

ACETO CORP
Form 10-Q
November 07, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014
Commission file number 000-04217

ACETO CORPORATION
(Exact name of registrant as specified in its charter)

New York
(State or other jurisdiction of
incorporation or organization)

11-1720520
(I.R.S. Employer Identification
Number)

4 Tri Harbor Court, Port Washington, NY 11050
(Address of principal executive offices) (Zip Code)

(516) 627-6000
(Registrant's telephone number, including area code)

www.aceto.com
(Registrant's website address)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every interactive data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Edgar Filing: ACETO CORP - Form 10-Q

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The registrant had 29,065,126 shares of common stock outstanding as of November 3, 2014.

ACETO CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited and in thousands, except per-share amounts)

(1) Basis of Presentation

The condensed consolidated financial statements of Aceto Corporation and subsidiaries (“Aceto” or the “Company”) included herein have been prepared by the Company and reflect all adjustments (consisting solely of normal recurring adjustments) necessary to present fairly the financial position, results of operations and cash flows for all periods presented. Interim results are not necessarily indicative of results which may be achieved for the full year.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses reported in those financial statements. These judgments can be subjective and complex, and consequently actual results could differ from those estimates and assumptions. The Company’s most critical accounting policies relate to revenue recognition; royalty income; partnered products; allowance for doubtful accounts; inventories; goodwill and other indefinite-lived intangible assets; long-lived assets; environmental and other contingencies; income taxes; and stock-based compensation.

These condensed consolidated financial statements do not include all disclosures associated with consolidated financial statements prepared in accordance with GAAP. Accordingly, these statements should be read in conjunction with the Company’s consolidated financial statements and notes thereto contained in the Company’s Form 10-K for the year ended June 30, 2014.

(2) Stock-Based Compensation

At the annual meeting of shareholders of the Company, held on December 6, 2012, the Company’s shareholders approved the amended and restated Aceto Corporation 2010 Equity Participation Plan (the “2010 Plan”). Under the 2010 Plan, grants of stock options, restricted stock, restricted stock units, stock appreciation rights, and stock bonuses (collectively, “Stock Awards”) may be made to employees, non-employee directors and consultants of the Company, including the chief executive officer, chief financial officer and other named executive officers. The maximum number of shares of common stock of the Company that may be issued pursuant to Stock Awards granted under the 2010 Plan will not exceed, in the aggregate, 5,250 shares. In addition, restricted stock may be granted to an eligible participant in lieu of a portion of any annual cash bonus earned by such participant. Such award may include additional shares of restricted stock (premium shares) greater than the portion of bonus paid in restricted stock. The restricted stock award is vested at issuance and the restrictions lapse ratably over a period of years as determined by the Board of Directors, generally three years. The premium shares vest when all the restrictions lapse, provided that the participant remains employed by the Company at that time.

During the three months ended September 30, 2014, the Company granted 158 shares of restricted common stock to its employees that vest over three years as well as 51 restricted stock units that have varying vest dates from December 2014 through August 2016. In addition, the Company also issued a target grant of 116 performance-vested restricted stock units, which grant could be as much as 203 if certain performance criteria and market conditions are met. Performance-vested restricted stock units will cliff vest 100% at the end of the third year following grant in accordance with the performance metrics set forth in the applicable employee performance-vested restricted stock unit grant.

During the year ended June 30, 2014, the Company granted 214 shares of restricted common stock to its employees that vest over three years and 11 shares of restricted common stock to its non-employee directors, which vest over approximately one year as well as 32 restricted stock units that have varying vest dates from August 2014 through July 2015. In addition, the Company also issued a target grant of 131 performance-vested restricted stock units, which grant could be as much as 196 if certain performance criteria and market conditions are met. Performance-vested restricted stock units will cliff vest 100% at the end of the third year following grant in accordance with the performance metrics set forth in the applicable employee performance-vested restricted stock unit grant.

For the three months ended September 30, 2014 and 2013, the Company recorded stock-based compensation expense of approximately \$1,103 and \$716 respectively, related to restricted common stock and restricted stock units. As of September 30, 2014, the total unrecognized compensation cost related to restricted stock awards and units is approximately \$8,733. There were no stock options granted in the three months ended September 30, 2014 and 2013. Total compensation expense related to stock options for the three months ended September 30, 2014 and 2013 was \$19 and \$79, respectively.

ACETO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per-share amounts)

(3) Common Stock

On September 4, 2014, the Company's board of directors declared a regular quarterly dividend of \$0.06 per share which was paid on September 29, 2014 to shareholders of record as of September 15, 2014.

(4) Net Income Per Common Share

Basic income per common share is based on the weighted average number of common shares outstanding during the period. Diluted income per common share includes the dilutive effect of potential common shares outstanding. The following table sets forth the reconciliation of weighted average shares outstanding and diluted weighted average shares outstanding:

	Three months ended September 30,	
	2014	2013
Weighted average shares outstanding	28,618	27,757
Dilutive effect of stock options and restricted stock awards and units	560	633
Diluted weighted average shares outstanding	29,178	28,390

(5) Debt

Long-term debt

	September 30, 2014	June 30, 2014
Revolving bank loans	\$ 37,000	\$ 32,000
Term bank loans	68,000	70,000
Mortgage	3,305	3,355
Other	-	146
	108,305	105,501
Less current portion	8,697	8,343
	\$ 99,608	\$ 97,158

Credit Facilities

On April 30, 2014, and in connection with the purchase of PACK Pharmaceuticals, LLC ("PACK"), Aceto entered into a new Credit Agreement (the "Credit Agreement") with three domestic financial institutions. The Credit Agreement terminates the Credit Agreement, dated December 31, 2010. Aceto may borrow, repay and reborrow during the period ending April 30, 2019, up to but not exceeding at any one time outstanding \$60,000 (the "Revolving Commitment").

The Revolving Commitment provides for (i) Adjusted LIBOR Loans (as defined in the Credit Agreement), (ii) Alternate Base Rate Loans (as defined in the Credit Agreement) or (iii) a combination thereof. As of September 30, 2014, the Company borrowed Revolving Loans aggregating \$37,000 which loans are Adjusted LIBOR Loans at interest rates ranging from 2.15% to 2.32% at September 30, 2014. The Credit Agreement also allows for the borrowing up to \$70,000 (the "Term Commitment"). The Term Commitment interest may be payable as an (i) Adjusted LIBOR Loan, (ii) Alternate Base Rate Loan, or (iii) a combination thereof. The Company borrowed a Term Loan of \$70,000 on April 30, 2014 to partially finance the acquisition of PACK. As of September 30, 2014, the remaining amount outstanding under the amortizing Term Loan is \$68,000 and is payable as an Adjusted LIBOR Loan at an interest rate of 2.23% at September 30, 2014. Proceeds of the Term Commitment and a portion of the proceeds of the Revolving Commitment were used to fund the initial cash consideration for PACK and to repay the outstanding balance of term loans from the Credit Agreement dated December 31, 2010.

ACETO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per-share amounts)

The Term Loan is payable as to principal in nineteen consecutive quarterly installments, which commenced on September 30, 2014 and will continue on each December 31, March 31, and June 30 thereafter, each in the amount set forth below opposite the applicable installment, provided that the final payment on the Term Loan Maturity Date (as defined in the Credit Agreement) shall be in an amount equal to the then outstanding unpaid principal amount of the Term Loan:

Installment Amount

1 through	
4	\$ 2,000
5 through	
8	\$ 2,500
9 through	
12	\$ 3,000
13 through	
16	\$ 4,000
17 through	
19	\$ 6,000

As such, the Company has classified \$8,500 of the Term Loan as short-term in the consolidated balance sheet at September 30, 2014. The Credit Agreement also provides that commercial letters of credit shall be issued to provide the primary payment mechanism in connection with the purchase of any materials, goods or services by us in the ordinary course of business. The Company had open letters of credit of approximately \$32 and \$105 at September 30, 2014 and June 30, 2014 respectively. The terms of these letters of credit are all less than one year. No material loss is anticipated due to non-performance by the counterparties to these agreements.

The Credit Agreement provides for a security interest in all of our personal property. The Credit Agreement contains several financial covenants including, among other things, maintaining a minimum level of debt service. We are also subject to certain restrictive covenants, including, among other things, covenants governing liens, limitations on indebtedness, limitations on guarantees, sale of assets, sales of receivables, and loans and investments. We were in compliance with all covenants at September 30, 2014.

Mortgage

On June 30, 2011, the Company entered into a mortgage payable for \$3,947 on its corporate headquarters, in Port Washington, New York. This mortgage is secured by the land and building and is being amortized over a period of 20 years. The mortgage, which was modified in October 2013, bears interest at 4.92% as of September 30, 2014 and matures on June 30, 2021.

(6) Commitments, Contingencies and Other Matters

The Company and its subsidiaries are subject to various claims which have arisen in the normal course of business. The Company provides for costs related to contingencies when a loss from such claims is probable and the amount is

reasonably determinable. In determining whether it is possible to provide an estimate of loss, or range of possible loss, the Company reviews and evaluates its litigation and regulatory matters on a quarterly basis in light of potentially relevant factual and legal developments. If the Company determines an unfavorable outcome is not probable or reasonably estimable, the Company does not accrue for a potential litigation loss. While the Company has determined that there is a reasonable possibility that a loss has been incurred, no amounts have been recognized in the financial statements, other than what has been discussed below, because the amount of the liability cannot be reasonably estimated at this time.

ACETO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per-share amounts)

On October 29, 2012, a lawsuit was filed in the United Kingdom (in the High Court of Justice, Queens Bench Division, Commercial Court) by United Phosphorous Limited (“UPL”) against Aceto Agricultural Chemicals Corporation (“AACC”), a wholly-owned subsidiary of the Company. In the lawsuit, UPL alleges, among other things, that AACC breached a 1995 agreement regarding European sales of a potato sprout suppression product, by selling the product in Europe. UPL claims damages of approximately £4,500 (approximately US \$7,200) plus an unspecified amount of additional damages. AACC strongly denies the allegations and believes that UPL’s claims are without merit. However, in October 2014, in order to avoid the inherent risk of litigation, AACC and UPL reached a tentative agreement in principle pursuant to which (i) UPL will provide certain future business benefits and opportunities to AACC and the Company, and (ii) AACC will pay \$350 to UPL. The Company has recorded a liability for the \$350 as of September 30, 2014, which is reflected in the condensed consolidated balance sheet at September 30, 2014.

In fiscal years 2011, 2009, 2008 and 2007, the Company received letters from the Pulvair Site Group, a group of potentially responsible parties (PRP Group) who are working with the State of Tennessee (the State) to remediate a contaminated property in Tennessee called the Pulvair site. The PRP Group has alleged that Aceto shipped hazardous substances to the site which were released into the environment. The State had begun administrative proceedings against the members of the PRP Group and Aceto with respect to the cleanup of the Pulvair site and the PRP Group has begun to undertake cleanup. The PRP Group is seeking a settlement of approximately \$1,700 from the Company for its share to remediate the site contamination. Although the Company acknowledges that it shipped materials to the site for formulation over twenty years ago, the Company believes that the evidence does not show that the hazardous materials sent by Aceto to the site have significantly contributed to the contamination of the environment and thus believes that, at most, it is a de minimus contributor to the site contamination. Accordingly, the Company believes that the settlement offer is unreasonable. Management believes that the ultimate outcome of this matter will not have a material adverse effect on the Company’s financial condition or liquidity.

The Company has environmental remediation obligations in connection with Arsynco, Inc. (“Arsynco”), a subsidiary formerly involved in manufacturing chemicals located in Carlstadt, New Jersey, which was closed in 1993 and is currently held for sale. Based on continued monitoring of the contamination at the site and the approved plan of remediation, the Company received an estimate from an environmental consultant stating that the costs of remediation could be between \$12,200 and \$14,000. Remediation commenced in fiscal 2010, and as of September 30, 2014 and June 30, 2014, a liability of \$7,405 and \$8,907, respectively, is included in the accompanying consolidated balance sheets for this matter. In accordance with GAAP, management believes that the majority of costs incurred to remediate the site will be capitalized in preparing the property which is currently classified as held for sale. An appraisal of the fair value of the property by a third-party appraiser supports the assumption that the expected fair value after the remediation is in excess of the amount required to be capitalized. However, these matters, if resolved in a manner different from those assumed in current estimates, could have a material adverse effect on the Company’s financial condition, operating results and cash flows when resolved in a future reporting period.

In connection with the environmental remediation obligation for Arsynco, in July 2009, the Company entered into a settlement agreement with BASF Corporation (“BASF”), the former owners of the Arsynco property. In accordance with the settlement agreement, BASF paid for a portion of the prior remediation costs and going forward, will co-remediate the property with the Company. The contract requires that BASF pay \$550 related to past response costs and pay a proportionate share of the future remediation costs. Accordingly, the Company had recorded a gain of \$550 in fiscal 2009. This \$550 gain relates to the partial reimbursement of costs of approximately \$1,200 that the Company

had previously expensed. The Company also recorded an additional receivable from BASF, with an offset against property held for sale, representing its estimated portion of the future remediation costs. The balance of this receivable for future remediation costs as of September 30, 2014 and June 30, 2014 is \$3,332 and \$4,008, respectively, which is included in the accompanying consolidated balance sheets.

ACETO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per-share amounts)

In March 2006, Arsynco received notice from the EPA of its status as a PRP under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for a site described as the Berry's Creek Study Area ("BCSA"). Arsynco is one of over 150 PRPs which have potential liability for the required investigation and remediation of the site. The estimate of the potential liability is not quantifiable for a number of reasons, including the difficulty in determining the extent of contamination and the length of time remediation may require. In addition, any estimate of liability must also consider the number of other PRPs and their financial strength. In July 2014, Arsynco received notice from the U.S. Department of Interior ("USDO") regarding the USDO's intent to perform a Natural Resource Damage (NRD) Assessment at the BCSA. Arsynco has to date declined to participate in the development and performance of the NRD assessment process. Based on prior practice in similar situations, it is possible that the State may assert a claim for natural resource damages with respect to the Arsynco site itself, and either the federal government or the State (or both) may assert claims against Arsynco for natural resource damages in connection with Berry's Creek; any such claim with respect to Berry's Creek could also be asserted against the approximately 150 PRPs which the EPA has identified in connection with that site. Any claim for natural resource damages with respect to the Arsynco site itself may also be asserted against BASF, the former owners of the Arsynco property. In September 2012, Arsynco entered into an agreement with three of the other PRPs that had previously been impleaded into New Jersey Department of Environmental Protection, et al. v. Occidental Chemical Corporation, et al., Docket No. ESX-L-9868-05 (the "NJDEP Litigation") and were considering impleading Arsynco into same. Arsynco entered into agreement to avoid impleader. Pursuant to agreement, Arsynco agreed to (1) a tolling period that would not be included when computing the running of any statute of limitations that might provide a defense to the NJDEP Litigation; (2) the waiver of certain issue preclusion defenses in the NJDEP Litigation; and (3) arbitration of certain potential future liability allocation claims if the other parties to the agreement are barred by a court of competent jurisdiction from proceeding against Arsynco. Since an amount of the liability cannot be reasonably estimated at this time, no accrual is recorded for these potential future costs. The impact of the resolution of this matter on the Company's results of operations in a particular reporting period is not known.

A subsidiary of the Company markets certain agricultural protection products which are subject to the Federal Insecticide, Fungicide and Rodenticide Act ("FIFRA"). FIFRA requires that test data be provided to the EPA to register, obtain and maintain approved labels for pesticide products. The EPA requires that follow-on registrants of these products compensate the initial registrant for the cost of producing the necessary test data on a basis prescribed in the FIFRA regulations. Follow-on registrants do not themselves generate or contract for the data. However, when FIFRA requirements mandate that new test data be generated to enable all registrants to continue marketing a pesticide product, often both the initial and follow-on registrants establish a task force to jointly undertake the testing effort. The Company is presently a member of several such task force groups, which requires payments for such memberships. In addition, in connection with our agricultural protection business, the Company plans to acquire product registrations and related data filed with the United States Environmental Protection Agency to support such registrations and other supporting data for several products. The acquisition of these product registrations and related data filed with the United States Environmental Protection Agency as well as payments to various task force groups could approximate \$3,900 through fiscal 2015, of which \$0 has been accrued as of September 30, 2014 and June 30, 2014.

On December 31, 2010, the Company acquired certain assets of Rising Pharmaceuticals, Inc. ("Rising"), a New Jersey based company that markets and distributes generic prescription and over the counter pharmaceutical products to leading wholesalers, chain drug stores, distributors, mass market merchandisers and others under its own label,

throughout the United States. The purchase agreement provided for the payment of additional contingent consideration equal to one-half of the three year cumulative Rising earnings before interest, taxes, depreciation and amortization in excess of \$32,100, up to a maximum of \$6,000. As of September 30, 2014 and June, 30, 2014, the Company had accrued \$5,784 and \$5,694, respectively, related to this contingent consideration.

On April 30, 2014, Rising, a wholly owned subsidiary of Aceto, acquired 100% of the issued and outstanding membership interests of PACK. PACK, a national marketer and distributor of generic prescription and over-the-counter pharmaceutical products, has headquarters in Buffalo Grove, Illinois, a suburb of Chicago, Illinois. The purchase agreement provides for a three-year earn-out of up to \$15,000 in cash based on the achievement of certain performance-based targets. As of September 30, 2014 and June 30, 2014, the Company accrued \$3,905 and \$3,797, respectively, related to this contingent consideration. Any necessary future adjustments to this amount will be recorded as an income statement charge at that time.

(7) Fair Value Measurements

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly fashion between market participants at the measurement date. GAAP establishes a fair value hierarchy for those instruments measured at fair value that distinguishes between assumptions based on market data (observable inputs) and the Company's assumptions (unobservable inputs). The hierarchy consists of three levels:

Level 1 – Quoted market prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than Level 1 inputs that are either directly or indirectly observable; and

Level 3 – Unobservable inputs that are not corroborated by market data.

On a recurring basis, Aceto measures at fair value certain financial assets and liabilities, which consist of cash equivalents, investments and foreign currency contracts. The Company classifies cash equivalents and investments within Level 1 if quoted prices are available in active markets. Level 1 assets include instruments valued based on quoted market prices in active markets which generally include corporate equity securities publicly traded on major exchanges. Time deposits are short-term in nature and are accordingly valued at cost plus accrued interest, which approximates fair value, and are classified within Level 2 of the valuation hierarchy. The Company uses foreign currency forward contracts (futures) to minimize the risk caused by foreign currency fluctuation on its foreign currency receivables and payables by purchasing futures with one of its financial institutions. Futures are traded on regulated U.S. and international exchanges and represent commitments to purchase or sell a particular foreign currency at a future date and at a specific price. Aceto's foreign currency derivative contracts are classified within Level 2 as the fair value of these hedges is primarily based on observable forward foreign exchange rates. At September 30, 2014, the Company had foreign currency contracts outstanding that had a notional amount of \$40,534. Unrealized (losses) gains on hedging activities for the three months ended September 30, 2014 and 2013 was (\$806) and \$381, respectively, and are included in interest and other income, net, in the condensed consolidated statements of income. The contracts have varying maturities of less than one year.

In conjunction with the Credit Agreement, the Company entered into an interest rate swap on April 30, 2014 for an additional interest cost of 1.63% on a notional amount of \$25,750, which has been designated as a cash flow hedge. The expiration date of this interest rate swap is April 30, 2019. The remaining balance of this derivative as of September 30, 2014 is \$26,750. Pursuant to the requirements of the Credit Agreement, dated December 31, 2010, the Company was required to deliver Hedging Agreements (as defined in the agreement) fixing the interest rate on not less than \$20,000 of the term loan at that time. Accordingly, in March 2011, the Company entered into an interest rate swap for an additional interest cost of 1.91% on a notional amount of \$20,000, which has been designated as a cash flow hedge. The expiration date of this interest rate swap is December 31, 2015. The remaining balance of this derivative as of September 30, 2014 is \$7,250. The unrealized loss to date associated with these two derivatives, which is recorded in accumulated other comprehensive income in the consolidated balance sheet at September 30, 2014, is \$185. Aceto's interest rate swaps are classified within Level 2 as the fair value of this hedge is primarily based on observable interest rates.

As of September 30, 2014 and June 30, 2014, the Company had \$5,784 and \$5,694, respectively, of contingent consideration that was recorded at fair value in the Level 3 category, which related to the acquisition of Rising that

was completed during fiscal 2011. In addition, as of September 30, 2014 and June 30, 2014, the Company had \$3,905 and \$3,797, respectively, of contingent consideration related to the PACK acquisition, which was completed in April 2014 and \$392 and \$413, respectively, of contingent consideration related to the acquisition of a company in France, which occurred in December 2013. The contingent consideration was calculated using the present value of a probability weighted income approach.

ACETO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per-share amounts)

During the fourth quarter of each year, the Company evaluates goodwill and indefinite-lived intangibles for impairment at the reporting unit level using an undiscounted cash flow model using Level 3 inputs. Additionally, on a nonrecurring basis, the Company uses fair value measures when analyzing asset impairment. Long-lived assets and certain identifiable intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If it is determined such indicators are present and the review indicates that the assets will not be fully recoverable, based on undiscounted estimated cash flows over the remaining amortization periods, their carrying values are reduced to estimated fair value. Measurements based on undiscounted cash flows are considered to be Level 3 inputs.

The following tables summarize the valuation of the Company's financial assets and liabilities which were determined by using the following inputs at September 30, 2014 and June 30, 2014:

	Fair Value Measurements at September 30, 2014 Using

(unaudited and in thousands, except per-share amounts)

The carrying values of all financial instruments classified as a current asset or current liability are deemed to approximate fair value because of the short maturity of these instruments. The fair values of the Company's notes receivable and short-term and long-term bank loans were based upon current rates offered for similar financial instruments to the Company.

(8) Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-15, "Presentation of Financial Statements-Going Concern (Subtopic 205-40)." This ASU provides guidance to determine when and how to disclose going-concern uncertainties in the financial statements. The new standard requires management to assess an entity's ability to continue as a going concern, and to provide related footnote disclosure in certain circumstances. ASU 2014-15 will be effective for all entities in the first annual period ending after December 15, 2016. Earlier adoption is permitted. ASU 2014-15 will be effective for the Company beginning June 30, 2017. The Company does not believe that this pronouncement will have an impact on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)," which is the new comprehensive revenue recognition standard that will supersede all existing revenue recognition guidance under GAAP. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to a customer in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. ASU 2014-09 is effective for annual and interim periods beginning on or after December 15, 2016, and early adoption is not permitted. Entities will have the option of using either a full retrospective approach or a modified approach to adopt the guidance. The Company is currently evaluating the impact of adopting this guidance.

(9) Segment Information

The Company's business is organized along product lines into three principal segments: Human Health, Pharmaceutical Ingredients and Performance Chemicals.

Human Health - includes finished dosage form generic drugs and nutraceutical products.

Pharmaceutical Ingredients – includes pharmaceutical intermediates and active pharmaceutical ingredients ("APIs").

Performance Chemicals - The Performance Chemicals segment is made up of two product groups: Specialty Chemicals and Agricultural Protection Products. Specialty Chemicals include a variety of chemicals which make plastics, surface coatings, textiles, fuels and lubricants perform to their designed capabilities. Dye and pigment intermediates are used in the color-producing industries such as textiles, inks, paper, and coatings. Organic intermediates are used in the production of agrochemicals. In addition, Aceto is a supplier of diazos and couplers to the paper, film and electronics industries.

Agricultural Protection Products include herbicides, fungicides and insecticides that control weed growth as well as control the spread of insects and other microorganisms that can severely damage plant growth. The Agricultural

Protection Products segment also includes a sprout inhibitor for potatoes and an herbicide for sugar cane.

ACETO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per-share amounts)

The Company's chief operating decision maker evaluates performance of the segments based on net sales, gross profit and income before income taxes. Unallocated corporate amounts are deemed by the Company as administrative, oversight costs, not managed by the segment managers. The Company does not allocate assets by segment because the chief operating decision maker does not review the assets by segment to assess the segments' performance, as the assets are managed on an entity-wide basis. During all periods presented, our chief operating decision maker has been the Chief Executive Officer of the Company. In accordance with GAAP, the Company has aggregated certain operating segments into reportable segments because they have similar economic characteristics, and the operating segments are similar in all of the following areas: (a) the nature of the products and services; (b) the nature of the production processes; (c) the type or class of customer for their products and services; (d) the methods used to distribute their products or provide their services; and (e) the nature of the regulatory environment.

Three Months Ended September 30, 2014 and 2013:

	Human Health	Pharmaceutical Ingredients	Performance Chemicals	Unallocated Corporate	Consolidated Totals
2014

Income (loss) before income taxes	5,535	11,004	3,302	(2,267)	17,574

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
Aceto Corporation

We have reviewed the condensed consolidated balance sheet of Aceto Corporation and subsidiaries as of September 30, 2014 and the related condensed consolidated statements of income, comprehensive income and cash flows for the three-month periods ended September 30, 2014 and 2013, included in the accompanying Securities and Exchange Commission Form 10-Q for the period ended September 30, 2014. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board, the consolidated balance sheet of Aceto Corporation and subsidiaries as of June 30, 2014, and the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for the year then ended (not presented herein); and in our report dated September 5, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of June 30, 2014, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ BDO USA, LLP

Melville, New York
November 7, 2014

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

CAUTIONARY STATEMENT RELATING TO THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Quarterly Report contains forward-looking statements as that term is defined in the federal securities laws. The events described in forward-looking statements contained in this Quarterly Report may not occur. Generally, these statements relate to our business plans or strategies, projected or anticipated benefits or other consequences of our plans or strategies, financing plans, projected or anticipated benefits from acquisitions that we may make, or projections involving anticipated revenues, earnings or other aspects of our operating results or financial position, and the outcome of any contingencies. Any such forward-looking statements are based on current expectations, estimates and projections of management. We intend for these forward-looking statements to be covered by the safe-harbor provisions for forward-looking statements. Words such as “may,” “will,” “expect,” “believe,” “anticipate,” “project,” “plan,” “estimate,” and “continue,” and their opposites and similar expressions are intended to identify forward-looking statements. We caution you that these statements are not guarantees of future performance or events and are subject to a number of uncertainties, risks and other influences, many of which are beyond our control that may influence the accuracy of the statements and the projections upon which the statements are based. Factors that could cause actual results to differ materially from those set forth or implied by any forward-looking statement include, but are not limited to, our ability to remain competitive with competitors, risks associated with the generic product industry, dependence on a limited number of suppliers, risks associated with healthcare reform and reductions in reimbursement rates, difficulty in predicting revenue stream and gross profit, industry and market changes, the effect of fluctuations in operating results on the trading price of our common stock, risks associated with holding a significant amount of debt, inventory levels, reliance on outside manufacturers, risks of incurring uninsured environmental and other industry specific liabilities, governmental approvals and regulations, risks associated with hazardous materials, potential violations of government regulations, product liability claims, reliance on Chinese suppliers, potential changes to Chinese laws and regulations, potential changes to laws governing our relationships in India, fluctuations in foreign currency exchange rates, tax assessments, changes in tax rules, global economic risks, risk of unsuccessful acquisitions, effect of acquisitions on earnings, indemnification liabilities, terrorist activities, reliance on key executives, litigation risks, volatility of the market price of our common stock, changes to estimates, judgments and assumptions used in preparing financial statements, failure to maintain effective internal controls, compliance with changing regulations, as well as other risks and uncertainties discussed in our reports filed with the Securities and Exchange Commission, including, but not limited to, our Annual Report on Form 10-K for the fiscal year ended June 30, 2014 and other filings. Copies of these filings are available at www.sec.gov.

Any one or more of these uncertainties, risks and other influences could materially affect our results of operations and whether forward-looking statements made by us ultimately prove to be accurate. Our actual results, performance and achievements could differ materially from those expressed or implied in these forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether from new information, future events or otherwise.

NOTE REGARDING DOLLAR AMOUNTS

In this quarterly report, all dollar amounts are expressed in thousands, except for per-share amounts.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide the readers of our financial statements with a narrative discussion about our business. The MD&A is provided as a supplement to and should be read in conjunction with our financial statements and the accompanying notes.

Executive Summary

We are reporting net sales of \$130,803 for the three months ended September 30, 2014, which represents a slight increase from the \$129,261 reported in the comparable prior period. Gross profit for the three months ended September 30, 2014 was \$27,651 and our gross margin was 21.1% as compared to gross profit of \$33,734 and gross margin of 26.1% in the comparable prior period. Our selling, general and administrative costs ("SG&A") for the three months ended September 30, 2014 increased to \$18,283 from \$15,764 which we reported in the prior period. Our net income decreased to \$4,828, or \$0.17 per diluted share, compared to net income of \$11,335, or \$0.40 per diluted share in the prior period.

Our financial position as of September 30, 2014 remains strong, as we had cash and cash equivalents and short-term investments of \$42,474, working capital of \$160,961 and shareholders' equity of \$234,987.

Our business is separated into three principal segments: Human Health, Pharmaceutical Ingredients and Performance Chemicals.

Products that fall within the Human Health segment include finished dosage form generic drugs and nutraceutical products. On April 30, 2014, Rising acquired 100% of the issued and outstanding membership interests of PACK. PACK, a national marketer and distributor of generic prescription and over-the-counter pharmaceutical products, has headquarters in Buffalo Grove, Illinois, a suburb of Chicago, Illinois. We believe that the acquisition of PACK by Rising will advance Aceto's strategy to expand further into the finished dosage pharmaceutical business. PACK and Rising have very similar business models including operating their businesses in collaboration with selected pharmaceutical development partners and with networks of finished dosage form manufacturing partners, focusing on niche products and selling generic prescription products and over-the-counter pharmaceutical products under their respective labels to leading wholesalers, chain drug stores, distributors and mass market merchandisers. The strategically important and complementary business combination of PACK with our Rising business further increases the mix of higher margin finished dosage generic pharmaceuticals in Aceto's revenue base and doubles the size of our development pipeline of new generic products. In addition, the acquisition establishes Aceto in branded generics for the first time.

Aceto supplies the raw materials used in the production of nutritional and packaged dietary supplements, including vitamins, amino acids, iron compounds and biochemicals used in pharmaceutical and nutritional preparations. After we identified a positive change in the attitudes of Europeans towards nutritional products, we globalized this business, creating an operating company headquartered in Germany, Aceto Health Ingredients GmbH. This globally structured business then became the model for all of our business segments, providing international reach and perspective for our customers.

The Pharmaceutical Ingredients segment has two product groups: Active Pharmaceutical Ingredients ("APIs") and Pharmaceutical Intermediates.

As the use of generic drugs has grown significantly over the years, we believe Aceto's presence in this market also increased, both domestically and internationally. We supply APIs to many of the major generic drug companies, who we believe view Aceto as a valued partner in their effort to develop and market generic drugs. The process of introducing a new API from pipeline to market spans a number of years and begins with Aceto partnering with a generic pharmaceutical manufacturer and jointly selecting an API, several years before the expiration of a composition of matter patent, for future generisizing. We then identify the appropriate supplier, and concurrently utilizing our global technical network, ensure they meet the highest standards of quality to comply with regulations. The generic pharmaceutical company will submit the Abbreviated New Drug Application ("ANDA") for U.S. Food and Drug Administration ("FDA") approval or European-equivalent approval. The introduction of the API to market occurs after all the development testing has been completed and the ANDA or European-equivalent is approved and the patent expires or is deemed invalid. Aceto has a robust pipeline of APIs poised to reach commercial levels, both in the United States and Europe.

Aceto has long been a supplier of pharmaceutical intermediates, the complex chemical compounds that are the building blocks used in producing APIs. These are the critical components of all drugs, whether they are already on the market or currently undergoing clinical trials. Faced with significant economic pressures as well as ever-increasing regulatory barriers, the innovative drug companies look to Aceto as a source for high quality intermediates. Aceto

employs, on occasion, the same second source strategy for our pharmaceutical intermediates business that we use in our API business. Historically, pharmaceutical manufacturers have had one source for the intermediates needed to produce their products. Utilizing our global sourcing, regulatory support and quality assurance network, Aceto works with the large, global pharmaceutical companies, sourcing lower cost, quality pharmaceutical intermediates that will meet the same high level standards adhered to by their current commercial products.

According to an IMS Health press release on April 15, 2014, a new report, entitled, Medicine Use and Shifting Costs of Healthcare: A Review of the Use of Medicines in the United States in 2013, “found that total dollars spent on medications in the U.S. reached \$329.2 billion last year, up 3.2 percent on a nominal basis and a rebound from the 1.0 percent decline in 2012. Primary drivers include the reduced impact of patent expiries, price increases, higher spending on innovative new medicines, and greater use by patients of the healthcare system. Patent expiries in 2013 contributed \$19 billion to lower medicine spending, compared with \$29 billion the previous year.”

The Performance Chemicals segment includes specialty chemicals and agricultural protection products.

Aceto is a major supplier to many different industrial segments that require outstanding performance from chemical raw materials and additives. We provide chemicals which make plastics, surface coatings, textiles, fuels and lubricants to perform to their designed capabilities. These additive specialty products include antioxidants, photo initiators, catalysts, curatives, brighteners and adhesion promoters. Aceto is a supplier of chemicals to ecofriendly technologies. For example, we supply ultraviolet photo initiators which allow inks and coatings to be cured by ultraviolet light instead of solvents, as well as curing agents and optical brighteners for powder (non-solvent) coatings. These growing technologies are critical in protecting and enhancing the world’s ecology. We also provide specialty chemicals for the food, beverage and fragrance industries. Aceto’s raw materials are also used in sophisticated technology products, such as high-end electronic parts (circuit boards and computer chips) and binders for specialized rocket fuels. Aceto is also a leader in the supply of diazos and couplers to the paper and film industries. Specific end uses for these products include microfilm, blueprints and photo tooling of printed circuit boards. We also provide organic intermediates and colorants including automotive, industrial and residential coatings, dyes for colorful textiles for both natural and synthetic fibers, FDA-approved colorants for foods and pharmaceuticals and high quality agrochemicals.

According to an October 16, 2014 Federal Reserve Statistical Release, in the third quarter of calendar year 2014, the index for consumer durables, which impacts the Specialty Chemicals business of the Performance Chemicals segment, is expected to grow at an annual rate of 11.2%.

Aceto’s agricultural protection products include herbicides, fungicides and insecticides which control weed growth as well as the spread of insects and microorganisms that can severely damage plant growth. The agricultural world is dependent on a large variety of deterrent products and we believe Aceto has become a valued partner to the global generic agricultural industry by providing superior quality functional products. One of Aceto’s most widely used agricultural protection products is a sprout inhibitor that extends the storage life of potatoes. We work with the large agrochemical distributors to provide alternate sources for key products. Utilizing our global sourcing and regulatory capabilities, we identify and qualify manufacturers either producing the product or with knowledge of the chemistry necessary to produce the product and then file an application with the EPA for a product registration. Aceto has an ongoing working relationship with manufacturers in China and India to determine which of the non-patented, or generic, agricultural protection products they produce can be effectively marketed in the Western world. Over the past several years, we have successfully brought a number of products to market. In addition, we have a strong pipeline, which includes future additions to our product portfolio. The combination of our global sourcing and regulatory capabilities makes the generic agricultural market a niche for us and we will continue to offer new product additions in this market as we move forward. In the National Agricultural Statistics Services release dated June 30, 2014, the total crop acreage planted in the United States in 2014 increased approximately 2.0% to 331 million acres from 325 million acres in 2013. The number of peanut acres planted in 2014 increased 23% from 2013 levels while sugarcane acreage harvested declined 4% from 2013. In addition, the potato acreage harvested in 2014 rose approximately 1% from the 2013 level.

We believe the Company's business strengths are sourcing, regulatory support, quality assurance and marketing and distribution. We distribute more than 1,100 products used principally as finished products or raw materials in the pharmaceutical, nutraceutical, agricultural, coatings and industrial chemical industries. With business operations in nine countries, Aceto's global reach is distinctive in the industry, enabling us to source and supply quality products on a worldwide basis. Leveraging local professionals, we source more than two-thirds of our products from Asia, buying from approximately 500 companies in China and 200 in India.

In this MD&A, we explain our general financial condition and results of operations, including, among other things, the following:

factors that affect our business
our earnings and costs in the periods presented
changes in earnings and costs between periods
sources of earnings
the impact of these factors on our overall financial condition

As you read this MD&A section, refer to the accompanying condensed consolidated statements of income, which present the results of our operations for the three months ended September 30, 2014 and 2013. We analyze and explain the differences between periods in the specific line items of the condensed consolidated statements of income.

Critical Accounting Estimates and Policies

As disclosed in our Form 10-K for the year ended June 30, 2014, the discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. In preparing these financial statements, we were required to make estimates and assumptions that affect the amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We regularly evaluate our estimates including those related to allowances for bad debts, partnered products, inventories, goodwill and indefinite-life intangible assets, long-lived assets, environmental and other contingencies, income taxes and stock-based compensation. We base our estimates on various factors, including historical experience, advice from outside subject-matter experts, and various assumptions that we believe to be reasonable under the circumstances, which together form the basis for our making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. Since June 30, 2014, there have been no significant changes to the assumptions and estimates related to those critical accounting estimates and policies.

RESULTS OF OPERATIONS

Three Months Ended September 30, 2014 Compared to Three Months Ended September 30, 2013

Net Sales by Segment
Three months ended September 30,

Net Sales

Net sales increased \$1,542, or 1.2%, to \$130,803 for the three months ended September 30, 2014, compared with \$129,261 for the prior period. We reported sales increases in our Human Health and Performance Chemicals business segments while our Pharmaceutical Ingredients business segment declined from the prior period.

Human Health

Net sales for the Human Health segment increased by \$10,385 for the three months ended September 30, 2014, to \$49,079, which represents a 26.8% increase over net sales of \$38,694 for the prior period, largely driven by an increase in sales of Rising products of \$16,017 due to new generic product launches during fiscal 2014, as well as the PACK acquisition. On April 30, 2014, Rising acquired 100% of the issued and outstanding membership interests of PACK, which is included in our Human Health segment. This increase was offset by a \$5,632 decline in sales of nutritional products, sold both domestically and abroad due to customers overstocking goods and reducing inventories prior to reordering.

Pharmaceutical Ingredients

Net sales for the Pharmaceutical Ingredients segment decreased by \$10,447 for the three months ended September 30, 2014, to \$37,977, which represents a 21.6% decrease from net sales of \$48,424 for the prior period. The primary reason for the decrease is due to a decline in sales of domestic APIs due to large reorders of a customer launched API that occurred in the first quarter of fiscal 2014. The customer's market success will ultimately dictate our on-going success with respect to this product; therefore we do not expect to see the same volume of business as we did in fiscal 2014 for this product.

Performance Chemicals

Net sales for the Performance Chemicals segment increased to \$43,747 for the three months ended September 30, 2014, an increase of \$1,604 or 3.8%, from net sales of \$42,143 for the prior period. This increase was predominantly due to an increase of \$1,161 in sales of our agricultural protection products, primarily from a rise in sales of an herbicide used on sugar cane.

Gross Profit

Gross profit decreased \$6,083 to \$27,651 (21.1% of net sales) for the three months ended September 30, 2014, as compared to \$33,734 (26.1% of net sales) for the prior period.

Human Health

Human Health segment's gross profit of \$14,541 for the three months ended September 30, 2014 increased \$3,400, or 30.5%, over the prior period. The gross margin of 29.6% was slightly higher than the prior period's gross margin of 28.8%. The increase in gross profit in the Human Health segment relates to increased sales volume of Rising products and the addition of PACK, the acquisition that occurred on April 30, 2014, offset by a decline in gross profit on nutritional products attributable to the related sales volume decrease. Wholesalers and retail drug chains have undergone, and are continuing to undergo, significant consolidation. Gross margin in our generic business has been adversely affected by this consolidation in the industry.

Pharmaceutical Ingredients

Gross profit for the three months ended September 30, 2014 for the Pharmaceutical Ingredients business decreased by \$9,112 or 59.7% over the prior period. The gross margin of 16.2% was also lower than the prior year's gross margin of 31.5%. The decrease in both gross profit and gross margin is predominantly the result of the decrease in the sales volume of reorders of a certain API that occurred in the first quarter of fiscal 2014, which typically yields a significantly higher gross margin.

Performance Chemicals

Gross profit for the Performance Chemicals segment decreased to \$6,960 for the three months ended September 30, 2014, versus \$7,331 for the prior year, a decrease of \$371, or 5.1%. The gross margin at 15.9% for the three months ended September 30, 2014 was also lower than the prior year's gross margin of 17.4%. The decrease in gross margin is due to unfavorable product mix on a certain agricultural protection product.

Selling, General and Administrative Expenses

SG&A increased \$2,519, or 16.0%, to \$18,283 for the three months ended September 30, 2014 compared to \$15,764 for the prior period. As a percentage of sales, SG&A increased from 12.2% to 14.0% for the three months ended September 30, 2014 versus the prior period. On April 30, 2014, Rising acquired 100% of the issued and outstanding membership interests of PACK, thus we had approximately \$2,867 of SG&A related to PACK, during the three months ended September 30, 2014, of which \$1,196 of amortization expense related to acquired intangible assets, where there was no comparable amount in the prior period. In addition, we recorded \$350 related to the UPL litigation settlement, as well as \$213 for separation and relocation costs. The SG&A for the prior period included \$371 of transaction costs related to acquisitions, which did not occur in fiscal 2015.

Research and Development Expenses

Research and development expenses (“R&D”) increased \$191 or 34.5% to \$745 for the three months ended September 30, 2014 compared to \$554 for the prior period. R&D expenses represent investment in our generic finished dosage form product pipeline, which includes both Rising and PACK products. The majority of the R&D expenses are milestone based, which will likely cause fluctuation from quarter to quarter.

Operating Income

For the three months ended September 30, 2014 operating income was \$8,623 compared to \$17,416 in the prior period, a decrease of \$8,793 or 50.5%. This decrease was due to the overall decrease in gross profit of \$6,083 and the increases in SG&A and R&D of \$2,710 from the comparable prior period.

Interest Expense

Interest expense was \$1,036 for the three months ended September 30, 2014, an increase of \$583 from the prior period. The increase is primarily due to higher average loan balance outstanding during the three months ended September 30, 2014, due to the Credit Agreement entered into in connection with the purchase of PACK.

Interest and Other Income, Net

Interest and other income, net was \$58 for the three months ended September 30, 2014, a decrease of \$553 from the prior period, mainly due to increases in unrealized foreign exchange losses.

Provision for Income Taxes

The effective tax rate for the three months ended September 30, 2014 increased to 36.8% compared to 35.5% for the prior period. The increase in the effective tax rate was due to the mix of profits from the higher tax rate jurisdiction of the United States compared to Europe in fiscal 2015.

Liquidity and Capital Resources

Cash Flows

At September 30, 2014, we had \$40,669 in cash, of which \$26,342 was outside the United States, \$1,805 in short-term investments, all of which is held outside the United States and \$108,305 in long-term debt (including the current portion), all of which is in the United States. Working capital was \$160,961 at September 30, 2014 compared to \$157,831 at June 30, 2014. The \$26,342 of cash held outside of the United States is fully accessible to meet any liquidity needs of the countries in which we operate. The majority of the cash located outside of the United States is held by our European operations and can be transferred into the United States. Although these amounts are fully accessible, transferring these amounts into the United States or any other countries could have certain tax consequences. A deferred tax liability will be recognized when we expect that we will recover undistributed earnings of our foreign subsidiaries in a taxable manner, such as through receipt of dividends or sale of the investments. We

intend to indefinitely reinvest these undistributed earnings and have no plan for further repatriation. A portion of our cash is held in operating accounts that are with third party financial institutions. While we monitor daily the cash balances in our operating accounts and adjust the cash balances as appropriate, these cash balances could be impacted if the underlying financial institutions fail or are subject to other adverse conditions in the financial markets. To date, we have experienced no loss or lack of access to cash in our operating accounts.

Our cash position at September 30, 2014 decreased \$2,228 from the amount at June 30, 2014. Operating activities for the three months ended September 30, 2014 used cash of \$899 for this period, as compared to cash provided of \$8,010 for the comparable period. The \$899 was comprised of \$4,828 in net income and \$3,828 derived from adjustments for non-cash items less a net \$9,555 decrease from changes in operating assets and liabilities. The non-cash items included \$3,029 in depreciation and amortization expense, \$456 of earnings on an equity investment in a joint venture, \$40 for deferred income taxes and \$1,129 in non-cash stock compensation expense. Trade accounts receivable increased \$5,894 during the three months ended September 30, 2014, due predominantly to an increase in sales from the fourth quarter of 2014 of Rising products, which typically yield a longer payment term due to industry standards. Inventories decreased by approximately \$6,546 and accounts payable decreased by approximately \$4,357 due primarily to a decrease in inventories on hand for our agricultural protection business as a result of a ramp-up in orders at June 30, 2014 for products that were shipped in the three months ended September 30, 2014. In addition, inventories declined from June 30, 2014 due to an increase in sales of Rising products. Accrued expenses and other liabilities decreased \$5,309 due primarily to a decrease in accrued compensation as fiscal 2014 performance award payments were made in September 2014, as well as timing of income tax payments. These decreases in accrued expenses and other liabilities are offset in part by an increase in price concessions and partnered products liabilities related to increased sales from Rising. Our cash position at September 30, 2013 increased \$1,827 from the amount at June 30, 2013. Operating activities for the three months ended September 30, 2013 provided cash of \$8,010 for the three month period. The \$8,010 was comprised of \$11,335 in net income and \$2,335 derived from adjustments for non-cash items less a net \$5,660 decrease from changes in operating assets and liabilities.

Investing activities for the three months ended September 30, 2014 used cash of \$2,229 for purchases of property and equipment, intangible assets and investments. Investing activities for the three months ended September 30, 2013 used cash of \$412, primarily related to the purchases of property and equipment.

Financing activities for the three months ended September 30, 2014 provided cash of \$2,420 primarily from bank borrowings of \$5,000, proceeds of \$844 received from the exercise of stock options and \$513 of excess income tax benefit on stock option exercises and restricted stock. This was offset by the use of cash of \$2,196 for the repayment of bank borrowings and \$1,741 payment of cash dividends. Financing activities for the three months ended September 30, 2013 used cash of \$6,388 primarily from \$5,816 of repayment of bank borrowings and \$1,665 of payment of cash dividends. This use of cash was offset by \$861 proceeds received from exercise of stock options.

Credit Facilities

We have available credit facilities with certain foreign financial institutions. At September 30, 2014, the Company had available lines of credit with foreign financial institutions totaling \$8,451, all of which is available for borrowing by the respective foreign territories. We are not subject to any financial covenants under these arrangements.

On April 30, 2014, and in connection with the purchase of PACK, we entered into a new Credit Agreement (the "Credit Agreement") with three domestic financial institutions. The Credit Agreement terminates the Credit Agreement, dated December 31, 2010. We may borrow, repay and reborrow during the period ending April 30, 2019, up to but not exceeding at any one time outstanding \$60,000 (the "Revolving Commitment"). The Revolving Commitment provides for (i) Adjusted LIBOR Loans (as defined in the Credit Agreement), (ii) Alternate Base Rate Loans (as defined in the Credit Agreement) or (iii) a combination thereof. As of September 30, 2014, we borrowed Revolving Loans aggregating \$37,000 which loans are Adjusted LIBOR Loans at interest rates ranging from 2.15% to 2.32% at September 30, 2014. The Credit Agreement also allows for the borrowing up to \$70,000 (the "Term Commitment"). The Term Commitment interest may be payable as an (i) Adjusted LIBOR Loan, (ii) Alternate Base Rate Loan, or (iii) a

combination thereof. We borrowed a Term Loan of \$70,000 on April 30, 2014 to partially finance the acquisition of PACK. As of September 30, 2014, the remaining amount outstanding under the amortizing Term Loan is \$68,000 and is payable as an Adjusted LIBOR Loan at an interest rate of 2.23% at September 30, 2014. Proceeds of the Term Commitment and a portion of the proceeds of the Revolving Commitment were used to fund the initial cash consideration for PACK and to repay the outstanding balance of term loans from the Credit Agreement dated December 31, 2010.

The Credit Agreement also provides that commercial letters of credit shall be issued to provide the primary payment mechanism in connection with the purchase of any materials, goods or services by us in the ordinary course of business. At September 30, 2014, we had utilized \$105,032 in bank loans and letters of credit, leaving \$22,968 of this facility unused. The terms of these letters of credit are all less than one year. No material loss is anticipated due to non-performance by the counterparties to these agreements.

The Credit Agreement provides for a security interest in all of our personal property. The Credit Agreement contains several financial covenants including, among other things, maintaining a minimum level of debt service. We are also subject to certain restrictive covenants, including, among other things, covenants governing liens, limitations on indebtedness, limitations on guarantees, sale of assets, sales of receivables, and loans and investments. We were in compliance with all covenants at September 30, 2014.

In conjunction with the Credit Agreement, we entered into an interest rate swap on April 30, 2014 for an additional interest cost of 1.63% on a notional amount of \$25,750, which has been designated as a cash flow hedge. The expiration date of this interest rate swap is April 30, 2019. The remaining balance of this derivative as of September 30, 2014 is \$26,750. Pursuant to the requirements of the Credit Agreement, dated December 31, 2010, we were required to deliver Hedging Agreements (as defined in the agreement) fixing the interest rate on not less than \$20,000 of the term loan at that time. Accordingly, in September 2011, we entered into an interest rate swap for an additional interest cost of 1.91% on a notional amount of \$20,000, which has been designated as a cash flow hedge. The expiration date of this interest rate swap is December 31, 2015. The remaining balance of this derivative as of September 30, 2014 is \$7,250.

Working Capital Outlook

Working capital was \$160,961 at September 30, 2014 versus \$157,831 at June 30, 2014. On June 30, 2011, we entered into a mortgage payable for \$3,947 on our corporate headquarters. This mortgage is secured by the land and building and is being amortized over a period of 20 years. The mortgage, which was modified in October 2013, bears interest at 4.92% as of September 30, 2014 and matures on June 30, 2021.

We continually evaluate possible acquisitions of or investments in businesses that are complementary to our own, and such transactions may require the use of cash. In connection with our agricultural protection business, we plan to continue to acquire product registrations and related data filed with the United States Environmental Protection Agency as well as payments to various task force groups, which could approximate \$3,900 through fiscal 2015.

In September 2014, Rising purchased three ANDAs from Par Pharmaceutical, Inc. The purchase price included \$750 paid at closing plus up to \$5,500 based upon FDA approval of two of the products and launch milestones for all three products. It is anticipated that an additional approximately \$1,900 in development, inventory and other deal costs will be expended in connection with the transaction.

In connection with the PACK acquisition, the purchase agreement provides for a three-year earn-out of up to \$15,000 in cash based on the achievement of certain performance-based targets. As of September 30, 2014, we had accrued \$3,905 related to this contingent consideration.

In accordance with the purchase agreement, as amended, related to the Rising acquisition, \$7,970 of deferred consideration was to be paid by us over a four year period with \$1,500 paid in February 2012, \$1,470 paid in December 2012, \$1,500 paid in February 2014 and \$3,500 to be paid not later than fifty-six days following the fourth anniversary of the closing date of the purchase. The purchase agreement also provides for the payment of additional contingent consideration equal to one-half of the three year cumulative Rising earnings before interest, taxes, depreciation and amortization in excess of \$32,100, up to a maximum of \$6,000. As of September 30, 2014, we had accrued \$5,784 related to this contingent consideration, which will be paid in the next twelve months.

We believe that our cash, other liquid assets, operating cash flows, borrowing capacity and access to the equity capital markets, taken together, provide adequate resources to fund ongoing operating expenditures, the repayment of our

bank loans and the anticipated continuation of cash dividends for the next twelve months.

Impact of Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-15, “Presentation of Financial Statements-Going Concern (Subtopic 205-40).” This ASU provides guidance to determine when and how to disclose going-concern uncertainties in the financial statements. The new standard requires management to assess an entity’s ability to continue as a going concern, and to provide related footnote disclosure in certain circumstances. ASU 2014-15 will be effective for all entities in the first annual period ending after December 15, 2016. Earlier adoption is permitted. ASU 2014-15 will be effective for the Company beginning June 30, 2017. The Company does not believe that this pronouncement will have an impact on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers (Topic 606),” which is the new comprehensive revenue recognition standard that will supersede all existing revenue recognition guidance under U.S. GAAP. The standard’s core principle is that a company will recognize revenue when it transfers promised goods or services to a customer in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. ASU 2014-09 is effective for annual and interim periods beginning on or after December 15, 2016, and early adoption is not permitted. Entities will have the option of using either a full retrospective approach or a modified approach to adopt the guidance. The Company is currently evaluating the impact of adopting this guidance.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk Sensitive Instruments

The market risk inherent in our market-risk-sensitive instruments and positions is the potential loss arising from adverse changes in investment market prices, foreign currency exchange-rates and interest rates.

Investment Market Price Risk

We had short-term investments of \$1,805 at September 30, 2014. Those short-term investments consisted of time deposits. Time deposits are short-term in nature and are accordingly valued at cost plus accrued interest, which approximates fair value.

Foreign Currency Exchange Risk

In order to reduce the risk of foreign currency exchange rate fluctuations, we hedge some of our transactions denominated in a currency other than the functional currencies applicable to each of our various entities. The instruments used for hedging are short-term foreign currency contracts (futures). The changes in market value of such contracts have a high correlation to price changes in the currency of the related hedged transactions. At September 30, 2014, we had foreign currency contracts outstanding that had a notional amount of \$40,534. The difference between the fair market value of the foreign currency contracts and the related commitments at inception and the fair market value of the contracts and the related commitments at September 30, 2014 was not material.

We are subject to risk from changes in foreign exchange rates for our subsidiaries that use a foreign currency as their functional currency and are translated into U.S. dollars. These changes result in cumulative translation adjustments, which are included in accumulated other comprehensive income (loss). On September 30, 2014, we had translation exposure to various foreign currencies, with the most significant being the Euro. The potential loss as of September 30, 2014, resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates amounted to

\$7,873. Actual results may differ.

Interest rate risk

Due to our financing, investing and cash-management activities, we are subject to market risk from exposure to changes in interest rates. We utilize a balanced mix of debt maturities along with both fixed-rate and variable-rate debt to manage our exposure to changes in interest rates. Our financial instrument holdings were analyzed to determine their sensitivity to interest rate changes. In this sensitivity analysis, we used the same change in interest rate for all maturities. All other factors were held constant. If there were an adverse change in interest rates of 10%, the expected effect on net income related to our financial instruments would be immaterial. However, there can be no assurances that interest rates will not significantly affect our results of operations.

In conjunction with the Credit Agreement, we entered into an interest rate swap on April 30, 2014 for an additional interest cost of 1.63% on a notional amount of \$25,750, which has been designated as a cash flow hedge. The expiration date of this interest rate swap is April 30, 2019. The remaining balance of this derivative as of September 30, 2014 is \$26,750. Pursuant to the requirements of the Credit Agreement, dated December 31, 2010, we were required to deliver Hedging Agreements (as defined in the agreement) fixing the interest rate on not less than \$20,000 of the term loan at that time. Accordingly, in March 2011, we entered into an interest rate swap for an additional interest cost of 1.91% on a notional amount of \$20,000, which has been designated as a cash flow hedge. The expiration date of this interest rate swap is December 31, 2015. The remaining balance of this derivative as of September 30, 2014 is \$7,250. The unrealized loss to date associated with these two derivatives, which is recorded in accumulated other comprehensive income in the consolidated balance sheet at September 30, 2014, is \$185. Our interest rate swaps are classified within Level 2 as the fair value of this hedge is primarily based on observable interest rates.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) are designed to provide reasonable assurance that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officer, to allow timely decisions regarding required disclosure. Our chief executive officer and chief financial officer, with assistance from other members of our management, have reviewed the effectiveness of our disclosure controls and procedures as of September 30, 2014 and, based on their evaluation, have concluded that the disclosure controls and procedures were effective as of such date.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during our fiscal quarter ended September 30, 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

As previously described in our Form 10-K for the year ended June 30, 2014, we are subject to various environmental proceedings for which there were no material changes during the three months ended September 30, 2014.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the risk factors disclosed under Part I - “Item 1A. Risk Factors” in our Form 10-K for the year ended June 30, 2014 which could materially adversely affect our business, financial condition, operating results and cash flows. The risks and uncertainties described in our Form 10-K for the year ended June 30, 2014 are not the only ones we face. Additionally, risks and

uncertainties not currently known to us or that we currently deem immaterial also may materially adversely affect our business, financial condition, operating results or cash flows.
