Personnel Cost	The increase in personnel cost in the comparison between 4Q05 and 3Q05 is a result of the application of salary adjustments pursuant to the November/2005 collective bargaining agreement, impacting on the year s provisions and adjustment to benefits. The 5.9% growth registered in 2005 as compared to 2004 is due to the collective bargaining and to an adjustment in headcount.
Cost of Services Rendered	The increase of 9.4% in the cost of services rendered in 4Q05, when compared to 4Q04 and of 15.9% in the accumulated total for 2005 in relation to 2004, due to the increase in Fistel and other fees and contributions in the periods reviewed and is caused by the equalization of TCO s accounting criteria with those of the other Group Companies, and is also due to the increase of costumer base. Contributed to such growth as well, the increase in third-party services, especially in public utilities and plant maintenance.
Cost of Goods Sold	Cost of goods sold decreased by 23.4% in relation to 4Q04 and 8.5% when compared to the accumulated total for 2005 in relation to 2004, mostly due to the decrease in the number of activated handsets, reduced costs and handset mix, as a result of the market conditions.

TELESP CELULAR PARTICIPAÇÕES S.A.

Selling Expenses

In 4Q05, selling expenses increased by 45.8% in relation to 4Q04 and by 41.1% in the comparison between the accumulated totals for 2005 and 2004, caused by an increase in expenses with third-party services, especially publicity, commissions, and post-sale client care, related to the increase in the total customer base recorded in 2005, as well as the increase in the costs with regular rendering of services and customer loyalty.

The Provision for Bad Debt PBD recorded the amount of R\$ 254.8 million in 4Q05 and R\$ 569.9 million in the year 2005.

In addition to the effect from adjustments in the recognition of the acquisition of customers, it must be mentioned that the company provisioned revenue from receivables of calls made through the networks of other operators. Such values, according to the present regulation are obligatorily paid to the cited operators, independently of recognition of such calls from our clients. It must be said that structural measures and process actions have been adopted, including substitution of systems and certification of analog networks and TDMA of other operators to substantially reduce said expenses.

Disregarding the above mentioned effects, we estimate that the PDD would have recorded R\$ 87.4 million for 4Q05 and R\$ 324.6 million for year 2005, in line with the business evolution.

General and Administrative Expenses

General and administrative expenses recorded 178.2% increase in relation to 4Q04, due to the increase in expenses with third-party services, especially labor, plant and systems maintenance. The 5.6% increase in the accumulated total for 2005 over 2004 is especially caused by the increase in expenses with third-party services, mainly in data processing and plant maintenance.

Other Operating Revenues/

Expenses

The 4Q05 recorded a reduction of 36.4% in its revenues when compared to the same period of the previous year due to the increase in expenses with the contingencies provision and to the reduction in the revenue arising out of commercial incentives. The 13.0% variation between the accumulated total for 2005 and 2004 is due to the increase in expenses with taxes and contingency provisions, offset by the increase in the revenue from commercial incentives.

Depreciation and Amortization

Depreciation and amortization expenses increased by 15.6% in the 4Q05 in relation to 4Q04 due to investments effected and the activation of assets due to the conclusion of works. In 2005 had begun the goodwill amortization of Global Telecom S/A.

Financial Revenues (Expenses)

TCP s net financial expense in 4Q05 increased by R\$ 14.7 million when compared to 3Q05, despite the positive effect in the reduction of the interest rate of the period (4.74% in 3Q05 and 4.31% in 4Q05). Such variation was caused, mainly, by the assessment of Pis/Cofins of R\$ 15.3 million in the Interest on Own Capital in December 2005 in one of its controlled companies (R\$ 6.1 million in 3Q05) and the non-recurrent positive effect in 3Q05 obtained in the advanced payment of the tax incentive with the State of Goiás Treasury Department (Teleproduzir). Another negative effect in 4Q05 was the increase in the monetary adjustment assessed on contingency (Telebrás spin-off) and tax incentives (Paraná Mais Empregos).

In the comparison of the accumulated total for 2005 over the same period of 2004, TCP reduced its net financial expense by R\$ 177.7 million, mainly due to the reduction of spreads obtained upon renewals of financial transactions, which offset the increase in interest rates in the period (actual CDI of 16.17% in 2004 against 19.0% in 2005).

In consequence of the application of the TCP s hedge policy, for protection against foreign exchange volatility, the company has provided coverage of 100% of the debt exposure, in such a manner that the final cost of the foreign exchange debt (R\$ 3,219.8 million) together with the derivative (swap) is now referenced in reais (CDI: 4.31% in 4Q05). The result of the foreign exchange debt and derivative is evidenced, mainly, in the sum of gains with derivatives of R\$ 37.9 million and losses with foreign exchange variation of R\$ 160.0 million.

Net Result

The loss recorded in 4Q05 was R\$ 318.0 million, and in the accumulated total for the year was R\$ 909.2 million.

Indebtedness On December 31, 2005, TCP s debts related to loans and financings amounted to R\$ 5,193.0 million (R\$ 4,949.9 million on September 30, 2005), 62% of which is nominated in foreign currency. The Company has signed

^(**) UMBND - prepared by the BNDES, it is a basket of foreign currencies unit, US dollar predominant

exchange rate hedging contracts thus protecting 100% of its financial debt against foreign exchange volatility, so that the final cost (debt and swap) is reais-referenced. This debt was offset by cash and financial investments (R\$ 1,022.1 million) and by derivative assets and liabilities (R\$ 310.1 million payable) resulting in a net debt of R\$ 4,481.0 million, a 4.1% increase in relation to September 2005.

The increase in TCP s net debt in 4Q05 in relation to 3Q05 in the amount of R\$ 176 million is due, mainly, to the reduction in the net cash position of its controlled company TCO as a result of payments effected in December 2005 referring to Interest on Own Capital for fiscal year 2004, Interim Dividends for fiscal year 2005, and postponement of the maturity date of some postpaid cycles, in addition to the increase in controlling TCP on account of the carrying cost of its debt.

Short-term debt represented 29.8% of total debt at December 31, 2005 (33.1% in September 2005).

Capital Market

Corporate Restructuring

The managements of Telesp Celular Participações S.A. (TCP), Tele Centro Oeste Celular Participações S.A. (TCO), Tele Sudeste Celular Participações S.A. (TSD), Tele Leste Celular Participações S.A. (TLE) and Celular CRT Participações S.A. (CRTPart) (Companies), in the form and for the purposes of CVM Instructions no. 319/99 and 358/02, informed to the public that their respective Boards of Directors, approved the proposal to be submitted to the shareholders of the Companies, of a corporate restructuring for transfer of TCO shares to TCP for conversion of TCO into a wholly-owned subsidiary of TCP and the merger of TSD, TLE, and CRTPart into TCP (Corporate Restructuring).

The managements of TCP, TCO, TSD, TLE and CRTPart consider that the Corporate Restructuring, with the consequent concentration of the shareholders of the Companies in one sole publicly-held company and the transfer of TCO s shares and of the respective equity of TSD, TLE, and CRTPart to TCP, with the consequent extinguishment of the mergees, will simplify the present organizational structure, by reducing costs and increasing the equity value for the shareholders, allow their shareholders to hold interest in a company with higher liquidity in the Brazilian and foreign stock exchanges, and make easier the unification, standardization and rationalization of the general management of TCP s, TCO s, TSD s, TLE s and CRTPart s businesses, allowing enhanced synergies among the referred Companies, which, either directly or through the respective operators controlled by them, already use VIVO brand.

In the Shareholders Meeting of TCP, TCO, TSD, TLE and CRTPart held on February 22, 2006, the Corporate Restructure was duly approved and Telesp Celular Participações will be named VIVO PARTICIPAÇÕES S.A.

Operating Highlights of Telesp Celular (TC)

Continued market leadership as a result of the increase in the **customer base** by 13.5% over 4Q04, reaching 10,476 thousand customers, despite the strong competition in the wireless telephony market.

Total **net additions** of **postpaid** customers grew 33.6% when compared to the same period of the previous year, reflecting, once again, the results of commercial actions carried out by the Company, especially focused on this segment, where competition is stronger.

SAC decreased by 9.4% and 8.8% in relation to 3Q05 and 4Q04, respectively, as a result of the reduction in the total subsidy. Customer retention efforts continued, at the same time, especially with respect to medium and high end customers.

The **blended ARPU** of R\$ 32.7 recorded a 6.3% increase in relation to 3Q05, caused, among other factors, by the increase in the outgoing ARPU. The 5.9% reduction in relation to 4Q04 is basically due to the reduction in the inbound ARPU, due to the reduction in the fixed-mobile traffic.

Postpaid MOU increased by 4.7% in relation to 4Q04, mainly reflecting the increase in the outgoing MOU of the post-paid customer base. Total MOU was impacted by the change in the customer mix, with slight increase in

the prepaid customer base, reminding that the prepaid MOU is impacted by the reduction in the fixed-mobile incoming traffic.

Highlights of Global Telecom (GT)

Increase in the **customer base** by 12.8% over 4Q04 and by 3.0% over 3Q05, recording 2,910 thousand customers, with emphasis to the 23.0% growth in the postpaid customer base in relation to 4Q04, representing 20.8% of the acquisition mix in the accumulated total for 2005, within a competitive environment.

SAC decreased by 18.8% in relation to 3Q05, due to decrease in the total subsidy. In relation to 4Q04, the 7.5% increase is a result of the increase in expenses with commissions, publicity and subsidy in the postpaid segment, partially offset by a reduction in the prepaid subsidy.

The **blended ARPU** of R\$ 20.9 recorded an increase of 6.5% in relation to the previous quarter, caused, among other factors, by an increase in the outgoing ARPU. The 10.7% increase in the postpaid ARPU in relation to 4Q04 offset the reduction of 6.8% in the total ARPU, mainly due to the reduction in the inbound ARPU and reduction in the fixed-mobile traffic.

The **post-paid MOU** increased by 8.9% in relation to 4Q04 and by 4.5% in the comparison between the accumulated total for 2005 and 2004, caused by the increase in the outgoing MOU of the post-paid segment. Total MOU was impacted by the reduction in the pre paid MOU, which is affected by the decrease in the inbound fixed-mobile traffic.

Consolidated

Continued market leadership as a result of the increase in the customer base by 17.1% in the last 12 months, with 2.6% growth of the prepaid customer base, despite strong competition.

TCO s

Operating

Highlights

SAC decreased by 18.9% and 17.6% in the comparison between 4Q04 and 3Q05, respectively, as a result of the reduction in the total subsidy, however continuing with the customer retention efforts, specially the medium and high end ones.

The postpaid ARPU of R\$ 86.8 increased by 5.3% in relation to 4Q04, due to the increase in the outgoing ARPU, despite the change in the customer mix. In the year over year, the 0.6% reduction was mainly due to a drop in the inbound ARPU. The **blended ARPU** of R\$ 24.6 recorded a 19.0% increase over 2004, reflecting a decrease

in the prepaid ARPU, due, among other factors, to the outgoing traffic and the MOU of the prepaid.

The **post-paid MOU** increased by 6.2% and 5.6% in relation to the accumulated total for 2005 and 4Q04, respectively, due to the increase in the post-paid outgoing MOU. On the other hand, the total MOU was impacted by the changes in the customer mix, once the prepaid MOU is impacted by the reduction in the fixed-mobile inbound traffic.

Operating

Maintenance of market leadership as a result of the increase in the **customer base** by 5.3% in relation to 4Q04, reaching 3,387 thousand customers, with 5.2% growth in the post-paid customer base in the same period.

Highlights

SAC decreased by 17.5% in relation to the 3Q05 due to lower expenses with subsidies. The 11.5% increase over 4Q04 is due to the increase in expenses with commissions, publicity and subsidy in the postpaid segment, partially offset by lower subsidies in the prepaid segment.

The **postpaid ARPU**, in the amount of R\$ 65.9, down 1.3% in relation to 2004, is impacted by the partial Bill & Keep effect and by the customer profile adequacy programs, such as Vivo Ideal, client care and customer loyalty campaigns. The blended ARPU, in the amount of R\$ 26.3, recorded a 9.5% reduction in relation to 2004, reflecting

a reduction in the prepaid ARPU, due to the outgoing traffic and the MOU of such segment among other factors

Postpaid MOU increased by 1.1% in 2005, due to the increase in the outgoing MOU, offsetting the 14.8% reduction in the **Total MOU** in relation to 2004, affected by the drop in the prepaid outgoing MOU. It must be reminded that the prepaid MOU is impacted by the reduction in fixed-mobile inbound traffic.

Net Services Revenue

The net services revenue grew 7.7% in 2005, when compared to 2004, recording R\$ 256.6 million in the quarter and R\$ 1,052.1 million in the 2005 figures. Such result is consequence of the increase in the customer base (keeping the mix), partially offset by the effects of profile adequacy procedures, such as Vivo Ideal and customer loyalty campaigns.

Regarding the 7.7% growth in the net service revenue, it must be highlighted that subscription and usage revenue recorded a 21.6% increase over 2004, and 16.1% over the 4Q04, due to the increase in the total traffic, specially impelled by the outgoing traffic. In the compounded service revenue, this increase was partially offset by a reduction in the inbound traffic revenue, as a result of the transition from fixed-to-mobile traffic to mobile-to-mobile traffic, with consequent drop in interconnection revenue and the partial Bill & Keep effect.

Data revenues in 4Q05 were up 14.5% in the year-to-year comparison, representing 8.7% of the net service revenues (7.5% in 4Q04) and for the year it grew 43.4%, representing 8.9% of net service revenue. This increase has continued to occur due to a more widespread access and use of such services, in addition to the several services launched on the market and the increase in the customer base. The SMS accounted for 70.1% of data revenues in 4Q05. Average number of SMS messages sent per month in 2005 was approximately 23.6 million.

Personnel Cost

The increase in personnel cost in the comparison between 4Q05 and 3Q05 is due to the application of salary adjustments caused by the collective bargaining agreement in November/2005, impacting on the provisions for the year and benefit adjustments. The 3% growth registered in 2005 as compared to 2004 is due to the collective bargaining in 2004, counterbalanced by adjustments in headcount.

Cost of Services Rendered The 22.0% increase in the cost of services rendered in relation to 4Q04 is a result of the increase in the Fistel Fee due to increase in the average customer base by 11.0%, increase in expenses with outsourced services, specially in connection with plant maintenance and electric power, increase in network sites rental (CDMA implementation in TDMA areas), and increase of coverage area. In relation to the year-to-date figures, the 17.1% increase in 2005 was caused by the increase in the Fistel Fee due to the increase in the average customer base by 16%, interconnection costs (network and transmission elements), outsourced services, as well as property lease and data circuits.

6

CELULAR CRT PARTICIPAÇÕES S.A.

Cost of Goods Sold

Cost of goods sold in 2005 decreased by 25.8% over 2004 and 45.8% over 4Q04, due to the decreased number of activated handsets, better cost structure and handset mix, partially offset by the incentive to change TDMA terminals for CDMA terminals.

Selling Expenses

In 4Q05, selling expenses recorded a 26.9% increase over 4Q04, caused by an increase in expenses with third-party services, especially the ones associated to publicity, commissions, and post-sale client care, impacting the SAC, which recorded 11.5% growth over 4Q04, which, on its turn, was impelled by the postpaid service (related to increase of total customer base recorded in 2005). In the full year 2005, the 42.4% growth is due to increase in expenses with third-party services.

The Provision for Bad Debt PBD recorded the amount of R\$ 19.7 million in 4Q05 and R\$ 50.8 million in the year 2005.

In addition to the effect from adjustments in the recognition of the acquisition of customers, it must be mentioned that the company provisioned revenue from receivables of calls made through the networks of other operators. Such values, according to the present regulation are obligatorily paid to the cited operators, independently of recognition of such calls from our clients. It must be said that structural measures and process actions have been adopted, including substitution of systems and certification of analog networks and TDMA of other operators to substantially reduce said expenses.

Disregarding the above mentioned effects, we estimate that the PDD would have recorded R\$ 17.4 million for 4Q05 and R\$ 38.6 million for year 2005, in line with the business evolution.

General and Administrative Expenses In the 4Q05, the 15.5% reduction in general and administrative expenses in comparison to 4Q04 is due to the reduction in the expenses with third-party services, especially public utilities. In the 2005 year-to-date figure, the 2.7% increase over 2004 is due to the increase in the lease costs.

Other Operating Revenues / Expenses In 4Q05, the 51.2% reduction in relation to 4Q04 is due to an extraordinary effect that increased the amount in the 4Q04. In the 2005 the 55.7% reduction in relation to 2004 is due to a non-recurring adjustment in the reversal of the provision in the amount of R\$ 14.5 million effected in 2004.

Depreciation and Amortization Depreciation and amortization expenses totaled R\$ 57.7 million in the 4Q05 and R\$ 221.3 million in 2005, representing 8.5% and 7.7% increases, respectively, due to the investments, especially in the CDMA overlay network, as well as the addition caused by the increase resulting from new asset activations due to the conclusion of the works.

Financial Revenues

The net financial revenues of CRT Part in 4Q05 were lower by R\$ 7.7 million when compared to 3Q05, specially due to the reduction in the interest rate earned on its net cash position (actual CDI of 4.74% in 3Q05 compared to 4.31% in 4Q05), as well as to the PIS/Cofins expense (R\$ 3.2 million) ascertained on the basis of the allocation of the Interest on Own Capital referring to fiscal year 2005 which was paid in December.

In the comparison of the accumulated total for 2005 with the same period of 2004, CRT Part recorded an increase in the net financial revenue, mainly due to an increase in the rate of the actual CDI earned for the period on its net cash position (16.17% in 2004 against 19.0% in 2005).

Net Profit

The net profit in 4Q05 was R\$ 26.2 million. The accumulated total for the year was R\$ 129.3 million.

Corporate Restructuring

The managements of Telesp Celular Participações S.A. (TCP) and Celular CRT Participações S.A. (CRTPart), in the form and for the purposes of CVM Instructions no. 319/99 and 358/02, informed to the public that their respective Boards of Directors, on December 04, 2005, approved the proposal to be submitted to the shareholders of the Companies, of a corporate restructuring for merger of CRTPart into TCP.

The managements of TCP and CRTPart consider that the Corporate Restructuring, with the consequent concentration of the shareholders of both Companies and of CRTPart s equity in one sole publicly-held company, with consequent extinguishment of CRTPart, will simplify the present organizational structure, by reducing costs and increasing the equity value for the shareholders, allow their shareholders to hold interest in a company with higher liquidity in the Brazilian and foreign stock exchanges, and make easier the unification, standardization and rationalization of the general management of TCP s and CRTPart s businesses, allowing enhanced synergies between the referred Companies, which, either directly or through the respective operators controlled by them, already use VIVO brand.

In the Shareholders Meeting of TCP and CRT Part, held on February 22, 2006, the Corporate Restructure was duly approved and Telesp Celular Participações will be named VIVO PARTICIPAÇÕES S.A.
