QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-33841

VULCAN MATERIALS COMPANY

(Exact name of registrant as specified in its charter)

New Jersey (State or other jurisdiction of incorporation)	20-8579133 (I.R.S. Employer Identification No.)
---	---

1200 Urban Center Drive, Birmingham, Alabama (Address of principal executive offices)	35242 (zip code)
--	---------------------

Edgar Filing: Vulcan Materials CO - Form 10-Q

(205) 298-3000 (Registrant's telephone number including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)	Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Class	Shares outstanding at June 30, 2014
Common Stock, \$1 Par Value	130,910,161

The accompanying Notes to the Condensed Consolidated Financial Statements are an integral part of the statements.

notes to condensed consolidated financial statements

Note 1: summary of significant accounting policies

NATURE OF OPERATIONS

Vulcan Materials Company (the “Company,” “Vulcan,” “we,” “our”), a New Jersey corporation, is the nation's largest producer of construction aggregates, primarily crushed stone, sand and gravel and a major producer of asphalt mix and ready-mixed concrete.

BASIS OF PRESENTATION

Our accompanying unaudited condensed consolidated financial statements were prepared in compliance with the instructions to Form 10-Q and Article 10 of Regulation S-X and thus do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. Our Condensed Consolidated Balance Sheet as of December 31, 2013 was derived from the audited financial statement at that date. In the opinion of our management, the statements reflect all adjustments, including those of a normal recurring nature, necessary to present fairly the results of the reported interim periods. Operating results for the three and six month periods ended June 30, 2014 are not necessarily indicative of the results that may be expected for the year ended December 31, 2014. For further information, refer to the consolidated financial statements and footnotes included in our most recent Annual Report on Form 10-K.

Due to the 2005 sale of our Chemicals business as presented in Note 2, the operating results of the Chemicals business are presented as discontinued operations in the accompanying Condensed Consolidated Statements of Comprehensive Income.

RECLASSIFICATIONS

Certain items previously reported in specific financial statement captions have been reclassified to conform with the 2014 presentation.

RESTRICTED CASH

Restricted cash consists of cash proceeds from the sale of property held in escrow for the acquisition of replacement property under like-kind exchange agreements. The escrow accounts are administered by an intermediary. Pursuant to the like-kind exchange agreements, the cash remains restricted for a maximum of 180 days from the date of the property sale pending the acquisition of replacement property. Changes in restricted cash balances are reflected as an investment activity in the accompanying Condensed Consolidated Statements of Cash Flows.

RESTRUCTURING CHARGES

In 2012, our Board approved a Profit Enhancement Plan that further leveraged our streamlined management structure and substantially completed ERP and Shared Services platforms to achieve cost reductions and other earnings enhancements. During the first half of 2013, we incurred \$1,509,000 of costs (primarily project design, outside advisory and severance) related to the implementation of this plan. We do not anticipate any future material charges related to this Profit Enhancement Plan.

EARNINGS PER SHARE (EPS)

We report two earnings per share numbers: basic and diluted. These are computed by dividing net earnings by the weighted-average common shares outstanding (basic EPS) or weighted-average common shares outstanding assuming dilution (diluted EPS), as set forth below:

	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
in thousands				
Weighted-average common shares outstanding	131,149	130,250	130,980	130,219
Dilutive effect of				
Stock options/SOSARs	663	442	677	0
Other stock compensation plans	1,064	640	811	0
Weighted-average common shares outstanding, assuming dilution	132,876	131,332	132,468	130,219

All dilutive common stock equivalents are reflected in our earnings per share calculations. Antidilutive common stock equivalents are not included in our earnings per share calculations. In periods of loss, shares that otherwise would have been included in our diluted weighted-average common shares outstanding computation are excluded. These excluded shares are as follows: six months ended June 30, 2013 — 1,113,000.

The number of antidilutive common stock equivalents for which the exercise price exceeds the weighted-average market price is as follows:

	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
in thousands				
Antidilutive common stock equivalents	2,356	2,899	2,356	2,899

Note 2: Discontinued Operations

In 2005, we sold substantially all the assets of our Chemicals business to Basic Chemicals, a subsidiary of Occidental Chemical Corporation. In addition to the initial cash proceeds, Basic Chemicals was required to make payments under two earn-out agreements. In March 2013, we received the final earn-out payment in the amount of \$13,031,000. We were liable for a cash transaction bonus payable annually to certain former key Chemicals employees based on the prior years' earn-out results. As of June 30, 2013, we had accrued \$1,303,000 for the 2013 transaction bonus which was subsequently paid in 2013.

The financial results of the Chemicals business are classified as discontinued operations in the accompanying Condensed Consolidated Statements of Comprehensive Income for all periods presented. There were no net sales or revenues from discontinued operations for the periods presented. Results from discontinued operations are as follows:

in thousands	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
Discontinued Operations				
Pretax loss	\$ (897)	\$ (2,221)	\$ (1,739)	\$ (2,761)
Gain on disposal, net of transaction bonus	0	0	0	11,728
Income tax (provision) benefit	353	865	685	(3,540)
Earnings (loss) on discontinued operations, net of income taxes	\$ (544)	\$ (1,356)	\$ (1,054)	\$ 5,427

The pretax losses from discontinued operations noted above were due primarily to general and product liability costs, including legal defense costs, and environmental remediation costs associated with our former Chemicals business.

Note 3: Income Taxes

Our estimated annual effective tax rate (EAETR) is based on full year expectations of pretax book earnings, statutory tax rates, permanent differences between book and tax accounting such as percentage depletion, and tax planning alternatives available in the various jurisdictions in which we operate. For interim financial reporting, except in circumstances as described in the following paragraph, we calculate our quarterly income tax provision in accordance with the EAETR. Each quarter, we update our EAETR based on our revised full year expectation of pretax book earnings and calculate the income tax provision so that the year-to-date income tax provision reflects the EAETR. Significant judgment is required in determining our EAETR.

When expected pretax book earnings for the full year are at or near breakeven, the EAETR can distort the income tax provision for an interim period due to the size and nature of our permanent differences. In these circumstances, we calculate the interim income tax provision using the year-to-date effective tax rate. This method results in an income tax provision based solely on the year-to-date pretax book earnings as adjusted for permanent differences on a pro rata basis. In the second quarter of 2014, income taxes were calculated based on the EAETR. In the second quarter of 2013, income taxes were calculated based on the year-to-date effective tax rate.

We recorded an income tax provision from continuing operations of \$17,982,000 in the second quarter of 2014 compared to \$6,151,000 in the second quarter of 2013. The change in our income tax provision for the year resulted largely from applying the statutory rate to the increase in our pretax book earnings.

We recorded an income tax provision from continuing operations of \$40,882,000 for the six months ended June 30, 2014 compared to an income tax benefit from continuing operations of \$32,666,000 for the six months ended June 30, 2013. The change in our income tax provision for the year resulted largely from applying the statutory rate to the increase in our pretax book earnings.

We recognize a tax benefit associated with an uncertain tax position when, in our judgment, it is more likely than not that the position will be sustained based upon the technical merits of the position. For a tax position that meets the more-likely-than-not recognition threshold, we initially and subsequently measure the tax benefit as the largest amount that we judge to have a greater than 50% likelihood of being realized. Our liability associated with unrecognized tax benefits is adjusted periodically due to changing circumstances, such as the progress of tax audits, case law developments and new or emerging legislation. Such adjustments are recognized entirely in the period in which they are identified. Our income tax provision includes the net impact of changes in the liability for unrecognized tax benefits.

We recognize deferred tax assets and liabilities based on the differences between the financial statement's carrying amounts of assets and liabilities and the amounts used for income tax purposes. Deferred tax assets represent items to be used as a tax deduction or credit in future tax returns. Realization of the deferred tax assets ultimately depends on the existence of sufficient taxable income of the appropriate character in either the carryback or carryforward period.

Each quarter we analyze the likelihood that our deferred tax assets will be realized. A valuation allowance is recorded if, based on the weight of all available positive and negative evidence, it is more likely than not (a likelihood of more than 50%) that some portion, or all, of a deferred tax asset will not be realized. A summary of our deferred tax assets is included in Note 9 "Income Taxes" in our Annual Report on Form 10-K for the year ended December 31, 2013.

On an annual basis, we perform a comprehensive analysis of all forms of positive and negative evidence based on year end results. During each interim period, we update our annual analysis for significant changes to the positive and negative evidence.

Based on our second quarter 2014 analysis, we believe it is more likely than not that we will realize the benefit of all our deferred tax assets with the exception of the state net operating loss carryforwards for which a valuation allowance has been recorded. For year-end 2014, we project a valuation allowance of \$54,855,000 against our state net operating loss deferred tax asset carryforwards; an increase of \$8,575,000 from the prior year-end. Of the \$54,855,000 valuation allowance, \$53,433,000 relates to our Alabama net operating loss carryforward. The remaining valuation allowance of \$1,422,000 relates to other state net operating loss carryforwards. This change in the valuation allowance is reflected as a component of our income tax provision.

Note 4: deferred revenue

We have entered into two transactions (September 2013 and December 2012) through which we sold a percentage of the future production from aggregates reserves at eight quarries (seven owned and one leased). These sales were structured as volumetric production payments (VPPs). We received net cash proceeds of \$153,282,000 and \$73,644,000 for the 2013 and 2012 transactions, respectively. These proceeds were recorded as deferred revenue on the balance sheet and are amortized on a unit-of-sales basis to revenue over the terms of the VPPs. Concurrently, we entered into marketing agreements with the purchaser through which we are designated the exclusive sales agent for the purchaser's percentage of future production. Acting as the purchaser's agent, our consolidated total revenues exclude these sales proceeds.

The common key terms of both VPP transactions are:

- § the purchaser has a nonoperating interest in future production entitling them to a percentage of future production
- § there is no minimum annual or cumulative production or sales volume, nor any minimum sales price guarantee
- § the purchaser has the right to take its percentage of future production in physical product, or receive the cash proceeds from the sale of its percentage of future production under the terms of a separate marketing agreement
- § the purchaser's percentage of future production is conveyed free and clear of future costs of production and sales
- § we retain full operational and marketing control of the specified quarries
- § we retain fee simple interest in the land as well as any residual values that may be realized upon the conclusion of mining

The key terms specific to the 2013 VPP transaction are:

- § terminates at the earlier to occur of September 30, 2051 or the sale of 250.8 million tons of aggregates from the specified quarries; based on historical and projected volumes from the specified quarries, it is expected that 250.8 million tons will be sold prior to September 30, 2051
- § the purchaser's percentage of the maximum 250.8 million tons of future production is estimated, based on current sales volume projection, to be 11.5% (approximately 29 million tons); the actual percentage may vary

The key terms specific to the 2012 VPP transaction are:

- § terminates at the earlier to occur of December 31, 2052 or the sale of 143.2 million tons of aggregates from the specified quarries; based on historical and projected volumes from the specified quarries, it is expected that 143.2 million tons will be sold prior to December 31, 2052
- § the purchaser's percentage of the maximum 143.2 million tons of future production is estimated, based on current sales volume projection, to be 10.5% (approximately 15 million tons); the actual percentage may vary

Edgar Filing: Vulcan Materials CO - Form 10-Q

The impact to our net sales and gross margin related to the VPPs is outlined as follows:

	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
in thousands				
Amortization of deferred revenue	\$ 1,357	\$ 324	\$ 2,341	\$ 576
Purchaser's proceeds from sale of production	(4,137)	(1,069)	(7,081)	(1,898)
Decrease to net sales and gross margin	\$ (2,780)	\$ (745)	\$ (4,740)	\$ (1,322)

Based on expected aggregates sales from the specified quarries, we anticipate recognizing a range of \$4,800,000 to \$5,800,000 of deferred revenue during the 12-month period ending June 30, 2015.

Note 5: Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels as described below:

Level 1: Quoted prices in active markets for identical assets or liabilities

Level 2: Inputs that are derived principally from or corroborated by observable market data

Level 3: Inputs that are unobservable and significant to the overall fair value measurement

Our assets subject to fair value measurement on a recurring basis are summarized below:

	Level 1		
	June 30	December 31	June 30
in thousands	2014	2013	2013
Fair Value Recurring			
Rabbi Trust			
Mutual funds	\$ 14,365	\$ 15,255	\$ 13,689
Equities	14,052	12,828	10,638
Total	\$ 28,417	\$ 28,083	\$ 24,327

	Level 2		
	June 30	December 31	June 30
in thousands	2014	2013	2013
Fair Value Recurring			
Rabbi Trust			
Common/collective trust funds	\$ 1,349	\$ 1,244	\$ 1,507
Total	\$ 1,349	\$ 1,244	\$ 1,507

We have established two Rabbi Trusts for the purpose of providing a level of security for the employee nonqualified retirement and deferred compensation plans and for the directors' nonqualified deferred compensation plans. The fair values of these investments are estimated using a market approach. The Level 1 investments include mutual funds and equity securities for which quoted prices in active markets are available. Level 2 investments are stated at estimated fair value based on the underlying investments in those funds (short-term, highly liquid assets in commercial paper, short-term bonds and certificates of deposit).

Net gains of the Rabbi Trust investments were \$3,428,000 and \$1,093,000 for the six months ended June 30, 2014 and 2013, respectively. The portions of the net gains related to investments still held by the Rabbi Trusts at June 30, 2014 and 2013 were \$1,480,000 and \$941,000, respectively.

The carrying values of our cash equivalents, accounts and notes receivable, current maturities of long-term debt, short-term borrowings, trade payables and accruals, and other current liabilities approximate their fair values because of the short-term nature of these instruments. Additional disclosures for derivative instruments and interest-bearing debt are presented in Notes 6 and 7, respectively.

There were no assets or liabilities subject to fair value measurement on a nonrecurring basis in 2013. Assets that were subject to fair value measurement on a nonrecurring basis in 2014 are summarized below:

	As of June 30, 2014	
in thousands	Level 2	Impairment Charges
Fair Value Nonrecurring		
Property, plant & equipment	\$ 2,280	\$ 2,987
Total	\$ 2,280	\$ 2,987

We recorded a \$2,987,000 loss on impairment of long-lived assets in the first quarter of 2014 reducing the carrying value of these assets to their estimated fair value of \$2,280,000. Fair value was estimated using a market approach (observed transactions involving comparable assets in similar locations).

Note 6: Derivative Instruments

During the normal course of operations, we are exposed to market risks including fluctuations in interest rates, foreign currency exchange rates and commodity pricing. From time to time, and consistent with our risk management policies, we use derivative instruments to hedge against these market risks. We do not utilize derivative instruments for trading or other speculative purposes.

The accounting for gains and losses that result from changes in the fair value of derivative instruments depends on whether the derivatives have been designated and qualify as hedging instruments and the type of hedging relationship. The interest rate swap agreements described below were designated as either cash flow hedges or fair value hedges. The changes in fair value of our interest rate swap cash flow hedges are recorded in accumulated other comprehensive income (AOCI) and are reclassified into interest expense in the same period the hedged items affect earnings. The changes in fair value of our interest rate swap fair value hedges are recorded as interest expense consistent with the change in the fair value of the hedged items attributable to the risk being hedged.

CASH FLOW HEDGES

We have used interest rate swap agreements designated as cash flow hedges to minimize the variability in cash flows of liabilities or forecasted transactions caused by fluctuations in interest rates. During 2007, we entered into fifteen forward starting interest rate swap agreements for a total stated amount of \$1,500,000,000. Upon the 2007 and 2008 issuances of the related fixed-rate debt, we terminated and settled these forward starting swaps for cash payments of \$89,777,000. Amounts in AOCI are being amortized to interest expense over the term of the related debt. This amortization was reflected in the accompanying Condensed Consolidated Statements of Comprehensive Income as follows:

in thousands	Location on Statement	Three Months Ended		Six Months Ended	
		June 30 2014	2013	June 30 2014	2013
Cash Flow Hedges					
Loss reclassified from AOCI (effective portion)	Interest expense	\$ (969)	\$ (1,386)	\$ (5,903)	\$ (2,801)

The 2014 loss reclassified from AOCI includes the acceleration of a proportional amount of the deferred loss in the amount of \$3,762,000 referable to the debt purchase as disclosed in Note 7.

For the 12-month period ending June 30, 2015, we estimate that \$4,073,000 of the pretax loss in AOCI will be reclassified to earnings.

FAIR VALUE HEDGES

We have used interest rate swap agreements designated as fair value hedges to minimize exposure to changes in the fair value of fixed-rate debt that results from fluctuations in the benchmark interest rates for such debt. In June 2011, we issued \$500,000,000 of 6.50% fixed-rate notes due in 2016. Concurrently, we entered into interest rate swap agreements in the stated amount of \$500,000,000. Under these agreements, we paid 6-month LIBOR plus a spread of 4.05% and received a fixed interest rate of 6.50%. Additionally, in June 2011, we entered into interest rate swap agreements on our \$150,000,000 10.125% fixed-rate notes due in 2015. Under these agreements, we paid 6-month LIBOR plus a spread of 8.03% and received a fixed interest rate of 10.125%. In August 2011, we terminated and settled these interest rate swap agreements for \$25,382,000 of cash proceeds. The \$23,387,000 forward component of the settlement (cash proceeds less \$1,995,000 of accrued interest) was added to the carrying value of the related debt and is being amortized as a reduction to interest expense over the remaining lives of the related debt using the effective interest method. This amortization was reflected in the accompanying Condensed Consolidated Statements of Comprehensive Income as follows:

	Three Months Ended		Six Months Ended	
	June 30		June 30	
in thousands	2014	2013	2014	2013
Deferred Gain on Settlement Amortized to earnings as a reduction to interest expense	\$ 484	\$ 1,074	\$ 9,678	\$ 2,131

Edgar Filing: Vulcan Materials CO - Form 10-Q

The amortized deferred gain for the six months ended June 30, 2014 includes the acceleration of a proportional amount of the deferred gain in the amount of \$8,032,000 referable to the debt purchase as disclosed in Note 7.

Note 7: Debt

Debt is summarized as follows:

	June 30	December 31	June 30
in thousands	2014	2013	2013
Short-term Debt			
Bank line of credit	\$ 0	\$ 0	\$ 100,000
Total short-term debt	\$ 0	\$ 0	\$ 100,000
Long-term Debt			
10.125% notes due 2015 1	\$ 151,446	\$ 151,897	\$ 152,317
6.50% notes due 2016 2	127,445	511,627	513,369
6.40% notes due 2017 3	218,582	349,907	349,897
7.00% notes due 2018 4	399,794	399,772	399,751
10.375% notes due 2018 5	248,934	248,843	248,757
7.50% notes due 2021 6	600,000	600,000	600,000
7.15% notes due 2037 7	239,566	239,561	239,557
Medium-term notes	6,000	6,000	6,000
	14,000	14,000	14,000

Industrial revenue bonds			
Other notes	770	806	933
Total long-term debt including current maturities	\$ 2,006,537	\$ 2,522,413	\$ 2,524,581
Less current maturities	158	170	161
Total long-term debt	\$ 2,006,379	\$ 2,522,243	\$ 2,524,420
Estimated fair value of long-term debt	\$ 2,312,178	\$ 2,820,399	\$ 2,756,202

- 1 Includes an increase for the unamortized deferred gain realized upon the August 2011 settlement of interest rate swaps, as follows: June 30, 2014 — \$1,587 thousand, December 31, 2013 — \$2,082 thousand and June 30, 2013 — \$2,543 thousand. Additionally, includes decreases for unamortized discounts, as follows: June 30, 2014 — \$141 thousand, December 31, 2013 — \$185 thousand and June 30, 2013 — \$226 thousand. The effective interest rate for these notes is 9.58%.
- 2 Includes an increase for the unamortized deferred gain realized upon the August 2011 settlement of interest rate swaps, as follows: June 30, 2014 — \$2,444 thousand, December 31, 2013 — \$11,627 thousand and June 30, 2013 — \$13,369 thousand. The effective interest rate for these notes is 6.00%.
- 3 Includes decreases for unamortized discounts, as follows: June 30, 2014 — \$51 thousand, December 31, 2013 — \$93 thousand and June 30, 2013 — \$103 thousand. The effective interest rate for these notes is 7.41%.
- 4 Includes decreases for unamortized discounts, as follows: June 30, 2014 — \$206 thousand, December 31, 2013 — \$228 thousand and June 30, 2013 — \$249 thousand. The effective interest rate for these notes is 7.87%.
- 5 Includes decreases for unamortized discounts, as follows: June 30, 2014 — \$1,066 thousand, December 31, 2013 — \$1,157 thousand and June 30, 2013 — \$1,243 thousand. The effective interest rate for these notes is 10.63%.
- 6 The effective interest rate for these notes is 7.75%.
- 7 Includes decreases for unamortized discounts, as follows: June 30, 2014 — \$622 thousand, December 31, 2013 — \$627 thousand and June 30, 2013 — \$631 thousand. The effective interest rate for these notes is 8.05%.

Our long-term debt is presented in the table above net of unamortized discounts from par and unamortized deferred gains realized upon settlement of interest rate swaps. Discounts and deferred gains are being amortized using the effective interest method over the respective terms of the notes.

The estimated fair value of long-term debt presented in the table above was determined by averaging the asking price quotes for the notes. The fair value estimates were based on Level 2 information (as defined in Note 5) available to us

as of their respective balance sheet dates. Although we are not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued since those dates.

There were no material scheduled debt payments during the first six months of 2014. However, as described below, we purchased \$506,366,000 principal amount of outstanding debt through a tender offer in the first quarter of 2014. Scheduled

11

Edgar Filing: Vulcan Materials CO - Form 10-Q

debt payments during 2013 included \$10,000,000 in January to retire the 8.70% medium-term note and \$140,444,000 in June to retire the 6.30% notes.

In March 2014, we purchased \$506,366,000 principal amount of outstanding debt through a tender offer as follows: \$374,999,000 of 6.50% notes due in 2016 and \$131,367,000 of 6.40% notes due in 2017. This debt purchase was funded by the sale of our cement and concrete businesses in the Florida area as described in Note 16. The March 2014 debt purchases cost \$579,659,000, including a \$71,829,000 premium above the principal amount of the notes and transaction costs of \$1,464,000. The premium primarily reflects the trading prices of the notes relative to par prior to the tender offer commencement. Additionally, we recognized a net benefit of \$344,000 associated with the acceleration of a proportional amount of unamortized discounts, deferred gains, deferred financing costs and amounts accumulated in OCI. The combined charge of \$72,949,000 is presented in the accompanying Condensed Consolidated Statement of Comprehensive Income as a component of interest expense for the six month period ended June 30, 2014.

Additionally, in March 2014, we amended our \$500,000,000 line of credit to, among other things, extend the term from March 2018 to March 2019, eliminate the borrowing capacity governor of eligible accounts receivable and eligible inventory, and provide for the line of credit to become unsecured upon achievement of certain credit metrics and/or credit ratings. Until such metrics/ratings are achieved, the line of credit is secured by accounts receivable and inventory. As of June 30, 2014, our available borrowing capacity was \$446,732,000.

Borrowings under the line of credit bear interest at a rate determined at the time of borrowing equal to the lower of LIBOR plus a margin ranging from 1.50% to 2.25%, or an alternative rate derived from the lender's prime rate, based on our total debt to EBITDA ratio. Borrowings on our line of credit are classified as short-term due to our intent to repay any borrowings within twelve months. As of June 30, 2014, the applicable margin for LIBOR based borrowing was 2.00%.

Note 8: Commitments and Contingencies

LETTERS OF CREDIT

We provide, in the normal course of business, certain third party beneficiaries standby letters of credit to support our obligations to pay or perform according to the requirements of an underlying agreement. Such letters of credit typically have an initial term of one year, typically renew automatically, and can only be modified or cancelled with the approval of the beneficiary. All of our letters of credit are issued by banks that participate in our \$500,000,000 line of credit, and reduce the borrowing capacity thereunder. We pay a fee for all letters of credit equal to the margin (ranges from 1.50% to 2.25%) applicable to LIBOR based borrowings under the line of credit, plus 0.175%. Our standby letters of credit as of June 30, 2014 are summarized by purpose in the table below:

in thousands

Standby Letters of Credit	
Risk management insurance	\$ 32,839
Industrial revenue bond	14,230
Reclamation/restoration requirements	6,199
Total	\$ 53,268

LITIGATION AND ENVIRONMENTAL MATTERS

We are a defendant in various lawsuits in the ordinary course of business. It is not possible to determine with precision the outcome, or the amount of liability, if any, under these lawsuits, especially where the cases involve possible jury trials with as yet undetermined jury panels.

In addition to these lawsuits in which we are involved in the ordinary course of business, certain other material legal proceedings are more specifically described below.

lower passaic river matter

§ Lower Passaic River Study Area (Superfund Site) — The Lower Passaic River Study Area is part of the Diamond Shamrock Superfund Site in New Jersey. Vulcan and approximately 70 other companies are parties to a May 2007 Administrative Order on Consent (AOC) with the U.S. Environmental Protection Agency (EPA) to perform a Remedial Investigation/Feasibility Study (RI/FS) of the lower 17 miles of the Passaic River (River). As an interim step related to the 2007 AOC, on June 18, 2012 Vulcan and 69 other companies voluntarily entered into an Administrative Settlement Agreement and Order on Consent with the EPA for remediation actions focused at River Mile 10.9. On June 25, 2012, the EPA issued a Unilateral Administrative Order for Removal Response Activities to Occidental Chemical Corporation ordering Occidental to participate and cooperate in the remediation action at River Mile 10.9. This remedial action is now complete, and we will not report on it further.

Separately, on April 11, 2014, the EPA issued a proposed Focused Feasibility Study (FFS) that calls for a bank-to-bank dredging remedy for the lower 8 miles of the River. The EPA estimates that the cost of implementing this proposal is approximately \$950 million to \$1.73 billion. The period for public comment on the proposed FFS remains open. After the comments are received, the EPA will issue its final record of decision, probably sometime in 2015.

At this time, we cannot reasonably estimate our ultimate liability related to this matter because the RI/FS and FFS are not final. Furthermore, the AOC does not obligate us to fund or perform the remedial action contemplated by either the RI/FS or the FFS. Vulcan formerly owned a chemicals operation near River Mile 0.1, which was sold in 1974. The Company has found no evidence that its former chemicals operation contributed any of the primary contaminants of concern to the River. Therefore, neither the ultimate remedial approach and associated costs (or range of costs), nor the parties who will participate in funding the remediation and their respective allocations, have been determined.

Based on the facts available at this time, we believe our liability related to any remedial actions will be immaterial.

OTHER LITIGATION

§ TEXAS BRINE MATTER — During the operation of its former Chemicals Division, Vulcan was the lessee under a salt lease from 1976 – 2005 in an underground salt dome formation in Assumption Parish, Louisiana. The Texas Brine Company operated this salt mine for the account of Vulcan. Vulcan sold its Chemicals Division in 2005 and assigned the lease to the purchaser, and Vulcan has had no association with the leased premises or Texas Brine Company since that time. In August 2012, a sinkhole developed near the salt dome and numerous lawsuits were filed in state court in Assumption Parish, Louisiana. Other lawsuits, including class action litigation, were also filed in August 2012 in federal court in the Eastern District of Louisiana in New Orleans. The plaintiffs in the Federal court class action and Texas Brine have recently announced a proposed settlement for \$48.1 million. This proposed settlement is still subject to certain court procedures, including notice to the class, before it can be approved and finalized. We understand that Vulcan will be named as a released party in the settlement agreement, although Texas Brine and its insurers are not themselves releasing Vulcan from their claims for contribution and indemnity against

Vulcan.

There are numerous defendants to the litigation in state and federal court. Vulcan was first brought into the litigation as a third-party defendant in August 2013 by the Texas Brine Company. Vulcan has since been added as a direct and third-party defendant by other parties, including a direct claim by the State of Louisiana. The damages alleged in the litigation range from individual plaintiffs' claims for property damage, to the State of Louisiana's claim for response costs, to claims for alleged physical damages to oil pipelines, to various alleged business interruption claims, and to claims for indemnity and contribution from Texas Brine. It is alleged that the sinkhole was caused, in whole or in part, by Vulcan's negligent actions or failure to act. It is also alleged that Vulcan breached the salt lease, as well as an operating agreement with Texas Brine. Vulcan denies any liability in this matter and will vigorously defend the litigation. We cannot reasonably estimate any liability related to this matter.

It is not possible to predict with certainty the ultimate outcome of these and other legal proceedings in which we are involved, and a number of factors, including developments in ongoing discovery or adverse rulings, or the verdict of a particular jury, could cause actual losses to differ materially from accrued costs. No liability was recorded for claims and litigation for which a loss was determined to be only reasonably possible or for which a loss could not be reasonably estimated. Legal costs incurred in defense of lawsuits are expensed as incurred. In addition, losses on certain claims and litigation described above may be subject to limitations on a per occurrence basis by excess insurance, as described in our most recent Annual Report on Form 10-K.

Note 9: Asset Retirement Obligations

Asset retirement obligations (AROs) are legal obligations associated with the retirement of long-lived assets resulting from the acquisition, construction, development and/or normal use of the underlying assets.

Recognition of a liability for an ARO is required in the period in which it is incurred at its estimated fair value. The associated asset retirement costs are capitalized as part of the carrying amount of the underlying asset and depreciated over the estimated useful life of the asset. The liability is accreted through charges to operating expenses. If the ARO is settled for other than the carrying amount of the liability, we recognize a gain or loss on settlement.

We record all AROs for which we have legal obligations for land reclamation at estimated fair value. Essentially all these AROs relate to our underlying land parcels, including both owned properties and mineral leases. For the three and six month periods ended June 30, we recognized ARO operating costs related to accretion of the liabilities and depreciation of the assets as follows:

	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
in thousands				
ARO Operating Costs				
Accretion	\$ 2,913	\$ 2,817	\$ 5,852	\$ 4,823
Depreciation	983	830	1,980	1,609
Total	\$ 3,896	\$ 3,647	\$ 7,832	\$ 6,432

ARO operating costs are reported in cost of goods sold. AROs are reported within other noncurrent liabilities in our accompanying Condensed Consolidated Balance Sheets.

Reconciliations of the carrying amounts of our AROs are as follows:

Three Months Ended	Six Months Ended
June 30	June 30

Edgar Filing: Vulcan Materials CO - Form 10-Q

in thousands	2014	2013	2014	2013
Asset Retirement Obligations				
Balance at beginning of period	\$ 225,831	\$ 156,458	\$ 228,234	\$ 150,072
Liabilities incurred	0	65,587	0	65,587
Liabilities settled	(7,593)	(5,219)	(12,843)	(6,511)
Accretion expense	2,913	2,817	5,852	4,823
Revisions up (down), net	3,966	3,208	3,874	8,880
Balance at end of period	\$ 225,117	\$ 222,851	\$ 225,117	\$ 222,851

The liabilities incurred during the second quarter of 2013 relate primarily to reclamation activities required under a development agreement and a conditional use permit at an aggregates facility on owned property in Southern California.

Note 10: Benefit Plans

We sponsor three funded, noncontributory defined benefit pension plans. These plans cover substantially all employees hired prior to July 15, 2007, other than those covered by union-administered plans. Normal retirement age is 65, but the plans contain provisions for earlier retirement. Benefits for the Salaried Plan are generally based on salaries or wages and years of service; the Construction Materials Hourly Plan and the Chemicals Hourly Plan provide benefits equal to a flat dollar amount for each year of service. In addition to these qualified plans, we sponsor three unfunded, nonqualified pension plans.

Effective July 15, 2007, we amended our defined benefit pension plans to no longer accept new participants. In December 2013, we amended our defined benefit pension plans so that future service accruals for salaried pension participants ceased effective December 31, 2013. This change included a special transition provision which will allow covered compensation through December 31, 2015 to be considered in the participants' benefit calculations. The amendment resulted in a curtailment and remeasurement of the salaried and nonqualified pension plans as of May 31, 2013 that reduced our 2013 pension expense by approximately \$7,600,000 (net of the one-time curtailment loss) of which \$800,000 was related to discontinued operations.

Edgar Filing: Vulcan Materials CO - Form 10-Q

The following table sets forth the components of net periodic pension benefit cost:

PENSION BENEFITS	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
in thousands				
Components of Net Periodic Benefit Cost				
Service cost	\$ 1,040	\$ 5,821	\$ 2,079	\$ 11,894
Interest cost	11,098	10,291	22,196	20,637
Expected return on plan assets	(12,700)	(11,815)	(25,401)	(23,574)
Curtailment loss	0	855	0	855
Amortization of prior service cost	47	85	94	180
Amortization of actuarial loss	2,805	5,575	5,610	11,995
Net periodic pension benefit cost	\$ 2,290	\$ 10,812	\$ 4,578	\$ 21,987
Pretax reclassification from AOCI included in net periodic pension benefit cost	\$ 2,852	\$ 6,515	\$ 5,704	\$ 13,030

Prior contributions, along with the existing funding credits, are sufficient to cover required contributions to the qualified plans through 2014. However, we anticipate making an approximate \$2,000,000 discretionary pension contribution in 2014.

In addition to pension benefits, we provide certain healthcare and life insurance benefits for retired employees. In the fourth quarter of 2012, we amended our postretirement healthcare plan to cap our portion of the medical coverage cost at the 2015 level. In the third quarter of 2007, we amended our salaried postretirement healthcare coverage to increase the eligibility age for early retirement coverage to age 62, unless certain grandfathering provisions were met. Substantially all our salaried employees and where applicable, hourly employees may become eligible for these benefits if they reach a qualifying age and meet certain service requirements. Generally, company-provided healthcare benefits terminate when covered individuals become eligible for Medicare benefits, become eligible for other group insurance coverage or reach age 65, whichever occurs first.

The following table sets forth the components of net periodic postretirement benefit cost:

OTHER POSTRETIREMENT BENEFITS	Three Months Ended		Six Months Ended	
	2014	June 30 2013	2014	June 30 2013
in thousands				
Components of Net Periodic Benefit Cost				
Service cost	\$ 537	\$ 707	\$ 1,073	\$ 1,415

Edgar Filing: Vulcan Materials CO - Form 10-Q

Interest cost	825	815	1,649	1,630
Curtailment gain	0	0	(3,832)	0
Amortization of prior service credit	(1,082)	(1,216)	(2,164)	(2,432)
Amortization of actuarial loss	56	343	113	686
Net periodic postretirement benefit cost	\$ 336	\$ 649	\$ (3,161)	\$ 1,299
Pretax reclassification from AOCI included in net periodic postretirement benefit cost	\$ (1,026)	\$ (873)	\$ (5,883)	\$ (1,746)

The reclassifications from AOCI noted in the tables above are related to curtailment gains, amortization of prior service costs or credits and actuarial losses as shown in Note 11.

The March 2014 sale of our cement and concrete businesses in the Florida area (see Note 16) significantly reduced total expected future service of our postretirement plans resulting in a one-time curtailment gain of \$3,832,000. This gain was reflected within gain on sale of property, plant & equipment, net in our accompanying Condensed Consolidated Statement of Comprehensive Income for the six months ended June 30, 2014.

Note 11: other Comprehensive Income

Comprehensive income comprises two subsets: net earnings and other comprehensive income (OCI). The components of other comprehensive income are presented in the accompanying Condensed Consolidated Statements of Comprehensive Income, net of applicable taxes.

Amounts in accumulated other comprehensive income (AOCI), net of tax, are as follows:

	June 30	December 31	June 30
in thousands	2014	2013	2013
AOCI			
Cash flow			
hedges	\$ (21,609)	\$ (25,178)	\$ (26,481)
Pension and			
postretirement			
benefit plans	(71,618)	(74,453)	(130,185)
Total	\$ (93,227)	\$ (99,631)	\$ (156,666)

Changes in AOCI, net of tax, for the six months ended June 30, 2014 are as follows:

	Cash Flow	Pension and	
in thousands	Hedges	Postretirement	Total

Note 12: Equity

Our capital stock consists solely of common stock, par value \$1.00 per share. Holders of our common stock are entitled to one vote per share. Our Certificate of Incorporation also authorizes preferred stock of which no shares have been issued. The terms and provisions of such shares will be determined by our Board of Directors upon any issuance of preferred shares in accordance with our Certificate of Incorporation.

In June 2014, we issued 16,896 shares of common stock in connection with the purchase of a permitted quarry.

We occasionally sell shares of common stock to the trustee of our 401(k) retirement plans to satisfy the plan participants' elections to invest in our common stock. The resulting cash proceeds provide a means of improving cash flow, increasing equity and reducing leverage. Under this arrangement, the stock issuances and resulting cash proceeds were as follows:

- § six months ended June 30, 2014 — issued 435,655 shares for cash proceeds of \$27,539,000
- § twelve months ended December 31, 2013 — issued 71,208 shares for cash proceeds of \$3,821,000
- § six months ended June 30, 2013 — no shares issued

Changes in total equity for the six months ended June 30, 2014 are summarized below:

in thousands	Total Equity
Balance at December 31, 2013	\$ 3,938,106
Net earnings	99,963
Common stock issued	
Acquisition	1,094
401(k) Trustee	27,539
Share-based compensation plans	10,985
Share-based compensation expense	11,928

Excess tax benefits from share-based compensation	3,242
Cash dividends on common stock (\$0.10 per share)	(13,074)
Other comprehensive income	6,404
Balance at June 30, 2014	\$ 4,086,187

There were no shares held in treasury as of June 30, 2014, December 31, 2013 and June 30, 2013. As of June 30, 2014, 3,411,416 shares may be repurchased under the current purchase authorization of our Board of Directors.

Note 13: Segment Reporting

We have four operating (and reportable) segments organized around our principal product lines: aggregates, concrete, asphalt mix and cement. The vast majority of our activities are domestic. We sell a relatively small amount of construction aggregates outside the United States. Intersegment sales are made at local market prices for the particular grade and quality of product utilized in the production of ready-mixed concrete and asphalt mix. Management reviews earnings from the product line reporting segments principally at the gross profit level.

Amounts referable to business acquisition		
Liabilities assumed	755	232
Fair value of equity consideration	1,094	0

Note 15: Goodwill

Goodwill is recognized when the consideration paid for a business combination (acquisition) exceeds the fair value of the tangible and identifiable intangible assets acquired. Goodwill is allocated to reporting units for purposes of testing goodwill for impairment. There were no charges for goodwill impairment in the six month periods ended June 30, 2014 and 2013.

We have four reportable segments organized around our principal product lines: aggregates, concrete, asphalt mix and cement. There were no changes in the carrying amount of goodwill by reportable segment from December 31, 2013 to June 30, 2014 as summarized below:

GOODWILL

in thousands	Aggregates	Concrete	Asphalt Mix	Cement	Total
Goodwill, Gross Carrying Amount Total as of December 31, 2013	\$ 2,989,888	\$ 0	\$ 91,633	\$ 252,664	\$ 3,334,185
Total as of June 30, 2014	\$ 2,989,888	\$ 0	\$ 91,633	\$ 252,664	\$ 3,334,185

Goodwill, net of Accumulated Impairment Losses Total as of December 31, 2013	\$ 2,989,888	\$ 0	\$ 91,633	\$ 0	\$ 3,081,521
Total	\$ 2,989,888	\$ 0	\$ 91,633	\$ 0	\$ 3,081,521
as of					

June
30,
2014

1 The goodwill for the Cement segment was fully impaired in 2008.

We test goodwill for impairment on an annual basis or more frequently if events or circumstances change in a manner that would more likely than not reduce the fair value of a reporting unit below its carrying value. A decrease in the estimated fair value of one or more of our reporting units could result in the recognition of a material, noncash write-down of goodwill.

19

Note 16: Acquisitions and Divestitures

In the first quarter of 2014, we sold our cement and concrete businesses in the Florida area for net pretax cash proceeds of \$719,089,000 resulting in a pretax gain of \$229,094,000. We retained all of our Florida aggregates operations, our Cement segment's calcium operation in Brooksville, Florida and real estate associated with certain former ready-mixed concrete facilities. Under a separate supply agreement, we will continue to provide aggregates to the divested concrete facilities, at market prices, for a period of 20 years. As a result of the continuing cash flows (generated via the supply agreement and the retained operation and assets), the disposition is not reported as discontinued operations.

Additionally, in the first quarter of 2014, we sold the following Aggregates segment properties:

- § a previously mined and subsequently reclaimed tract of land for net pretax cash proceeds of \$10,727,000 resulting in a pretax gain of \$168,000
- § unimproved land previously containing a sales yard for net pretax cash proceeds of \$5,820,000 resulting in a pretax gain of \$5,790,000

In 2013, we acquired:

- § Fourth quarter — land containing 136 million tons of aggregates reserves at an existing quarry for \$117,000,000. We previously mined these reserves under a lease which was scheduled to expire in 2017
- § Second quarter — an aggregates production facility and four ready-mixed concrete facilities for \$29,983,000
- § First quarter — two aggregates production facilities for \$59,968,000. The initial accounting for the business combination was not finalized until the third quarter as appraisals of amortizable intangible assets (contractual rights in place) and property, plant & equipment were not completed. Provisional amounts for contractual rights in place and property, plant & equipment were subsequently adjusted in the second and third quarters of 2013 to the appraised values. These adjustments resulted in an increase in contractual rights in place from \$800,000 to \$3,620,000, an increase in property, plant & equipment from \$45,888,000 to \$52,583,000, a decrease in goodwill from \$9,759,000 to \$0 and other minor adjustments to working capital. The Condensed Consolidated Balance Sheet as of June 30, 2013 has been retrospectively adjusted. The Condensed Consolidated Statement of Comprehensive Income has not been retrospectively adjusted as the impact was immaterial

In 2013, we sold:

- § Third quarter — reclaimed land associated with a former site of a ready-mixed concrete facility for net pretax cash proceeds of \$11,261,000 resulting in a pretax gain of \$9,027,000
- § Third quarter — a percentage of the future production from aggregates reserves at certain owned quarries. The sale was structured as a volumetric production payment (VPP) for which we received gross cash proceeds of \$154,000,000 and incurred transaction costs of \$905,000. The net proceeds were recorded as deferred revenue and are amortized on a unit-of-sales basis to revenues over the term of the VPP. See Note 4 for the key terms of the VPP
- § Second quarter — four aggregates production facilities resulting in net pretax cash proceeds of \$34,743,000 and a pretax gain of \$21,183,000. We allocated \$4,521,000 of goodwill to these dispositions based on the relative fair values of the businesses disposed of and the portion of the reporting unit retained
- § First quarter — an aggregates production facility and its related replacement reserve land resulting in net pretax cash proceeds of \$5,133,000 and a pretax gain of \$2,802,000. We allocated \$674,000 of goodwill to this disposition

based on the relative fair values of the business disposed of and the portion of the reporting unit retained

Effective land management is both a business strategy and a social responsibility. We strive to achieve value through our mining activities as well as incremental value through effective post-mining land management. Our land management strategy includes routinely reclaiming and selling our previously mined land. Additionally, this strategy includes developing conservation banks by preserving land as a suitable habitat for endangered or sensitive species. These conservation banks have received approval from the United States Fish and Wildlife Service to offer mitigation credits for sale to third parties who may be required to compensate for the loss of habitats of endangered or sensitive species.

No assets meet the criteria for held for sale at June 30, 2014. As of December 31, 2013 and June 30, 2013, a previously mined and subsequently reclaimed tract of land within our Aggregates segment is presented in the accompanying Condensed Consolidated Balance Sheets as assets held for sale. This land tract sold in the first quarter of 2014. In addition, as of June 30, 2013, reclaimed land associated with a former site of a ready-mixed concrete facility within our Concrete segment is presented in the accompanying Condensed Consolidated Balance Sheet as assets held for sale. This land subsequently sold in the third quarter of 2013. The major classes of assets and liabilities of assets classified as held for sale are as follows:

in thousands	December 31 2013	June 30 2013
Held for Sale		
Property, plant & equipment, net	\$ 10,559	\$ 12,926
Total assets held for sale	\$ 10,559	\$ 12,926

Note 17: New Accounting Standards

ACCOUNTING STANDARDS RECENTLY ADOPTED

GUIDANCE ON FINANCIAL STATEMENT PRESENTATION OF UNRECOGNIZED TAX BENEFIT As of and for the interim period ended March 31, 2014, we adopted Accounting Standards Update (ASU) No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." Under this ASU, an unrecognized tax benefit, or portion thereof, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward except when specific conditions are met as outlined in the ASU. When these specific conditions are met, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. Our adoption of this standard had no material impact on our financial position, results of operations or liquidity.

GUIDANCE FOR OBLIGATIONS RESULTING FROM JOINT AND SEVERAL LIABILITY ARRANGEMENTS As of and for the interim period ended March 31, 2014, we adopted ASU 2013-04, "Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date."

This ASU provides guidance for the recognition, measurement and disclosure of such obligations that are within the scope of the ASU. Obligations within the scope of this ASU include debt arrangements, other contractual obligations and settled litigation and judicial rulings. Under this ASU, an entity (1) recognizes such obligations at the inception of the arrangement, (2) measures such obligations as the sum of (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on

behalf of its co-obligors and (3) discloses the nature and amount of such obligations as well as other information about those obligations. Our adoption of this standard had no material impact on our financial position, results of operations or liquidity.

TANGIBLE PROPERTY REGULATIONS As of January 1, 2014, the Internal Revenue Service's new tangible property regulations became effective. These regulations apply to amounts paid to acquire, produce or improve tangible property, as well as dispose of such property. The effect of this tax law change had no material impact on our financial position, results of operations or liquidity.

ACCOUNTING STANDARDS PENDING ADOPTION

SHARE-BASED AWARDS In June 2014, the Financial Accounting Standards Board (FASB) issued ASU 2014-12, "Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved After the Requisite Service Period," which clarifies the proper method of accounting for share-based awards when the terms of an award provide that a performance target could be achieved after the requisite service period. Under current guidance, there is a lack of consistency in the measurement of the grant-date fair values of awards with these types of performance targets. Under ASU 2014-12, a performance target that affects vesting and could be achieved after completion of the service period should be treated as a performance condition and, as a result, should not be included in the estimation of the grant-date fair value. Rather, an entity should recognize compensation cost for the award when it becomes probable that the performance target will be achieved. This ASU is effective for annual reporting periods beginning after December 15, 2015 and interim reporting periods within those annual reporting periods. We currently account for share-based awards with these types of performance targets in accordance with ASU 2014-12; therefore, we do not expect the adoption of this ASU to have any impact on our consolidated financial statements.

REVENUE RECOGNITION In May 2014, the FASB issued ASU 2014-09, “Revenue From Contracts With Customers,” which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. This ASU provides a more robust framework for addressing revenue issues and expands required revenue recognition disclosures. This ASU is effective for annual reporting periods beginning after December 15, 2016, and interim reporting periods within those annual reporting periods. Early adoption is not permitted. We are currently evaluating the impact of adoption of this ASU on our consolidated financial statements.

DISCONTINUED OPERATIONS REPORTING In April 2014, the FASB issued ASU 2014-08, “Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity,” which changes the definition of and expands the disclosure requirements for discontinued operations. Under the new definition, discontinued operations reporting is limited to disposals of components of an entity that represent strategic shifts that have (or will have) a major effect on an entity’s operations and financial results. The expanded disclosures for discontinued operations are meant to provide users of financial statements with more information about the assets, liabilities, revenues, and expenses of discontinued operations. Additionally, this ASU requires an entity to disclose the pretax profit or loss of an individually significant component of an entity that does not qualify for discontinued operations reporting. This ASU is effective for all disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years.

Note 18: Subsequent event

On July 18, 2014, we acquired four quarries in the San Francisco Bay Area of Northern California for 705,205 shares of our common stock and assumed \$4,102,000 of the seller’s debt (total consideration of approximately \$49,270,000). We issued 689,592 shares to the seller at closing and retained the remaining shares to true-up working capital balances.

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL COMMENTS

Overview

Vulcan provides the basic materials for the infrastructure needed to expand the U.S. economy. We are the nation's largest producer of construction aggregates, primarily crushed stone, sand and gravel; a major producer of asphalt mix and ready-mixed concrete.

Demand for our products is dependent on construction activity. The primary end uses include public construction, such as highways, bridges, airports, schools and prisons, as well as private nonresidential (e.g., manufacturing, retail, offices, industrial and institutional) and private residential construction (e.g., single-family houses, duplexes, apartment buildings and condominiums). Customers for our products include heavy construction and paving contractors; commercial building contractors; concrete products manufacturers; residential building contractors; state, county and municipal governments; railroads and electric utilities.

We operate primarily in the United States and our principal product — aggregates — is used in virtually all types of public and private construction projects and in the production of asphalt mix and ready-mixed concrete. Aggregates have a high weight-to-value ratio and, in most cases, must be produced near where they are used; if not, transportation can cost more than the materials, rendering them uncompetitive compared to locally produced materials. Exceptions to this typical market structure include areas along the U.S. Gulf Coast and the Eastern Seaboard where there are limited supplies of locally available high quality aggregates. We serve these markets from quarries that have access to long-haul transportation — shipping by barge and rail — and from our quarry on Mexico's Yucatan Peninsula. We transport aggregates from Mexico to the U.S. principally on our three Panamax-class, self-unloading ships.

There are practically no substitutes for quality aggregates. Because of barriers to entry created by zoning and permitting regulation and because of high transportation costs relative to the value of the product, the location of reserves is a critical factor to long-term success.

While aggregates is our primary business, we believe vertical integration between aggregates and downstream products, such as asphalt mix and concrete, can be managed effectively in certain markets to generate acceptable

financial returns. We produce and sell asphalt mix and ready-mixed concrete primarily in our mid-Atlantic, Georgia, southwestern and western markets. Aggregates comprise approximately 95% of asphalt mix by weight and 78% of ready-mixed concrete by weight. In all of these downstream businesses, we supply virtually all of the required aggregates from our own operations.

Seasonality and cyclical nature of our business

Almost all our products are produced and consumed outdoors. Seasonal changes and other weather-related conditions can affect the production and sales volumes of our products. Therefore, the financial results for any quarter do not necessarily indicate the results expected for the year. Normally, the highest sales and earnings are in the third quarter and the lowest are in the first quarter. Furthermore, our sales and earnings are sensitive to national, regional and local economic conditions and particularly to cyclical swings in construction spending, primarily in the private sector. The levels of construction spending are affected by changing interest rates and demographic and population fluctuations.

EXECUTIVE SUMMARY

Financial highlights for Second Quarter 2014

Compared to second quarter 2013:

- § Net sales increased \$60.2 million, or 9%
- § Gross profit increased \$41.9 million, or 32%
- § Aggregates segment gross profit increased \$34.6 million, or 27%
- § Shipments increased 10%, or 4.1 million tons
- § Pricing increased 3% on a freight-adjusted basis
- § Cash gross profit per ton was \$5.00, an 8% increase
- § Other combined segment gross profit improved \$7.3 million
- § Earnings from continuing operations were \$0.35 per diluted share as compared to \$0.23.
- § The prior year's second quarter earnings include \$0.10 per diluted share related to the gain associated with the sale of four aggregates production facilities
- § Adjusted EBITDA was \$172.7 million, an increase of \$31.9 million, or 23%

Our second quarter results further demonstrate the earnings leverage of volume growth in our aggregates business, and our continuing improvements to margins and unit profitability. A 10% increase in aggregates volume helped drive a 27% increase in Aggregates segment gross profit. Cash gross profit per ton increased to \$5.00, an 8% increase from the prior year's second quarter and a record level of unit profitability for this segment. Across all of our businesses, gross profit as a percentage of net sales increased 4.0 percentage points (400 basis points).

We are maintaining our outlook for full year freight-adjusted aggregates pricing to improve 3 to 5% from the prior year. The overall pricing outlook for our aggregates products continues to improve with the recovery in demand for construction materials. As we look ahead to the second half of the year, we expect continuing margin improvement driven by price growth, operating leverage and other cost controls.

In our Concrete and Asphalt Mix segments, we have realized improvements in unit profitability, as measured by materials margin. We expect continued growth in private construction activity to benefit volumes and prices, leading to higher unit profitability in both our Concrete and Asphalt Mix segments. Overall, we expect our non-aggregates gross profit to be \$40 to \$50 million for the full year, compared to \$13.6 million in 2013.

Selling, administrative and general (SAG) expenses are expected to be in line with the prior year, allowing us to leverage our overhead structure to expected higher sales.

We continue to experience accelerating demand recovery in most of our markets. Our aggregates shipments have increased year-over-year for five consecutive quarters, and the markets Vulcan serves should continue to grow faster than the U.S. markets as a whole.

Growth in the private end markets continues to drive increased construction activity and demand for our products. Leading indicators, such as housing starts, nonresidential contract awards and employment, continue to show favorable above-average growth trends in Vulcan-served markets. These factors underpin our full year aggregates shipment forecast of a 7 to 9% increase in 2014. This volume growth, coupled with the continuing improvement in unit profitability, supports our expectations for strong earnings leverage and margin expansion — and we remain focused on achieving these expectations.

Our second quarter and first half results demonstrate the broadening recovery of our markets and the benefits of our powerful earnings leverage. Comparing the first half of 2014 to the first half of 2013, Adjusted EBITDA grew \$45.0 million, or 27%, on a 9% increase in net sales. We expect to continue to deliver strong gains in earnings because of increasing demand in Vulcan-served markets.

We are pleased with the extension of the current highway bill until May 31, 2015 and the additional funding of \$10.8 billion transferred to the Highway Trust Fund. Congress continues to work toward the ultimate passage of a new multi-year highway bill. In the meantime, large transportation projects and the growth in contract awards for highways in 2013 and 2014 will provide steady growth in the demand for this market segment. Overall, we expect modest growth in shipments into public end markets in 2014, and we are optimistic with respect to public infrastructure construction in 2015 and beyond.

Our confidence in a sustained multi-year recovery in aggregates demand continues to grow. Our markets are recovering off trough levels of demand and are outpacing the rest of the U.S. To support the anticipated increased level of shipments, and to further improve our production costs and operating efficiencies, we now project capital spending for 2014 to be approximately \$240 million.

We are excited about our future as the leading aggregates supplier in the U.S. We remain focused on further improving the profitability of our existing businesses, strategically expanding our unmatched asset base to serve the needs of our customers, and continuing our disciplined management of capital.

In February 2012, our Board approved a two-year Planned Asset Sales initiative with targeted net proceeds of at least \$500 million through the sale of non-core assets. The initiative concluded in the first quarter of 2014 with the sale of our cement and concrete business in the Florida area to Cementos Argos. Including the \$719.1 million of net proceeds from the Argos transaction, the Planned Asset Sales initiative generated over \$1.1 billion of net proceeds. The proceeds from these sales were used to strengthen our balance sheet, unlock capital for more productive uses, improve our operating results and create value for shareholders. Over this two-year period, we retired over \$800 million of debt and reinvested over \$240 million to strengthen our aggregates position in our strategic markets of California, Georgia, Texas and Virginia.

RECONCILIATION OF NON-GAAP FINANCIAL MEASURES

Generally Accepted Accounting Principles (GAAP) does not define “free cash flow,” “cash gross profit” and “Earnings Before Interest, Taxes, Depreciation and Amortization” (EBITDA). Thus, free cash flow should not be considered as an alternative to net cash provided by operating activities or any other liquidity measure defined by GAAP. Likewise, cash gross profit and EBITDA should not be considered as alternatives to earnings measures defined by GAAP. We present these metrics for the convenience of investment professionals who use such metrics in their analyses and for shareholders who need to understand the metrics we use to assess performance and to monitor our cash and liquidity positions. The investment community often uses these metrics as indicators of a company's ability to incur and service debt and to assess the operating performance of a company's businesses. We use free cash flow, cash gross profit, EBITDA and other such measures to assess liquidity and the operating performance of our various business units and the consolidated company. Additionally, we adjust EBITDA for certain items to provide a more consistent comparison of performance from period to period. We do not use these metrics as a measure to allocate resources. Reconciliations of these metrics to their nearest GAAP measures are presented below:

free cash flow

Edgar Filing: Vulcan Materials CO - Form 10-Q

Free cash flow deducts purchases of property, plant & equipment from net cash provided by operating activities.

	Six Months Ended June 30	
in millions	2014	2013
Net cash provided by (used for) operating activities	\$ 22.9	\$ (45.3)
Purchases of property, plant & equipment	(116.3)	(60.1)
Free cash flow	\$ (93.4)	\$ (105.4)

cash gross profit

Cash gross profit adds back noncash charges for depreciation, depletion, accretion and amortization (DDA&A) to gross profit. Cash gross profit per ton is computed by dividing cash gross profit by tons shipped.

in millions, except per ton data	Three Months Ended June 30		Six Months Ended June 30	
	2014	2013	2014	2013
Aggregates segment				
Gross profit	\$ 161.7	\$ 127.1	\$ 200.2	\$ 151.9

Cement segment cash gross profit	\$ 1.1	\$ 6.8	\$ 2.2	\$ 11.7

EBITDA and adjusted ebitda

EBITDA is an acronym for Earnings Before Interest, Taxes, Depreciation and Amortization and excludes discontinued operations. We adjust EBITDA for certain items to provide a more consistent comparison of performance from period to period.

Edgar Filing: Vulcan Materials CO - Form 10-Q

in millions	Three Months Ended		Six Months Ended

RESULTS OF OPERATIONS

Net sales and cost of goods sold exclude intersegment sales and delivery revenues and cost. This presentation is consistent with the basis on which we review our consolidated results of operations. We discuss separately our discontinued operations, which consist of our former Chemicals business.

The following table shows net earnings in relationship to net sales, cost of goods sold, operating earnings, EBITDA and Adjusted EBITDA.

consolidated operating Results

in millions, except per share data	Three Months Ended		Six Months Ended	
	June 30		June 30

Second quarter 2014 Compared to second Quarter 2013

Second quarter 2014 net sales were \$756.3 million, up 9% from the second quarter of 2013. Shipments increased in aggregates (+10%) and asphalt mix (+3%) while, as a result of our first quarter sale of our cement and concrete businesses in the Florida area, shipments declined in ready-mixed concrete (-23%) and our cement shipments ceased. Pricing was up in aggregates (+3%) and materials margin increased in ready-mixed concrete (+22%) and asphalt mix (+1%).

Net earnings for the second quarter of 2014 were \$46.0 million, or \$0.35 per diluted share, compared to \$28.8 million, or \$0.22 per diluted share, in the second quarter of 2013. Each period's results were impacted by discrete items, as follows:

- § The second quarter of 2014 results include a pretax loss of \$0.7 million (net of \$1.8 million of disposition related charges) related to the sale of real estate and businesses
- § The second quarter of 2013 results include a pretax gain of \$23.0 million related to the sale of real estate and businesses

Edgar Filing: Vulcan Materials CO - Form 10-Q

Continuing Operations — Changes in earnings from continuing operations before income taxes for the second quarter of 2014 versus the second quarter of 2013 are summarized below:

earnings from continuing operations before income taxes

in millions	
Second quarter 2013	\$ 36.3
Higher aggregates gross profit due to	
Higher volumes	24.9
Higher selling prices	14.4
Higher costs and other items	(4.7)
Higher concrete earnings	9.0
Lower asphalt mix earnings	(0.2)
Lower cement earnings	(1.5)
Higher selling, administrative and general expense	(2.7)
Lower gain on sale of property, plant & equipment and businesses	(22.2)
Lower interest expense	10.3
All other	0.9
Second quarter 2014	\$ 64.5

Aggregates segment revenues were \$595.6 million compared to \$508.4 million in the prior year's second quarter. These revenues include sales generated from producing and selling aggregates tons as well as revenues from aggregates distribution, delivery and other services, including truck brokerage services. The truck brokerage services have been expanded recently to enhance our ability to serve customers and generate additional earnings from each ton shipped. The gross profit margin on growth in revenue associated with producing and selling aggregates tons was in line with our expectations. Also as expected, revenue growth from our transportation-related activities contributed to earnings but at a lower margin percentage.

Aggregates segment gross profit was \$161.7 million, an increase of \$34.6 million, or 27%, versus the prior year's second quarter. Gross profit margin as a percentage of segment revenues improved 2.1 percentage points (210 basis points) over the prior year's second quarter. Aggregates shipments increased 10% compared to the prior year, with key markets, including Georgia, Illinois, North Carolina, Texas and Virginia reporting more than 15% volume growth and Florida and Southern California realizing 11% and 12% growth, respectively. Freight-adjusted pricing for aggregates increased 3%, or \$0.33 per ton, versus the prior year's second quarter as virtually all markets realized price improvement. This widespread price improvement combined with reductions in our production costs shipped, drove a \$0.49 per ton, or 15%, increase in our unit gross profit.

Concrete segment gross profit was \$3.2 million compared to a loss of \$5.8 million in the second quarter of the prior year. Last year's second quarter results included our Florida concrete business that was sold in the first quarter of 2014. Adjusted for the sale of our concrete business in the Florida area, Concrete segment volume and pricing improved, driven primarily by increased private construction activity, while same-store gross profit increased \$2.5 million as reflected in the chart on the preceding page.

Asphalt Mix segment gross profit was \$9.0 million, in line with the prior year's second quarter. Asphalt mix volume increased 3% and materials margin improved slightly versus the prior year due mostly to lower costs for liquid asphalt. Operating costs, primarily energy-related, were slightly higher than the prior year.

Our cement business was also sold in the first quarter of 2014 along with the Florida concrete assets. We retained our calcium products business that is included in our Cement segment. This calcium products business reported second quarter 2014 Cement segment revenues of \$2.2 million and gross profit of \$0.9 million, both slightly better than the same-store prior year results for the Cement segment.

SAG expenses were up \$2.7 million, or 4%, compared with the prior year due mostly to increased performance-based compensation.

Gain on sale of property, plant & equipment and businesses was \$1.2 million in the second quarter of 2014 compared to \$23.4 million in the second quarter of 2013. The 2013 gain is primarily comprised of a \$21.2 million pretax gain on the sale of four aggregates production facilities.

Edgar Filing: Vulcan Materials CO - Form 10-Q

Net interest expense was \$40.6 million in the second quarter of 2014 compared to \$50.9 million in 2013. The lower interest expense resulted from the decrease in outstanding debt due to the \$506.4 million principal amount debt purchase in the first quarter of 2014.

We recorded an income tax provision from continuing operations of \$18.0 million in the second quarter of 2014 compared to \$6.2 million in the second quarter of 2013. In the second quarter of 2014, income taxes were calculated based on the EAETR, while the year-to-date effective tax rate was used to calculate income taxes in the second quarter of 2013. Both the EAETR and year-to-date effective tax rate methods for calculating income taxes are discussed in Note 3 to the condensed consolidated financial statements. The change in our income tax provision for the year resulted largely from applying the statutory rate to the increase in our pretax book earnings.

Earnings from continuing operations were \$0.35 per diluted share compared to \$0.23 per diluted share in the second quarter of 2013.

Discontinued Operations — Second quarter pretax loss from discontinued operations was \$0.9 million in 2014 and \$2.2 million in 2013. Both periods include charges related to general and product liability costs, including legal defense costs, and environmental remediation costs associated with our former Chemicals business. For additional details, see Note 2 to the condensed consolidated financial statements.

YEAR-TO-DATE JUNE 30, 2014 Compared to YEAR-TO-DATE JUNE 30, 2013

First half 2014 net sales were \$1,304.8 million, an increase of 9% versus \$1,200.6 million in the first half of 2013. Shipments were higher in aggregates (+9%) and asphalt mix (+9%) while lower in ready-mixed concrete (-15%) and cement (-66%). The reduction in ready-mixed concrete and cement shipments resulted from the March 7, 2014 sale of our cement and concrete businesses in the Florida area. Pricing was up in aggregates (+3%) and unit profitability as measured by materials margin was up in asphalt mix (+3%) and ready-mixed concrete (+16%).

Net earnings for first six months of 2014 were \$100.0 million, or \$0.75 per diluted share, compared to a net loss of \$26.1 million, or \$0.20 per diluted share, for the first half of 2013. Gross profit increased \$58.3 million mainly due to increased profitability in the Aggregates segment. Each period's results were impacted by discrete items, as follows:

§ Net earnings for first half of 2014 include a pretax gain of \$226.2 million (net of \$10.9 million of disposition related charges) related to the sale of real estate and businesses including our cement and concrete businesses in the Florida area, and a pretax loss on debt purchase of \$72.9 million presented as a component of interest expense (see Note 7 to the condensed consolidated financial statements)

Edgar Filing: Vulcan Materials CO - Form 10-Q

§ The net loss for the first half of 2013 includes a pretax gain of \$26.2 million related to the sale of real estate and businesses and a \$1.5 million charge for restructuring

Continuing Operations — Changes in earnings from continuing operations before income taxes for year-to-date June 30, 2014 versus year-to-date June 30, 2013 are summarized below:

earnings from continuing operations before income taxes

in millions

Year-to-date June 30, 2013	\$ (64.2)
Higher aggregates gross profit due to	
Higher volumes	34.0
Higher selling prices	20.5
Higher costs and other items	(6.2)
Higher concrete gross profit	9.9
Higher asphalt mix gross profit	2.5
Lower cement gross profit	(2.4)
Higher selling, administrative and general expenses	(4.2)
Higher gain on sale of property, plant & equipment and businesses	210.0
Lower restructuring charges	1.5
Higher interest expense	(57.0)
All other	(2.5)
Year-to-date June 30, 2014	\$ 141.9

30

Edgar Filing: Vulcan Materials CO - Form 10-Q

Gross profit for the Aggregates segment was \$200.2 million for the first six months of 2014 versus \$151.9 million in 2013. As noted in the table above, this \$48.3 million (32%) increase in gross profit resulted from higher volumes and selling prices. At \$4.25 per ton, our cash gross profit per ton increased \$0.33 per ton, or 8%, compared with the first half of 2013.

Concrete segment gross profit was a loss of \$6.0 million for the first six months of 2014, an improvement of \$9.9 million from the prior year. Ready-mixed concrete materials margin increased 16% while shipments decreased 15%. Last year's results and most of this year's first quarter results include our Florida concrete business that was sold in the first quarter of 2014. Same-store Concrete segment gross profit improved \$1.0 million compared to 2013 as reflected in the chart on page 28,

Asphalt Mix segment gross profit of \$13.7 million was \$2.5 million above the first half 2013 level. Increased volume drove most of the positive variance.

Cement segment gross profit of \$1.0 million was \$2.4 million below the first half 2013 level. As previously stated, we sold our cement business in the first quarter of 2014 along with the Florida concrete assets. We retained a calcium products business that is included within our Cement segment. Same-store Cement segment gross profit was \$1.3 million for the first six months of 2014 compared to \$1.5 million in the first half of 2013.

SAG expenses in the first half of 2014 were up \$4.2 million, or 3%, from the prior year due mostly to increased performance-based compensation.

Gain on sale of property, plant & equipment and businesses was \$237.5 million in the first six months of 2014 compared to \$27.5 million in the first half of 2013. The 2014 gain includes the sale of our cement and concrete businesses in Florida to Cementos Argos for a \$229.1 million pretax gain and the sale of two reclaimed operating sites for a \$6.0 million pretax gain. The 2013 gain is primarily comprised of a \$24.0 million pretax gain on the sale of five aggregates production facilities.

The first half of 2014 includes no restructuring charges as compared to \$1.5 million in the first six months of 2013. See Note 1 to the condensed consolidated financial statements for an explanation of these prior period costs.

Net interest expense was \$160.6 million in the first half of 2014 compared to \$103.6 million in the first six months of 2013. The higher interest cost resulted from the aforementioned \$72.9 million pretax loss on debt purchase.

We recorded an income tax provision from continuing operations of \$40.9 million for the first six months ended June 30, 2014 compared to an income tax benefit of \$32.7 million for the six months ended June 30, 2013. For the six month period ended June 30, 2014, income taxes were calculated based on the EAETR, while the year-to-date effective tax rate was used to calculate income taxes for the six month period ended June 30, 2013. Both the EAETR and year-to-date effective tax rate methods for calculating income taxes are discussed in Note 3 to the condensed consolidated financial statements. The change in our income tax provision for the year resulted largely from applying the statutory rate to the increase in our pretax book earnings.

Earnings from continuing operations were \$0.76 per diluted share compared to a loss of \$0.24 per diluted share in the first half of 2013.

Discontinued Operations — Year to-date June pretax loss from discontinued operations was \$1.7 million in 2014 compared to a pretax gain of \$9.0 million in 2013. Both periods include charges related to general and product liability costs, including legal defense costs, and environmental remediation costs associated with our former Chemicals business. The 2013 gain was the result of an \$11.7 million pretax gain related to the final payment from the earn-out. For additional details, see Note 2 to the condensed consolidated financial statements.

LIQUIDITY AND FINANCIAL RESOURCES

Our primary sources of liquidity are cash provided by our operating activities, a bank line of credit and access to the capital markets. Additional sources of liquidity include the sale of reclaimed and surplus real estate, and dispositions of non-strategic operating assets. We believe these liquidity and financial resources are sufficient to fund our future business requirements, including:

- § cash contractual obligations
- § capital expenditures
 - § debt service obligations
- § potential future acquisitions
- § dividend payments

We actively manage our capital structure and resources in order to minimize the cost of capital while properly managing financial risk. We seek to meet these objectives by adhering to the following principles:

- § maintain substantial bank line of credit borrowing capacity
- § use the bank line of credit only for seasonal working capital requirements and other temporary funding requirements
- § proactively manage our long-term debt maturity schedule such that repayment/refinancing risk in any single year is low
- § minimize financial and other covenants that limit our operating and financial flexibility
- § opportunistically access the capital markets when conditions and terms are favorable

On July 11, 2014, our Board of Directors declared a quarterly dividend of six cents per share effective with the third quarter 2014 payment. This dividend compares with the five cents per share quarterly dividend paid in the first and second quarters of 2014 and the one cent per share quarterly dividend paid in the fourth quarter of 2013.

Cash

Included in our June 30, 2014 cash and cash equivalents balance of \$227.7 million is \$81.6 million of cash held at one of our foreign subsidiaries. A portion of this \$81.6 million of cash relates to earnings prior to January 1, 2012 that are permanently reinvested offshore. Use of this permanently reinvested cash is currently limited to our foreign operations.

cash from operating activities

in millions	Six Months Ended	
	2014	June 30 2013
Net earnings (loss)	\$ 100.0	\$ (26.1)
Depreciation, depletion, accretion and amortization (DDA&A)	137.7	152.6
Net earnings before noncash deductions for DDA&A	\$ 237.7	\$ 126.5
Net gain on sale of property, plant & equipment and businesses	(237.5)	(40.6)
Cost of debt purchase	72.9	0.0
Other operating cash flows, net	(50.2)	(131.2)
Net cash provided by (used for) operating activities	\$ 22.9	\$ (45.3)

As noted in the table above, net earnings before noncash deductions for DDA&A increased \$111.2 million during the first half of 2014 to \$237.7 million. Included in net earnings for the first half of 2014 is a pretax gain of \$229.1 million (see Note 16 to the condensed consolidated financial statements) from the sale of our cement and concrete businesses in the Florida area. Cash received associated with the gain on sale of property, plant & equipment and businesses is presented as a component of investing activities. Additionally, we purchased \$506.4 million principal amount of outstanding debt through a tender offer and incurred a loss of \$72.9 million (see Note 7 to the condensed consolidated financial statements). Cash paid for the debt purchase is presented as a component of financing activities.

cash flows from investing activities

Net cash provided by investing activities was \$560.9 million during the six months ended June 30, 2014, a \$655.5 million increase compared to the same period of 2013. This increase resulted from a \$684.1 million increase in proceeds from the sale of property, plant & equipment and businesses and a \$33.5 million decrease in purchases of property, plant & equipment and businesses. During the first six months of 2014, we sold: a previously mined and subsequently reclaimed tract of land for \$10.7 million, land previously containing a sales yard for \$5.8 million, and our cement and concrete businesses in the Florida area for \$719.1 million. Conversely, \$62.1 million of the cash proceeds from the sale of property was placed into an escrow account (restricted cash) that is available for the acquisition of replacement property under like-kind exchange agreements.

cash flows from financing activities

Net cash used for financing activities of \$549.9 million increased \$501.3 million in the first half of 2014 compared to the same period of 2013. This increase is primarily attributable to a \$418.2 million increase in debt payments and a \$111.0 million decrease in proceeds from drawing on our line of credit. As previously mentioned, in the first quarter of 2014, we purchased \$506.4 million principal amount of outstanding debt through a tender offer as follows: \$375.0 million of 6.50% notes due in 2016 and \$131.4 million of 6.40% notes due in 2017. Total tender costs were \$579.7 million including a \$71.8 million premium and \$1.5 million in transaction costs. This increase in cash used for financing activities is partially offset by a \$27.5 million increase in proceeds from the issuance of common stock. For the six months ended June 30, 2014, we issued 0.4 million shares of common stock to the trustee of our 401(k) savings and retirement plans for cash proceeds of \$27.5 million.

debt

Certain debt measures are outlined below:

	June 30 2014	December 31 2013	June 30 2013
dollars in millions			
Debt	\$ 0.1	\$ 0.2	\$ 0.2

Current maturities of long-term debt			
Short-term debt 1	0.0	0.0	100.0

Total debt	\$ 2,006.5	\$ 2,522.4	\$ 2,624.6
Capital			
Total debt	\$ 2,006.5	\$ 2,522.4	\$ 2,624.6
Equity	4,086.2	3,938.1	3,813.5
Total capital	\$ 6,092.7	\$ 6,460.5	\$ 6,438.1
Total Debt as a Percentage of Total Capital			
	32.9%	39.0%	40.8%
Weighted-average Effective Interest Rates			
Bank line of credit 2			
	N/A	N/A	2.03%
Long-term debt	8.10%	7.73%	7.72%
Fixed versus Floating Interest Rate Debt			
Fixed-rate debt	99.3%	99.4%	95.7%
Floating-rate debt	0.7%	0.6%	4.3%

1 Reflects borrowings under our line of credit. Borrowings are shown as short-term due to our intent to repay within twelve months.

2 Reflects only the cost of borrowings; we also pay fees for unused borrowing capacity and standby letters of credit.

There were no material scheduled debt payments during the first six months of 2014. However, we purchased \$506.4 million principal amount of outstanding debt through a tender offer as described in Note 7 to the condensed consolidated financial statements. This debt purchase was funded by the aforementioned sale of our cement and concrete businesses in the Florida area.

Edgar Filing: Vulcan Materials CO - Form 10-Q

Our \$0.1 million of current maturities of long-term debt as of June 30, 2014 is due as follows:

in millions	Current Maturities \$
Third quarter 2014	0.1
Fourth quarter 2014	0.0
First quarter 2015	0.0
Second quarter 2015	0.0

We expect to retire the current maturities using existing cash.

In March 2014, we amended our \$500.0 million line of credit to, among other things, extend the term from March 2018 to March 2019, eliminate the borrowing capacity governor of eligible accounts receivable and eligible inventory, and provide for the line of credit to become unsecured upon achievement of certain credit metrics and/or credit ratings. Until such metrics/ratings are achieved, the line of credit is secured by accounts receivable and inventory. As of June 30, 2014, our available borrowing capacity was \$446.7 million.

Utilization of the borrowing capacity under our line of credit as of June 30, 2014:

§ none was drawn

§ \$53.3 million was used to provide support for outstanding standby letters of credit

Borrowings under the line of credit bear interest at a rate determined at the time of borrowing equal to the lower of the London Interbank Offered Rate (LIBOR) plus a margin ranging from 1.50% to 2.25%, or an alternative rate derived from the lender's prime rate, based on our total debt to EBITDA ratio. Letters of credit issued under the line of credit are charged a fee equal to the applicable margin for LIBOR based borrowing plus 0.175%. As of June 30, 2014, the applicable margin was 2.00%.

debt ratings

Our debt ratings and outlooks as of June 30, 2014 are summarized below:

Rating/Outlook	Date	Description
Senior Secured Line of Credit		
Moody's Ba1/stable	4/22/2014	upgraded from Ba2/negative
Senior Unsecured 1		
Moody's Ba3/stable	4/22/2014	outlook changed from negative to stable
Standard & Poor's		
2 BB/positive	1/23/2014	outlook changed from stable to positive

1 Not all of our long-term debt is rated.

2 On July 31, 2014, the rating was upgraded to BB+/stable.

Equity

Our common stock issuances are summarized below:

	June 30 2014	December 31 2013	June 30 2013
in thousands			
Common stock shares at beginning of year, issued and outstanding	130,200	129,721	129,721
Common Stock Issuances			
Acquisition	17	0	0
401(k) retirement plans	436	71	0
Share-based compensation plans	257	408	242
Common stock shares at end of period, issued and outstanding	130,910	130,200	129,963

During the second quarter of 2014, we issued 17 thousand shares in connection with the purchase of a permitted quarry.

34

Edgar Filing: Vulcan Materials CO - Form 10-Q

We occasionally sell shares of common stock to the trustee of our 401(k) retirement plans to satisfy the plan participants' elections to invest in our common stock. The resulting cash proceeds provide a means of improving cash flow, increasing equity and reducing leverage. Under this arrangement, the stock issuances and resulting cash proceeds were as follows:

- § six months ended June 30, 2014 — issued 0.4 million shares for cash proceeds of \$27.5 million
- § twelve months ended December 31, 2013 — issued 0.1 million shares for cash proceeds of \$3.8 million
- § six months ended June 30, 2013 — no shares issued

There were no shares held in treasury as of June 30, 2014, December 31, 2013 and June 30, 2013. There were 3,411,416 shares remaining under the current purchase authorization of the Board of Directors as of June 30, 2014.

off-balance sheet arrangements

We have no off-balance sheet arrangements, such as financing or unconsolidated variable interest entities, that either have or are reasonably likely to have a current or future material effect on our:

- § results of operations and financial position
- § liquidity
- § capital expenditures
- § capital resources

Standby Letters of Credit

For a discussion of our standby letters of credit see Note 8 to the condensed consolidated financial statements.

Cash Contractual Obligations

Our obligation to make future payments under contracts is presented in our most recent Annual Report on Form 10-K.

As a result of our March 2014 debt purchases as described in Note 7 to the condensed consolidated financial statements, our obligations to make future payments under contracts decreased as follows:

in millions	Payments Due by Year				Total
	2014	2015-2016	2017-2018	Thereafter	
Cash					
Contractual					
Obligations					
Long-term					
debt					
excluding					
bank line of					
credit					
Principal					
payments	\$ 0.0	\$ (375.0)	\$ (131.4)	\$ 0.0	\$ (506.4)
Interest					
payments	(25.6)	(63.6)	(8.4)	0.0	(97.6)
Total	\$ (25.6)	\$ (438.6)	\$ (139.8)	\$ 0.0	\$ (604.0)

CRITICAL ACCOUNTING POLICIES

We follow certain significant accounting policies when preparing our consolidated financial statements. A summary of these policies is included in our Annual Report on Form 10-K for the year ended December 31, 2013 (Form 10-K).

We prepare these financial statements to conform with accounting principles generally accepted in the United States of America. These principles require us to make estimates and judgments that affect our reported amounts of assets, liabilities, revenues and expenses, and the related disclosures of contingent assets and contingent liabilities at the date of the financial statements. We base our estimates on historical experience, current conditions and various other assumptions we believe reasonable under existing circumstances and evaluate these estimates and judgments on an ongoing basis. The results of these estimates form the basis for our judgments about the carrying values of assets and liabilities as well as identifying and assessing the accounting treatment with respect to commitments and contingencies. Our actual results may materially differ from these estimates.

We believe that the accounting policies described in the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section of our Form 10-K require the most significant judgments and estimates used in the preparation of our financial statements, so we consider these to be our critical accounting policies. There have been no changes to our critical accounting policies during the six months ended June 30, 2014.

new Accounting standards

For a discussion of the accounting standards recently adopted or pending adoption and the affect such accounting changes will have on our results of operations, financial position or liquidity, see Note 17 to the condensed consolidated financial statements.

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this report, including expectations regarding future performance, contain forward-looking statements that are subject to assumptions, risks and uncertainties that could cause actual results to differ materially from those projected. These assumptions, risks and uncertainties include, but are not limited to:

- § general economic and business conditions
- § the timing and amount of federal, state and local funding for infrastructure
- § changes in our effective tax rate that can adversely impact results
- § the increasing reliance on information technology infrastructure for our ticketing, procurement, financial statements and other processes can adversely affect operations in the event that the infrastructure does not work as intended or experiences technical difficulties or is subjected to cyber attacks
- § the impact of the state of the global economy on our business and financial condition and access to capital markets
- § changes in the level of spending for residential and private nonresidential construction
- § the highly competitive nature of the construction materials industry
- § the impact of future regulatory or legislative actions
- § the outcome of pending legal proceedings
- § pricing of our products
- § weather and other natural phenomena
- § energy costs
- § costs of hydrocarbon-based raw materials
- § healthcare costs
- § the amount of long-term debt and interest expense we incur
- § changes in interest rates

Edgar Filing: Vulcan Materials CO - Form 10-Q

- § the impact of our below investment grade debt rating on our cost of capital
- § volatility in pension plan asset values and liabilities which may require cash contributions to the pension plans
- § the impact of environmental clean-up costs and other liabilities relating to previously divested businesses
- § our ability to secure and permit aggregates reserves in strategically located areas
- § our ability to manage and successfully integrate acquisitions
- § the potential of goodwill or long-lived asset impairment
- § the potential impact of future legislation or regulations relating to climate change or greenhouse gas emissions or the definition of minerals
- § other assumptions, risks and uncertainties detailed from time to time in our periodic reports

All forward-looking statements are made as of the date of filing. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. Investors are cautioned not to rely unduly on such forward-looking statements when evaluating the information presented in our filings, and are advised to consult any of our future disclosures in filings made with the Securities and Exchange Commission and our press releases with regard to our business and consolidated financial position, results of operations and cash flows.

INVESTOR information

We make available on our website, www.vulcanmaterials.com, free of charge, copies of our:

- § Annual Report on Form 10-K
- § Quarterly Reports on Form 10-Q
- § Current Reports on Form 8-K

We also provide amendments to those reports filed with or furnished to the Securities and Exchange Commission (SEC) pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as well as all Forms 3, 4 and 5 filed with the SEC by our executive officers and directors, as soon as the filings are made publicly available by the SEC on its EDGAR database (www.sec.gov).

The public may read and copy materials filed with the SEC at the Public Reference Room of the SEC at 100 F Street, NE, Washington, D. C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-732-0330. In addition to accessing copies of our reports online, you may request a copy of our Annual Report on Form 10-K, including financial statements, by writing to Jerry F. Perkins Jr., Secretary, Vulcan Materials Company, 1200 Urban Center Drive, Birmingham, Alabama 35242.

We have a:

- § Business Conduct Policy applicable to all employees and directors
- § Code of Ethics for the CEO and Senior Financial Officers

Copies of the Business Conduct Policy and the Code of Ethics are available on our website under the heading “Corporate Governance.” If we make any amendment to, or waiver of, any provision of the Code of Ethics, we will disclose such information on our website as well as through filings with the SEC.

Our Board of Directors has also adopted:

- § Corporate Governance Guidelines
- § Charters for its Audit, Compensation, Finance, Governance and Safety, Health & Environment Committees

These documents meet all applicable SEC and New York Stock Exchange regulatory requirements.

The Audit, Compensation and Governance Charters are available on our website under the heading, “Corporate Governance,” or you may request a copy of any of these documents by writing to Jerry F. Perkins Jr., Secretary, Vulcan Materials Company, 1200 Urban Center Drive, Birmingham, Alabama 35242.

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

MARKET RISK

We are exposed to certain market risks arising from transactions that are entered into in the normal course of business. In order to manage or reduce these market risks, we may utilize derivative financial instruments. We do not enter into derivative financial instruments for speculative or trading purposes.

We are exposed to interest rate risk due to our various credit facilities and long-term debt instruments. At times, we use interest rate swap agreements to manage this risk.

At June 30, 2014, the estimated fair value of our long-term debt instruments including current maturities was \$2,312.3 million compared to a book value of \$2,006.5 million. The estimated fair value was determined by discounting expected future cash flows based on credit-adjusted interest rates on U.S. Treasury bills, notes or bonds, as appropriate. The fair value estimate is based on information available as of the measurement date. Although we are not aware of any factors that would significantly affect the estimated fair value amount, it has not been comprehensively revalued since the measurement date. The effect of a decline in interest rates of one percentage point would increase the fair value of our liability by \$114.2 million.

We are exposed to certain economic risks related to the costs of our pension and other postretirement benefit plans. These economic risks include changes in the discount rate for high-quality bonds, the expected return on plan assets and the rate of increase in the per capita cost of covered healthcare benefits. The impact of a change in these assumptions on our annual pension and other postretirement benefits costs is discussed in our most recent Annual Report on Form 10-K.

ITEM 4

controls and procedures

disclosure controls and procedures

We maintain a system of controls and procedures designed to ensure that information required to be disclosed in reports we file with the SEC is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms. These disclosure controls and procedures (as defined in the Securities and Exchange Act of 1934 Rules 13a - 15(e) or 15d - 15(e)), include, without limitation, controls and procedures designed to ensure that information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer, with the participation of other management officials, evaluated the effectiveness of the design and operation of the disclosure controls and procedures as of June 30, 2014. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective.

We are in the process of replacing our legacy information technology systems and have completed the implementation of our financial reporting software, which is a major component of the replacement. In addition, we have substantially completed implementation of our quote to cash software system, which is another significant component of the replacement. The new information technology systems are the source for most of the information presented in this Quarterly Report on Form 10-Q. We are continuing to work towards full implementation of the quote to cash system and expect the implementation to be completed during the third quarter of 2014.

As part of divestiture of our cement and concrete businesses in the Florida area, we entered into a Transition Services Agreement with the buyer, whereby we agreed to continue to provide certain services for the divested facilities during 2014. All services will be performed in our existing systems and under our current control environment. The service agreement does not require significant changes to our current control environment beyond ensuring proper segregation of duties over processing of third-party transactions. Controls were established and implemented to facilitate proper handling of the third-party data, including controls to protect against comingling of information and controls to prevent improper access to information.

No other changes were made to our internal controls over financial reporting or other factors that could materially affect these controls during the second quarter of 2014.

part II other information

ITEM 1

legal proceedings

Certain legal proceedings in which we are involved are discussed in Note 12 to the consolidated financial statements and Part I, Item 3 of our Annual Report on Form 10-K for the year ended December 31, 2013, and in Note 8 to the condensed consolidated financial statements and Part II, Item 1 of our Quarterly Report on Form 10-Q for the quarter ended March 31, 2014. See Note 8 to the condensed consolidated financial statements of this Form 10-Q for a discussion of certain recent developments concerning our legal proceedings.

ITEM 1A

risk factors

There were no material changes to the risk factors disclosed in Item 1A of Part I in our Form 10-K for the year ended December 31, 2013.

ITEM 4

MINE SAFETY DISCLOSURES

The information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K is included in Exhibit 95 of this report.

ITEM 6
