CHIMERA INVESTMENT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Organization

Chimera Investment Corporation (the “Company”) was organized in Maryland on June 1, 2007. The Company commenced operations on November 21, 2007 when it completed its initial public offering. The Company elected to be taxed as a real estate investment trust (“REIT”) under the Internal Revenue Code of 1986, as amended, and regulations promulgated thereunder (the “Code”).

The Company conducts its operations through various subsidiaries including subsidiaries it treats as taxable REIT subsidiaries (“TRS”). In general, a TRS may hold assets and engage in activities that the Company cannot hold or engage in directly and generally may engage in any real estate or non-real estate related business. The Company currently has eight wholly owned direct subsidiaries: Chimera RMBS Whole Pool LLC, and Chimera RMBS LLC formed in June 2009; CIM Trading Company LLC (“CIM Trading”), formed in July 2010; Chimera Funding TRS LLC (“CIM Funding TRS”), a TRS formed in October 2013, Chimera CMBS Whole Pool LLC and Chimera RMBS Securities LLC formed in March 2015; Chimera Insurance Company, LLC formed in July 2015 and Chimera RR Holdings LLC formed in April 2016.

2. Summary of the Significant Accounting Policies

(a) Basis of Presentation and Consolidation

The accompanying consolidated financial statements and related notes of the Company have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). In the opinion of management, all adjustments considered necessary for a fair presentation of the Company's financial position, results of operations and cash flows have been included. Certain prior period amounts have been reclassified to conform to the current period's presentation.

The consolidated financial statements include, the Company's accounts, the accounts of its wholly-owned subsidiaries, and variable interest entities (“VIEs”) in which the Company is the primary beneficiary. All intercompany balances and transactions have been eliminated in consolidation.

The Company uses securitization trusts considered to be VIEs in its securitization and re-securitization transactions. VIEs are defined as entities in which equity investors (i) do not have the characteristics of a controlling financial interest, or (ii) do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The entity that consolidates a VIE is known as its primary beneficiary, and is generally the entity with (i) the power to direct the activities that most significantly impact the VIEs' economic performance, and (ii) the right to receive benefits from the VIE or the obligation to absorb losses of the VIE that could be significant to the VIE. For VIEs that do not have substantial on-going activities, the power to direct the activities that most significantly impact the VIEs' economic performance may be determined by an entity's involvement with the design and structure of the VIE.

The trusts are structured as pass through entities that receive principal and interest on the underlying collateral and distribute those payments to the security holders. The assets held by the securitization entities are restricted in that they can only be used to fulfill the obligations of the securitization entity. The Company's risks associated with its involvement with these VIEs are limited to its risks and rights as a holder of the security it has retained.

Determining the primary beneficiary of a VIE requires judgment. The Company determined that for the securitizations it consolidates, its ownership provides the Company with the obligation to absorb losses or the right to receive benefits from the VIE that could be significant to the VIE. In addition, the Company has the power to direct the activities of the VIEs that most significantly impact the VIEs' economic performance ("power") such as rights to direct servicer activity or the Company was determined to have power in connection with its involvement with the structure and design of the VIE.

The Company's interest in the assets held by these securitization vehicles, which are consolidated on the Company's Statements of Financial Condition, is restricted by the structural provisions of these trusts, and a recovery of the Company's investment in the vehicles will be limited by each entity's distribution provisions. The liabilities of the securitization vehicles, which are also consolidated on the Company's Statements of Financial Condition, are non-recourse to the Company, and can only be satisfied from each securitization vehicle's respective asset pool.

The assets of securitization entities are comprised of residential mortgage backed securities ("RMBS") or residential mortgage loans. See Notes 3, 4 and 8 for further discussion of the characteristics of the securities and loans in the Company's portfolio.

(b) Statements of Financial Condition Presentation

The Company's Consolidated Statements of Financial Condition include both the Company's direct assets and liabilities and the assets and liabilities of consolidated securitization vehicles. Assets of each consolidated VIE can only be used to satisfy the obligations of that VIE, and the liabilities of consolidated VIEs are non-recourse to the Company. The Company is not obligated to provide, nor does it intend to provide, any financial support to these consolidated securitization vehicles. The notes to the consolidated financial statements describe the Company's assets and liabilities including the assets and liabilities of consolidated securitization vehicles. See Note 8 for additional information related to the Company's investments in consolidated securitization vehicles.

(c) Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although the Company's estimates contemplate current conditions and how it expects them to change in the future, it is reasonably possible that actual conditions could be materially different than anticipated in those estimates, which could have a material adverse impact on the Company's results of operations and its financial condition. Management has made significant estimates including in accounting for income recognition and OTTI on Agency and Non-Agency RMBS and IO MBS (Note 3), valuation of Agency MBS and Non-Agency RMBS (Notes 3 and 5), residential mortgage loans (Note 4), securitized debt (Note 7) and derivative instruments (Notes 5 and 9). Actual results could differ materially from those estimates.

(d) Significant Accounting Policies

There have been no significant changes to the Company's accounting policies included in Note 2 to the consolidated financial statements of the Company's Form 10-K for the year ended December 31, 2017, other than the significant accounting policies disclosed below.

Income Taxes

The Company does not have any unrecognized tax positions that would affect its financial statements or require disclosure. No accruals for penalties and interest were necessary as of March 31, 2018 or December 31, 2017.

Fair Value Disclosure

A complete discussion of the methodology utilized by the Company to estimate the fair value of its financial instruments is included in Note 5 to these consolidated financial statements.

(e) Recent Accounting Pronouncements

Income Statement - Reporting Comprehensive Income - (Topic 220)

In February 2018, the FASB issued ASU No. 2018-02, Income Statement - Reporting Comprehensive Income - Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. The amendments in this update allow a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. Consequently, the amendments eliminate the stranded tax effects resulting from the Tax Cuts and Jobs Act and will improve the usefulness of information reported to financial statement users. However, because the amendments only relate to the reclassification of the income tax effects of the

Tax Cuts and Jobs Act, the underlying guidance that requires that the effect of a change in tax laws or rates be included in income from continuing operations is not affected. The amendments in this Update also require certain disclosures about stranded tax effects. The guidance in the ASU is effective for the Company as of January 1, 2019. Early adoption is allowed. The Company is not planning to early adopt and is currently evaluating what impact this update will have on the consolidated financial statements.

Derivatives and Hedging - Targeted improvements to Accounting for Hedging Activities (Topic 815)

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging - Targeted improvements to Accounting for Hedging Activities. This update is issued with the objective of improving the financial reporting of hedging relationships to better portray the economic results of an entity's risk management activities in its financial statements. In addition, the amendments in this update make certain targeted improvements to simplify the application of the hedge accounting guidance in

current GAAP. The guidance in the ASU is effective for the Company as of January 1, 2019. Early adoption is allowed. The Company is not planning to early adopt and is currently evaluating what impact this update will have on the consolidated financial statements.

Business Combinations - (Topic 805)

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations - Clarifying the Definition of a Business. This update clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. Under the current implementation guidance in Topic 805, there are three elements of a business-inputs, processes, and outputs. While an integrated set of assets and activities (collectively referred to as a "set") that is a business usually has outputs, outputs are not required to be present. The amendments in this update provide a screen to determine when a set is not a business. The screen requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. This screen reduces the number of transactions that need to be further evaluated. The Company has adopted this guidance as of January 1, 2018. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements.

Statement of Cash Flows - Restricted Cash - (Topic 230)

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows - Restricted Cash. This update requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in this Update do not provide a definition of restricted cash or restricted cash equivalents. The Company has adopted this guidance as of January 1, 2018. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements.

Statement of Cash Flows - Classification of Certain Cash Receipts and Cash Payments - (Topic 230)

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows - Classification of Certain Cash Receipts and Cash Payments. This update provides guidance on eight specific cash flow issues. The guidance is intended to reduce diversity in practice on those issues across all industries. The Company has adopted this guidance as of January 1, 2018. The adoption of

this guidance did not have a significant impact on the Company's consolidated Statements of Cash Flows.

Financial Instruments - Credit Losses - (Topic 326)

In June 2016, the FASB issued ASU No. 2016-13, Measurement of Credit Losses on Financial Instruments. This update replaces the current model for recognizing credit losses from an incurred credit loss model to a current expected credit loss (CECL) model for instruments measured at amortized cost and requires entities to record allowances for available-for-sale (AFS) debt securities when the fair value of an AFS debt security is below the amortized cost of the asset rather than reduce the carrying amount, as the Company does under the current OTTI model. This update also simplifies the accounting model for purchased credit-impaired debt securities and loans. The changes in the allowances created in accordance with this update will be recorded in earnings. The update also expands the disclosure requirements regarding the Company's assumptions, models, and methods for estimating the expected credit losses. In addition, the Company will disclose the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination. The guidance in the ASU is effective for the Company as of January 1, 2020. Early adoption is allowed, beginning January 1, 2019. The standard requires entities to record a cumulative-effect adjustment to the statement of financial position as of the beginning of the first reporting period in which the guidance is effective. The Company is currently evaluating what impact this update will have on the consolidated financial statements.

Financial Instruments-Overall (Subtopic 825-10)

In January 2016, the FASB issued ASU No. 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities. This update changes how the Company will present changes in the fair value of financial liabilities measured under the fair value option that are attributable to our own credit. Under the updated guidance, the Company will record changes in instrument-specific credit risk for financial liabilities measured under the fair value option in other comprehensive income. The update also requires fair value measurement for equity investments that do not result in consolidation and are not accounted for under the equity method to be measured at fair value with any changes in fair value recognized in net income. The update also eliminates the requirement to disclose the methods and significant assumptions used to estimate the fair value of financial

instruments measured at amortized cost. In addition, the Company will have to use the exit price notion when measuring the fair value of financial instruments measured at amortized cost for disclosure purposes. The Company has adopted this guidance as of January 1, 2018. The adoption of this guidance did not have a significant impact on the Company's consolidated financial statements.

3. Mortgage-Backed Securities

The Company classifies its Non-Agency RMBS as senior, senior IO, subordinated, or subordinated IO. The Company also invests in residential, commercial and IO Agency MBS. Senior interests in Non-Agency RMBS are considered to be entitled to the first principal repayments in their pro-rata ownership interests at the acquisition date. The tables below present amortized cost, fair value and unrealized gain/losses of Company's MBS investments as of March 31, 2018 and December 31, 2017.

Total	\$1,569,727	\$(19,477)	)239	\$1,818,645	\$(107,098)	)336	\$3,388,372	\$(126,575)	)575

At March 31, 2018, the Company did not intend to sell any of its RMBS that were in an unrealized loss position, and it was not more likely than not that the Company would be required to sell these RMBS before recovery of their amortized cost basis, which may be at their maturity. At March 31, 2017, the Company had the intent to sell ten Agency MBS positions collateralized by commercial property which were in an unrealized loss position. These Commercial Agency MBS positions had an unrealized loss of \$2 million at March 31, 2017. Therefore, the Company recorded an other-than-temporary impairment loss for this amount at the quarter ended March 31, 2017. With respect to RMBS held by consolidated VIEs, the ability of any entity to cause the sale by the VIE prior to the maturity of these RMBS is either expressly prohibited, not probable, or is limited to specified events of default, none of which have occurred as of March 31, 2018.

Gross unrealized losses on the Company's Agency residential and commercial MBS (excluding Agency MBS which are reported at fair value with changes in fair value recorded in earnings) were \$97 million and \$41 million as of March 31, 2018 and December 31, 2017, respectively. Given the inherent credit quality of Agency MBS, the Company does not consider any of the current impairments on its Agency MBS to be credit related. In evaluating whether it is more likely than not that it will be required to sell any impaired security before its anticipated recovery, which may be at their maturity, the Company considers the significance of each investment, the amount of impairment, the projected future performance of such impaired securities, as well as the Company's current and anticipated leverage capacity and liquidity position. Based on these analyses, the Company determined that at March 31, 2018 and December 31, 2017, unrealized losses on its Agency MBS were temporary.

Gross unrealized losses on the Company's Non-Agency RMBS (excluding Non-Agency MBS which are reported at fair value with changes in fair value recorded in earnings) were \$572 thousand and \$283 thousand at March 31, 2018 and December 31, 2017, respectively. Based upon the most recent evaluation, the Company does not consider these unrealized losses to be indicative of OTTI and does not believe that these unrealized losses are credit related, but rather are due to other factors. The Company has reviewed its Non-Agency RMBS that are in an unrealized loss position to identify those securities with losses that are other-than-temporary based on an assessment of changes in cash flows expected to be collected for such RMBS, which considers recent bond performance and expected future performance of the underlying collateral.

A summary of the OTTI included in earnings for the quarters ended March 31, 2018 and 2017 are presented below.

	For the Quarter Ended March 31, 2018		March 31, 2017	
			(dollars in thousands)	
Total other-than-temporary impairment losses	\$ (294)		\$(2,713)	
Portion of loss recognized in other comprehensive income (loss)	(864)		(15,988)	
Net other-than-temporary credit impairment losses	\$(1,158)		\$(18,701)	

The following table presents a roll forward of the credit loss component of OTTI on the Company's Non-Agency RMBS for which a portion of loss was recognized in OCI. The table delineates between those securities that are recognizing OTTI for the first time as opposed to those that have previously recognized OTTI.

	For the Quarters Ended March 31, 2018 March 31, 2017 (dollars in thousands)	
Cumulative credit loss beginning balance	\$591,521	\$556,485
Additions:		
Other-than-temporary impairments not previously recognized	1,140	—
Reductions for securities sold or deconsolidated during the period	(173)	(7,443)
Increases related to other-than-temporary impairments on securities with previously recognized other-than-temporary impairments	18	16,726
Reductions for increases in cash flows expected to be collected over the remaining life of the securities	(6,450)	(7,539)
Cumulative credit impairment loss ending balance	\$586,056	\$558,229

Cash flows generated to determine net other-than-temporary credit impairment losses recognized in earnings are estimated using significant unobservable inputs. The significant inputs used to measure the component of OTTI recognized in earnings for the Company's Non-Agency RMBS for the periods reported are summarized as follows:

	For the Quarter Ended March 31, 2018 March 31, 2017	
Loss Severity		
Weighted Average	100%	64%
Range	34% - 132%	63% - 64%
60+ days delinquent

Actual maturities of MBS are generally shorter than the stated contractual maturities. Actual maturities of the Company's MBS are affected by the contractual lives of the underlying mortgages, periodic payments of principal and prepayments of principal. The following tables provide a summary of the fair value and amortized cost of the Company's MBS at March 31, 2018 and December 31, 2017 according to their estimated weighted-average life classifications. The weighted-average lives of the MBS in the tables below are based on lifetime expected prepayment rates using an industry prepayment model for the Agency MBS portfolio and the Company's prepayment assumptions for the Non-Agency RMBS. The prepayment model considers current yield, forward yield, steepness of the interest rate curve, current mortgage rates, mortgage rates of the outstanding loan, loan age, margin, and volatility.

The Non-Agency RMBS portfolio is subject to credit risk. The Non-Agency RMBS portfolio is primarily collateralized by Alt-A first lien mortgages. An Alt-A mortgage is a type of U.S. mortgage that, for various reasons, is considered riskier than A-paper, or prime, and less risky than subprime, the riskiest category. Alt-A interest rates, which are determined by credit risk, therefore tend to be between those of prime and subprime home loans. Typically, Alt-A mortgages are characterized by borrowers with less than full documentation, lower credit scores and higher loan-to-value ratios. At origination of the loan, Alt-A mortgage securities are defined as Non-Agency RMBS where (i) the underlying collateral has weighted average FICO scores between 680 and 720 or (ii) the FICO scores are greater than 720 and RMBS have 30% or less of the underlying collateral composed of full documentation loans. At March 31, 2018 and December 31, 2017, 67% and 66% of the Non-Agency RMBS collateral was classified as Alt-A, respectively. At March 31, 2018 and December 31, 2017, 11% and 13% of the Non-Agency RMBS collateral was classified as prime, respectively. The remaining Non-Agency RMBS collateral is classified as subprime.

The Non-Agency RMBS in the Portfolio have the following collateral characteristics at March 31, 2018 and December 31, 2017.

	March 31, 2018	December 31, 2017
Weighted average maturity (years)	20.5	20.7
Weighted average amortized loan to value ⁽¹⁾	64.3 %	64.4 %
Weighted average FICO ⁽²⁾	697	697
Weighted average loan balance (in thousands)	\$316	\$314
Weighted average percentage owner occupied	83.9 %	84.4 %
Weighted average percentage single family residence	65.6 %	66.3 %
Weighted average current credit enhancement	2.3 %	2.2 %
Weighted average geographic concentration of top four states	CA 31.6 % NY 8.8 % FL 8.4 % NJ 2.7 %	CA 31.7 % NY 8.5 % FL 8.3 % NJ 2.7 %

(1) Value represents appraised value of the collateral at the time of loan origination.

(2) FICO as determined at the time of loan origination.

The table below presents the origination year of the underlying loans related to the Company's portfolio of Non-Agency RMBS at March 31, 2018 and December 31, 2017.

Origination Year	March 31, 2018	December 31, 2017
2003 and prior	5.1 %	3.6 %
2004	5.8 %	4.3 %
2005	18.9 %	20.8 %
2006	43.1 %	38.2 %
2007	25.8 %	30.4 %
2008	0.4 %	1.8 %
2009 and later	0.9 %	0.9 %
Total	100.0 %	100.0 %

Gross realized gains and losses are recorded in "Net realized gains (losses) on sales of investments" on the Company's Consolidated Statements of Operations. The proceeds and gross realized gains and gross realized losses from sales of investments for the quarters ended March 31, 2018 and 2017 are as follows:

	For the Quarter Ended March 31, 2018 (dollars in thousands)
Proceeds from sales	\$20,063
Gross realized gains	—5,187
Gross realized losses	—(20)
Net realized gain (loss)	\$5,167

Included in the gross realized gains for the quarter ended March 31, 2017 in the table above are exchanges of securities with a fair value of \$20 million. The Company exchanged its investment in a re-remic security for the underlying collateral supporting the group related to the exchanged asset. These exchanges were treated as non-cash sales and purchases and resulted in a realized gain of \$5 million, reflected in earnings for the quarter ended March 31, 2017. There were no such exchanges for the quarter ended March 31, 2018.

4. Loans Held for Investment

The Loans held for investment is comprised primarily of loans collateralized by seasoned subprime residential mortgages. Additionally, it includes non-conforming, single family, owner occupied, jumbo, prime residential mortgages.

At March 31, 2018, all Loans held for investment are carried at fair value. See Note 5 for a discussion on how the Company determines the fair values of the Loans held for investment. As changes in the fair value of these loans are reflected in earnings, the Company does not estimate or record a loan loss provision. The total amortized cost of our Loans held for investment was \$13.2 billion and \$13.3 billion as of March 31, 2018 and December 31, 2017, respectively.

The following table provides a summary of the changes in the carrying value of Loans held for investment at fair value at March 31, 2018 and December 31, 2017:

	For the Quarter Ended March 31, 2018 (dollars in thousands)	For the Year Ended December 31, 2017
Balance, beginning of period	\$13,678,263	\$8,753,653
Purchases	369,583	6,539,765
Principal paydowns	(443,755)	(1,788,409)
Sales and settlements	(6,865)	2,876
Net periodic accretion (amortization)	(18,826)	(35,803)
Change in fair value	41,595	206,181
Balance, end of period	\$13,619,995	\$13,678,263

The primary cause of the change in fair value is due to market demand and changes in credit risk of mortgage loans.

Residential mortgage loans

The loan portfolio for all residential mortgages were originated during the following years:

19

Origination Year	March 31, 2018	December 31, 2017	
2002 and prior	7.4	% 7.5	%
2003	6.7	% 6.7	%
2004	14.5	% 14.6	%
2005	20.1	% 20.4	%
2006	23.1	% 23.1	%
2007	18.8	% 19.0	%
2008	6.0	% 6.0	%
2009	0.8	% 0.7	%
2010 and later	2.6	% 2.0	%
Total	100.0	% 100.0	%

The following table presents a summary of key characteristics of the residential loan portfolio at March 31, 2018 and December 31, 2017:

	March 31, 2018	December 31, 2017	
Number of loans	147,720	149,172	
Weighted average maturity (years)	19.2	18.8	
Weighted average loan to value ⁽¹⁾	87.7	% 88.0	%
Weighted average FICO ⁽¹⁾	631	631	
Weighted average loan balance (in thousands)	\$ 91	\$ 91	
Weighted average percentage owner occupied	94.2	% 95.0	%
Weighted average percentage single family residence	86.2	% 86.0	%

	FL 7.2	% FL 7.2	%
	OH 6.0	% OH 6.1	%
	PA 5.6	% PA 5.6	%
	NY 5.6	% VA 5.5	%

(1) As provided by the Trustee.

The following table summarizes the outstanding principal balance of the residential loan portfolio which are 30 days delinquent and greater as reported by the servicer at March 31, 2018 and December 31, 2017.

	30 Days Delinquent (dollars in thousands)	60 Days Delinquent	90+ Days Delinquent	Bankruptcy	Foreclosure	REO	Total	Unpaid Principal/Notional
March 31, 2018	\$957,935	\$327,238	\$443,963	\$280,238	\$225,306	\$31,888	\$2,266,568	\$13,424,680
% of Unpaid Principal Balance	7.1%	2.4%	3.3%	2.1%	1.7%	0.2%	16.9%	
December 31, 2017	\$888,535	\$353,810	\$435,876	\$272,778	\$200,376	\$31,008	\$2,182,383	\$13,525,820
% of Unpaid Principal	6.6%	2.6%	3.2%	2.0%	1.5%	0.2%	16.1%	

Balance

The fair value of residential mortgage loans 90 days or more past due was \$585 million and \$577 million as of March 31, 2018 and December 31, 2017, respectively.

Real estate owned

20

Real estate owned (“REO”) represents properties which the Company has received the legal title of the property to satisfy the outstanding loan. REO is re-categorized from loan to REO when the Company takes legal title of the property. REO assets are measured and reported at the estimated fair value less the estimated cost to sell at the end of each reporting period. At the time the asset is re-categorized, any difference between the previously recorded loan balance and the carrying value of the REO at the time the Company takes legal title of the property, is recognized as a loss. All REO assets of the Company are held-for-sale and it is the Company’s intention to sell the property in the shortest time possible to maximize their return and recovery on the previously recorded loan. The carrying value of REO assets at March 31, 2018 and December 31, 2017 was \$12 million and \$10 million, respectively, and were recorded in Other Assets on the Company’s consolidated statements of financial condition.

5. Fair Value Measurements

The Company applies fair value guidance in accordance with GAAP to account for its financial instruments. The Company categorizes its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument. Financial assets and liabilities recorded at fair value on the Consolidated Statements of Financial Condition or disclosed in the related notes are categorized based on the inputs to the valuation techniques as follows:

Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets and liabilities in active markets.

Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 – inputs to the valuation methodology are unobservable and significant to fair value.

Fair value measurements categorized within Level 3 are sensitive to changes in the assumptions or methodology used to determine fair value and such changes could result in a significant increase or decrease in the fair value. Any changes to the valuation methodology are reviewed by management to ensure the changes are appropriate. As markets and products evolve and the pricing for certain products becomes more transparent, the Company will continue to refine its valuation methodologies. The methodology utilized by the Company for the periods presented is unchanged. The methods used to produce a fair value calculation may not be indicative of net realizable value or reflective of future fair values. Furthermore, the Company believes its valuation methods are appropriate and consistent with other market participants. Using different methodologies, or assumptions, to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. The Company uses inputs that are current as of the measurement date, which may include periods of market dislocation, during which price transparency may be reduced.

During times of market dislocation, the observability of prices and inputs can be difficult for certain investments. If third party pricing services are unable to provide a price for an asset, or if the price provided by them is deemed unreliable by the Company, then the asset will be valued at its fair value as determined by the Company without validation to third-party pricing. Illiquid investments typically experience greater price volatility as an active market does not exist. Observability of prices and inputs can vary significantly from period to period and may cause instruments to change classifications within the three level hierarchy.

A description of the methodologies utilized by the Company to estimate the fair value of its financial instruments by instrument class follows:

Agency MBS and Non-Agency RMBS

The Company determines the fair value of all of its investment securities based on discounted cash flows utilizing an internal pricing model that incorporates factors such as coupon, prepayment speeds, loan size, collateral composition, borrower characteristics, expected interest rates, life caps, periodic caps, reset dates, collateral seasoning, delinquency, expected losses, expected default severity, credit enhancement, and other pertinent factors. To corroborate that the estimates of fair values generated by these internal models are reflective of current market prices, the Company compares the fair values generated by the model to non-binding independent prices provided by two independent third party pricing services. For certain highly liquid asset classes, such as Agency fixed-rate pass-through bonds, the Company's valuations are also compared to quoted prices for To-Be-Announced ("TBA") securities.

Each quarter the Company develops thresholds which are determined utilizing current bid/ask spreads, liquidity, price volatility and other factors as appropriate. If internally developed model prices differ from the independent prices provided by greater than a market derived predetermined threshold for the period, the Company highlights these differences for further review, both internally and with the third party pricing service. The Company obtains the inputs used by the third party pricing services and compares them to the Company's inputs. The Company updates its own inputs if the Company determines the third party pricing inputs more accurately reflect the current market environment. If the Company believes that its internally developed inputs more accurately reflect the current market environment, it will request that the third party pricing service review market factors that may not have been considered by the third party pricing service and provide updated prices. The Company reconciles and resolves all pricing differences in excess of the predetermined thresholds before a final price is established. At March 31, 2018, fourteen investment holdings with an internally developed fair value of \$177 million had a difference between the model generated prices and third party prices provided in excess of the derived predetermined threshold for the period. The internally developed prices were \$6 million lower than the third party prices provided of \$183 million. After review and discussion, the Company affirmed and valued the investments at the lower internally developed prices. No other differences were noted at March 31, 2018 in excess of the derived predetermined threshold for the period. At December 31, 2017, four investment holdings with an internally developed fair value of \$25 million had a difference between the model generated prices and third party prices provided in excess of the derived predetermined threshold for the period. The internally developed prices were \$3 million lower than the third party prices provided of \$28 million. After review and discussion, the Company affirmed and valued the investments at the lower internally developed prices.

The Company's estimate of prepayment, default and severity curves all involve judgment and assumptions that are deemed to be significant to the fair value measurement process, which renders the resulting Non-Agency RMBS fair value estimates Level 3 inputs in the fair value hierarchy. As the fair values of Agency MBS are more observable, these investments are classified as level 2 in the fair value hierarchy.

Loans Held for Investment

Loans consisting of seasoned subprime residential mortgage loans:

The Company estimates the fair value of its Loans held for investment consisting of seasoned subprime residential mortgage loans on a loan by loan basis using an internally developed model which compares the loan held by the Company with a loan currently offered in the market. The loan price is adjusted in the model by considering the loan factors which would impact the value of a loan. These loan factors include: loan coupon as compared to coupon currently available in the market, FICO, loan-to-value ratios, delinquency history, owner occupancy, and property type, among other factors. A baseline is developed for each significant loan factor and adjusts the price up or down depending on how that factor for each specific loan compares to the baseline rate. Generally, the most significant impact on loan value is the loan interest rate as compared to interest rates currently available in the market and delinquency history. These two factors are based on relevant observable inputs.

The Company also monitors market activity to identify trades which may be used to compare internally developed prices; however, as the portfolio of loans held at fair value is a seasoned subprime pool of mortgage loans, comparable loan pools are not common or directly comparable. There are limited transactions in the market place to develop a comprehensive direct range of values.

The Company reviews the fair values generated by the model to determine whether prices are reflective of the current market by corroborating its estimates of fair value by comparing the results to non-binding independent prices provided by two independent third party pricing services for the loan portfolio. Each quarter the Company develops thresholds which are determined utilizing the securitization market.

If the internally developed fair values of the loan pools differ from the independent prices provided by greater than a predetermined threshold for the period, the Company highlights these differences for further review, both internally and with the third party pricing service. The Company obtains certain inputs used by the third party pricing services and evaluates them for reasonableness. The Company updates its own model if the Company determines the third party pricing inputs more accurately reflect the current market environment or observed information from the third party vendors. If the Company believes that its internally developed inputs more accurately reflect the current market environment, it will request that the third party pricing service review market factors that may not have been considered by the third party pricing service. The Company reconciles and resolves all pricing differences in excess of the predetermined thresholds before a final price is established.

At March 31, 2018, the internally developed fair values of loan pools of \$753 million had a difference between the model generated prices and third party prices provided in excess of the derived predetermined threshold for the period. The internally developed prices were \$23 million lower than the third party prices provided of \$776 million. After review and discussion, the

Company affirmed and valued the investments at the lower internally developed prices. At December 31, 2017, there were no pricing differences in excess of the predetermined thresholds between the model generated prices and third party prices.

The Company's estimates of fair value of Loans held for investment involve management judgment and assumptions that are deemed to be significant to the fair value measurement process, which renders the resulting fair value estimates level 3 inputs in the fair value hierarchy.

Loans collateralized by jumbo, prime residential mortgages:

The loans collateralized by jumbo, prime residential mortgages are carried at fair value. The loans are held as part of a consolidated Collateralized Financing Entity ("CFE"). A CFE is a variable interest entity that holds financial assets, issues beneficial interests in those assets and has no more than nominal equity and the beneficial interests have contractual recourse only to the related assets of the CFE. Accounting guidance for CFEs allow the Company to elect to measure the CFE's financial assets using the fair value of the CFE's financial liabilities as the fair values of the financial liabilities of the CFE are more observable. Therefore, the fair value of the loans collateralized by jumbo, prime residential mortgages is based on the fair value of the financial liabilities. See discussion of the fair value of Securitized Debt, collateralized by Loans Held for Investment at fair value below.

As the more observable financial liabilities are considered level 3 in the fair value hierarchy, the Loans collateralized by jumbo, prime residential mortgages are also level 3 in the fair value hierarchy.

Securitized Debt, collateralized by Non-Agency RMBS

The Company carries securitized debt, collateralized by Non-Agency RMBS at the principal balance outstanding plus unamortized premiums, less unaccreted discounts recorded in connection with the financing of the loans or RMBS with third parties. The Company estimates the fair value of securitized debt, collateralized by Non-Agency RMBS by estimating the future cash flows associated with the underlying assets collateralizing the secured debt outstanding. The Company models the fair value of each underlying asset by considering, among other items, the structure of the underlying security, coupon, servicer, delinquency, actual and expected defaults, actual and expected default severities, reset indices, and prepayment speeds in conjunction with market research for similar collateral performance and management's expectations of general economic conditions in the sector and other economic factors. This process, including the review process, is consistent with the process used for Agency MBS and Non-Agency RMBS using internal models. For further discussion of the valuation process and benchmarking process, see Agency MBS and Non-Agency RMBS discussion herein.

The Company's estimates of fair value of securitized debt, collateralized by Non-Agency RMBS involve management's judgment and assumptions that are deemed to be significant to the fair value measurement process, which renders the resulting fair value estimates level 3 inputs in the fair value hierarchy.

Securitized Debt, collateralized by Loans Held for Investment

The process for determining the fair value of securitized debt, collateralized by loans held for investment is based on discounted cash flows utilizing an internal pricing model that incorporates factors such as coupon, prepayment speeds, loan size, collateral composition, borrower characteristics, expected interest rates, life caps, periodic caps, reset dates, collateral seasoning, expected losses, expected default severity, credit enhancement, and other pertinent factors. This process, including the review process, is consistent with the process used for Agency MBS and Non-Agency RMBS using internal models. For further discussion of the valuation process and benchmarking process, see Agency MBS and Non-Agency RMBS discussion herein.

The Company's estimates of fair value of securitized debt, collateralized by loans held for investment involve management's judgment and assumptions that are deemed to be significant to the fair value measurement process, which renders the resulting fair value estimates level 3 inputs in the fair value hierarchy.

Fair value option

The table below shows the unpaid principal, fair value and impact of change in fair value on each of the financial instruments carried with fair value option as of March 31, 2018 and December 31, 2017 respectively:

23

March 31, 2018 (dollars in thousands)				
	Unpaid Principal/ Notional	Fair Value	Quarter to Date Gain/(Loss) on Change in Fair Value	
Assets:				
Non-agency RMBS

Derivatives				
Interest Rate Swaps and Swaptions				

The Company uses clearing exchange market prices to determine the fair value of its exchange cleared interest rate swaps. For bi-lateral swaps, the Company determines the fair value based on the net present value of expected future

cash flows on the swap. The Company uses option pricing model to determine the fair value of its swaptions. For bi-lateral swaps and swaptions, the Company compares its own estimate of fair value with counterparty prices to evaluate for reasonableness. Both the clearing exchange and counter-party pricing quotes, incorporate common market pricing methods, including a spread measurement to the Treasury yield curve or interest rate swap curve as well as underlying characteristics of the particular contract. Interest rate swaps and swaptions are modeled by the Company by incorporating such factors as the term to maturity, swap curve, overnight index swap rates, and the payment rates on the fixed portion of the interest rate swaps. The Company has classified the characteristics used to determine the fair value of interest rate swaps and swaptions as Level 2 inputs in the fair value hierarchy.

Treasury Futures

The fair value of Treasury futures is determined by quoted market prices in an active market. The Company has classified the characteristics used to determine the fair value of Treasury futures as Level 1 inputs in the fair value hierarchy.

Repurchase Agreements

Repurchase agreements are collateralized financing transactions utilized by the Company to acquire investment securities. Due to the short term nature of these financial instruments, the Company estimates the fair value of these repurchase agreements using the contractual obligation plus accrued interest payable.

Short-term Financial Instruments

The carrying value of cash and cash equivalents, accrued interest receivable, dividends payable, payable for investments purchased and accrued interest payable are considered to be a reasonable estimate of fair value due to the short term nature and low credit risk of these short-term financial instruments.

The Company's financial assets and liabilities carried at fair value on a recurring basis, including the level in the fair value hierarchy, at March 31, 2018 and December 31, 2017 are presented below.

March 31, 2018 (dollars in thousands)

There were no transfers in or out from Level 3, during the quarter ended March 31, 2018. There were \$6 million of IOs transferred to Level 3 and no transfers out from Level 3 for the year ended December 31, 2017. The primary cause of the changes in fair value of the loans and the securitized debt are due to market demand for these instruments and

changes in credit risk of the portfolio.

The significant unobservable inputs used in the fair value measurement of the Company's Non-Agency RMBS and securitized debt are the weighted average discount rates, constant prepayment speed ("CPR"), cumulative default rate, and the loss severity.

Constant Prepayment Rates

For securitized debt carried at fair value issued at a premium, as prepayment speeds increase, the amount of interest expense the Company recognizes decreases as the issued premium on the debt amortizes faster than expected. Conversely, decreases in prepayment speeds result in increased expense and can extend the period over which the Company amortizes the premium.

For debt issued at a discount, as prepayment speeds increase, the amount of interest the Company expenses increases from the acceleration of the accretion of the discount into interest expense. Conversely, decreases in prepayment speeds result in decreased expense as the accretion of the discount into interest expense occurs over a longer period.

Constant Default Rates

Cumulative default rates represent an annualized rate of default on a group of mortgages. The constant default rate (“CDR”) represents the percentage of outstanding principal balances in the pool that are in default, which typically equates to the home being past 60-day and 90-day notices and in the foreclosure process. When default rates increase, expected cash flows on the underlying collateral decreases. When default rates decrease, expected cash flows on the underlying collateral increases.

Loss Severity

Loss severity rates reflect the amount of loss expected from a foreclosure and liquidation of the underlying collateral in the mortgage loan pool. When a mortgage loan is foreclosed the collateral is sold and the resulting proceeds are used to settle the outstanding obligation. In many circumstances, the proceeds from the sale do not fully repay the outstanding obligation. In these cases, a loss is incurred by the lender. Loss severity is used to predict how costly future losses are likely to be. An increase in loss severity results in a decrease in expected future cash flows. A decrease in loss severity results in an increase in expected future cash flows.

Discount Rate

The discount rate refers to the interest rate used in the discounted cash flow analysis to determine the present value of future cash flows. The discount rate takes into account not just the time value of money, but also the risk or uncertainty of future cash flows. An increased uncertainty of future cash flows results in a higher discount rate. The discount rate used to calculate the present value of the expected future cash flows is based on the discount rate implicit in the security as of the last measurement date. As discount rates move up, the discounted cash flows are reduced.

Sensitivity of Significant Inputs – Non-Agency RMBS and securitized debt, collateralized by loans held for investment

Prepayment speeds, as reflected by the CPR, vary according to interest rates, the type of financial instrument, conditions in financial markets, and other factors, none of which can be predicted with any certainty. In general, when interest rates rise, it is relatively less attractive for borrowers to refinance their mortgage loans, and as a result, prepayment speeds tend to decrease. When interest rates fall, prepayment speeds tend to increase. For RMBS investments purchased at a premium, as prepayment speeds increase, the amount of income the Company earns decreases as the purchase premium on the bonds amortizes faster than expected. Conversely, decreases in prepayment speeds result in increased income and can extend the period over which the Company amortizes the purchase premium. For RMBS investments purchased at a discount, as prepayment speeds increase, the amount of income the Company earns increases from the acceleration of the accretion of the discount into interest income. Conversely, decreases in prepayment speeds result in decreased income as the accretion of the purchase discount into interest income occurs over a longer period.

A summary of the significant inputs used to estimate the fair value of Non-Agency RMBS held for investment at fair value as of March 31, 2018 and December 31, 2017 follows:

	March 31, 2018 Significant Inputs				December 31, 2017 Significant Inputs			
	Weighted Average Discount Rate	CPR Range	CDR	Loss Severity	Weighted Average Discount Rate	CPR Range	CDR	Loss Severity
Non-Agency RMBS								
Senior	4.4%	1% -30%	0% -60%	35% -95%	4.4%	1% -45%	0% -55%	35% -89%
Senior interest-only	11.2%	3% -35%	0% -55%	35% -95%	11.2%	3% -25%	0% -50%	35% -95%
Subordinated	5.8%	1% -20%	0% -30%	10% -70%	5.8%	1% -20%	0% -33%	35% -69%
Subordinated interest-only	12.0%	6% -18%	0% -11%	35% -62%	12.0%	6% -22%	0% -9%	35% -63%

A summary of the significant inputs used to estimate the fair value of securitized debt at fair value, collateralized by loans held for investment, as of March 31, 2018 and December 31, 2017 follows:

	March 31, 2018 Significant Inputs				December 31, 2017 Significant Inputs			
	Weighted Average Discount Rate	CPR Range	CDR Range	Loss Severity Range	Weighted Average Discount Rate	CPR Range	CDR Range	Loss Severity Range
Securitized debt at fair value, collateralized by loans held for investment	4.2%	6% - 18%	0% - 7%	35% - 60%	4.1%	6% - 15%	0% - 6%	35% - 60%

All of the significant inputs listed have some degree of market observability, based on the Company's knowledge of the market, information available to market participants, and use of common market data sources. Collateral default and loss severity projections are in the form of "curves" that are updated quarterly to reflect the Company's collateral cash flow projections. Methods used to develop these projections conform to industry conventions. The Company uses assumptions it considers its best estimate of future cash flows for each security.

Constant Prepayment Rates

The prepayment speed specifies the percentage of the collateral balance that is expected to prepay at each point in the future. The prepayment speed is based on factors such as collateral FICO score, loan-to-value ratio, debt-to-income ratio, and vintage on a loan level basis and is scaled up or down to reflect recent collateral-specific prepayment experience as obtained from remittance reports and market data services.

Constant Default Rates

Default vectors are determined from the current "pipeline" of loans that are more than 30 days delinquent, in foreclosure, bankruptcy, or are REO. These delinquent loans determine the first 30 months of the default curve. Beyond month 30, the default curve transitions to a value that is reflective of a portion of the current delinquency pipeline.

Loss Severity

The curve generated to reflect the Company's expected loss severity is based on collateral-specific experience with consideration given to other mitigating collateral characteristics. Characteristics such as seasoning are taken into consideration because severities tend to initially increase on newly originated securities, before beginning to decline as the collateral ages and eventually stabilize. Collateral characteristics such as loan size, loan-to-value, and geographic location of collateral also effect loss severity.

Discount Rate

The discount rates applied to the expected cash flows to determine fair value are derived from a range of observable prices on securities backed by similar collateral. As the market becomes more or less liquid, the availability of these observable inputs will change.

Sensitivity of Significant Inputs – Loans held for investment

The Loans held for investment are comprised primarily of loans collateralized by seasoned subprime residential mortgages. Additionally, it includes non-conforming, single family, owner occupied, jumbo, prime residential mortgages. The significant unobservable inputs used to estimate the fair value of the Loans held for investment collateralized by seasoned subprime residential mortgage loans, as of March 31, 2018 and December 31, 2017 include coupon, FICO score at origination, loan-to-value ratios (LTV), owner occupancy status, and property type. A summary of the significant inputs used to estimate the fair value of Loans held for investment collateralized by seasoned subprime mortgages at fair value as of March 31, 2018 and December 31, 2017 follows:

	March 31, 2018	December 31, 2017
Factor:		
Coupon		
Base Rate	4.8%	4.8%
Actual	6.9%	6.9%
FICO		
Base Rate	636	636
Actual	628	627
Loan-to-value (LTV)		
Base Rate	89%	89%
Actual	88%	88%
Loan Characteristics:		
Occupancy		
Owner Occupied	94%	95%
Investor	2%	1%
Secondary	4%	4%
Property Type		
Single family	86%	87%
Manufactured housing	3%	4%
Multi-family/mixed use/other	11%	9%

The loan factors are generally not observable for the individual loans and the base rates developed by the Company's internal model are subjective and change as market conditions change. The impact of the loan coupon on the value of the loan is dependent on whether the loan is clean or reperforming. A clean loan, with no history of delinquent payments and a relatively high loan interest rate would result in a higher overall value than a reperforming loan which has a history of delinquency. Similarly, a higher FICO score and a lower LTV ratio results in increases in the fair market value of the loan and a lower FICO score and a higher LTV ratio results in a lower value.

Property types also affect the overall loan values. Property types include single family, manufactured housing and multi-family/mixed use and other types of properties. Single family homes represent properties which house only one family unit. Manufactured homes include mobile homes and modular homes. Loan value for properties that are investor or secondary homes have a reduced value as compared to the baseline loan value. Additionally, single family homes will result in an increase to the loan value where manufactured and multi-family/mixed use and other properties will result in a decrease to the loan value, as compared to the baseline.

Financial instruments not carried at fair value

The following table presents the carrying value and fair value, as described above, of the Company's financial instruments not carried at fair value on a recurring basis at March 31, 2018 and December 31, 2017.

29

March 31, 2018 (dollars in thousands)			
	Level in Fair Value Hierarchy	Carrying Amount	Fair Value
Repurchase agreements	2	7,202,924	7,222,536
Securitized debt, collateralized by Non-Agency RMBS	3	194,967	180,099

December 31, 2017 (dollars in thousands)			
	Level in Fair Value Hierarchy	Carrying Amount	Fair Value
Repurchase agreements	2	7,250,452	7,269,193
Securitized debt, collateralized by Non-Agency RMBS	3	205,780	192,259

6. Repurchase Agreements

The interest rates of the Company's repurchase agreements are generally indexed to the one-month, three-month and twelve-month LIBOR rates and re-price accordingly. The repurchase agreements outstanding, weighted average borrowing rates, weighted average remaining maturities, average daily balances and the fair value of collateral pledged as of March 31, 2018 and December 31, 2017 were:

	March 31, 2018	December 31, 2017
Repurchase agreements outstanding secured by:		
Agency MBS (in thousands)	\$3,310,477	\$3,202,056
Non-agency MBS and Loans held for investment (in thousands)	3,892,447	4,048,396
Total:	\$7,202,924	\$7,250,452

Average balance of Repurchase agreements secured by:		
Agency MBS (in thousands)	\$3,253,529	\$3,120,474
Non-agency MBS and Loans held for investment (in thousands)	4,003,519	3,203,700
Total:	\$7,257,048	\$6,324,174

Average borrowing rate of Repurchase agreements secured by:			
Agency MBS	1.77	% 1.47	%
Non-agency MBS and Loans held for investment	3.70	% 3.41	%

Average remaining maturity of Repurchase agreements secured by:		
Agency MBS	32 Days	28 Days
Non-agency MBS and Loans held for investment	90 Days	93 Days

Average original maturity of Repurchase agreements secured by:		
Agency MBS	85 Days	87 Days
Non-agency MBS and Loans held for investment	118 Days	123 Days

MBS pledged as collateral at fair value on Repurchase agreements:		
Agency MBS (in thousands)	\$3,573,750	\$3,450,123
Non-agency MBS and Loans held for investment (in thousands)	5,129,316	5,338,557
Total:	\$8,703,066	\$8,788,680

At March 31, 2018 and December 31, 2017, the repurchase agreements collateralized by MBS and Loans held for investment had the following remaining maturities.

	March 31, 2018	December 31, 2017
	(dollars in thousands)	
Overnight	\$—	\$—
1 to 29 days	4,140,691	4,745,342
30 to 59 days	1,538,864	1,206,769
60 to 89 days	685,239	592,865
90 to 119 days	—	—
Greater than or equal to 120 days	838,130	705,476
Total	\$7,202,924	\$7,250,452

At March 31, 2018, the Company had an amount at risk with Credit Suisse of 12% of its equity related to the collateral posted on repurchase agreements. As of March 31, 2018 the weighted average remaining maturity of the repurchase agreements with Credit Suisse was 27 days and the amount at risk was \$429 million. At December 31, 2017, the Company had an amount at risk with Credit Suisse of 12% of its equity related to the collateral posted on repurchase agreements. As of December 31, 2017, the weighted average maturity of the repurchase agreements with Credit Suisse was 25 days and the amount at risk was \$451 million. There were no other amounts at risk with any other counterparties greater than 10% of the Company's equity as of March 31, 2018 and December 31, 2017.

7. Securitized Debt

All of the Company's securitized debt is collateralized by residential mortgage loans or Non-Agency RMBS. For financial reporting purposes, the Company's securitized debt is accounted for as secured borrowings. Thus, the residential mortgage loans or RMBS held as collateral are recorded in the assets of the Company as Loans held for investment or Non-Agency RMBS and the securitized debt is recorded as a non-recourse liability in the accompanying Consolidated Statements of Financial Condition.

Securitized Debt Collateralized by Non-Agency RMBS

At March 31, 2018 and December 31, 2017 the Company's securitized debt collateralized by Non-Agency RMBS is carried at amortized cost and had a principal balance of \$209 million and \$219 million, respectively. At March 31, 2018 and December 31, 2017, the debt carried a weighted average cost of financing equal to 6.2%. The debt matures between the years 2035 and 2046. None of the Company's securitized debt collateralized by Non-Agency RMBS is callable.

There were no securitized debt collateralized by Non-Agency RMBS acquisitions during the quarters ended March 31, 2018 and 2017.

The following table presents the estimated principal repayment schedule of the securitized debt collateralized by Non-Agency RMBS at March 31, 2018 and December 31, 2017, based on expected cash flows of the residential mortgage loans or RMBS, as adjusted for projected losses on the underlying collateral of the debt. All of the securitized debt recorded in the Company's Consolidated Statements of Financial Condition is non-recourse to the Company.

March 31,	December 31,
2018	2017

(dollars in thousands)

Within One Year	\$36,807	\$ 42,217
One to Three Years	41,072	45,916
Three to Five Years	15,048	16,524
Greater Than Five Years	5,775	4,867
Total	\$98,702	\$ 109,524

Maturities of the Company's securitized debt collateralized by Non-Agency RMBS are dependent upon cash flows received from the underlying loans. The estimate of their repayment is based on scheduled principal payments on the underlying loans.

This estimate will differ from actual amounts to the extent prepayments or loan losses are experienced. See Note 3 for a more detailed discussion of the securities collateralizing the securitized debt.

Securitized Debt Collateralized by Loans Held for Investment

At March 31, 2018 and December 31, 2017 the Company's securitized debt collateralized by loans held for investment had a principal balance of \$9.3 billion and \$9.4 billion, respectively. At March 31, 2018 and December 31, 2017 the total securitized debt collateralized by loans held for investment carried a weighted average cost of financing equal to 4.2%. The debt matures between the years 2023 and 2067.

During the quarter ended March 31, 2018, the Company acquired securitized debt collateralized by loans with an amortized cost balance of \$149 million for \$139 million. This transaction resulted in a net gain on the extinguishment of debt of \$10 million, which is reflected in earnings for the quarter ended March 31, 2018. There were no securitized debt collateralized by loans acquisitions during the quarter ended March 31, 2017.

The following table presents the estimated principal repayment schedule of the securitized debt collateralized by loans held for investment at March 31, 2018 and December 31, 2017, based on expected cash flows of the residential mortgage loans or RMBS, as adjusted for projected losses on the underlying collateral of the debt. All of the securitized debt recorded in the Company's Consolidated Statements of Financial Condition is non-recourse to the Company.

	March 31, 2018	December 31, 2017
	(dollars in thousands)	
Within One Year	\$1,757,615	\$1,819,018
One to Three Years	2,786,131	2,872,572
Three to Five Years	2,093,168	2,140,434
Greater Than Five Years	2,553,825	2,439,872
Total	\$9,190,739	\$9,271,896

Maturities of the Company's securitized debt collateralized by loans held for investment are dependent upon cash flows received from the underlying loans. The estimate of their repayment is based on scheduled principal payments on the underlying loans. This estimate will differ from actual amounts to the extent prepayments or loan losses are experienced. See Note 4 for a more detailed discussion of the loans collateralizing the securitized debt.

Certain of the securitized debt collateralized by loans held for investment contain call provisions at the option of the Company. The following table presents the par value of the callable debt by year at March 31, 2018.

March 31, 2018
(dollars in thousands)
Year Principal
2018 \$755,709
2019 379,794
2020 4,609,773
2021 3,085,861
2022 313,067
Total \$9,144,204

8. Consolidated Securitization Vehicles and Other Variable Interest Entities

Since its inception, the Company has utilized VIEs for the purpose of securitizing whole mortgage loans or re-securitizing RMBS and obtaining long-term, non-recourse financing. The Company evaluated its interest in each VIE to determine if it is the primary beneficiary.

As of March 31, 2018, the Company's Consolidated Statement of Financial Condition includes assets of consolidated VIEs with a carrying value of \$14.9 billion and liabilities with a carrying value of \$9.6 billion. As of December 31, 2017, the Company's Consolidated Statement of Financial Condition includes assets of consolidated VIEs with a carrying value of \$15.0 billion of and liabilities with a carrying value of \$9.6 billion.

VIEs for Which the Company is the Primary Beneficiary

The retained beneficial interests in VIEs for which the Company is the primary beneficiary are typically the subordinated tranches of these re-securitizations and in some cases the Company may hold interests in additional tranches. The table below reflects the assets and liabilities recorded in the Consolidated Statements of Financial Condition related to the consolidated VIEs as of March 31, 2018 and December 31, 2017.

	March 31, 2018	December 31, 2017
	(dollars in thousands)	
Assets:		
Non-Agency RMBS, at fair value	\$ 1,525,337	\$ 1,579,793
Loans held for investment, at fair value	13,220,008	13,263,338
Accrued interest receivable	74,501	75,489
Other assets	58,437	68,844
Liabilities:		
Securitized debt, collateralized by Non-Agency RMBS	\$ 194,967	\$ 205,780
Securitized debt at fair value, collateralized by loans held for investment	9,321,154	9,388,657
Accrued interest payable	34,300	33,870
Other liabilities	3,431	3,513

Income, OTTI and expense amounts related to consolidated VIEs recorded in the Consolidated Statements of Operations is presented in the tables below.

	For the Quarters Ended	
	March 31, 2018	March 31, 2017
	(dollars in thousands)	
Interest income, Assets of consolidated VIEs	\$ 235,026	\$ 192,989
Interest expense, Non-recourse liabilities of VIEs	99,614	82,684
Net interest income	\$ 135,412	\$ 110,305
Total other-than-temporary impairment losses	\$—	\$(413)
Portion of loss recognized in other comprehensive income (loss)	—	(13,467)
Net other-than-temporary credit impairment losses	\$—	\$(13,880)
Servicing fees	\$ 10,411	\$ 9,588

VIEs for Which the Company is Not the Primary Beneficiary

The Company is not required to consolidate VIEs in which it has concluded it does not have a controlling financial interest, and thus is not the primary beneficiary. In such cases, the Company does not have both the power to direct the entities' most significant activities and the obligation to absorb losses or right to receive benefits that could potentially be significant to the VIEs. The Company's investments in these unconsolidated VIEs are carried in Non-Agency RMBS on the Consolidated Statements of Financial Condition and include senior and subordinated bonds issued by the VIEs. The fair value of the Company's investments in each unconsolidated VIEs at March 31, 2018, ranged from less than \$1 million to \$52 million, with an aggregate amount of \$1.2 billion. The fair value of the Company's investments in each unconsolidated VIEs at December 31, 2017, ranged from less than \$1 million to \$52

million, with an aggregate amount of \$1.3 billion. The Company's maximum exposure to loss from these unconsolidated VIEs was \$1.1 billion and \$1.2 billion at March 31, 2018 and December 31, 2017, respectively. The maximum exposure to loss was determined as the amortized cost of the unconsolidated VIE, which represents the purchase price of the investment adjusted by any unamortized premiums or discounts as of the reporting date.

9. Derivative Instruments

In connection with the Company's interest rate risk management strategy, the Company economically hedges a portion of its interest rate risk by entering into derivative financial instrument contracts in the form of interest rate swaps, swaptions, and

Treasury futures. The Company's swaps are used to lock in a fixed rate related to a portion of its current and anticipated payments on its repurchase agreements. The Company typically agrees to pay a fixed rate of interest ("pay rate") in exchange for the right to receive a floating rate of interest ("receive rate") over a specified period of time. Treasury futures are derivatives which track the prices of specific Treasury securities and are traded on an active exchange. It is generally the Company's policy to close out any Treasury futures positions prior to taking delivery of the underlying security. The Company uses Treasury futures to lock in a fixed rate related to a portion of its current and anticipated payments on its repurchase agreements.

The use of derivatives creates exposure to credit risk relating to potential losses that could be recognized if the counterparties to these instruments fail to perform their obligations under the contracts. In the event of a default by the counterparty, the Company could have difficulty obtaining its RMBS or cash pledged as collateral for these derivative instruments. The Company periodically monitors the credit profiles of its counterparties to determine if it is exposed to counterparty credit risk. See Note 14 for further discussion of counterparty credit risk.

The table below summarizes the location and fair value of the derivatives reported in the Consolidated Statements of Financial Condition after counterparty netting and posting of cash collateral as of March 31, 2018 and December 31, 2017.

March 31, 2018

The effect of the Company's derivatives on the Consolidated Statements of Operations is presented below.

Derivative Instruments	Location on Consolidated Statements of Operations and Comprehensive Income	Net gains (losses) on derivatives For the Quarters Ended March 31, 2018 March 31, 2017 (dollars in thousands)	
Interest Rate Swaps	Net unrealized gains (losses) on derivatives	\$84,964	\$6,316
Interest Rate Swaps	Net realized gains (losses) on derivatives	(2,612)	(4,106)
Treasury Futures	Net unrealized gains (losses) on derivatives	(6,587)	(2,568)
Treasury Futures	Net realized gains (losses) on derivatives	16,424	(2,084)
Swaptions	Net unrealized gains (losses) on derivatives	3,042	1,148
Swaptions	Net realized gains (losses) on derivatives	(727)	(3,168)
Total		\$94,504	\$ (4,462)

There were no swaps terminations during the quarters ended March 31, 2018 and 2017.

The weighted average pay rate on the Company's interest rate swaps at March 31, 2018 was 2.14% and the weighted average receive rate was 2.10%. The weighted average pay rate on the Company's interest rate swaps at December 31, 2017 was 1.93% and the weighted average receive rate was 1.53%. The weighted average maturity on the Company's interest rate swaps at March 31, 2018 and December 31, 2017 was 5 years.

Certain of the Company's derivative contracts are subject to International Swaps and Derivatives Association Master Agreements or other similar agreements which may contain provisions that grant counterparties certain rights with respect to the applicable agreement upon the occurrence of certain events such as (i) a decline in stockholders' equity in excess of specified thresholds or dollar amounts over set periods of time, (ii) the Company's failure to maintain its REIT status, (iii) the Company's failure to comply with limits on the amount of leverage, and (iv) the Company's stock being delisted from the New York Stock Exchange (NYSE). Upon the occurrence of any one of items (i) through (iv), or another default under the agreement, the counterparty to the applicable agreement has a right to terminate the agreement in accordance with its provisions. Certain of the Company's interest rate swaps are cleared through a registered commodities exchange. Each of the Company's ISDAs and clearing exchange agreements contains provisions under which the Company is required to fully collateralize its obligations under the interest rate swap agreements if at any point the fair value of the swap represents a liability greater than the minimum transfer amount contained within the agreements. The Company is also required to post initial collateral upon execution of certain of its swap transactions. If the Company breaches any of these provisions, it will be required to settle its obligations under the agreements at their termination values, which approximates fair value. The Company uses clearing exchange market prices to determine the fair value of its interest rate swaps. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net asset position at March 31, 2018 is approximately \$119 million including accrued interest, which represents the maximum amount the Company would receive upon termination, which is fully collateralized.

10. Capital Stock

Preferred Stock

The Company declared dividends to Series A preferred stockholders of \$3 million, or \$0.50 per preferred share during the quarter ended March 31, 2018 and 2017.

In February 2017, the Company issued 13,000,000 shares of 8.00% Series B Fixed-to-Floating Rate Cumulative Redeemable Preferred Stock, par value \$0.01 per share (the "Series B Preferred Stock"), at a public offering price of

\$25.00 per share. The Series B Preferred Stock is redeemable at \$25.00 per share plus accrued and unpaid dividends (whether or not authorized or declared) exclusively at the Company's option commencing in March 30, 2024, subject to the Company's right, under limited circumstances, to redeem the Series B Preferred Stock prior to that date. The initial dividend rate for the Series B Preferred Stock, from and including February 27, 2017, to but not including March 30, 2024, will be equal to 8.00% per annum of the \$25.00 liquidation preference per share (equivalent to the fixed annual rate of \$2.00 per share). On and after March 30, 2024, dividends on the Series B Preferred Stock will accumulate at a percentage of the \$25.00 liquidation preference equal to an annual floating rate of the three-month LIBOR plus a spread of 5.791% per annum. The Series B Preferred Stock is entitled to receive, when and as declared, a dividend at a rate of 8.0% per year on the \$25.00 liquidation preference before the common stock is paid any dividends and is senior to the common stock with respect to distributions upon liquidation, dissolution or winding up. This transaction was completed in February 2017, pursuant to which the Company received proceeds, net of offering costs, of \$314 million.

The Company declared dividends to Series B preferred stockholders of \$7 million, or \$0.50 per preferred share during the quarter ended March 31, 2018.

Common Stock

In February 2018, our Board of Directors reauthorized \$100 million under our share repurchase program (the “Repurchase Program”). Such authorization does not have an expiration date and, at present, there is no intention to modify or otherwise rescind such authorization. Shares of our common stock may be purchased in the open market, including through block purchases, through privately negotiated transactions, or pursuant to any trading plan that may be adopted in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. The timing, manner, price and amount of any repurchases will be determined at our discretion and the program may be suspended, terminated or modified at any time for any reason. Among other factors, the Company intends to only consider repurchasing shares of our common stock when the purchase price is less than the last publicly reported book value per common share. In addition, the Company does not intend to repurchase any shares from directors, officers or other affiliates. The program does not obligate the Company to acquire any specific number of shares, and all repurchases will be made in accordance with Rule 10b-18, which sets certain restrictions on the method, timing, price and volume of stock repurchases.

Pursuant to our Repurchase Program, during the quarter ended March 31, 2018, the Company repurchased approximately 883 thousand of its common stock at an average price of \$16.81 per share for a total of \$15 million.

During the quarter ended March 31, 2018, and 2017, the Company declared regular dividends to common shareholders of \$94 million, or \$0.50 per share.

Earnings per share for the quarter ended March 31, 2018 and 2017, respectively, are computed as follows:

	For the Quarter Ended March 31, March 31, 2018 2017 (dollars in thousands)	
Numerator:		
Net income available to common shareholders	\$ 229,607	\$ 157,524
Effect of dilutive securities:	—	—
Dilutive net income available to common shareholders	\$ 229,607	\$ 157,524
Denominator:		
Weighted average basic shares	187,553,288	187,761,748
Effect of dilutive securities	623,472	433,313
Weighted average dilutive shares	188,176,760	188,195,061
Net income per average share attributable to common stockholders - Basic	\$ 1.22	\$ 0.84
Net income per average share attributable to common stockholders - Diluted	\$ 1.22	\$ 0.84

11. Accumulated Other Comprehensive Income

The following table presents the changes in the components of Accumulated Other Comprehensive Income (“AOCI”) for the quarters ended March 31, 2018 and 2017:

	March 31, 2018	
	(dollars in thousands)	
	Unrealized	
	gains	
	(losses) on

Amounts reclassified from AOCI	13,515	13,515
Net current period OCI	9,605	9,605
Balance as of March 31, 2017	\$ 727,711	\$ 727,711

The following table presents the details of the reclassifications from AOCI for the quarters ended March 31, 2018 and 2017:

Details about Accumulated OCI Components	March 31, 2018 Amounts Reclassified from Accumulated OCI	March 31, 2017 Amounts Reclassified from Accumulated OCI	Affected Line on the Consolidated Statements Of Operations
Unrealized gains and losses on available-for-sale securities	\$ —	\$ 5,186	Net realized gains (losses) on sales of investments
	(1,158)	(18,701)	Net other-than-temporary credit impairment losses
	\$ (1,158)	\$ (13,515)	Income before income taxes
	—	—	Income taxes
	\$ (1,158)	\$ (13,515)	Net of tax

12. Equity Compensation, Employment Agreements and other Benefit Plans

In accordance with the terms of the Company's 2007 Equity Incentive Plan (as amended and restated on December 10, 2015) (the "Incentive Plan"), directors, officers and employees of the Company are eligible to receive restricted stock grants. These awards generally have a restriction period lasting between three and ten years depending on the award, after which time the awards fully vest. During the vesting period, these shares may not be sold. There were approximately 6 million shares available for future grants under the Incentive Plan as of March 31, 2018.

During the first quarter of 2017, the Compensation Committee of the Board of Directors of the Company approved a Stock Award Deferral Program (the "Deferral Program"). Under the Deferral Program, non-employee directors and certain executive officers can elect to defer payment of certain stock awards made pursuant to the Equity Plan. Deferred awards are treated as deferred stock units and paid at the earlier of separation from service or a date elected by the participant. Payments are generally made in a lump sum or, if elected by the participant, in five annual installments. Deferred awards receive dividend equivalents during the deferral period in the form of additional deferred stock units. Amounts are paid at the end of the deferral period by delivery of shares from the Incentive Plan (plus cash for any fractional deferred stock units), less any applicable tax withholdings. Deferral elections do not alter any vesting requirements applicable to the underlying stock award.

During the quarter ended March 31, 2018 and 2017, the Company granted certain of its employees Restricted Stock Units (“RSU”) awards. RSU awards are designed to reward certain employees of the Company for services provided over the previous year. Generally, the RSU awards vest equally over a three-year period beginning from the grant date and will fully vest after three years. The RSU awards are valued at the market price of the Company’s common stock on the grant date and the employees must be employed by the Company on the vesting dates to receive the RSU awards. The Company granted 241 thousand and 112 thousand RSU awards during the quarter ended March 31, 2018 and 2017, with a grant date fair value of \$4 million and \$2 million, respectively, which will be recognized as compensation expense on a straight-line basis over the three year vesting period.

During the quarter ended March 31, 2018 and 2017, the Company granted certain employees 133 thousand and 144 thousand Performance Share Units (“PSU”) awards, respectively. PSU awards are designed to align compensation with the Company’s future performance. The PSU awards include a three year performance period ending on December 31, 2020 and December 31, 2019, respectively. The final number of shares that will vest will be between 0% to 150% of the total PSU awards granted based on the stock performance of the Company as compared to an index of comparable financial institutions and will cliff vest at the end of the performance period. The PSU awards are measured at fair value on the grant date which will be recognized as compensation expense ratably over the three-year vesting period. Fair value is determined using a Monte Carlo valuation model developed to value the specific features of the PSU awards, including market based conditions. Inputs into the model include the Company’s historical volatility, the peer average historical volatility, and the correlation coefficient of the volatility. In addition, inputs also included the share price at the beginning of the measurement period and an estimated total shareholder return for both the Company and the peer group of comparable financial institutions. Based on the model results, the 133 thousand PSU awards granted during 2018 had a grant date value of \$2 million that will cliff vest on December 31, 2020. The 180 thousand PSU awards granted during 2017 had a grant date value of \$3 million which will cliff vest on December 31, 2019.

The Company recognized stock based compensation expenses of \$2 million and \$1 million for the quarters ended March 31, 2018 and 2017, respectively.

The Company also maintains a qualified 401(k) plan. The plan is a retirement savings plan that allows eligible employees to contribute a portion of their wages on a tax-deferred basis under Section 401(k) of the Code. Employees may contribute, through payroll deductions, up to \$18,000 if under the age of 50 years and an additional \$6,000 “catch-up” contribution for employees 50 years or older. The Company matches 100% of the first 6% of the eligible compensation deferred by employee contributions. The employer funds the 401(k) matching contributions in the form of cash, and participants may direct the Company match to an investment of their choice. The benefit of the Company’s contributions vests immediately. Generally, a participating employee is entitled to distributions from the plans upon termination of employment, retirement, death or disability. The 401(k) expense related to the Company’s qualified plan for the quarters ended March 31, 2018 and 2017 was \$114 thousand and \$112 thousand, respectively.

13. Income Taxes

For the quarter ended March 31, 2018 and year ended December 31, 2017, the Company qualified to be taxed as a REIT under Code Sections 856 through 860. As a REIT, the Company is not subject to federal income tax to the extent that it makes qualifying distributions of taxable income to its stockholders. To maintain qualification as a REIT, the Company must distribute at least 90% of its annual REIT taxable income to its shareholders and meet certain other requirements such as assets it may hold, income it may generate and its shareholder composition. It is generally the Company’s policy to distribute to its shareholders all of the Company’s taxable income.

The state and local tax jurisdictions to which the Company is subject to tax-filing obligations, recognize the Company’s status as a REIT, and therefore, the Company generally does not pay income tax in such jurisdictions. The Company may, however, be subject to certain minimum state and local tax filing fees and its TRSs are subject to

federal, state and local taxes. There were no significant income tax expenses for the quarter ended March 31, 2018 and the year ended December 31, 2017. On December 22, 2017, H.R. 1, informally known as the Tax Cuts and Jobs Act (the "TCJA") was enacted. We continue to analyze and monitor the application of the TCJA to our business.

In general, cash dividends declared by the Company will be considered ordinary income to stockholders for income tax purposes. From time to time, a portion of the Company's dividends may be characterized as capital gains or return of capital distributions.

The Company's effective tax rate differs from its combined federal, state and city corporate statutory tax rate primarily due to the deduction of dividend distributions required to be paid under Code Section 857(a).

The Company's 2016, 2015 and 2014 federal, state and local tax returns remain open for examination.

14. Credit Risk and Interest Rate Risk

The Company's primary components of market risk are credit risk and interest rate risk. The Company is subject to interest rate risk in connection with its investments in Agency MBS and Non-Agency RMBS, residential mortgage loans, borrowings under repurchase agreements and securitized debt. When the Company assumes interest rate risk, it attempts to minimize interest rate risk through asset selection, hedging and matching the income earned on mortgage assets with the cost of related financing.

The Company attempts to minimize credit risk through due diligence, asset selection and portfolio monitoring. The Company has established a whole loan target market including prime and subprime borrowers, Alt-A documentation, geographic diversification, owner-occupied property, and moderate loan-to-value ratios. These factors are considered to be important indicators of credit risk.

By using derivative instruments and repurchase agreements, the Company is exposed to counterparty credit risk if counterparties to the contracts do not perform as expected. If a counterparty fails to perform on a derivative hedging instrument, the Company's counterparty credit risk is equal to the amount reported as a derivative asset on its balance sheet to the extent that amount exceeds collateral obtained from the counterparty or, if in a net liability position, the extent to which collateral posted exceeds the liability to the counterparty. The amounts reported as a derivative asset/(liability) are derivative contracts in a gain/(loss) position, and to the extent subject to master netting arrangements, net of derivatives in a loss/(gain) position with the same counterparty and collateral received/(pledged). If the counterparty fails to perform on a repurchase agreement, the Company is exposed to a loss to the extent that the fair value of collateral pledged exceeds the liability to the counterparty. The Company attempts to minimize counterparty credit risk by evaluating and monitoring the counterparty's credit, executing master netting arrangements and obtaining collateral, and executing contracts and agreements with multiple counterparties to reduce exposure to a single counterparty.

Our repurchase agreements and derivative transactions are governed by underlying agreements that provide for a right of setoff under master netting arrangements, including in the event of default or in the event of bankruptcy of either party to the transactions. The Company presents its assets and liabilities subject to such arrangements on a net basis in our consolidated statements of financial condition. The following table presents information about our liabilities that are subject to such arrangements and can potentially be offset on our consolidated statements of financial condition as of March 31, 2018 and December 31, 2017.

15. Commitments and Contingencies

From time to time, the Company may become involved in various claims and legal actions arising in the ordinary course of business. In connection with certain re-securitization transactions engaged in by the Company, it has the obligation under certain circumstances to repurchase assets from the VIE upon breach of certain representations and warranties.

16. Subsequent Events

None.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of the Company's ("we" or "our") financial condition and results of operations should be read in conjunction with the consolidated financial statements and notes to those statements included in Item 1 of this quarterly report on Form 10-Q.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

We make forward-looking statements in this report that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. When we use the words "believe," "expect," "anticipate," "estimate," "plan," "continue," "intend," "should," "may," "would," "will" or similar expressions, we intend to identify forward-looking statements. Statements regarding the following subjects, among others, are forward-looking by their nature:

- our business and investment strategy;
- availability of investment opportunities in real estate-related and other securities;
- our expected investments;
- changes in the value of our investments;
- changes in interest rates and mortgage prepayment rates;
- prepayments of the mortgage and other loans underlying our mortgage-backed securities, or RMBS, or other asset-backed securities, or ABS;
- rates of default, delinquencies or decreased recovery rates on our investments;
- general volatility of the securities markets in which we invest;
- our ability to maintain existing financing arrangements and our ability to obtain future financing arrangements;
- our ability to effect our strategy to securitize residential mortgage loans;
- interest rate mismatches between our investments and our borrowings used to finance such purchases;
- effects of interest rate caps on our adjustable-rate investments;
- the degree to which our hedging strategies may or may not protect us from interest rate volatility;
- the impact of and changes to various government programs;
- impact of and changes in governmental regulations, tax law and rates, accounting guidance, and similar matters;
- market trends in our industry, interest rates, the debt securities markets or the general economy;
- estimates relating to our ability to make distributions to our stockholders in the future;
- our understanding of our competition;
- availability of qualified personnel;
- our ability to maintain our classification as a REIT for federal income tax purposes;
- our ability to maintain our exemption from registration under the Investment Company Act of 1940, as amended, or 1940 Act;
- our expectations regarding materiality or significance; and
- the effectiveness of our disclosure controls and procedures.

The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. You should not place undue reliance on these forward-looking statements. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us. Some of these factors are described under the caption "Risk Factors" in our Form 10-K for fiscal year ended December 31, 2017. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made. New risks and uncertainties arise from time to time, and it is impossible for us to predict those events or how they may affect us. Except as required by law, we are

not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Executive Summary

We are a publicly traded real estate investment trust, or REIT, that is primarily engaged in the business of investing directly or indirectly through our subsidiaries, on a leveraged basis, in a diversified portfolio of mortgage assets, including residential mortgage loans, Non-Agency RMBS, Agency CMBS, Agency RMBS, and other real estate related securities. Our principal business objective is to deliver shareholder value through the generation of distributable income and through asset performance linked to residential mortgage credit fundamentals. We selectively invest in residential mortgage assets with a focus on credit analysis, projected prepayment rates, interest rate sensitivity and expected return.

We focus our investment activities primarily on acquiring residential mortgage loans and on acquiring Non-Agency and Agency residential and commercial mortgage-backed securities, or MBS. At March 31, 2018, based on the amortized cost balance of our interest earning assets, approximately 66% of our investment portfolio was residential mortgage loans, 24% of our investment portfolio was Agency MBS and 10% of our investment portfolio was Non-Agency RMBS, respectively. At December 31, 2017, based on the amortized cost balance of our interest earning assets, approximately 56% of our investment portfolio was residential mortgage loans, 28% of our investment portfolio was Agency MBS and 16% of our investment portfolio was Non-Agency RMBS, respectively.

Our investment strategy is intended to take advantage of opportunities in the current interest rate and credit environment. We expect to adjust our strategy to changing market conditions by shifting our asset allocations across these various asset classes as interest rate and credit cycles change over time. We believe that our strategy will enable us to pay dividends, preserve capital and safeguard book value throughout changing market cycles. We expect to take a long-term view of assets and liabilities, and our reported earnings and estimates of the fair value of our investments at the end of a financial reporting period will not significantly impact our objective of providing attractive risk-adjusted returns to our stockholders over the long-term.

We use leverage to increase returns and to finance the acquisition of our assets. Our income is generated primarily by the difference, or net spread, between the income we earn on our assets and the cost of our borrowings. We expect to finance our investments using a variety of financing sources including, when available, securitizations, warehouse facilities, repurchase agreements and offerings of our securities. We may manage our debt and interest rate risk by utilizing interest rate hedges, such as interest rate swaps, caps, options and futures to reduce the effect of interest rate fluctuations related to our financing sources.

Under the U.S. credit risk retention rules that became effective on December 24, 2015, for transactions which we sponsor we have committed to consolidate the loans and retain a meaningful investment for a minimum of five years. Our credit investments are generally structurally locked out from pre-payments resulting in a high yielding longer duration credit portfolio.

Market Conditions and our Strategy

There are several key factors that impact our financial results, including the interest rate environment and changes in LIBOR rates, U.S. unemployment rates and residential home prices, as well as residential mortgage origination and refinance activity. The interest rate environment is sensitive to actual and anticipated US Federal Reserve actions, availability of adequate and efficient financing sources, rate volatility as well as other market factors. We have operated over the past several years and continue to operate in a volatile interest rate environment.

The first quarter of 2018 saw an increase in the 10-year Treasury by over 50 basis points from year end to third week of February before closing the quarter up 33 basis points from year end. The short end of the yield curve also moved up with the Federal Reserve increasing the Federal Funds Target rate by 25 basis points in March. The March rate

hike was the sixth increase since the Federal Reserve started raising rates in December 2015. The yield curve flattened as the short end of the yield curve moved up faster than the long end of the yield curve.

Equity volatility increased in the first quarter of 2018. After equities rallied for most of January, the S&P fell over 10%, erasing 2018 year to date gains. Equity markets recovered in the second half of the quarter, and ended slightly below year end levels. Unemployment levels remained low and home prices continued to appreciate which provided support to the US housing economy.

In the first quarter we saw a mix of increases and decreases in asset values. Agency securities, which are the most rate sensitive assets in our portfolio, lost value but some of the loss was offset by gains on our hedges of floating rate debt.

The Non-Agency portfolio saw a mix of mark ups and downs, but overall had a minor net decrease in value. Our Loan portfolio increased in value as investors are still seeking yield. The increase in short-term rates has increased our economic interest expense and the cost to finance our portfolio. Net economic interest expense was 3.7% for the first quarter of 2018, up from 3.5% for the fourth quarter of 2017. First quarter 2018 net interest spread was 2.5% compared to 2.7% for the fourth quarter of 2017.

Our book value per common share was \$17.12 as of March 31, 2018 up from \$16.85 as of December 31, 2017 driven by continued strength in the residential credit markets and in particular residential mortgage loans. Given the economic environment, we continue to seek high yielding investment opportunities that will deliver a durable dividend to our shareholders while managing risk and safeguarding book value.

Business Operations

Net Income Summary

The table below presents our net income on a GAAP basis for the quarters ended March 31, 2018 and 2017.

Net Income

(dollars in thousands, except share and per share data)

(1) Includes interest income of consolidated VIEs of \$235,026 and \$192,989 for the quarters ended March 31, 2018 and 2017, respectively. See Note 8 to consolidated financial statements for further discussion.

(2) Includes interest expense of consolidated VIEs of \$99,614 and \$82,684 for the quarters ended March 31, 2018 and 2017, respectively. See Note 8 to consolidated financial statements for further discussion.

Results of Operations for the Quarters Ended March 31, 2018 and 2017.

Our primary source of income is interest income earned on our assets, net of interest expense paid on our financing liabilities.

Our net income available to common shareholders increased by \$72 million to \$230 million, or \$1.22 per average basic common share, for the quarter ended March 31, 2018 as compared to \$158 million, or \$0.84 per average basic common share, for the quarter ended March 31, 2017. The increase in net income available to common shareholders for the quarter ended March 31, 2018 is primarily due to an increase in Net gains on derivatives of \$99 million, lower Net other-than-temporary impairment losses of \$18 million, and Gains on extinguishment of debt of \$10 million, as compared to the same period of 2017. These increases to net income were offset in part by a decrease in Net unrealized gains on financial instruments at fair value of \$58 million, compared to the same period of 2017.

Interest Income

The changes in our interest income for the quarter ended March 31, 2018, as compared to the same period of 2017, are primarily driven by the repositioning of our balance sheet by adding residential mortgage loans and decreasing our investments in Non-agency RMBS. These changes have impacted interest income for the quarters as follows.

Interest income increased by \$46 million, or 18%, to \$297 million for the quarter ended March 31, 2018, as compared to \$251 million for the same period of 2017. The increase was primarily due to an increase in interest income earned on residential mortgage loans of \$57 million, which was driven by higher residential mortgage loan balances, as compared to the same period of 2017. This increase was offset in part by lower interest income on our Non-Agency RMBS and Non-Agency RMBS transferred to consolidated VIEs of \$16 million, compared to the same period of 2017.

Interest Expense

Interest expense increased by \$39 million, or 35%, to \$149 million for the quarter ended March 31, 2018, as compared to \$110 million for the same period of 2017. The increase was primarily due to increased interest expense on securitized debt, collateralized by seasoned subprime residential mortgage loans of \$19 million and repurchase agreements collateralized by RMBS from loan securitization of \$15 million, which were driven primarily by higher securitized debt and repurchase agreements collateralized by loan balances compared to the same period of 2017. Interest expense is also higher as a result of higher interest rates in 2018 compared to 2017. Interest expense for GAAP reporting does not include the periodic costs of our derivatives, which are reported separately in our GAAP financial statements.

Economic Net Interest Income

Our “Economic net interest income” is a non-GAAP financial measure, that equals interest income, less interest expense and realized losses on our interest rate swaps. Realized losses on our interest rate swaps are the periodic net settlement payments made or received. For the purpose of computing economic net interest income and ratios relating to cost of funds measures throughout this section, interest expense includes net payments on our interest rate swaps, which is presented as a part of Net realized gains (losses) on derivatives in our Consolidated Statements of Operations. Interest rate swaps are used to manage the increase in interest paid on repurchase agreements in a rising rate environment. Presenting the net contractual interest payments on interest rate swaps with the interest paid on interest-bearing liabilities reflects our total contractual interest payments. We believe this presentation is useful to investors because it depicts the economic value of our investment strategy by showing actual interest expense and net interest income. However, Economic net interest income should not be viewed in isolation and is not a substitute for net interest

income computed in accordance with GAAP. Where indicated, interest expense, including interest payments on interest rate swaps, is referred to as economic interest expense. Where indicated, net interest income reflecting interest payments on interest rate swaps, is referred to as economic net interest income.

The following table reconciles the GAAP and non-GAAP measurements reflected in the Management's Discussion and Analysis of Financial Condition and Results of Operations.

45

	GAAP Interest Income	GAAP Interest Expense	Net Realized Losses on Interest Rate Swaps	Economic Interest Expense	GAAP Net Interest Income	Net Realized Losses on Interest Rate Swaps	Other ⁽¹⁾	Economic Net Interest Income

(2) Interest includes cash paid on swaps

Economic Net Interest Income and the Average Earning Assets

Our economic net interest income increased by \$9 million to \$145 million for the quarter ended March 31, 2018 from \$136 million for the same period of 2017. Our net interest rate spread, which equals the yield on our average interest-earning assets less the economic average cost of funds decreased by 54 basis points for the quarter ended March 31, 2018, as compared to the same period of 2017. The net interest margin, which equals the economic net interest income as a percentage of the net average balance of our

interest-earning assets less our interest-bearing liabilities decreased by 53 basis points for the quarter ended March 31, 2018, as compared to the same period of 2017. Average net interest-earning assets increased by \$454 million to \$2.6 billion for the quarter ended March 31, 2018 from \$2.1 billion for the same period of 2017. This increase in average net interest-earning assets was primarily driven by an increase in our investments in residential mortgage loans, which was partially offset by an increase in our repurchase agreements and securitized debt, collateralized by loans portfolio.

Economic Interest Expense and the Cost of Funds

The borrowing rate at which we are able to finance our assets using repurchase agreements and securitized debt is typically correlated to LIBOR and the term of the financing. The table below shows our average borrowed funds, economic interest expense, average cost of funds (inclusive of realized losses on interest rate swaps), average one-month LIBOR, average six-month LIBOR and average one-month LIBOR relative to average six-month LIBOR.

	Average Debt Balance	Economic Interest Expense ⁽¹⁾	Average Cost of Funds	Average One-Month LIBOR	Average Six-Month LIBOR	Average One-Month LIBOR Relative to Average Six-Month LIBOR
(Ratios have been annualized, dollars in thousands)						
For The Quarter Ended March 31, 2018	\$ 16,642,471	\$ 151,863	3.65 %	1.65 %	2.11 %	(0.46)%
For The Quarter Ended December 31, 2017	\$ 16,698,959	\$ 148,573	3.56 %	1.32 %	1.63 %	(0.31)%
For The Quarter Ended September 30, 2017	\$ 16,198,005	\$ 143,847	3.55 %	1.23 %	1.46 %	(0.23)%
For The Quarter Ended June 30, 2017	\$ 16,077,813	\$ 141,441	3.50 %	1.06 %	1.42 %	(0.36)%
For The Quarter Ended March 31, 2017	\$ 13,240,294	\$ 114,337	3.50 %	0.83 %	1.37 %	(0.54)%

(1) Includes effect of realized losses on interest rate swaps.

Average interest-bearing liabilities increased by \$3.4 billion for the quarter ended March 31, 2018, as compared to the same period of 2017. Economic interest expense increased by \$38 million for the quarter ended March 31, 2018, as compared to the same period of 2017. The increase in average interest-bearing liabilities and economic interest expense is a result of the increase in the amount of our repurchase agreements and securitized debt collateralized by seasoned subprime mortgage loans as well as the increase in LIBOR.

Average one-month and six month LIBOR were up 82 basis points and 74 basis points, respectively, during the quarter ended March 31, 2018, as compared to the same period of 2017, contributing to the increase in economic interest expense. While we do acquire interest rate hedges to mitigate changes in interest rate risks, the hedges may not fully offset interest expense movements.

Net Other-than-temporary Credit Impairment Losses

OTTI losses are generated when fair values decline below our amortized cost basis, an unrealized loss, and the expected future cash flows decline from prior periods, an adverse change. When an unrealized loss and an adverse change in cash flows occur, we will recognize an OTTI loss in earnings. In addition, if we intend to sell a security, or believe we will be required to sell a security in an unrealized loss position, we will recognize an OTTI loss in earnings equal to the unrealized loss.

OTTI losses were \$1 million and \$19 million for the quarter ended March 31, 2018 and 2017. \$14 million of the \$19 million, OTTI for the quarter ended March 31, 2017 was related to securities included in our consolidated VIEs. As of March 31, 2018, we had one Non-agency RMBS security subject to OTTI in an unrealized loss position totaling \$481

thousand for which we did not recognize impairment. We continue to monitor our investment portfolio and will record an OTTI for all investments in an unrealized loss position for which we do not believe we will recover our amortized cost prior to maturity or sale.

Net Gains (losses) on derivatives

Our interest rate swaps are primarily used to economically hedge the effects of changes in interest rates on our portfolio, specifically our floating rate debt. Therefore, we included the periodic interest costs of the interest rate swaps for the quarters ended March 31, 2018 and 2017 on these economic hedges in our presentation of economic net interest income and our net interest spreads. As we do not account for these as hedges for GAAP presentation, we present these gains and losses separately in the Consolidated Statements of Operations. The decrease in the net periodic interest cost of the interest rate swaps are primarily due to the increase in interest rates and changes in our swap portfolio balance during the year.

The table below shows a summary of our net gains (losses) on derivative instruments, for the quarters ended March 31, 2018 and 2017, respectively.

	For the Quarters Ended March 31, March 31, 2018 2017 (dollars in thousands)	
Periodic interest cost of interest rate swaps, net	\$(2,612)	\$(4,106)
Realized gains (losses) on derivative instruments, net:		
Treasury Futures	16,424	(2,084)
Swaptions	(727)	(3,168)
Swaps - Terminations	—	—
Total realized gains (losses) on derivative instruments, net	15,697	(5,252)
Unrealized gains (losses) on derivative instruments, net:		
Interest Rate Swaps	84,964	6,316
Treasury Futures	(6,587)	(2,568)
Swaptions	3,042	1,148
Total unrealized gains (losses) on derivative instruments, net:	81,419	4,896
Total gains (losses) on derivative instruments, net	\$94,504	\$(4,462)

The net gains and losses on our derivatives include both unrealized and realized gains and losses. Realized gains and losses include the net cash paid and received on our interest rate swaps during the period as well as sales and settlements of our Treasury Futures and swaptions. The realized loss on our derivative instruments is primarily a result of the pay fixed leg of our swaps carried at a higher interest rate than the received floating leg of these same swaps, resulting in a net payment on the periodic settlement of the swaps during the year.

Unrealized gains and losses include the change in market value, period over period, on our derivatives portfolio. Changes in market value are generally a result of changes in interest rates. We may or may not ultimately realize these unrealized derivative gains and losses depending on trade activity, changes in interest rates and the values of the underlying securities. During the quarter ended March 31, 2018, we recognized total net gains on derivatives of \$95 million, compared to total net losses on derivatives of \$4 million for the quarter ended March 31, 2017, which was primarily driven by higher unrealized gains on interest rate swaps and realized gains on Treasury futures.

There were no swap terminations during the quarter ended March 31, 2018 and 2017. Our Treasury futures positions remained unchanged at \$620 million of notional value at March 31, 2018 and 2017. We reduced our swaptions by \$121 million of notional value to \$361 million at March 31, 2018, as compared to the \$482 million notional value at March 31, 2017.

Changes in our derivative positions were a result of changes in our portfolio composition and changes in interest rates.

We had net realized gains on our short futures positions of \$16 million, and realized losses of \$2 million, during the quarters ended March 31, 2018 and 2017, respectively. The realized gains and losses were driven primarily by changes in interest rates during these periods, which affects the Treasury futures prices, resulting in realized gains or losses on our short futures positions. Treasury futures are not included in our economic interest expense and economic net interest income.

Net Unrealized Gains (Losses) on Financial Instruments at Fair Value

We have elected the fair value option with changes in fair value reflected in earnings for our IO RMBS securities, certain Non-Agency RMBS securities which receive residual cash flows, Loans held for investment, and the related financing for the loans consolidated as a VIE in our statement of financial condition. In addition, we have elected to account for Agency MBS investments acquired on or after July 1, 2017 under the fair value option. All Agency MBS investments owned prior to July 1, 2017 will continue to be carried at fair value with changes in fair value reported in other comprehensive income (OCI) as available-for-sale investments.

IO RMBS securities represent the right to receive the interest on a pool of mortgage backed securities, including both Agency and Non-Agency mortgage pools. The fair value of IO RMBS securities are heavily impacted by changes in expected

prepayment rates. When IO securities prepay faster than expectations, the holder of the IO security will receive less interest on the investment due to the reduced principal.

We invest in overcollateralization classes of several seasoned pools of mortgage loans. These holdings generally do not have a traditional unpaid principal amount and pay cash based on guidance in the trust documents when excess cash is available. Many of these holdings do not pay any interest and may never pay interest. We have elected to carry these overcollateralization classes at fair value with changes in fair value reflected in earnings.

The Net unrealized gains on financial instruments at fair value for the quarter ended March 31, 2018 were \$14 million, which were primarily driven by unrealized gains on Loans held for investment of \$42 million and securitized debt of \$8 million, offset in part by unrealized losses on Agency MBS of \$33 million. For March 31, 2017, the Net unrealized gains on financial instruments at fair value was \$72 million, which were primarily driven by unrealized gains on Loan held for investment of \$121 million offset in part by unrealized losses on Securitized debt collateralized by loans held for investment of \$39 million.

Gains and Losses on Sales of Assets and Losses on Extinguishment of Securitized Debt

We did not have any sales during the quarter ended March 31, 2018, and we had net realized gains of \$5 million during the quarter ended March 31, 2017. We do not forecast sales of investments as we generally expect to invest for long term gains. However, from time to time, we may sell assets to create liquidity necessary to pursue new opportunities, achieve targeted leverage ratios as well as for gains when prices indicate a sale is most beneficial to us, or is the most prudent course of action to maintain a targeted risk adjusted yield for our investors.

When we acquire our outstanding securitized debt, we extinguish the outstanding debt and recognize a gain or loss based on the difference between the carrying value of the debt and the cost to acquire the debt which is reflected in the Consolidated Statements of Operations as a gain or loss on extinguishment of debt. During the quarter ended March 31, 2018, the Company acquired securitized debt collateralized by loans with an amortized cost balance of \$149 million for \$139 million. This transaction resulted in a net gain on the extinguishment of debt of \$10 million, which is reflected in earnings for the quarter ended March 31, 2018. There were no securitized debt acquisitions during the quarter ended March 31, 2017.

Compensation, General and Administrative Expenses and Deal Expenses

The table below shows our total compensation and benefit expense, general and administrative, or G&A expenses and deal expenses as compared to average total assets and average equity for the periods presented.

	Total Compensation, G&A and Deal Expenses	Total Compensation, G&A and Deal Expenses/Average Assets	Total Compensation, G&A and Deal Expenses/Average Equity	
(Ratios have been annualized, dollars in thousands)				
For The Quarter Ended March 31, 2018	\$14,9880.28	%	1.64	%
For The Quarter Ended December 31, 2017	\$17,1580.32	%	1.89	%
For The Quarter Ended September 30, 2017	\$15,4270.29	%	1.71	%
For The Quarter Ended June 30, 2017	\$13,6010.26	%	1.53	%
For The Quarter Ended March 31, 2017	\$22,9490.49	%	2.77	%

Compensation and benefit costs were \$8 million for the quarter ended March 31, 2018 and 2017. G&A expenses were \$5 million and \$4 million for the quarter ended March 31, 2018 and 2017, respectively. The G&A expenses are primarily comprised of auditing, information technology, legal and consulting expenses.

The Company incurred deal expenses of \$1 million and \$11 million for the quarter ended March 31, 2018 and 2017, respectively. The decrease in deal expenses was driven by lower securitization activity during the quarter ended March 31, 2018 as compared to the same period of 2017.

Servicing Fees

Servicing fees expenses were \$11 million and \$10 million during the quarter ended March 31, 2018 and 2017, respectively. These servicing fees are related to the consolidation of the whole loan securitization vehicles and are paid from interest income earned by the VIEs. The servicing fees range from 20 to 50 basis points of unpaid principal balances of our consolidated VIEs.

Core earnings

Core earnings is a non-GAAP measure and is defined as GAAP net income excluding unrealized gains on the aggregate portfolio, impairment losses, realized gains on sales of investments, realized gains or losses on futures, realized gains or losses on swap terminations, gain on deconsolidation, extinguishment of debt and certain other non-recurring gains or losses. As defined, core earnings include interest income and expense as well as realized losses on interest rate swaps used to hedge interest rate risk and other expenses. Management believes that the presentation of core earnings provides investors with a useful measure to facilitate comparisons of financial performance between our REIT peers, but has important limitations. We believe core earnings as described above helps evaluate our financial performance without the impact of certain transactions but is of limited usefulness as an analytical tool. Therefore, core earnings should not be viewed in isolation and is not a substitute for net income or net income per basic share computed in accordance with GAAP.

The following table provides GAAP measures of net income and net income per basic share available to common stockholders for the periods presented and details with respect to reconciling the line items to core earnings and related per average basic common share amounts:

	For the Quarters Ended				
	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017
	(dollars in thousands, except per share data)				
GAAP Net income available to common stockholders	\$229,607	\$ 98,208	\$ 129,832	\$105,617	\$157,524
Adjustments:					
Net other-than-temporary credit impairment losses	1,158	18,179	11,468	13,509	18,701
Net unrealized (gains) losses on derivatives	(81,419)	(28,074)	(9,204)	(5,802)	(4,896)
Net unrealized (gains) losses on financial instruments at fair value	(14,466)	47,637	(19,042)	(67,762)	(72,243)
Net realized (gains) losses on sales of investments	—	586	(1)	(4,541)	(5,167)
(Gains) losses on extinguishment of debt	(9,670)	(12,742)	1	48,014	—
Realized (gains) losses on terminations of interest rate swaps	—	—	—	16,143	—
Net realized (gains) losses on Futures ⁽¹⁾	(16,424)	(8,204)	3,267	6,914	2,084
Core Earnings	\$108,786	\$ 115,590	\$ 116,321	\$112,092	\$96,003
GAAP net income per basic common share	\$1.22	\$ 0.52	\$ 0.69	\$0.56	\$0.84
Core earnings per basic common share ⁽²⁾	\$0.58	\$ 0.62	\$ 0.62	\$0.60	\$0.51

(1) Included in net realized gains (losses) on derivatives in the Consolidated Statements of Operations.

(2) We note that core and taxable earnings will typically differ, and may materially differ, due to differences on realized gains and losses on investments and related hedges, credit loss recognition, timing differences in premium amortization, accretion of discounts, equity compensation and other items.

Our core earnings for the quarter ended March 31, 2018 were \$109 million, or \$0.58 per average basic common share, compared to \$96 million, or \$0.51 per average basic common share, for the quarter ended March 31, 2017. Core earnings increased by \$13 million, or \$0.07 per average basic common share, for the quarter ended March 31, 2018, as compared to the same period of 2017, primarily due to higher net interest income and lower deal expenses.

Net Income (Loss) and Return on Total Stockholders' Equity

The table below shows our Net Income, Economic Net Interest Income and Core Earnings, each as a percentage of average stockholders' equity. Return on average equity is defined as our GAAP net income (loss) as a percentage of average equity. Average equity is defined as the average of our beginning and ending stockholders' equity balance for the period reported. Economic Net Interest Income and Core Earnings are non-GAAP measures as defined in previous sections.

50

	Return on Average Equity	Economic Interest Income/Average Equity *	Net Average Equity	Core Earnings/Average Equity	
(Ratios have been annualized)					
For the Quarter Ended March 31, 2018	26.17 %	15.92 %	%	11.91	%
For the Quarter Ended December 31, 2017	11.82 %	16.85 %	%	12.70	%
For the Quarter Ended September 30, 2017	15.42 %	16.92 %	%	12.88	%
For the Quarter Ended June 30, 2017	12.98 %	16.57 %	%	12.65	%
For the Quarter Ended March 31, 2017	19.63 %	16.46 %	%	11.57	%

* Includes effect of realized losses on interest rate swaps.

Return on average equity increased by 654 basis points for the quarter ended March 31, 2018, as compared to the same period of 2017. This was primarily due to an increase in our net income by \$76 million to \$239 million for the quarter ended March 31, 2018, as compared to net income of \$163 million for the quarter ended March 31, 2017. Economic net interest income as a percentage of average equity decreased by 54 basis points, driven primarily by higher average equity balance and higher interest expense related to the increase in LIBOR rates. Core earnings as a percentage of average equity increased by 34 basis points for the quarter ended March 31, 2018 compared to the quarter ended March 31, 2017, which was primarily driven by an increase in core earnings of \$13 million due to higher net interest income and lower deal expenses.

Financial Condition

Portfolio Review

During the quarter ended March 31, 2018, on an aggregate basis, we purchased \$587 million of assets and received \$650 million in principal payments related to our Agency, Non-Agency RMBS and Loans held for investments portfolio.

The following table summarizes certain characteristics of our portfolio at March 31, 2018 and December 31, 2017.

	March 31, 2018	December 31, 2017	
Interest earning assets at period-end ⁽¹⁾	\$20,938,505	\$20,894,407

Annualized cost of funds on average borrowed funds for the periods ended ⁽²⁾	3.7	% 3.6	%

(1) Excludes cash and cash equivalents.

(2) Includes the effect of realized losses on interest rate swaps.

GAAP leverage at period-end is calculated as a ratio of our repurchase agreements and securitized debt liabilities over GAAP book value. GAAP recourse leverage is calculated as a ratio of our repurchase agreements over GAAP book value.

The following table presents details of each asset class in our portfolio at March 31, 2018 and December 31, 2017. The principal or notional value represents the interest income earning balance of each class. The weighted average figures are weighted by each investment's respective principal/notional value in the asset class.

Based on the projected cash flows for our Non-Agency RMBS that are not of high credit quality, a portion of the original purchase discount is designated as Accretable Discount, which reflects the purchase discount expected to be accreted into interest income, and a portion is designated as Non-Accretable Difference, which represents the contractual principal on the security that is not expected to be collected. The amount designated as Non-Accretable Difference may be adjusted over time, based on the actual performance of the security, its underlying collateral, actual and projected cash flow from such collateral, economic conditions and other factors. If the performance of a security is more favorable than previously estimated, a portion of the amount designated as Non-Accretable Difference may be accreted into interest income over time. Conversely, if the performance of a security is less favorable than previously estimated, an OTTI may be recognized resulting in an increase in the amounts designated as Non-Accretable Difference.

The following table presents changes to Accretable Discount (net of premiums) as it pertains to our Non-Agency RMBS portfolio, excluding premiums on IOs, during the previous five quarters.

	For the Quarters Ended

Liquidity and Capital Resources

General

Liquidity measures our ability to meet cash requirements, including ongoing commitments to repay our borrowings, purchase RMBS, mortgage loans and other assets for our portfolio, pay dividends and other general business needs. Our principal sources of capital and funds for additional investments primarily include earnings, principal paydowns and sales from our investments, borrowings under securitizations and re-securitizations, repurchase agreements and other financing facilities including warehouse facilities, and proceeds from equity or other securities offerings. We also maintain a certain amount of liquid, un-levered securities that we can either finance with recourse or sell if we have liquidity needs.

To meet our short term (one year or less) liquidity needs, we expect to continue to borrow funds in the form of repurchase agreements and, subject to market conditions, other types of financing. The terms of the repurchase transaction borrowings under our master repurchase agreements generally conform to the terms in the standard master repurchase agreement as published by the Securities Industry and Financial Markets Association, or SIFMA, as to repayment, margin requirements and the segregation of all securities we have initially sold under the repurchase transaction. In addition, each lender typically requires that we include supplemental terms and conditions to the standard master repurchase agreement. Typical supplemental terms and conditions include changes to the margin maintenance requirements, cross default provisions, required haircuts or the percentage that is subtracted from the value of RMBS that collateralizes the financing, purchase price maintenance requirements, and requirements that all disputes related to the repurchase agreement be litigated or arbitrated in a particular jurisdiction. These provisions may differ for each of our lenders.

Based on our current portfolio, leverage ratio and available borrowing arrangements, we believe our assets will be sufficient to enable us to meet anticipated short-term liquidity requirements. However, a decline in the value of our collateral could cause a temporary liquidity shortfall due to the timing of margin calls on the financing arrangements and the actual receipt of the cash related to principal paydowns. If our cash resources are insufficient to satisfy our liquidity requirements, we may have to sell investments, potentially at a loss, issue debt or additional common or preferred equity securities.

To meet our longer term liquidity needs (greater than one year), we expect our principal sources of capital and funds to continue to be provided by earnings, principal paydowns and sales from our investments, borrowings under securitizations and re-securitizations, repurchase agreements and other financing facilities, as well as proceeds from equity or other securities offerings.

In addition to the principal sources of capital described above, we may enter into warehouse facilities and use longer dated structured repurchase agreements. The use of any particular source of capital and funds will depend on market conditions, availability of these facilities, and the investment opportunities available to us.

Current Period

We held cash and cash equivalents of approximately \$101 million and \$64 million at March 31, 2018 and December 31, 2017, respectively. As a result of our operating, investing and financing activities described below, our cash position increased by \$37 million from December 31, 2017 to March 31, 2018.

Our operating activities provided net cash of approximately \$198 million and \$61 million for the quarters ended March 31, 2018 and 2017, respectively. The cash provided by our operations is primarily due to interest received in excess of interest paid during the period. For the quarters ended March 31, 2018 and 2017, interest received net of interest paid was \$160 million and \$131 million, respectively.

Our investing activities provided cash of \$63 million and used cash of \$3.7 billion for the quarters ended March 31, 2018 and 2017, respectively. During the quarter ended March 31, 2018, we received cash for principal repayments on our Agency MBS, Non-Agency MBS, and Loans held for investments of \$650 million. This cash received was offset in part by investment purchases of \$587 million, primarily Loans held for investments and Agency MBS. During the quarter ended March 31, 2017, we purchased investments of \$4.3 billion, primarily Loans held for investments. This cash used was offset in part by cash received on principal payments on our Agency MBS, Non-Agency MBS and securitized loans of \$568 million. The purchases activity for the quarters were primarily due to our portfolio re-balancing from interest rate sensitive MBS investments to less interest rate sensitive resident credit assets.

Our financing activities used cash of \$225 million and provided cash of \$3.6 billion for the quarters ended March 31, 2018 and 2017, respectively. During the quarter ended March 31, 2018, we used cash for repayment of principal on our securitized debt of \$569 million, common and preferred dividends paid of \$103 million, net proceeds paid on our repurchase agreements of \$46 million, and repurchased common stock of \$15 million. These uses of cash were offset in part by cash received of \$509 million from debt issuance. During the quarter ended March 31, 2017, we received cash of \$3.5 billion from debt issuance, \$314 million from our preferred stock Series B offering and \$250 million from net proceeds received on repurchase agreements. This

cash provided was offset in part by repayment of principal on our securitized debt of \$363 million and dividends paid of \$99 million.

Our recourse leverage is 2.0:1 for the quarter ended March 31, 2018 and for the year ended December 31, 2017. Our recourse leverage excludes the securitized debt which can only be repaid from the proceeds on the assets securing this debt in their respective VIEs. Our recourse leverage is presented as a ratio of our repurchase agreements, which are recourse to the assets of the Company, to our equity.

We believe that our cash balances and liquid Agency portfolio provides an appropriate level of liquidity. Even though we have unrestricted Agency MBS investments, we expect to meet our future cash needs primarily from principal and interest payments on our portfolio and do not anticipate the need to sell unrestricted Agency MBS investments to meet our liquidity needs. We expect to continue to finance our MBS portfolio largely through repurchase agreements and loans through the securitization market. In addition, we may from time to time sell securities, issue debt, or issue equity as a source of cash to fund new purchases.

At March 31, 2018 and December 31, 2017 the remaining maturities on our RMBS repurchase agreements were as follows.

	March 31, 2018	December 31, 2017
	(dollars in thousands)	
Overnight	\$—	\$—
1 to 29 days	4,140,691	4,745,342
30 to 59 days	1,538,864	1,206,769
60 to 89 days	685,239	592,865
90 to 119 days	—	—
Greater than or equal to 120 days	838,130	705,476
Total	\$7,202,924	\$7,250,452

Average remaining maturity of Repurchase agreements secured by:

Agency MBS	32 days	28 days
Non-agency MBS and Loans held for investment	90 days	93 days

We collateralize the repurchase agreements we use to finance our operations with our MBS investments. Our counterparties negotiate a ‘haircut’, which is the difference expressed in percentage terms between the fair value of the collateral and the amount the counterparty will lend to us, when we enter into a financing transaction. The size of the haircut reflects the perceived risk associated with holding the MBS by the lender. The haircut provides lenders with a cushion for daily market value movements that reduce the need for a margin call to be issued or margin to be returned as normal daily increases or decreases in MBS market values occur. At March 31, 2018, and December 31, 2017, the weighted average haircut on our repurchase agreements collateralized by Agency MBS was 5.1%. At March 31, 2018, the weighted average haircut on our repurchase agreements collateralized by Non-Agency MBS and Loans held for investments was 26.8% compared to 26.2% at December 31, 2017. At March 31, 2018, the weighted average borrowing rates for our repurchase agreements collateralized by Agency MBS was 1.77% and Non-Agency MBS and Loans held for investments was 3.70%. At December 31, 2017, the weighted average borrowing rates for our repurchase agreements collateralized by Agency MBS was 1.47% and Non-Agency MBS and Loans held for investment was 3.41%, respectively.

As the fair value of the Non-Agency MBS is more difficult to determine, as well as more volatile period to period than Agency MBS, the Non-Agency MBS typically requires a larger haircut. In addition, when financing assets using standard form of SIFMA Master Repurchase Agreements, the counterparty to the agreement typically nets its

exposure to us on all outstanding repurchase agreements and issues margin calls if movement of the fair values of the assets in the aggregate exceeds their allowable exposure to us. A decline in asset fair values could create a margin call, or may create no margin call depending on the counterparty's specific policy. In addition, counterparties consider a number of factors, including their aggregate exposure to us as a whole and the number of days remaining before the repurchase transaction closes prior to issuing a margin call. See Note 5 to our Consolidated Financial Statements for a discussion on how we determine the fair values of the RMBS collateralizing our repurchase agreements.

The table below presents our average daily repurchase balance and the repurchase balance at each period end for the periods presented. Our balance at period-end tends to fluctuate from the average daily balances due to the adjusting of the size of our portfolio by using leverage. We continue to deploy capital for strategic purchases of investments.

Period	Average Repurchase Balance	Repurchase Balance at Period End
	(dollars in thousands)	
Quarter End March 31, 2018	\$7,257,048	\$7,202,924
Quarter End December 31, 2017	\$7,028,460	\$7,250,452
Quarter End September 30, 2017	\$6,549,891	\$6,709,821
Quarter End June 30, 2017	\$6,092,881	\$6,254,153
Quarter End March 31, 2017	\$5,800,141	\$5,851,204

We are not required to maintain any specific debt-to-equity ratio. We believe the appropriate leverage for the particular assets we are financing depends on the credit quality and risk of those assets. At March 31, 2018 and December 31, 2017, the carrying value of our total debt was approximately \$16.7 billion and \$16.8 billion, respectively, which represented a debt-to-equity ratio for both periods of approximately 4.6:1. We include our repurchase agreements and securitized debt in the numerator of our debt-to-equity ratio and stockholders' equity as the denominator.

At March 31, 2018, we had repurchase agreements with 28 counterparties. All of our repurchase agreements are secured by Agency, Non-Agency RMBS and Loans held for investments or, in limited circumstances, cash. Under these repurchase agreements we may not be able to reclaim our collateral but still be obligated to pay our repurchase obligations. We mitigate this risk by spreading our exposure to multiple counterparties, as well as ensuring our counterparties are highly rated. Therefore, we believe the risk of loss of our collateral posted is mitigated by the terms of our agreements. As of March 31, 2018 and December 31, 2017, we had \$8.7 billion and \$8.8 billion, respectively, of securities pledged against our repurchase agreement obligations.

At March 31, 2018, our repurchase agreements have original maturities ranging from less than 30 days to 577 days and a weighted average original maturity of 103 days. We expect to renew most of our repurchase agreements at maturity. When we renew our repurchase agreements, there is a risk that we will not be able to obtain as favorable an interest rate as a result of rising rates.

We offset the interest rate risk of our repurchase agreements primarily through the use of interest rate swaps, swaptions and treasury futures. The average remaining maturities on our interest rate swaps at March 31, 2018 range from 1 year to 10 years and have a weighted average maturity of approximately 5 years. All of our swaps are cleared by a central clearing house. When our interest rate swaps are in a net loss position (expected cash payments are in excess of expected cash receipts on the swaps), we post collateral as required by the terms of our swap agreements. We have three swaption counterparties and two futures counterparties and we have posted \$7 million of cash as a collateral to our futures counterparties.

Exposure to Financial Counterparties

We actively manage the number of repurchase agreement counterparties. The following table summarizes our exposure to our repurchase agreement counterparties at March 31, 2018:

March 31, 2018

Country	Number of Counterparties	Interest		
		Repurchase Agreement	Rate Swaps at Exposure ⁽¹⁾	
		Financing	Fair Value	
(dollars in thousands)				
United States	14	\$2,637,161	\$—	\$461,491
Japan	4	1,188,387	—	259,525
Switzerland	1	1,099,034	—	429,277
Canada	2	998,593	—	175,302
China	1	291,555	—	22,126
France	2	284,615	128,220	74,231
South Korea	1	274,425	—	17,763
United Kingdom	2	220,404	—	14,444
Netherlands	1	208,750	—	11,133
Total	28	\$7,202,924	\$128,220	\$1,465,292

(1) Represents the amount of securities pledged as collateral to each counterparty less the aggregate of repurchase agreement financing and unrealized loss on swaps for each counterparty.

Over the past several years, several large European financial institutions have experienced financial difficulty and have been either rescued by government assistance or by other large European banks or institutions. Some of these financial institutions or their U.S. subsidiaries have provided us financing under repurchase agreements or we have entered into interest rate swaps with such institutions. We have entered into repurchase agreements or exchange cleared interest rate swaps with 6 counterparties as of March 31, 2018 that are either domiciled in Europe or is a U.S.-based subsidiary of a European-domiciled financial institution.

If the European credit volatility, including countries that may choose to leave the Euro zone as Britain has, continues to impact these major European financial institutions, it is possible that it will also impact the operations of their U.S. subsidiaries. Our financings and operations could be adversely affected by such events. We monitor our exposure to our repurchase agreement and swap counterparties on a regular basis, using various methods, including review of recent rating agency actions, financial relief plans, credit spreads or other developments and by monitoring the amount of cash and securities collateral pledged and the associated loan amount under repurchase agreements or the fair value of swaps with our counterparties. We make reverse margin calls on our counterparties to recover excess collateral as permitted by the agreements governing our financing arrangements or interest rate swaps, or may try to take other actions to reduce the amount of our exposure to a counterparty when necessary.

At March 31, 2018, we did not use credit default swaps or other forms of credit protection to hedge the exposures summarized in the table above.

Stockholders' Equity

In February 2018, our Board of Directors reauthorized \$100 million under our share repurchase program (the "Repurchase Program"). Such authorization does not have an expiration date and, at present, there is no intention to modify or otherwise rescind such authorization. Shares of our common stock may be purchased in the open market, including through block purchases, through privately negotiated transactions, or pursuant to any trading plan that may be adopted in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. The timing, manner, price and amount of any repurchases will be determined at our discretion and the program may be suspended,

terminated or modified at any time for any reason. Among other factors, the Company intends to only consider repurchasing shares of our common stock when the purchase price is less than the last publicly reported book value per common share. In addition, the Company does not intend to repurchase any shares from directors, officers or other affiliates. The program does not obligate the Company to acquire any specific number of shares, and all repurchases will be made in accordance with Rule 10b-18, which sets certain restrictions on the method, timing, price and volume of stock repurchases.

Pursuant to our Repurchase Program, during the quarter ended March 31, 2018, we repurchased approximately 883 thousand of our common stock at an average price of \$16.81 per share for a total of \$15 million. Other than as discussed below under “Restricted Stock Grants,” we did not issue any common shares during the quarters ended March 31, 2018 and 2017.

We declared dividends to Series A preferred stockholders of \$3 million, or \$0.50 per preferred share during the quarter ended March 31, 2018 and 2017.

In February 2017, the Company issued 13,000,000 shares of 8.00% Series B Fixed-to-Floating Rate Cumulative Redeemable Preferred Stock, par value \$0.01 per share (the “Series B Preferred Stock”), at a public offering price of \$25.00 per share. The Series B Preferred Stock is redeemable at \$25.00 per share plus accrued and unpaid dividends (whether or not authorized or declared) exclusively at the Company’s option commencing in March 30, 2024, subject to the Company’s right, under limited circumstances, to redeem the Series B Preferred Stock prior to that date. The initial dividend rate for the Series B Preferred Stock, from and including February 27, 2017, to but not including March 30, 2024, will be equal to 8.00% per annum of the \$25.00 liquidation preference per share (equivalent to the fixed annual rate of \$2.00 per share). On and after March 30, 2024, dividends on the Series B Preferred Stock will accumulate at a percentage of the \$25.00 liquidation preference equal to an annual floating rate of the three-month LIBOR plus a spread of 5.791% per annum. The Series B Preferred Stock is entitled to receive, when and as declared, a dividend at a rate of 8.0% per year on the \$25.00 liquidation preference before the common stock is paid any dividends and is senior to the common stock with respect to distributions upon liquidation, dissolution or winding up. This transaction was completed in February 2017, pursuant to which the Company received proceeds, net of offering costs, of \$314 million. We declared dividends to Series B preferred stockholders of \$7 million, or \$0.50 per preferred share during the quarter ended March 31, 2018.

During the quarter ended March 31, 2018, and 2017, we declared regular dividends to common shareholders of \$94 million, or \$0.50 per share.

Restricted Stock Grants

During the quarter ended March 31, 2018 and 2017, we granted certain of its employees Restricted Stock Units (“RSU”) awards. RSU awards are designed to reward certain employees for services provided over the previous year. Generally, the RSU awards vest equally over a three-year period beginning from the grant date and will fully vest after three years. The RSU awards are valued at the market price of our common stock on the grant date and the employees must be employed by us on the vesting dates to receive the RSU awards. We granted 241 thousand and 112 thousand RSU awards during the quarter ended March 31, 2018 and 2017, with a grant date fair value of \$4 million and \$2 million, respectively, which will be recognized as compensation expense on a straight-line basis over the three year vesting period.

During the quarter ended March 31, 2018 and 2017, we granted certain employees 133 thousand and 144 thousand Performance Share Units (“PSU”) awards, respectively. PSU awards are designed to align compensation with our future performance. The PSU awards include a three year performance period ending on December 31, 2020 and December 31, 2019, respectively. The final number of shares that will vest will be between 0% to 150% of the total PSU awards granted based on our stock performance as compared to an index of comparable financial institutions and will cliff vest at the end of the performance period. The PSU awards are measured at fair value on the grant date which will be recognized as compensation expense ratably over the three-year vesting period. Fair value is determined using a Monte Carlo valuation model developed to value the specific features of the PSU awards, including market based conditions. Inputs into the model include our historical volatility, the peer average historical volatility, and the correlation coefficient of the volatility. In addition, inputs also included the share price at the beginning of the measurement period and an estimated total shareholder return for both us and the peer group of comparable financial institutions. Based on the model results, the 133 thousand PSU awards granted during 2018 had a grant date value of \$2 million that will cliff vest on December 31, 2020. The 180 thousand PSU awards granted during 2017 had a grant date value of \$3 million which will cliff vest on December 31, 2019.

At March 31, 2018 and December 31, 2017, there were approximately 1 million and 770 thousand unvested shares of restricted stock issued to our employees, respectively.

Contractual Obligations and Commitments

The following tables summarize our contractual obligations at March 31, 2018 and December 31, 2017. The estimated principal repayment schedule of the securitized debt is based on expected cash flows of the residential mortgage loans or RMBS, as adjusted for expected principal writedowns on the underlying collateral of the debt.

March 31, 2018

(dollars in thousands)

Contractual Obligations	Within One Year	One to Three Years	Three to Five Years	Greater Than or Equal to Five Years	Total
Repurchase agreements for RMBS	\$6,871,442	\$331,482	\$—	\$—	\$7,202,924
Securitized debt, collateralized by Non-Agency RMBS	36,807	41,072	15,048	5,775	98,702
Securitized debt at fair value, collateralized by loans held for investment	1,757,615	2,786,131	2,093,168	2,553,825	9,190,739
Interest expense on RMBS repurchase agreements ⁽¹⁾	33,901	951	—	—	34,852
Interest expense on securitized debt ⁽¹⁾	402,831	626,197	385,698	495,912	1,910,638
Total	\$9,102,596	\$3,785,833	\$2,493,914	\$3,055,512	\$18,437,855

(1) Interest is based on variable rates in effect as of March 31, 2018.

December 31, 2017

(dollars in thousands)

Contractual Obligations	Within One Year	One to Three Years	Three to Five Years	Greater Than or Equal to Five Years	Total
Repurchase agreements for RMBS	\$6,903,337	\$347,115	\$—	\$—	\$7,250,452
Securitized debt, collateralized by Non-Agency RMBS	42,217	45,916	16,524	4,867	109,524
Securitized debt at fair value, collateralized by loans held for investment	1,819,018	2,872,572	2,140,434	2,439,872	9,271,896
Interest expense on RMBS repurchase agreements ⁽¹⁾	30,091	978	—	—	31,069
Interest expense on securitized debt ⁽¹⁾	392,416	606,509	368,553	472,640	1,840,118
Total	\$9,187,079	\$3,873,090	\$2,525,511	\$2,917,379	\$18,503,059

(1) Interest is based on variable rates in effect as of December 31, 2017.

The unfunded construction loan commitments of \$766 million and \$567 million as of March 31, 2018 and December 31, 2017, respectively, will primarily be paid within one year of reported periods.

Off-Balance Sheet Arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide funding to any such entities.

Capital Expenditure Requirements

At March 31, 2018 and December 31, 2017, we had no material commitments for capital expenditures.

Dividends

To qualify as a REIT, we must pay annual dividends to our stockholders of at least 90% of our taxable income (subject to certain adjustments). We intend to pay regular quarterly dividends to our stockholders. Before we pay any dividend, we must first meet any operating requirements and scheduled debt service on our financing facilities and

other debt payable.

Inflation

A significant portion of our assets and liabilities are interest rate sensitive in nature. As a result, interest rates and other factors influence our performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our consolidated financial statements are prepared in accordance with GAAP and our

distributions will be determined by our Board of Directors consistent with our obligation to distribute to our stockholders at least 90% of our REIT taxable income on an annual basis in order to maintain our REIT qualification; in each case, our activities and financial condition are measured with reference to historical cost or fair market value without considering inflation.

Other Matters

None.

Critical Accounting Policies and Estimates

We prepare our financial statements in accordance with accounting principles generally accepted in the United States, or GAAP, which requires the use of estimates and assumptions. Management has discussed and reviewed the development, selection, and disclosure of critical accounting estimates with the Company's Audit Committee. Management believes that the most critical accounting policies and estimates, since these estimates require significant judgment, are interest income and other-than temporary impairment, or OTTI, on Non-Agency RMBS, the determination of the appropriate accounting model for Non-Agency RMBS, the impact of default and prepayment assumptions on RMBS, and fair value measurements. Financial results could be materially different if other methodologies were used or if management modified its assumptions.

For a discussion of the Company's critical accounting policies and estimates, see "Critical Accounting Policies and Estimates" in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

Recent Accounting Pronouncements

Refer to Note 2(e) in the Notes to Consolidated Financial Statements for a discussion of accounting guidance recently adopted by the Company or expected to be adopted by the Company in the future.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The primary components of our market risk are related to credit risk, interest rate risk, prepayment risk, market value risk and real estate risk. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience and we seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Credit Risk

We are subject to credit risk in connection with our investments in Non-Agency RMBS and residential mortgage loans and face more credit risk on assets we own which are rated below "AAA". The credit risk related to these investments pertains to the ability and willingness of the borrowers to pay, which is assessed before credit is granted or renewed and periodically reviewed throughout the loan or security term. We believe that residual loan credit quality, and thus the quality of our assets, is primarily determined by the borrowers' credit profiles and loan characteristics.

Prior to acquisition, we or a third party performs an independent review of the mortgage file to assess the origination and servicing of the mortgage loan as well as our ability to enforce the contractual rights in the mortgage. Depending on the size of the loans, we may not review all of the loans in a pool, but rather a sample of loans for underwriting review based upon specific risk-based criteria such as property location, loan size, effective loan-to-value ratio, borrower's credit score and other criteria we believe to be important indicators of credit risk. Additionally, we obtain

representations and warranties from each seller with respect to the mortgage loans, including the origination and servicing of the mortgage loan as well as the enforceability of the lien on the mortgaged property. A seller who breaches these representations and warranties in making a loan that we purchase may be obligated to repurchase the loan from us. We use compensating factors such as liquid assets, low loan to value ratios and regional unemployment statistics in evaluating loans. Our resources include a proprietary portfolio management system, as well as third party software systems. We may utilize a third party due diligence firm to perform an independent underwriting review to ensure compliance with existing guidelines. In addition to statistical sampling techniques, we create adverse credit and valuation samples, which we individually review. We reject loans that fail to conform to our standards and do not meet our underwriting criteria. Once we own a loan, our surveillance process includes ongoing analysis through our proprietary data and servicer files.

Additionally, the Non-Agency RMBS and other ABS which we acquire for our portfolio are reviewed by us to ensure that they satisfy our risk based criteria. Our review of Non-Agency RMBS and other ABS includes utilizing a proprietary portfolio

management system. Our review of Non-Agency RMBS and other ABS is based on quantitative and qualitative analysis of the risk-adjusted returns on Non-Agency RMBS and other ABS. This analysis includes an evaluation of the collateral characteristics supporting the RMBS such as borrower payment history, credit profiles, geographic concentrations, credit enhancement, seasoning, and other pertinent factors.

Interest Rate Risk

Interest rate risk is highly sensitive to many factors, including governmental, monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. We are subject to interest rate risk in connection with our investments and our related debt obligations, which are generally repurchase agreements, warehouse facilities and securitization/re-securitization trusts. Our repurchase agreements and warehouse facilities may be of limited duration that is periodically refinanced at current market rates. We intend to mitigate this risk through utilization of derivative contracts, primarily interest rate swap agreements, swaptions, futures and mortgage options.

Interest Rate Effects on Net Interest Income

Our operating results depend, in large part, on differences between the income from our investments and our borrowing costs. Most of our warehouse facilities and repurchase agreements provide financing based on a floating rate of interest calculated on a fixed spread over LIBOR. The fixed spread varies depending on the type of underlying asset which collateralizes the financing. During periods of rising interest rates, the borrowing costs associated with our investments tend to increase while the income earned on our fixed interest rate investments may remain substantially unchanged. This will result in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses. Further, during this portion of the interest rate and credit cycles, defaults could increase and result in credit losses to us, which could adversely affect our liquidity and operating results. Such delinquencies or defaults could also have an adverse effect on the spread between interest-earning assets and interest-bearing liabilities. Hedging techniques are partly based on assumed levels of prepayments of our fixed-rate and hybrid adjustable-rate mortgage loans and RMBS. If prepayments are slower or faster than assumed, the life of the mortgage loans and RMBS will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions.

Interest Rate Effects on Fair Value

Another component of interest rate risk is the effect changes in interest rates will have on the fair value of the assets we acquire. We face the risk that the fair value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments. We primarily assess our interest rate risk by estimating the duration of our assets compared to the duration of our liabilities and hedges. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown below and such difference might be material and adverse to our stockholders.

Interest Rate Cap Risk

We may also invest in adjustable-rate mortgage loans and RMBS. These are mortgages or RMBS in which the underlying mortgages are typically subject to periodic and lifetime interest rate caps and floors, which limit the amount by which the security's interest yield may change during any given period. However, our borrowing costs pursuant to our financing agreements will not be subject to similar restrictions. Therefore, in a period of increasing interest rates, interest rate costs on our borrowings could increase without limitation by caps, while the interest-rate yields on our adjustable-rate mortgage loans and RMBS would effectively be limited. This problem will be magnified to the extent we acquire adjustable-rate RMBS that are not based on mortgages which are fully indexed. In addition, the mortgages or the underlying mortgages in an RMBS may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash income on our adjustable-rate mortgages or RMBS than we need in order to pay the interest cost on our related borrowings. These factors could lower our net interest income or cause a net loss during periods of rising interest rates, which would harm our financial condition, cash flows and results of operations.

Interest Rate Mismatch Risk

We fund a substantial portion of our acquisitions of RMBS with borrowings that, after the effect of hedging, have interest rates based on indices and re-pricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and re-pricing terms of the mortgages and RMBS. In most cases the interest rate indices and re-pricing terms of our mortgage assets and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Our cost of funds would likely rise or fall more quickly than would our earnings rate on assets. During periods of changing interest rates, such interest rate mismatches could negatively impact our financial condition, cash flows and results of operations. To mitigate interest rate mismatches, we may utilize the hedging strategies discussed above. Our analysis of risks is based on our experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in this Form 10-Q.

Our profitability and the value of our portfolio (including derivatives) may be adversely affected during any period as a result of changing interest rates. The following table quantifies the potential changes in net interest income and portfolio value for our Agency MBS portfolio should interest rates go up or down 50 and 100 basis points, assuming parallel movements in the yield curves. All changes in income and value are measured as percentage changes from the projected net interest income and portfolio value at the base interest rate scenario. The base interest rate scenario assumes interest rates at March 31, 2018 and various estimates regarding prepayment and all activities are made at each level of rate change. Actual results could differ significantly from these estimates.

Change in Interest Rate	March 31, 2018		
	Projected Percentage Change in Projected Portfolio Percentage Value with Change in Net Interest Income ⁽¹⁾	Effect of Interest Rate Swaps and Other Hedging Transactions ⁽²⁾	
-100 Basis Points	4.41	% 1.67	%
-50 Basis Points	2.18	% 0.96	%
Base Interest Rate	—	—	
+50 Basis Points	(4.75)	%(1.08)	%
+100 Basis Points	(11.28)	%(2.25)	%

(1) Change in annual economic net interest income. Includes interest expense on interest rate swaps.

(2) Projected Percentage Change in Portfolio Value is based on instantaneous moves in interest rates.

Prepayment Risk

As we receive prepayments of principal on these investments, premiums and discounts on such investments will be amortized or accreted into interest income. In general, an increase in prepayment rates will accelerate the amortization of purchase premiums, thereby reducing the interest income earned on the investments. Conversely, discounts on such investments are accelerated and accreted into interest income increasing interest income.

Extension Risk

Management computes the projected weighted-average life of our investments based on assumptions regarding the rate at which the borrowers will prepay the underlying mortgages. In general, when fixed-rate or hybrid adjustable-rate mortgage loans or RMBS are acquired via borrowings, we may, but are not required to, enter into an interest rate swap agreement or other hedging instrument that attempts to fix our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related assets. This strategy is designed to protect us from rising interest rates as the borrowing costs are managed to maintain a net interest spread for the duration of the fixed-rate portion of the related assets. However, if prepayment rates decrease in a rising interest rate environment, the life of the fixed-rate portion of the related assets could extend beyond the term of the swap agreement or other hedging instrument. This could have a negative impact on our results from operations, as borrowing costs would no longer be fixed after the end of the hedging instrument while the income earned on the fixed and hybrid adjustable-rate assets would remain fixed. In extreme situations, we may be forced to sell assets to maintain adequate liquidity, which could cause us to incur losses.

Basis Risk

We seek to limit our interest rate risk by hedging portions of our portfolio through interest rate swaps and other types of hedging instruments. Interest rate swaps are generally tied to underlying Treasury benchmark interest rates. Basis risk relates to the risk of the spread between our RMBS and underlying hedges widening. Such a widening may cause a decline in the fair value of our RMBS that is greater than the increase in fair value of our hedges resulting in a net decline in book value. The widening of mortgage-backed securities yields and Treasury benchmark interest rates may result from a variety of factors such as anticipated or actual monetary policy actions or other market factors.

Market Risk

Market Value Risk

Certain of our available-for-sale securities are reflected at their estimated fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income if no OTTI has been recognized in earnings. The estimated fair value of these securities fluctuates primarily due to changes in interest rates, prepayment speeds, market liquidity, credit quality, and other factors. Generally, in a rising interest rate environment, the estimated fair value of these securities would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated fair value of these securities would be expected to increase. As market volatility increases or liquidity decreases, the fair value of our investments may be adversely impacted.

Real Estate Market Risk

We own assets secured by real property and may own real property directly in the future. Residential property values are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, national, regional and local economic conditions and unemployment (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as an oversupply of housing); changes or continued weakness in specific industry segments; construction quality, age and design; demographic factors; natural disasters and other acts of God; and retroactive changes to building or similar codes. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay our loans, which could also cause us to incur losses.

Risk Management

Subject to maintaining our REIT status, we seek to manage risk exposure to protect our portfolio of residential mortgage loans, RMBS, and other assets and related debt against the effects of major interest rate changes. We generally seek to manage risk by:

- monitoring and adjusting, if necessary, the reset index and interest rate related to our RMBS and our financings;
- attempting to structure our financing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;
- using derivatives, financial futures, swaps, options, caps, floors and forward sales to adjust the interest rate sensitivity of our investments and our borrowings;
- using securitization financing to lower average cost of funds relative to short-term financing vehicles further allowing us to receive the benefit of attractive terms for an extended period of time in contrast to short term financing and maturity dates of the investments not included in the securitization; and
- actively managing, through assets selection, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of our investments and the interest rate indices and adjustment periods of our financings.

Our efforts to manage our assets and liabilities are concerned with the timing and magnitude of the re-pricing of assets and liabilities. We attempt to control risks associated with interest rate movements. Methods for evaluating interest rate risk include an analysis of our interest rate sensitivity “gap,” which is the difference between interest-earning assets and interest-bearing liabilities maturing or re-pricing within a given time period. A gap is considered positive when the amount of interest-rate sensitive assets exceeds the amount of interest-rate sensitive liabilities. A gap is considered negative when the amount of interest-rate sensitive liabilities exceeds interest-rate sensitive assets. During a period of rising interest rates, a negative gap would tend to adversely affect net interest income, while a positive gap would tend to result in an increase in net interest income. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income, while a positive gap would tend to affect net interest income adversely. Because different types of assets and liabilities with the same or similar maturities may react differently to changes in overall market rates or conditions, changes in interest rates may affect net interest income positively or negatively even if an institution were perfectly matched in each maturity category.

The following table sets forth the estimated maturity or re-pricing of our interest-earning assets and interest-bearing liabilities at March 31, 2018. The amounts of assets and liabilities shown within a particular period were determined in accordance with the contractual terms of the assets and liabilities, except adjustable-rate loans, and securities are included in the period in which their interest rates are first scheduled to adjust and not in the period in which they mature and includes the effect of the interest rate swaps. The interest rate sensitivity of our assets and liabilities in the table could vary substantially based on actual prepayments.

March 31, 2018

(dollars in thousands)

	Within 3 Months	3-12 Months	1 Year to 3 Years	Greater than 3 Years	Total
Rate sensitive assets	\$482,413	\$976,211	\$—	\$19,491,531	\$20,950,155
Cash equivalents	100,752	—	—	—	100,752
Total rate sensitive assets	\$583,165	\$976,211	\$—	\$19,491,531	\$21,050,907
Rate sensitive liabilities	10,967,041	5,557,036	—	—	16,524,077
Interest rate sensitivity gap	\$(10,383,876)	\$(4,580,825)	\$—	\$19,491,531	\$4,526,830
Cumulative rate sensitivity gap	\$(10,383,876)	\$(14,964,701)	\$(14,964,701)	\$4,526,830	
Cumulative interest rate sensitivity gap as a percentage of total rate sensitive assets	(49	)%(71	)%(71	)%22	%

Our analysis of risks is based on our management's experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in the above tables and in this Form 10-Q. These analyses contain certain forward-looking statements and are subject to the safe harbor statement set forth under the heading, "Special Note Regarding Forward-Looking Statements."

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) was performed under the supervision and with the participation of the Company's senior management, including the Chief Executive Officer and the Chief Financial Officer. Based on that evaluation, the Company's management, including the Chief Executive Officer and the Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

(b) Changes in Internal Control over Financial Reporting

As required by Rule 13a-15(d) under the Exchange Act, the Company's management, including its Chief Executive Officer and Chief Financial Officer, has evaluated the Company's internal control over financial reporting to determine whether any changes occurred during the period covered by this quarterly report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there has

been no such change during the first quarter of 2018.

Part II. Other Information

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

Under “Part I — Item 1A — Risk Factors” of our 2017 Form 10-K, we set forth risk factors related to (i) risks associated with our investments, (ii) risks associated with our operations, (iii) risks associated with adverse developments in mortgage finance and credit markets, (iv) risks related to financing, (iv) risks related to accounting matters and our 1940 act exemption, (v) regulatory and legal risks, (vi) risks related to our capital stock and (vii) federal income tax risks. You should carefully consider the risk factors set forth in our 2017 Form 10-K. As of the date hereof, there have been no material changes to the risk factors set forth in our Form 10-K for the year ended December 31, 2017.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In February 2018, our Board of Directors reauthorized \$100 million under our share repurchase program (the “Repurchase Program”).

Pursuant to our Repurchase Program, during the first quarter of 2018, we repurchased approximately 883 thousand of its common stock at an average price of \$16.81 per share for a total of \$15 million.

A summary of the Company's repurchases of common stock for the three months ended March 31, 2018 is as follows:

	Total Number of Common Shares Repurchased	Average Price Paid per Share	Total Number of Shares Purchased As Part of Publicly Announced Plans or Programs	Approximate Dollar Value of the Purchase	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plans or Programs
2/1/2018 - 2/28/2018	399,989	\$ 16.83	399,989	\$6,730,682	\$93,269,318
3/1/2018 - 3/31/2018	482,694	\$ 16.79	482,694	\$8,104,317	\$85,165,001
	882,683	\$ 16.81	882,683	\$14,834,999	\$85,165,001

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits
