CSP INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
THREE MONTHS ENDED DECEMBER 31, 2011 AND 2010

Organization and Business

CSP Inc. was founded in 1968 and is based in Billerica, Massachusetts. To meet the diverse requirements of its industrial, commercial and defense customers worldwide, CSP Inc. and its subsidiaries (collectively “CSPI” or the “Company”) develop and market IT integration solutions and high-performance cluster computer systems. The Company operates in two segments, its Systems segment and its Service and System Integration segment.

1. Basis of Presentation

The accompanying consolidated financial statements have been prepared by the Company, without audit, and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the results of the interim periods presented. All adjustments were of a normal recurring nature. Certain information and footnote disclosures normally included in the annual financial statements, which are prepared in accordance with accounting principles generally accepted in the United States, have been condensed or omitted. Accordingly, the Company believes that although the disclosures are adequate to make the information presented not misleading, the unaudited financial statements should be read in conjunction with the footnotes contained in the Company’s Annual Report on Form 10-K for the fiscal year ended September 30, 2011.

2. Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates under different assumptions or conditions.

3. Earnings Per Share of Common Stock

Basic net income per common share is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted net income per common share reflects the maximum dilution that would have resulted from the assumed exercise and share repurchase related to dilutive stock options and is computed by dividing net income by the assumed weighted average number of common shares outstanding.

We are required to present earnings per share, or EPS, utilizing the two class method because we had outstanding, non-vested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents, which are considered participating securities.

Basic and diluted earnings per share computations for the Company’s reported net income attributable to common stockholders are as follows:

For the three months ended	
December 31, 2011	December 31, 2010

Edgar Filing: CSP INC /MA/ - Form 10-Q

	(Amounts in thousands except per share data)	
Net income	\$ 461	\$ 389
Less: Net income attributable to nonvested common stock	7	4
Net income attributable to common stockholders	\$ 454	\$ 385
Weighted average total shares outstanding – basic	3,410	3,527
Less: weighted average non-vested shares outstanding	53	42
Weighted average number of common shares outstanding – basic	3,357	3,485
Potential common shares from non-vested stock awards and the assumed exercise of stock options	38	36
Weighted average common shares outstanding – diluted	3,395	3,521
Net income per share – basic	\$ 0.14	\$ 0.11
Net income per share – diluted	\$ 0.13	\$ 0.11

All anti-dilutive securities, including stock options, are excluded from the diluted income per share computation. For the three months ended December 31, 2011, 205,000 options were excluded from the diluted income per share calculation because their inclusion would have been anti-dilutive.

4. Inventories

Inventories consist of the following:

	December 31, 2011	September 30, 2011
	(Amounts in thousands)	
Raw materials	\$ 1,103	\$ 886
Work-in-process	355	539
Finished goods	3,563	5,352
Total	\$ 5,021	\$ 6,777

Finished goods includes inventory that has been shipped, but for which all revenue recognition criteria has not been met of approximately \$1.1 million and \$3.4 million as of December 31, 2011 and September 30, 2011, respectively.

Total inventory balances in the table above are shown net of reserves for obsolescence of approximately \$4.3 million and \$4.3 million as of December 31, 2011 and September 30, 2011, respectively.

5. Accumulated Other Comprehensive Loss

The components of comprehensive income (loss) are as follows:

	For the Three Months Ended	
	December 31, 2011	December 31, 2010
	(Amounts in thousands)	
Net income (loss)	\$ 461	\$ 389

Cumulative effect of foreign currency translation	\$ (2,342)	\$ (2,228)
Additional minimum pension liability	(3,675)	(3,675)
Accumulated Other Comprehensive Loss	\$ (6,017)	\$ (5,903)

6. Pension and Retirement Plans

The Company has defined benefit and defined contribution plans in the United Kingdom, Germany and the U.S. In the United Kingdom and Germany, the Company provides defined benefit pension plans and defined contribution plans for the majority of its employees. In the U.S., the Company provides benefits through supplemental retirement plans to certain current and former employees. The domestic supplemental retirement plans have life insurance policies which are not plan assets but were purchased by the Company as a vehicle to fund the costs of the plan. Domestically, the Company also provides for officer death benefits through post-retirement plans to certain officers. All of the Company's defined benefit plans are closed to newly hired employees and have been for fiscal years 2010 and 2011

and for the three months ended December 31, 2011.

8

The Company funds its pension plans in amounts sufficient to meet the requirements set forth in applicable employee benefits laws and local tax laws. Liabilities for amounts in excess of these funding levels are accrued and reported in the consolidated balance sheets.

Our pension plan in the United Kingdom is the only plan with plan assets. The plan assets consist of an investment in a commingled fund which in turn comprises a diversified mix of assets including corporate equity securities, government securities and corporate debt securities.

The components of net periodic benefit costs related to the U.S. and international plans are as follows:

	For the Three Months Ended December 31

Total assets measured at fair value	\$ 3,493	\$ —	\$ —	\$ 3,493	\$ —

These assets are included in cash and cash equivalents in the accompanying consolidated balance sheets. All other monetary assets and liabilities are short-term in nature and approximate their fair value.

The Company had no liabilities measured at fair value as of December 31, 2011 or September 30, 2011. The Company had no assets or liabilities measured at fair value on a non recurring basis as of December 31, 2011 or

September 30, 2011.

9. Common Stock Repurchase

Pursuant to prior authorizations by the Board of Directors, the Company repurchased approximately 17 thousand shares of its outstanding common stock during the three months ended December 31, 2011. As of December 31, 2011, approximately 212 thousand shares remain authorized for repurchase under the Company's stock repurchase program.

10

10. Dividend

On January 12, 2012, our Board of Directors declared a cash dividend of \$.10 per share which was paid on February 3, 2012 to stockholders of record as of January 27, 2012, the record date. Payment of this dividend should not be considered to mean that dividends will be paid in the future.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

The discussion below contains certain forward-looking statements related to, among others, but not limited to, statements concerning future revenues and future business plans. In addition, forward-looking statements include statements in which we use words such as "expect," "believe," "anticipate," "intend," or similar expressions. Although we believe the expectations reflected in such forward-looking statements are based on reasonable assumptions, we cannot assure you that these expectations will prove to have been correct, and actual results may vary from those contained in such forward-looking statements.

Markets for our products and services are characterized by rapidly changing technology, new product introductions and short product life cycles. These changes can adversely affect our business and operating results. Our success will depend on our ability to enhance our existing products and services and to develop and introduce, on a timely and cost effective basis, new products that keep pace with technological developments and address increasing customer requirements. The inability to meet these demands could adversely affect our business and operating results.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an on-going basis, we evaluate our estimates, including those related to uncollectible receivables, inventory valuation, income taxes, deferred compensation and retirement plans, estimated selling prices used for revenue recognition and contingencies. We base our estimates on historical performance and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. A description of our critical accounting policies is contained in our Annual Report on Form 10-K for the fiscal year ended September 30, 2011 in the "Critical Accounting Policies" section of Management's Discussion and Analysis of Financial Condition and Results of Operations.

Results of Operations

Recent Development

On January 12, 2012, our Board of Directors declared a cash dividend of \$.10 per share which was paid on February 3, 2012 to stockholders of record as of January 27, 2012, the record date. Payment of this dividend should not be considered to mean that dividends will be paid in the future.

Overview of the three months ended December 31, 2011 Results of Operations

Highlights include:

Revenue increased by approximately \$0.5 million, or 2%, to \$21.1 million for the three months ended December 31, 2011 versus \$20.6 million for the three months ended December 31, 2010.

- For the three months ended December 31, 2011, we had an operating profit of approximately \$0.8 million versus operating income of approximately \$0.6 million for the three months ended December 31, 2010, for an increase of approximately \$0.2 million, or 33% in our operating result.

For the three months ended December 31, 2011, net income was approximately \$0.5 million versus net income of approximately \$0.4 million for the three months ended December 31, 2010, for an increase of approximately \$0.1 million, or 25%.

Edgar Filing: CSP INC /MA/ - Form 10-Q

The following table details our results of operations in dollars and as a percentage of sales for the three months ended December 31, 2011 and 2010:

As shown above, total revenues increased by approximately \$0.5 million, or 2%, for the three months ended December 31, 2011 compared to the three months ended December 31, 2010. Revenue in the Systems segment increased for the current year three month period versus the prior year three month period by approximately \$0.5 million, while revenues in the Service and System Integration segment essentially remained flat at approximately \$18.8 million for both periods.

Product revenues decreased by approximately \$0.1 million, or 1%, for the three months ended December 31, 2011 compared to the comparable period of the prior fiscal year. This change in product revenues was made up of a decrease in product revenues in the Service and System Integration segment of approximately \$1.0 million and an offsetting increase in product revenues in the Systems segment of approximately \$0.9 million for the three month period ended December 31, 2011 versus the three month period ended December 31, 2010.

The decrease in the Service and System Integration segment product sales of approximately \$1.0 million was due primarily to a decrease in product sales in the U.S. division of the segment of approximately \$1.8 million, offset by increases in sales in this segment's German division of approximately \$0.4 million and in the UK division of approximately \$0.3 million.

In the US division, product sales to the largest customer of the division, increased by approximately \$2.5 million. However, sales to several other customers decreased by a total of approximately \$4.3 million, resulting in the net decrease of \$1.8 million. In Germany, the \$0.4 million increase was driven primarily by increased sales to the division's largest customer, while the increase in sales in the UK division was the result of increased third party product sales versus the prior year.

The increase in product revenues in the Systems segment of approximately \$0.9 million was from the sale of parts, components and spares into existing programs for both US and Japanese defense department customers.

As shown in the table above, service revenues increased by approximately \$0.6 million, or 11%. This increase was made up of an increase in the Service and System Integration segment of approximately \$1.0 million offset by a decrease of \$0.4 million in the Systems segment. The increase in revenues in the Service and System Integration segment was from the German division's largest customer, in connection with a large IT security services project. The decrease in the Systems segment was due to lower royalty income recorded in the three months ended December 31, 2011 versus the three months ended December 31, 2010.

Our sales by geographic area, based on the location to which the products were shipped or services rendered, are as follows:

	For the three Months Ended		December		\$ Increase (Decrease)	% Increase (Decrease)
	December 31, 2011	%	December 31, 2010	%		
	(Dollar amounts in thousands)					
Americas	\$11,814	56	% \$14,052	68	% \$(2,238)	(16)%
Europe	8,448	40	% 6,436	31	% 2,012	31 %
Asia	831	4	% 139	1	% 692	498 %
Totals	\$21,093	100	% \$20,627	100	% \$466	2 %

The decrease in Americas revenue for the three months ended December 31, 2011 versus the three months ended December 31, 2010 was primarily the result of the fluctuations described above in the Systems segment and the US division of the Service and System Integration segment.

The increase in sales in Europe was primarily the result of the higher sales described above from the German division of the Service and System Integration segment. The increase in Asia sales was the result of the increase in sales to our existing customer that supplies a large Japanese defense program.

Cost of Sales and Gross Margins

The following table details our cost of sales by operating segment for the three months ended December 31, 2011 and 2010:

Total cost of sales increased by approximately \$0.2 million when comparing the three months ended December 31, 2011 versus the three months ended December 31, 2010. This increase in cost of sales of 1% overall, is consistent with the increase in sales of 2% overall as described previously. The resulting higher profit margin of 23% for the three months ended December 31, 2011 versus 22% for 2010 was due to several factors which are discussed below.

In the Service and System Integration segment, the overall gross margin was 18% for the three months ended December 31, 2011 versus 16% for the prior year three month period. Product gross margin in the segment increased

from 12% for the three months ended December 31, 2010, to 14% for the three months ended December 31, 2011, while the segment's service gross margin decreased from 32% to 29% . The product gross margin increase was due to a more favorable product mix in the current year quarter versus the prior year. Current year product sales included more networking and data security products versus more sales of servers and other lower margin products in the prior year quarter in both the US and German divisions. The decrease in service gross margin in the Service and System Integration segment was due to greater use of contractors versus in-house resources particularly in Germany in the quarter ended December 31, 2011 versus the quarter ended December 31, 2010.

In the Systems segment, the gross profit margin declined from 83% to 62% as shown in the table above. This was because in the prior year period, royalty revenue, which carries a 100% gross margin, made up a much greater percentage of total revenue (77%), versus the current year period royalty revenue which was 41% of total revenue.

Engineering and Development Expenses

The following table details our engineering and development expenses by operating segment for the three months ended December 31, 2011 and 2010:

	For the Three Months Ended					
	December 31, 2011	% of Total	December 31, 2010	% of Total	\$ Decrease	% Decrease
	(Dollar amounts in thousands)					
By Operating Segment:						
Systems	\$383	100	% \$510	100	% \$(127)	(25)%
Service and System Integration	—	—	% —	—	% —	— %
Total	\$383	100	% \$510	100	% \$(127)	(25)%

The decrease in engineering and development expenses displayed above was due to lower engineering consulting expenditures in connection with the development of the next generation of MultiComputer products in the Systems segment.

Selling, General and Administrative

The following table details our selling, general and administrative (“SG&A”) expense by operating segment for the three months ended December 31, 2011 and 2010:

	For the Three Months Ended					
	December 31, 2011	% of Total	December 31, 2010	% of Total	\$ Increase	% Increase
	(Dollar amounts in thousands)					
By Operating Segment:						
Systems	\$1,052	29	% \$882	26	% \$170	19 %
Service and System Integration	2,624	71	% 2,493	74	% 131	5 %
Total	\$3,676	100	% \$3,375	100	% \$301	9 %

The increase in SG&A expense in both segments was primarily the result of an increase in bonus and commission expense owing to the more favorable revenue, gross profit and overall operating results for the three months ended December 31, 2011 versus the comparable period in the prior year.

Other Income/Expenses

The following table details our other income/expenses for the three months ended December 31, 2011 and 2010:

	For the Three Months Ended		
	December 31, 2011	December 31, 2010	Increase (Decrease)
	(Amounts in thousands)		
Interest expense	\$(21)	\$(22)	\$1
Interest income	5	7	(2)
Foreign exchange gain (loss)	(15)	(4)	(11)

Other income (expense), net	(3)	(2)	(1)
Total other expense, net	\$(34)	\$(21)	\$(13)

Other income (expense), net, for the three month periods ended December 31, 2011 and 2010 was not significant nor was the change from the prior year three month period to that of the current year.

Income Taxes

Income Tax Provision

The Company recorded income tax expense of approximately \$0.3 million for the quarter ended December 31, 2011 reflecting an effective income tax rate of 37% compared to income tax expense of approximately \$0.2 million for the quarter ended December 31, 2010, which also reflected an effective income tax rate of 37%.

In assessing the realizability of deferred tax assets, we considered our taxable future earnings and the expected timing of the reversal of temporary differences. Accordingly, we have recorded a valuation allowance which reduces the gross deferred tax asset to an amount that we believe will more likely than not be realized. Our inability to project future profitability beyond fiscal year 2011 in the U.S. and cumulative losses incurred in recent years in the United Kingdom represent sufficient negative evidence to record a valuation allowance against certain deferred tax assets. We maintained a substantial valuation allowance against our United Kingdom deferred tax assets as we have experienced cumulative losses and do not have any indication that the operation will be profitable in the future to an extent that will allow us to utilize much of our net operating loss carryforwards. To the extent that actual experience deviates from our assumptions, our projections would be affected and hence our assessment of realizability of our deferred tax assets may change.

Liquidity and Capital Resources

Our primary source of liquidity is our cash and cash equivalents, which decreased by approximately \$1.2 million to \$14.6 million as of December 31, 2011 from \$15.9 million as of September 30, 2011. At December 31, 2011, cash equivalents consisted of money market funds which totaled \$3.5 million.

Significant uses of cash for the three months ended December 31, 2011 included an increase in accounts receivable of approximately \$4.4 million and an increase in other assets of approximately \$0.8 million. The large increase in accounts receivable was due substantially to the high volume of sales to the largest customer of the German division of the Service & System Integration segment, which occurred in the final month of the quarter (Also, see above discussion under: Results of Operations, Sales). Offsetting these uses of cash, significant sources of cash were net income of approximately \$0.5 million, a decrease in inventories of approximately \$1.7 million, an increase in deferred revenue of approximately \$1.0 million and an increase accounts payable and accrued expenses of approximately \$0.7 million.

As of December 31, 2011 and September 30, 2011, cash held by our foreign subsidiaries located in Germany and the United Kingdom totaled approximately \$4.5 million and \$5.6 million, respectively. This cash is included in our total cash and cash equivalents reported above. We consider this cash to be permanently reinvested into these foreign locations because repatriating it would result in unfavorable tax consequences. Consequently, it is not available for activities that would require it to be repatriated to the U.S.

If cash generated from operations is insufficient to satisfy working capital requirements, we may need to access funds through bank loans or other means. There is no assurance that we will be able to raise any such capital on terms acceptable to us, on a timely basis or at all. If we are unable to secure additional financing, we may not be able to complete development or enhancement of products, take advantage of future opportunities, respond to competition or continue to effectively operate our business.

Based on our current plans and business conditions, management believes that the Company's available cash and cash equivalents, the cash generated from operations and availability on our lines of credit will be sufficient to provide for the Company's working capital and capital expenditure requirements for the foreseeable future.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2011. Our chief executive officer, our chief financial officer, and other members of our senior management team supervised and participated in this evaluation. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company’s management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of December 31, 2011, the Company’s chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Controls over Financial Reporting

As we have previously reported, management assessed the effectiveness of the Company’s internal control over financial reporting as of September 30, 2011, and identified material weaknesses. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements will not be prevented or detected in a timely basis.

The material weaknesses were in connection with our determination that we did not sufficiently assess and apply certain aspects of ASC 605-45-45 Principal Agent Considerations, to the particular facts and circumstances of many of our revenue arrangements. We therefore determined that this failure to accurately assess an accounting principle amounted to a material weakness in our controls over financial reporting. As a result, we had concluded that the Company’s internal control over financial reporting was not effective as of September 30, 2011.

During the quarter ended December 31, 2011, in response to the identification of the material weakness referred to above, management assessed various alternatives to modify our existing internal control processes and systems to remediate this material weakness. Currently, we have devised a method whereby we are able to utilize data-mining techniques to identify the applicable transactions, and then apply the appropriate accounting treatment to them. We have incorporated this process into our existing internal control structure to insure that we apply the appropriate accounting for these transactions beginning with the quarter ended December 31, 2011.

PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Share Repurchase Plans. The following table provides information with respect to shares of our common stock that we repurchased during the three months ended December 31, 2011:
