COMMENTARY

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND

The Fund commenced operations on May 23, 2013. The Fund's primary investment objective is to seek a high level of current income. As a secondary objective, the Fund seeks capital appreciation. The Fund pursues its objectives by investing in preferred and other income-producing securities. The Fund seeks to maintain, under normal market conditions, a duration excluding the effects of leverage, of between three and eight years. There can be no assurance that the Fund's investment objectives will be achieved.

MARKET RECAP

After more than 4 years of positive results in the preferred and hybrid securities market, in May 2013, near the inception of the Fund, the global financial markets entered into a period of increased volatility.

In late May, statements from the Federal Open Markets Committee related to initiating the tapering of Quantitative Easing ("QE") caused Treasuries to sell off, and by the beginning of June, preferred and hybrid securities followed Treasuries lower. The market volatility continued as the sell-off that began throughout fixed-income markets in early May did not break until late September. Yields across fixed-income increased gradually as markets attempted to price in expectations for a "taper" or reduction in the pace of the Federal Reserve's monthly asset purchase program, heavily expected to begin in September. During this period, price declines were further compounded by significant redemptions in fixed-income fund products. The "no taper" decision at the September 18 Federal Reserve meeting surprised the markets, causing an abrupt rally of the 10-year Treasury and providing support to most of the fixed-income market over the final two weeks of the month. The preferred market underperformed most other fixed-income asset classes as it did not fully participate in the sharp rebound seen by other segments in the market during the final two weeks of September. As investors looked to reduce duration, the preferred market saw spreads over Treasuries rising, particularly for longer duration securities, compounding price declines. Volatility ensued once again through mid-October, this time in reaction to the extended U.S. government shutdown. Once the U.S. government was reopened on October 17, preferred securities stabilized through the fiscal year end of October 31, 2013, along with most other fixed-income securities, as investors took advantage of higher yields and wider spreads in the preferred and hybrid market.

PERFORMANCE SUMMARY

For the period beginning May 23, 2013 (inception date of Fund) and ending on the fiscal year-end of October 31, 2013, the Fund produced a total return on its Market Price (MP) of -14.13% and a total return on Net Asset Value (NAV) of 0.60%. This compares to the Fund's blended benchmark index total return of

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

-3.14%. The blended benchmark used for the Fund consists of equal 50% weightings in both the BofA Merrill Lynch Fixed Rate Preferred Securities Index (POP1) and the BofA Merrill Lynch U.S. Capital Securities Index (COCS).

As of October 31st, the Fund traded at a 10.63% discount to NAV. The underperformance of the MP relative to NAV and the blended benchmark was likely a result of selling pressure in fixed-income fund products over the past few months. The primary factors that contributed to the outperformance of the Fund's NAV relative to the blended benchmark were a higher weighting in institutional securities with a concentration in fixed-to-floating rate securities, shorter duration, timing of

Page 3

PORTFOLIO COMMENTARY (CONTINUED)

investments and security selection. With a concentration in preferreds and hybrids with a fixed-to-floating rate coupon structure, the overall portfolio duration was shortened considerably lower than the benchmark, as these securities tend to have shorter durations than fixed-rate securities. Given the timing of the inception of the Fund and subsequent invest-up period, the Fund was able to take advantage of declining prices in the market, selecting the best securities on a relative value basis and positioning the Fund to perform well in the rising rate environment. The Fund utilized close to 30% leverage once it got fully invested. Given the market weakness from May to August, the invest-up period for the Fund was extended, which aided performance as the Fund was buying securities and adding leverage at lower prices than at the time of its launch. The use of leverage had a positive effect to the Fund's NAV total return during the period.

MARKET AND FUND OUTLOOK

Stonebridge is cautiously optimistic about the performance of the preferred market for the remainder of 2013 and into early 2014. While volatility in the Treasury market is likely to continue to impact the preferred market, we continue to believe that preferred and hybrid securities are an attractive source of income relative to other asset classes, and that current pricing in the preferred market is supported by fundamental valuations, as witnessed by the wide spreads relative to Treasuries and other fixed-income alternatives.

From a macro perspective, the Fed appears to be on hold with tapering economic stimulus until the first quarter of 2014, at the earliest, while economic conditions improve more slowly than initially anticipated. Outside of the U.S., the global economy appears to be improving, but remains weak. As a result, we believe interest rates are likely to stabilize over the near term, with the long end of the treasury yield curve range-bound through year end and no rise in the front end of the curve for at least one year.

The spread to Treasuries remains wide to historical averages and preferred securities continue to offer investors relatively high income on a current-yield basis. As of October 31, 2013, the current yield on \$25 par preferred securities, based on POP1, was 6.67%, resulting in a spread of 417 basis points over the 10-year Treasury, 71 basis points wider than the 15-year historical average of 346 basis points. The current yield on \$1000 par preferred securities, based on COCS, was 6.07%, resulting in a spread of 357 basis points over the 10-year Treasury, 21 basis points wider than the 15-year historical average of 336 basis points. (Source: Bank of America Merrill Lynch Research, Stonebridge Advisors LLC). Historically wide spreads coupled with improved

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

profitability and credit fundamentals in the major sectors represented in the preferred securities universe provide the potential for further spread tightening in preferred securities (a cushion against rising rates).

Stonebridge will continue to actively manage the Fund to seek to protect against the downside risks in the market while aiming to outperform in all market environments. We intend to maintain a shorter duration in the Fund than the index to seek to protect investors in a rising interest rate environment. As of October 31, 2013, the effective duration of the portfolio was less than 5.5 years, while the blended benchmark had an effective duration upward of 7 years. The goal over the next few months is to continue the strategy of optimizing the Fund's investment portfolio to generate high current income while reducing interest rate sensitivity and credit risk. We currently see the best value, in terms of structure, in certain fixed-to-floating rate securities, high coupon/low duration securities and regulatory call candidates. Fixed-to-floating rate securities currently provide attractive income for investors while providing protection against rising interest rates in the future. Regulatory-call candidates are those that will lose tier-1 qualifying credit due to regulatory changes and, thus, will likely be redeemed or tendered in the short- to intermediate-term, providing support for securities that are attractively priced to a potential early call. Stonebridge continues to believe that interest rate risk in the preferred and hybrid market is manageable through security selection and that, particularly in the current market environment, active management is paramount with respect to security selection, assessing relative value and managing interest rate risk.

The primary investment objective is to seek a high level of current income. The Fund has a secondary objective of capital appreciation. The Fund seeks to achieve its objectives by investing, under normal market conditions, at least 80% of its managed assets in preferred securities and other income producing securities issued by U.S. and non-U.S. companies, including traditional preferred securities, hybrid preferred securities that have investment and economic characteristics of both preferred securities and debt securities, floating rate and fixed-to-floating rate preferred securities, debt securities, convertible securities and contingent convertible securities. There can be no assurance that the Fund will achieve its investment objectives. The Fund seeks to maintain, under normal market conditions, a duration of between three and eight years. The Fund may not be appropriate for all investors.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of the financial statements. The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

A. PORTFOLIO VALUATION:

The Fund's NAV is determined daily as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. If the NYSE closes early on a valuation day, the NAV is determined as of that time. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

for those securities. The NAV is calculated by dividing the value of all assets of the Fund (including accrued interest and dividends), less all liabilities (including accrued expenses and dividends declared but unpaid, and any borrowings of the Fund), by the total number of shares outstanding.

The Fund's investments are valued daily at market value, or in the absence of market value with respect to any portfolio securities, at fair value in accordance with valuation procedures adopted by the Fund's Board of Trustees, and in accordance with provisions of the 1940 Act. Market quotations and prices used to value the Fund's investments are primarily obtained from third party pricing services. The Fund's securities will be valued as follows:

Preferred stocks and other equity securities listed on any national or foreign exchange (excluding the NASDAQ(R) National Market LLC ("NASDAQ") and the London Stock Exchange Alternative Investment Market ("AIM")), are valued at the last sale price on the exchange on which they are principally traded or, for NASDAQ and AIM securities, the official closing price. Securities traded on one or more than one securities exchange are valued at the last sales price or official closing price, as applicable, at the close of the securities exchange representing the principal market for such securities.

Corporate bonds, notes and other debt securities are valued on the basis of valuations provided by dealers who make markets in such securities or by an independent pricing service approved by the Fund's Board of Trustees, which may use the following valuation inputs when available:

- 1) benchmark yields;
- 2) reported trades;
- 3) broker/dealer quotes;
- 4) issuer spreads;
- 5) benchmark securities;
- 6) bids and offers; and
- 7) reference data including market research publications.

Securities traded in an over-the-counter market are valued at the midpoint between the bid and the asked price, if available, and otherwise at their closing bid price.

Debt securities having a maturity of sixty days or less when purchased are valued at cost adjusted for amortization of premiums and accretion of discounts.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Board of Trustees or its delegate at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market

price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's NAV or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's "fair value." As a general principle, the current "fair value" of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. The use of fair value prices by the Fund generally results in prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities, including, but not limited to, the following:

- 1) the type of security;
- 2) the size of the holding;
- 3) the initial cost of the security;
- 4) transactions in comparable securities;
- 5) price quotes from dealers and/or pricing services;
- 6) relationships among various securities;
- 7) information obtained by contacting the issuer, analysts, or the appropriate stock exchange;
- 8) an analysis of the issuer's financial statements; and
- 9) the existence of merger proposals or tender offers that might affect the value of the security.

If the securities in question are foreign securities, the following additional information may be considered:

- 1) the value of similar foreign securities traded on other foreign markets;
- 2) ADR trading of similar securities;
- 3) closed-end fund trading of similar securities;
- 4) foreign currency exchange activity;
- 5) the trading prices of financial products that are tied to baskets of foreign securities;
- 6) factors relating to the event that precipitated the pricing problem;
- 7) whether the event is likely to recur; and
- 8) whether the effects of the event are isolated or whether they affect entire markets, countries or regions.

The Fund is subject to fair value accounting standards that define fair value,

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

establish the framework for measuring fair value and provide a three-level hierarchy for fair valuation based upon the inputs to the valuation as of the measurement date. The three levels of the fair value hierarchy are as follows:

- o Level 1 - Level 1 inputs are quoted prices in active markets for identical investments. An active market is a market in which transactions for the investment occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- o Level 2 - Level 2 inputs are observable inputs, either directly or indirectly, and include the following:
 - o Quoted prices for similar investments in active markets.
 - o Quoted prices for identical or similar investments in markets that are non-active. A non-active market is a market where there are few transactions for the investment, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
 - o Inputs other than quoted prices that are observable for the investment (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates).
 - o Inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- o Level 3 - Level 3 inputs are unobservable inputs. Unobservable inputs may reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the investment.

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments. A summary of the inputs used to value the Fund's investments as of October 31, 2013, is included with the Fund's Portfolio of Investments.

B. SECURITIES TRANSACTIONS AND INVESTMENT INCOME

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis. Dividend income is recorded on the ex-dividend date. Interest income, if any, is recorded on the accrual basis, including the amortization of premiums and accretion of discounts.

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)
OCTOBER 31, 2013

The Fund may hold the securities of real estate investments trusts ("REITs"). Distributions from such investments may include income, capital gains and return

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

of capital. The actual character of amounts received during the year is not known until after the REITs' fiscal year end. The Fund records the character of distributions received from the REITs during the year based on estimates available. The characterization of distributions received by the Fund may be subsequently revised based on information received from the REITs after their tax reporting periods conclude.

C. DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS

Dividends from net investment income, if any, are declared and paid monthly, or as the Board of Trustees may determine from time to time. Distributions of net realized capital gains earned by the Fund, if any, will be distributed at least annually.

Distributions from income and capital gains are determined in accordance with income tax regulations, which may differ from U.S. GAAP. Certain capital accounts in the financial statements are periodically adjusted for permanent differences in order to reflect their tax character. These permanent differences are primarily due to the varying treatment of income and gain/loss on portfolio securities held by the Fund and has no impact on net assets or NAV per share. Temporary differences, which arise from recognizing certain items of income, expense and gain/loss in different periods for financial statement and tax purposes, will reverse at some time in the future. Permanent differences incurred during the period ended October 31, 2013, resulting in book and tax accounting differences, have been reclassified at year end to reflect an increase in accumulated net investment income (loss) of \$908,319, and a decrease in accumulated net realized gain (loss) on investments of \$908,319. Net assets were not affected by these reclassifications.

The tax character of distributions paid during the fiscal period ended October 31, 2013 was as follows:

Distributions paid from:

Ordinary income.....	\$	27,772,166
Capital gain.....	--	
Return of capital.....	--	

As of October 31, 2013, the distributable earnings and net assets on a tax basis were as follows:

Undistributed ordinary income.....	\$	15,265,178
Undistributed capital gains.....	--	

Total undistributed earnings.....		15,265,178
Accumulated capital and other losses.....		(7,133,856)
Net unrealized appreciation (depreciation).....		(28,575,402)

Total accumulated earnings (losses).....		(20,444,080)
Other.....	--	
Paid in Capital.....		1,447,608,512

Net Assets.....	\$	\$1,427,164,432
	=====	

D. INCOME TAXES

The Fund intends to qualify as a regulated investment company by complying with the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, which includes distributing substantially all of its net investment income and net realized gains to shareholders. Accordingly, no provision has

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

been made for federal or state income taxes. However, due to the timing and amount of distributions, the Fund may be subject to an excise tax of 4% of the amount by which approximately 98% of the Fund's taxable income exceeds the distributions from such taxable income for the calendar year.

The Fund intends to utilize provisions of the federal income tax laws, which allow it to carry a realized capital loss forward indefinitely following the year of the loss and offset such loss against any future realized capital gains. The Fund is subject to certain limitations under U.S. tax rules on the use of capital loss carryforwards and net unrealized built-in losses. These limitations apply when there has been a 50% change in ownership. At October 31, 2013, the Fund had capital loss carryforwards of \$7,133,856 for federal income tax purposes.

The Fund is subject to accounting standards that establish a minimum threshold for recognizing, and a system for measuring, the benefits of a tax position taken or expected to be taken in a tax return. As of October 31, 2013, management has evaluated the application of these standards to the Fund, and has determined that no provision for income tax is required in the Fund's financial statements for uncertain tax positions. Tax year ended 2013 remains open for audit.

E. EXPENSES

The Fund will pay all expenses directly related to its operations.

F. ORGANIZATION AND OFFERING COSTS

Organization costs consisted of costs incurred to establish the Fund and enable it to legally conduct business. These costs included filing fees, listing fees, legal services pertaining to the organization of the business and audit fees relating to the initial registration and auditing the initial statement of assets and liabilities, among other fees. Offering costs consisted of legal fees pertaining to the Fund's shares offered for sale, registration fees, underwriting fees, and printing of the initial prospectus, among other fees. First Trust paid all organization expenses. The Fund's Common Share offering costs of \$1,704,000 were recorded as a reduction of the proceeds from sales from the sale of Common Shares during the period ended October 31, 2013.

G. ACCOUNTING PRONOUNCEMENT

In December 2011, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update No. 2011-11: "Disclosures about Offsetting Assets and Liabilities" ("ASU 2011-11"). This disclosure requirement is intended to help investors and other financial statement users better assess the effect or potential effect of offsetting arrangements on a fund's financial position. ASU 2011-11 requires entities to disclose both gross and net information about both instruments and transactions eligible for offset on the Statements of Assets and Liabilities, and disclose instruments and transactions subject to master netting or similar agreements. In addition, in January 2013, FASB issued Accounting

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

Standards Update No. 2013-1 "Clarifying the Scope of Offsetting Assets and Liabilities" ("ASU 2013-1"), specifying which transactions are subject to offsetting disclosures. The scope of the disclosure requirements is limited to derivative instruments, repurchase agreements, and reverse repurchase agreements, and securities borrowing and securities lending transactions. ASU 2011-11 and ASU 2013-1 are effective for financial statements with fiscal years beginning on or after January 1, 2013, and interim periods within those fiscal years. There was no material impact on the current financial statements as a result of these new standards.

3. INVESTMENT ADVISORY FEE, AFFILIATED TRANSACTIONS AND OTHER FEE ARRANGEMENTS

First Trust, the investment advisor to the Fund, is a limited partnership with one limited partner, Grace Partners of DuPage L.P., and one general partner, The Charger Corporation. The Charger Corporation is an Illinois corporation controlled by James A. Bowen, Chief Executive Officer of First Trust. First Trust is responsible for the selection and ongoing monitoring of the securities in the Fund's portfolio, managing the Fund's business affairs and providing certain administrative services necessary for the management of the Fund. For these services, First Trust is entitled to a monthly fee calculated at an annual rate of 0.85% of the Fund's average daily net assets. First Trust also provides fund reporting services to the Fund for a flat annual fee in the amount of \$9,250.

Stonebridge Advisors LLC ("Stonebridge" or the "Sub-Advisor"), a majority-owned affiliate of First Trust, serves as the Fund's sub-advisor and manages the Fund's portfolio subject to First Trust's supervision. The Sub-Advisor receives a monthly portfolio management fee calculated at an annual rate of 0.425% of average daily net assets that is paid by First Trust out of its investment advisory fee.

Brown Brothers Harriman & Co. ("BBH") serves as the Fund's administrator, fund accountant and custodian in accordance with certain fee arrangements. As administrator and fund accountant, BBH is responsible for providing certain administrative and accounting services to the Fund, including maintaining the Fund's books of account, records of the Fund's securities transactions, and certain other books and records. As custodian, BBH is responsible for custody of the Fund's assets.

Computershare serves as the Fund's transfer agent in accordance with certain fee arrangements. As transfer agent, Computershare is responsible for maintaining shareholder records for the Fund.

Each Trustee who is not an officer or employee of First Trust, any sub-advisor or any of their affiliates ("Independent Trustees") is paid a fixed annual retainer of \$125,000 per year and an annual per fund fee of \$4,000 for each closed-end fund or other actively managed fund and \$1,000 for each index fund in the First Trust Fund Complex. The fixed annual retainer is allocated pro rata among each fund in the First Trust Fund Complex based on net assets.

Additionally, the Lead Independent Trustee is paid \$15,000 annually, the Chairman of the Audit Committee is paid \$10,000 annually, and each of the Chairmen of the Nominating and Governance Committee and the Valuation Committee is paid \$5,000 annually to serve in such capacities, with such compensation allocated pro rata among each fund in the First Trust Fund Complex based on net assets. Trustees are reimbursed for travel and out-of-pocket expenses in connection with all meetings. The Lead Independent Trustee and each Committee Chairman will serve two-year terms until December 31, 2013, before rotating to serve as Chairman of another Committee or as Lead Independent Trustee. After December 31, 2013, the Lead Independent Trustee and Committee Chairmen will rotate every three years. The officers and the "Interested" Trustee receive no compensation from the Fund for acting in such capacities.

4. PURCHASES AND SALES OF SECURITIES

The borrowing rate under the facility is equal to the 1-month LIBOR plus 70 basis points. In addition, under the facility, the Fund pays a commitment fee of 0.25% on the undrawn amount of such facility on any day that the loan balance is less than 20% of the total commitment amount. Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

PREFERRED & INCOME FUND:

We have audited the accompanying statement of assets and liabilities of First Trust Intermediate Duration Preferred & Income Fund (the "Fund"), including the portfolio of investments, as of October 31, 2013, and the related statements of operations, cash flows, and changes in net assets, and the financial highlights for the period presented. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of October 31, 2013 by correspondence with the Fund's custodian and brokers; where replies were not received, we performed other auditing procedures. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the First Trust Intermediate Duration Preferred & Income Fund as of October 31, 2013, and the results of its operations, its cash flows, changes in its net assets, and the financial highlights for the period presented, in conformity with accounting principles generally accepted in the United States of America.

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)
OCTOBER 31, 2013 (UNAUDITED)

DIVIDEND REINVESTMENT PLAN

If your Common Shares are registered directly with the Fund or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the "Plan"), unless you elect, by written notice to the Fund, to receive cash distributions, all dividends, including any capital gain distributions, on your Common Shares will be automatically reinvested by

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

Computershare Trust Company, N.A. (the "Plan Agent"), in additional Common Shares under the Plan. If you elect to receive cash distributions, you will receive all distributions in cash paid by check mailed directly to you by Computershare Inc., as the dividend paying agent.

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If Common Shares are trading at or above net asset value ("NAV") at the time of valuation, the Fund will issue new shares at a price equal to the greater of (i) NAV per Common Share on that date or (ii) 95% of the market price on that date.
- (2) If Common Shares are trading below NAV at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the NYSE or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the valuation date except where temporary curtailment or suspension of purchases is necessary to comply with federal securities laws. Interest will not be paid on any uninvested cash payments.

You may elect to opt-out of or withdraw from the Plan at any time by giving written notice to the Plan Agent, or by telephone at (866) 340-1104, in accordance with such reasonable requirements as the Plan Agent and the Fund may agree upon. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan, and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions.

The Plan Agent maintains all Common Shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Common Shares in your account will be held by the Plan Agent in non-certificated form. The Plan Agent will forward to each participant any proxy solicitation material and will vote any shares so held only in accordance with proxies returned to the Fund. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions. Capital gains and income are realized although cash is not received by you. Consult your financial advisor for more information.

If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above.

The Fund reserves the right to amend or terminate the Plan if in the judgment of

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained by writing Computershare Inc., P.O. Box 30170, College Station, TX 77842-3170.

BOARD CONSIDERATIONS REGARDING APPROVAL OF INVESTMENT MANAGEMENT AND SUB-ADVISORY AGREEMENTS

The Board of Trustees of First Trust Intermediate Duration & Preferred Income

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

Fund (the "Fund"), including the Independent Trustees, unanimously approved the Investment Management Agreement (the "Advisory Agreement") between the Fund and First Trust Advisors L.P. (the "Advisor") and the Investment Sub-Advisory Agreement (the "Sub-Advisory Agreement" and together with the Advisory Agreement, the "Agreements") among the Fund, the Advisor and Stonebridge Advisors LLC (the "Sub-Advisor"), at a meeting held on March 10-11, 2013. The Board of Trustees determined that the Agreements are in the best interests of the Fund in light of the extent and quality of the services expected to be provided and such other matters as the Board considered to be relevant in the exercise of its reasonable business judgment.

To reach this determination, the Board considered its duties under the Investment Company Act of 1940, as amended (the "1940 Act"), as well as under the general principles of state law in reviewing and approving advisory contracts; the requirements of the 1940 Act in such matters; the fiduciary duty of investment advisors with respect to advisory agreements and compensation; the standards used by courts in determining whether investment company boards have fulfilled their duties; and the factors to be considered by the Board in voting on such agreements. To assist the Board in its evaluation of the Agreements, the Independent Trustees received a separate report from each of the Advisor and the Sub-Advisor in advance of the Board meeting that, among other things, outlined the services to be provided by the Advisor and the Sub-Advisor (including the relevant personnel responsible for these services and their experience); the proposed advisory fee and sub-advisory fee for the Fund as compared to fees charged by investment advisors and sub-advisors to comparable funds and as compared to fees charged to other clients of the Advisor and the Sub-Advisor; estimated expenses of the Fund as compared to expense ratios of comparable funds; the nature of expenses to be incurred in providing services to the Fund and the potential for economies of scale, if any; financial data on the Advisor and the Sub-Advisor; any fall-out benefits to the Advisor and the Sub-Advisor; and information on the Advisor's and the Sub-Advisor's compliance programs. The Independent Trustees also met separately with their independent legal counsel to discuss the information provided by the Advisor and the Sub-Advisor. The Board applied its business judgment to determine whether the arrangements between the Fund and the Advisor and among the Fund, the Advisor and the Sub-Advisor are reasonable business arrangements from the Fund's perspective as well as from the perspective of shareholders.

In reviewing the Agreements, the Board considered the nature, extent and quality of services to be provided by the Advisor and the Sub-Advisor under the Agreements, and noted that employees of the Advisor provide management services to other investment companies in the First Trust fund complex with diligence and care. With respect to the Advisory Agreement, the Board considered that the Advisor will be responsible for the overall management and administration of the Fund and reviewed the services to be provided by the Advisor to the Fund, including the oversight of the Sub-Advisor. The Board noted the compliance program that had been developed by the Advisor and considered that it includes a robust program for monitoring the Sub-Advisor's compliance with the 1940 Act and the Fund's investment objectives and policies. The Board noted the efforts expended by the Advisor in organizing the Fund and making arrangements for entities to provide services to the Fund. With respect to the Sub-Advisory Agreement, the Board noted the background and experience of the Sub-Advisor's portfolio management team and the Sub-Advisor's investment style. The Board considered its familiarity with the Sub-Advisor, which sub-advises the First Trust Preferred Securities and Income Fund (the "Open-End Fund"), an open-end fund, and the First Trust Preferred Securities and Income ETF (the "ETF"), an actively managed exchange-traded fund, for both of which the Advisor serves as investment manager. At the meeting, the Trustees received a presentation from one of the portfolio managers, and were able to ask

ADDITIONAL INFORMATION (CONTINUED)

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)
OCTOBER 31, 2013 (UNAUDITED)

questions about the Sub-Advisor's proposed investment strategies for the Fund. In light of the information presented and the considerations made, the Board concluded that the nature, extent and quality of services to be provided to the Fund by the Advisor and the Sub-Advisor under the Agreements are expected to be satisfactory.

The Board considered the advisory and sub-advisory fees to be paid under the Agreements. The Board reviewed data prepared by Lipper Inc. ("Lipper"), an independent source, showing the proposed advisory fee and the estimated expense ratio assuming an asset level for the Fund as compared to the advisory fees and expense ratios of a peer group of other leveraged closed-end funds selected by Lipper. The Board noted that the Fund's proposed contractual advisory fee was higher than the median of the Lipper peer group. The Board also reviewed data prepared by the Advisor showing the Fund's proposed advisory fee as compared to an additional group of peer funds provided by the Advisor. The Board considered the proposed sub-advisory fee rate and how it would relate to the overall management fee structure of the Fund, noting that the fees to be paid to the Sub-Advisor would be paid by the Advisor from its advisory fee. The Board considered the Advisor's statement that it does not provide investment advisory services to other clients that have similar investment objectives and policies as the Fund, except for the Open-End Fund and the ETF. The Board noted that the Open-End Fund pays a slightly lower advisory fee and the ETF pays a unitary fee. The Board also considered information provided by the Sub-Advisor as to the fees it charges to other similar clients, noting that the Sub-Advisor's sub-advisory fee for the Fund was equal to or slightly higher than the fees the Sub-Advisor charges to other similar clients, including the Open-End Fund and the ETF. Since the Fund is newly organized, the Board could not consider investment performance of the Fund. The Board did review performance information for the Sub-Advisor's Standard Taxable Preferreds Composite, which the Sub-Advisor stated was managed similarly to the proposed strategy for the Fund. On the basis of all the information provided on the fees and estimated expenses of the Fund, the Board concluded that the advisory and sub-advisory fees were reasonable and appropriate in light of the nature, extent and quality of services expected to be provided by the Advisor and the Sub-Advisor under the Agreements.

The Board considered the Advisor's representation that the proposed advisory fee was not structured to pass the benefits of any economies of scale on to shareholders. The Board noted that the Advisor has continued to invest in personnel and infrastructure for the First Trust fund complex and indicated that, because the Fund is a closed-end fund, the Advisor believed that any discussion of economies of scale was not material to a discussion of the advisory fee structure. The Board took the costs to be borne by the Advisor in connection with its services to be performed under the Advisory Agreement into consideration and noted that the Advisor was unable to estimate the profitability of the Advisory Agreement to the Advisor. The Board noted that the Sub-Advisor commented on its estimated profitability under the Sub-Advisory Agreement in its written response to the Board and noted the Sub-Advisor's statement that because it will need to borrow to cover its portion of the structuring fee payable to the Fund's underwriters, the Sub-Advisor did not expect to earn a profit under the Sub-Advisory Agreement for up to two years. The Board noted that the Sub-Advisor is an affiliate of the Advisor and that it was expected that the Advisor would finance the Sub-Advisor's payment of its

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

portion of the underwriters' structuring fee. The Board considered fall-out benefits described by the Advisor that may be realized from its relationship with the Fund, including the Advisor's compensation for fund reporting services to be provided pursuant to a separate Fund Reporting Services Agreement. The Board considered the fall-out benefits described by the Sub-Advisor that may be realized from its relationship with the Fund. The Board noted that neither the Advisor nor the Sub-Advisor maintained any soft-dollar arrangements.

Based on all of the information considered and the conclusions reached, the Board, including the Independent Trustees, unanimously determined that the terms of the Agreements are fair and reasonable and that the approval of the Agreements is in the best interests of the Fund. No single factor was determinative in the Board's analysis.

RISK CONSIDERATIONS

Risks are inherent in all investing. The following summarizes some, but not all, of the risks that should be considered for the Fund. For additional information about the risks associated with investing in the Fund, please see the Fund's prospectus and statement of additional information, as well as other Fund regulatory filings.

INVESTMENT AND MARKET RISK: An investment in the Fund's common shares ("Common Shares") is subject to investment risk, including the possible loss of the entire principal invested. Common Shares at any point in time may be worth less than the original investment, even after taking into account the reinvestment of Fund dividends and distributions. The Fund utilizes leverage, which magnifies investment risk.

PREFERRED/HYBRID PREFERRED AND DEBT SECURITIES RISK: Preferred/hybrid preferred and debt securities in which the Fund invests are subject to various risks, including credit risk, interest rate risk, call/prepayment risk and reinvestment risk, as described below. In addition, preferred and hybrid preferred securities are subject to certain other risks, including deferral and omission risk, subordination risk, limited voting rights risk and special redemption rights risk.

CREDIT AND BELOW INVESTMENT GRADE SECURITIES RISK: The Fund is subject to credit risk, which is the risk that an issuer of a security may be unable or unwilling to make dividend, interest and principal payments when due and the related risk that the value of a security may decline because of concerns about the issuer's ability or willingness to make such payments. Credit risk may be heightened for the Fund because it invests in below investment grade securities, which involve greater risks than investment grade securities, including the possibility of dividend or interest deferral, default or bankruptcy.

OCTOBER 31, 2013 (UNAUDITED)

LEVERAGE RISK: The use of leverage by the Fund can magnify the effect of any losses. If the income and gains from the securities and investments purchased with leverage proceeds do not cover the cost of leverage, the return to the Common Shares will be less than if leverage had not been used. Moreover,

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

leverage involves risks and special considerations for holders of Common Shares including the likelihood of greater volatility of net asset value and market price of the Common Shares than a comparable portfolio without leverage, and the risk that fluctuations in interest rates on reverse repurchase agreements, borrowings and short-term debt or in the dividend rates on any preferred shares of the Fund that the Fund may pay will reduce the return to the holders of Common Shares or will result in fluctuations in the dividends paid on the Common Shares. There is no assurance that a leveraging strategy will be successful. Although the Fund seeks to maintain a duration, excluding the effects of leverage, of between three and eight years, if the effect of the Fund's use of leverage was included in calculating duration, it could result in a longer duration for the Fund.

CALL/PREPAYMENT AND REINVESTMENT RISK: If an issuer of a security exercises an option to redeem its issue at par or prepay principal earlier than scheduled, the Fund may be forced to reinvest in lower yielding securities. A decline in income could affect the Common Shares' market price or the overall return of the Fund.

DURATION RISK: The Fund seeks to maintain, under normal market conditions, a duration, excluding the effects of leverage, of between three and eight years. Various techniques may be used to shorten or lengthen the Fund's duration. Securities with longer durations tend to be more sensitive to interest rate (or yield) changes than securities with shorter durations. The duration of a security will be expected to change over time with changes in market factors and time to maturity.

RISKS OF CONCENTRATION IN THE FINANCIALS SECTOR: Because the Fund invests 25% or more of its managed assets in the financials sector, it will be more susceptible to adverse economic or regulatory occurrences affecting this sector, such as changes in interest rates, loan concentration and competition.

INTEREST RATE RISK: The Fund is subject to interest rate risk, which is the risk that the preferred and debt securities in which the Fund invests will decline in value because of rising market interest rates.

FLOATING RATE AND FIXED-TO-FLOATING RATE SECURITIES RISK: The market value of floating rate and fixed-to-floating rate securities may fall in a declining interest rate environment and may also fall in a rising interest rate environment if there is a lag between the rise in interest rates and the interest rate reset. A secondary risk associated with declining interest rates is the risk that income earned by the Fund on floating rate and fixed-to-floating rate securities may decline due to lower coupon payments on floating-rate securities.

CONVERTIBLE SECURITIES/CONTINGENT CONVERTIBLE SECURITIES RISK: The market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. Contingent convertible securities provide for mandatory conversion into common stock of the issuer under certain circumstances. Since the common stock of the issuer may not pay a dividend, investors in these instruments could experience a reduced income rate, potentially to zero; and conversion would deepen the subordination of the investor, hence worsening standing in a bankruptcy. In addition, some such instruments have a set stock conversion rate that would cause a reduction in value of the security if the price of the stock is below the conversion price on the conversion date.

FOREIGN (NON-U.S.) SECURITIES RISK: Investing in securities of non-U.S. issuers may involve certain risks not typically associated with investing in securities of U.S. issuers. These risks include: (i) there may be less publicly available

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSR

information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) non-U.S. markets may be smaller, less liquid and more volatile than the U.S. market; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) certain non-U.S. countries may impose restrictions on the ability of non U.S. issuers to make payments of principal and interest to investors located in the United States due to blockage of non-U.S. currency exchanges or otherwise; and (vii) withholding and other non-U.S. taxes may decrease the Fund's return.

ILLIQUID AND RESTRICTED SECURITIES RISK: Investment of the Fund's assets in illiquid and restricted securities may restrict the Fund's ability to take advantage of market opportunities. Illiquid and restricted securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid and restricted securities generally is more volatile than that of more liquid securities, which may adversely affect the price that the Fund pays for or recovers upon the sale of such securities. Illiquid and restricted securities are also more difficult to value, especially in challenging markets. The risks associated with illiquid and restricted securities may be particularly acute in situations in which the Fund's operations require cash and could result in the Fund borrowing to meet its short-term needs or incurring losses on the sale of illiquid or restricted securities.

PORTFOLIO MANAGER POTENTIAL CONFLICTS OF INTERESTS

Potential conflicts of interest may arise when a fund's portfolio manager has day-to-day management responsibilities with respect to one or more other funds or other accounts, as is the case for the portfolio managers of the Fund. These potential conflicts may include:
