FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the period ended September 30, 2015

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from ____ to ____

Commission file number: 001-35913

TRISTATE CAPITAL HOLDINGS, INC.
(Exact name of registrant as specified in its charter)

Pennsylvania
(State or other jurisdiction of incorporation or
organization)

20-4929029
(I.R.S. Employer Identification No.)

One Oxford Centre
301 Grant Street, Suite 2700
Pittsburgh, Pennsylvania 15219
(Address of principal executive offices)
(Zip Code)

(412) 304-0304
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Edgar Filing: TriState Capital Holdings, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of October 23, 2015, there were 28,027,695 shares of the registrant's common stock, no par value, outstanding.

TRISTATE CAPITAL HOLDINGS, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

[1] SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

NATURE OF OPERATION

TriState Capital Holdings, Inc. ("we", "us", "our" or the "Company") is a registered bank holding company pursuant to the Bank Holding Company Act of 1956, as amended. The Company has three wholly-owned subsidiaries: TriState Capital Bank (the "Bank"), a Pennsylvania-chartered state bank; Chartwell Investment Partners, LLC ("Chartwell"), a registered investment advisor; and Chartwell TSC Securities Corp. ("CTSC Securities"), which is applying to be registered as a broker/dealer with the Securities and Exchange Commission ("SEC") and Financial Industry Regulatory Authority ("FINRA"). Chartwell was established through the acquisition of substantially all the assets of Chartwell Investment Partners, LP, which was effective March 5, 2014.

The Bank was established to serve the commercial banking and private banking needs of middle-market businesses and high-net-worth individuals. Chartwell provides investment management services to institutional, sub-advisory, and separately managed account clients. CTSC Securities was capitalized in May 2014, with a primary business of facilitating distribution and marketing efforts for the proprietary investment products provided by Chartwell, including shares of mutual funds advised and/or administered by Chartwell and private funds advised and/or administered by Chartwell.

Regulatory approval was received and the Bank commenced operations on January 22, 2007. The Company and the Bank are subject to regulatory examination by the Federal Deposit Insurance Corporation ("FDIC"), the Pennsylvania Department of Banking and Securities, and the Federal Reserve. Chartwell is a registered investment advisor regulated by the SEC. CTSC Securities, once registered, will be a broker/dealer regulated by the SEC and FINRA.

The Bank conducts business through its main office located in Pittsburgh, Pennsylvania, as well as its four additional representative offices in Cleveland, Ohio; Philadelphia, Pennsylvania; Edison, New Jersey; and New York, New York. Chartwell conducts business through its office located in Berwyn, Pennsylvania and CTSC Securities will conduct business through its office located in Pittsburgh, Pennsylvania.

USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles ("GAAP") in the United States of America requires management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities, disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of related revenue and expense during the reporting period. Although our current estimates contemplate current conditions and how we expect them to change in the future, it is reasonably possible that actual conditions could be worse than those anticipated in the estimates, which could materially affect the financial results of our operations and financial condition.

The material estimates that are particularly susceptible to significant changes relate to the determination of the allowance for loan losses, evaluation of goodwill and other intangible assets for impairment, and deferred income taxes and its related recoverability, which are discussed later in this section.

CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, the Bank, Chartwell (since the acquisition on March 5, 2014) and CTSC Securities (since its initial capitalization in May 2014), after elimination of inter-company accounts and transactions. The accounts of the Bank, in turn, include its wholly-owned subsidiary, Meadowood Asset Management, LLC, after elimination of inter-company accounts and

transactions. The unaudited consolidated financial statements of the Company presented herein have been prepared pursuant to rules of the Securities and Exchange Commission for quarterly reports on form 10-Q and do not include all of the information and note disclosures required by GAAP for a full year presentation. In the opinion of management, all adjustments (consisting of normal recurring adjustments) and disclosures, considered necessary for the fair presentation of the accompanying consolidated financial statements, have been included. Interim results are not necessarily reflective of the results of the entire year. The accompanying consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the fiscal year ended December 31, 2014, included in the Company's Annual Report on Form 10-K.

CASH AND CASH EQUIVALENTS

For purposes of reporting cash flows, the Company has defined cash and cash equivalents as cash, interest-earning deposits with other institutions, federal funds sold, and short-term investments which have an original maturity of 90 days or less.

Table of Contents

INVESTMENT SECURITIES

The Company's investments are classified as either: (1) held-to-maturity – debt securities that the Company intends to hold until maturity and are reported at amortized cost; (2) trading securities – debt and certain equity securities bought and held principally for the purpose of selling them in the near term and reported at fair value, with unrealized gains and losses included in earnings; or (3) available-for-sale – debt and certain equity securities not classified as either held-to-maturity or trading securities and reported at fair value, with changes in fair value reported as a component of accumulated other comprehensive income (loss).

The cost of securities sold is determined on a specific identification basis. Amortization of premiums and accretion of discounts are recorded as interest income from investments over the life of the security utilizing the level yield method. We evaluate impaired investment securities quarterly to determine if impairments are temporary or other-than-temporary. For impaired debt securities, management first determines whether it intends to sell or if it is more-likely than not that it will be required to sell the impaired securities. This determination considers current and forecasted liquidity requirements, regulatory and capital requirements and securities portfolio management. If the Company intends to sell a security with a fair value below amortized cost or if it is more-likely than not that it will be required to sell such a security before recovery, an other-than-temporary impairment (“OTTI”) charge is recorded through current period earnings for the full decline in fair value below amortized cost. For debt securities that the Company does not intend to sell or it is more likely than not that it will not be required to sell before recovery, an OTTI charge is recorded through current period earnings for the amount of the valuation decline below amortized cost that is attributable to credit losses. The remaining difference between the debt security's fair value and amortized cost (that is, the decline in fair value not attributable to credit losses) is recognized in other comprehensive income (loss), in the consolidated statements of comprehensive income as well as the shareholders' equity section of the consolidated statements of financial condition, on an after-tax basis.

LOANS

Loans and leases held-for investment are stated at unpaid principal balances, net of deferred loan fees and costs. Loans held-for-sale are stated at the lower of cost or fair value. Interest income on loans is accrued at the contractual rate on the principal amount outstanding and includes the amortization of deferred loan fees and costs. Deferred loan fees and costs are amortized to interest income over the life of the loan, taking into consideration scheduled payments and prepayments.

The Company considers a loan to be a Troubled Debt Restructuring (“TDR”) when there is a concession made to a financially troubled borrower without adequate consideration provided to the Company. Once a loan is deemed to be a TDR, the Company considers whether the loan should be placed in non-accrual status. In assessing accrual status, the Company considers the likelihood that repayment and performance according to modified terms will be achieved, as well as the borrower's historical payment performance. A loan is designated and reported as TDR until such loan is either paid-off or sold, unless the restructuring agreement specifies an interest rate equal to or greater than the rate that would be accepted at the time of the restructuring for a new loan with comparable risk and it is fully expected that the remaining principal and interest will be collected according to the restructured agreement.

The recognition of interest income on a loan is discontinued when, in management's opinion, it is probable the borrower is unable to meet payments as they become due or when the loan becomes 90 days past due, whichever occurs first. All unpaid accrued interest on such loans is reversed. Such interest ultimately collected is applied to reduce principal if there is doubt about the collectability of principal. If a borrower brings a loan current for which accrued interest has been reversed, then the recognition of interest income on the loan is resumed, once the loan has been current for a period of six consecutive months or greater.

The Company is a party to financial instruments with off-balance sheet risk (commitments to extend credit) in the normal course of business to meet the financing needs of its customers. Commitments to extend credit are agreements

to lend to a customer as long as there is no violation of any condition established in the commitment. Commitments generally have fixed expiration dates or other termination clauses (i.e. demand loans) and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the unfunded commitment amount does not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis using the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The amount of collateral obtained, if deemed necessary by the Company upon extension of a commitment, is based on management's credit evaluation of the borrower.

OTHER REAL ESTATE OWNED

Real estate, other than bank premises, is recorded at the lower of the related loan balance or fair value less estimated selling costs at the time of acquisition. Fair value is determined based on an independent appraisal. Expenses related to holding the property are charged against earnings in the current period. Depreciation is not recorded on the other real estate owned ("OREO") properties.

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses is established through provisions for loan losses that are charged to operations. Loans are charged against the allowance for loan losses when management believes that the principal is uncollectible. If, at a later time, amounts are recovered with respect to loans previously charged off, the recovered amount is credited to the allowance for loan losses.

Table of Contents

The allowance is appropriate, in management's judgment, to cover probable losses inherent in the loan portfolio as of September 30, 2015 and December 31, 2014. Management's judgment takes into consideration general economic conditions, diversification and seasoning of the loan portfolio, historic loss experience, identified credit problems, delinquency levels and adequacy of collateral. Although management believes it has used the best information available to it in making such determinations, and that the present allowance for loan losses is adequate, future adjustments to the allowance may be necessary, and net income may be adversely affected if circumstances differ substantially from the assumptions used in determining the level of the allowance. In addition, as an integral part of their periodic examination, certain regulatory agencies review the adequacy of the Bank's allowance for loan losses and may direct the Bank to make additions to the allowance based on their judgments about information available to them at the time of their examination.

The components of the allowance for loan losses represent estimates based upon Accounting Standards Codification ("ASC") Topic 450, Contingencies, and ASC Topic 310, Receivables. ASC Topic 450 applies to homogeneous loan pools such as consumer installment, residential mortgages, consumer lines of credit and commercial loans that are not individually evaluated for impairment under ASC Topic 310. ASC Topic 310 is applied to commercial and consumer loans that are individually evaluated for impairment.

Under ASC Topic 310, a loan is impaired, based upon current information and events, in management's opinion, when it is probable that the loan will not be repaid according to its original contractual terms, including both principal and interest, or if a loan is designated as a TDR. Management performs individual assessments of impaired loans to determine the existence of loss exposure based upon a discounted cash flows method or where a loan is collateral dependent, based upon the fair value of the collateral less estimated selling costs.

In estimating probable loan loss under ASC Topic 450 management considers numerous factors, including historical charge-offs and subsequent recoveries. Management also considers, but is not limited to, qualitative factors that influence our credit quality, such as delinquency and non-performing loan trends, changes in loan underwriting guidelines and credit policies, as well as the results of internal loan reviews. Finally, management considers the impact of changes in current local and regional economic conditions in the markets that we serve. Assessment of relevant economic factors indicates that some of the Company's primary markets historically tend to lag the national economy, with local economies in our primary market areas also improving or weakening, as the case may be, but at a more measured rate than the national trends.

Management bases the computation of the allowance for loan losses under ASC Topic 450 on two factors: the primary factor and the secondary factor. The primary factor is based on the inherent risk identified by management within each of the Company's three loan portfolios based on the historical loss experience of each loan portfolio and the loss emergence period. Management has developed a methodology that is applied to each of the three primary loan portfolios, consisting of commercial and industrial, commercial real estate and private banking. As the loan loss history, mix and risk ratings of each loan portfolio change, the primary factor adjusts accordingly. The allowance for loan losses related to the primary factor is based on our estimates as to probable losses for each loan portfolio. The secondary factor is intended to capture risks related to events and circumstances that management believes may impact the performance of the loan portfolio. Although this factor is more subjective in nature, the methodology focuses on internal and external trends in pre-specified categories (risk factors) and applies a quantitative percentage which drives the secondary factor. There are nine risk factors and each risk factor is assigned a reserve level, based on management's judgment as to the probable impact of each risk factor on each loan portfolio and is monitored on a quarterly basis. As the trend in any risk factor changes, a corresponding change occurs in the reserve associated with each respective risk factor, such that the secondary factor remains current to changes in each loan portfolio.

The Company also maintains a reserve for losses on unfunded commitments. This reserve is reflected as a component of other liabilities and, in management's judgment, is sufficient to cover probable losses inherent in the commitments.

Management tracks the level and trends in unused commitments and takes into consideration the same factors as those considered for purposes of the allowance for loan losses on outstanding loans.

INVESTMENT MANAGEMENT FEES

The Company recognizes investment management fee revenue when the advisory services are performed. Fees are based on assets under management and are calculated pursuant to individual client contracts. Investment management fees are generally paid on a quarterly basis. In a limited number of cases, the Company may earn a performance fee based on investment performance achieved versus a stated benchmark. Performance fees are included in investment management fee revenue in the consolidated statements of income.

Investment management fees receivable represent amounts due for contractual investment management services provided to the Company's clients, primarily institutional investors, mutual funds and individual investors. Management performs credit evaluations of its customers' financial condition when it is deemed to be necessary, and does not require collateral. The Company provides an allowance for uncollectible accounts based on specifically identified receivables. Investment management fees receivable are considered delinquent when payment is not received within contractual terms and are charged off against the allowance for

Table of Contents

uncollectible accounts when management determines that recovery is unlikely and the Company ceases its collection efforts. There was no bad debt expense recorded for the nine months ended September 30, 2015 and 2014, and there was no allowance for uncollectible accounts recorded as of September 30, 2015 and December 31, 2014.

FEDERAL HOME LOAN BANK STOCK

The Company is a member of the Federal Home Loan Bank of Pittsburgh (“FHLB”). Member institutions are required to invest in FHLB stock. The stock is carried at cost, which approximates its liquidation value, and it is evaluated for impairment based on the ultimate recoverability of the par value. The following matters are considered by management when evaluating the FHLB stock for impairment: the ability of the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB; the impact of legislative and regulatory changes on the institution and its customer base; and the Company's intent and ability to hold its FHLB stock for the foreseeable future. Management believes the Company's holdings in the FHLB stock are ultimately recoverable at par value, as of September 30, 2015. Cash and stock dividends are reported as non-interest income, in the consolidated statements of income.

BUSINESS COMBINATIONS

The Company accounts for business combinations using the acquisition method of accounting. Under this method of accounting, the acquired company's net assets are recorded at fair value as of the date of acquisition, and the results of operations of the acquired company are combined with our results from that date forward. Acquisition costs are expensed when incurred. The difference between the purchase price and the fair value of the net assets acquired (including identified intangibles) is recorded as goodwill. The change in the initial estimate of any contingent earnout amounts is reflected in the consolidated statements of income.

GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill represents the excess of the cost of an acquisition over the fair value of the net assets acquired. Other intangible assets represent purchased assets that lack physical substance but can be distinguished from goodwill because of contractual or other legal rights. Other intangible assets that have finite lives, such as trade name, client relationships and non-compete agreements are amortized over their estimated useful lives and subject to periodic impairment testing. These other intangible assets are amortized on a straight-line basis over their estimated useful lives which range from four to twenty years. Goodwill and other intangible assets are subject to impairment testing at the reporting unit level, which is conducted at least annually.

OFFICE PROPERTIES AND EQUIPMENT

Office properties and equipment are stated at cost less accumulated depreciation. Depreciation is computed on the straight-line method over the estimated useful lives of the related assets, except for leasehold improvements which are amortized over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. Estimated useful lives are dependent upon the nature and condition of the asset and range from three to ten years. Repairs and maintenance are charged to expense as incurred, while improvements which extend the useful life are capitalized and depreciated to operating expense over the estimated remaining life of the asset. When the Bank receives an allowance for improvements to be made to one of its leased offices, we record the allowance as a deferred liability and recognize it as a reduction to rent expense over the life of the related lease.

BANK OWNED LIFE INSURANCE

Bank owned life insurance (“BOLI”) policies on certain officers and employees are recorded at net cash surrender value on the consolidated statements of financial condition. Upon termination of the BOLI policy the Company receives the cash surrender value. BOLI benefits are payable to the Company upon death of the insured. Changes in net cash surrender value are recognized as non-interest income in the consolidated statements of income.

DEPOSITS

Deposits are stated at principal outstanding and interest on deposits is accrued and charged to expense daily and is paid or credited in accordance with the terms of the respective accounts.

BORROWINGS

The Company records FHLB advances and subordinated notes payable at their principal amount. Interest expense is recognized based on the coupon rate of the obligations. Costs associated with the acquisition of subordinated notes payable are amortized over the expected term of the borrowing.

EARNINGS PER COMMON SHARE

Basic earnings per common share ("EPS") is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the period, excluding non-vested restricted stock. Diluted EPS reflects the potential dilution of upon the exercise of stock options and vesting of restricted stock awards granted utilizing the treasury stock method.

Table of Contents

INCOME TAXES

The Company utilizes the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the tax effects of differences between the financial statement and tax basis of assets and liabilities. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities with regard to a change in tax rates is recognized in income in the period that includes the enactment date. Management assesses all available evidence to determine the amount of deferred tax assets that are more-likely-than-not to be realized. The available evidence used in connection with the assessments includes taxable income in prior periods, projected taxable income, potential tax planning strategies and projected reversals of deferred tax items. These assessments involve a degree of subjectivity and may undergo significant change. Changes to the evidence used in the assessments could have a material adverse effect on the Company's results of operations in the period in which they occur. It is the Company's policy to recognize interest and penalties, if any, related to unrecognized tax benefits in income tax expense in the consolidated statements of income.

FAIR VALUE MEASUREMENT

Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability in a principal or most advantageous market for the asset or liability in an orderly transaction between market participants as of the measurement date, using assumptions market participants would use when pricing an asset or liability. An orderly transaction assumes exposure to the market for a customary period for marketing activities prior to the measurement date and not a forced liquidation or distressed sale. Fair value measurement and disclosure guidance provides a three-level hierarchy that prioritizes the inputs of valuation techniques used to measure fair value into three broad categories:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 – Observable inputs such as quoted prices for similar assets and liabilities in active markets, quoted prices for similar assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies, and similar techniques that use significant unobservable inputs.

Fair value may be recorded for certain assets and liabilities every reporting period on a recurring basis or under certain circumstances, on a non-recurring basis.

STOCK-BASED COMPENSATION

The Company accounts for its stock-based compensation awards based on estimated fair values, for all share-based awards, including stock options and restricted stock, made to employees and directors.

The Company accounts for stock-based employee compensation in accordance with the fair value recognition provisions of ASC 718, Compensation – Stock Compensation. As a result, compensation cost for all share-based payments is based on the grant-date fair value estimated in accordance with ASC 718. The value of the portion of the award that is ultimately expected to vest is included in stock-based employee compensation cost in the consolidated statements of income and recorded as a component of additional paid-in capital, for equity-based awards. Compensation expense for all awards is recognized on a straight-line basis over the requisite service period for the entire grant.

ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Unrealized holding gains and the non-credit component of losses on the Company's investment securities available-for-sale are included in accumulated other comprehensive income (loss), net of applicable income taxes.

Also included in accumulated other comprehensive income (loss) is the remaining unamortized balance of the unrealized holding gains (non-credit losses), net of applicable income taxes, that existed on the transfer date for investment securities reclassified into the held-to-maturity category from the available-for-sale category.

TREASURY STOCK

The repurchase of the Company's common stock is recorded at cost. At the time of reissuance, the treasury stock account is reduced using the average cost method. Gains and losses on the reissuance of common stock are recorded in additional paid-in capital, to the extent additional paid-in capital from any previous net gains on treasury share transactions exists. Any net deficiency is charged to retained earnings.

RECENT ACCOUNTING DEVELOPMENTS

In September 2015, the FASB issued Accounting Standards Update ("ASU") 2015-16, "Business Combinations (Topic 805): Simplifying the Accounting for Measurement Period Adjustments." This ASU will eliminate the requirement for an acquirer to

Table of Contents

retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. The ASU is effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. For all other entities, the ASU is effective for fiscal years beginning after December 15, 2016, and interim periods within fiscal years beginning after December 15, 2017. Early adoption is permitted. The adoption of ASU 2015-16 is not expected to have a material impact on the Company's consolidated financial statements.

In June 2015, the FASB issued ASU 2015-10, "Technical Correction and Improvements" which, among other things, corrects the initial codification of FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities (as Amended by FASB Statement No. 166, Accounting for Transfers of Financial Assets)." The initial codification inadvertently added the word "public" to paragraph 860-10-50-7, which was not in the original guidance. The ASU also clarifies that the requirement relates to "involvement by others". This amendment in ASU 2015-10 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. The adoption of ASU 2015-10 is not expected to have a material impact on the Company's consolidated financial statements.

In May 2015, the FASB issued ASU 2015-07, "Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)." This ASU will eliminate the requirement to categorize investments in the fair value hierarchy if their fair value is measured at net asset value (NAV) per share (or its equivalent) using the practical expedient in the FASB's fair value measurement guidance. Reporting entities are required to adopt the ASU retrospectively. The effective date for public business entities is fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for all entities. The adoption of ASU 2015-07 is not expected to have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, "Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement." This ASU provides explicit guidance to help companies evaluate the accounting for fees paid by a customer in a cloud computing arrangement. The new guidance clarifies that if a cloud computing arrangement includes a software license, the customer should account for the license consistent with its accounting for other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract. This ASU is effective for public business entities for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. An entity can elect to adopt the amendments either prospectively for all arrangements entered into or materially modified after the effective date, or retrospectively. Early adoption is permitted for all entities. The adoption of ASU 2015-05 is not expected to have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, "Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." This AUS requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. For public business entities, the amendments in this update are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption of the amendments in this update is permitted for financial statements that have not been previously issued. An entity should apply the new guidance on a retrospective basis, wherein the balance sheet of each individual period presented should be adjusted to reflect the period-specific effects of applying the new guidance. Upon transition, an entity is required to comply with the applicable disclosures for a change in an accounting principle. These disclosures include the nature of and reason for the change in accounting principle, the transition method, a description of the prior-period information that has been retrospectively adjusted, and the effect of the change on the financial statement line items

(that is, debt issuance cost asset and the debt liability). The adoption of ASU 2015-03 is not expected to have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued ASU No. 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis." This ASU changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a variable interest entity (VIE), and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. It also eliminates the VIE consolidation model based on majority exposure to variability that applied to certain investment companies and similar entities. The new guidance excludes money market funds that are required to comply with Rule 2a-7 of the Investment Company Act of 1940 and similar entities from the U.S. GAAP consolidation requirements. The new consolidation guidance is effective for public business entities for annual and interim periods in fiscal years beginning after December 15, 2015. At the effective date, all previous consolidation analyses that the guidance affects must be reconsidered. This includes the consolidation analyses for all VIEs and for all limited partnerships and similar entities that previously were consolidated by the general partner even though the entities were not VIEs. Early adoption is permitted, including early adoption in an interim period. If a reporting enterprise chooses to early adopt in an interim period, adjustments resulting from the revised consolidation analyses must be reflected as of the beginning of the fiscal year that includes that interim period. The adoption of ASU 2015-02 is not expected to have a material impact on the Company's consolidated financial statements.

Table of Contents

In January 2015, the FASB issued ASU No. 2015-01, "Income Statement - Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items."

This ASU eliminates the concept of extraordinary items from U.S. GAAP as part of its simplification initiative. The ASU does not affect disclosure guidance for events or transactions that are unusual in nature or infrequent in their occurrence. The ASU is effective for interim and annual periods in fiscal years beginning after December 15, 2015. The ASU allows prospective or retrospective application. Early adoption is permitted if applied from the beginning of the fiscal year of adoption. The effective date is the same for both public entities and all other entities. The adoption of ASU 2015-01 is not expected to have a material impact on the Company's consolidated financial statements.

In November 2014, the FASB issued ASU 2014-16, "Derivatives and Hedging (Topic 815)," which will require an entity to determine the nature of the host contract by considering the economic characteristics and risks of the entire hybrid financial instrument issued in the form of a share, including the embedded derivative feature that is being evaluated for separate accounting from the host contract when evaluating whether the host contract is more akin to debt or equity. In evaluating the stated and implied substantive terms and features, the existence or omission of any single term or feature does not necessarily determine the economic characteristics and risks of the host contract. Although an individual term or feature may weigh more heavily in the evaluation on the basis of facts and circumstances, an entity should use judgment based on an evaluation of all the relevant terms and features. This update is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The effects of initially adopting the amendments should be applied on a modified retrospective basis to existing hybrid financial instruments issued in the form of a share as of the beginning of the fiscal year for which the amendment is effective. Retrospective application is permitted to all relevant prior periods. Early adoption, including adoption in an interim period, is permitted. If an entity early adopts the amendments in an interim period, any adjustments shall be reflected as of the beginning of the fiscal year that includes that interim period. The adoption of ASU 2014-16 is not expected to have a material impact on the Company's consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern." This ASU describes how an entity's management should assess whether there are conditions and events that raise substantial doubt about an entity's ability to continue as a going concern within one year after the date that the financial statements are issued. Management should consider both quantitative and qualitative factors in making its assessment. If after considering management's plans, substantial doubt about an entity's going concern is alleviated, an entity shall disclose information in the footnotes that enables the users of the financial statements to understand the events that raised the going concern and how management's plan alleviated this concern. If after considering management's plans, substantial doubt about an entity's going concern is not alleviated, the entity shall disclose in the footnotes indicating that a substantial doubt about the entity's going concern exists within one year of the date of the issued financial statements. Additionally, the entity shall disclose the events that led to this going concern and management's plans to mitigate them. The new standard applies to all entities for the first annual period ending after December 15, 2016, and for annual and interim periods thereafter. Early application is permitted. The adoption of ASU 2014-15 is not expected to have a material impact on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performing Target Could Be Achieved after the Requisite Service Period." This ASU requires a reporting entity to treat a performance target that affects vesting and that could be achieved after the requisite service period as a performance condition. A reporting entity should apply FASB ASC Topic 718, Compensation-Stock Compensation, to awards with performance conditions that affect vesting. This update is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015, for all entities. Early adoption is permitted. ASU 2014-12 may be adopted either prospectively for share-based payment awards granted or modified on

or after the effective date, or retrospectively, using a modified retrospective approach. The modified retrospective approach would apply to share-based payment awards outstanding as of the beginning of the earliest annual period presented in the financial statements on adoption, and to all new or modified awards thereafter. The adoption of ASU 2014-12 is not expected to have a material impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." This ASU implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of this update is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 establishes a five-step model which entities must follow to recognize revenue and removes inconsistencies and weaknesses in existing guidance. Per ASU 2015-14, this update is effective for annual periods and interim periods within fiscal years beginning after December 15, 2017, for public business entities, certain employee benefit plans, and certain not-for-profit entities applying U.S. GAAP. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. We are currently evaluating the impact this standard will have on our results of operations and financial position.

Interest income on investment securities included \$825,000 in taxable interest income, \$109,000 in non-taxable interest income and \$57,000 in dividend income for the three months ended September 30, 2015, as compared to taxable interest income of \$661,000, non-taxable interest income of \$89,000 and dividend income of \$47,000 for the three months ended September 30, 2014.

Table of Contents

Interest income on investment securities included \$2.1 million in taxable interest income, \$297,000 in non-taxable interest income and \$162,000 in dividend income for the nine months ended September 30, 2015, as compared to taxable interest income of \$1.9 million, non-taxable interest income of \$269,000 and dividend income of \$47,000 for the nine months ended September 30, 2014.

As of September 30, 2015, the contractual maturities of the debt securities are:

(Dollars in thousands)	September 30, 2015			
	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$—	\$—	\$—	\$—
Due from one to five years	46,111	46,103	11,045	11,515
Due from five to ten years	6,211	6,226	33,958	34,292
Due after ten years	114,132	113,392	1,424	1,454
Total debt securities	\$166,454	\$165,721	\$46,427	\$47,261

Included in the \$113.4 million fair value of debt securities available-for-sale with a contractual maturity due after ten years as of September 30, 2015, were \$101.6 million, or 89.6%, in floating-rate securities. Included in the \$34.0 million amortized cost of debt securities held-to-maturity with a contractual maturity due from five to ten years as of September 30, 2015, were \$8.0 million that have call provisions in one to five years that would either mature, if called, or become floating-rate securities after the call date.

Prepayments may shorten the contractual lives of the collateralized mortgage obligations and mortgage-backed securities.

There were no sales of investment securities available-for-sale during the three months ended September 30, 2015 and 2014.

Proceeds from the sale of investment securities available-for-sale during the nine months ended September 30, 2015 and 2014, were \$9.7 million and \$69.6 million, respectively. Gross gains of \$34,000 and \$1.4 million were realized on these sales and reclassified out of accumulated other comprehensive income (loss) during the nine months ended September 30, 2015 and 2014, respectively. There were \$17,000 and \$1,000 in gross losses realized during the nine months ended September 30, 2015 and 2014, on investment securities available-for-sale.

Investment securities available-for-sale of \$6.7 million, as of September 30, 2015, were held in safekeeping at the FHLB and were included in the calculation of borrowing capacity.

The following tables show the fair value and gross unrealized losses on investment securities available-for-sale and held-to-maturity, aggregated by investment category and length of time that the individual securities have been in a continuous unrealized loss position as of September 30, 2015 and December 31, 2014, respectively:

(Dollars in thousands)	September 30, 2015					
	Less than 12 Months		12 Months or More		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
Investment securities available-for-sale:

Total temporarily impaired securities	\$69,425	\$904	\$41,956	\$824	\$111,381	\$1,728

17

Table of Contents

(Dollars in thousands)	December 31, 2014					
	Less than 12 Months		12 Months or More		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
Investment securities available-for-sale:						
Corporate bonds	\$26,723	\$145	\$2,263	\$23	\$28,986	\$168
Trust preferred securities	12,601	376	4,200	269	16,801	645
Non-agency mortgage-backed securities	11,585	32	—	—	11,585	32
Agency collateralized mortgage obligations	9,317	45	30,327	203	39,644	248
Agency mortgage-backed securities	—	—	12,073	186	12,073	186
Equity securities	8,038	72	—	—	8,038	72
Total investment securities available-for-sale	68,264	670	48,863	681	117,127	1,351
Investment securities held-to-maturity:						
Municipal bonds	2,857	2	1,446	13	4,303	15
Total investment securities held-to-maturity	2,857	2	1,446	13	4,303	15
Total temporarily impaired securities	\$71,121	\$672	\$50,309	\$694	\$121,430	\$1,366

The change in the fair values of our municipal bonds, agency collateralized mortgage obligation and agency mortgage-backed securities are primarily the result of interest rate fluctuations. To assess for impairment on municipal bonds, corporate bonds, single-issuer trust preferred securities, non-agency mortgage-backed securities, non-agency collateralized loan obligations and certain equity securities, management evaluates the underlying issuer's financial performance and the related credit rating information through a review of publicly available financial statements and other publicly available information. This review did not identify any issues related to the ultimate repayment of principal and interest on these securities. In addition, the Company has the ability and intent to hold the securities in an unrealized loss position until recovery of their amortized cost. Based on this, the Company considers all of the unrealized losses to be temporary impairment losses. Within the available-for-sale portfolio, there were 27 positions, aggregating to \$1.7 million in unrealized losses that were temporarily impaired as of September 30, 2015, of which 10 positions were in an unrealized loss position for more than twelve months totaling \$824,000. As of December 31, 2014, there were 27 positions, aggregating to \$1.4 million in unrealized losses that were temporarily impaired, of which nine positions were in an unrealized loss position for more than twelve months totaling \$681,000. Within the held-to-maturity portfolio, there were five positions, aggregating to \$23,000 in unrealized losses that were temporarily impaired as of September 30, 2015, of which no positions were in an unrealized loss position for more than twelve months. As of December 31, 2014, there were five positions, aggregating to \$15,000 in unrealized losses that were temporarily impaired, of which two positions were in an unrealized loss position for more than twelve months totaling \$13,000.

There were no investment securities classified as trading securities outstanding as of September 30, 2015 and December 31, 2014, respectively. There was no activity in investment securities classified as trading during the three and nine months ended September 30, 2015 and 2014.

[3] LOANS

We generate loans through our middle-market and private banking channels. These channels provide risk diversification and offer significant growth opportunities. The middle-market banking channel consists of our commercial and industrial ("C&I") and commercial real estate ("CRE") loan portfolios that serve middle-market businesses and real estate developers. The private banking channel includes loans secured by cash, marketable securities and other asset-based loans to executives, high-net-worth individuals, trusts and businesses, many of whom we source through referral relationships with independent broker/dealers, wealth managers, family offices, trust

companies and other financial intermediaries.

18

Table of Contents

Loans held-for-investment by channel was comprised of the following:

(Dollars in thousands)	September 30, 2015			
	Commercial and Industrial	Commercial Real Estate	Private Banking	Total
Loans held-for-investment, before deferred fees	\$631,144	\$833,626	\$1,197,042	\$2,661,812

Loans held-for-investment, net	\$663,992	\$728,502	\$987,285	\$2,379,779

The Company's customers have unused loan commitments. Often these commitments are not fully utilized and therefore the total amount does not necessarily represent future cash requirements. The amount of unfunded commitments, including standby letters of credit, as of September 30, 2015 and December 31, 2014, was \$1.2 billion and \$973.4 million, respectively. The interest rate for each commitment is based on the prevailing market conditions at the time of funding. The lending commitment maturities as of September 30, 2015, were as follows: \$833.7 million in one year or less; \$208.2 million in one to three years; and \$154.9 million in greater than three years. The reserve for losses on unfunded commitments was \$590,000 and \$555,000 as of September 30, 2015 and December 31, 2014, respectively, which includes reserves for probable losses on unfunded loan commitments, including standby letters of credit and also risk participations.

On March 14, 2014, we entered into a loan purchase agreement to acquire \$219.7 million (including fees and interest receivable) of loans secured by cash and marketable securities that are included in our private banking channel loan portfolio. This transaction closed on April 11, 2014.

As of September 30, 2015 and December 31, 2014, the Company had loans in the process of origination totaling approximately \$41.8 million and \$18.7 million, respectively, which extend over varying periods of time with the majority being disbursed within a 30 to 60 day period.

The Company issues standby letters of credit in the normal course of business. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party. The Company would be required to perform under the standby letters of credit when drawn upon by the guaranteed party in the case of non-performance by the Company's customer. Collateral may be obtained based on management's credit assessment of the customer. The unfunded commitments amount related to standby letters of credit as of September 30, 2015 and December 31, 2014, included in the total listed above, is \$78.4 million and \$89.3 million, respectively, of which a portion is collateralized. Should the Company be obligated to perform under the standby letters of credit the Company will seek recourse from the customer for reimbursement of amounts paid. As of September 30, 2015, \$29.1 million (in the aggregate) in standby letters of credit will expire within one year, while the

remaining standby letters of credit will expire in periods greater than one year. During the nine months ended September 30, 2015, there were two draws on standby letters of credit totaling \$146,000, which were immediately repaid by the borrower or converted to an outstanding loan based on the contractual terms. During the nine months ended September 30, 2014, there was one draw on standby letters of credit for \$100,000, which was immediately repaid by the borrower. Most of these commitments are expected to expire without being drawn upon and the total amount does not necessarily represent future cash requirements. The probable liability for losses on standby letters of credit was included in the reserve for losses on unfunded commitments.

The Company has entered into risk participation agreements with financial institution counterparties for interest rate swaps related to loans in which we are a participant. The risk participation agreements provide credit protection to the financial institution counterparties should the customers fail to perform on their interest rate derivative contracts. The potential liability for outstanding obligations was included in the reserve for losses on unfunded commitments.

Table of Contents

[4] ALLOWANCE FOR LOAN LOSSES

Our allowance for loan losses represents our estimate of probable loan losses inherent in the loan portfolio at a specific point in time. This estimate includes losses associated with specifically identified loans, as well as estimated probable credit losses inherent in the remainder of the loan portfolio. Additions are made to the allowance through both periodic provisions charged to income and recoveries of losses previously incurred. Reductions to the allowance occur as loans are charged off or when the credit history of any of the three loan portfolios improves. Management evaluates the adequacy of the allowance quarterly, and in doing so relies on various factors including, but not limited to, assessment of historical loss experience, delinquency and non-accrual trends, portfolio growth, underlying collateral coverage and current economic conditions. This evaluation is subjective and requires material estimates that may change over time. In addition, management evaluates the overall methodology for the allowance for loan losses on an annual basis. During the three months ended September 30, 2015, management made enhancements to the look-back period and loss emergence period used in the allowance for loan losses calculation to account for changes in the Company's portfolio and related historical loss experience. The calculation of the allowance for loan losses takes into consideration the inherent risk identified within each of the Company's three primary loan portfolios, commercial and industrial, commercial real estate and private banking. In addition, management takes into account the historical loss experience of each loan portfolio, to ensure that the resultant allowance for loan losses is sufficient to cover probable losses inherent in such loan portfolios. Refer to Note 1, Summary of Significant Accounting Policies, for more details on the Company's allowance for loan losses policy.

The following discusses key characteristics and risks within each primary loan portfolio:

Middle-Market Banking: Commercial and Industrial Loans. This loan portfolio primarily includes loans made to service companies or manufacturers generally for the purpose of production, operating capacity, accounts receivable, inventory or equipment financing, acquisitions and recapitalizations. Cash flow from the borrower's operations is the primary source of repayment for these loans, except for certain commercial loans that are secured by cash and marketable securities.

The industry of the borrower is an important indicator of risk, but there are also more specific risks depending on the condition of the local/regional economy. Collateral for these types of loans often do not have sufficient value in a distressed or liquidation scenario to satisfy the outstanding debt. Any C&I loans collateralized by cash and marketable securities are treated the same as private banking loans for purposes of the allowance for loan loss calculation. In addition, shared national credit loans which also involve a private equity sponsor are combined as a homogeneous group and evaluated separately based on the historical loss trend of such loans.

Middle-Market Banking: Commercial Real Estate Loans. This loan portfolio includes loans secured by commercial purpose real estate, including both owner occupied properties and investment properties for various purposes including office, retail, industrial, multifamily and hospitality. Individual project cash flows as well as global cash flows from the developer are the primary sources of repayment for these loans. Also included are commercial construction loans to finance the construction or renovation of structures as well as to finance the acquisition and development of raw land for various purposes. The increased level of risk of these loans is generally confined to the construction period. If there are problems, the project may not be completed, and as such, may not provide sufficient cash flow on its own to service the debt or have sufficient value in a liquidation to cover the outstanding principal.

The underlying purpose/collateral of the loans is an important indicator of risk for this loan portfolio. Additional risks exist and are dependent on several factors such as the condition of the local/regional economy, whether or not the project is owner occupied, and the type of project and the experience and resources of the developer.

Private Banking Channel Loans. Our private banking lending activities are conducted on a national basis. This loan portfolio primarily includes loans made to high-net-worth individuals, trusts and businesses that may be secured by cash, marketable securities, residential property or other financial assets, as well as unsecured loans and lines of credit. The primary sources of repayment for these loans are the income and/or assets of the borrower.

The underlying collateral is the most important indicator of risk for this loan portfolio. The overall lower risk profile of this portfolio is driven by loans secured by cash and marketable securities, which was 87.7% and 81.2% of total private banking channel loans as of September 30, 2015 and December 31, 2014, respectively.

Management further assesses risk within each loan portfolio using key inherent risk differentiators. The components of the allowance for loan losses represent estimates based upon ASC Topic 450, Contingencies, and ASC Topic 310, Receivables. ASC Topic 450 applies to homogeneous loan pools such as consumer installment, residential mortgages and consumer lines of credit, as well as commercial loans that are not individually evaluated for impairment under ASC Topic 310. Impaired loans are individually evaluated for impairment under ASC Topic 310.

Table of Contents

On a monthly basis, management monitors various credit quality indicators for both the commercial and consumer loan portfolios, including delinquency, non-performing status, changes in risk ratings, changes in the underlying performance of the borrowers and other relevant factors. On a daily basis, the Company prices and monitors the collateral of margin loans secured by cash and marketable securities within the private banking channel which further reduces the risk profile of that portfolio. Refer to Note 1, Summary of Significant Accounting Policies, for the Company's policy for determining past due status of loans.

Management continually monitors the loan portfolio through its internal risk rating system. Loan risk ratings are assigned based upon the creditworthiness of the borrower. Loan risk ratings are reviewed on an ongoing basis according to internal policies. Loans within the pass rating are believed to have a lower risk of loss than loans risk rated as special mention, substandard and doubtful, which are believed to have an increasing risk of loss.

The Company's risk ratings are consistent with regulatory guidance and are as follows:

Non-Rated – Loans to individuals and trusts are not individually risk rated, unless they are fully secured by liquid assets or cash, or have an exposure of \$250,000 or greater and have certain actionable covenants, such as a liquidity covenant or a financial reporting covenant. In addition, commercial loans with an exposure of less than \$500,000 are not required to be individually risk rated. Any loan, regardless of size, is risk rated if it is secured by marketable securities or if it becomes a criticized loan. The majority of the private banking loans that are not risk rated are residential mortgages and home equity loans. We monitor the performance of non-rated loans through ongoing reviews of payment delinquencies. These loans comprised 3.1% and 4.3% of the total loan portfolio, as of September 30, 2015 and December 31, 2014, respectively. For loans that are not risk-rated, the most important indicators of risk are the existence of collateral, the type of collateral and for consumer real estate loans, whether the Bank has a first or second lien position.

Pass – The loan is currently performing in accordance with its contractual terms.

Special Mention – A special mention loan has potential weaknesses that warrant management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects or in our credit position at some future date. Economic and market conditions, beyond the customer's control, may in the future necessitate this classification.

Substandard – A substandard loan is not adequately protected by the net worth and/or paying capacity of the obligor or by the collateral pledged, if any. Substandard loans have a well-defined weakness, or weaknesses that jeopardize the liquidation of the debt. These loans are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful – A doubtful loan has all the weaknesses inherent in a loan categorized as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

The following tables present the recorded investment in loans by credit quality indicator:

(Dollars in thousands)	September 30, 2015			Total
	Commercial and Industrial	Commercial Real Estate	Private Banking

Non-Performing and Impaired Loans

Management monitors the delinquency status of the loan portfolio on a monthly basis. Loans were considered non-performing when interest and principal were 90 days or more past due or management has determined that it is probable the borrower is unable to meet payments as they become due. The risk of loss is generally highest for non-performing loans.

Management determines loans to be impaired when, based upon current information and events, it is probable that the loan will not be repaid according to the original contractual terms of the loan agreement, including both principal and interest, or if a loan is designated as a TDR. Refer to Note 1, Summary of Significant Accounting Policies, for the Company's policy on evaluating loans for impairment and interest income.

Table of Contents

The following tables present the Company's investment in loans considered to be impaired and related information on those impaired loans:

Impaired loans as of September 30, 2015 and December 31, 2014, were \$19.6 million and \$30.8 million, respectively. There was no interest income recognized on these loans for the nine months ended September 30, 2015, and the twelve months ended December 31, 2014, while these loans were on non-accrual status. As of September 30, 2015 and December 31, 2014, there were no loans 90 days or more past due and still accruing interest income.

Impaired loans were evaluated using a discounted cash flow method or based on the fair value of the collateral less estimated selling costs. Based on those evaluations, as of September 30, 2015, there were specific reserves totaling

\$6.2 million, which were included in the \$19.4 million allowance for loan losses. Also included in impaired loans were three C&I loans, one CRE loan and two private banking loans with a combined balance of \$4.7 million as of September 30, 2015, with no corresponding specific reserve since these loans had a net realizable value which management believes will be recovered from the borrower.

Table of Contents

As of December 31, 2014, there were specific reserves totaling \$5.6 million, which were included in the \$20.3 million allowance for loan losses. Also included in impaired loans were two C&I loans, two CRE loans and three private banking loans with a combined balance of \$5.7 million as of December 31, 2014, with no corresponding specific reserve since these loans had a net realizable value which management believes will be recovered from the borrower.

The following tables present the allowance for loan losses and recorded investment in loans by class:

(Dollars in thousands)	September 30, 2015			Total
	Commercial and Industrial	Commercial Real Estate	Private Banking	
Allowance for loan losses:				
Individually evaluated for impairment	\$5,592	\$—	\$576	\$6,168
Collectively evaluated for impairment	6,734	5,729	719	13,182
Total allowance for loan losses	\$12,326	\$5,729	\$1,295	\$19,350
Loans held-for-investment:				
Individually evaluated for impairment	\$14,956	\$2,912	\$1,779	\$19,647
Collectively evaluated for impairment	615,175	828,265	1,198,104	2,641,544
Loans held-for-investment	\$630,131	\$831,177	\$1,199,883	\$2,661,191
(Dollars in thousands)	December 31, 2014			Total
	Commercial and Industrial	Commercial Real Estate	Private Banking	
Allowance for loan losses:				
Individually evaluated for impairment	\$4,902	\$—	\$681	\$5,583
Collectively evaluated for impairment	8,599	4,755	1,336	14,690

Troubled Debt Restructuring

The following table provides additional information on the Company's loans designated as troubled debt restructurings:

(Dollars in thousands)	September 30, 2015	December 31, 2014
Aggregate recorded investment of impaired loans with terms modified through a troubled debt restructuring:		
Performing loans accruing interest	\$528	\$528
Non-accrual loans	15,522	14,107
Total troubled debt restructurings	\$16,050	\$14,635

Of the non-accrual loans as of September 30, 2015, five C&I loans and one residential mortgage loan were designated by the Company as TDRs. There was also one C&I loan that was still accruing interest and designated by the Company as a performing TDR as of September 30, 2015. The aggregate recorded investment of these loans was \$16.1 million. There were unused commitments of \$890,000 on these loans as of September 30, 2015, of which \$39,000 was related to an accruing TDR.

Of the non-accrual loans as of December 31, 2014, three C&I loans, one CRE loan and two residential mortgage loans were designated by the Company as TDRs. There was also one C&I loan that was still accruing interest and designated by the Company as a performing TDR as of December 31, 2014. The aggregate net carrying value of these loans was \$14.6 million. There were unused commitments of \$175,000 on these loans as of December 31, 2014, of which \$54,000 was related to an accruing TDR.

The modifications made to restructured loans typically consist of an extension or reduction of the payment terms, or the deferral of principal payments. There were two loans totaling \$4.0 million that were modified as a TDR within twelve months of the corresponding

Table of Contents

balance sheet date with a payment default during the nine months ended September 30, 2015. These loans were already on non-accrual status and fully secured or adequately reserved as of September 30, 2015. There were no payment defaults during the nine months ended September 30, 2014, for loans modified as TDRs within twelve months of the corresponding balance sheet date.

There were no financial effects of modifications made to loans designated as TDRs during the three months ended September 30, 2015 and 2014.

The financial effects of modifications made to loans designated as TDRs during the nine months ended September 30, 2015 and 2014, were as follows:

(Dollars in thousands)	Nine Months Ended September 30, 2015				
	Count	Recorded Investment at the time of Modification	Current Recorded Investment	Allowance for Loan Losses at the time of Modification	Current Allowance for Loan Losses
Commercial and industrial:					
Change in interest terms	1	\$4,064	\$—	\$400	\$—
Extended term and deferred principal	1	433	—	433	—
Deferred principal	2	6,849	2,874	1,500	1,868

Subordinated notes payable	5.75	%35,000	7/1/2019	5.75	%35,000	7/1/2019
Total		\$175,000			\$165,000	

In June 2014, we completed a private placement of subordinated notes payable, raising \$35.0 million. The subordinated notes have a term of 5 years at a fixed rate of 5.75%. The proceeds qualified as Tier 2 capital for the holding company, under federal regulatory capital rules.

The Bank's FHLB borrowing capacity is based on the collateral value of certain securities held in safekeeping at the FHLB and loans pledged to the FHLB. The Bank submits a quarterly Qualified Collateral Report ("QCR") to the FHLB to update the value of the loans pledged. As of September 30, 2015, the Bank's borrowing capacity is based on the

information provided in the June 30, 2015, QCR filing. As of September 30, 2015, the Bank had securities held in safekeeping at the FHLB with a fair value of \$6.7 million, combined with pledged loans of \$671.3 million, for a remaining borrowing capacity of \$336.1 million, which was net of \$140.0 million outstanding in advances, as reflected in the table above. As of December 31, 2014, there was \$130.0 million outstanding in advances from the FHLB. When the Bank borrows from the FHLB, interest is charged at the FHLB's posted rates at the time of the borrowing.

Table of Contents

The Bank maintains an unsecured line of credit of \$10.0 million with M&T Bank and an unsecured line of credit of \$20.0 million with Texas Capital Bank. As of September 30, 2015, the full amount of these established lines were available to the Bank.

[7] REGULATORY CAPITAL

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a direct material effect on the Company’s and the Bank’s financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company’s and the Bank’s assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company’s and the Bank’s capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weighting, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the tables below) of Common Equity Tier 1 ("CET 1"), Tier 1 and Total risk-based capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). As of September 30, 2015, TriState Capital Holdings, Inc. and TriState Capital Bank exceeded all capital adequacy requirements to which they are subject.

Financial depository institutions are categorized as well capitalized if they meet minimum Total risk-based, Tier 1 risk-based, CET 1 risk-based and Tier 1 leverage ratios (Tier 1 capital to average assets) as set forth in the tables below. Based upon the information in the most recently filed Call Report, the Bank exceeded the capital ratios necessary to be well capitalized under the regulatory framework for prompt corrective action. There have been no conditions or events since the filing of the most recent Call Report that management believes have changed the Bank’s capital, as presented below.

In December 2010, the Basel Committee released a final framework for a strengthened set of capital requirements, known as Basel III. In July 2013, final rules implementing the Basel III capital accord were adopted by the federal banking agencies. When fully phased in, Basel III, which began phasing in on January 1, 2015, will replace the existing regulatory capital rules for the Company and the Bank. The Basel III final rules required new minimum capital ratio standards, established a new common equity tier 1 to total risk-weighted assets ratio, subjected banking organizations to certain limitations on capital distributions and discretionary bonus payments and established a new standardized approach for risk weightings. The overall net impact of applying Basel III regulatory rules to the Company and the Bank was an increase to the risk-based capital ratios effective January 1, 2015. This increase resulted primarily from the reduced risk-weighted capital treatment for certain of the Bank's private banking channel non-purpose margin loans, which are over-collateralized by liquid and marketable securities that are priced and monitored daily.

The following tables set forth certain information concerning the Company’s and the Bank’s regulatory capital as of September 30, 2015 and December 31, 2014:

As part of its operating and financial strategies, the Company has not paid dividends to its holders of its common shares since its inception in 2007.

[8] EMPLOYEE BENEFIT PLANS

The Company participates in a qualified 401(k) defined contribution plan under which eligible employees may contribute a percentage of their salary, at their discretion. Beginning in 2011 and continuing through 2015, the Company automatically contributed three percent of the employee's base salary to the individual's 401(k) plan, subject to IRS limitations. Full-time employees and certain part-time employees are eligible to participate upon the first month following their first day of employment or having attained age 21, whichever is later. The Company's contribution expense was \$175,000 and \$168,000 for the three months ended September 30, 2015 and 2014, respectively, including incidental administrative fees paid to a third party administrator of the plan. The Company's contribution expense was \$528,000 and \$454,000 for the nine months ended September 30, 2015 and 2014, respectively, including incidental administrative fees paid to a third party administrator of the plan.

On February 28, 2013, the Company entered into a supplemental executive retirement plan ("SERP") for the Chairman and Chief Executive Officer. The benefits will be earned over a five year period with the projected payments for this SERP of \$25,000 per month for 180 months commencing the later of retirement or 60 months. For the three and nine months ended September 30, 2015, the Company recorded expense related to SERP of \$200,000 and \$591,000, respectively, utilizing a discount rate of 2.98%. For the three and nine months ended September 30, 2014, the Company recorded expense related to SERP of \$172,000 and \$485,000, respectively, utilizing a discount rate of 3.56%. The recorded liability related to the SERP plan was \$1.9 million and \$1.3 million as of September 30, 2015 and December 31, 2014, respectively.

[9] STOCK TRANSACTIONS

In October 2014, the Board of Directors authorized the repurchase of up to \$10 million, or up to 1,000,000 shares, of the Company's common stock through December 31, 2015. The Company repurchased a total of 678,891 shares for approximately \$6.7 million during the year ended December 31, 2014, at an average cost of \$9.94 per share. The Company repurchased a total of 321,109 shares for approximately \$3.2 million during the nine months ended September 30, 2015, at an average cost of \$9.84 per share. In the aggregate, the Company repurchased 1,000,000 shares for approximately \$9.9 million at an average cost of \$9.90 per share and are held as treasury stock.

Table of Contents

Diluted shares	28,281,244	29,005,151	28,207,659	29,138,533

Earnings per common share:

Basic	\$0.22	\$0.20	\$0.61	\$0.38
Diluted	\$0.22	\$0.20	\$0.60	\$0.37
	Three Months Ended September		Nine Months Ended September	
	30, 2015	2014	30, 2015	2014
Anti-dilutive shares ⁽¹⁾	635,893	798,732	961,393	716,732

(1) Included stock options and non-vested restricted stock not considered for the calculation of diluted EPS as their inclusion would have been anti-dilutive.

[11] DERIVATIVES AND HEDGING ACTIVITY

RISK MANAGEMENT OBJECTIVE OF USING DERIVATIVES

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk primarily by managing the amount, sources, and duration of its debt funding and through the use of derivative financial instruments. Specifically, the Company enters into derivative financial instruments to manage exposures that

arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company's known or expected cash receipts related to certain of the Company's fixed-rate loan assets. The Company also has derivatives that are a result of a service the Company provides to certain qualifying customers while at the same time the Company enters into an offsetting derivative transaction in order to eliminate its interest rate risk exposure resulting from such transactions.

Table of Contents

FAIR VALUES OF DERIVATIVE INSTRUMENTS ON THE STATEMENTS OF FINANCIAL CONDITION

The tables below present the fair value of the Company's derivative financial instruments as well as their classification on the consolidated statements of financial condition as of September 30, 2015 and December 31, 2014:

(Dollars in thousands)	Asset Derivatives as of September 30, 2015		Liability Derivatives as of September 30, 2015	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments:

Derivatives not designated as hedging instruments:				
Interest rate products	Other assets	\$11,730	Other liabilities	\$12,611
(Dollars in thousands)	Asset Derivatives as of December 31, 2014		Liability Derivatives as of December 31, 2014	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments:				
Interest rate products	Other assets	\$—	Other liabilities	\$442
Derivatives not designated as hedging instruments:				
Interest rate products	Other assets	\$6,327	Other liabilities	\$6,849

FAIR VALUE HEDGES OF INTEREST RATE RISK

The Company is exposed to changes in the fair value of certain of its fixed-rate obligations due to changes in benchmark interest rates, which relate predominantly to LIBOR. Interest rate swaps designated as fair value hedges involve the receipt of variable rate payments from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without the exchange of the underlying notional amount. As of September 30, 2015, the Company had four interest rate swaps, with a notional amount of \$3.3 million that were designated as fair value hedges of interest rate risk associated with the Company's fixed-rate loan assets. The notional amounts for the derivatives express the face amount of the positions, however, credit risk was considered insignificant for nine months ended September 30, 2015 and 2014. There were no counterparty default losses on derivatives for the nine months ended September 30, 2015 and 2014.

For the four derivatives that were designated and that qualify as fair value hedges, the gain or loss on the derivative as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in earnings by applying the "fair value long haul" method. The Company includes the gain or loss on the hedged items in the same line item as the offsetting loss or gain on the related derivatives. During the three months ended September 30, 2015, the Company recognized gains of \$1,000 in non-interest income related to hedge ineffectiveness as compared to gains of \$2,000 during the three months ended September 30, 2014. The Company also recognized a decrease to interest income of \$54,000 and \$80,000 for the three months ended September 30, 2015 and 2014, respectively, related to the Company's fair value hedges, which includes net settlements on the derivatives, and any amortization adjustment of the basis in the hedged items. During the nine months ended September 30, 2015, the Company recognized gains of \$3,000 in non-interest income related to hedge ineffectiveness as compared to gains of \$6,000 during the nine months ended September 30, 2014. The Company also recognized a decrease to interest income of \$211,000 and \$247,000 for the nine months ended September 30, 2015 and 2014, respectively, related to the Company's fair value hedges, which includes net settlements on the derivatives, and any amortization adjustment of the basis in the hedged items.

NON-DESIGNATED HEDGES

The Company does not use derivatives for trading or speculative purposes. Derivatives not designated as hedges are not speculative and result from a service the Company provides to certain customers. The Company executes interest rate derivatives with its commercial banking customers to facilitate their respective risk management strategies. Those derivatives are simultaneously and economically hedged by offsetting derivatives that the Company executes with a third party, such that the Company eliminates its interest rate exposure resulting from such transactions. Changes in the fair value of derivatives not designated in hedging relationships are recorded directly in earnings. As of September 30, 2015, the Company had 140 derivative transactions with an aggregate notional amount of \$546.1 million related to this program. During the three months ended September 30, 2015 and 2014, the Company recognized net losses of \$414,000 and net gains of \$19,000, respectively, related to changes in fair value of the derivatives not designated in hedging relationships. During the nine months ended September 30, 2015 and 2014, the Company recognized net losses of \$371,000 and net losses of \$195,000, respectively, related to changes in fair value of the derivatives not designated in hedging relationships.

Table of Contents**EFFECT OF DERIVATIVE INSTRUMENTS IN THE STATEMENTS OF INCOME**

CREDIT-RISK-RELATED CONTINGENT FEATURES

The Company has agreements with each of its derivative counterparties that contain a provision where, if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations.

The Company has agreements with certain of its derivative counterparties that contain a provision where, if either the Company or the counterparty fails to maintain its status as a well/adequately capitalized institution, then the Company or the counterparty could be required to terminate any outstanding derivative positions and settle its obligations under the agreement.

As of September 30, 2015, the termination value of derivatives, including accrued interest, in a net liability position related to these agreements was \$12.8 million. As of September 30, 2015, the Company has minimum collateral posting thresholds with certain of its derivative counterparties and has posted collateral of \$10.9 million. If the

Company had breached any of these provisions as of September 30, 2015, it could have been required to settle its obligations under the agreements at their termination value.

[12] DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value estimates of financial instruments are based on the present value of expected future cash flows, quoted market prices of similar financial instruments, if available, and other valuation techniques. These valuations are significantly affected by discount rates, cash flow assumptions, and risk assumptions used. Therefore, fair value estimates may not be substantiated by comparison to independent markets and are not intended to reflect the proceeds that may be realized in an immediate settlement of instruments. Accordingly, the aggregate fair value amounts presented below do not represent the underlying value of the Company.

Table of Contents

FAIR VALUE MEASUREMENTS

In accordance with U.S. GAAP the Company must account for certain financial assets and liabilities at fair value on a recurring and non-recurring basis. The Company utilizes a three-level fair value hierarchy of valuation techniques to estimate the fair value of its financial assets and liabilities based on whether the inputs to those valuation techniques are observable or unobservable. The fair value hierarchy gives the highest priority to quoted prices with readily available independent data in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable market inputs (Level 3). When various inputs for measurement fall within multiple levels of the fair value hierarchy, the lowest level input that has a significant impact on fair value measurement is used.

Financial assets and liabilities are categorized based upon the following characteristics or inputs to the valuation techniques:

Level 1 – Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in actively traded markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.

Level 2 – Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets or liabilities that are actively traded. Level 2 also includes pricing models in which the inputs are corroborated by market data, for example, matrix pricing.

Level 3 – Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs include assumptions of a source independent of the reporting entity or the reporting entity's own assumptions that are supported by little or no market activity or observable inputs.

The Company is responsible for the valuation process and as part of this process may use data from outside sources in establishing fair value. The Company performs due diligence to understand the inputs used or how the data was calculated or derived. The Company corroborates the reasonableness of external inputs in the valuation process.

RECURRING FAIR VALUE MEASUREMENTS

The following tables represent assets and liabilities measured at fair value on a recurring basis as of September 30, 2015 and December 31, 2014:

(Dollars in thousands)	September 30, 2015			Total Assets / Liabilities at Fair Value

INVESTMENT SECURITIES

Generally, investment securities are valued using pricing for similar securities, recently executed transactions, and other pricing models utilizing observable inputs. The valuations for debt and equity securities are classified as either Level 1 or Level 2. U.S. Treasury Notes and equity securities (including mutual funds) are classified as Level 1 because these securities are in actively traded markets. Investment securities within Level 2 include corporate bonds, single-issuer trust preferred securities, municipal bonds, non-agency mortgage-backed securities and collateralized loan obligations, collateralized mortgage obligations and mortgage-backed securities issued by U.S. government agencies and U.S. government agency debentures.

INTEREST RATE SWAPS

The fair value is estimated using inputs that are observable or that can be corroborated by observable market data and, therefore, are classified as Level 2. These fair value estimations include primarily market observable inputs such as the forward LIBOR swap curve.

NON-RECURRING FAIR VALUE MEASUREMENTS

Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, such as when there is evidence of impairment.

The following tables represent the balances of assets measured at fair value on a non-recurring basis as of September 30, 2015 and December 31, 2014:

(Dollars in thousands)	September 30, 2015			Total Assets at Fair Value
	Level 1	Level 2	Level 3

Total assets	\$—	\$—	\$26,547	\$26,547

34

Table of Contents

As of September 30, 2015, the Company recorded \$6.2 million of specific reserves to the allowance for loan losses as a result of adjusting the fair value of the collateral for certain collateral dependent impaired loans to \$4.7 million, and as a result of adjusting the value based upon the discounted cash flow to \$8.8 million as of September 30, 2015.

As of December 31, 2014, the Company recorded \$5.6 million of specific reserves to allowance for loan losses as a result of adjusting the fair value of the collateral for certain collateral dependent impaired loans to \$7.6 million, and as a result of adjusting the value based upon the discounted cash flow to \$17.6 million as of December 31, 2014.

The Company obtains updated appraisals for collateral dependent impaired loans and other real estate owned on an annual basis, unless circumstances require a more frequent appraisal.

IMPAIRED LOANS

A loan is considered impaired when management determines it is probable that all of the principal and interest due under the original terms of the loan may not be collected or if a loan is designated as a TDR. Impairment is measured based on a discounted cash flows method or the fair value of the underlying collateral less estimated selling costs. Our policy is to obtain appraisals on collateral supporting impaired loans on an annual basis, unless circumstances dictate a shorter time frame. Appraisals are reduced by estimated costs to sell the collateral, and, under certain circumstances, additional factors that may arise and which may cause us to believe our recovered value may be less than the independent appraised value. Accordingly, impaired loans are classified as Level 3. The Company measures impairment on all loans for which it has established specific reserves as part of the allowance for loan losses.

OTHER REAL ESTATE OWNED

Real estate owned is comprised of property acquired through foreclosure or voluntarily conveyed by borrowers. These assets are recorded on the date acquired at the lower of the related loan balance or fair value, less estimated disposition costs, with the fair value being determined by appraisal. Our policy is to obtain appraisals on collateral supporting OREO on an annual basis, unless circumstances dictate a shorter time frame. Appraisals are reduced by estimated costs to sell the collateral, and, under certain circumstances, additional factors that may arise and which may cause us to believe our recovered value may be less than the independent appraised value. Accordingly, real estate owned is classified as Level 3.

LEVEL 3 VALUATION

The following tables present additional quantitative information about assets measured at fair value on a recurring and non-recurring basis and for which we have utilized Level 3 inputs to determine fair value as of September 30, 2015 and December 31, 2014:

(Dollars in thousands)	September 30, 2015			
	Fair Value	Valuation Techniques ⁽¹⁾	Significant Unobservable Inputs	Weighted Average Discount Rate
Loans measured for impairment, net	\$4,695	Appraisal value	Discount due to salability conditions	— %
Loans measured for impairment, net	\$8,784	Discounted cash flow	Discount due to restructured nature of operations	10 %
Other real estate owned	\$1,766	Appraisal value		10 %

Discount due
to salability
conditions

Fair value is generally determined through independent appraisals of the underlying collateral, which may include
(1) level 3 inputs that are not identifiable, or by using the discounted cash flow method if the loan is not collateral
dependent.

35

Table of Contents

(Dollars in thousands)	December 31, 2014		Significant Unobservable Inputs	Weighted Average Discount Rate
	Fair Value	Valuation Techniques ⁽¹⁾		
Loans measured for impairment, net	\$7,559	Appraisal value or Market multiple	Discount due to salability conditions	10 %
Loans measured for impairment, net	\$17,618	Discounted cash flow	Discount due to restructured nature of operations	10 %
Other real estate owned	\$1,370	Appraisal value	Discount due to salability conditions	10 %

Fair value is generally determined through independent appraisals or market multiple of the underlying collateral, ⁽¹⁾ which may include level 3 inputs that are not identifiable, or by using the discounted cash flow method if the loan is not collateral dependent.

FAIR VALUE OF FINANCIAL INSTRUMENTS

A summary of the carrying amounts and estimated fair values of financial instruments is as follows:

(Dollars in thousands)	September 30, 2015			December 31, 2014	
	Fair Value Level	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:					
Cash and cash equivalents	1	\$100,424	\$100,424	\$105,710	\$105,710
Investment securities available-for-sale: debt	2	165,721	165,721	158,534	158,534
Investment securities available-for-sale: equity	1	7,864	7,864	8,038	8,038
Investment securities held-to-maturity	2	46,427	47,261	39,591	40,113
Loans held-for-investment, net	3	2,641,841	2,641,658	2,379,779	2,376,075
Accrued interest receivable	2	6,693	6,693	6,279	6,279
Investment management fees receivable	2	6,294	6,294	6,818	6,818
Federal Home Loan Bank stock	2	8,002	8,002	5,730	5,730
Bank owned life insurance	2	59,575	59,575	53,323	53,323
Interest rate swaps	2	11,730	11,730	6,327	6,327
Other real estate owned	3	1,766	1,766	1,370	1,370
Financial liabilities:					
Deposits	2	\$2,600,508	\$2,601,190	\$2,336,953	\$2,337,734
Borrowings	2	175,000	175,738	165,000	165,163
Interest rate swaps	2	12,889	12,889	7,291	7,291

During the nine months ended September 30, 2015 and 2014, there were no transfers between fair value Levels 1, 2 or 3.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments as of September 30, 2015 and December 31, 2014:

CASH AND CASH EQUIVALENTS

The carrying amount approximates fair value.

INVESTMENT SECURITIES

The fair values of investment securities available-for-sale, held-to-maturity and trading are based on quoted market prices for the same or similar securities, recently executed transactions and pricing models.

LOANS HELD-FOR-INVESTMENT

The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Fair value as determined here does not represent an exit price. Impaired loans are generally valued at the fair value of the associated collateral.

Table of Contents

ACCRUED INTEREST RECEIVABLE

The carrying amount approximates fair value.

INVESTMENT MANAGEMENT FEES RECEIVABLE

The carrying amount approximates fair value.

FEDERAL HOME LOAN BANK STOCK

The carrying value of our FHLB stock, which is a marketable equity investment, approximates fair value.

BANK OWNED LIFE INSURANCE

The fair value of the general account bank owned life insurance is based on the insurance contract net cash surrender value.

OTHER REAL ESTATE OWNED

Real estate owned is recorded on the date acquired at the lower of the related loan balance or fair value, less estimated disposition costs, with the fair value being determined by appraisal.

DEPOSITS

The fair value of demand deposits is the amount payable on demand as of the reporting date, i.e., their carrying amounts. The fair value of fixed maturity certificates of deposit is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities.

BORROWINGS

The fair value of our borrowings is calculated by discounting scheduled cash flows through the estimated maturity using period end market rates for borrowings of similar remaining maturities.

INTEREST RATE SWAPS

The fair value of interest rate swaps are estimated through the assistance of an independent third party and compared to the fair value determined by the swap counterparty to establish reasonableness.

OFF-BALANCE SHEET INSTRUMENTS

Fair values for the Company's off-balance sheet instruments, which consist of lending commitments, standby letters of credit and risk participation agreements related to interest rate swap agreements, are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. Management believes that the fair value of these off-balance sheet instruments is not significant.

[13] CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following tables show the changes in accumulated other comprehensive income (loss), for the periods presented:

Net other comprehensive income (loss)	(286)1,665
Balance, end of period	\$(913)\$(79)

Consists of net realized gains on sales of investment securities available-for-sale of \$17,000 and \$1.4 million, net ⁽¹⁾ of income tax expense of \$6,000 and \$511,000 for the nine months ended September 30, 2015 and 2014, respectively.

[14] CONTINGENT LIABILITIES

The Company is not subject to any asserted claims nor is it aware of any unasserted claims. In the opinion of management, there are no potential claims that would have a material adverse effect on the Company's financial position, liquidity or results of operations.

[15] SEGMENTS

Since the Chartwell acquisition on March 5, 2014, the Company operates two reportable segments: Bank and Investment Management.

The Bank segment provides commercial banking and private banking services to middle-market businesses and high-net-worth individuals through the TriState Capital Bank subsidiary.

The Investment Management segment provides advisory and sub-advisory investment management services to primarily institutional plan sponsors through the Chartwell Investment Partners, LLC subsidiary and also provides distribution and marketing efforts for Chartwell's proprietary investment products through the Chartwell TSC Securities Corp. subsidiary.

The following tables provide financial information for the two segments of the Company as of and for the periods indicated. The information provided under the caption "Parent and Other" represents operations not considered to be reportable segments and/or general operating expenses of the Company, which includes the parent company activity as well as eliminations and adjustments which are necessary for purposes of reconciliation to the consolidated amounts.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section presents management's perspective on our financial condition and results of operations and highlights material changes to the financial condition and results of operations as of and for the three and nine months ended September 30, 2015. The following discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements and related notes contained herein and our consolidated financial statements and notes thereto and Management's Discussion and Analysis included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 23, 2015.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of section 27A of the Securities Act and section 21E of the Exchange Act. These forward-looking statements reflect our current views with respect to, among other things, future events and our financial performance. These statements are often, but not always, made through the use of words or phrases such as "may," "should," "could," "predict," "potential," "believe," "will likely result," "expect," "continue," "anticipate," "seek," "estimate," "intend," "plan," "projection," "would" and "outlook," or the negative version of those words or phrases. Forward-looking statements are by their nature comparable of a future or forward-looking nature. These forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about our industry, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, we caution you that any such forward-looking statements are not guarantees of future performance and are subject to risks, assumptions and uncertainties that are difficult to predict. Although we believe that the expectations reflected in these forward-looking statements are reasonable as of the date made, actual results may prove to be materially different from the results expressed or implied by the forward-looking statements.

There are or will be important factors that could cause our actual results to differ materially from those indicated in these forward-looking statements, including, but not limited to, the following:

- Deterioration of our asset quality;
- Our ability to prudently manage our growth and execute our strategy;
- Changes in the value of collateral securing our loans;
- Business and economic conditions generally and in the financial services industry, nationally and within our local market area;
- Changes in management personnel;
- Our ability to maintain important deposit customer relationships, our reputation and otherwise avoid liquidity risks;
- Our ability to provide investment management performance competitive with our peers and benchmarks;
- Operational risks associated with our business;
- Volatility and direction of market interest rates;
- Increased competition in the financial services industry, particularly from regional and national institutions;
- Changes in the laws, rules, regulations, interpretations or policies relating to financial institutions, accounting, tax, trade, monetary and fiscal matters;
- Further government intervention in the U.S. financial system;
- Natural disasters and adverse weather, acts of terrorism, an outbreak of hostilities or other international or domestic calamities, and other matters beyond our control; and
- Other factors that are discussed in the section entitled "Risk Factors," in our Annual Report on Form 10-K, filed with the SEC on February 23, 2015, which is accessible at www.sec.gov.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this document. If one or more events related to these or other risks or uncertainties materialize,

or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Accordingly, you should not place undue reliance on any such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made, and we do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New factors emerge from time to time, and it is not possible for us to predict which will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

Table of Contents

General

We are a bank holding company that operates through two reporting segments: Bank and Investment Management. The Bank segment generates most of its revenue from interest on loans and investments, loan-related fees and deposit-related fees. Its primary source of funding for loans is deposits. Its largest expenses are interest on these deposits and salaries and related employee benefits. The Investment Management segment originated through the acquisition of substantially all of the assets of Chartwell Investment Partners, LP which was consummated on March 5, 2014, and the recent formation of Chartwell TSC Securities Corp., which is applying to be registered as a broker/dealer with the SEC and FINRA. The Investment Management segment generates most of its revenue from investment management fees earned on assets under management and its largest expenses are salaries and related employee benefits.

The following discussion and analysis presents our financial condition and results of operations on a consolidated basis, except where significant segment disclosures are necessary to better explain the operations of each segment and related variances. In particular, the discussion and analysis of non-interest income and non-interest expense is reported by segment.

We measure our performance primarily through our total revenue; earnings per common share; pre-tax, pre-provision net revenue; ratio of allowance for loan losses to loans; assets under management; return on average assets; return on average equity; the efficiency ratio of the Bank segment; and net interest margin, among other metrics, while maintaining appropriate regulatory leverage and risk-based capital ratios.

Executive Overview

TriState Capital Holdings, Inc. ("we", "us", "our" or the "Company") is a bank holding company headquartered in Pittsburgh, Pennsylvania. The Company has three wholly owned subsidiaries: TriState Capital Bank (the "Bank"), a Pennsylvania chartered bank; Chartwell Investment Partners, LLC ("Chartwell"), a registered investment advisor; and Chartwell TSC Securities Corp. ("CTSC Securities"), which is applying to be registered as a broker/dealer with the SEC and FINRA. Through our bank subsidiary, we serve middle-market businesses in our primary markets throughout the states of Pennsylvania, Ohio, New Jersey and New York. We also serve high-net-worth individuals on a national basis through our private banking channel. We market and distribute our products and services through a scalable branchless banking model, which creates significant operating leverage throughout our business as we continue to grow. Through our investment management subsidiary, we provide investment management services to institutional, sub-advisory, managed account and private clients on a national basis. Our broker/dealer subsidiary, once registered, will provide additional distribution and marketing efforts for Chartwell's proprietary investment products.

For the three months ended September 30, 2015, our net income was \$6.1 million compared to \$5.7 million for the same period in 2014, an increase of \$412,000, primarily due to the net impact of (1) a \$710,000, or 4.4%, increase in our net interest income, (2) a decrease in provision for loan losses of \$2.0 million, (3) a decrease in non-interest income of \$1.2 million largely related to lower investment management fees and swap activity, (4) an increase of \$628,000 in our non-interest expense and (5) a \$436,000 increase in income taxes.

For the nine months ended September 30, 2015, our net income was \$16.9 million compared to \$10.8 million for the same period in 2014, an increase of \$6.1 million, primarily due to the net impact of (1) a \$1.9 million, or 3.9%, increase in our net interest income, (2) a decrease in provision for loan losses of \$10.6 million, (3) an increase in non-interest income of \$3.9 million largely related to higher investment management fees with the addition of Chartwell and higher swap fees offset by lower net gain on the sale of investment securities available-for-sale, (4) an increase of \$7.0 million in our non-interest expense largely related to the addition of Chartwell and (5) a \$3.2 million

increase in income taxes.

Our diluted EPS was \$0.22 for the three months ended September 30, 2015, compared to \$0.20 for the same period in 2014. The increase is a result of an increase of \$412,000 in our net income and lower dilutive average shares largely related to the purchase of treasury stock.

Our diluted EPS was \$0.60 for the nine months ended September 30, 2015, compared to \$0.37 for the same period in 2014. The increase is a result of an increase of \$6.1 million in our net income and lower dilutive average shares largely related to the purchase of treasury stock.

Our annualized return on average assets was 0.79% and 0.76% for the three and nine months ended September 30, 2015, respectively, as compared to 0.83% and 0.56% for the same periods in 2014, respectively. Our annualized return on average equity was 7.64% and 7.23%, for the three and nine months ended September 30, 2015, respectively, as compared to 7.42% and 4.80% for the same periods in 2014, respectively.

For the three and nine months ended September 30, 2015, the Bank's efficiency ratio was 64.93% and 62.36%, respectively, as compared to 58.34% and 59.82% for the same periods in 2014, respectively, due to lower total revenue of the Bank segment during the three months ended September 30, 2015. Our non-interest expense to average assets for the three and nine months ended September 30, 2015, was 2.25% and 2.35%, respectively, compared to 2.43% and 2.34%, for the same periods in 2014, respectively.

Table of Contents

For the three months ended September 30, 2015, total revenue decreased \$516,000, or 2.0%, to \$25.0 million from \$25.5 million for the same period in 2014, driven by lower investment management fees and swap activity partially offset by higher interest income from loan growth. Pre-tax, pre-provision net revenue decreased \$1.1 million, or 12.9%, to \$7.7 million for the three months ended September 30, 2015, from \$8.9 million for the same period in 2014, primarily resulting from the lower total revenue and higher non-interest expense.

For the nine months ended September 30, 2015, total revenue increased \$7.2 million, or 10.3%, to \$76.8 million from \$69.6 million for the same period in 2014, driven by two additional months of Chartwell's revenue and growth in our loan income and swap fees. Pre-tax, pre-provision net revenue increased \$121,000, or 0.5%, to \$24.8 million for the nine months ended September 30, 2015, from \$24.7 million for the same period in 2014, primarily resulting from the Chartwell acquisition.

Our annualized net interest margin was 2.32% and 2.38% for the three and nine months ended September 30, 2015, respectively, as compared to 2.50% and 2.62%, for the same periods in 2014, respectively. The most significant factor driving net interest margin compression has been our shift toward lower-risk assets, most notably the marketable-securities-backed private banking margin loan portfolio that the Bank has made its fastest growing channel. In addition, net interest margin for the nine months ended September 30, 2015, was impacted by the additional interest expense from our June 2014 subordinated debt placement.

TriState Capital Holdings' total risk-based capital ratio increased to 13.99% as of September 30, 2015, from 11.02% as of December 31, 2014. TriState Capital Bank's total risk-based capital ratio increased to 13.48% as of September 30, 2015, from 10.69% as of December 31, 2014. The increase in the risk-based capital ratios are primarily due to the new Basel III capital rules effective January 1, 2015. The Company benefits from risk-weighted capital treatment recognizing the lower-risk profile of our private banking channel margin loans, which are over-collateralized by cash and marketable securities that are priced and monitored daily. This implementation had the favorable net effect of making \$70 million of regulatory capital available to the Bank in the first quarter of 2015.

Total assets of \$3.1 billion as of September 30, 2015, increased \$283.4 million, or 13.3% on an annualized basis, from December 31, 2014. Total loans grew by \$261.1 million to \$2.7 billion as of September 30, 2015, an annualized increase of 14.5% from December 31, 2014, as a result of growth in our private banking and commercial real estate loan portfolios. Total deposits increased \$263.6 million, or 15.1% on an annualized basis, to \$2.6 billion as of September 30, 2015, from December 31, 2014.

Non-performing assets to total assets decreased to 0.67% as of September 30, 2015, from 1.11% as of December 31, 2014, primarily due to \$10.7 million in paydowns, a sale, a charge-off and two payoffs on non-performing loans during the nine months ended September 30, 2015. Annualized net charge-offs to average loans for the three and nine months ended September 30, 2015, was 0.11% and 0.04%, respectively, as compared to 0.19% and 0.45% for the same periods in 2014, respectively.

The allowance for loan losses to loans was 0.73% as of September 30, 2015, compared to 0.84% as of December 31, 2014 driven by a \$1.1 million reserve reversal from payoffs on two substandard-rated credits and a \$433,000 recovery on one loan previously charged-off. The allowance for loan losses to non-performing loans increased to 101.21% as of September 30, 2015, from 67.06% as of December 31, 2014. This change was primarily due to lower non-performing loan balances as of September 30, 2015. The credit to provision for loan losses was \$1.3 million and \$231,000 for the three and nine months ended September 30, 2015, respectively, as compared to provision expense of \$651,000 and \$10.4 million for the same periods in 2014, respectively. The trend of our recent credit provision reflects the change in complexion of our loan portfolio over the past year with a decrease in adverse-rated credits and a much larger percentage of the portfolio in loans secured by marketable securities.

Our book value per common share increased \$0.56, or 5.1%, to \$11.44 as of September 30, 2015, from \$10.88 as of December 31, 2014, largely as a result of an increase in our net income. Our tangible equity to tangible assets ratio decreased to 8.75% as of September 30, 2015, from 9.05% as of December 31, 2014, primarily as a result of the purchase of treasury stock.

Non-GAAP Financial Measures

The information set forth above contains certain financial information determined by methods other than in accordance with GAAP. These non-GAAP financial measures are “tangible equity,” “tangible equity to tangible assets,” “total revenue,” “pre-tax, pre-provision net revenue,” and “efficiency ratio.” Although we believe these non-GAAP financial measures provide a greater understanding of our business, these measures are not necessarily comparable to similar measures that may be presented by other companies.

“Tangible equity” is defined as shareholders' equity reduced by intangible assets, including goodwill, if any. We believe this measure is important to management and investors to better understand and assess changes from period to period in shareholders' equity exclusive of changes in intangible assets. Goodwill, an intangible asset that is recorded in a business purchase combination, has the effect of increasing both equity and assets, while not increasing our tangible equity or tangible assets.

Table of Contents

“Tangible equity to tangible assets” is defined as the ratio of shareholders' equity reduced by intangible assets, divided by total assets reduced by intangible assets. We believe this measure is important to many investors who are interested in relative changes from period to period in equity and total assets, each exclusive of changes in intangible assets.

“Total revenue” is defined as net interest income and non-interest income, excluding gains and losses on the sale of investment securities available-for-sale. We believe adjustments made to our operating revenue allow management and investors to better assess our operating revenue by removing the volatility that is associated with certain other items that are unrelated to our core business.

“Pre-tax, pre-provision net revenue” is defined as net income, without giving effect to loan loss provision and income taxes, and excluding gains and losses on the sale of investment securities available-for-sale. We believe this measure is important because it allows management and investors to better assess our performance in relation to our core operating revenue, excluding the volatility that is associated with provision for loan losses or other items that are unrelated to our core business.

“Efficiency ratio” is defined as non-interest expense divided by our total revenue. “Efficiency ratio, as adjusted” is defined as non-interest expense, excluding non-recurring expenses associated with the Chartwell acquisition and intangible amortization expense, where applicable, divided by our total revenue. We believe this measure, particularly at the Bank, allows management and investors to better assess our operating expenses in relation to our core operating revenue by removing the volatility that is associated with certain one-time items and other discrete items that are unrelated to our core business.

Results of Operations

Net Interest Income

Net interest income represents the difference between the interest and fees earned on interest-earning assets and the interest paid on interest-bearing liabilities. Net interest income is affected by changes in the volume of interest-earning assets and interest-bearing liabilities and changes in interest yields earned and rates paid. Maintaining consistent spreads between earning assets and interest-bearing liabilities is significant to our financial performance because net interest income comprised 65.2% and 69.2% of total revenue for the nine months ended September 30, 2015 and 2014, respectively.

The table below reflects an analysis of net interest income, on a fully taxable equivalent basis, for the periods indicated. The adjustment to convert certain income to a fully taxable equivalent basis consists of dividing tax exempt income by one minus the statutory federal income tax rate of 35.0%.

(Dollars in thousands)	Three Months Ended September		Nine Months Ended September

⁽¹⁾ Net interest margin is calculated on a fully taxable equivalent basis.

The following table provides information regarding the average balances and yields earned on interest-earning assets and the average balances and rates paid on interest-bearing liabilities for the three months ended September 30, 2015

and 2014. Non-accrual loans are included in the calculation of the average loan balances, while interest collected on non-accrual loans is recorded as a reduction to principal. Where applicable, interest income and yield are reflected on a fully taxable equivalent basis, and have been adjusted based on the statutory federal income tax rate of 35.0%.

⁽¹⁾ Net interest income and net interest margin are calculated on a fully taxable equivalent basis.

Net Interest Income for the Three Months Ended September 30, 2015 and 2014. Net interest income, calculated on a fully taxable equivalent basis, increased \$721,000, or 4.4%, to \$17.0 million for the three months ended September 30, 2015, from \$16.3 million for the same period in 2014. The increase in net interest income for the three months ended September 30, 2015, was primarily attributable to a \$324.9 million, or 12.5%, increase in average interest-earning assets driven largely by loan growth. The increase in net interest income reflects an increase of \$1.3 million, or 6.4%, in interest income, partially offset by an increase of \$549,000, or 16.0%, in interest expense. Net interest margin decreased to 2.32% for the three months ended September 30, 2015, as compared to 2.50% for the same period in 2014 driven primarily by lower overall yield from the loan portfolio.

The increase in interest income was primarily the result of an increase in average total loans of \$358.2 million, or 16.0%, which is our primary earning asset and the Bank's core business, partially offset by a decrease of 30 basis points in yield on our loans. The most significant factor of the declining yield on our loan portfolio has been our shift toward lower-risk assets, most notably the marketable-securities-backed private banking loan portfolio that the Bank has made its fastest growing channel. The overall yield on interest-earning assets declined 16 basis points to 2.86% for

the three months ended September 30, 2015, as compared to 3.02% for the same period in 2014, primarily as a result of the lower yield on loans, driven largely by the increase in our private banking portfolio.

Interest expense on interest-bearing liabilities of \$4.0 million, for the three months ended September 30, 2015, increased \$549,000, or 16.0%, from the same period in 2014 as a result of an increase of \$310.1 million, or 13.7%, in average interest-bearing liabilities for the three months ended September 30, 2015, coupled with an increase of two basis points in the average rate paid on our average interest-bearing liabilities compared to the same period in 2014. The increase in average rate paid was reflective of increases primarily in rates paid on money market deposit accounts and CDARS[®] time deposits. The increase in average interest-bearing liabilities was driven primarily by an increase of \$282.5 million, or 24.9%, in average money market deposit accounts.

Table of Contents

The following table analyzes the dollar amount of the change in interest income and interest expense with respect to the primary components of interest-earning assets and interest-bearing liabilities. The table shows the amount of the change in interest income or interest expense caused by either changes in outstanding balances or changes in interest rates for the three months ended September 30, 2015 and 2014. The effect of a change in balances is measured by applying the average rate during the first period to the balance (“volume”) change between the two periods. The effect of changes in rate is measured by applying the change in rate between the two periods to the average volume during the first period.

(1) Net interest income and net interest margin are calculated on a fully taxable equivalent basis.

Net Interest Income for the Nine Months Ended September 30, 2015 and 2014. Net interest income, calculated on a fully taxable equivalent basis, increased \$1.9 million, or 3.9%, to \$50.2 million for the nine months ended September 30, 2015, from \$48.3 million for the same period in 2014. The increase in net interest income for the nine months ended September 30, 2015, was primarily attributable to a \$360.8 million, or 14.6%, increase in average interest-earning assets driven largely by loan growth. The increase in net interest income reflects an increase of \$4.4 million, or 7.7%, in interest income, partially offset by an increase of \$2.5 million, or 28.3%, in interest expense. Net interest margin decreased to 2.38% for the nine months ended September 30, 2015, as compared to 2.62% for the same period in 2014 driven by higher interest expense from the issuance of subordinated debt in June 2014 and on overall lower yield from the loan portfolio.

The increase in interest income was primarily the result of an increase in average total loans of \$433.3 million, or 20.9%, which is our primary earning asset and the Bank's core business, as well as a decrease of \$68.7 million in average cash balances, partially offset by a decrease of 38 basis points in yield on our loans. The most significant factor of the declining yield on our loan portfolio has been our shift toward lower-risk assets, most notably the

marketable-securities-backed private banking loan portfolio that the Bank has made its fastest growing channel. The overall yield on interest-earning assets declined 19 basis points to 2.91% for the nine months ended September 30, 2015, as compared to 3.10% for the same period in 2014, primarily as a result of the lower yield on loans, driven largely by the increase in our private banking portfolio.

Interest expense on interest-bearing liabilities of \$11.3 million, for the nine months ended September 30, 2015, increased \$2.5 million, or 28.3%, from the same period in 2014 as a result of an increase of \$352.4 million, or 16.6%, in average interest-bearing liabilities for the nine months ended September 30, 2015, coupled with an increase of five basis points in the average rate paid on our average interest-bearing liabilities compared to the same period in 2014. The increase in average rate paid was reflective of increases in rates paid in all interest-bearing deposit categories and FHLB borrowings. The increase in average interest-bearing liabilities was driven primarily by

Table of Contents

an increase of \$275.9 million, or 25.8%, in average money market deposit accounts and an increase of \$20.0 million in the average balance of subordinated debt.

The following table analyzes the dollar amount of the change in interest income and interest expense with respect to the primary components of interest-earning assets and interest-bearing liabilities. The table shows the amount of the change in interest income or interest expense caused by either changes in outstanding balances or changes in interest rates for the nine months ended September 30, 2015 and 2014. The effect of a change in balances is measured by applying the average rate during the first period to the balance (“volume”) change between the two periods. The effect of changes in rate is measured by applying the change in rate between the two periods to the average volume during the first period.

(Dollars in thousands)	Nine Months Ended September 30,		
	2015 over 2014

The change in interest income and expense due to change in composition and applicable yields and rates has been (1) allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

Provision for Loan Losses

The provision (credit) for loan losses represents our determination of the amount necessary to be charged against the current period's earnings to maintain the allowance for loan losses at a level that is considered adequate in relation to the estimated losses inherent in the loan portfolio. For additional information regarding our allowance for loan losses, see “Allowance for Loan Losses.”

Provision (Credit) for Loan Losses for the Three Months Ended September 30, 2015 and 2014. We recorded a credit to provision for loan losses of \$1.3 million for the three months ended September 30, 2015 compared to \$651,000 of provision expense for the three months ended September 30, 2014. The credit to provision for the three months ended September 30, 2015, was largely driven by a \$1.1 million reserve reversal from payoffs on two substandard-rated credits and one recovery of \$433,000 all on commercial and industrial loans. The provision for loan losses for the

three months ended September 30, 2014, was driven by the increases in specific reserves on non-performing loans for the commercial and industrial portfolio.

Provision (Credit) for Loan Losses for the Nine Months Ended September 30, 2015 and 2014. We recorded a credit to provision for loan losses of \$231,000 for the nine months ended September 30, 2015 compared to \$10.4 million provision expense for the nine months ended September 30, 2014. The credit to provision for the nine months ended September 30, 2015, was comprised of a net decrease of \$1.9 million in general reserves on commercial and industrial loans as described above and recoveries of \$794,000 offset by increased specific reserves of \$2.2 million on commercial and industrial non-performing loans, of which \$1.5 million was charged-off. The provision for loan losses for the nine months ended September 30, 2014, was comprised of (a) the impact of \$7.6 million in charge-offs related to four non-performing commercial and industrial loans, (b) an increase of \$1.6 million in additional specific reserves on non-performing commercial and industrial loans and (c) \$2.5 million increased commercial and industrial general reserves largely driven by the impact

Table of Contents

of charge-offs and loans that were downgraded during the year, partially offset by (d) recoveries of \$495,000 on two commercial and industrial loans and (e) a decrease of \$713,000 in the general reserve of the commercial real estate portfolio due to improved credit quality.

Non-Interest Income

Non-interest income is an important component of our revenue and it is comprised primarily of investment management fees for Chartwell coupled with fees generated from loan and deposit relationships with our Bank customers, including swap transactions. In addition, from time to time as opportunities arise, we sell portions of our investment securities available-for-sale portfolio. Gains or losses experienced on these sales are less predictable than many of the other components of our non-interest income because the amount of realized gains or losses is impacted by a number of factors, including the nature of the security sold, the purpose of the sale, the interest rate environment and other market conditions. The information provided under the caption "Parent and Other" represents operations not considered to be reportable segments and/or general operating expenses of the Company, which includes the parent company activity as well as eliminations and adjustments which are necessary for purposes of reconciliation to the consolidated amounts.

The following table presents the components of our non-interest income for the three months ended September 30, 2015 and 2014:

	Three Months Ended September 30, 2015				Three Months Ended September 30, 2014			
	Bank	Investment Management	Parent and Other	Consolidated	Bank	Investment Management	Parent and Other	Consolidated
(Dollars in thousands)								
Investment management fees	\$—	\$ 7,074	\$(54)	\$ 7,020	\$—	\$ 7,470	\$(52)	\$ 7,418
Service charges	148	—	—	148	163	—	—	163
Swap fees	297	—	—	297	563	—	—	563
Commitment and other fees	487	—	—	487	551	—	—	551
Other income ⁽¹⁾	119	(7)	—	112	598	(3)	—	595
Total non-interest income	\$1,051	\$ 7,067	\$(54)	\$ 8,064	\$1,875	\$ 7,467	\$(52)	\$ 9,290

(1) Other income includes such items as income from BOLI, unrealized gain (loss) on swaps, FHLB stock dividends, gain on the sale of loans and other general operating income.

Non-Interest Income for the Three Months Ended September 30, 2015 and 2014. Our non-interest income was \$8.1 million for the three months ended September 30, 2015, a decrease of \$1.2 million, or 13.2%, from \$9.3 million for the same period in 2014, primarily related to decreases in investment management fees, swap fees and other income.

Investment Management Segment:

Investment management fees were \$7.1 million for the three months ended September 30, 2015, compared to \$7.5 million for the three months ended September 30, 2014. Assets under management of \$7.6 billion as of September 30, 2015, increased \$47.0 million from September 30, 2014, which reflects growth in new business and net inflows offset by general declines in the U.S. equity markets for the three months ended September 30, 2015.

Bank Segment:

•

Swap fees of \$297,000 for the three months ended September 30, 2015, decreased \$266,000, as compared to \$563,000 for the same period in 2014, driven by fluctuations in customer demand for long-term interest rate protection. The level and frequency of income associated with swap transactions can vary materially from period to period, based on customers' expectations of market conditions.

Other income of \$119,000 for the three months ended September 30, 2015, decreased \$479,000, as compared to \$598,000 for the same period in 2014, primarily due to a decrease of \$407,000 in the fair values of our swaps.

Table of Contents

The following table presents the components of our non-interest income for the nine months ended September 30, 2015 and 2014:

(Dollars in thousands)	Nine Months Ended September 30, 2015				Nine Months Ended September 30, 2014			
	Bank	Investment Management	Parent and Other	Consolidated	Bank	Investment Management	Parent and Other	Consolidated
Investment management fees	\$—	\$ 22,332	\$(143)	\$ 22,189	\$—	\$ 17,484	\$(103)	\$ 17,381
Service charges	487	—	—	487	447	—	—	447
Net gain on the sale of investment securities available-for-sale	17	—	—	17	1,428	—	—	1,428
Swap fees	1,311	—	—	1,311	972	—	—	972
Commitment and other fees	1,487	—	—	1,487	1,531	—	—	1,531
Other income ⁽¹⁾	1,268	(6)	—	1,262	1,094	38	—	1,132
Total non-interest income	\$4,570	\$ 22,326	\$(143)	\$ 26,753	\$ 5,472	\$ 17,522	\$(103)	\$ 22,891

⁽¹⁾ Other income includes such items as income from BOLI, unrealized gain (loss) on swaps, FHLB stock dividends, gain on the sale of loans and other general operating income.

Non-Interest Income for the Nine Months Ended September 30, 2015 and 2014. Our non-interest income was \$26.8 million for the nine months ended September 30, 2015, an increase of \$3.9 million, or 16.9%, from \$22.9 million for the same period in 2014, primarily related to increases in investment management fees, swap fees and other income partially offset by lower net gain on the sale of investment securities available-for-sale.

Investment Management Segment:

Investment management fees were \$22.3 million for the nine months ended September 30, 2015, which represented nine months of revenue for Chartwell, as compared to \$17.5 million for the nine months ended September 30, 2014, which represented only seven months of revenue for Chartwell. Assets under management of \$7.6 billion as of September 30, 2015, increased \$47.0 million from September 30, 2014.

Bank Segment:

Net gain on the sale of investment securities available-for-sale was \$17,000 for the nine months ended September 30, 2015, compared to \$1.4 million for the same period in 2014.

Swap fees of \$1.3 million for the nine months ended September 30, 2015, increased \$339,000, as compared to \$972,000 for the same period in 2014, driven by fluctuations in customer demand for long-term interest rate protection. The level and frequency of income associated with swap transactions can vary materially from period to period, based on customers' expectations of market conditions.

Other income of \$1.3 million for the nine months ended September 30, 2015, increased \$174,000, as compared to \$1.1 million for the same period in 2014, primarily due to \$212,000 of higher dividends on FHLB stock, \$210,000 of higher income from BOLI as a result of an increase in our investment partially offset by a decrease of \$145,000 in the fair values of our swaps and \$79,000 lower gain on the sale of loans.

Non-Interest Expense

Our non-interest expense represents the operating cost of maintaining and growing our business. The largest portion of non-interest expense for each segment is compensation and employee benefits, which include employee payroll expense as well as the cost of incentive compensation, benefit plans, health insurance and payroll taxes, all of which are impacted by the growth in our employee base, coupled with increases in the level of compensation and benefits of our existing employees. The information provided under the caption "Parent and Other" represents operations not considered to be reportable segments and/or general operating expenses of the Company, which includes the parent company activity as well as eliminations and adjustments which are necessary for purposes of reconciliation to the consolidated amounts.

Table of Contents

The following table presents the components of our non-interest expense by operating segment for the three months ended September 30, 2015 and 2014:

(Dollars in thousands)	Three Months Ended September 30, 2015				Three Months Ended September 30, 2014			
	Bank	Investment Management	Parent and Other	Consolidated	Bank	Investment Management	Parent and Other	Consolidated
Compensation and employee benefits	\$7,616	\$ 3,897	\$—	\$ 11,513	\$6,619	\$ 4,606	\$—	\$ 11,225
Premises and occupancy costs	973	200	—	1,173	819	181	—	1,000

Travel and entertainment expense	498	213	—	711	455	142	—	597
Data processing expense	275	—	—	275	230	—	—	230
Intangible amortization expense	—	390	—	390	—	389	—	389
Other operating expenses ⁽¹⁾	976	428	15	1,419	971	419	19	1,409
Total non-interest expense	\$12,015	\$ 5,326	\$(40)	\$ 17,301	\$10,847	\$ 5,858	\$(32)	\$ 16,673
Full-time equivalent employees ⁽²⁾	141	53	—	194	133	49	—	182

(1) Other operating expenses includes such items as investor relations, charitable contributions, telephone, marketing, loan-related expenses, employee-related expenses and other general operating expenses.

(2) Full-time equivalent employees shown are as of the end of the periods presented.

Non-Interest Expense for the Three Months Ended September 30, 2015 and 2014. Our non-interest expense for the three months ended September 30, 2015, increased \$628,000, or 3.8%, as compared to the same period in 2014, of which \$1.2 million relates to the increase in expenses of the Bank segment offset by a \$532,000 decrease in expenses related to the Investment Management segment. The significant changes in each segment's expenses are described below.

Investment Management Segment:

Compensation and employee benefit costs decreased \$709,000 for the three months ended September 30, 2015, compared to the same period in 2014, largely due to a decrease in incentive compensation expenses as a result of the lower investment management fees for this segment.

Bank Segment:

Compensation and employee benefits costs increased \$997,000 for the three months ended September 30, 2015, compared to the same period in 2014. The increase was primarily due higher incentive compensation expense as a result of higher net income for the Bank segment as compared to the same period 2014. In addition, the three months

ended September 30, 2015 had an increase in the number of full-time equivalent employees, increases in the overall annual wage and benefits costs of our existing employees and an increase in stock-based compensation expense.

Premise and occupancy costs increased \$154,000 for the three months ended September 30, 2015, compared to the same period in 2014, primarily due to increases in rent expense related to the expansion of the Pittsburgh office and the new lease for the New York City office.

FDIC insurance expense decreased \$104,000 for the three months ended September 30, 2015, as compared to the same period in 2014, largely due to a decreased assessment related to the improved credit quality of the loan portfolio.

Table of Contents

The following table presents the components of our non-interest expense by operating segment for the nine months ended September 30, 2015 and 2014:

(Dollars in thousands)	Nine Months Ended September 30, 2015				Nine Months Ended September 30, 2014			
	Bank	Investment Management	Parent and Other	Consolidated	Bank	Investment Management	Parent and Other	Consolidated
Compensation and employee benefits	\$21,464	\$ 13,067	\$—	\$ 34,531	\$18,909	\$ 10,545	\$—	\$ 29,454
Premises and occupancy costs	2,862	577	—	3,439	2,488	427	—	2,915

Travel and entertainment expense	1,318	555	—	1,873	1,325	398	—	1,723
Data processing expense	805	—	—	805	686	—	—	686
Intangible amortization expense	—	1,169	—	1,169	—	909	—	909
Other operating expenses ⁽¹⁾	3,063	1,248	74	4,385	2,675	897	49	3,621
Total non-interest expense	\$34,958	\$ 17,100	\$(73)	\$ 51,985	\$31,547	\$ 13,414	\$(12)	\$ 44,949

(1) Other operating expenses includes such items as investor relations, charitable contributions, telephone, marketing, loan-related expenses, employee-related expenses and other general operating expenses.

Non-Interest Expense for the Nine Months Ended September 30, 2015 and 2014. Our non-interest expense for the nine months ended September 30, 2015, increased \$7.0 million, or 15.7%, as compared to the same period in 2014, of which \$3.4 million relates to the increase in expenses of the Bank segment and \$3.7 million relates to the increase in expenses of the Investment Management segment, which commenced activity on March 5, 2014. The significant changes in each segment's expenses are described below.

Investment Management Segment:

Non-interest expense for the Investment Management segment increased by \$3.7 million for the nine months ended September 30, 2015, to \$17.1 million which represented nine months of Chartwell's expenses as compared to \$13.4 million in 2014, which represented only seven months of expenses.

Bank Segment:

Compensation and employee benefits costs for the nine months ended September 30, 2015, increased by \$2.6 million, compared to the same period in 2014, primarily due higher incentive compensation expense as a result of higher net income for the Bank segment as compared to the same period 2014. In addition, the nine months ended September 30, 2015, had an increase in the number of full-time equivalent employees, increases in the overall annual wage and benefits costs of our existing employees and an increase in stock-based compensation expense.

Premise and occupancy costs increased \$374,000 for the nine months ended September 30, 2015, compared to the same period in 2014, primarily due to increases in rent expense and depreciation related to the expansion of the Pittsburgh office and the new lease for the New York City office.

Professional fees decreased \$146,000 for the nine months ended September 30, 2015, compared to the same period in 2014, due to lower legal fees.

- Data processing expense increased by \$119,000 for the nine months ended September 30, 2015, as compared to the same period in 2014, largely due to increased processing fees related to increased customer levels.

Other operating expenses for the nine months ended September 30, 2015, increased by \$388,000, compared to the same period in 2014, primarily related to higher marketing costs and charitable contributions.

Income Taxes

We utilize the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the tax effects of differences between the financial statement and tax basis of assets and liabilities. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary

Table of Contents

differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities with regard to a change in tax rates is recognized in income in the period that includes the enactment date. We evaluate whether it is more likely than not that we will be able to realize the benefit of identified deferred tax assets.

Income Taxes for the Three Months Ended September 30, 2015 and 2014. For the three months ended September 30, 2015, we recognized income tax expense of \$2.9 million, or 32.5% of income before tax, as compared to income tax expense of \$2.5 million, or 30.5% of income before tax, for the same period in 2014. Our effective tax rate of 32.5% for the three months ended September 30, 2015, increased as compared to the prior year as a result of income related to the Investment Management segment.

Income Taxes for the Nine Months Ended September 30, 2015 and 2014. For the nine months ended September 30, 2015, we recognized income tax expense of \$8.1 million, or 32.5% of income before tax, as compared to income tax expense of \$4.9 million, or 31.1% of income before tax, for the same period in 2014. Our effective tax rate of 32.5% for the nine months ended September 30, 2015, increased as compared to the prior year as a result of income related to the Investment Management segment.

Financial Condition

Our total assets as of September 30, 2015, were \$3.1 billion which was an increase of \$283.4 million, or 13.3% on an annualized basis, from December 31, 2014, driven primarily by growth in our loan portfolio. As of September 30, 2015, our loan portfolio increased \$261.1 million, or 14.5% on an annualized basis, to \$2.7 billion, as compared to December 31, 2014. Total investment securities increased \$13.8 million, or 9.0% on an annualized basis, to \$220.0 million, as of September 30, 2015, from \$206.2 million, as of December 31, 2014, as a result of the net activity of purchases, repayments and sales of certain securities. Cash and cash equivalents decreased \$5.3 million, to \$100.4 million, as of September 30, 2015, from \$105.7 million, as of December 31, 2014. Our total deposits increased \$263.6 million, or 15.1% on an annualized basis, to \$2.6 billion as of September 30, 2015, primarily to fund loan growth. Borrowings increased \$10.0 million, to \$175.0 million, as of September 30, 2015, compared to December 31, 2014. Our shareholders' equity increased \$15.2 million to \$320.5 million as of September 30, 2015, compared to \$305.4 million as of December 31, 2014. This increase was primarily the result of \$16.9 million in net income and the impact of \$1.4 million in stock-based compensation, offset by the purchase of \$3.2 million in treasury stock.

Loans

The Bank's primary source of income is interest on loans. Our loan portfolio consists primarily of loans to our private banking clients, commercial and industrial loans, and real estate loans secured by commercial properties. The loan portfolio represents our largest earning asset.

The following table presents the composition of our loan portfolio by channel, as of the dates indicated:

(Dollars in thousands)	September 30, 2015		December 31, 2014		
	Outstanding	Percent of Loans	Outstanding	Percent of Loans	
Private banking channel loans	\$1,199,883	45.1	% \$989,302	41.2	%
Middle-market banking channel loans:					
Commercial and industrial	630,131	23.7	% 677,493	28.2	%
Commercial real estate	831,177	31.2	% 733,257	30.6	%
Total middle-market banking channel loans	1,461,308	54.9	% 1,410,750	58.8	%
Loans held-for-investment	\$2,661,191	100.0	% \$2,400,052	100.0	%

Loans Held-for-Investment. Loans held-for-investment increased by \$261.1 million, or 14.5% on an annualized basis, to \$2.7 billion as of September 30, 2015, as compared to December 31, 2014. Our growth for the nine months ended September 30, 2015, was comprised of an increase in private banking loans of \$210.6 million, or 28.5% annualized, a decrease in commercial and industrial loans of \$47.4 million, or 9.3% annualized, and an increase in commercial real estate loans of \$97.9 million, or 17.9% annualized.

Primary Loan Categories by Channel

Private Banking Channel Loans. Our private banking loans include personal and commercial loans, which are sourced through our private banking channel that operates on a national basis. These loans consist primarily of loans made to high-net-worth individuals, trusts and businesses that may be secured by cash, marketable securities, residential property or other financial assets. The primary source of repayment for these loans is the income and assets of the borrower. We also have a limited number of unsecured loans and lines of credit in our private banking channel loan portfolio.

Table of Contents

As of September 30, 2015 there was \$1.1 billion, or 87.7%, of private banking channel loans that were secured by cash and marketable securities as compared to \$803.5 million, or 81.2%, as of December 31, 2014. The growth in loans secured by cash and marketable securities is expected to continue as a result of our strategy to focus on this portion of our private banking business as we believe these loans tend to have a lower risk profile. On a daily basis, we price and monitor the collateral of these margin loans secured by cash and marketable securities which further reduces the risk profile of the private banking portfolio. Our private banking lines of credit are typically due on demand or if they have stated maturities, the term is predominately less than one year.

Loans sourced through our private banking channel also include loans for commercial and business purposes, a majority of which are secured by cash and marketable securities. The table below includes all loans made through our private banking channel, by collateral type, as of the dates indicated.

(Dollars in thousands)	September 30, 2015	December 31, 2014
Private banking channel loans:		
Secured by cash and marketable securities	\$ 1,052,746	\$ 803,453
Secured by real estate	120,061	161,568
Other	27,076	24,281
Total private banking channel loans	\$ 1,199,883	\$ 989,302

Middle-Market Banking - Commercial and Industrial Loans. Our commercial and industrial loan portfolio primarily includes loans made to service companies or manufacturers generally for the purpose of production, operating capacity, accounts receivable, inventory, equipment financing, acquisitions and recapitalizations. Cash flow from the borrower's operations is the primary source of repayment for these loans.

Middle-Market Banking - Commercial Real Estate Loans. Our commercial real estate loan portfolio includes loans secured by commercial purpose real estate, including both owner occupied properties and investment properties for various purposes including office, retail, industrial, multifamily and hospitality. Also included are commercial construction loans to finance the construction or renovation of structures as well as to finance the acquisition and development of raw land for various purposes. The cash flow from income producing properties or the sale of property from construction and development loans are the primary sources of repayment for these loans.

As of September 30, 2015, there were \$612.9 million of total commercial real estate loans with a floating rate and \$218.3 million with a fixed rate, as compared to \$512.5 million and \$220.8 million, respectively, as of December 31, 2014.

Loan Maturities and Interest Rate Sensitivity

The following table presents the contractual maturity ranges and the amount of such loans by channel with fixed and adjustable rates in each maturity range as of the date indicated.

(Dollars in thousands)	September 30, 2015			Total
	One Year or Less	One to Five Years	Greater Than Five Years	
Loan maturity:				
Commercial and industrial	\$ 102,341	\$ 481,736	\$ 46,054	\$ 630,131
Commercial real estate	127,914	484,619	218,644	831,177
Private banking	1,039,744	113,360	46,779	1,199,883
Loans held-for-investment	\$ 1,269,999	\$ 1,079,715	\$ 311,477	\$ 2,661,191

Interest rate sensitivity:

Edgar Filing: TriState Capital Holdings, Inc. - Form 10-Q

Fixed interest rates	\$99,590	\$209,896	\$112,451	\$421,937
Floating or adjustable interest rates	1,170,409	869,819	199,026	2,239,254
Loans held-for-investment	\$1,269,999	\$1,079,715	\$311,477	\$2,661,191

Interest Reserve Loans

As of September 30, 2015, loans with interest reserves totaled \$87.8 million, which represented 3.3% of loans held-for-investment, as compared to \$73.9 million, or 3.1%, as of December 31, 2014, due to the continued annualized growth of 17.9% in the commercial real estate portfolio. Certain loans reserve a portion of the proceeds to be used to pay interest due on the loan. These loans with interest reserves are common for construction and land development loans. The use of interest reserves is based on the feasibility of the project,

Table of Contents

the creditworthiness of the borrower and guarantors, and the loan to value coverage of the collateral. The interest reserve may be used by the borrower, when certain financial conditions are met, to draw loan funds to pay interest charges on the outstanding balance of the loan. When drawn, the interest is capitalized and added to the loan balance, subject to conditions specified during the initial underwriting and at the time the credit is approved. We have effective and ongoing procedures and controls for monitoring compliance with loan covenants, for advancing funds and determining default conditions. In addition, most of our construction lending is performed within our geographic footprint and our lenders are familiar with trends in the local real estate market.

Allowance for Loan Losses

Our allowance for loan losses represents our estimate of probable loan losses inherent in the loan portfolio at a specific point in time. This estimate includes losses associated with specifically identified loans, as well as estimated probable credit losses inherent in the remainder of the loan portfolio. Additions are made to the allowance through both periodic provisions charged to income and recoveries of losses previously incurred. Reductions to the allowance occur as loans are charged off or when the credit history of any of the three loan portfolios improves. Management evaluates the adequacy of the allowance quarterly. This evaluation is subjective and requires material estimates that may change over time. In addition, management evaluates the allowance for loan losses overall methodology and estimates used in the calculation on an annual basis.

The components of the allowance for loan losses represent estimates based upon ASC Topic 450, Contingencies, and ASC Topic 310, Receivables. ASC Topic 450 applies to homogeneous loan pools such as consumer installment, residential mortgages and consumer lines of credit, as well as commercial loans that are not individually evaluated for impairment under ASC Topic 310. ASC Topic 310 is applied to commercial and consumer loans that are individually evaluated for impairment.

Under ASC Topic 310, a loan is impaired when, based upon current information and events, it is probable that the loan will not be repaid according to its original contractual terms, including both principal and interest or if a loan is designated as a TDR. Management performs individual assessments of impaired loans to determine the existence of loss exposure and, where applicable, based upon the fair value of the collateral less estimated selling costs where a loan is collateral dependent.

In estimating probable loan loss under ASC Topic 450 we consider numerous factors, including historical charge-offs and subsequent recoveries. We also consider, but are not limited to, qualitative factors that influence our credit quality, such as delinquency and non-performing loan trends, changes in loan underwriting guidelines and credit policies, as well as the results of internal loan reviews. Finally, we consider the impact of changes in current local and regional economic conditions in the markets that we serve. Assessment of relevant economic factors indicates that some of our primary markets historically tend to lag the national economy, with local economies in those primary markets also improving or weakening, as the case may be, but at a more measured rate than the national trends.

We base the computation of the allowance for loan losses under ASC Topic 450 on two factors: the primary factor and the secondary factor. The primary factor is based on the inherent risk identified within each of the Company's three loan portfolios based on the historical loss experience of each loan portfolio and the loss emergence period. Management has developed a methodology that is applied to each of our three primary loan portfolios, consisting of commercial and industrial, commercial real estate and private banking. As the loan loss history, mix and risk rating of each loan portfolio change, the primary factor adjusts accordingly. The allowance for loan losses related to the primary factor is based on our estimates as to probable losses for each loan portfolio. The secondary factor is intended to capture risks related to events and circumstances that management believes may impact the performance of the loan portfolio. Although this factor is more subjective in nature, the methodology focuses on internal and external trends in pre-specified categories (risk factors) and applies a quantitative percentage which drives the secondary factor. We

have identified nine risk factors and each risk factor is assigned a reserve level, based on management's judgment, as to the probable impact on each loan portfolio and is monitored on a quarterly basis. As the trend in each risk factor changes, a corresponding change occurs in the reserve associated with each respective risk factor, such that the secondary factor remains current to changes in each loan portfolio. Potential problem loans are identified and monitored through frequent, formal review processes. Updates are presented to our board of directors as to the status of loan quality at least quarterly.

The following table summarizes the allowance for loan losses, as of the dates indicated:

(Dollars in thousands)	September 30, 2015	December 31, 2014	
General reserves	\$ 13,182	\$ 14,690	
Specific reserves	6,168	5,583	
Total allowance for loan losses	\$ 19,350	\$ 20,273	
 Allowance for loan losses to loans	 0.73	 %0.84	 %

Table of Contents

As of September 30, 2015, we had specific reserves totaling \$6.2 million related to three commercial and industrial loans and one private banking loan, with an aggregated total outstanding balance of \$15.0 million. All of these loans were on non-accrual status as of September 30, 2015.

As of December 31, 2014, we had specific reserves totaling \$5.6 million related to six commercial and industrial loans and one private banking loan, with an aggregated total outstanding balance of \$25.1 million. All of these loans were on non-accrual status as of December 31, 2014.

The following table summarizes allowance for loan losses by loan category and percentage of loans, as of the dates indicated:

(Dollars in thousands)	September 30, 2015			December 31, 2014			
	Reserve	Percent of Reserve	Percent of Loans	Reserve	Percent of Reserve	Percent of Loans	
Commercial and industrial	\$12,326	63.7	%23.7	% \$13,501	66.6	%28.2	%
Commercial real estate	5,729	29.6	%31.2	% 4,755	23.5	%30.6	%
Private banking	1,295	6.7	%45.1	% 2,017	9.9	%41.2	%
Total allowance for loan losses	\$19,350	100.0	%100.0	% \$20,273	100.0	%100.0	%

Allowance for Loan Losses as of September 30, 2015 and December 31, 2014. Our allowance for loan losses decreased to \$19.4 million, or 0.73% of loans, as of September 30, 2015, as compared to \$20.3 million, or 0.84% of loans, as of December 31, 2014. Our allowance for loan losses related to commercial and industrial loans decreased \$1.2 million to \$12.3 million as of September 30, 2015, as compared to \$13.5 million as of December 31, 2014. This decrease was attributable to a decrease of \$1.9 million in general reserves related primarily to payoffs from two substandard-rated loans and overall decreases in the commercial and industrial loan balances, offset by an increase of \$690,000 in specific reserves on non-performing loans. Our allowance for loan losses related to commercial real estate loans increased by \$974,000 to \$5.7 million as of September 30, 2015, as compared to \$4.8 million as of December 31, 2014. Our allowance for loan losses related to private banking loans decreased \$722,000 to \$1.3 million as of September 30, 2015, from \$2.0 million as of December 31, 2014. During the three months ended September 30, 2015, management made enhancements to the look-back period and loss emergence period used in the allowance for loan losses calculation to account for changes in the Company's portfolio and related historical loss experience. The shift in the allowance for loan losses by portfolio is a result of these enhancements and is primarily due to the lower risk profile of the margin loans within the private banking portfolio and the lengthening of the loss emergence period for the commercial portfolios.

Net Charge-Offs

Our charge-off policy for commercial and private banking loans requires that loans and other obligations that are not collectible be promptly charged off in the month the loss becomes probable, regardless of the delinquency status of the loan. We recognize a partial charge-off when we have determined that the value of the collateral is less than the remaining ledger balance at the time of the evaluation. A loan or obligation is not required to be charged off, regardless of delinquency status, if (1) we have determined there exists sufficient collateral to protect the remaining loan balance and (2) there exists a strategy to liquidate the collateral. We may also consider a number of other factors to determine when a charge-off is appropriate, including:

- The status of a bankruptcy proceeding;
- The value of collateral and probability of successful liquidation; and
- The status of adverse proceedings or litigation that may result in collection.

Table of Contents

The following table provides an analysis of the allowance for loan losses and net charge-offs for the periods indicated:

(Dollars in thousands)	Three Months Ended September		Nine Months Ended September	
	30, 2015	2014	30, 2015	2014

n/m: Not meaningful

Net Charge-Offs for the Three Months Ended September 30, 2015. Our net loan charge-offs of \$716,000, or 0.11% of average loans on an annualized basis, for the three months ended September 30, 2015, were related to a charge-off of \$1.5 million on one commercial and industrial loan, which was previously reserved, and \$770,000 in recoveries on two commercial and industrial loans.

Net Charge-Offs for the Three Months Ended September 30, 2014. Our net loan charge-offs of \$1.1 million, or 0.19% of average loans on an annualized basis, for the three months ended September 30, 2014, were related to a charge-off of \$1.2 million on one commercial and industrial loan and recoveries of \$123,000 on one commercial and industrial loan and one private banking loan.

Net Charge-Offs for the Nine Months Ended September 30, 2015. Our net loan charge-offs of \$692,000, or 0.04% of average loans on an annualized basis, for the nine months ended September 30, 2015, were related to a charge-off of \$1.5 million on one commercial and industrial loan and \$794,000 in recoveries on four commercial and industrial loans and one private banking loan.

Net Charge-Offs for the Nine Months Ended September 30, 2014. Our net loan charge-offs of \$7.0 million, or 0.45% of average loans on an annualized basis, for the nine months ended September 30, 2014, were related to charge-offs of \$7.6 million on four commercial and industrial loans and recoveries of \$589,000 on two commercial and industrial loans and one private banking loan.

Non-Performing Assets

Non-performing assets consist of non-performing loans and other real estate owned. Non-performing loans consist of loans that are on non-accrual status. OREO is real property acquired through foreclosure on the collateral underlying defaulted loans and includes in-substance foreclosures. We initially record OREO at the lower of the related loan balance or fair value, less estimated costs to sell the assets. We account for TDRs in accordance with ASC 310, Receivables.

Our policy is to place loans in all categories on non-accrual status when collection of interest or principal is doubtful, or when interest or principal payments are 90 days or more past due. There were no loans 90 days or more past due and still accruing interest as of September 30, 2015 and December 31, 2014, and there was no interest income recognized on these loans for the nine months ended September 30, 2015 and 2014, while these loans were on non-accrual. As of September 30, 2015, non-performing loans were \$19.1 million, or 0.72% of total loans, compared to \$30.2 million, or 1.26% of total loans, as of December 31, 2014. We had specific reserves of \$6.2 million and \$5.6 million as of September 30, 2015 and December 31, 2014, respectively, on these non-performing loans. The net loan balance of our non-performing loans was 40.1% and 51.3% of the original loan balance after payments, charge-offs and specific reserves as of September 30, 2015 and December 31, 2014, respectively.

Table of Contents

For additional information on our non-performing loans for September 30, 2015 and December 31, 2014, refer to Note 4, Allowance for Loan Losses, to our consolidated financial statements.

Once the determination is made that a foreclosure is necessary, the loan is reclassified as “in-substance foreclosure” until a sale date and title to the property is finalized. Once we own the property, it is maintained, marketed, rented and sold to repay the original loan. Historically, foreclosure trends in our loan portfolio have been low due to the seasoning of our portfolio. Any loans that are modified or extended are reviewed for potential classification as a TDR loan. For borrowers that are experiencing financial difficulty, we complete a process that outlines the terms of the modification, the reasons for the proposed modification and documents the current status of the borrower.

We had non-performing assets of \$20.9 million, or 0.67% of total assets, as of September 30, 2015, as compared to \$31.6 million, or 1.11% of total assets, as of December 31, 2014. The decrease in non-performing assets was primarily the result of \$10.7 million in paydowns, a sale, a charge-off and two payoffs on non-performing loans in 2015. This decrease was considered within the assessment of the determination of the allowance for loan losses. As of September 30, 2015, we had three OREO properties totaling \$1.8 million.

The following table summarizes our non-performing assets as of the dates indicated:

(Dollars in thousands)	September 30, 2015	December 31, 2014	
Non-performing loans:			
Commercial and industrial	\$14,428	\$24,665	
Commercial real estate	2,912	3,498

Allowance for loan losses to non-performing loans	101.21	% 67.06	%
Non-performing assets to total assets	0.67	% 1.11	%

⁽¹⁾ Included in total non-performing loans.

Potential Problem Loans

Potential problem loans are those loans that are not categorized as non-performing loans, but where current information indicates that the borrower may not be able to comply with repayment terms. Among other factors, we monitor past due status as an indicator of credit deterioration and potential problem loans. A loan is considered past due when the contractual principal or interest due in accordance with the terms of the loan agreement remains unpaid after the due date of the scheduled payment. To the extent that loans become past due, we assess the potential for loss on such loans as we would with other problem loans and consider the effect of any potential loss in determining any provision for probable loan losses. We also assess alternatives to maximize collection of any past due loans, including and without limitation, restructuring loan terms, requiring additional loan guarantee(s) or collateral, or other planned action.

For additional information on the age analysis of past due loans segregated by class of loan for September 30, 2015 and December 31, 2014, refer to Note 4, Allowance for Loan Losses, to our unaudited condensed consolidated

financial statements.

On a monthly basis, we monitor various credit quality indicators for our loan portfolio, including delinquency, non-performing status, changes in risk ratings, changes in the underlying performance of the borrowers and other relevant factors.

We also monitor the loan portfolio through an internal risk rating system on a periodic basis. Loan risk ratings are assigned based upon the creditworthiness of the borrower. Loan risk ratings are reviewed on an ongoing basis according to internal policies. Loans within the pass rating are viewed to have a lower risk of loss than loans that are risk rated as special mention, substandard and doubtful, which are viewed to have an increasing risk of loss. Our internal risk ratings are consistent with regulatory guidance.

For additional information on the definitions of our internal risk rating and the recorded investment in loans by credit quality indicator for September 30, 2015 and December 31, 2014, refer to Note 4, Allowance for Loan Losses, to our unaudited condensed consolidated financial statements.

Table of Contents

Investment Securities

We utilize investment activities to enhance net interest income while supporting interest rate risk management and liquidity management. Our securities portfolio consists of available-for-sale securities, held-to-maturity securities and from time to time, securities held for trading purposes. Securities purchased with the intent to sell under trading activity are recorded at fair value and changes to fair value are recognized in the consolidated statement of income. Securities categorized as available-for-sale are recorded at fair value and changes in the fair value of these securities are recognized as a component of total shareholders' equity, within accumulated other comprehensive income (loss), net of deferred taxes. Securities categorized as held-to-maturity are debt securities that the Company intends to hold until maturity and are recorded at amortized cost.

On a quarterly basis, we determine the fair market value of our investment securities based on information provided by multiple external sources. In addition, on a quarterly basis, we conduct an internal evaluation of changes in the fair market value of our investment securities to gain a level of comfort with the market value information received from the external sources.

Securities, like loans, are subject to interest rate and credit risk. In addition, by their nature, securities classified as available-for-sale are also subject to fair value risks that could negatively affect the level of liquidity available to us, as well as shareholders' equity. The Bank has engaged Chartwell to provide securities portfolio advisory services, subject to the investment parameters set forth in our investment policy.

As of September 30, 2015 and December 31, 2014, we reported securities in available-for-sale and held-to-maturity categories. In general, fair value is based upon quoted market prices of identical assets, when available. Where sufficient data is not available to produce a fair valuation, fair value is based on broker quotes for similar assets. Quarterly, we validate the prices received from these third parties by comparing them to prices provided by a different independent pricing service. We have also reviewed the valuation methodologies provided to us by our pricing services. Broker quotes may be adjusted to ensure that financial instruments are recorded at fair value. Adjustments may include unobservable parameters, among other things.

We perform a quarterly review of our investment securities to identify those that may indicate other-than-temporary impairment. Our policy for OTTI is based upon a number of factors, including but not limited to, the length of time and extent to which the estimated fair value has been less than cost, the financial condition of the underlying issuer, the ability of the issuer to meet contractual obligations, the likelihood of the investment security's ability to recover any decline in its estimated fair value and whether we intend to sell the investment security or if it is more likely than not that we will be required to sell the investment security prior to its recovery. If the financial markets experience deterioration, charges to income could occur in future periods as a result of OTTI determinations.

Our available-for-sale securities portfolio consists of U.S. government agency obligations, mortgage-backed securities, collateralized loan obligations, corporate bonds, single-issuer trust preferred securities, all with varying contractual maturities, and certain equity securities. Our held-to-maturity portfolio consists of certain municipal bonds, agency obligations and corporate bonds while our trading portfolio, when active, consists of U.S. Treasury Notes, also with varying contractual maturities. However, these maturities do not necessarily represent the expected life of the securities as the securities may be called or paid down without penalty prior to their stated maturities. The effective duration of our securities portfolio as of September 30, 2015, was approximately 1.8, where duration is defined as the approximate percentage change in price for a 100 basis point change in rates. No investment in any of these securities exceeds any applicable limitation imposed by law or regulation. Our Asset/Liability Management Committee ("ALCO") reviews the investment portfolio on an ongoing basis to ensure that the investments conform to our investment policy.

Available-for-Sale Investment Securities. We held \$173.6 million and \$166.6 million in investment securities available-for-sale as of September 30, 2015 and December 31, 2014, respectively. The increase of \$7.0 million was primarily attributable to the net activity of purchases of \$35.2 million, repayments of \$17.5 million and sales of \$9.7 million of certain securities during the nine months ended September 30, 2015.

On a fair value basis, 73.9% of our available-for-sale investment securities as of September 30, 2015, were floating-rate securities for which yields increase or decrease based on changes in market interest rates. As of December 31, 2014, floating-rate securities comprised 74.6% of our available-for-sale investment securities.

On a fair value basis, 48.9% of our available-for-sale investment securities as of September 30, 2015, were agency securities, which tend to have a lower risk profile, while the remainder of the portfolio was comprised of certain corporate bonds, single-issuer trust preferred securities, non-agency commercial mortgage-backed securities and collateralized loan obligations, and certain equity securities. As of December 31, 2014, agency securities comprised 59.1% of our available-for-sale investment securities.

Held-to-Maturity Investment Securities. We held \$46.4 million and \$39.6 million in investment securities held-to-maturity as of September 30, 2015 and December 31, 2014, respectively. The increase of \$6.8 million was primarily attributable to the net activity of

Table of Contents

purchases of \$13.5 million and repayments of \$6.5 million during the nine months ended September 30, 2015. As part of our asset and liability management strategy, we determined that we have the intent and ability to hold these bonds until maturity, and these securities were reported at amortized cost, as of September 30, 2015.

Trading Investment Securities. We held no investment securities for trading as of September 30, 2015 and December 31, 2014. From time to time, we may identify opportunities in the marketplace to generate supplemental income from trading activity, principally based on the volatility of U.S. Treasury Notes with maturities up to ten years. The level and frequency of income generated from these transactions can vary materially based upon market conditions.

The following tables summarize the amortized cost and fair value of investment securities available-for-sale and held-to-maturity, as of the dates indicated:

(Dollars in thousands)	September 30, 2015			
	Amortized Cost	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Estimated Fair Value

Table of Contents

The change in the fair values of our municipal bonds, agency collateralized mortgage obligation and agency mortgage-backed securities are primarily the result of interest rate fluctuations. To assess for impairment on municipal bonds, corporate bonds, single-issuer trust preferred securities, non-agency mortgage-backed securities, non-agency collateralized loan obligations, and certain equity securities, management evaluates the underlying issuer's financial performance and the related credit rating information through a review of publicly available financial statements and other publicly available information. This review did not identify any issues related to the ultimate repayment of principal and interest on these securities. In addition, the Company has the ability and intent to hold the securities in an unrealized loss position until recovery of their amortized cost. Based on this, the Company considers all of the unrealized losses to be temporary impairment losses.

The following table sets forth the fair value, contractual maturities and approximated weighted average yield, calculated on a fully taxable equivalent basis, based on estimated annual income divided by the average amortized cost of our available-for-sale and held-to-maturity debt securities portfolios as of September 30, 2015. Contractual maturities may differ from expected maturities because issuers and/or borrowers may have the right to call or prepay obligations with or without call or prepayment penalties, which would also impact the corresponding yield.

The table above excludes equity securities because they have an indefinite maturity. For additional information regarding our investment securities portfolios, refer to Note 2, Investment Securities, to our unaudited condensed consolidated financial statements.

Deposits

Deposits are our primary source of funds to support our earning assets and we source deposits through multiple channels. We have focused on creating and growing diversified, stable, and low all-in cost deposit channels without operating through a traditional branch network. These sources primarily include deposits from high-net-worth individuals, family offices, trust companies, wealth management firms, middle-market businesses and their executives, and other financial institutions. We compete for deposits by offering a range of products and services to our customers, at competitive rates. We believe that our deposit base is stable, diversified and provides a low all-in cost. We further believe we have the ability to attract new deposits that will contribute to funding our projected loan growth.

Table of Contents

As of September 30, 2015, we consider nearly 80.0% of our total deposits to be relationship-based deposits. Some of our relationship-based deposits, including reciprocal time deposits placed through Promontory's CDARS[®] service and demand deposits placed through Promontory's ICS[®] service, have been classified for regulatory purposes as brokered deposits.

The table below depicts average balances of and rates paid on our deposit portfolio broken out by major deposit category, for the three months ended September 30, 2015 and 2014.

(Dollars in thousands)	Three Months Ended September 30,		2015		2014	
	Average Amount	Average Rate Paid	Average Amount	Average Rate Paid	Average Amount	Average Rate Paid
Interest-bearing checking accounts	\$97,493	0.40	% \$84,045	0.41	%	
Money market deposit accounts	1,418,547	0.43	% 1,136,000	0.39	%

Total average interest-bearing deposits	2,400,869	0.54	% 2,088,264	0.52	%	
Noninterest-bearing deposits	148,323	—	125,668	—		
Total average deposits	\$2,549,192	0.51	% \$2,213,932	0.49	%	

Average Deposits for the Three Months Ended September 30, 2015 and 2014. For the three months ended September 30, 2015, our average total deposits were \$2.5 billion, representing an increase of \$335.3 million, or 15.1%, from the same period in 2014. The deposit growth was driven by increases in noninterest and interest-bearing checking accounts, money market deposit accounts and CDARS[®] time deposit accounts, partially offset by a decrease in time deposits. Our average cost of interest-bearing deposits of 0.54%, for the three months ended September 30, 2015, increased from 0.52%, for the same period in 2014, as average rates paid were higher in the three largest deposit categories and the average maturity of time deposits was extended. Average money market deposits increased to 59.1% of total average interest-bearing deposits, for the three months ended September 30, 2015, from 54.5% for the same period in 2014. Average time deposits decreased to 18.2% of total average interest-bearing deposits for the three months ended September 30, 2015, compared to 22.6% for the same period in 2014. Average CDARS[®] time deposits decreased to 18.7% of total average interest-bearing deposits, for the three months ended September 30, 2015, from 18.9% for the same period in 2014. Average noninterest-bearing deposits increased \$22.7 million, or 18.0%, to \$148.3 million in the three months ended September 30, 2015, from \$125.7 million for the three months ended September 30, 2014, and the average cost of total deposits increased two basis points to 0.51% for the three months ended September 30, 2015 from 0.49% for the three months ended September 30, 2014.

The table below depicts average balances of and rates paid on our deposit portfolio broken out by major deposit category, for the nine months ended September 30, 2015 and 2014.

(Dollars in thousands)	Nine Months Ended September 30,		2015		2014	
	Average Amount	Average Rate Paid	Average Amount	Average Rate Paid	Average Amount	Average Rate Paid
Interest-bearing checking accounts	\$103,674	0.41	% \$56,205	0.28	%	
Money market deposit accounts	1,343,867	0.41	% 1,068,005	0.39	%	
Time deposits (excluding CDARS [®])	446,137	0.90	% 479,062	0.85	%	
CDARS [®] time deposits	437,542	0.59	% 412,235	0.53	%	
Total average interest-bearing deposits	2,331,220	0.54	% 2,015,507	0.52	%	
Noninterest-bearing deposits	149,224	—	125,690	—		
Total average deposits	\$2,480,444	0.50	% \$2,141,197	0.49	%	

Average Deposits for the Nine Months Ended September 30, 2015 and 2014. For the nine months ended September 30, 2015, our average total deposits were \$2.5 billion, representing an increase of \$339.2 million, or 15.8%, from the same period in 2014. The deposit growth was driven by increases in noninterest and interest-bearing checking accounts, money market deposit accounts and CDARS[®] time deposit accounts, partially offset by a decrease in time deposits. Our average cost of interest-bearing deposits of 0.54%, for the nine months ended September 30, 2015, increased from 0.52%, for the same period in 2014, as average rates paid were higher in each deposit category and the average maturity of time deposits was extended. Average money market deposits increased to 57.6% of total average interest-bearing deposits, for the nine months ended September 30, 2015, from 53.0% for the same period in 2014. Average time deposits decreased to 19.1% of total average interest-bearing deposits for the nine months ended September 30, 2015, compared to 23.8% for the same period in 2014. Average CDARS[®] time deposits decreased to 18.8% of total average interest-bearing deposits, for the nine months ended

Table of Contents

September 30, 2015, from 20.4% for the same period in 2014. Average noninterest-bearing deposits increased \$23.5 million, or 18.7%, to \$149.2 million in the nine months ended September 30, 2015, from \$125.7 million for the nine months ended September 30, 2014, and the average cost of deposits increased one basis point to 0.50% for the nine months ended September 30, 2015 from 0.49% for the nine months ended September 30, 2014.

Certificates of Deposits and Other Time Deposits

Maturities of time deposits of \$100,000 or more outstanding are summarized below, as of September 30, 2015.

(Dollars in thousands)	September 30, 2015
Months to maturity:	
Three months or less	\$136,531
Over three to six months	257,992
Over six to 12 months	193,435
Over 12 months	250,476
Total	\$838,434

Borrowings

Deposits are the primary source of funds for our lending and investment activities, as well as the Bank's general business purposes. As an alternative source of liquidity, we may obtain advances from the FHLB of Pittsburgh, sell investment securities subject to our obligation to repurchase them, purchase Federal funds or engage in overnight borrowings from the FHLB or our correspondent banks.

The following table presents certain information with respect to our borrowings, as of September 30, 2015 and December 31, 2014.

(Dollars in thousands)	September 30, 2015					December 31, 2014				
	Amount	Coupon Rate	Maximum Balance at Any Month End	Average Balance During the Period	Original Term	Amount	Coupon Rate	Maximum Balance at Any Month End	Average Balance During the Period	Original Term
Short-term FHLB borrowings	\$90,000	0.37 %	\$95,000	\$42,234	1-9 days	\$30,000	0.27 %	\$60,000	\$11,959	1-9 days

Issued 9/25/2012	—	— %	—	—	12 months	—	0.42 %	20,000	14,630	2 years
Issued 4/7/2014	—	— %	25,000	8,791	14 months	25,000	0.34 %	25,000	18,425	12 months
Issued 4/7/2014	—	— %	25,000	14,469	17 months	25,000	0.38 %	25,000	18,425	14 months
Issued 4/7/2014	—	— %	25,000	22,894	9 months	25,000	0.44 %	25,000	18,425	17 months
Issued 5/5/2014	—	— %	25,000	3,205	12 months	25,000	0.33 %	25,000	16,506	9 months
Issued 7/29/2015	25,000	0.61 %	25,000	5,861	15 months	—	— %	—	—	—
Issued 7/29/2015	25,000	0.72 %	25,000	5,861	5 years	—	— %	—	—	—
Subordinated notes payable	35,000	5.75 %	35,000	35,000	5 years	35,000	5.75 %	35,000	20,041	5 years

Edgar Filing: TriState Capital Holdings, Inc. - Form 10-Q

Total borrowings \$175,000 1.34 % \$280,000 \$138,315 \$165,000 1.49 % \$215,000 \$118,411

In June 2014, we completed a private placement of subordinated notes payable, raising \$35.0 million. The subordinated notes have a term of 5 years at a fixed rate of 5.75%. The proceeds qualified as Tier 2 capital for the holding company, under federal regulatory capital rules.

Liquidity

We evaluate liquidity both at the holding company level and at the Bank level. As of September 30, 2015, the Bank and Chartwell subsidiaries represent our only material assets. Our primary sources of funds at the parent company level are cash on hand, dividends paid to us from the Bank and Chartwell subsidiaries and the net proceeds from the issuance of our debt or equity securities. As of September 30, 2015, our primary liquidity needs at the parent company level were the semi-annual interest payments on the subordinated notes payable. All other liquidity needs were minimal and related to reimbursing the Bank for management, accounting and financial reporting services provided by bank personnel. For the nine months ended September 30, 2015, the parent company paid approximately \$2.2 million related to interest payments on the subordinated notes and \$17.2 million related to the earn-out consideration for the Chartwell

Table of Contents

acquisition. For the nine months ended September 30, 2014, the parent company paid approximately \$45 million related to the Chartwell acquisition. We believe that our cash on hand at the parent company level coupled with the dividend paying capacity of the Bank and Chartwell, were adequate to fund any foreseeable parent company obligations as of September 30, 2015.

Our goal in liquidity management at the Bank level is to satisfy the cash flow requirements of depositors and borrowers, as well as our operating cash needs. These requirements include the payment of deposits on demand at their contractual maturity, the repayment of borrowings as they mature, the payment of our ordinary business obligations, the ability to fund new and existing loans and other funding commitments, and the ability to take advantage of new business opportunities. Our ALCO has established an asset/liability management policy designed to achieve and maintain earnings performance consistent with long-term goals while maintaining acceptable levels of interest rate risk, well capitalized regulatory status and adequate levels of liquidity. The ALCO has also established a contingency funding plan to address liquidity crisis conditions. The ALCO is designated as the body responsible for monitoring and implementation of these policies. The ALCO, which includes members of executive management, reviews liquidity on a frequent basis and approves significant changes in strategies that affect balance sheet or cash flow positions.

Our principal sources of asset liquidity are cash and cash due from banks, interest-earning deposits with banks, federal funds sold, unpledged securities available-for-sale, loan repayments (scheduled and unscheduled) and earnings. Liability liquidity sources include a stable deposit base, the ability to renew maturing certificates of deposit, borrowing availability at the FHLB of Pittsburgh, unsecured lines with other financial institutions, access to the brokered deposit market including CDARS[®], and the ability to raise debt and equity. Customer deposits are an important source of liquidity which depends on the confidence of those customers in us, supported by our capital position and the protection provided by FDIC insurance.

We measure and monitor liquidity on an ongoing basis, which allows us to more effectively understand and react to trends in our balance sheet. In addition, the ALCO uses a variety of methods to monitor our liquidity position, including a liquidity gap, which measures potential sources and uses of funds over future periods. Policy guidelines have been established for a variety of liquidity-related performance metrics, such as net loans to deposits, brokered funding composition, cash to total loans and duration of time deposits, among others, all of which are utilized in measuring and managing our liquidity position. The ALCO performs contingency funding and capital stress analyses at least semi-annually to determine our ability to meet potential liquidity and capital needs under various stress scenarios.

We believe that our liquidity position continues to be strong as evidenced by our ability to generate strong growth in deposits. As a result, we are minimally reliant on borrowings as evidenced by our ratio of total deposits to total assets of 83.1% and 82.1% as of September 30, 2015 and December 31, 2014, respectively. As of September 30, 2015, we had available liquidity of \$602.2 million, or 19.2% of total assets. These sources consisted of liquid assets (cash and cash equivalents, and investment securities available-for-sale or trading and not pledged under the FHLB borrowing capacity), totaling \$236.0 million, or 7.5% of total assets, coupled with secondary sources of liquidity (the ability to borrow from the FHLB and correspondent bank lines) totaling \$366.1 million, or 11.7% of total assets. Available cash excludes pledged accounts for derivative and letter of credit transactions and the reserve balance requirement at the Federal Reserve.

The following table shows our available liquidity, by source, as of the dates indicated:

(Dollars in thousands)	September 30, 2015	December 31, 2014
Available cash	\$69,195	\$77,215
Unpledged investment securities available-for-sale	166,842	158,361

Net borrowing capacity	366,119	364,205
Total liquidity	\$602,156	\$599,781

For the nine months ended September 30, 2015, we generated \$21.8 million of cash from operating activities, compared to \$22.3 million for the same period in 2014. This decrease in cash flow was primarily the result of net income of \$16.9 million for the nine months ended September 30, 2015, and changes in working capital items largely related to timing.

Investing activities resulted in a net cash outflow of \$282.3 million, for the nine months ended September 30, 2015, as compared to a net cash outflow of \$496.6 million for the same period in 2014. The outflows for the nine months ended September 30, 2015, were primarily due to net loan growth of \$266.5 million and purchases of investment securities totaling \$46.1 million, partially offset by proceeds, principal repayments and maturities from the sale of investment securities totaling \$33.8 million. The outflows for the nine months ended September 30, 2014, included the Chartwell acquisition net of cash totaling \$42.9 million, the purchase of \$219.5 million in loans, net loan growth of \$239.7 million and \$52.7 million for the purchase of investment securities available-for-sale, partially offset by proceeds from the sale of investment securities available-for-sale totaling \$69.6 million.

Financing activities resulted in a net inflow of \$255.3 million for the nine months ended September 30, 2015, compared to a net inflow of \$426.9 million for the same period in 2014, as a result of the net increase in deposits of \$263.6 million for the nine months ended

Table of Contents

September 30, 2015, compared to \$282.6 million in deposits, increased FHLB borrowings of \$110.0 million and net proceeds from the issuance of \$34.0 million in subordinated notes payable for the nine months ended September 30, 2014.

We continue to evaluate the potential impact on liquidity management by regulatory proposals, including those being established under the Dodd-Frank Act, as government regulators continue the final rule-making process.

Capital Resources

The access to and cost of funding for new business initiatives, the ability to engage in expanded business activities, the ability to pay dividends, the level of deposit insurance costs and the level and nature of regulatory oversight depend, in part, on our capital position.

The assessment of capital adequacy depends on a number of factors, including asset quality, liquidity, earnings performance, changing competitive conditions and economic forces. We seek to maintain a strong capital base to support our growth and expansion activities, to provide stability to current operations and to promote public confidence.

Shareholders' Equity. Shareholders' equity increased to \$320.5 million as of September 30, 2015, compared to \$305.4 million as of December 31, 2014. The \$15.2 million increase during the nine months ended September 30, 2015, was attributable to net income of \$16.9 million, the impact of \$1.4 million in stock-based compensation and \$330,000 exercise of stock options offset by the purchase of \$3.2 million in treasury stock and a decrease of \$286,000 in accumulated other comprehensive income (loss).

Regulatory Capital. As of September 30, 2015 and December 31, 2014, TriState Capital Holdings, Inc. and TriState Capital Bank were in compliance with all applicable regulatory capital requirements, and TriState Capital Bank was categorized as well capitalized for purposes of the FDIC's prompt corrective action regulations. As we employ our capital and continue to grow our operations, our regulatory capital levels may decrease. However, we expect to monitor our capital in order to remain categorized as well capitalized under the applicable regulatory guidelines and in compliance with all regulatory capital standards applicable to us.

In December 2010, the Basel Committee released a final framework for a strengthened set of capital requirements, known as Basel III. In July 2013, final rules implementing the Basel III capital accord were adopted by the federal banking agencies. When fully phased in, Basel III, which began phasing in on January 1, 2015, will replace the existing regulatory capital rules for the Company and the Bank. The Basel III final rules required new minimum capital ratio standards, established a new common equity tier 1 to total risk-weighted assets ratio, subjected banking organizations to certain limitations on capital distributions and discretionary bonus payments and established a new standardized approach for risk weightings. The overall net impact of applying Basel III regulatory rules to the Company and the Bank was an increase to the risk-based capital ratios effective January 1, 2015. This increase resulted primarily from the reduced risk-weighted capital treatment for certain of the Bank's private banking channel non-purpose margin loans, which are over-collateralized by liquid and marketable securities that are priced and monitored daily.

The following tables present the actual capital amounts and regulatory capital ratios for the Company and the Bank as of the dates indicated:

September 30, 2015

Off-Balance Sheet Arrangements

In the normal course of business, we enter into various transactions that are not included in our consolidated balance sheets in accordance with GAAP. These transactions include commitments to extend credit in the ordinary course of business to approved customers.

Generally, loan commitments have been granted on a temporary basis for working capital or commercial real estate financing requirements or may be reflective of loans in various stages of funding. These commitments are recorded on our financial statements as they are funded. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Loan commitments include unused commitments for open end lines secured by one to four family residential properties and commercial properties, commitments to fund loans secured by commercial real estate, construction loans, business lines of credit and other unused commitments.

Standby letters of credit are written conditional commitments issued by us to guarantee the performance of a customer to a third party. In the event the customer does not perform in accordance with the terms of the agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek recovery from the customer.

Table of Contents

We minimize our exposure to loss under loan commitments and standby letters of credit by subjecting them to credit approval and monitoring procedures. The effect on our revenues, expenses, cash flows and liquidity of the unused portions of these commitments cannot be reasonably predicted because while the borrower has the ability to draw upon these commitments at any time, these commitments often expire without being drawn upon. There is no guarantee that the lines of credit will be used. The following table is a summary of the total notional amount of unused loan commitments and standby letters of credit outstanding as of the date indicated.

	September 30, 2015				
(Dollars in thousands)	One Year or Less	One to Three Years	Three to Five Years	Greater Than Five Years	Total
Unused loan commitments (based on availability)	\$804,641	\$181,852	\$103,112	\$28,675	\$1,118,280
Standby letters of credit	29,055	26,304	22,975	107	78,441

Market Risk

Market risk refers to potential losses arising from changes in interest rates, foreign exchange rates, equity prices and commodity prices. Our primary component of market risk is interest rate volatility. Fluctuations in interest rates will ultimately impact the level of both income and expense recorded on most of our assets and liabilities, and the market value of all interest-earning assets and interest-bearing liabilities, other than those which have a short term to maturity. Because of the nature of our operations, we are not subject to foreign exchange or commodity price risk. From time to time we do hold market risk sensitive instruments for trading purposes. The summary information provided in this section should be read in conjunction with our unaudited condensed consolidated financial statements and related notes.

Interest rate risk is comprised of re-pricing risk, basis risk, yield curve risk and option risk. Re-pricing risk arises from differences in the cash flow or re-pricing between asset and liability portfolios. Basis risk arises when asset and liability portfolios are related to different market rate indexes, which do not always change by the same amount or at the same time. Yield curve risk arises when asset and liability portfolios are related to different maturities on a given yield curve; when the yield curve changes shape, the risk position is altered. Option risk arises from embedded options within asset and liability products as certain borrowers have the option to prepay their loans when rates fall, while certain depositors can redeem their certificates when rates rise.

Our ALCO actively measures and manages interest rate risk. The ALCO is responsible for the formulation and implementation of strategies to improve balance sheet positioning and earnings, and reviewing our interest rate sensitivity position. This involves devising policy guidelines, risk measures and limits, and managing the amount of interest rate risk and its effect on net interest income and capital.

We utilize an asset/liability model to measure and manage interest rate risk. The specific measurement tools used by management on at least a quarterly basis include net interest income simulation, economic value of equity and gap analysis. All are static measures that do not incorporate assumptions regarding future business. All are also measures of interest rate sensitivity used to help us develop strategies for managing exposure to interest rate risk rather than projecting future earnings.

In our view, all three measures also have specific benefits and shortcomings. Net interest income (“NII”) simulation explicitly measures exposure to earnings from changes in market rates of interest but does not provide a long-term view. Economic value of equity (“EVE”) helps identify changes in optionality and price over a longer term horizon but its liquidation perspective does not convey the earnings-based measures that are typically the focus of managing and valuing a going concern. Gap analysis compares the difference between the amount of interest-earning assets and

interest-bearing liabilities subject to re-pricing over a period of time but only captures a single rate environment. Reviewing these various measures collectively helps management obtain a comprehensive view of our interest risk rate profile.

Table of Contents

The following NII simulation and EVE metrics were calculated using rate shocks which represent immediate rate changes that move all market rates by the same amount instantaneously. The variance percentages represent the change between the NII simulation and EVE calculated under the particular rate scenario versus the NII simulation and EVE calculated assuming market rates as of the dates indicated.

(Dollars in thousands)	September 30, 2015			December 31, 2014		
	Amount Change from Base Case	Percent Change from Base Case	ALCO Guidelines	Amount Change from Base Case	Percent Change from Base Case	
Net interest income:						
+300	\$14,994	22.58	% -20.00	% \$10,185	15.18	%
+200	\$9,822	14.79	% -15.00	% \$6,529	9.73	%
+100	\$4,614	6.95	% -10.00	% \$2,833	4.22	%
-100	\$2,752	4.15	% -10.00	% \$2,986	4.45	%
Economic value of equity:						
+300	\$(9,427)	(2.95))+/-30.00%	\$(19,523)	(6.48))%
+200	\$(6,237)	(1.95))+/-20.00%	\$(13,107)	(4.35))%
+100	\$(3,295)	(1.03))+/-10.00%	\$(6,926)	(2.30))%
-100	\$791	0.25)+/-10.00%	\$4,766	1.58)%

Given the relatively low current interest rate environment, it is our strategy to continue to manage an asset sensitive interest rate risk position in our net interest income measure. Therefore, rising rates are expected to have a positive effect on net interest income versus net interest income if rates remain unchanged. The results of the EVE calculation, while demonstrating liability sensitivity, indicate a relatively low level of interest rate risk.

Table of Contents

The following gap analysis presents the amounts of interest-earning assets and interest-bearing liabilities that are subject to re-pricing within the periods indicated.

(Dollars in thousands)	Interest Rate Sensitivity Period							Total Balance	
	September 30, 2015	Less Than 90 Days	91 to 180 Days	181 to 365 Days	One to Three Years	Three to Five Years	Greater Than Five Years		Non-Sensitive
Assets:									
Interest-earning deposits	\$94,115	\$—	\$—	\$—	\$—	\$—	\$—	\$—	\$94,115
Federal funds sold	5,359	—	—	—	—	—	—	—	5,359
Total investment securities	116,199	7,780	8,565	26,165	31,707	30,617	(1,021)	—	220,012
Total loans	2,227,147	35,017	46,308	213,186	115,924	4,948	18,661	—	2,661,191
Other assets	—	—	—	—	—	—	149,570	—	149,570
Total assets	\$2,442,820	\$42,797	\$54,873	\$239,351	\$147,631	\$35,565	\$167,210	—	\$3,130,247
Liabilities:									
Transaction accounts	\$1,541,849	\$—	\$—	\$—	\$—	\$—	\$131,622	—	\$1,673,471
Time deposits	146,534	293,568	215,770	271,165	—	—	—	—	927,037
Borrowings	90,000	—	25,000	25,000	35,000	—	—	—	175,000
Other liabilities	—	—	—	—	—	—	34,199	—	34,199
Total liabilities	1,778,383	293,568	240,770	296,165	35,000	—	165,821	—	2,809,707
Equity	—	—	—	—	—	—	320,540	—	320,540
Total liabilities and equity	\$1,778,383	\$293,568	\$240,770	\$296,165	\$35,000	\$—	\$486,361	—	\$3,130,247
Interest rate sensitivity gap	\$664,437	\$(250,771)	\$(185,897)	\$(56,814)	\$112,631	\$35,565	\$(319,151)	—	
Cumulative interest rate sensitivity gap	\$664,437	\$413,666	\$227,769	\$170,955	\$283,586	\$319,151			
Cumulative interest rate sensitive assets to rate sensitive liabilities	137.4	% 120.0	% 109.8	% 106.6	% 110.7	% 112.1	% 111.4	%	
Cumulative gap to total assets	21.2	% 13.2	% 7.3	% 5.5	% 9.1	% 10.2	%		

The cumulative twelve-month ratio of interest rate sensitive assets to interest rate sensitive liabilities increased to 109.8% as of September 30, 2015, from 105.5% as of December 31, 2014.

Various loans across our portfolio have floating-rate index floors. As of September 30, 2015, there were \$113.1 million in loans with a maturity greater than one year and an index floor rate greater than the current index rate. Of this amount, \$74.5 million have an index floor rate less than 100 basis points above the current index rate. These loans

are allocated to the less than 90 days bucket in our gap analysis since we believe they would behave more like floating-rate loans given a 100 basis point upward shock in interest rates. The remaining \$38.6 million have an index floor rate greater than 100 basis points above the current index rate. These loans are allocated to the one to three years bucket in our gap analysis since we believe they would behave more like fixed-rate loans given a 100 basis point upward shock in interest rates.

Additionally, in all of these analyses (NII, EVE and gap), we use what we believe is a conservative treatment of non-maturity, interest-bearing deposits. In our gap analysis, the allocation of non-maturity, interest-bearing deposits is fully reflected in the less than 90 days maturity category. The allocation of non-maturity, noninterest-bearing deposits is fully reflected in the non-sensitive category. In taking this approach, we provide ourselves with no benefit to either NII or EVE from a potential time-lag in the rate increase of our non-maturity, interest-bearing deposits.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Quantitative and qualitative disclosures about market risk are presented under the caption “Market Risk” in Part I, Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of September 30, 2015. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2015.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended September 30, 2015, that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time the Company is a party to various litigation matters incidental to the conduct of its business. During the three months ended September 30, 2015, the Company was not a party to any legal proceedings the resolution of which management believes would have a material adverse effect on the Company's business, future prospects, financial condition, liquidity, results of operation, cash flows or capital levels.

ITEM 1A. RISK FACTORS

There are risks, many beyond our control, which could cause our results to differ significantly from management's expectations. Any of the risks described in our Annual Report on Form 10-K for the period ended December 31, 2014, or in this Quarterly Report on Form 10-Q could, by itself or together with one or more other factors, adversely affect our business, results of operations or financial condition. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, results of operations or financial condition.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Recent Sales of Unregistered Securities

None.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.
