Adjusted EBITDA is net income before interest, income taxes, depreciation and amortization, nonrecurring adjustments to cost of sales, nonrecurring adjustments to SG&A, restructuring and impairment charges, nonrecurring adjustments to miscellaneous income and expense and is adjusted to remove the EBITDA attributable to substantially all of the Specialty Plastics business, which was sold on July 1. Adjustments are primarily comprised of restructuring and impairment charges, gains and losses on sales of assets and businesses and the impact of the mark to market pension adjustment recorded in the fourth quarter of 2013. We believe this data provides investors with additional information on the underlying operations of the business and enables period-to-period comparability of financial performance. In addition, these measures are used in the calculation of certain incentive compensation programs for selected employees.
