WisdomTree Emerging Markets Consumer Growth Fund – EMCG (NASDAQ)

Summary Prospectus – August 1, 2018, as amended October 19, 2018

Before you invest in the Fund, as defined below, you may want to review the Fund’s prospectus and statement of additional information (“SAI”), which contain more information about the Fund and the risks of investing in the Fund. The Fund’s current prospectus and SAI are incorporated by reference into this summary prospectus. You can find the Fund’s prospectus and SAI, as well as other information about the Fund, online at [www.wisdomtree.com/resource-library/prospectus-regulatory-reports](http://www.wisdomtree.com/resource-library/prospectus-regulatory-reports). You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to [getinfo@wisdomtree.com](mailto:getinfo@wisdomtree.com).

Investment Objective

The WisdomTree Emerging Markets Consumer Growth Fund (the “Fund”) seeks income and capital appreciation.

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.63%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.63%
Fee Waivers	(0.31)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.32% <sup>1</sup>

<sup>1</sup> WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.32% through July 31, 2019, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 33	\$ 170	\$ 320	\$ 757

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 63% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

### Principal Investment Strategies of the Fund

The Fund, an exchange traded fund, is actively managed using a model-based approach.

The Fund seeks to achieve its investment objective by investing primarily in consumer growth stocks in emerging markets that provide the best combined rank of growth, quality, and valuation characteristics. The Fund's investment adviser, WisdomTree Asset Management, Inc., using a disciplined model-based process focused on a long-term approach to investing, seeks to identify consumer stocks that benefit from long-term growth in emerging market economies. WisdomTree Asset Management believes screening equity securities by fundamental attributes of corporate profitability and valuation can improve long-term returns. At a minimum, the Fund's portfolio will be reconstituted and rebalanced annually, although a more active approach may be taken depending on such factors as market conditions and investment opportunities, and the number of holdings in the Fund may vary. The Fund's portfolio may be actively traded in an attempt to achieve its investment objective, which may include frequent trading and may cause the Fund to have an increased portfolio turnover rate.

The Fund may invest in large-, mid-, and small-capitalization companies in any sector. As of October 10, 2018, a significant portion of the Fund was invested in companies in the communication services, consumer discretionary, consumer staples and information technology sectors.

### Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on, or have exposure to, foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Capital Controls and Sanctions Risk.** Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

Cash Redemption Risk. The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

Communication Services Sector Risk. The Fund currently invests a significant portion of its assets in the communication services sector, and therefore the Fund's performance could be negatively impacted by events

affecting this sector. The communication services sector consists of companies that facilitate communication and offer content and information through various types of media. These companies include, for example, telecom companies, such as wireless and fixed-line telecommunications service providers, media companies, such as broadcasters, advertisers, publishers, cable and satellite companies, and companies in the movie industry, and other companies that provide internet software, on-line services, social media platforms, video games, and digital entertainment. This sector can be significantly affected by, among other things, government intervention and regulation, technological innovations that make existing products and services obsolete, and consumer demand.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile and retail companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Consumer Staples Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global and economic conditions.

**Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may also change quickly, unpredictably, and without warning, and you may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in China, Korea and Mexico, although this may change from time to time.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of such countries or regions) that

have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Growth Investing Risk.** Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on the future expectations of the economy and the stock's issuing company.

**Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Management Risk.** The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will be successful or that the Fund will achieve its investment objective.

**Mid-Capitalization Investing Risk.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Models and Data Risk.** While the Fund is actively managed, the Fund's investment process is expected to be heavily dependent on quantitative models and the models may not perform as intended. Errors in data used in the models may occur from time to time and may not be identified and/or corrected, which may have an adverse impact on the Fund and its shareholders.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Portfolio Turnover Risk.** The Fund's investment strategy may result in a high portfolio turnover rate. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and the distribution of additional capital gains, which generate greater tax liabilities for shareholders. These factors may negatively affect the Fund's performance.

**Small-Capitalization Investing Risk.** The Fund may invest in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

#### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns,

both before and after taxes. This table also shows how the Fund's performance compares to the WisdomTree Emerging Markets Consumer Growth Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com). The Fund's objective changed effective October 19, 2018. Prior to October 19, 2018, Fund performance reflects the investment objective of the Fund when it tracked the performance, before fees and expenses, of the WisdomTree Emerging Markets Consumer Growth Index.

The Fund's year-to-date total return as of June 30, 2018 was (14.00)%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return	Quarter/Year
Highest Return 12.15%	1Q/2017
Lowest Return (20.46)%	3Q/2015

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2017

	1 Year	Since Inception September 27, 2013
WisdomTree Emerging Markets Consumer Growth Fund*	35.17%	3.88%
Return Before Taxes Based on NAV	34.65%	3.42%
Return After Taxes on Distributions	20.37%	2.98%
Return After Taxes on Distributions and Sale of Fund Shares	35.97%	4.65%
WisdomTree Emerging Markets Consumer Growth Index (Reflects no deduction for fees, expenses or taxes)	37.28%	5.92%
MSCI Emerging Markets Index (Reflects no deduction for fees, expenses or taxes)		

\* The Fund's objective changed effective October 19, 2018. Prior to that date, the Fund sought to track the price and yield performance, before fees and expenses, of the WisdomTree Emerging Markets Consumer Growth Index.

#### Management

##### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as investment adviser to the Fund. BNY Mellon Asset Management North America Corporation (the "Sub-Adviser") serves as sub-adviser to the Fund.

WisdomTree Trust Prospectus 5

### Portfolio Managers

The Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Index Portfolio Management, has been a portfolio manager of the Fund since its inception in September 2013.

Richard A. Brown, CFA, a Managing Director, Co-Head of Equity Index Portfolio Management and Senior Portfolio Manager, has been a portfolio manager of the Fund since its inception in September 2013.

Thomas J. Durante, CFA, a Managing Director, Co-Head of Equity Index Portfolio Management and Senior Portfolio Manager, has been a portfolio manager of the Fund since its inception in September 2013.

### Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NASDAQ, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
