

RADIANT LOGISTICS, INC
Form 10-Q
May 16, 2016

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2016

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File Number 001-35392

RADIANT LOGISTICS, INC.

(Exact name of Registrant as Specified in Its Charter)

Delaware 04-3625550
(State or Other Jurisdiction of (IRS Employer
Incorporation or Organization) Identification No.)

405 114th Ave S.E., Bellevue, WA 98004
(Address of principal executive offices)

(425) 943-4599
(Registrant's telephone number, including area code)

N/A
(Former name, former address, and former fiscal year,
if changed since last report)

Edgar Filing: RADIANT LOGISTICS, INC - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

There were 48,775,971 shares issued and outstanding of the registrant's common stock, par value \$.001 per share, as of May 12, 2016.

RADIANT LOGISTICS, INC.

Condensed Consolidated Statements of Cash Flows (continued)

(unaudited)

Supplemental disclosure of non-cash investing and financing activities:

In November 2014, the Company issued 52,452 shares of common stock at a fair value of \$3.84 per share in satisfaction of \$201,162 of the On Time Express, Inc. earn-out payment for the year ended June 30, 2014, resulting in a decrease to the current portion of contingent consideration, an increase to common stock of \$52 and an increase to additional paid-in capital of \$201,110.

In December 2014, the Company issued 43,221 shares of common stock at a fair value of \$3.90 per share in satisfaction of \$168,750 of the Don Cameron & Associates, Inc. purchase price, resulting in an increase to common stock of \$43 and an increase to additional paid-in capital of \$168,707.

In December 2015, the Company issued 7,385 shares of common stock at a fair value of \$4.23 per share in satisfaction of \$31,250 of the Copper Logistics, Incorporated purchase price, resulting in an increase to common stock of \$7 and an increase to additional paid-in capital of \$31,243.

The accompanying notes form an integral part of these condensed consolidated financial statements.

RADIANT LOGISTICS, INC.

Notes to the Condensed Consolidated Financial Statements

(unaudited)

NOTE 1 – THE COMPANY AND BASIS OF PRESENTATION

The Company

Radiant Logistics, Inc. (the “Company”) operates as a third party logistics company, providing multi-modal transportation and logistics services primarily in the United States and Canada. The Company services a large and diversified account base consisting of consumer goods, food and beverage, manufacturing and retail customers which it supports from an extensive network of approximately 150 operating locations across North America. The Company provides these services through a multi-brand network comprised of Company-owned offices and locations operated by its strategic operating partners, as well as an integrated international service partner network located in other key markets around the globe. As a third party logistics company, the Company has approximately 10,000 asset-based transportation companies, including motor carriers, railroads, airlines and ocean lines, in its carrier network. The Company believes shippers value its services because it is able to objectively arrange the most efficient and cost-effective means, type and provider of transportation service without undue influence caused by the ownership of transportation assets. In addition, the Company’s minimal investment in physical assets affords it the opportunity for a higher return on invested capital and net cash flows than the Company’s asset-based competitors.

Through its operating locations across North America, the Company offers domestic and international air and ocean freight forwarding services and freight brokerage services including truckload services, less than truckload services and intermodal services, which is the movement of freight in trailers or containers by combination of truck and rail. The Company’s primary business operations involve arranging the shipment, on behalf of its customers, of materials, products, equipment and other goods that are generally larger than shipments handled by integrated carriers of primarily small parcels, such as FedEx, DHL and UPS, including arranging and monitoring all aspects of material flow activity utilizing advanced information technology systems. The Company also provides other value-added logistics services, including customs brokerage, order fulfillment, inventory management and warehousing services to complement its core transportation service offering.

The Company expects to grow its business organically and by completing acquisitions of other companies with complementary geographic and logistics service offerings. The Company’s organic growth strategy will continue to focus on strengthening existing and expanding new customer relationships leveraging the benefit of the Company’s new truck brokerage and intermodal service offerings, while continuing its efforts on the organic build-out of the Company’s network of strategic operating partner locations. In addition, as the Company continues to grow and scale the business, the Company is creating density in its trade lanes which creates opportunities for the Company to more efficiently source and manage our transportation capacity.

In addition to its focus on organic growth, it will continue to search for acquisition candidates that bring critical mass from a geographic standpoint, purchasing power and/or complementary service offerings to the current platform. As the Company continues to grow and scale the business, it remains focused on leveraging its back-office infrastructure to drive productivity improvement across the organization.

Interim Disclosure

The condensed consolidated financial statements included herein have been prepared, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. The Company’s management believes that the disclosures are adequate to make the information presented not misleading. These condensed financial statements should be read in conjunction with the financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K for the year ended June 30, 2015.

The interim period information included in this Quarterly Report on Form 10-Q reflects all adjustments, consisting of normal recurring adjustments, that are, in the opinion of the Company’s management, necessary for a fair statement of the results of the respective interim periods. Results of operations for interim periods are not necessarily indicative of results to be expected for an entire year.

Basis of Presentation

The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries as well as a single variable interest entity, Radiant Logistics Partners, LLC (“RLP”), which is 40% owned by Radiant Global Logistics, Inc. (“RGL”), and 60% owned by Radiant Capital Partners, LLC (“RCP”, see Note 8), an affiliate of Bohn H. Crain, the Company’s Chief Executive Officer, whose accounts are included in the condensed consolidated financial statements. All significant intercompany balances and transactions have been eliminated.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Use of Estimates

The preparation of financial statements and related disclosures in accordance with accounting principles generally accepted in the United States (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Such estimates include revenue recognition, accruals for the cost of purchased transportation, the fair value of acquired assets and liabilities, changes in contingent consideration, accounting for the issuance of shares and share-based compensation, the assessment of the recoverability of long-lived assets and goodwill, and the establishment of an allowance for doubtful accounts. Estimates and assumptions are reviewed periodically and the effects of revisions are reflected in the period that they are determined to be necessary. Actual results could differ from those estimates.

b) Fair Value Measurements

In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities. Fair values determined by Level 2 inputs utilize observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities. Fair values determined by Level 3 inputs are unobservable data points for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability.

c) Fair Value of Financial Instruments

The carrying values of the Company’s receivables, accounts payable and accrued transportation costs, commissions payable, other accrued costs, and the income tax deposit approximate the fair values due to the relatively short maturities of these instruments. The carrying value of the Company’s credit facility and other long-term liabilities would not differ significantly from fair value (based on Level 2 inputs) if recalculated based on current interest rates. Contingent consideration attributable to the Company’s acquisitions are reported at fair value using Level 3 inputs.

d) Cash and Cash Equivalents

For purposes of the statements of cash flows, cash equivalents include all highly liquid investments with original maturities of three months or less that are not securing any corporate obligations. Cash balances may at times exceed federally insured limits. Checks issued by the Company that have not yet been presented to the bank for payment are reported as accounts payable and commissions payable in the accompanying consolidated balance sheets. Accounts payable and commissions payable includes outstanding payments which had not yet been presented to the bank for payment in the amounts of \$5,154,280 and \$3,137,103 as of March 31, 2016 and June 30, 2015, respectively.

e) Concentrations

The Company maintains its cash in bank deposit accounts that, at times, may exceed federally-insured limits. The Company has not experienced any losses in such accounts.

f) Accounts Receivable

The Company’s receivables are recorded when billed and represent claims against third parties that will be settled in cash. The carrying value of the Company’s receivables, net of the allowance for doubtful accounts, represents their estimated net realizable value. The Company evaluates the collectability of accounts receivable on a customer-by-customer basis. The Company records a reserve for bad debts against amounts due to reduce the net recognized receivable to an amount the Company believes will be reasonably collected. The reserve is a discretionary amount determined from the analysis of the aging of the accounts receivables, historical experience and knowledge of

specific customers.

9

The Company derives a substantial portion of its revenue through independently-owned strategic operating partner locations operating under the various Company brands. Each individual strategic operating partner is responsible for some or all of the bad debt expense related to the underlying customers being serviced by such operating partner. To facilitate this arrangement, certain strategic operating partners are required to maintain a security deposit with the Company that is recognized as a liability in the Company's financial statements. The Company charges each individual strategic operating partner's bad debt reserve account for any accounts receivable aged beyond 90 days. However, the bad debt reserve account may carry a deficit balance when amounts charged to this reserve exceed amounts otherwise available in the bad debt reserve account. In these circumstances, deficit bad debt reserve accounts, as well as other deficit balances owed to us by our strategic operating partners, are recognized as a receivable in the Company's financial statements. Other strategic operating partners are not responsible to establish a bad debt reserve, however, they are still responsible for deficits and their strategic operating partner agreements provide that the Company may withhold all or a portion of future commission checks payable to the individual operating partner in satisfaction of any deficit balance. Currently, a number of the Company's operating partners have a deficit balance in their bad debt reserve account. The Company expects to replenish these funds through the future business operations of these operating partners. However, to the extent any of these operating partners were to cease operations or otherwise be unable to replenish these deficit accounts, the Company would be at risk of loss for any such amount.

g) Furniture and Equipment

Technology (computer software, hardware, and communications), vehicles, furniture, and equipment are stated at cost, less accumulated depreciation over the estimated useful lives of the respective assets. Depreciation is computed using three to fifteen year lives for vehicles, communication, office, furniture, and computer equipment using the straight line method of depreciation. Computer software is depreciated over a three year life using the straight line method of depreciation. For leasehold improvements, the cost is depreciated over the shorter of the lease term or useful life on a straight line basis. Upon retirement or other disposition of these assets, the cost and related accumulated depreciation are removed from the accounts and the resulting gain or loss, if any, is reflected in other income or expense. Expenditures for maintenance, repairs and renewals of minor items are charged to expense as incurred. Major renewals and improvements are capitalized.

h) Goodwill

Goodwill represents the excess of purchase price over the value assigned to the net tangible and identifiable intangible assets of a business acquired. The Company typically performs its annual goodwill impairment test effective as of April 1 of each year, unless events or circumstances indicate impairment may have occurred before that time. The Company assesses qualitative factors to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying amount. After assessing qualitative factors, the Company determined that no further testing was necessary. If further testing was necessary, the Company would have performed a two-step impairment test for goodwill. The first step requires the Company to determine the fair value of each reporting unit, and compare the fair value to the reporting unit's carrying amount. To the extent a reporting unit's carrying amount exceeds its fair value, an indication exists that the reporting unit's goodwill may be impaired and the Company must perform a second more detailed impairment assessment. The second impairment assessment involves allocating the reporting unit's fair value to all of its recognized and unrecognized assets and liabilities in order to determine the implied fair value of the reporting unit's goodwill as of the assessment date. The implied fair value of the reporting unit's goodwill is then compared to the carrying amount of goodwill to quantify an impairment charge as of the assessment date. As of March 31, 2016, management believes there are no indications of impairment.

i) Long-Lived Assets

Acquired intangibles consist of customer related intangibles, trade names and trademarks, and non-compete agreements arising from the Company's acquisitions. Customer related intangibles are amortized using the straight-line method over a period of up to 10 years, trademarks and trade names are amortized using the straight line method over 15 years, and non-compete agreements are amortized using the straight line method over the term of the underlying

agreements.

The Company reviews long-lived assets to be held-and-used for impairment whenever events or changes in circumstances indicate the carrying amount of the assets may not be recoverable. If the sum of the undiscounted expected future cash flows over the remaining useful life of a long-lived asset is less than its carrying amount, the asset is considered to be impaired. Impairment losses are measured as the amount by which the carrying amount of the asset exceeds the fair value of the asset. When fair values are not available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risks associated with the recovery of the asset. Assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell. During the fiscal year, the Company concluded it had a triggering event requiring assessment of customer related intangibles associated with the On Time Express, Inc. (“OTE”) acquisition due to a loss of customers. As a result, the Company reviewed the customer related intangibles and recorded an impairment loss of \$3,679,825 during the second fiscal quarter. The impairment was measured using future discounted cash flows using Level 3 inputs in the fair value hierarchy. Management has performed a review of all long-lived assets and has determined no further impairment of the respective carrying value has occurred as of March 31, 2016.

10

j) Business Combinations

The Company accounts for business combinations using the purchase method of accounting and allocates the purchase price to the tangible and intangible assets acquired and the liabilities assumed based upon their estimated fair values at the acquisition date. The difference between the purchase price and the fair value of the net assets acquired is recorded as goodwill. While the Company uses its best estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date, the estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, the Company records adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded in the consolidated statements of income.

The fair values of intangible assets acquired are estimated using a discounted cash flow approach with Level 3 inputs. Under this method, an intangible asset's fair value is equal to the present value of the incremental after-tax cash flows (excess earnings) attributable solely to the intangible asset over its remaining useful life. To calculate fair value, the Company uses risk-adjusted cash flows discounted at rates considered appropriate given the inherent risks associated with each type of asset. The Company believes the level and timing of cash flows appropriately reflects market participant assumptions.

The Company determines the acquisition date fair value of the contingent consideration payable based on the likelihood of paying the contingent consideration as part of the consideration transferred. The fair value is estimated using projected future operating results and the corresponding future earn-out payments that can be earned upon the achievement of specified operating objectives and financial results by our acquired companies using Level 3 inputs and the amounts are then discounted to present value. These liabilities are measured quarterly at fair value, and any change in the contingent liability is included in the consolidated statements of income.

k) Commitments

The Company has operating lease commitments for equipment rentals, office space, and warehouse space under non-cancelable operating leases expiring at various dates through May 2021. Rent expense is recognized straight line over the term of the lease. Minimum future lease payments (excluding the lease payments included in the lease termination liability) under these non-cancelable operating leases for each of the next five fiscal years ending June 30 and thereafter are as follows:

2016 (remaining portion)	\$1,461,352
2017	5,332,721
2018	3,693,149
2019	2,888,955
2020	1,685,643
Thereafter	981,130
Total minimum lease payments \$16,042,950	

Rent expense amounted to \$1,435,881 and \$4,314,790 for the three and nine months ended March 31, 2016, respectively, and \$495,440 and \$1,470,718 for the three and nine months ended March 31, 2015.

l) Lease Termination and Transition Costs

Lease termination costs consist of expenses related to future rent payments for which we no longer intend to receive any economic benefit. A liability is recorded when we cease to use leased space. Lease termination costs are calculated as the present value of lease payments, net of expected sublease income, and the loss on disposition of assets. Transition costs consist of nonrecurring personnel costs that will be eliminated in connection with the winding-down of the historical back-office of SBA and other operating locations.

The transition and lease termination liability consists of the following:

	Lease Termination Costs	Retention and Severance Costs	Non-recurring Personnel Costs	Total
Balance as of June 30, 2015	\$255,272	\$28,500	\$—	\$283,772
Lease termination and transition costs Payments and other	2,342,735 (1,012,866)	834,666 (150,780)	1,931,169 (1,931,169)	5,108,570 (3,094,815)
Balance as of March 31, 2016	\$1,585,141	\$712,386	\$—	\$2,297,527

m) 401(k) Savings Plans

The Company has employee savings plans under which the Company provides matching contributions. The Company's contributions under the plans were \$208,104 and \$507,513 for the three and nine months ended March 31, 2016, respectively, and \$126,311 and \$349,408 for the three and nine months ended March 31, 2015, respectively.

n) Income Taxes

Deferred income taxes are reported using the asset and liability method. Deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

The Company reports a liability for unrecognized tax benefits resulting from uncertain income tax positions taken or expected to be taken in an income tax return. Estimated interest and penalties, if any, are recorded as a component of interest expense or other expense, respectively.

o) Revenue Recognition and Purchased Transportation Costs

The Company is the primary obligor responsible for providing the service desired by the customer and is responsible for fulfillment, including the acceptability of the service(s) ordered or purchased by the customer. At the Company's sole discretion, it sets the prices charged to its customers, and is not required to obtain approval or consent from any other party in establishing its prices. The Company has multiple suppliers for the services it sells to its customers, and has the absolute and complete discretion and right to select the supplier that will provide the product(s) or service(s) ordered by a customer, including changing the supplier on a shipment-by-shipment basis. In most cases, the Company determines the nature, type, characteristics, and specifications of the service(s) ordered by the customer. The Company also assumes credit risk for the amount billed to the customer.

As a non-asset based carrier, the Company generally does not own transportation assets. The Company generates the major portion of its freight forwarding revenues by purchasing transportation services from direct (asset-based) carriers and reselling those services to its customers. Based upon the terms in the contract of carriage, revenues related to shipments where the Company issues a House Airway Bill or a House Ocean Bill of Lading are recognized at the time the freight is tendered to the direct carrier at origin net of duties and taxes. Costs related to the shipments are also recognized at this same time based upon anticipated margins, contractual arrangements with direct carriers, and other known factors. The estimates are routinely monitored and compared to actual invoiced costs. The estimates are adjusted as deemed necessary by the Company to reflect differences between the original accruals and actual costs of purchased transportation.

This method generally results in recognition of revenues and purchased transportation costs earlier than the preferred methods under GAAP which does not recognize revenue until a proof of delivery is received or which recognizes revenue as progress on the transit is made. The Company's method of revenue and cost recognition does not result in a material difference from amounts that would be reported under such other methods.

All other revenue, including revenue from other value-added services including brokerage services, warehousing and fulfillment services, is recognized upon completion of the service.

p) Share-Based Compensation

The Company has issued restricted stock awards and stock options to certain directors, officers and employees. The Company accounts for share-based compensation under the fair value recognition provisions such that compensation cost is measured at the grant date based on the value of the award and is expensed ratably over the vesting period.

Determining the fair value of share-based awards at the grant date requires judgment, including estimating the percentage of awards that will be forfeited, stock volatility, the expected life of the award, and other inputs. If actual forfeitures differ significantly from the estimates, share-based compensation expense and the Company's results of operations could be materially impacted. The Company issues new shares of common stock to satisfy exercises and vesting of awards granted under our stock plan.

The Company recorded share-based compensation expense of \$326,973 and \$1,085,169 for the three and nine months ended March 31, 2016, respectively, and \$281,204 and \$732,772 for the three and nine months ended March 31, 2015.

q) Basic and Diluted Income Per Share

Basic income per share is computed by dividing net income attributable to common stockholders by the weighted average number of common shares outstanding. Diluted income per share is computed similar to basic income per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares, such as stock awards and stock options, had been issued and if the additional common shares were dilutive. Net income attributable to common stockholders is calculated after earned preferred stock dividends, whether or not declared.

For the three months ended March 31, 2016, the weighted average outstanding number of potentially dilutive common shares totaled 48,745,727 shares of common stock. Unvested restricted stock awards and options to purchase 4,349,922 shares of common stock were excluded from the diluted income per share for the three months ended March 31, 2016 as there was a net loss in the period and their effect would have been antidilutive. For the three months ended March 31, 2015, the weighted average outstanding number of potentially dilutive common shares totaled 36,476,629 shares of common stock, including unvested restricted stock awards and options to purchase 5,270,183 shares of common stock as of March 31, 2015, of which 777,051 were excluded as their effect would have been antidilutive.

For the nine months ended March 31, 2016, the weighted average outstanding number of potentially dilutive common shares totaled 48,282,964 shares of common stock. Unvested restricted stock awards and options to purchase 4,349,922 shares of common stock were excluded from the diluted income per share for the nine months ended March 31, 2016, as there was a net loss in the period and their effect would have been antidilutive. For the nine months ended March 31, 2015, the weighted average outstanding number of potentially dilutive common shares totaled 36,161,557 shares of common stock, including unvested restricted stock awards and options to purchase 5,270,183 shares of common stock as of March 31, 2015, of which 912,768 were excluded as their effect would have been antidilutive.

The following table reconciles the numerator and denominator of the basic and diluted per share computations for earnings per share as follows:

	Three months ended		Nine months ended	
	March 31, 2016	2015	March 31, 2016	2015
Weighted average basic shares outstanding	48,745,727	34,758,931	48,282,964	34,577,405
Dilutive effect of share-based awards	—	1,717,698	—	1,584,152
Weighted average dilutive shares outstanding	48,745,727	36,476,629	48,282,964	36,161,557

r) Foreign Currency Translation

For the Company's significant foreign subsidiaries that prepare financial statements in currencies other than U.S. dollars, the local currency is the functional currency. All assets and liabilities are translated at period-end exchange rates and all income statement amounts are translated at the weighted average rates for the period. Translation

adjustments are recorded in accumulated other comprehensive (loss) income. Gains and losses on transactions of monetary items are recognized in the consolidated statements of operations.

s) Reclassifications

Certain amounts for prior periods have been reclassified in the Company's consolidated financial statements to conform to the classification used in fiscal year 2016.

t) Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers, to clarify the principles used to recognize revenue for all entities. In March 2016, the FASB issued ASU 2016-08 to further clarify the implementation guidance on principal versus agent considerations. The guidance is effective for annual and interim periods beginning after December 15, 2017, and early adoption is permitted. The Company is currently evaluating the impact, if any, that the adoption of this guidance will have on the Company's consolidated financial statements and related disclosures.

In April 2015, the FASB issued ASU 2015-03, Imputation of Interest, requiring entities to present debt issuance costs related to a debt liability as a reduction of the carrying amount of that liability. In August 2015, the FASB issued ASU 2015-15 to provide additional guidance related to debt issuance costs related to line-of-credit arrangements. The guidance is effective for annual and interim periods beginning after December 15, 2015, and early adoption is permitted. The Company is currently evaluating the impact, if any, that the adoption of this guidance will have on the Company's consolidated financial statements and related disclosures.

In November 2015, the FASB issued ASU 2015-17, Balance Sheet Classification of Deferred Taxes, to require all deferred tax assets and liabilities to be classified as non-current on the balance sheet. The guidance is effective for annual and interim periods beginning after December 15, 2016, and early adoption is permitted. The Company is currently evaluating the impact, if any, that the adoption of this guidance will have on the Company's consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, Leases, to replace existing guidance. The guidance requires the recognition of right-of-use assets and lease liabilities for operating leases with terms more than 12 months on the balance sheet. Guidance is also provided for the presentation of leases within the statement of operations and cash flows. The guidance is effective for annual and interim periods beginning after December 15, 2018, and early adoption is permitted. The Company is currently evaluating the impact, if any, that the adoption of this guidance will have on the Company's consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-09, Stock Compensation, to improve the accounting for share-based compensation. The guidance changes how companies account for certain aspects of share-based compensation, including accounting for income taxes, forfeitures, tax withholdings, and classification of items in the statement of cash flows. The guidance is effective for annual and interim periods beginning after December 15, 2016, and early adoption is permitted. The Company is currently evaluating the impact, if any, that the adoption of this guidance will have on the Company's consolidated financial statements and related disclosures.

NOTE 3 – BUSINESS ACQUISITIONS

Fiscal Year 2016 Acquisition

Copper Logistics, Incorporated

On November 2, 2015, the Company acquired the operations and assets of Copper Logistics, Incorporated (“Copper”), a Minneapolis, Minnesota based company that provides a full range of domestic and international transportation and logistics services across North America. The Company has structured the transaction similar to previous acquisitions, with a portion of the expected purchase price payable in subsequent periods based on future performance of the acquired operation.

Fiscal Year 2015 Acquisitions

Wheels Group, Inc.

On April 2, 2015, the Company acquired the outstanding stock of Wheels Group Inc. (“Wheels”). Under an Arrangement Agreement (the “Arrangement”), the Company purchased Wheels for approximately \$26.9 million in cash and 6,900,000 shares of the Company's common stock. The Company was also responsible for a portion of Wheels' transaction costs, in addition to its own costs. Wheels, founded in 1988, provides truck brokerage and intermodal services throughout the United States and Canada along with value added warehouse and distribution service offerings in support of U.S. shippers looking to access the Canadian markets. Wheels is one of the largest third party logistics providers in Canada. Wheels, now formally amalgamated into Wheels International, Inc., provides these services primarily to the food and beverage, consumer packaged goods, frozen foods and refrigerated product, and building products industries. The goodwill recognized is attributable to a larger geographic footprint and an increased service

line expansion and is not deductible for tax purposes. The results of operations for Wheels are included in the Company's financial statements as of the date of purchase.

Service by Air, Inc.

On June 8, 2015, the Company acquired the outstanding stock of Service by Air, Inc. ("SBA"), a privately-held New York corporation founded in 1976. SBA is a domestic and international freight forwarder serving manufacturers, distributors and retailers through a combination of three company-owned operating locations and forty independent strategic operating partners across North America. The base purchase price was approximately \$12.25 million, consisting of \$11.4 million paid in cash at closing, and \$0.85 million payable net of working capital and other holdbacks. The goodwill recognized is attributable primarily to the expected cost synergies associated with eliminating redundancies and migrating back-office operations of SBA to the Company and is not deductible for tax purposes. The results of operations for SBA are included in the Company's financial statements as of the date of purchase.

Other Acquisitions

On September 1, 2014, through a wholly-owned subsidiary, the Company acquired the assets and operations of Trans-Net, Inc. (“TNI”), a privately-held company based in Issaquah, Washington. TNI has extensive experience providing integrated project logistics solutions in key Russian oil, gas, mining and infrastructure development markets. On December 15, 2014, through a wholly-owned subsidiary, the Company acquired the assets and operations of Don Cameron & Associates, Inc. (“DCA”), a privately-held company based in Minneapolis, Minnesota. DCA has extensive experience providing a full range of domestic and international transportation and logistics services across North America to the med-tech, advertising/marketing, pharmaceutical, and trade show industries. Effective as of June 1, 2015, through a wholly-owned subsidiary, the company acquired the stock of Highways and Skyways, Inc. (“Highways”), a privately-held company based near Cincinnati, Ohio. Highways services a full range of domestic and international transportation and logistics services to manufacturing, apparel, paper products, medical devices, consumer products and technology industries. Each of the TNI, DCA and Highways acquisitions include earn-out payments that are payable upon achieving certain earnings up to a maximum contingent consideration of \$6.5 million, although there are no maximums on certain of the earn-out payments.

Each of the TNI, DCA, Highways, and Copper acquisitions were financed with proceeds from the Company’s Credit Facility (as defined in Note 6), and the transactions were structured using cash, stock, and earn-out payments. The goodwill recorded is expected to be deductible for income tax purposes over a period of 15 years. The consideration paid, purchase price, and pro forma results of operations have not been presented because the effect of these acquisitions was not material to the condensed consolidated financial statements.

The results of operations for the businesses acquired are included in our financial statements as of the date of purchase. The preliminary fair value estimates for the assets acquired and liabilities assumed are based upon preliminary calculations and valuations and our estimates and assumptions are subject to change as we obtain additional information for our estimates during the respective measurement periods (up to one year from the acquisition date). The primary areas of the preliminary estimates for Wheels, SBA, Highways and Copper not yet finalized relates to certain tangible assets and liabilities acquired, and identifiable intangible assets.

NOTE 4 – FURNITURE AND EQUIPMENT

	March 31, 2016	June 30, 2015
Vehicles	\$4,889,432	\$5,384,161
Communication equipment	213,178	111,790
Office and warehouse equipment	591,628	471,915
Furniture and fixtures	621,108	585,820
Computer equipment	1,680,659	1,364,648
Computer software	9,334,025	7,209,965
Leasehold improvements	1,692,586	1,324,437
	19,022,616	16,452,736
Less: Accumulated depreciation and amortization	(6,374,880)	(3,276,846)

\$12,647,736 \$13,175,890

Depreciation and amortization expense related to furniture and equipment was \$962,865 and \$2,774,338 for the three and nine months ended March 31, 2016, respectively, and \$154,651 and \$421,700 for the three and nine months ended March 31, 2015, respectively.

NOTE 5 – ACQUIRED INTANGIBLE ASSETS

The table below reflects acquired intangible assets related to all acquisitions:

March	June	
31,	30,	Weighted-Average
