivables: non-derivative financial assets with fixed or determinable payments or receipts, not quoted in an active market, except: (i) those which the entity intends to sell immediately or in the near term and which the entity classified as measured at fair value through profit or loss; (ii) those classified as available for sale; or (iii) those for which the Company may not recover substantially all of its initial investment for reasons other than credit deterioration. The interest earned and the foreign currency exchange variation are recognized in profit or loss. The balances are stated at acquisition cost plus interest, using the effective interest rate method. Loans and receivables include cash and banks, trade receivables, dividends receivable, and other trade receivables.

The Company and its subsidiaries use derivative financial instruments for hedging purposes, applying the concepts described below:

Hedge accounting fair value hedge: derivative financial instruments used to hedge exposure to changes in the fair value of an item, attributable to a particular risk, which can affect the entity's profit or loss. In the initial designation of the fair value hedge, the relationship between the hedging instrument and the hedged item is documented, including the objectives of risk management, the strategy in conducting the transaction, and the methods to be used to evaluate its effectiveness. Once the fair value hedge has been qualified as effective, the hedge item is also measured at fair value. Gains and losses from hedge instruments and hedge items are recognized in profit or loss. The hedge accounting must be discontinued when the hedge becomes ineffective.

Hedge accounting cash flow hedge: derivative financial instruments used to hedge the exposure to variability in cash flows that is attributable to a risk associated with an asset or liability or highly probable transaction that may affect the income statements. The portion of the gain or loss on the hedging instrument that is determined to be effective relating to the effects of exchange rate effect, is recognized directly in equity in accumulated other comprehensive income as Valuation adjustments while the ineffective portion is recognized in profit or loss. Gains or losses on the hedging instrument relating to the effective portion of this hedge that had been recognized directly in accumulated other comprehensive income shall be recognized in profit or loss in the period in which the hedged item is recognized in profit or loss or as initial cost of non-financial assets, in the same line of the statement that the hedged item is recognized. The hedge accounting shall be discontinued when (i) the Company cancels the hedging relationship; (ii) the hedging instrument expires; and (iii) the hedging instrument no longer qualifies for hedge accounting. When hedge accounting is discontinued, gains and losses recognized in other comprehensive income in equity are reclassified to profit or loss in the period which the hedged item is recognized in profit or loss. If the transaction hedged is canceled or is not expected to occur, the cumulative gains and losses in other comprehensive income in equity shall be recognized immediately in profit or loss.

Hedge accounting hedge of net investments in foreign operation: derivative financial instruments used to hedge exposure on net investments in foreign subsidiaries due to the fact that the local functional currency is different from the functional currency of the Company. The portion of the gain or loss on the hedging instrument that is determined to be effective, referring to the exchange rate effect, is recognized directly in equity in accumulated other comprehensive income as cumulative translation adjustments, while the ineffective portion and the operating costs are recognized in profit or loss. The gain or loss on the hedging instrument that has been recognized directly in accumulated other comprehensive income shall be recognized in income upon disposal of the foreign operation.

For further detail on financial instruments of the Company and its subsidiaries, see Notes 4, 14, and 31.

d. Trade Receivables

Trade receivables are recognized at the amount invoiced, adjusted to present value if applicable, and includes all direct taxes attributable to the Company and its subsidiaries. An allowance for doubtful accounts is recorded based on estimated losses and is set at an amount deemed by management to be sufficient to cover any probable loss on realization of trade receivables (see Notes 5 and 31 Customer Credit Risk).

e. Inventories

Inventories are stated at the lower of acquisition cost or net realizable value (see Note 6). The cost value of inventory is measured using the weighted average cost and includes the costs of acquisition and processing directly related to the units produced based on the normal capacity of production. Estimates of net realizable value are based on the average selling prices at the end of the reporting period, net of applicable direct selling expenses. Subsequent events related to the fluctuation of prices and costs are also considered, if relevant. If net realizable values are below inventory costs, a provision corresponding to this difference is recognized. Provisions are also made for obsolescence of products, materials, or supplies that (i) do not meet the Company and its subsidiaries specifications, (ii) have exceeded their expiration date, or (iii) are considered slow-moving inventory. This classification is made by management with the support of its industrial and operations teams.

f. Investments

Investments in subsidiaries are accounted for under the equity method of accounting in the individual interim financial information of the parent company.

A subsidiary is an investee in which the investor is entitled to variable returns on investment and has the ability to interfere in its financial and operational activities. Usually the equity interest in a subsidiary is more than 50%.

Investments in associates and joint ventures are accounted for under the equity method of accounting in the individual and consolidated interim financial information (see Note 11).

An associate is an investment, in which an investor has significant influence, that is, has the power to participate in the financial and operating decisions of the investee but does not exercise control.

A joint venture is an investment in which the shareholders have the right to net assets on behalf of a joint control. Joint control is the agreement which establish that decisions about the relevant activities of the investee require the consent from the parties that share control.

Other investments are stated at acquisition cost less provision for losses, unless the loss is considered temporary.

g. Property, Plant, and Equipment

Property, plant, and equipment is recognized at acquisition or construction cost, including financial charges incurred on property, plant, and equipment under construction, as well as maintenance costs resulting from scheduled plant outages and estimated costs to remove, to decommission, or to restore assets (see Notes 2.m and 19).

Depreciation is calculated using the straight-line method, over the periods mentioned in Note 12, taking into account the estimated useful lives of the assets, which are reviewed annually.

Leasehold improvements are depreciated over the shorter of the lease contract term and useful life of the property.

h. Leases

Finance Leases

Certain lease contracts transfer substantially all the risks and benefits associated with the ownership of an asset to the Company and its subsidiaries. These contracts are characterized as finance leases, and assets thereunder are capitalized at lease commencement at their fair value or, if lower, present value of the minimum lease payments under the contracts. The items recognized as assets are depreciated and amortized using the lower of the straight-line method over the lower of the useful lives applicable to each group of assets or the contract terms, as mentioned in Notes 12 and 13. Financial charges under the finance lease contracts are allocated to profit or loss over the lease contract term, based on the amortized cost and the effective interest rate method of the related lease obligation (see Note 14.h).

Operating Leases

There are lease transactions where the risks and benefits associated with the ownership of the asset are not transferred and where there is no purchase option, or the purchase option at the end of the contract is equivalent to the market value of the leased asset. Payments made under an operating lease contract are recognized as cost or expense in the income statement on a straight-line basis over the term of the lease contract (see Note 32.c).

i. Intangible Assets

Intangible assets include assets acquired by the Company and its subsidiaries from third parties, according to the criteria below (see Note 13):

Goodwill is carried net of accumulated amortization as of December 31, 2008, when it ceased to be amortized. Goodwill generated since January 1, 2009 is shown as intangible assets corresponding to the positive difference between the amount paid or payable to the seller and the fair value of the identified assets and liabilities assumed of the acquired entity, and is tested annually for impairment. Goodwill is allocated to the business segments, which represent the lowest level that goodwill is monitored by the Company for impairment testing purposes.

Bonus disbursements as provided in Ipiranga's agreements with reseller service stations and major consumers are recognized as distribution rights when paid and amortized using the straight-line method according to the term of the agreement.

Other intangible assets acquired from third parties, such as software, technology, and commercial property rights, are measured at the total acquisition cost and amortized using straight-line method, over the periods mentioned in Note 13, taking into account their useful life, which is reviewed annually.

The Company and its subsidiaries have not recognized intangible assets that were generated internally. The Company and its subsidiaries have goodwill and brands acquired in business combinations, which are evaluated as intangible assets with indefinite useful life (see Note 13 items i and vi).

j. Other Assets

Other assets are stated at the lower of cost and realizable value, including, if applicable, interest earned, monetary changes and changes in exchange rates incurred or less a provision for loss and, if applicable, adjustment to present value (see Note 2.u).

k. Financial Liabilities

The Company and its subsidiaries' financial liabilities include trade payables and other payables, loans, debentures, finance leases and derivative financial instruments. Financial liabilities are classified as financial liabilities at fair value through profit or loss or financial liabilities at amortized cost. The financial liabilities at fair value through profit or loss refer to derivative financial instruments, subscription warrants, and financial liabilities designated as hedged items in a fair value hedge relationship upon initial recognition (see Note 2.c Fair Value Hedge). The financial liabilities at amortized cost are stated at the initial transaction amount plus related charges and net of amortization and transaction costs. The charges are recognized in profit or loss using the effective interest rate method.

Transaction costs incurred and directly attributable to the activities necessary for contracting loans or for issuing bonds, as well as premiums and discounts upon issuance of debentures and other debt, are allocated to the instrument and amortized to profit or loss over its term, using the effective interest rate method (see Note 14.i). Transaction costs incurred and directly attributable to the issue of shares or other equity instruments are recognized in equity and are not amortized.

l. Income and Social Contribution Taxes on Income

Current and deferred income tax (IRPJ) and social contribution on net income tax (CSLL) are calculated based on their current rates, considering the value of tax incentives. Taxes are recognized based on the rates of IRPJ and CSLL provided for by the laws enacted on the last day of the reporting period. The current rates in Brazil are 25% for income tax and 9% for social contribution on net income tax. For further details about recognition and realization of IRPJ and CSLL, see Note 9.

m. Provision for Asset Retirement Obligation Fuel Tanks

The Company and its subsidiaries have the legal obligation to remove Ipiranga's underground fuel tanks located at Ipiranga-branded service stations after a certain period. The estimated cost of the obligation to remove these fuel tanks

is recognized as a liability when the tanks are installed. The estimated cost is recognized in property, plant, and equipment and depreciated over the respective useful lives of the tanks. The amounts recognized as a liability are monetarily restated using the National Consumer Price Index - IPCA until the respective tank is removed (see Note 19). An increase in the estimated cost of the obligation to remove the tanks could result in negative impact in future results. The estimated removal cost is reviewed and updated annually or when there is significant change in its amount and change in the estimated costs are recognized in income when they become known.

n. Provisions for Tax, Civil, and Labor Risks

A provision for tax, civil and labor risks is recognized for quantifiable risks, when the chance of loss is more-likely-than-not in the opinion of management and internal and external legal counsel, and the amounts are recognized based on the evaluation of the outcomes of the legal proceedings (see Note 20).

o. Post-Employment Benefits

Post-employment benefits granted and to be granted to employees, retirees, and pensioners are based on an actuarial calculation prepared by an independent actuary, using the projected unit credit method (see Note 18.b). The actuarial gains and losses are recognized in cumulative other comprehensive income in the Valuation adjustments and presented in the statement of shareholders' equity. Past service cost is recognized in the income statement.

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)****p. Other Liabilities***

Other liabilities are stated at known or measurable amounts plus, if applicable, related charges, monetary restatement, and changes in exchange rates incurred. When applicable, other liabilities are recognized at present value, based on interest rates that reflect the term, currency, and risk of each transaction.

q. Foreign Currency Transactions

Foreign currency transactions carried out by the Company or its subsidiaries are remeasured into their functional currency at the exchange rate prevailing at the date of each transaction. Outstanding monetary assets and liabilities of the Company and its subsidiaries are translated using the exchange rate at the end of the reporting period. The effect of the difference between those exchange rates is recognized in profit or loss until the conclusion of each transaction.

r. Basis for Translation of Interim Financial Information of Foreign Subsidiaries

Assets and liabilities of the foreign subsidiaries, denominated in currencies other than that of the Company (functional currency: Brazilian Real), which have administrative autonomy, are translated using the exchange rate at the end of the reporting period. Revenues and expenses are translated using the average exchange rate of each year and shareholders' equity is translated at the historic exchange rate of each transaction affecting shareholders' equity. Gains and losses resulting from changes in these foreign investments are directly recognized in shareholders' equity in cumulative other comprehensive income in the cumulative translation adjustments and will be recognized in profit or loss if these investments are disposed of. The balance in cumulative other comprehensive income and presented in the shareholders' equity as cumulative translation adjustments as of September 30, 2016 was a loss of R\$ 4,277 (gain of R\$ 66,925 as of December 31, 2015), see Note 23.f.

The foreign subsidiaries with functional currency different from the Company and which have administrative autonomy are listed below:

Subsidiary	Functional currency	Location
Oxiteno México S.A. de C.V.	Mexican Peso	Mexico
Oxiteno Servicios Corporativos S.A. de C.V.	Mexican Peso	Mexico
Oxiteno Servicios Industriales de C.V.	Mexican Peso	Mexico
Oxiteno USA LLC	U.S. Dollar	United States

Oxiteno Andina, C.A.	Bolivar	Venezuela
Oxiteno Uruguay S.A.	U.S. Dollar	Uruguay

The subsidiary Oxiteno Uruguay S.A. (Oxiteno Uruguay) determined its functional currency as the U.S. dollar (US\$), as its sales, purchases of goods, and financing activities are performed substantially in this currency.

According to IAS 29, Venezuela is classified as a hyperinflationary economy. As a result, the financial information of Oxiteno Andina, C.A. (Oxiteno Andina) was adjusted by the Venezuelan Consumer Price Index.

On March 9, 2016, the Venezuelan Central Bank issued Foreign Exchange Regulation No. 35, effective from March 10, 2016, altering the Venezuelan foreign exchange markets and regulating the legally recognized types of exchange rates:

a) DIPRO *Tipo de Cambio Protegido* (Exchange Protected): Bolivar (VEF) is traded at an exchange rate of 9.975 VEF/US\$ to buy and 10.00 VEF/US\$ for purchase. This rate is applied to importation of essential goods (medicines and food) and raw materials and inputs related to the production of these sectors. This rate is channeled through CENCOEX *Centro Nacional de Comercio Exterior en Venezuela*;

b) DICOM *Tipo de Cambio Complementario Flotante de Mercado Supplemental* (Floating Market Exchange): Bolivar is traded at variable exchange rate of 658.8853 VEF/US\$ for selling and reduced by 0.25% for purchase. This rate is applied to settlement currency of all unforeseen transactions in Foreign Exchange Regulation. This rate is channeled through alternative currency markets.

The types of exchange rates previously regulated by the Foreign Exchange Regulation No. 33 were extinct.

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information**

(In thousands of Brazilian Reais, unless otherwise stated)

Due to the political and economic situation in Venezuela, the Company's management reassessed the exchange rate used in the translation of financial statements and changed, on December 31, 2015, the rate from SICAD *Sistema Complementario de Administración de Divisas* to SIMADI *Sistema Marginal de Divisas*, due to the fact that currently this exchange rate is the one that most closely matches the best expression of the Venezuelan economy. Thus, from December 31, 2015, the amounts in Bolivar have been translated to the U.S. dollar at the exchange rate of SIMAD and subsequently translated into Brazilian Reais using the official exchange rate published by the Central Bank of Brazil. Due to the Foreign Exchange Regulation No. 35, from March 10, 2016, the Company began to use the DICOM exchange rate in the translation.

Assets and liabilities of the other foreign subsidiaries, which do not have administrative autonomy, are considered an extension of the activities of their parent company and are translated using the exchange rate at the end of the reporting period. Gains and losses resulting from changes in these foreign investments are directly recognized as financial income or loss. The gain recognized in income for the nine-month period ended September 30, 2016 amounted to R\$ 5,574 (R\$ 7,349 gain for the nine-month period ended September 30, 2015).

s. Use of Estimates, Assumptions and Judgments

The preparation of the interim financial information requires the use of estimates, assumptions, and judgments for the accounting of certain assets, liabilities, and income. Therefore, the Company's and subsidiaries' management use the best information available at the time of preparation of the interim financial information, as well as the experience of past and current events, also considering assumptions regarding future events. The interim financial information therefore include estimates, assumptions, and judgments related mainly to determining the fair value of financial instruments (Notes 2.c, 2.k, 4, 14 and 31), the determination of the allowance for doubtful accounts (Notes 2.d, 5 and 31), the determination of provisions for losses of inventories (Notes 2.e and 6), the determination of deferred income taxes amounts (Notes 2.l and 9), the determination of control in subsidiaries (Notes 2.f, 2.r, 3 and 11.a), the determination of joint control in joint venture (Notes 2.f, 11.a and 11.b), the determination of significant influence in associates (Notes 2.f and 11.c), the determination of exchange rate used to translation of Oxiteno Andina information (Note 2.r), the useful lives of property, plant, and equipment (Notes 2.g and 12), the useful lives of intangible assets, and the determination of the recoverable amount of goodwill (Notes 2.i and 13), provisions for assets retirement obligations (Notes 2.m and 19), provisions for tax, civil, and labor risks (Notes 2.n and 20), estimates for the preparation of actuarial reports (Notes 2.o and 18.b) and the determination of fair value of subscription warrants indemnification (Notes 22 and 31). The actual result of the transactions and information may differ from their estimates.

t. Impairment of Assets

The Company and its subsidiaries review, at least annually, the existence of any indication that an asset may be impaired. If there is an indication, the Company and its subsidiaries estimate the recoverable amount of the asset. Assets that cannot be evaluated individually are grouped in the smallest group of assets that generate cash flow from continuous use and that are largely independent of cash flows of other assets (cash generating units - CGU). The recoverable amount of assets or CGUs corresponds to the greater of their fair value net of applicable direct selling costs and their value in use.

The fair value less costs of disposal is determined by the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date, net of costs of removing the asset, and direct incremental costs to bring an asset into condition for its sale, legal costs, and taxes.

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information**

(In thousands of Brazilian Reais, unless otherwise stated)

To assess the value in use, the Company and its subsidiaries consider the projections of future cash flows, trends, and outlooks, as well as the effects of obsolescence, demand, competition, and other economic factors. Such cash flows are discounted to their present values using the discount rate before tax that reflects market conditions for the period of impairment testing and the specific risks of the asset or CGU being evaluated. In cases where the expected discounted future cash flows are less than their carrying amount, an impairment loss is recognized for the amount by which the carrying value exceeds the fair value of these assets. Losses for impairment of assets are recognized in profit or loss. In case goodwill has been allocated to a CGU, the recognized losses are first allocated to reduce the corresponding goodwill. If the goodwill is not enough to absorb such losses, the surplus is allocated to the assets on a pro-rata basis. An impairment of goodwill cannot be reversed. For other assets, impairment losses may be reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if the impairment had not been recognized.

No impairment was recognized in the years presented (see Note 13.i).

u. Adjustment to Present Value

Some of the Company's subsidiaries recognized a present value adjustment to Tax on Goods and Services (ICMS , the Brazilian VAT) credit balances related to property, plant, and equipment (CIAP). Because recovery of these credits occurs over a 48 month period, the present value adjustment reflects, in the interim financial information, the time value of the ICMS credits to be recovered. The balance of these adjustment to present value totaled R\$ 919 as of September 30, 2016 (R\$ 109 as of December 31, 2015).

The Company and its subsidiaries reviewed all items classified as non-current and, when relevant, current assets and liabilities, and did not identify the need to recognize other present value adjustments.

v. Business Combination

A business combination is accounted applying the acquisition method. The cost of the acquisition is measured based on the consideration transferred and to be transferred, measured at fair value at the acquisition date. In a business combination, the assets acquired and liabilities assumed are measured in order to classify and allocate them accordingly to the contractual terms, economic circumstances and relevant conditions on the acquisition date. The non-controlling interest in the acquired is measured at fair value or based on its interest in identifiable net assets acquired. Goodwill is measured as the excess of the consideration transferred and to be transferred over the fair value of net assets acquired (identifiable assets and liabilities assumed, net). After the initial recognition, goodwill is

measured at cost less any accumulated impairment losses. For impairment testing purposes, goodwill is allocated to the Company's operating segments. When the cost of the acquisition is lower than the fair value of net assets acquired, a gain is recognized directly in the income statement. Costs related to the acquisition are recorded in the income statement when incurred.

w. *Statements of Value Added*

As required by Brazilian Corporate Law, the Company and its subsidiaries prepare the individual and consolidated statements of value added (DVA) according to CPC 09 – Statement of Value Added, as an integral part of the interim financial information as applicable to publicly-traded companies, and as supplemental information for IFRS, which does not require the presentation of DVA.

x. *Statements of Cash Flows*

The Company and its subsidiaries prepared its individual and consolidated statements of cash flows in accordance with IAS 7 (CPC 03) – Cash Flow Statement. The Company and its subsidiaries present the interest paid on loans and debentures in financing activities.

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***y. Adoption of the Pronouncements Issued by CPC and IFRS**

The following standards, amendments, and interpretations to IFRS were issued by the IASB but are not yet effective and were not adopted as of September 30, 2016:

	Effective date
IFRS 9: Financial instrument classification and measurement: includes new requirements for the classification and measurement of financial assets and liabilities, derecognition requirements, new impairment methodology for financial instruments, and new hedge accounting guidance.	2018
IFRS 15 Revenue from contracts with customers: establish the principles of nature, amount, timing and uncertainty of revenue and cash flow arising from a contract with a customer.	2018
IFRS 16 Lease: requires lessees record, in the financial statements, a liability reflecting future payments of a lease and the right to use an asset for the lease contracts, except for certain short-term leases and low asset value contracts. The criteria for recognition and measurement of leases in the financial statements of lessors are substantially maintained.	2019

CPC has not yet issued pronouncements equivalent to these IFRS, but is expected to do so before the date they become effective. The adoption of IFRS is subject to prior approval by the CVM. The Company is assessing the potential effects of these standards.

z. Authorization for Issuance of the Interim Financial Information

These interim financial information were authorized for issue by the Board of Directors on November 9, 2016.

3. Principles of Consolidation and Investments in Subsidiaries

The consolidated interim financial information were prepared following the basic principles of consolidation established by IFRS 10 (CPC 36 (R3)). Investments of one company in another, balances of asset and liability accounts, and revenues and expenses were eliminated, as well as the effects of transactions conducted between the companies. Non-controlling interests in subsidiaries are presented within consolidated shareholders equity and net income.

Consolidation of a subsidiary begins when the parent company obtains direct or indirect control over a company and ceases when the parent company loses control of a company. Income and expenses of a subsidiary acquired are included in the consolidated income statement and other comprehensive income from the date the parent company gains the control. Income and expenses of a subsidiary, in which the parent company loses control, are included in the consolidated income statement and other comprehensive income until the date the parent company loses control.

When necessary, adjustments are made to the interim financial information of subsidiaries to bring their accounting policies into line with the Company's accounting policies.

On April 27, 2001, the General Shareholders Meeting approved a benefit plan to members of management and employees in executive positions in the Company and its subsidiaries. On November 26, 2003, the Extraordinary General Shareholders Meeting approved certain amendments to the original plan of 2001 (the Deferred Stock Plan). In the Deferred Stock Plan, certain members of management of the Company and its subsidiaries have the voting and economic rights of shares and the ownership of these shares is retained by the subsidiaries of the Company. The Deferred Stock Plan provides for the transfer of the ownership of the shares to those eligible members of management after five to ten years from the initial concession of the rights subject to uninterrupted employment of the participant during the period. The total number of shares to be used for the Deferred Stock Plan is subject to the availability in treasury of such shares. It is incumbent on Ultrapar's executive officers to select the members of management eligible for the plan and propose the number of shares in each case for approval by the Board of Directors. The fair value of the awards were determined on the grant date based on the market value of the shares on the BM&FBOVESPA S.A. Bolsa de Valores, Mercadorias e Futuros (BM&FBOVESPA), the Brazilian Securities, Commodities and Futures Exchange and the amounts are amortized between five and ten years from the grant date.

- (ii) Nontaxable revenues consist of certain gains and income that are not taxable under applicable tax legislation, such as the reimbursement of taxes and the reversal of certain provisions;
- (iii) Brazilian tax law allows for an alternative method of taxation for companies that generated gross revenues of up to R\$ 78 million in their previous fiscal year. Certain subsidiaries of the Company adopted this alternative form of taxation, whereby income and social contribution taxes are calculated on a basis equal to 32% of operating revenues, as opposed to being calculated based on the effective taxable income of these subsidiaries. The adjustment to estimated income represents the difference between the taxation under this alternative method and the income and social contribution taxes that would have been paid based on the effective statutory rate applied to the taxable income of these subsidiaries; and
- (iv) Interest on equity is an option foreseen in Brazilian corporate law to distribute profits to shareholders, calculated based on the long-term interest rate (TJLP), which does not affect the income statement, but is deductible for purposes of IRPJ and CSLL.

i) Goodwill from acquisition of companies was amortized until December 31, 2008, when its amortization ceased. The net remaining balance is tested annually for impairment.

The Company has the following balances of goodwill:

	Segment	09/30/2016	12/31/2015
Goodwill on the acquisition of:			
Extrafarma	Extrafarma	661,553	661,553

Others		2,278	2,278
		1,456,179	1,456,179

On December 31, 2015, the Company tested the balances of goodwill shown in the table above for impairment. The determination of value in use involves assumptions, judgments, and estimates of cash flows, such as growth rates of revenues, costs and expenses, estimates of investments and working capital, and discount rates. The assumptions about growth projections and future cash flows are based on the Company's business plan of its operating segments, as well as comparable market data, and represent management's best estimate of the economic conditions that will exist over the economic life of the various CGUs, to which goodwill is related.

The evaluation of the value in use is calculated for a period of five years (except the Extrafarma segment), after which we calculate the perpetuity, considering the possibility of carrying the business on indefinitely. For the Extrafarma segment, a period of 10 years was used due to its expansion plan and considering a three-years period to maturity of new stores.

Notes to the Individual and Consolidated Interim Financial Information

(In thousands of Brazilian Reais, unless otherwise stated)

On December 31, 2015, the discount and real growth rates used to extrapolate the projections ranged from 10.3% to 17.1% (except discount rate of Oxiteno Andina of 43.5%) and 0% to 1% p.a., respectively, depending on the CGU analyzed.

The goodwill impairment tests and net assets of the Company and its subsidiaries did not result in the recognition of losses for the year ended December 31, 2015. The Company assessed a sensitivity analysis of discount and growth rate of perpetuity, due to their significant impact on cash flows and value in use. An increase of 0.5 percentage points in the discount rate or a decrease of 0.5 percentage points in the growth rate of the perpetuity of the cash flow of each business segment would not result in the recognition of impairment.

ii) Software includes user licenses and costs for the implementation of the various systems used by the Company and its subsidiaries, such as: integrated management and control, financial management, foreign trade, industrial automation, operational and storage management, accounting information, and other systems.

iii) The subsidiaries Oxiteno S.A., Oxiteno Nordeste and Oleoquímica Indústria e Comércio de Produtos Químicos Ltda. (Oleoquímica) recognize as technology certain rights of use held by them. iv) Commercial property rights include those described below:

Subsidiary Tequimar has an agreement with CODEBA – Companhia das Docas do Estado da Bahia, which allows it to explore the area in which the Aratu Terminal is located for 20 years, renewable for a similar period. The price paid by Tequimar was R\$ 12,000, which is being amortized from August 2002 to July 2042.

Subsidiary Tequimar has a lease contract for an area adjacent to the Port of Santos for 20 years from December 2002, renewable for a similar period, which allows the construction, operation, and use of a terminal for liquid bulk unloading, tank storage, handling, and distribution. The price paid by Tequimar was R\$ 4,334, which is being amortized from August 2005 to December 2022.

Subsidiary Extrafarma pays key money to obtain certain commercial establishments to open drugstores which is stated at the cost of acquisition, amortized using the straight line method, considering the lease contract terms. In

the case of the closedown of stores, the residual amount is written off.

v) Distribution rights refer mainly to bonus disbursements as provided in Ipiranga's agreements with resellers and large customers. Bonus disbursements are recognized when paid and recognized as an expense in the income statement over the term of the agreement (typically 5 years), which is reviewed as per the changes occurred in the agreements.

vi) Brands are represented by the acquisition cost of the am/pm brand in Brazil and of the Extrafarma brand.

vii) Other intangibles refer mainly to the loyalty program Clube Extrafarma.

31. Risks and Financial Instruments (Consolidated)

Risk Management and Financial Instruments Governance

The main risks to which the Company and its subsidiaries are exposed reflect strategic/operational and economic/financial aspects. Operational/strategic risks (including, but not limited to, demand behavior, competition, technological innovation, and material changes in the industry structure) are addressed by the Company's management model. Economic/financial risks primarily reflect default of customers, behavior of macroeconomic variables, such as exchange and interest rates, as well as the characteristics of the financial instruments used by the Company and its subsidiaries and their counterparties. These risks are managed through control policies, specific strategies, and the establishment of limits.

The Company has a conservative policy for the management of resources, financial instruments, and risks approved by its Board of Directors (Policy). In accordance with the Policy, the main objectives of financial management are to preserve the value and liquidity of financial assets and ensure financial resources for the development of the business, including expansions. The main financial risks considered in the Policy are risks associated with currencies, interest rates, credit, and selection of financial instruments. Governance of the management of financial risks and financial instruments follows the segregation of duties below:

Implementation of the management of financial assets, instruments, and risks is the responsibility of the financial area, through its treasury department, with the assistance of the tax and accounting departments.

Supervision and monitoring of compliance with the principles, guidelines, and standards of the Policy is the responsibility of the Risk and Investment Committee, which is composed of members of the Company's Executive Board (Committee). The Committee holds regular meetings and is in charge, among other responsibilities, of discussing and monitoring the financial strategies, existing exposures, and significant transactions involving investment, fundraising, or risk mitigation. The Committee monitors the risk standards established by the Policy through a monitoring map on a monthly basis.

Changes in the Policy or revisions of its standards are subject to the approval of the Board of Directors of Ultrapar.

Continuous improvement of the Policy is the joint responsibility of the Board of Directors, the Committee, and the financial area.

The internal audit department audits the compliance with the requirements of the Policy.

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Currency Risk**

Most transactions of the Company and its subsidiaries are located in Brazil and, therefore, the reference currency for risk management is the Brazilian Real. Currency risk management is guided by neutrality of currency exposures and considers the transactional, accounting, and operational risks of the Company and its subsidiaries and their exposure to changes in exchange rates. The Company considers as its main currency exposures the assets and liabilities in foreign currency and the short-term flow of net sales in foreign currency of Oxiteno.

The Company and its subsidiaries use exchange rate hedging instruments (especially between the Brazilian Real and the U.S. dollar) available in the financial market to protect their assets, liabilities, receipts, and disbursements in foreign currency and net investments in foreign operations. Hedge is used in order to reduce the effects of changes in exchange rates on the Company's income and cash flows in Brazilian Reais within the exposure limits under its Policy. Such foreign exchange hedging instruments have amounts, periods, and rates substantially equivalent to those of assets, liabilities, receipts, and disbursements in foreign currencies to which they are related. Assets and liabilities in foreign currencies are stated below, translated into Brazilian Reais as of September 30, 2016 and December 31, 2015:

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Interest Rate Risk**

The Company and its subsidiaries adopt conservative policies for borrowing and investing financial resources and for capital cost minimization. The financial investments of the Company and its subsidiaries are primarily held in transactions linked to the CDI, as set forth in Note 4. Borrowings primarily relate to financing from Banco do Brasil, BNDES, and other development agencies, as well as debentures and borrowings in foreign currency, as shown in Note 14.

The Company does not actively manage risks associated with changes in the level of interest rates and attempts to maintain its financial interest assets and liabilities at floating rates. As of September 30, 2016, the Company and its subsidiaries had interest rate derivative financial instruments linked to domestic loans, in which the Company swapped the fixed interest rate of certain debts to floating interest rates (CDI).

The table below shows the financial assets and liabilities exposed to floating interest rates as of September 30, 2016 and December 31, 2015:

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Credit Risks**

The financial instruments that would expose the Company and its subsidiaries to credit risks of the counterparty are basically represented by cash and bank deposits, financial investments, hedging instruments, and trade receivables.

Credit risk of financial institutions - Such risk results from the inability of financial institutions to comply with their financial obligations to the Company and its subsidiaries due to insolvency. The Company and its subsidiaries regularly conduct a credit review of the institutions with which they hold cash and cash equivalents, financial investments, and hedging instruments through various methodologies that assess liquidity, solvency, leverage, portfolio quality, etc. Cash and cash equivalents, financial investments, and hedging instruments are held only with institutions with a solid credit history, chosen for safety and soundness. The volume of cash and cash equivalents, financial investments, and hedging instruments are subject to maximum limits by each institution and, therefore, require diversification of counterparties.

Government credit risk The Company's policy allows investments in government securities from countries classified as investment grade AAA or Aaa by specialized credit rating agencies and in Brazilian government bonds. The volume of such financial investments is subject to maximum limits by each country and, therefore, requires diversification of counterparties.

Customer credit risk - Such risks are managed by each business unit through specific criteria for acceptance of customers and their credit rating and are additionally mitigated by the diversification of sales. No single customer or group accounts for more than 10% of total revenue.

The Company maintained the following allowances for doubtful accounts on trade receivables:

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)***Liquidity Risk**

The Company and its subsidiaries' main sources of liquidity derive from (i) cash, cash equivalents, and financial investments, (ii) cash generated from operations and (iii) financing. The Company and its subsidiaries believe that these sources are sufficient to satisfy their current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt, and payment of dividends.

The Company and its subsidiaries periodically examine opportunities for acquisitions and investments. They consider different types of investments, either directly, through joint ventures, or through associated companies, and finance such investments using cash generated from operations, debt financing, through capital increases, or through a combination of these methods.

The Company and its subsidiaries believe to have enough working capital and sources of financing to satisfy their current needs. The gross indebtedness due over the next twelve months totals R\$ 2,243.9 million, including estimated interests on loans (for quantitative information, see Note 14). Furthermore, the investment plan for 2016 totals R\$ 2,005 million, and until September 30, 2016, the amount of R\$ 1,092 million had been realized. As of September 30, 2016, the Company and its subsidiaries had R\$ 3,160.3 million in cash, cash equivalents, and short-term financial investments (for quantitative information, see Note 4).

The table below presents a summary of financial liabilities as of September 30, 2016 to be settled by the Company and its subsidiaries, listed by maturity. The amounts disclosed in this table are the contractual undiscounted cash outflows, and, therefore, these amounts may be different from the amounts disclosed on the balance sheet as of September 30, 2016.

In the table above, only the hedging instruments with negative results at the time of settlement were considered.

Capital Management

The Company manages its capital structure based on indicators and benchmarks. The key performance indicators related to the capital structure management are the weighted average cost of capital, net debt / EBITDA, interest coverage, and indebtedness / equity ratios. Net debt is composed of cash, cash equivalents, and financial investments (see Note 4) and loans, including debentures (see Note 14). The Company can change its capital structure depending on the economic and financial conditions, in order to optimize its financial leverage and capital management. The Company seeks to improve its return on invested capital by implementing efficient working capital management and a selective investment program.

Selection and Use of Financial Instruments

In selecting financial investments and hedging instruments, an analysis is conducted to estimate rates of return, risks involved, liquidity, calculation methodology for the carrying value and fair value, and a review is conducted of any documentation applicable to the financial instruments. The financial instruments used to manage the financial resources of the Company and its subsidiaries are intended to preserve value and liquidity.

The Policy contemplates the use of derivative financial instruments only to cover identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). The risks identified in the Policy are described in the above sections, and are subject to risk management. In accordance with the Policy, the Company and its subsidiaries can use forward contracts, swaps, options, and futures contracts to manage identified risks. Leveraged derivative instruments are not permitted. Because the use of derivative financial instruments is limited to the coverage of identified risks, the Company and its subsidiaries use the term *hedging instruments* to refer to derivative financial instruments.

As mentioned in the section *Risk Management and Financial Instruments Governance*, the Committee monitors compliance with the risk standards established by the Policy through a risk map, including the use of hedging instruments, on a monthly basis. In addition, the internal audit department verifies the compliance with the requirements of the Policy.

Hedging instruments existing as of September 30, 2016 are described below, according to their category, risk, and hedging strategy:

- a Hedging against foreign exchange exposure of liabilities in foreign currency The purpose of these contracts is (i) to offset the effect of the change in exchange rates of debts or firm commitments in U.S. dollars by converting them into debts or firm commitments in Brazilian Reais linked to CDI, (ii) firm commitments in U.S. dollars, changing them into debts or firm commitments in Reais indexed to the CDI and (iii) change a financial investment linked to the CDI and given as a guarantee to a loan in the U.S. dollar into a financial investment linked to the U.S. dollar. As of September 30, 2016, the Company and its subsidiaries had outstanding swap contracts totaling US\$ 699.8 million in notional amount with a liability position, on average of 96.9% of CDI, of which US\$ 349.8 million, on average, had an asset position at US\$ + 1.24% p.a. and US\$ 350.0 million had an asset position at US\$ + LIBOR + 0.87% p.a. This amount includes US\$ 440.0 million related to the fair value of hedging instruments of Ipiranga's debt (see Notes 14.b and hedge accounting below) and US\$ 175.8 million related to hedging instruments of cash flow of firm commitment (see hedge accounting below).
- b Hedging against foreign exchange exposure of operations The purpose of these contracts is to make the exchange rate of the revenues of subsidiaries Oleoquímica, Oxiteno S.A. and Oxiteno Nordeste equal to the exchange rate of the cost of their main raw materials during their operating cycles. As of September 30, 2016, these swap contracts totaled US\$ 9.2 million and, on average, had an asset position at 72.7% of CDI and a liability position at US\$ + 0.0% p.a.
- c Hedging against the interest rate fixed in local financing The purpose of these contracts is to convert the interest rate on financing contracted in Brazilian Reais from fixed into floating. This swap contract was settled at maturity date (See Note 14.g).

Hedge Accounting

The Company and its subsidiaries test, throughout the duration of the hedge, the effectiveness of their derivatives, as well as the changes in their fair value. The Company and its subsidiaries designate as fair value hedges certain derivative financial instruments used to offset the variations in interest and exchange rates, which are based on the market value of financing contracted in Brazilian Reais and U.S. dollars.

On September 30, 2016, the notional amount of foreign exchange hedging instruments designated as fair value hedge totaled US\$ 440.0 million. In 2016, a loss of R\$ 420.7 million related to the result of hedging instruments, a gain of R\$ 13 million related to the fair value adjustment of debt, and a gain of R\$ 268.9 million related to the financial expense of the debt were recognized in the income statements, transforming the average effective cost of the operation into 101.9% of CDI (see Note 14.b.1).

On September 30, 2016, the notional amount of exchange rate hedging instruments of firm commitments designated as cash flow hedges totaled US\$ 175.8 million, and a loss of R\$ 117.2 million was recognized through the income statement. On September 30, 2016, the unrealized loss of Other comprehensive income is R\$ 16.8 million, net of deferred income and social contribution taxes.

Notes to the Individual and Consolidated Interim Financial Information

(In thousands of Brazilian Reais, unless otherwise stated)

The fair value of financial instruments, including currency and interest hedging instruments, was determined as follows:

The fair value of cash and bank deposit balances are identical to their carrying values.

Financial investments in investment funds are valued at the value of the fund unit as of the date of the reporting period, which corresponds to their fair value.

Financial investments in CDBs (Bank Certificates of Deposit) and similar investments offer daily liquidity through repurchase at the yield curve and, therefore, the Company believes their fair value corresponds to their carrying value.

The subscription warrants indemnification were measured based on the share price of Ultrapar (UGPA3) at the reporting date and are adjusted to the Company's dividend yield, since the exercise is only possible starting in 2020 onwards and they are not entitled to dividends until then. The number of shares of subscription warrants indemnification is also adjusted according to the changes in the amounts of provision for tax, civil, and labor risks and contingent liabilities related to the period prior to January 31, 2014.

The fair value of other financial investments and financing was determined using calculation methodologies commonly used for mark-to-market reporting, which consist of calculating future cash flows associated with each instrument adopted and adjusting them to present value at the market rates as of September 30, 2016 and December 31, 2015. For some cases where there is no active market for the financial instrument, the Company and its subsidiaries can use quotes provided by the transaction counterparties.

The interpretation of market information on the choice of calculation methodologies for the fair value requires considerable judgment and estimates to obtain a value deemed appropriate to each situation. Consequently, the estimates presented do not necessarily indicate the amounts that may be realizable in the current market.

Financial instruments were classified as loans and receivables or financial liabilities measured at amortized cost, except (i) all exchange rate and interest rate hedging instruments, which are measured at fair value through profit or loss, (ii) financial investments classified as measured at fair value through profit or loss, (iii) financial investments that are classified as available for sale, which are measured at fair value through other comprehensive income (see Note 4),

(iv) loans and financing measured at fair value through profit or loss (see Note 14), (v) guarantees to customers that have vendor arrangements (see Note 14.j), which are measured at fair value through profit or loss, and (vi) subscription warrants indemnification, which are measured at fair value through profit or loss (see Note 22). The financial investments classified as held-to-maturity are measured at amortized cost. Cash, banks, and trade receivables are classified as loans and receivables. Trade payables and other payables are classified as financial liabilities measured at amortized cost.

Sensitivity Analysis

The Company and its subsidiaries use derivative financial instruments only to hedge against identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). Thus, for purposes of sensitivity analysis of market risks associated with financial instruments, as required by CVM Instruction 475/08, the Company analyzes the hedging instrument and the hedged item together, as shown on the charts below.

For the sensitivity analysis of foreign exchange hedging instruments, management adopted as a likely scenario the Real/U.S. dollar exchange rates at maturity of each swap, projected by U.S dollar futures contracts quoted on BM&FBOVESPA as of September 30, 2016. As a reference, the exchange rate for the last maturity of foreign exchange hedging instruments is R\$ 3.89 in the likely scenario. Scenarios II and III were estimated with a 25% and 50% additional appreciation or depreciation of the Brazilian Real against the likely scenario, according to the risk to which the hedged item is exposed.

Table of Contents**Ultrapar Participações S.A. and Subsidiaries****Notes to the Individual and Consolidated Interim Financial Information***(In thousands of Brazilian Reais, unless otherwise stated)*

Based on the balances of the hedging instruments and hedged items as of September 30, 2016, the exchange rates were replaced, and the changes between the new balance in Brazilian Reais and the original balance in Brazilian Reais as of September 30, 2016 were calculated in each of the three scenarios. The table below shows the change in the values of the main derivative instruments and their hedged items, considering the changes in the exchange rate in the different scenarios:

33. Ultracargo Fire Accident in Santos

On April 2, 2015, part of the storage facilities operated by Ultracargo in Santos, in the State of São Paulo, endured a nine-day fire accident surrounding six ethanol and gasoline tanks. The six tanks represented 4% of Ultracargo's overall capacity in Brazil as of December 31, 2014. There were no casualties and the cause of such accident and its impacts are still being investigated, including the extent of operational losses, damage to assets, potential environmental damages (see Note 20.b.2.2) and other liabilities and reputational harm. The Company maintains insurance policies to cover certain risks to which the subsidiaries are exposed (see Note 32.b).

On April 9, 2015, the Santos municipal government suspended Ultracargo's activities in that city. Ultracargo's operations in Santos comprise two separate areas. On April 27, 2015, the municipal government granted Ultracargo the authorization to resume its operations in the area not affected by the accident as published in the Santos Official Gazette (Diário Oficial de Santos). The operations corresponding to 185 thousand cubic meters capacity, or 22.5% of Ultracargo's overall capacity in Brazil, are still suspended.

The decommissioning plan is in progress, which comprises the removal of equipment and structures of the terminal affected by the fire. This process will allow the conclusion of investigation, as well as allow the start of the work to restore the affected area.

According to its services contracts with clients, Ultracargo has the obligation to hire insurance coverage and any indemnification will be paid by the insurer, according to the respective insurer's analysis and processing terms for the insurance loss adjustment. In the nine-month period ended September 30, 2016, Ultracargo signed an agreement with certain customers to advance the insurance indemnities and accrued the amount of R\$ 171,775 in liabilities and recognized a receivables from the insurer in the same amount as an indemnification asset. Until September 30, 2016, Ultracargo paid advances to a customer in the amount of R\$ 144,376, remaining a balance of R\$ 27,399 in current liabilities.

The balance of R\$ 200,251 of indemnification asset classified as current assets, includes R\$ 24,083 of loss in inventories of Ipiranga and R\$ 4,393 of loss in assets of Ultracargo. Such amounts are covered by insurance and were communicated to the insurer for inclusion in the loss adjustment process, whose conclusion and corresponding indemnification to the clients depends on completion of the Criminalistics Institute assessment, and are not expected to materially affect the results of the Company.

In addition, the Company has lawsuits and extrajudicial claims, for third-party and customers indemnification, related to damages and losses, presented until the date of these interim financial statements. Such lawsuits and claims are entitled to insurance coverage and are being analyzed by the insurers. The amounts of contingent liabilities relating to lawsuits and extrajudicial claims is R\$ 103,808 and R\$ 31,874, respectively.

Finally, Ultracargo pleaded advances related to expenses with rescue and containment and loss of profit, which were included in the loss adjustment by the insurers, in the amounts of R\$ 50,818 and R\$ 40,453, respectively. In the first quarter of 2016, Ultracargo received R\$ 29,751 from the insurer related to reimbursement of rescue and containment expenses and in the second quarter of 2016, Ultracargo received R\$ 30,000 from the insurer related to loss of profit. Both receipts were recognized in the income statement. The balance of contingent assets will be recognized when received or approved by the insurer.

(1) The EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) presented in this document represents the net income before (i) income and social contribution taxes, (ii) net financial expense (income) and (iii) depreciation and amortization, in accordance with ICVM 527/12. The purpose of including EBITDA information is to provide a measure used by the management for internal assessment of our operating results, and because a portion of our employee profit sharing plan is linked directly or indirectly to EBITDA performance. It is also a financial indicator widely used by investors and analysts to measure our ability to generate cash from operations and our operating performance. We also calculate EBITDA in connection with covenants related to some of our financing, as described in Note 14 to our consolidated financial statements. We believe EBITDA allows a better understanding not only of our financial performance but also of our capacity of meeting the payment of interest and principal from our debt and of obtaining resources for our investments and working capital. Our definition of EBITDA may differ from, and, therefore, may not be comparable with similarly titled measures used by other companies, thereby limiting its usefulness as a comparative measure. Because EBITDA excludes net financial expense (income), income and social contribution taxes and depreciation and amortization, it provides an indicator of general economic performance that is not affected by debt restructurings, fluctuations in interest rates or changes in income and social contribution taxes, depreciation and amortization. EBITDA is not a measure of financial performance under accounting practices adopted in Brazil or IFRS, and it should not be considered in isolation, or as a substitute for net income, as a measure of operating performance, as a substitute for cash flows from operations or as a measure of liquidity. EBITDA has material limitations that impair its value as a measure of a company's overall profitability since it does not address certain ongoing costs of our business that

could significantly affect profitability such as financial expense (income), income and social contribution taxes and depreciation and amortization.

The performance analysis for each segment is presented below:

Ipiranga

Operational performance: Ipiranga's sales volume totaled 5,935 thousand cubic meters in 3Q16, 10% below 3Q15 volume. Fuel sales volume for light vehicles (Otto cycle) decreased by 10% compared to 3Q15, despite the estimated 3% average growth in the light vehicle fleet, reflecting the economic conditions, worsening of employment rates and the increase in the cost of fuels' share of income. Diesel volume decreased by 10% year-over-year, following the economy weak performance and lower market share in the retail wholesale resellers' segment. In 3Q16, sales volume remained stable compared to 2Q16, but with a consistent Otto cycle growth of 2% in the last two quarters. During 9M16, Ipiranga accumulated sales volume of 17,817 thousand cubic meters, down 7% from 9M15.

Net revenue from sales and services: Ipiranga's net sales and services reached R\$ 16,591 million in 3Q16, remaining stable compared to 3Q15. The lower volume was offset by (i) the rise in diesel and gasoline costs in October 2015 by Petrobras and, consequently, higher ethanol costs, (ii) increased share of gasoline in sales mix in 3Q16, and (iii) the strategy of constant innovation in services and convenience in the service station, generating greater customer satisfaction and loyalty. Compared to 2Q16, net sales and services remained stable, consistently with the sales volume. During 9M16, Ipiranga's net sales and services amounted to R\$ 50,049 million, up 5% over 9M15.

Cost of products sold: Ipiranga's cost of goods sold totaled R\$ 15,424 million in 3Q16, remaining stable compared to 3Q15, mainly due to the rise in diesel and gasoline costs in October 2015 and, consequently, higher ethanol costs, offset by lower sales volume. The cost of goods sold decreased by 1% compared to 2Q16, in line with the operational performance. During 9M16, Ipiranga's cost of goods sold totaled R\$ 46,740 million, up 5% over 9M15.

Selling, marketing, general and administrative expenses: Ipiranga's sales, general and administrative expenses amounted to R\$ 571 million in 3Q16, a 9% increase over 3Q15, resulting from (i) higher expenses related to innovation and expansion projects and studies, (ii) higher expenses with marketing programs, (iii) the expansion of Ipiranga's service stations networks and franchises and (iv) inflation in this period, partially offset by lower freight expenses, due to lower sales volume. Compared to 2Q16, sales, general and administrative expenses increased by 2% mainly due to increased expenses with innovation and expansion projects and studies. During 9M16, Ipiranga's sales, general and administrative expenses totaled R\$ 1,669 million, up 10% over 9M15, same level of the inflation for the period.

EBITDA: Ipiranga's EBITDA reached R\$ 788 million in 3Q16, a 29% growth compared to 3Q15, due to the strategy of constant innovation in services and convenience in the service station, generating greater customer satisfaction and loyalty, and the movements in the domestic and foreign markets of fuels, despite lower sales volume. Compared to 2Q16, Ipiranga's EBITDA increased by 10% due to the same factors mentioned above. During 9M16, Ipiranga's EBITDA totaled R\$ 2,218 million, up 17% over 9M15.

Commodities sales volume increased by 11% seeking greater efficiency in capacity utilization and dilution of plant costs. Compared with 2Q16, sales volume grew by 9% (16 thousand tons), due to the effects of seasonality on sales of specialty chemicals. Oxitenó's sales volume during 9M16 totaled 565 thousand tons, up 1% over 9M15.

Net revenue from sales and services: Oxitenó's net sales and services totaled R\$ 956 million in 3Q16, a 16% decrease compared to 3Q15, due to (i) an 8% stronger Real against the US Dollar and (ii) a 12% lower average US Dollar price, mainly as a result of the reduction in the international prices of glycols and increased share of such products in sales mix, and such effects being partially offset by the higher sales volume. Compared to 2Q16, net sales and services increased by 5%, mainly due to the increased sales volume, with a larger share of specialty chemicals in the sales mix, offset by a 7% stronger Real against US Dollar. During 9M16, accumulated net sales and services totaled R\$ 2,869 million, down 4% from 9M15.

Cost of products sold: Oxitenó's cost of goods sold in 3Q16 totaled R\$ 739 million, a 5% decrease compared to 3Q15, due to (i) an 8% stronger Real against the US Dollar and (ii) lower personnel expenses, offset by the higher sales volume and higher price of some raw materials. Selling, marketing, general and administrative expenses: Oxitenó's sales, general and administrative expenses amounted R\$ 156 million in 3Q16, down 15% from 3Q15, due to (i) lower personnel expenses, and (ii) the effect of the stronger Real on logistics and international units' expenses. Compared to 2Q16, sales, general and administrative expenses increased by 4% mainly as a result of higher logistics expenses due to the increased sales volume. During 9M16, sales, general and administrative expenses totaled R\$ 454 million, down 7% from 9M15.

EBITDA: EBITDA totaled R\$ 99 million in 3Q16, down 54% from 3Q15, mainly due exchange rates and costs of raw materials moving in opposite directions, which were favorable in 3Q15 and unfavorable in 3Q16, and the foreign exchange rate level, with an 8% stronger Real (R\$ 0.30/US\$) against the US Dollar, despite higher volumes sold. Compared to 2Q16, EBITDA decreased by 16%, mainly due to a 7% (R\$ 0.26/US\$) stronger Real and higher costs with raw materials, offset by improved sales mix, with a greater share of specialty chemicals. During 9M16, EBITDA totaled R\$ 414 million, down 26% from 9M15.

Compared to 2Q16, cost of goods sold increased by 11% in 3Q16 and gross profit reduced by 5%, due to inventory gains reported in 2Q16, resulting from the procurement strategies to anticipate the annual adjustment in the prices of medicines, set by the Chamber for the Regulation of the Medical Pharmaceuticals Market (CMED) in 1Q16, and seasonally worst sales mix. Executive summary of the results

The Brazilian economy has shown initial signs of recovery, but the consensus indicates that the recovery will be slow. On the positive side, economic activity started to stabilize in 3Q16, consumer and business confidence have been growing, inflation rates are gradually decreasing and certain leading indicators, such as ABIQUIM's (Brazilian Chemical Industry Association) data, confirm such gradual improvement. Average exchange rate R\$/US\$ has appreciated by 8% year on year and by 7% quarter on quarter. On the other hand, demand remains weak, due to the restrictive monetary policy and the continued worsening of the labor market. Base interest rate ended the quarter at 14.25% per year, same level since July 2015. However, in October, the Brazilian Central Bank cut interest rates to 14.00% per year. In the international scenario, average oil price (Brent) remained at similar levels compared to those observed in 1H16, closing the quarter at an average price of US\$ 46/barrel, below the average of US\$ 50/barrel in the 3Q15 and stable when compared to 2Q16. In the retail pharmacy sector in the Northern and Northeastern regions of Brazil, according to data from members of Abrafarma, sales increased by 5%.

Ipiranga's sales volume decreased by 10% compared to 3Q15, reflecting the Brazilian economic recession, deterioration of employment rates, and the increase in the relative prices of fuel compared to household income. However, it is noteworthy that compared to 2Q16, the total volume remained stable, with growth of 2% in the Otto cycle volume. Despite lower sales volume, Ipiranga's EBITDA reached R\$ 788 million in 3Q16, 29% growth

compared to 3Q15, due to the strategy of constant innovation in services and convenience in the service stations, generating greater customer satisfaction and loyalty.

Oxiteno's sales volume totaled 200 thousand tons, 5% (9 thousand tons) increase compared to 3Q15, with 5% increase on the volume of sales of specialty chemicals in the domestic market, indicating a possible stabilization and gradual recovery of the Brazilian economy, as well as increased sales of commodities. Growth in sales volume was offset by the effects of the exchange rates and costs of raw materials moving in opposite directions, which were favorable in 3Q15 and unfavorable in 3Q16, and the foreign exchange rate level, with an 8% stronger Real against the US Dollar, resulting in an EBITDA of R\$ 99 million, 54% down from 3Q15.

Ultragaz reached sales volume of 467 thousand tons in 3Q16, a 4% increase compared to 3Q15, despite the slowdown of the economy. The bottled segment showed a 2% growth due to the opening of new resellers. In the bulk segment, sales volume grew by 8%, mainly as a result of investments made to capture new customers. Higher sales volume, as a result of commercial initiatives to capture new customers and resellers, and the differentiation strategy based on innovation resulted in an EBITDA of R\$ 108 million in 3Q16, up 4% over 3Q15.

In 3Q16, Ultracargo's total average storage increased by 7% over 3Q15, due to the increased fuel handling in Suape, Aratu and Santos terminals. Ultracargo's total EBITDA reached R\$ 23 million in 3Q16, 59% increase compared to 3Q15, due to the growth in average storage, tariff adjustment in all terminals and lower fire-related expenses, partially offset by increased costs and expenses. In the same comparison, excluding Santos operations EBITDA increased by 13% due to the same effects of average storage and tariff adjustment mentioned above.

Outlook

Although macroeconomic conditions still suggest caution, we start to see certain signs of smooth recovery of the economy. The potential recovery is positive for the business environment in Brazil and, therefore, for Ultrapar, which is highly leveraged on the economy. At Ipiranga, consistent investments to expand its service stations network and its related logistics infrastructure, focused on North, Northeast and Midwest regions of Brazil will continue to leverage the benefits from the growth of the vehicle fleet in Brazil, although at a slower pace. Additionally, Ipiranga will continue implementing differentiation initiatives, based on the increasing offer of products, services and convenience, to further increase customer loyalty and expand the number of clients, who are offered higher value-added products and services, while the reseller is provided with an additional source of revenue and differentiated positioning, thus maximizing the profitability of the whole value chain. Oxiteno will continue investing on innovation, with the development of new products and in partnership with its clients, also continuing the international expansion with investments in the ethoxylation plant in the United States. Ultragas will continue to reap the benefits from the investments in capturing new customers, the continuous search for differentiation and on managing costs and expenses constantly, which will contribute to the earnings progression. Ultracargo, on its turn, will focus its efforts to resume the suspended operations in Santos, without ceasing to assess new business opportunities from the growing demand for liquid bulk storage in Brazil. At Extrafarma, we will continue a more accelerated expansion of the company focused on raising the management standards in the retail pharmacy network. The strategic direction of our investments and the diversity of our businesses place us in a special position to capture value with the recovery of confidence in the Brazilian economy.
