APPROXIMATE DATE OF PROPOSED PUBLIC OFFERING:

As may be practicable after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box.

It is proposed that this filing will become effective (check appropriate box):

when declared effective pursuant to section 8(c).

Table of Contents**CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933**

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum	Proposed Maximum	Amount of Registration Fee ⁽¹⁾
		Offering Price Per Unit	Aggregate Offering Price ⁽¹⁾	
Common Stock, \$0.001 par value ⁽²⁾	\$	\$	\$	\$
Preferred Stock, \$0.001 par value ⁽²⁾				
Warrants ⁽²⁾				
Subscription Rights ⁽³⁾				
Debt Securities ⁽⁴⁾				
Total	\$	\$	\$ 500,000,000 ⁽⁵⁾	\$ 57,950 ⁽⁶⁾

- (1) Estimated pursuant to Rule 457 solely for the purposes of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement.
- (2) Subject to Note 5 below, there is being registered hereunder an indeterminate number of shares of common stock, preferred stock or warrants as may be sold, from time to time. Warrants represent rights to purchase common stock, preferred stock or debt securities.
- (3) Subject to Note 5 below, there is being registered hereunder an indeterminate number of subscription rights as may be sold, from time to time, representing rights to purchase common stock.
- (4) Subject to Note 5 below, there is being registered hereunder an indeterminate principal amount of debt securities as may be sold, from time to time. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$500,000,000.
- (5) In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$500,000,000.
- (6) Calculated pursuant to Rule 457(o) under the Securities Act of 1933, as amended. Pursuant to Rule 415(a)(6) under the Securities Act of 1933, as amended, this registration statement includes \$500,000,000 of the \$800,000,000 of unsold securities of the registrant that have been previously registered on the Registration Statement on Form N-2 (File No. 333-190602) originally filed by the registrant on August 13, 2013 and most recently declared effective on January 30, 2014 (the prior registration statement). A filing fee of \$109,120 was paid in connection with the prior registration statement and the Registration Statement on Form N-2 (File No. 333-180084) originally filed by the Registrant on March 14, 2012 and is being offset against the total registration fee pursuant to Rule 457(p), resulting in no payment in connection with the filing of this Registration Statement. Pursuant to Rule 415(a)(6), the offering of the unsold securities registered under the prior registration statement will be deemed terminated as of the effective date of this Registration Statement.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

PennantPark Floating Rate Capital Ltd. is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a business development company under the Investment Company Act of 1940, as amended.

Our investment objectives are to generate current income and capital appreciation while seeking to preserve capital by investing primarily in loans bearing a variable-rate of interest, or Floating Rate Loans, and other investments made to U.S. middle-market companies. Floating Rate Loans or variable-rate investments pay interest at variable-rates, which are determined periodically, on the basis of a floating base lending rate such as the London Interbank Offered Rate, or LIBOR, with or without a floor, plus a fixed spread. We can offer no assurances that we will achieve our investment objectives.

We are managed by PennantPark Investment Advisers, LLC. PennantPark Investment Administration, LLC provides the administrative services necessary for us to operate.

We may offer, from time to time, in one or more offerings or series, together or separately, up to \$500,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights, or debt securities, which we refer to, collectively, as the securities. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus. In the event we offer common stock, the offering price per share of our common stock exclusive of any underwriting commissions or discounts will not be less than the net asset value per share of our common stock at the time we make the offering except (1) in connection with a rights offering to our existing stockholders, (2) with the consent of the majority of our common stockholders and approval of our board of directors, or (3) under such circumstances as the Securities and Exchange Commission, or the SEC, may permit. See Risk Factors on page 8 and Sales of Common Stock Below Net Asset Value on page 49 of this prospectus for more information.

Our common stock is traded on the NASDAQ Global Select Market under the symbol PFLT. The last reported closing price for our common stock on December 14, 2016 was \$14.07 per share, and our net asset value on September 30, 2016 was \$14.06 per share.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form N-2

This prospectus and any accompanying prospectus supplement contain important information you should know before investing in our securities. Please read them before you invest in our securities and keep them for future reference. We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may also obtain such information free of charge or make stockholder inquiries by contacting us in writing at 590 Madison Avenue, New York, NY 10022, by calling us collect at (212) 905-1000 or by visiting our website at www.pennantpark.com. The information on our website is not incorporated by reference into this prospectus. The SEC also maintains a website at www.sec.gov that contains such information free of charge.

Investing in our securities involves a high degree of risk, including the risk of the use of leverage. Before buying any of our securities, you should read the discussion of the material risks of investing in us in Risk Factors beginning on page 8 of this prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

Prospectus dated , 2017

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the SEC using the shelf registration process. Under the shelf registration process, we may offer from time to time up to \$500,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities on the terms to be determined at the time of the offering. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. The information contained in this prospectus is accurate only as of the date on the front of this prospectus and our business, financial condition, results of operations and prospectus may have changed since that date. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement, together with any exhibits, before you make an investment decision.

Table of Contents

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider in making an investment decision. References to our portfolio, our investments and our business include investments we make through our consolidated subsidiaries. Some of the statements in this prospectus constitute forward-looking statements, which apply to both us and our consolidated subsidiaries, as applicable, and relate to future events, future performance or future financial condition. The forward-looking statements involve risks and uncertainties on a consolidated basis and actual results could differ materially from those projected in the forward-looking statements for many reasons, including those factors discussed in Risk Factors and elsewhere in this prospectus. You should read carefully the more detailed information set forth under Risk Factors and the other information included in this prospectus. In this prospectus and any accompanying prospectus supplement, except where the context suggests otherwise: the terms we, us, our and Company refer to PennantPark Floating Rate Capital Ltd. and its wholly-owned consolidated subsidiaries; Funding I refers to PennantPark Floating Rate Funding I, LLC; PennantPark Investment Advisers or Investment Adviser refers to PennantPark Investment Advisers, LLC; PennantPark Investment Administration or Administrator refers to PennantPark Investment Administration, LLC; Code refers to the Internal Revenue Code of 1986, as amended; RIC refers to a regulated investment company under the Code; 1940 Act refers to the Investment Company Act of 1940, as amended; BDC refers to a business development company under the 1940 Act; MCG refers to MCG Capital Corporation; and Credit Facility refers to our multi-currency senior secured revolving credit facility, as amended and restated with SunTrust Bank and other lenders, or the Lenders.

General Business of PennantPark Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd. is a BDC whose objectives are to generate current income and capital appreciation while seeking to preserve capital by investing primarily in Floating Rate Loans and other investments made to U.S. middle-market companies.

We believe that Floating Rate Loans to U.S. middle-market companies offer attractive risk-reward to investors due to a limited amount of capital available for such companies and the potential for rising interest rates. We use the term middle-market to refer to companies with annual revenues between \$50 million and \$1 billion. Our investments are typically rated below investment grade. Securities rated below investment grade are often referred to as leveraged loans or high yield securities or junk bonds and are often higher risk compared to debt instruments that are rated above investment grade and have speculative characteristics. However, when compared to junk bonds and other non-investment grade debt, senior secured Floating Rate Loans typically have more robust capital-preserving qualities, such as historically lower default rates than junk bonds, represent the senior source of capital in a borrower's capital structure and often have certain of the borrower's assets pledged as collateral. Our debt investments may generally range in maturity from three to ten years and are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions.

Under normal market conditions, we generally expect that at least 80% of the value of our Managed Assets, which means our net assets plus any borrowings for investment purposes, will be invested in Floating Rate Loans and other investments bearing a variable-rate of interest. We generally expect that senior secured debt, or first lien loans, will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including mezzanine securities and, to a lesser extent, equity investments. We seek to create a diversified portfolio by generally targeting an investment size between \$3 million and \$15 million, on average, although we expect that this investment size will vary proportionately with the size of our capital base.

Our investment activity depends on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. We have used, and expect to continue to use, our Credit Facility, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives. For a description of our Credit Facility, see Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources.

Organization and Structure of PennantPark Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd., a Maryland corporation organized in October 2010, is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for federal income tax purposes we have elected to be treated, and intend to qualify annually, as a RIC under the Code.

Funding I, our wholly owned subsidiary and a special purpose entity, was organized in Delaware as a limited liability company in May 2011. We formed Funding I in order to establish our Credit Facility.

Table of Contents

In August 2015, we completed the acquisition of MCG pursuant to the Agreement and Plan of Merger, or the Merger Agreement, by and among MCG, our Investment Adviser and the Company. As a result of the transactions completed by the Merger Agreement, MCG was ultimately merged with and into PFLT Funding II, LLC with PFLT Funding II, LLC as the surviving company.

Our Investment Adviser and Administrator

We utilize the investing experience and contacts of PennantPark Investment Advisers in developing what we believe is an attractive and diversified portfolio. The senior investment professionals of the Investment Adviser have worked together for many years and average over 25 years of experience in the senior lending, mezzanine lending, leveraged finance, distressed debt and private equity businesses. In addition, our senior investment professionals have been involved in originating, structuring, negotiating, managing and monitoring investments in each of these businesses across changing economic and market cycles. We believe this experience and history has resulted in a strong reputation with financial sponsors, management teams, investment bankers, attorneys and accountants, which provides us with access to substantial investment opportunities across the capital markets. Our Investment Adviser has a rigorous investment approach, which is based upon intensive financial analysis with a focus on capital preservation, diversification and active management. Since our Investment Adviser's inception in 2007, it has raised about \$3.0 billion in debt and equity capital and has invested \$5.5 billion in more than 400 companies with over 160 different financial sponsors through its managed funds.

Our Administrator has experienced professionals with substantial backgrounds in finance and administration of registered investment companies. In addition to furnishing us with clerical, bookkeeping and record keeping services, the Administrator also oversees our financial records as well as the preparation of our reports to stockholders and reports filed with the SEC. The Administrator assists in the determination and publication of our net asset value, or NAV, oversees the preparation and filing of our tax returns, and monitors the payment of our expenses as well as the performance of administrative and professional services rendered to us by others. Furthermore, our Administrator provides, on our behalf, managerial assistance to those portfolio companies to which we are required to offer such assistance. See [Risk Factors](#) [Risks Relating to our Business and Structure](#) [There are significant potential conflicts of interest which could impact our investment returns](#) for more information.

Market Opportunity

We believe that the limited amount of capital available to middle-market companies, coupled with the desire of these companies for flexible sources of capital, creates an attractive investment environment for us. From our perspective, middle market companies have faced difficulty in raising debt through the capital markets and private markets. We believe that, as a result of the difficulties in the credit markets and fewer sources of capital for middle-market companies, we see opportunities for improved risk-reward on our investments. Furthermore, we believe with a large pool of uninvested private equity capital seeking debt capital to complete private investments and a substantial supply of refinancing opportunities, there is an opportunity to attain attractive risk-reward with debt investments. See [Business](#) for more information.

Competitive Advantages

We believe that we have competitive advantages over other capital providers to middle-market companies, such as a management team with an average of over 25 years of experience in senior lending, mezzanine lending, leveraged finance, distressed debt and private equity businesses, a disciplined investment approach with strong value orientation, an ability to source and evaluate transactions through our Investment Adviser's proactive research capability and established network and flexible transaction structuring that allows for us to invest across the capital structure. See [Business](#) for more information.

Competition

Our primary competitors provide financing to middle-market companies and include other BDCs, commercial and investment banks, commercial finance companies, collateralized loan obligation, or CLO, funds and, to the extent they provide an alternative form of financing, private equity funds. Additionally, alternative investment vehicles, such as hedge funds, frequently invest in middle-market companies. As a result, competition for investment opportunities in middle-market companies can be intense. However, we believe that from time to time there has been a reduction in the amount of debt capital available to middle-market companies, which we believe has resulted in a less competitive environment for making new investments.

Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some competitors have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC. See [Risk Factors](#) [Risk Relating to our Business and Structure](#) [We operate in a highly competitive market for](#)

investment opportunities for more information.

Table of Contents

Leverage

We currently use and expect to continue to use leverage to make investments. As a result, we may continue to be exposed to the risks associated with leverage. See [Risk Factors – Risks Relating to our Business and Structure](#) for more information. We believe that our capital resources provide us with the flexibility to take advantage of market opportunities when they arise. Our use of leverage, as calculated under the asset coverage ratio of the 1940 Act, may generally range between 70% and 90% of our net assets, or 40% and 50% of our Managed Assets. We cannot assure investors that our leverage will remain within the range. The amount of leverage that we employ will depend on our assessment of the market and other factors at the time of any proposed borrowing. See [Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources](#) for more information.

Operating and Regulatory Structure

Our investment activities are managed by PennantPark Investment Advisers. Our board of directors, a majority of whom are independent of us, provides overall supervision of our activities, and the Investment Adviser supervises our day-to-day activities. Under our investment management agreement, or the Investment Management Agreement, we have agreed to pay our Investment Adviser an annual base management fee based on our average adjusted gross assets as well as an incentive fee based on our investment performance. See [Certain Relationships and Transactions – Investment Management Agreement](#) for more information.

We have also entered into an administration agreement, or the Administration Agreement, with the Administrator. Under our Administration Agreement, we have agreed to reimburse the Administrator for our allocable portion of overhead and other expenses incurred by the Administrator in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Compliance Officer, Chief Financial Officer and their respective staffs. See [Certain Relationships and Transactions – Administration Agreement](#) for more information.

As a BDC, we are required to comply with certain regulatory requirements. Also, while we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. See [Regulation](#) for more information. We have elected, and intend to qualify annually, to be treated for federal income tax purposes under the Code as a RIC. See [Material U.S. Federal Income Tax Considerations](#) for more information.

Use of Proceeds

We may use the net proceeds from selling securities pursuant to this prospectus to reduce our then-outstanding debt obligations, to invest in new or existing portfolio companies, to capitalize a subsidiary or for other general corporate or strategic purposes. Any supplements to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. See [Use of Proceeds](#) for more information.

Table of Contents

Distributions on Common Stock

We intend to continue our monthly distributions to our stockholders. Our monthly distributions, if any, are determined by our board of directors. See [Distributions](#) for more information.

Dividends on Preferred Stock

We may issue preferred stock from time to time, although we have no immediate intention to do so. Any such preferred stock will be a senior security for purposes of the 1940 Act and, accordingly, subject to the leverage test under that Act. If we issue shares of preferred stock, holders of such preferred stock will be entitled to receive cash dividends at an annual rate that will be fixed or will vary for the successive dividend periods for each series. In general, the dividend periods for fixed rate preferred stock can range from weekly to quarterly and is subject to extension. The dividend rate could be variable and determined for each dividend period. See [Description of our Preferred Stock](#) for more information.

Dividend Reinvestment Plan

We have adopted an [opt-out](#) dividend reinvestment plan that provides for reinvestment of our distributions on behalf of our stockholders unless a stockholder elects to receive cash. As a result, if our board of directors authorizes, and we declare, a cash distribution, then our stockholders who have not [opted out](#) of our dividend reinvestment plan will have their cash distributions automatically reinvested in additional shares of our common stock rather than receiving the cash distribution. Registered stockholders must notify our transfer agent in writing if they wish to [opt-out](#) of the dividend reinvestment plan. See [Dividend Reinvestment Plan](#) for more information.

Table of Contents

Plan of Distribution

We may offer, from time to time, up to \$500 million of our securities, on terms to be determined at the time of each such offering and set forth in a supplement to this prospectus.

Securities may be offered at prices and on terms described in one or more supplements to this prospectus. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated. In compliance with the guidelines of the Financial Industry Regulatory Authority, Inc., or FINRA, the compensation to the underwriters or dealers in connection with the sale of our securities pursuant to this prospectus and the accompanying supplement to this prospectus may not exceed 10% of the aggregate offering price of the securities as set forth on the cover page of the supplement to this prospectus.

We may not sell securities pursuant to this prospectus without delivering a prospectus supplement describing the terms of the particular securities to be offered and the method of the offering of such securities. See [Plan of Distribution](#) for more information.

Our Corporate Information

Our administrative and principal executive offices are located at 590 Madison Avenue, 15th Floor, New York, NY 10022. Our common stock is quoted on the NASDAQ Global Select Market under the symbol PFLT. Our phone number is (212) 905-1000, and our Internet website address is www.pennantpark.com. Information contained on our website is not incorporated by reference into this prospectus or any supplements to this prospectus, and you should not consider information contained on our website to be part of this prospectus or any supplements to this prospectus. We file periodic reports, proxy statements and other information with the SEC and make such reports available on our website free of charge as soon as reasonably practicable. You may read and copy the materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet site at www.sec.gov that contains material that we file with the SEC on the EDGAR Database.

Table of Contents**FEES AND EXPENSES**

The following table will assist you in understanding the various costs and expenses that an investor in shares of our common stock will bear directly or indirectly. However, we caution you that some of the percentages indicated in the table below are estimates and may vary from actual results. The following table should not be considered a representation of our future expenses. Actual expenses may be greater or less than shown. Except where the context suggests otherwise, whenever this prospectus or any prospectus supplements, if any, contains a reference to fees or expenses paid by you or us or that we will pay, stockholders will indirectly bear such fees or expenses as investors in us.

Stockholder transaction expenses (as a percentage of offering price)

- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters or agents, a corresponding prospectus supplement will disclose the applicable sales load.
- (2) The related prospectus supplement will disclose the estimated amount of offering expenses, the offering price and the offering expenses borne by us as a percentage of the offering price.
- (3) Net assets attributable to common shares equals average net assets for the fiscal year ended September 30, 2016.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form N-2

- (4) The contractual management fee is calculated at an annual rate of 1.00% of our average adjusted gross assets on September 30, 2016. See [Certain Relationships and Transactions Investment Management Agreement](#) for more information.
- (5) The portion of incentive fees paid with respect to net investment income and capital gains, if any, is based on actual amounts incurred during the fiscal year ended September 30, 2016. Such incentive fees are based on performance, vary from period to period and are not paid unless our performance exceeds specified thresholds. Incentive fees in respect of net investment income do not include incentive fees in respect of net capital gains. The portion of our incentive fee paid in respect of net capital gains is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date) and equals 20.0% of our realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. For purposes of this chart and our Consolidated Financial Statements, our incentive fees on capital gains are calculated in accordance with U.S. generally accepted accounting principles, or GAAP. As we cannot predict our future net investment income or capital gains, the incentive fee paid in future periods, if any, may be substantially different than the fee earned during the fiscal year ended September 30, 2016. For more detailed information about the incentive fee, please see [Certain Relationships and Transactions Investment Management Agreement](#) for more information.
- (6) As of September 30, 2016, we had \$232.9 million in borrowings outstanding under our \$350 million Credit Facility. We may use proceeds of an offering of securities under this registration statement to repay outstanding obligations under our Credit Facility. After completing any such offering, we may continue to borrow under our Credit Facility to finance our investment objectives. Annual interest expense on borrowed funds represents actual interest expense and amendment costs incurred on our Credit Facility for the fiscal year ended September 30, 2016 and we caution you that our actual interest expense in the future will depend on prevailing interest rates and our rate of borrowing, which may be substantially higher than the amount provided in this table. See [Risk Factors Risks Relating to our Business and Structure](#) We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage for more information.
- (7) Other expenses includes our general and administrative expenses, professional fees, directors fees, insurance costs, expenses of our dividend reinvestment plan and the expenses of the Investment Adviser reimbursable under our Investment Management Agreement and of the Administrator reimbursable under our Administration Agreement. Such expenses are based on estimated amounts for the current fiscal year.
- (8) Total estimated annual expenses as a percentage of average net assets attributable to common shares, to the extent we borrow money to make investments, are higher than the total estimated annual expenses percentage would be for a company that is not leveraged. We may borrow money to leverage our net assets and increase our total assets. The SEC requires that the total estimated annual expenses percentage be calculated as a percentage of average net assets (defined as total assets less indebtedness) rather than total assets, which include assets that have been funded with borrowed money. For a presentation and calculation of total estimated annual expenses based on average total assets, see page 37 of this prospectus.

Table of Contents**Example**

The following example illustrates the projected dollar amount of total cumulative expenses that you would pay on a \$1,000 hypothetical investment in common shares, assuming (1) a 3.00% sales load (underwriting discounts and commissions) and offering expenses totaling 0.48%, (2) total net estimated annual expenses of 4.11% of average net assets attributable to common shares as set forth in the table above (other than performance-based incentive fees) and (3) a 5% annual return.

You would pay the following expenses on a \$1,000 common stock investment:	1 year	3 years	5 years	10 years
Assuming a 5% annual return (assumes no return from net realized capital gains or net unrealized capital appreciation)	\$ 75	\$ 155	\$ 238	\$ 450
Assuming a 5% annual return (assumes return from only realized capital gains and thus subject to the capital gains incentive fee)	\$ 84	\$ 183	\$ 281	\$ 525

This example and the expenses in the table above should not be considered a representation of our future expenses. Actual expenses may be greater or less than those assumed. The table above is provided to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. If we were to earn an annual return equal to or less than 5% from net investment income, the incentive fee under our Investment Management Agreement would not be earned or payable. If our returns on our investments, including the realized capital gains, result in an incentive fee, then our expenses would be higher. The example assumes that all distributions are reinvested at NAV. Reinvestment of distributions under our dividend reinvestment plan may occur at a price per share that differs from NAV. See Distributions and Dividend Reinvestment Plan for more information.

Table of Contents

RISK FACTORS

Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may have a material adverse effect on our business, financial condition and/or operating results. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our NAV, the trading price of our common stock or any securities we may issue, may decline, and you may lose all or part of your investment.

RISKS RELATING TO OUR BUSINESS AND STRUCTURE

Global capital markets could enter a period of severe disruption and instability. These market conditions have historically and could again have a materially adverse effect on debt and equity capital markets in the United States, which could have a materially negative impact on our business, financial condition and results of operations.

The U.S. and global capital markets have experienced periods of disruption characterized by the freezing of available credit, a lack of liquidity in the debt capital markets, significant losses in the principal value of investments, the re-pricing of credit risk in the broadly syndicated credit market, the failure of major financial institutions and general volatility in the financial markets. During these periods of disruption, general economic conditions deteriorated with material and adverse consequences for the broader financial and credit markets, and the availability of debt and equity capital for the market as a whole, and financial services firms in particular, was reduced significantly. These conditions may reoccur for a prolonged period of time or materially worsen in the future. In addition, uncertainty regarding the United Kingdom referendum decision to leave the European Union (the so called Brexit), continuing signs of deteriorating sovereign debt conditions in Europe and an economic slowdown in China create uncertainty that could lead to further disruptions, instability and weakening consumer, corporate and financial confidence. We may in the future have difficulty accessing debt and equity capital markets, and a severe disruption in the global financial markets, deterioration in credit and financing conditions or uncertainty regarding U.S. government spending and deficit levels, Brexit, European sovereign debt, Chinese economic slowdown or other global economic conditions could have a material adverse effect on our business, financial condition and results of operations.

Volatility or a prolonged disruption in the credit markets could materially damage our business.

We are required to record our assets at fair value, as determined in good faith by our board of directors, in accordance with our valuation policy. As a result, volatility in the capital markets may have a material adverse effect on our valuations and our NAV, even if we hold investments to maturity. Volatility or dislocation in the capital markets may depress our stock price below our NAV per share and create a challenging environment in which to raise equity and debt capital. As a BDC, we are generally not able to issue additional shares of our common stock at a price less than our NAV without first obtaining approval for such issuance from our stockholders and our independent directors. Additionally, our ability to incur indebtedness is limited by the asset coverage ratio requirements for a BDC, as defined under the 1940 Act. Declining portfolio values negatively impact our ability to borrow additional funds under our Credit Facility because our NAV is reduced for purposes of the asset coverage ratio. If the fair value of our assets declines substantially, we may fail to maintain the asset coverage ratio stipulated by the 1940 Act, which could, in turn, cause us to lose our status as a BDC and materially impair our business operations. A lengthy disruption in the credit markets could also materially decrease demand for our investments and could materially damage our business, financial condition and results of operations.

The significant disruption in the capital markets experienced in the past has had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. The debt capital that may be available to us in the future may be at a higher cost and have less favorable terms and conditions than those currently in effect. If our financing costs increase and we have no increase in interest income, then our net investment income will decrease. A prolonged inability to raise capital may require us to reduce the volume of investments we originate and could have a material adverse impact on our business, financial condition and results of operations. This may also increase the probability that other structural risks negatively impact us. These situations may arise due to circumstances that we may be unable to control, such as a lengthy disruption in the credit markets, a severe decline in the value of the U.S. dollar, a sharp economic downturn or recession or an operational problem that affects third parties or us, and could materially damage our business, financial condition and results of operations.

Table of Contents

We could be subject to reduced availability and/or mandatory prepayments under Funding I's Credit Facility.

In addition to the asset coverage ratio requirements, our Credit Facility contains various covenants applicable to Funding I, which restricts our ability to borrow funds. For example, the income coverage covenant, or test, requires us to maintain a ratio whereby the aggregate amount of interest received on the portfolio loans must equal at least 125% of the interest payable in respect to the Lenders and other parties. Failure to satisfy the various covenants under the Credit Facility could accelerate repayment under the Credit Facility or otherwise prevent us from receiving distributions under the payment waterfall. This could materially and adversely affect our liquidity, financial condition and results of operations. Funding I's borrowings under the Credit Facility are collateralized by the assets in Funding I's investment portfolio. The agreements governing the Credit Facility require Funding I to comply with certain financial and operational covenants. These covenants include:

A requirement to retain our tax status as a RIC;

A requirement to maintain a minimum amount of stockholder's equity; and

A requirement that our outstanding borrowings under the Credit Facility not exceed a certain percentage of the value of our portfolio. Our continued compliance with these covenants depends on many factors, some of which are beyond our control. A material decrease in our NAV in connection with additional borrowings could result in an inability to comply with our obligation to restrict the level of indebtedness that we are able to incur in relation to the value of our assets or to maintain a minimum level of stockholders' equity in Funding I. This could have a material adverse effect on our operations, as it would reduce availability under the Credit Facility and could trigger mandatory prepayment obligations under the terms of the Credit Facility.

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make in middle-market companies. We compete with public and private funds, including other BDCs, commercial and investment banks, commercial financing companies, CLO funds and, to the extent they provide an alternative form of financing, private equity funds. Additionally, alternative investment vehicles, such as hedge funds, also invest in middle-market companies. As a result, competition for investment opportunities at middle-market companies can be intense. Many of our potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some competitors have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objectives.

Table of Contents

Participants in our industry compete on several factors, including price, flexibility in transaction structuring, customer service, reputation, market knowledge and speed in decision-making. We do not seek to compete primarily based on the interest rates we offer, and we believe that some of our competitors may make loans with interest rates that are lower than the rates we offer. We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. However, if we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss.

Our borrowers may default on their payments, which may have a materially negative effect on our financial performance.

Our primary business exposes us to credit risk, and the quality of our portfolio has a significant impact on our earnings. Credit risk is a component of our fair valuation of our portfolio companies. Negative credit events will lead to a decrease in the fair value of our portfolio companies.

In addition, market conditions have affected consumer confidence levels, which may harm the business of our portfolio companies and result in adverse changes in payment patterns. Increased delinquencies and default rates would negatively impact our results of operations. Deterioration in the credit quality of our portfolio could have a material adverse effect on our business, financial condition and results of operations. If interest rates rise, some of our portfolio companies may not be able to pay the escalating interest on our loans and may default.

We make long-term loans and debt investments, which may involve a high degree of repayment risk. Our investments with a deferred interest feature, such as original issue discount, or OID, income and payment-in-kind, or PIK, interest, could represent a higher credit risk than investments that must pay interest in full in cash on a regular basis. We invest in companies that may have limited financial resources, typically are highly leveraged and may be unable to obtain financing from traditional sources. Accordingly, a general economic downturn or severe tightening in the credit markets could materially impact the ability of our borrowers to repay their loans, which could significantly damage our business. Numerous other factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan or a downturn in its industry. A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans or foreclosure on the secured assets. This could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the loans or debt securities that we hold. In addition, our portfolio companies may have, or may be permitted to incur, other debt that ranks senior to or equally with our securities. This means that payments on such senior-ranking securities may have to be made before we receive any payments on our subordinated loans or debt securities. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral and may have a material adverse effect on our financial condition and results of operations.

Any unrealized losses we experience on our investment portfolio may be an indication of future realized losses, which could reduce our income available for distribution.

As a BDC, we are required to carry our investments at fair value, which is derived from a market value or, if no market value is ascertainable or if market value does not reflect the fair value of such investment in the bona fide determination of our board of directors, then we would carry our investments at fair value as determined in good faith by or under the direction of our board of directors. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation or loss. Unrealized losses of any given portfolio company could be an indication of such company's inability in the future to meet its repayment obligations to us.

If the fair value of our portfolio companies reflects unrealized losses that are subsequently realized, we could experience reductions of our income available for distribution in future periods that could materially harm our results of operations and cause a material decline in the value of our publicly traded common stock.

We may be the target of litigation.

We may be the target of securities litigation in the future, particularly if the trading price of our common stock fluctuates significantly. We could also generally be subject to litigation, including derivative actions by our stockholders. Any litigation could result in substantial costs and divert management's attention and resources from our business and cause a material adverse effect on our business, financial condition and results of operations.

Table of Contents

We are dependent upon our Investment Adviser's key personnel for our future success, and if our Investment Adviser is unable to hire and retain qualified personnel or if our Investment Adviser loses any member of its management team, our ability to achieve our investment objectives could be significantly harmed.

We depend on the diligence, skill and network of business contacts of the senior investment professionals of our Investment Adviser for our future success. We also depend, to a significant extent, on PennantPark Investment Advisers' access to the investment information and deal flow generated by these senior investment professionals and any others that may be hired by PennantPark Investment Advisers. Subject to the overall supervision of our board of directors, the managers of our Investment Adviser evaluate, negotiate, structure, close and monitor our investments. Our future success depends on the continued service of management personnel of our Investment Adviser. The departure of managers of PennantPark Investment Advisers could have a material adverse effect on our ability to achieve our investment objectives. In addition, we can offer no assurance that PennantPark Investment Advisers will remain our Investment Adviser. The Investment Adviser has the right, under the Investment Management Agreement, to resign at any time upon 60 days' written notice, whether we have found a replacement or not.

If our Investment Management Agreement is terminated, our costs under new agreements that we enter into may increase. In addition, we will likely incur significant time and expense in locating alternative parties to provide the services we expect to receive under our Investment Management Agreement. Any new investment management agreement would also be subject to approval by our stockholders.

We are exposed to risks associated with changes in interest rates that may affect our cost of capital and net investment income.

Since we borrow money to make investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds will increase and the interest rate on investments with an interest rate floor will not increase until interest rates exceed the applicable floor, which will reduce our net investment income. We may use interest rate risk management techniques, such as total return swaps and interest rate swaps, in an effort to limit our exposure to interest rate fluctuations. These techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act and applicable commodities laws. These activities may limit our ability to participate in the benefits of lower interest rates with respect to the hedged portfolio. Adverse developments resulting from changes in interest rates or hedging transactions could have a material adverse effect on our business, financial condition and results of operations. Also, we have limited experience in entering into hedging transactions and we will initially have to purchase or develop such expertise, which may diminish the actual benefits of any hedging strategy we employ. See

Management's Discussion and Analysis of Financial Condition and Results of Operations—Quantitative and Qualitative Disclosures about Market Risk for more information.

A rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments once the interest rate exceeds the applicable floor. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee hurdle and may result in a substantial increase of the amount of incentive fees payable to our Investment Adviser with respect to Pre-Incentive Fee Net Investment Income.

General interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in interest rates may result in both lower interest rates on new investments and higher repayments on current investments with higher interest rates, which may have an adverse impact on our net investment income. An increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates or are subject to interest rate floors and also could increase our interest expense on our Credit Facility, thereby decreasing our net investment income. Also, an increase in interest rates available to investors could make an investment in our common stock less attractive if we are not able to increase our dividend rate, which could reduce the value of our common stock.

Our financial condition and results of operation depend on our ability to manage future growth effectively.

Our ability to achieve our investment objectives depends on our ability to grow, which depends, in turn, on our Investment Adviser's ability to identify, invest in and monitor companies that meet our investment selection criteria. Accomplishing this result on a cost-effective basis is largely a function of our Investment Adviser's structuring of the investment process, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. The management team of PennantPark Investment Advisers has substantial responsibilities under our Investment Management Agreement. In order for us to grow, our Investment Adviser will need to hire, train, supervise and manage new employees. However, we can offer no assurance that any current or future employees will contribute effectively to the work of, or remain associated with, the Investment Adviser. We caution you that the principals of our Investment Adviser or Administrator may also be called upon to provide and currently do provide managerial assistance to portfolio companies and other investment vehicles, including other BDCs, which are managed by the Investment Adviser. Such demands on their time may distract them or slow our rate of investment. Any failure

to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

We are highly dependent on information systems and systems failures could have a material adverse effect on our business, financial condition and results of operations.

Our business depends on the communications and information systems, including financial and accounting systems, of the Investment Adviser, the Administrator and our sub-administrator. Any failure or interruption of such systems could cause delays or other problems in our activities. This, in turn, could have a material adverse effect on our business, financial condition and results of operations.

We may not replicate the historical performance of other investment companies and funds with which our senior and other investment professionals have been affiliated.

The 1940 Act imposes numerous constraints on the investment activities of BDCs. For example, BDCs are required to invest at least 70% of their total assets primarily in securities of U.S. private companies or thinly traded public companies (public companies with a market capitalization of less than \$250 million), cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. These constraints may hinder the Investment Adviser's ability to take advantage of attractive investment opportunities and to achieve our investment objectives. In addition, the investment philosophy and techniques used by the Investment Adviser may differ from those used by other investment companies and funds advised by the Investment Adviser. Accordingly, we can offer no assurance that we will replicate the historical performance of other investment companies and funds with which our senior and other investment professionals have been affiliated, and we caution that our investment returns could be substantially lower than the returns achieved by such other companies.

Any failure on our part to maintain our status as a BDC would reduce our operating flexibility.

If we do not remain a BDC, we might be regulated as a closed-end investment company under the 1940 Act, which would subject us to substantially more regulatory restrictions under the 1940 Act and correspondingly decrease our operating flexibility, which could have a material adverse effect on our business, financial condition and results of operations.

Loss of RIC tax status would substantially reduce our net assets and income available for debt service and distributions.

We have operated and continue to operate so as to maintain our election to be treated as a RIC under Subchapter M of the Code. If we meet the annual source of income, quarterly asset diversification, and distribution requirements, we generally will not be subject to corporate-level income taxation on income we timely distribute, or deem to distribute, as dividends for U.S. federal income tax purposes to our stockholders. We would cease to qualify for such tax treatment if we were unable to comply with these requirements. In addition, we may have difficulty meeting the requirement to make distributions to our stockholders because, in certain cases, we may recognize income before or without receiving cash representing such income. If we fail to qualify as a RIC, we will have to pay corporate-level taxes on all of our income whether or not we distribute it, which would substantially reduce the amount of income available for debt service as well as reduce and/or affect the character and amount of our distributions to our stockholders. Even if we qualify as a RIC, we generally will be subject to a 4% nondeductible excise tax if we do not distribute to our stockholders in respect of each calendar year of an amount at least equal to the sum of (1) 98% of our net ordinary income (subject to certain deferrals and elections) for the calendar year, (2) 98.2% of our capital gain net income (adjusted for certain ordinary losses) generally for the one-year period ending on October 31 of the calendar year plus (3) any net ordinary income or capital gain net income for preceding years that was not distributed during such years and on which we were not subject to corporate income tax.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as OID and PIK interest, which represents interest added to the loan balance and due at the end of the loan term. OID, which could be significant relative to our overall investment assets, and increases in loan balances as a result of PIK interest will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash, such as amounts attributable to foreign currency transactions. Our investments with a deferred interest feature, such as PIK interest, may represent a higher credit risk than loans for which interest must be paid in full in cash on a regular basis. For example, even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is scheduled to occur upon maturity of the obligation.

The part of the incentive fee payable by us that relates to our net investment income is computed and paid on income that may include interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan that is structured to provide PIK or OID interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible.

Table of Contents

We may have difficulty meeting the tax requirement to distribute at least 90% of the sum of our ordinary income and realized net short-term capital gains, if any, to obtain RIC tax benefits. Accordingly, we may have to sell some of our investments at times or prices we would not consider advantageous, or raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements, which could have a material adverse effect on our business, financial condition and results of operations. If we are not able to obtain cash from other sources, we may lose our RIC tax status and thus be subject to corporate-level income tax.

Because we intend to distribute substantially all of our income to our stockholders to maintain our tax status as a RIC, we will need to raise additional capital to finance our growth. If funds are not available to us, we may need to curtail new investments, and our common stock value could decline.

In order to satisfy the requirements to be treated as a RIC for federal income tax purposes, we intend to distribute to our stockholders substantially all of our investment company taxable income and net capital gains each taxable year. However, we may retain all or a portion of our net capital gains and pay applicable income taxes with respect thereto and elect to treat such retained net capital gains as deemed dividend distributions to our stockholders.

As a BDC, we generally are required to meet a 200% asset coverage ratio of total assets to total senior securities, which includes all of our borrowings, and any preferred stock we may issue in the future. This requirement limits the amount we may borrow. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments or sell additional common stock and, depending on the nature of our leverage, to repay a portion of our indebtedness at a time when such sales and repayments may be disadvantageous. In addition, the issuance of additional securities could dilute the percentage ownership of our current stockholders in us.

We are partially dependent on our subsidiary Funding I for cash distributions to enable us to meet the RIC distribution requirements. Funding I may be limited by its covenants from making certain distributions to us that may be necessary to fulfill our requirements to be subject to tax as a RIC for federal income tax purposes. We may have to request a waiver of these covenants' restrictions for Funding I to make certain distributions to enable us to be treated as a RIC for federal income tax purposes. We cannot assure you that Funding I will be granted such a waiver, and if Funding I is unable to obtain a waiver, compliance with the covenants may cause us to incur a corporate-level income tax.

Regulations governing our operation as a BDC will affect our ability to, and the way in which we, raise additional capital.

Our business requires a substantial amount of capital. We may acquire additional capital from the issuance of additional senior securities or other indebtedness, the issuance of additional shares of our common stock, the issuance of warrants or subscription rights to purchase certain of our securities, or from securitization transactions. However, we may not be able to raise additional capital in the future on favorable terms or at all. We may issue debt securities or preferred securities, which we refer to collectively as senior securities, and we may borrow money from banks, or other financial institutions, up to the maximum amount permitted by the 1940 Act. Under the 1940 Act, the asset coverage ratio requirements permit us to issue senior securities or incur indebtedness subject to certain limits. Our ability to pay distributions or issue additional senior securities would be restricted if our asset coverage ratio was not met. If the value of our assets declines, we may be unable to satisfy the asset coverage ratio. If that happens, we may be required to liquidate a portion of our investments and repay a portion of our indebtedness at a time when such sales may be disadvantageous, which could materially damage our business, financial condition and results of operations.

Senior Securities. As a result of issuing senior securities, we are exposed to typical risks associated with leverage, including an increased risk of loss. If we issue preferred securities, they would rank senior to common stock in our capital structure. Preferred stockholders would have separate voting rights and may have rights, preferences or privileges more favorable than those of holders of our common stock. Furthermore, the issuance of preferred securities could have the adverse effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for our common stockholders or otherwise be in your best interest. Our senior securities may include conversion features that cause them to bear risks more closely associated with an investment in our common stock.

Additional Common Stock. Our board of directors may decide to issue common stock to finance our operations rather than issuing debt or other senior securities. As a BDC, we are generally not able to issue our common stock at a price below NAV per share without first obtaining certain approvals from our stockholders and our board of directors. Also, subject to the requirements of the 1940 Act, we may issue rights to acquire our common stock at a price below the current NAV per share of the common stock if our board of directors determines that such sale is in our best interests and the best interests of our common stockholders. In any such case, the price at which our securities are to be issued and sold may not be less than a price, that in the determination of our board of directors, closely approximates the market value of such securities. However, when required to be undertaken, the procedures used by the board of directors to determine

the NAV per share of our common stock within 48 hours of each offering

Table of Contents

of our common stock may differ materially from and will necessarily be more abbreviated than the procedures used by the board of directors to determine the NAV per share of our common stock at the end of each quarter because there is an extensive process each quarter to determine the NAV per share of our common stock which cannot be completed in 48 hours. Such procedures may yield a NAV that is less precise than the NAV determined at the end of each quarter. We will not offer transferable subscription rights to our stockholders at a price equivalent to less than the then current NAV per share of common stock, excluding underwriting commissions, unless we first file a post-effective amendment that is declared effective by the SEC with respect to such issuance and the common stock to be purchased in connection with such rights represents no more than one-third of our outstanding common stock at the time such rights are issued. In addition, for us to file a post-effective amendment to a registration statement on Form N-2, we must then be qualified to register our securities under the requirements of Form S-3. We may actually issue shares above or below a future NAV. If we raise additional funds by issuing more common stock or warrants or senior securities convertible into, or exchangeable for, our common stock, the percentage ownership of our common stockholders at that time would decrease, and our common stockholders would experience voting dilution.

Securitization. In addition to issuing securities to raise capital as described above, we anticipate that in the future, as market conditions permit, we may securitize our loans to generate cash for funding new investments. To securitize loans, we may create a wholly-owned subsidiary, contribute a pool of loans to the subsidiary and have the subsidiary issue primarily investment grade debt securities to purchasers who we would expect to be willing to accept a substantially lower interest rate than the loans earn. Even though we expect the pool of loans that we contribute to any such securitization vehicle to be rated below investment grade, because the securitization vehicle's portfolio of loans would secure all of the debt issued by such vehicle, a portion of such debt may be rated investment grade, subject in each case to market conditions that may require such portion of the debt to be over collateralized and various other restrictions. If applicable accounting pronouncements or SEC staff guidance require us to consolidate the securitization vehicle's financial statements with our financial statements, any debt issued by it would be generally treated as if it were issued by us for purposes of the asset coverage ratio applicable to us. In such case, we would expect to retain all or a portion of the equity and/or subordinated notes in the securitization vehicle. Our retained equity would be exposed to any losses on the portfolio of loans before any of the debt securities would be exposed to such losses. Accordingly, if the pool of loans experienced a low level of losses due to defaults, we would earn an incremental amount of income on our retained equity but we would be exposed, up to the amount of equity we retained, to that proportion of any losses we would have experienced if we had continued to hold the loans in our portfolio. We may hold subordinated debentures in any such securitization vehicle and, if so, we would not consider such securities to be senior securities. An inability to successfully securitize our loan portfolio could limit our ability to grow our business and fully execute our business strategy and adversely affect our earnings, if any. Moreover, the successful securitization of a portion of our loan portfolio might expose us to losses as the residual loans in which we do not sell interests will tend to be those that are riskier and less liquid.

Table of Contents

We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage.

Because we borrow funds through Funding I to make investments, we are exposed to increased risk of loss due to our use of debt to make investments. A decrease in the value of our investments will have a greater negative impact on the NAV attributable to our common stock than it would if we did not use debt. Our ability to pay distributions may be restricted when our asset coverage ratio is not met and any cash that we use to service our indebtedness is not available for distribution to our common stockholders.

Our current debt is governed by the terms of the Credit Facility and future debt may be governed by an indenture or other instrument containing covenants restricting our operating flexibility. We, and indirectly our stockholders, bear the cost of issuing and servicing debt. Any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock and may also carry leverage related risks.

If we incur additional debt, it could increase the risk of investing in our shares.

We have indebtedness outstanding pursuant to our Credit Facility and expect in the future to borrow additional amounts under our Credit Facility or other debt securities, subject to market availability, and, may increase the size of our Credit Facility. We cannot assure you that our leverage will remain at current levels. The amount of leverage that we employ will depend upon our assessment of the market and other factors at the time of any proposed borrowing. Lenders have fixed dollar claims on our assets that are superior to the claims of our common stockholders or preferred stockholders, if any, and we have granted a security interest in Funding I's assets in connection with our Credit Facility borrowings. In the case of a liquidation event, those lenders would receive proceeds before our stockholders. Any future debt issuance will increase our leverage and may be subordinate to our Credit Facility. In addition, borrowings or debt issuances, also known as leverage, magnify the potential for loss or gain on amounts invested and, therefore, increase the risks associated with investing in our securities. Leverage is generally considered a speculative investment technique. If the value of our assets decreases, then leveraging would cause the NAV attributable to our common stock to decline more than it otherwise would have had we not utilized leverage. Similarly, any decrease in our revenue would cause our net income to decline more than it would have had we not borrowed funds and could negatively affect our ability to make distributions on our common or preferred stock. Our ability to service any debt that we incur depends largely on our financial performance and is subject to prevailing economic conditions and competitive pressures.

As of September 30, 2016, we had outstanding borrowings of \$232.9 million under our Credit Facility with a current interest rate of 2.57% exclusive of the fees on the undrawn commitment. To cover the annual interest on our borrowings of \$232.9 million outstanding at September 30, 2016, at the weighted average annual rate of 2.57%, we would have to receive an annual yield of at least 0.98%. This example is for illustrative purposes only, and actual interest rates on our Credit Facility or any future borrowings are likely to fluctuate. The costs associated with our borrowings, including any increase in the management fee or incentive fee payable to our Investment Adviser, are and will be borne by our common stockholders.

The following table is designed to illustrate the effect on the return to a holder of our common stock of the leverage created by our use of borrowing at September 30, 2016 of 37% of total assets (including such borrowed funds), at the current interest rate at the time of 2.57%, and assumes hypothetical annual returns on our portfolio of minus 10 to plus 10 percent. The table also assumes that we will maintain a constant level of leverage and weighted average interest rate. The amount of leverage and cost of borrowing that we use will vary from time to time. As can be seen, leverage generally increases the return to stockholders when the portfolio return is positive and decreases return when the portfolio return is negative. Actual returns may be greater or less than those appearing in the table.

Assumed return on portfolio (net of expenses) ⁽¹⁾	(10.0)%	(5.0)%	%	5.0%	10.0%
Corresponding return to common stockholders ⁽²⁾	(18.4)%	(10.0)%	(1.6)%	6.8%	15.2%

(1) The assumed portfolio return is required by regulation of the SEC and is not a prediction of, and does not represent, our projected or actual performance.

(2) In order to compute the corresponding return to common stockholders, the assumed return on portfolio is multiplied by the total value of our assets at the beginning of the period to obtain an assumed return to us. From this amount, all interest expense expected to be accrued during the period is subtracted to determine the return available to stockholders. The return available to stockholders is then divided by the total value of our net assets as of the beginning of the period to determine the corresponding return to common stockholders.

We may in the future determine to fund a portion of our investments with debt securities, which would magnify the potential for loss and the risks of investing in us.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form N-2

As a result of any issuance of debt securities, we would be exposed to typical risks associated with leverage, including an increased risk of loss and an increase in expenses, which are ultimately borne by our common stockholders. Payment of interest on such debt securities must take preference over any other distributions or other payments to our common stockholders. If we issue debt securities in the future, it is likely that such securities will be governed by an indenture or other instrument containing covenants

Table of Contents

restricting our operating flexibility. In addition, such securities may be rated by rating agencies, and in obtaining a rating for such securities, we may be required to abide by operating and investment guidelines that could further restrict our operating flexibility. Furthermore, any cash that we use to service our indebtedness would not be available for the payment of distributions to our common stockholders.

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings, if any, are an assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of any publicly issued debt securities. Our credit ratings, generally may not reflect the potential impact of risks related to market conditions or other factors discussed above on the market value of, or trading market for, any publicly issued debt securities.

Market conditions may make it difficult to extend the maturity of or refinance our existing indebtedness and any failure to do so would have a material adverse effect on our business.

Our Credit Facility expires in August 2020. We utilize proceeds from the Credit Facility to make investments in our portfolio companies. The duration of many of our investments exceeds the duration of our indebtedness under our Credit Facility. This means that we will have to extend the maturity of our Credit Facility or refinance our indebtedness under our Credit Facility in order to avoid selling investments at maturity of the Credit Facility, at which time such sales may be at prices that are disadvantageous to us, which could materially damage our business. In addition, future market conditions may affect our ability to renew or refinance our Credit Facility on terms as favorable as those in our existing Credit Facility. If we fail to extend or refinance the indebtedness outstanding under our Credit Facility by the time it becomes due and payable, the administrative agent of the Credit Facility may elect to exercise various remedies, including the sale of all or a portion of the collateral securing the Credit Facility, subject to certain restrictions, any of which could have a material adverse effect on our business, financial condition and results of operations. The illiquidity of our investments may make it difficult for us to sell such investments. If we are required to sell our investments on short-term notice, we may not receive the value that we have recorded for such investments, and this could materially affect our results of operations.

We may in the future determine to fund a portion of our investments with preferred stock, which is another form of leverage and would magnify the potential for loss and the risks of investing in us.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. If we issue preferred securities they would rank senior to common stock in our capital structure. Payment of dividends on, and repayment of the liquidation preference of, such preferred stock would typically take preference over any dividends or other payments to our common stockholders. Also, preferred stockholders are not typically subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference. Furthermore, preferred stockholders would have separate voting rights and may have rights, preferences or privileges more favorable than those of our common stockholders. Also, the issuance of preferred securities could have the adverse effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for our common stockholders or otherwise be in your best interest.

Our interests in Funding I are subordinated.

We own 100% of the equity interests in Funding I. We consolidate Funding I in our Consolidated Financial Statements and treat the indebtedness of Funding I as our leverage. Our interests in Funding I (other than the management fees that the Investment Adviser has irrevocably directed to be paid to us) are subordinate in priority of payment to every other obligation of Funding I and are subject to certain payment restrictions set forth in the Credit Facility documents. We may receive cash distributions on our equity interests in Funding I only after it has made all (1) required cash interest and, if applicable, principal payments to the Lenders, (2) required administrative expenses and (3) claims of other unsecured creditors of Funding I. We cannot assure you that there will be sufficient funds available to make any distributions to us or that such distributions will meet our expectations.

Our equity interests in Funding I are subordinate to all of the secured and unsecured creditors, known or unknown, of Funding I, including the Lenders. Consequently, to the extent that the value of Funding I's portfolio of loan investments has been reduced as a result of conditions in the credit markets, defaulted loans, capital losses exceeding gains on the underlying assets, prepayments or changes in interest rates, the return on our investment in Funding I could be reduced. Accordingly, our investment in Funding I is subject to a complete risk of loss.

Table of Contents

We may not receive cash on our equity interests from Funding I.

Except for management fees that PennantPark Investment Advisers has irrevocably directed to be paid to us, we receive cash from Funding I only to the extent that we receive distributions on our equity interests in Funding I. Funding I may make equity distributions on such interests only to the extent permitted by the payment priority provisions of the Credit Facility. The Credit Facility generally provides that payments on such interests may not be made on any payment date unless all amounts owing to the Lenders and other secured parties are paid in full. In the event that we fail to receive cash from Funding I, we could be unable to make distributions to our stockholders in amounts sufficient to maintain our ability to be subject to tax as a RIC. We also could be forced to sell investments in portfolio companies at less than their fair value in order to continue making such distributions.

There are significant potential conflicts of interest which could impact our investment returns.

The professionals of the Investment Adviser and Administrator may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do or of investment funds managed by affiliates of us that currently exist or may be formed in the future. The Investment Adviser and Administrator may be engaged by such funds at any time and without the prior approval of our stockholders or our board of directors. Our board of directors monitors any potential conflict that may arise upon such a development. Accordingly, if this occurs, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of us or our stockholders. Currently, the executive officers and directors, as well as the current senior investment professionals of the Investment Adviser, may serve as officers and directors of our affiliated funds. In addition, we note that any affiliated investment vehicles currently formed or formed in the future and managed by the Investment Adviser or its affiliates may have overlapping investment objectives with our own and, accordingly, may invest in asset classes similar to those targeted by us. As a result, the Investment Adviser may face conflicts in allocating investment opportunities between us and such other entities. Although the Investment Adviser will endeavor to allocate investment opportunities in a fair and equitable manner, it is possible that, in the future, we may not be given the opportunity to participate in investments made by investment funds managed by the Investment Adviser or an investment manager affiliated with the Investment Adviser. In any such case, when the Investment Adviser identifies an investment, it is forced to choose which investment fund should make the investment. We may co-invest on a concurrent basis with any other affiliates that the Investment Adviser currently has or forms in the future, subject to compliance with applicable regulations and regulatory guidance, our exemptive relief and our allocation procedures.

In the ordinary course of our investing activities, we pay investment advisory and incentive fees to the Investment Adviser, and reimburse the Investment Adviser for certain expenses it incurs. As a result, investors in our common stock invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than an investor might achieve through direct investments. Accordingly, there may be times when the management team of the Investment Adviser has interests that differ from those of our stockholders, giving rise to a conflict.

We have entered into a license agreement, or the License Agreement, with PennantPark Investment Advisers, pursuant to which the Investment Adviser has agreed to grant us a royalty-free non-exclusive license to use the name PennantPark. The License Agreement will expire (i) upon expiration or termination of the Investment Management Agreement, (ii) if the Investment Adviser ceases to serve as our investment adviser, (iii) by either party upon 60 days written notice or (iv) by the Investment Adviser at any time in the event we assign or attempt to assign or sublicense the License Agreement or any of our rights or duties thereunder without the prior written consent of the Investment Adviser. Other than with respect to this limited license, we have no legal right to the PennantPark name.

In addition, we pay PennantPark Investment Administration, an affiliate of the Investment Adviser, our allocable portion of overhead and other expenses incurred by PennantPark Investment Administration in performing its obligations under the Administration Agreement, including rent and our allocable portion of the cost of our Chief Financial Officer and Chief Compliance Officer and their respective staffs. These arrangements may create conflicts of interest that our board of directors must monitor.

We may experience fluctuations in our quarterly results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in, and the timing of the recognition of, realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. However, as a result of our irrevocable election to apply the fair value option to our Credit Facility future decreases of fair value of our debt is expected to have a corresponding increase to our NAV. Similarly, future increases in the fair value of our debt may have a corresponding decrease to our NAV. Any future indebtedness that we elect the fair value option for may have similar effects on our NAV as our Credit Facility. This is expected to mitigate volatility in our earnings and NAV. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Table of Contents

Holders of any preferred stock that we may issue will have the right to elect members of the board of directors and have class voting rights on certain matters.

The 1940 Act requires that holders of shares of preferred stock must be entitled as a class to elect two directors at all times and to elect a majority of the directors if distributions on such preferred stock are in arrears by two years or more, until such arrearage is eliminated. In addition, certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock, including conversion to open-end status and, accordingly, preferred stockholders could veto any such changes in addition to any ability of common and preferred stockholders, voting together as a single class, to veto such matters. Restrictions imposed on the declarations and payment of distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies, might impair our ability to maintain our ability to be subject to tax as a RIC for U.S. federal income tax purposes, which could have a material adverse effect on our business, financial condition and results of operations.

We may in the future issue securities for which there is no public market and for which we expect no public market to develop.

In order to raise additional capital, we may issue debt or other securities for which no public market exists, and for which no public market is expected to develop. If we issue shares of our common stock as a component of a unit security, we would expect the common stock to separate from the other securities in such unit after a period of time or upon occurrence of an event and to trade publicly on the NASDAQ Global Select Market, which may cause volatility in our publicly traded common stock. To the extent we issue securities for which no public market exists and for which no public market develops, a purchaser of such securities may not be able to liquidate the investment without considerable delay, if at all. If a market should develop for our debt and other securities, the price may be highly volatile, and our debt and other securities may lose value.

If we issue preferred stock, debt securities or convertible debt securities the NAV and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock and/or debt securities would result in a higher yield or return to the holders of our common stock. The issuance of preferred stock, debt securities and/or convertible debt would likely cause the NAV and market value of our common stock to become more volatile. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of our common stock would be reduced or entirely eliminated. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to exceed the net rate of return on our portfolio, the use of leverage would result in a lower rate of return to the holders of common stock than if we had not issued the preferred stock or debt securities. Any decline in the NAV of our investment would be borne entirely by the holders of our common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in NAV to the holders of our common stock than if we were not leveraged through the issuance of preferred stock, debt securities or convertible debt. This decline in NAV would also tend to cause a greater decline in the market price for our common stock.

There is also a risk that, in the event of a sharp decline in the value of our net assets, we would be in danger of failing to maintain required asset coverage ratios or other covenants which may be required by the preferred stock, debt securities and/or convertible debt or risk a downgrade in the ratings of the preferred stock, debt securities and/or convertible debt or our current investment income might not be sufficient to meet the dividend requirements on the preferred stock or the interest payments on the debt securities. In order to counteract such an event, we might need to liquidate investments in order to fund redemption of some or all of the preferred stock, debt securities or convertible debt. In addition, we would pay (and the holders of our common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, debt securities, convertible debt or any combination of these securities. Holders of preferred stock, debt securities, convertible debt or any combination of these securities may have different interests than holders of common stock and may at times have disproportionate influence over our business.

The ability to sell investments held by Funding I is limited.

The Credit Facility places restrictions on the collateral manager's ability to sell investments. As a result, there may be times or circumstances during which the collateral manager is unable to sell investments or take other actions that might be in our best interests.

Table of Contents

The trading market or market value of any publicly issued debt or convertible debt securities may be volatile.

If we publicly issue debt or convertible debt securities, they initially will not have an established trading market. We cannot assure investors that a trading market for our publicly issued debt or convertible debt securities would develop or be maintained if developed. In addition to our creditworthiness, many factors may have a material adverse effect on the trading market for, and market value of, our publicly issued debt or convertible debt securities.

These factors include the following:

the time remaining to the maturity of these debt securities;

the outstanding principal amount of debt securities with terms identical or similar to these debt securities;

the supply of debt securities trading in the secondary market, if any;

the redemption, repayment or convertible features, if any, of these debt securities;

the level, direction and volatility of market interest rates; and

market rates of interest higher or lower than rates borne by the debt securities.

There also may be a limited number of buyers for our debt securities. This too may have a material adverse effect on the market value of the debt securities or the trading market for the debt securities. Our debt securities may include convertible features that cause them to more closely bear risks associated with an investment in our common stock.

Terms relating to debt redemption may have a material adverse effect on the return on any debt securities.

If we issue debt securities that are redeemable at our option, we may choose to redeem the debt securities at times when prevailing interest rates are lower than the interest rate paid on the debt securities. In addition, if the debt securities are subject to mandatory redemption, we may be required to redeem the debt securities at times when prevailing interest rates are lower than the interest rate paid on the debt securities. In this circumstance, a holder of our debt securities may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the debt securities being redeemed.

If we issue subscription rights or warrants for our common stock, your interest in us may be diluted as a result of such rights or warrants offering.

Stockholders who do not fully exercise rights or warrants issued to them in an offering of subscription rights or warrants to purchase our common stock should expect that they will, at the completion of an offering, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights or warrants. We cannot state precisely the amount of any such dilution in share ownership because we do not know what proportion of the common stock would be purchased as a result of any such offering.

In addition, if the subscription price or warrant exercise price is less than our NAV per share of common stock at the time of an offering, then our stockholders would experience an immediate dilution of the aggregate NAV of their shares as a result of the offering. The amount of any such decrease in NAV is not predictable because it is not known at this time what the subscription price, warrant exercise price or NAV per share will be on the expiration date of such rights offering or what proportion of our common stock will be purchased as a result of any such offering.

The impact of recent financial reform legislation on us is uncertain.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form N-2

In light of current conditions in the U.S. and global financial markets and the U.S. and global economy, legislators, the presidential administration and regulators have increased their focus on the regulation of the financial services industry. The Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act, became effective in 2010. Although many provisions of the Dodd-Frank Act have delayed effectiveness or will not become effective until the relevant federal agencies issue new rules to implement the Dodd-Frank Act, the Dodd-Frank Act may nevertheless have a material adverse impact on the financial services industry as a whole and on our business, financial condition and results of operations. Accordingly, we are continuing to evaluate the effect the Dodd-Frank Act or implementing its regulations will have on our business, financial condition and results of operations.

Changes in laws or regulations governing our operations or those of our portfolio companies may adversely affect our business.

We and our portfolio companies are subject to laws and regulation at the local, state and federal levels. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any change in these laws or regulations that govern our operations or those of our portfolio companies could have a material adverse effect on our business, financial condition and results of operations. See Regulation for more information.

Table of Contents

Our board of directors may change our investment objectives, operating policies and strategies without prior notice or stockholder approval.

Our board of directors has the authority to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval (except as required by the 1940 Act). However, absent stockholder approval, under the 1940 Act, we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and value of our stock. Nevertheless, the effects may adversely affect our business and impact our ability to make distributions.

We are subject to risks associated with cybersecurity and cyber incidents.

Our business relies on secure information technology systems. These systems are subject to potential attacks, including through adverse events that threaten the confidentiality, integrity or availability of our information resources (i.e., cyber incidents). These attacks could involve gaining unauthorized access to our information systems for purposes of misappropriating assets, stealing confidential information, corrupting data or causing operational disruption and result in disrupted operations, misstated or unreliable financial data, liability for stolen assets or information, increased cybersecurity protection and insurance costs, litigation and damage to our business relationships, any of which could have a material adverse effect on our business, financial condition and results of operations. As our reliance on technology has increased, so have the risks posed to our information systems, both internal and those provided by the Investment Adviser and third-party service providers.

RISKS RELATING TO THE ILLIQUID NATURE OF OUR PORTFOLIO ASSETS

We invest in illiquid assets, and our valuation procedures with respect to such assets may result in recording values that are materially different than the values we ultimately receive upon disposition of such assets.

All of our investments are recorded using broker or dealer quotes, if available, or at fair value as determined in good faith by our board of directors. We expect that most, if not all, of our investments (other than cash and cash equivalents) and the fair value of the Credit Facility will be classified as Level 3 under the Financial Accounting Standards Board, or FASB, Accounting Standards Codification, or ASC, Topic 820, Fair Value Measurements and Disclosures, or ASC 820. This means that the portfolio valuations will be based on unobservable inputs and our own assumptions about how market participants would price the asset or liability. We expect that inputs into the determination of fair value of our portfolio investments and Credit Facility borrowings will require significant management judgment or estimation. Even if observable market data are available, such information may be the result of consensus pricing information or broker quotes, which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by such a disclaimer materially reduces the reliability of such information. As a result, there will be uncertainty as to the value of our portfolio investments.

Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. In determining fair value in good faith, we generally obtain financial and other information from portfolio companies, which may represent unaudited, projected or pro forma financial information. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses; we are instead required by the 1940 Act to specifically fair value each individual investment on a quarterly basis. We record unrealized appreciation if we believe that our investment has appreciated in value. Likewise, we record unrealized depreciation if we believe that our investment has depreciated in value. We adjust quarterly the valuation of our portfolio to reflect our board of directors' determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded on our Consolidated Statements of Operations as net change in unrealized appreciation or depreciation.

All of our investments are recorded at fair value as determined in good faith by our board of directors. Our board of directors uses the services of nationally recognized independent valuation firms to aid it in determining the fair value of our investments. The factors that may be considered in fair value pricing of our investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and cash flows, the markets in which the portfolio company does business, comparison to publicly traded companies and other relevant factors. Because valuations may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the value received in an actual transaction. Additionally, valuations of private securities and private companies are inherently uncertain. Our NAV could be adversely affected if our determinations regarding the fair value of our investments were materially lower than the values that we ultimately realize upon the disposal of such investments.

The lack of liquidity in our investments may adversely affect our business.

We may acquire our investments directly from the issuer in privately negotiated transactions. Substantially all of these securities are subject to legal and other restrictions on resale or are otherwise less liquid than publicly traded securities. We typically exit our investments when the

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form N-2

portfolio company has a liquidity event such as a sale, refinancing, or initial public offering of the company, but we are not required to do so.

The illiquidity of our investments may make it difficult or impossible for us to sell such investments if the need arises, particularly at times when the market for illiquid securities is substantially diminished. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments, which could have a material adverse effect on our business, financial condition and results of operations. In addition, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we have material non-public information regarding such portfolio company.

Table of Contents

Investments purchased by us that are liquid at the time of purchase may subsequently become illiquid due to events relating to the issuer of the investments, market events, economic conditions or investor perceptions. Domestic and foreign markets are complex and interrelated, so that events in one sector of the world markets or economy, or in one geographical region, can reverberate and have materially negative consequences for other market, economic or regional sectors in a manner that may not be foreseen and which may materially harm our business.

A general disruption in the credit markets could materially damage our business.

We are susceptible to the risk of significant loss if we are forced to discount the value of our investments in order to provide liquidity to meet our debt maturities. Funding I's borrowings under its Credit Facility are collateralized by the assets in our investment portfolio. A general disruption in the credit markets could result in diminished demand for our securities. In addition, with respect to over-the-counter traded securities, the continued viability of any over-the-counter secondary market depends on the continued willingness of dealers and other participants to purchase the securities.

If the fair value of our assets declines substantially, we may fail to maintain the asset coverage ratio stipulated by the 1940 Act, which could, in turn, cause us to lose our status as a BDC and materially impair our business operations. Our liquidity could be impaired further by an inability to access the capital markets or to draw down Funding I's Credit Facility. These situations may arise due to circumstances that we may be unable to control, such as a general disruption in the credit markets, a severe decline in the value of the U.S. dollar, a sharp economic downturn or an operational problem that affects our counterparties or us, and could materially damage our business.

We may invest in over-the-counter securities, which have and may continue to face liquidity constraints, to provide us with liquidity.

The market for over-the-counter traded securities has and may continue to experience limited liquidity and other weakness as the viability of any over-the-counter secondary market depends on the continued willingness of dealers and other participants to purchase the securities.

RISKS RELATED TO OUR INVESTMENTS

Our investments in prospective portfolio companies may be risky, and you could lose all or part of your investment.

We intend to invest primarily in Floating Rate Loans, which may consist of senior secured debt and mezzanine debt, and, to a lesser extent, equity investments issued by U.S. middle-market companies.

1. ***Floating Rate Loans:*** The Floating Rate Loans we invest in are usually rated below investment grade or may also be unrated. Investments in Floating Rate Loans rated below investment grade are considered speculative because of the credit risk of their issuers. Such companies are more likely than investment grade issuers to default on their payments of interest and principal owed to us, and such defaults could reduce our NAV and income distributions. An economic downturn would generally lead to a higher default rate by portfolio companies. A Floating Rate Loan may lose significant market value before a default occurs and we may experience losses due to the inherent illiquidity of the investments. Moreover, any specific collateral used to secure a Floating Rate Loan may decline in value or become illiquid, which would adversely affect the Floating Rate Loan's fair value. Floating Rate Loans are subject to a number of risks, including liquidity risk and the risk of investing in below investment-grade, variable-rate securities. Floating Rate Loans are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to us, a reduction in the fair value of the investment and a potential decrease in our NAV. There can be no assurance that the liquidation of any collateral securing a Floating Rate Loan would satisfy the borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that the collateral could be readily liquidated. In the event of bankruptcy or insolvency of a borrower, we could experience delays or limitations with respect to our ability to realize the benefits of the collateral securing a Floating Rate Loan. The collateral securing a Floating Rate Loan may lose all or substantially all of its value in the event of the bankruptcy or insolvency of a borrower. Some loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the rights in collateral of such loans to presently existing or future indebtedness of the borrower or take other actions detrimental to the holders of loans including, in certain circumstances, invalidating such loans or causing interest previously paid to be refunded to the borrower. Either such step could materially negatively affect our performance.

We may acquire Floating Rate Loans through assignments or participations of interests in such loans. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the

Table of Contents

credit agreement with respect to such debt obligation. However, the purchaser's rights can be more restricted than those of the assigning institution, and we may not be able to unilaterally enforce all rights and remedies under an assigned debt obligation and with regard to any associated collateral. A participation typically results in a contractual relationship only with the institution participating out the interest and not directly with the borrower. Sellers of participations typically include banks, broker-dealers, other financial institutions and lending institutions. In purchasing participations, we generally will have no right to enforce compliance by the borrower with the terms of the loan agreement against the borrower, and we may not directly benefit from the collateral supporting the debt obligation in which we have purchased the participation. As a result, we will be exposed to the credit risk of both the borrower and the institution selling the participation. Further, in purchasing participations in lending syndicates, we will not be able to conduct the same level of due diligence on a borrower or the quality of the Floating Rate Loan with respect to which we are buying a participation as we would conduct if we were investing directly in the Floating Rate Loan. This difference may result in us being exposed to greater credit or fraud risk with respect to such Floating Rate Loans than we expected when initially purchasing the participation.

2. **Senior Secured Debt:** When we extend senior secured debt, which we define to include first lien debt, we will generally take a security interest in the available assets of these portfolio companies, including the equity interests of their subsidiaries, although this may not always be the case. We expect this security interest, if any, to help mitigate the risk that we will not be repaid. However, there is a risk that the collateral securing our loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of the portfolio company to raise additional capital. Also, in some circumstances, our lien could be subordinated to claims of other creditors. In addition, deterioration in a portfolio company's financial condition and prospects, including its inability to raise additional capital, may be accompanied by deterioration in the value of the collateral for the loan. Consequently, the fact that a senior secured debt investment is secured does not guarantee that we will receive principal and interest payments according to the loan's terms, or at all, or that we will be able to collect on the loan should we be forced to enforce our remedies.
3. **Mezzanine Debt:** Our mezzanine debt investments, which we define to include second lien secured and subordinated debt, will generally be subordinated to senior secured debt and will generally be unsecured. Our second lien debt is subordinated debt that benefits from a collateral interest in the borrower. As such, other creditors may rank senior to us in the event of insolvency. This may result in an above average amount of risk and volatility or a loss of principal. These investments may involve additional risks that could adversely affect our investment returns. To the extent interest payments associated with such debt are deferred, such debt may be subject to greater fluctuations in valuations, and such debt could subject us and our stockholders to non-cash income. Since we may not receive cash interest or principal prior to the maturity of some of our mezzanine debt investments, such investments may be of greater risk than cash paying loans.

Table of Contents

4. **Equity Investments:** We have made and expect to continue to make select equity investments, all of which are subordinated to debt investments. In addition, when we invest in senior secured debt or mezzanine debt, we may acquire warrants to purchase equity investments from time to time. Our goal is ultimately to dispose of these equity investments and realize gains upon our disposition of such interests. However, the equity investments we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity investments, and any gains that we do realize on the disposition of any equity investments may not be sufficient to offset any other losses we experience. In addition, many of the equity securities in which we invest may not pay dividends on a regular basis, if at all. Furthermore, we may hold equity investments in partnerships through a taxable subsidiary for federal income tax purposes. Upon sale or exit of such investments, we may pay taxes at regular corporate tax rates, which will reduce the amount on gains or dividends available for distributions to our stockholders.

In addition, investing in middle-market companies involves a number of significant risks, including:

companies may be highly leveraged, have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees we may have obtained in connection with our investment;

they typically have shorter operating histories, more limited publicly available information, narrower product lines, more concentration of revenues from customers and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and changing market conditions, as well as general economic downturns;

they are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

they generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, our executive officers, directors and our Investment Adviser may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies; and

they may have difficulty accessing the capital markets to meet future capital needs, which may limit their ability to grow or to refinance their outstanding indebtedness upon maturity.

Under the 1940 Act we may invest up to 30% of our assets in investments that are not qualifying assets for BDCs. If we do not invest a sufficient portion of our assets in qualifying assets, we could be precluded from investing in assets that we deem to be attractive.

As a BDC, we may not acquire any asset other than qualifying assets, as defined under the 1940 Act, unless at the time the acquisition is made such qualifying assets represent at least 70% of the value of our total assets. Qualifying assets include investments in U.S. operating companies whose securities are not listed on a national securities exchange and companies listed on a national securities exchange subject to a maximum market capitalization of \$250 million. Qualifying assets also include cash, cash equivalents, government securities and high quality debt securities maturing in one year or less from the time of investment.

We believe that most of our debt and equity investments do and will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets at the time of a proposed investment, we will be prohibited from making any additional investment that is not a qualifying asset and could be forced to forgo attractive investment opportunities. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to comply with the 1940 Act. If we need to dispose of such investments quickly, it would be difficult to dispose of such investments on favorable terms. For example, we may have difficulty in finding a buyer and, even if we do find a buyer, we may have to sell the investments at a substantial loss.

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we generally are not limited with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer, excluding

limitations on investments in other investment companies. To the extent that we assume large positions in the securities of a small number of issuers, our NAV may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market's assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond our income tax diversification requirements, we do not have fixed guidelines for portfolio diversification, and our investments could be concentrated in relatively few portfolio companies or industries.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic or industry centric slowdowns or recessions and may be unable to repay debt from us during these periods. Therefore, our non-performing assets are likely to increase, and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions also may decrease the value of collateral securing some of our debt investments and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a material decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and materially harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and potential termination of its debt and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company, and any restructuring could further cause adverse effects on our business. Depending on the facts and circumstances of our investments and the extent of our involvement in the management of a portfolio company, upon the bankruptcy of a portfolio company, a bankruptcy court may recharacterize our debt investments as equity investments and subordinate all or a portion of our claim to that of other creditors. This could occur regardless of how we may have structured our investment. In addition, we cannot assure you that a bankruptcy court would not take actions contrary to our interests.

If we fail to make follow-on investments in our portfolio companies, this could materially impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in order to:

increase or maintain in whole or in part our equity ownership percentage;

exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or

attempt to preserve or enhance the value of our investment.

We have the discretion to make any follow-on investments, subject to the availability of capital resources and regulatory considerations. We may elect not to make follow-on investments or otherwise lack sufficient funds to make those investments. Any failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful transaction or business. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with BDC requirements or the desire to maintain our RIC tax status.

Because we do not generally hold controlling equity interests in our portfolio companies, we are not in a position to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

Because we do not generally have controlling equity positions in our portfolio companies, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and the stockholders and management of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity for the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company, and may therefore suffer a decrease in the market value of our investments.

Table of Contents

An investment strategy focused primarily on privately held companies, including controlling equity interests, presents certain challenges, including the lack of available or comparable information about these companies, a dependence on the talents and efforts of only a few key portfolio company personnel and a greater vulnerability to economic downturns.

We have invested and intend to continue to invest primarily in privately
