- .. Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01 Regulation FD Disclosure.

Heat Biologics, Inc. (the Company), today issued a press release announcing data generated using its next-generation *ComPACT* immunotherapy platform, which combines a pan-antigen T cell priming vaccine and T cell co-stimulator in a single product. The data were presented in a poster entitled *Locally secreted Fc-OX40L is superior to systemic, antibody mediated, OX40 co-stimulation for combination therapy* at the Cell Symposia, *Cancer, Inflammation and Immunity* in Sitges, Spain. The Company's press release is attached as Exhibit 99.1 to this Current Report on Form 8-K.

In addition, the Company will be hosting an investor call today. In connection therewith, the Company's management intends to discuss the slide presentation furnished as Exhibit 99.2 hereto.

The slide presentation and press release attached as Exhibits 99.1 and 99.2 to this Current Report on Form 8-K include safe harbor language pursuant to the Private Securities Litigation Reform Act of 1995, as amended, indicating that certain statements contained in the slide presentation or in the press release are forward-looking rather than historical.

The information included in this Item 7.01 and in Exhibits 99.1 and 99.2 shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the Exchange Act), or otherwise subject to the liabilities of that Section or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

Item 8.01 Other Events.

The Company today presented data generated using its next-generation *ComPACT* immunotherapy platform, which combines a pan-antigen T cell priming vaccine and T cell co-stimulator in a single product. The data were presented in a poster entitled *Locally secreted Fc-OX40L is superior to systemic, antibody mediated, OX40 co-stimulation for combination therapy* at the Cell Symposia, *Cancer, Inflammation and Immunity* in Sitges, Spain. The *ComPACT* technology (patent pending) has been engineered to incorporate various fusion proteins targeting co-stimulatory receptors (OX40, ICOS, 4-1BB, and other undisclosed targets), enabling the combination of two important immunotherapy pathways in a single therapy. The data illustrate that systemic OX40 stimulation via antibody therapy led to increased off-target T cell activation, and that the beneficial response with *ComPACT* may be due to increased specificity.

The Company's poster that was presented at the symposium is filed as Exhibit 99.3 to this Current Report on Form 8-K.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following exhibits are being filed as part of this Report.

Exhibit Number	Description
<u>99.1</u>	Press Release of Heat Biologics, Inc. dated June 15, 2015
<u>99.2</u>	Presentation materials to be presented at the investor conference call
<u>99.3</u>	Poster entitled Locally secreted Fc-OX40L is superior to systemic, antibody mediated, OX40 co-stimulation for combination therapy at the Cell Symposia, Cancer, Inflammation and Immunity in Sitges, Spain

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Dated: June 15, 2015 HEAT BIOLOGICS, INC.
