UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
 QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-768

CATERPILLAR INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation)

37-0602744

(IRS Employer I.D. No.)

100 NE Adams Street, Peoria, Illinois

(Address of principal executive offices)

61629

(Zip Code)

Registrant's telephone number, including area code:

(309) 675-1000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At March 31, 2015, 603,643,663 shares of common stock of the registrant were outstanding.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. A. Nature of operations

Information in our financial statements and related commentary are presented in the following categories:

Machinery, Energy & Transportation – Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation and All Other operating segments and related corporate items and eliminations.

Financial Products – Primarily includes the company’s Financial Products Segment. This category includes Caterpillar Financial Services Corporation (Cat Financial), Caterpillar Financial Insurance Services (Insurance Services) and their respective subsidiaries.

B. Basis of presentation

In the opinion of management, the accompanying financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of (a) the consolidated results of operations for the three month periods ended March 31, 2015 and 2014, (b) the consolidated comprehensive income for the three month periods ended March 31, 2015 and 2014, (c) the consolidated financial position at March 31, 2015 and December 31, 2014, (d) the consolidated changes in stockholders’ equity for the three month periods ended March 31, 2015 and 2014 and (e) the consolidated cash flow for the three month periods ended March 31, 2015 and 2014. The financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America (U.S. GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission.

Certain amounts for prior periods have been reclassified to conform to the current period financial statement presentation.

Interim results are not necessarily indicative of results for a full year. The information included in this Form 10-Q should be read in conjunction with the audited financial statements and notes thereto included in our Company’s annual report on Form 10-K for the year ended December 31, 2014 (2014 Form 10-K).

The December 31, 2014 financial position data included herein is derived from the audited consolidated financial statements included in the 2014 Form 10-K but does not include all disclosures required by U.S. GAAP.

Unconsolidated Variable Interest Entities (VIEs)

We have affiliates, suppliers and dealers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support, we do not have the power to direct the activities that most significantly impact the entity’s economic performance. Our maximum exposure to loss from VIEs for which we are not the primary beneficiary was as follows:

(Millions of dollars)	March 31, 2015	December 31, 2014
Receivables - trade and other	\$43	\$36
Receivables - finance	475	216
Long-term receivables - finance	45	285
Investments in unconsolidated affiliated companies	24	83
Guarantees	54	129

Total	\$641	\$749
-------	-------	-------

2. New accounting guidance

Reporting discontinued operations and disclosures of disposals of components of an entity – In April 2014, the Financial Accounting Standards Board (FASB) issued accounting guidance for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. The guidance defines a discontinued

8

Table of Contents

operation as a disposal of a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. This guidance was effective January 1, 2015 and did not have a material impact on our financial statements.

Revenue recognition – In May 2014, the FASB issued new revenue recognition guidance to provide a single, comprehensive revenue recognition model for all contracts with customers. Under the new guidance, an entity will recognize revenue to depict the transfer of promised goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. A five step model has been introduced for an entity to apply when recognizing revenue. The new guidance also includes enhanced disclosure requirements, and is effective January 1, 2017. Entities have the option to apply the new guidance under a retrospective approach to each prior reporting period presented, or a modified retrospective approach with the cumulative effect of initially applying the new guidance recognized at the date of initial application within the Consolidated Statement of Changes in Stockholders' Equity. We are in the process of evaluating the application and implementation of the new guidance.

Variable interest entities (VIE) – In February 2015, the FASB issued accounting guidance on the consolidation of VIEs. The new guidance revises previous guidance by establishing an analysis for determining whether a limited partnership or similar entity is a VIE and whether outsourced decision-maker fees are considered variable interests. In addition, the new guidance revises how a reporting entity evaluates economics and related parties when assessing who should consolidate a VIE. This guidance is effective January 1, 2016. We do not expect the adoption to have a material impact on our financial statements.

Presentation of debt issuance costs – In April 2015, the FASB issued accounting guidance which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt liability. Prior to the issuance of the standard, debt issuance costs were required to be presented in the balance sheet as an asset. This guidance is effective January 1, 2016. We do not expect the adoption to have a material impact on our financial statements.

3. Stock-based compensation

Accounting for stock-based compensation requires that the cost resulting from all stock-based payments be recognized in the financial statements based on the grant date fair value of the award. Stock-based compensation primarily consists of stock options, restricted stock units (RSUs) and stock-settled stock appreciation rights (SARs). Stock-based compensation awards granted prior to 2015 will vest three years after the date of grant. The awards granted in 2015 will vest according to a three-year graded vesting schedule. One-third of the award will become vested on the first anniversary of the grant date, one-third of the award will become vested on the second anniversary of the grant date and one-third of the award will become vested on the third anniversary of the grant date. Stock-based compensation expense will be recognized on a straight-line basis over the requisite service period for awards with terms that specify cliff vesting or graded vesting and contain only service conditions.

Upon separation from service, if the participant is 55 years of age or older with more than five years of service, the participant meets the criteria for a "Long Service Separation". Prior to 2015, our stock-based compensation award terms allowed for the immediate vesting upon separation for employees who met the criteria for a "Long Service Separation" and fulfilled a requisite service period of six months. For these employees, compensation expense was recognized over the period from the grant date to the end date of the six-month requisite service period. Our stock-based compensation award terms for the 2015 grant allowed for the immediate vesting upon separation for employees who met the criteria for a "Long Service Separation" with no requisite service period. For these employees, compensation expense for the 2015 grant was recognized immediately on the grant date. For employees who become eligible for immediate vesting under a "Long Service Separation" subsequent to the grant date and prior to the completion of the vesting period, compensation expense is recognized over the period from grant date to the date

eligibility is achieved. If the "Long Service Separation" criteria are met, the vested options/SARs will have a life that is the lesser of ten years from the original grant date or five years from the separation date.

We recognized pretax stock-based compensation expense in the amount of \$135 million and \$53 million for the three months ended March 31, 2015 and 2014, respectively. The increase in stock-based compensation expense was primarily due to the change in award terms for participants that met the criteria for a "Long Service Separation", as the removal of the six-month requisite service period results in higher expense in the first quarter (period of grant) and lower expense over the following two quarters.

Table of Contents

The following table illustrates the type and fair value of the stock-based compensation awards granted during the three month periods ended March 31, 2015 and 2014, respectively:

	2015		2014		2014	
	Shares Granted	Weighted-Average Fair Value Per Share	Weighted-Average Grant Date Stock Price	Shares Granted	Weighted-Average Fair Value Per Share	Weighted-Average Grant Date Stock Price
Stock options	7,939,497	\$ 23.61	\$ 83.34	4,448,218	\$ 29.52	\$ 96.31
RSUs	1,805,044	\$ 77.47	\$ 82.99	1,429,512	\$ 89.18	\$ 96.31

The following table provides the assumptions used in determining the fair value of the stock-based awards for the three month periods ended March 31, 2015 and 2014, respectively:

	Grant Year	
	2015	2014
Weighted-average dividend yield	2.27%	2.15%
Weighted-average volatility	28.4%	28.2%
Range of volatilities	19.9-35.9%	18.4-36.2%
Range of risk-free interest rates	0.22-2.08%	0.12-2.60%
Weighted-average expected lives	8 years	8 years

As of March 31, 2015, the total remaining unrecognized compensation expense related to nonvested stock-based compensation awards was \$369 million, which will be amortized over the weighted-average remaining requisite service periods of approximately 2.4 years.

4. Derivative financial instruments and risk management

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option, and cross currency contracts, interest rate swaps, and commodity forward and option contracts. Our derivative activities are subject to the management, direction and control of our senior financial officers. Risk management practices, including the use of financial derivative instruments, are presented to the Audit Committee of the Board of Directors at least annually.

All derivatives are recognized on the Consolidated Statement of Financial Position at their fair value. On the date the derivative contract is entered into, we designate the derivative as (1) a hedge of the fair value of a recognized asset or liability (fair value hedge), (2) a hedge of a forecasted transaction or the variability of cash flow to be paid (cash flow hedge), or (3) an undesignated instrument. Changes in the fair value of a derivative that is qualified, designated and highly effective as a fair value hedge, along with the gain or loss on the hedged recognized asset or liability that is attributable to the hedged risk, are recorded in current earnings. Changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge are recorded in Accumulated other comprehensive income (loss) (AOCI), to the extent effective, on the Consolidated Statement of Financial Position until they are reclassified to earnings in the same period or periods during which the hedged transaction affects earnings. Changes

in the fair value of undesignated derivative instruments and the ineffective portion of designated derivative instruments are reported in current earnings. Cash flow from designated derivative financial instruments are classified within the same category as the item being hedged on the Consolidated Statement of Cash Flow. Cash flow from undesignated derivative financial instruments are included in the investing category on the Consolidated Statement of Cash Flow.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair value hedges to specific assets and liabilities on the Consolidated Statement of Financial Position and linking cash flow hedges to specific forecasted transactions or variability of cash flow.

Table of Contents

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the designated derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When a derivative is determined not to be highly effective as a hedge or the underlying hedged transaction is no longer probable, we discontinue hedge accounting prospectively, in accordance with the derecognition criteria for hedge accounting.

Foreign Currency Exchange Rate Risk

Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of sales made and costs incurred in foreign currencies. Movements in foreign currency rates also affect our competitive position as these changes may affect business practices and/or pricing strategies of non-U.S.-based competitors. Additionally, we have balance sheet positions denominated in foreign currencies, thereby creating exposure to movements in exchange rates.

Our Machinery, Energy & Transportation operations purchase, manufacture and sell products in many locations around the world. As we have a diversified revenue and cost base, we manage our future foreign currency cash flow exposure on a net basis. We use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to five years.

We generally designate as cash flow hedges at inception of the contract any Australian dollar, Brazilian real, British pound, Canadian dollar, Chinese yuan, euro, Indian rupee, Japanese yen, Mexican peso, Singapore dollar or Swiss franc forward or option contracts that meet the requirements for hedge accounting and the maturity extends beyond the current quarter-end. Designation is performed on a specific exposure basis to support hedge accounting. The remainder of Machinery, Energy & Transportation foreign currency contracts are undesignated, including any hedges designed to protect our competitive exposure.

As of March 31, 2015, \$62 million of deferred net losses, net of tax, included in equity (AOCI in the Consolidated Statement of Financial Position), are expected to be reclassified to current earnings (Other income (expense) in the Consolidated Statement of Results of Operations) over the next twelve months when earnings are affected by the hedged transactions. The actual amount recorded in Other income (expense) will vary based on exchange rates at the time the hedged transactions impact earnings.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions, and future transactions denominated in foreign currencies. Our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our receivables and debt, and exchange rate risk associated with future transactions denominated in foreign currencies. Substantially all such foreign currency forward, option and cross currency contracts are undesignated.

Interest Rate Risk

Interest rate movements create a degree of risk by affecting the amount of our interest payments and the value of our fixed-rate debt. Our practice is to use interest rate derivatives to manage our exposure to interest rate changes.

Our Machinery, Energy & Transportation operations generally use fixed-rate debt as a source of funding. Our objective is to minimize the cost of borrowed funds. Our policy allows us to enter into fixed-to-floating interest rate swaps and forward rate agreements to meet that objective. We designate fixed-to-floating interest rate swaps as fair

value hedges at inception of the contract, and we designate certain forward rate agreements as cash flow hedges at inception of the contract.

As of March 31, 2015, \$4 million of deferred net losses, net of tax, included in equity (AOCI in the Consolidated Statement of Financial Position), related to Machinery, Energy & Transportation forward rate agreements, are expected to be reclassified to current earnings (Interest expense excluding Financial Products in the Consolidated Statement of Results of Operations) over the next twelve months.

Financial Products operations has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate) of Cat Financial's debt portfolio with the interest rate profile of their receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, we use interest rate derivative instruments

Table of Contents

to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

Our policy allows us to use fixed-to-floating, floating-to-fixed and floating-to-floating interest rate swaps to meet the match-funding objective. We designate fixed-to-floating interest rate swaps as fair value hedges to protect debt against changes in fair value due to changes in the benchmark interest rate. We designate most floating-to-fixed interest rate swaps as cash flow hedges to protect against the variability of cash flows due to changes in the benchmark interest rate.

As of March 31, 2015, \$1 million of deferred net losses, net of tax, included in equity (AOCI in the Consolidated Statement of Financial Position), related to Financial Products floating-to-fixed interest rate swaps, are expected to be reclassified to current earnings (Interest expense of Financial Products in the Consolidated Statement of Results of Operations) over the next twelve months. The actual amount recorded in Interest expense of Financial Products will vary based on interest rates at the time the hedged transactions impact earnings.

We have, at certain times, liquidated fixed-to-floating and floating-to-fixed interest rate swaps at both Machinery, Energy & Transportation and Financial Products. The gains or losses associated with these swaps at the time of liquidation are amortized into earnings over the original term of the previously designated hedged item.

Commodity Price Risk

Commodity price movements create a degree of risk by affecting the price we must pay for certain raw material. Our policy is to use commodity forward and option contracts to manage the commodity risk and reduce the cost of purchased materials.

Our Machinery, Energy & Transportation operations purchase base and precious metals embedded in the components we purchase from suppliers. Our suppliers pass on to us price changes in the commodity portion of the component cost. In addition, we are subject to price changes on energy products such as natural gas and diesel fuel purchased for operational use.

Our objective is to minimize volatility in the price of these commodities. Our policy allows us to enter into commodity forward and option contracts to lock in the purchase price of a portion of these commodities within a five-year horizon. All such commodity forward and option contracts are undesignated.

Table of Contents

The location and fair value of derivative instruments reported in the Consolidated Statement of Financial Position are as follows:

(Millions of dollars)	Consolidated Statement of Financial Position Location	Asset (Liability) Fair Value	
		March 31, 2015	December 31, 2014
Designated derivatives

We enter into International Swaps and Derivatives Association (ISDA) master netting agreements within Machinery, Energy & Transportation and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Under these master netting agreements, net settlement generally permits the company or the counterparty to determine the net amount payable for contracts due on the same date and in the same currency for similar types of derivative transactions. The master netting agreements generally also provide for net settlement of all outstanding contracts with a counterparty in the case of an event of default or a termination event.

Collateral is generally not required of the counterparties or of our company under the master netting agreements. As of March 31, 2015 and December 31, 2014, no cash collateral was received or pledged under the master netting agreements.

Table of Contents

5. Inventories

Inventories (principally using the last-in, first-out (LIFO) method) are comprised of the following:

(Millions of dollars)	March 31, 2015	December 31, 2014
Raw materials	\$2,990	\$2,986
Work-in-process	2,335	2,455
Finished goods	6,514	6,504
Supplies	260	260
Total inventories	\$12,099	\$12,205

6. Investments in unconsolidated affiliated companies

Combined financial information of the unconsolidated affiliated companies accounted for by the equity method (generally on a lag of 3 months or less) was as follows:

Results of Operations of unconsolidated affiliated companies: (Millions of dollars)	Three Months Ended March 31,	
	2015	2014
Sales	\$163	\$390
Cost of sales	125	301
Gross profit	\$38	\$89
Profit (loss)	\$4	\$(14)

Financial Position of unconsolidated affiliated companies: (Millions of dollars)	March 31, 2015	December 31, 2014
Assets:		
Current assets	\$511	\$716
Property, plant and equipment – net	173	653
Other assets	166	557
	850	1,926
Liabilities:		
Current liabilities	290	518
Long-term debt due after one year	148	867
Other liabilities	10	215
	448	1,600
Equity	\$402	\$326

Caterpillar's investments in unconsolidated affiliated companies: (Millions of dollars)	March 31, 2015	December 31, 2014
Investments in equity method companies	\$196	\$248

Edgar Filing: CATERPILLAR INC - Form 10-Q

Plus: Investments in cost method companies	34	9
Total investments in unconsolidated affiliated companies	\$230	\$257

The changes in the 2015 results of operations, financial position and investments in equity method companies noted above are primarily related to the sale of Caterpillar's 35 percent equity interest in a third party logistics business, formerly Caterpillar Logistics Services, LLC, which occurred on February 19, 2015.

Table of Contents

7. Intangible assets and goodwill

A. Intangible assets

Intangible assets are comprised of the following:

(Millions of dollars)	Weighted Amortizable Life (Years)	March 31, 2015		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$2,400	\$(687)) \$1,713
Intellectual property	11	1,656	(579)) 1,077
Other	11	234	(134)) 100
Total finite-lived intangible assets	14	4,290	(1,400)) 2,890

	Weighted Amortizable Life (Years)	December 31, 2014		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$2,489	\$(669)) \$1,820
Intellectual property	11	1,724	(578)) 1,146
Other	11	239	(129)) 110
Total finite-lived intangible assets	14	4,452	(1,376)) 3,076

Amortization expense for the three months ended March 31, 2015 and 2014 was \$87 million and \$92 million, respectively. Amortization expense related to intangible assets is expected to be:

(Millions of dollars)					
2015	2016	2017	2018	2019	Thereafter
\$331	\$310	\$308	\$303	\$301	\$1,424

B. Goodwill

We test goodwill for impairment annually and whenever events or circumstances make it more likely than not that an impairment may have occurred. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis. Goodwill is reviewed for impairment utilizing a qualitative assessment or a two-step process. We have an option to make a qualitative assessment of a reporting unit's goodwill for impairment. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the two-step process, the first step requires us to compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, the goodwill is not considered impaired. If the carrying value is higher than the fair value, there is an indication that an impairment may exist and the second step is required. In step two, the implied fair value of goodwill is calculated as the excess of the fair value of a reporting unit over the fair values assigned to its assets and liabilities. If the implied fair value of goodwill is less than the carrying value of the reporting unit's goodwill, the difference is recognized as an impairment loss. No goodwill

was impaired during the three months ended March 31, 2015 or 2014.

Table of Contents

The changes in carrying amount of goodwill by reportable segment for the three months ended March 31, 2015 were as follows:

(Millions of dollars)	December 31, 2014	Other Adjustments ¹	March 31, 2015	
Construction Industries				
Goodwill	\$275	\$(7) \$268

¹ Other adjustments are comprised primarily of foreign currency translation.

² Includes All Other operating segments (See Note 15).

8. Available-for-sale securities

We have investments in certain debt and equity securities, primarily at Insurance Services, that have been classified as available-for-sale and recorded at fair value based upon quoted market prices. These investments are primarily included in Other assets in the Consolidated Statement of Financial Position. Unrealized gains and losses arising from the revaluation of available-for-sale securities are included, net of applicable deferred income taxes, in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position). Realized gains and losses on sales of investments are generally determined using the specific identification method for debt and equity securities and are included in Other income (expense) in the Consolidated Statement of Results of Operations.

Table of Contents

(Millions of dollars)	March 31, 2015			December 31, 2014

Total	\$244	\$3	\$173	\$3	\$417	\$6

¹ Indicates length of time that individual securities have been in a continuous unrealized loss position.

Mortgage-Backed Debt Securities. The unrealized losses on our investments in mortgage-backed securities relate to changes in interest rates and credit-related yield spreads since time of purchase. We do not intend to sell the investments and it is not likely that we will be required to sell these investments before recovery of their amortized cost basis. We do not consider these investments to be other-than-temporarily impaired as of March 31, 2015.

Table of Contents

Equity Securities. Insurance Services maintains a well-diversified equity portfolio consisting of two specific mandates: large capitalization value stocks and smaller company growth stocks. The unrealized losses on our investments in equity securities relate to inherent risks of individual holdings and/or their respective sectors. U.S. equity valuations were higher on average during the first quarter of 2015 on generally favorable economic data. We do not consider these investments to be other-than-temporarily impaired as of March 31, 2015.

The cost basis and fair value of the available-for-sale debt securities at March 31, 2015, by contractual maturity, is shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to prepay and creditors may have the right to call obligations.

(Millions of dollars)	March 31, 2015	
	Cost Basis	Fair Value
Due in one year or less	\$58	\$58
Due after one year through five years	723	743
Due after five years through ten years	39	41
Due after ten years	30	31
U.S. governmental agency mortgage-backed securities	277	281
Residential mortgage-backed securities	14	14
Commercial mortgage-backed securities	60	64
Total debt securities – available-for-sale	\$1,201	\$1,232

Sales of Securities:

9. Postretirement benefits

A. Pension and postretirement benefit costs

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits		
	March 31,		March 31,		March 31,		
	2015	2014	2015	2014	2015	2014	
For the three months ended:							
Components of net periodic benefit cost:							
Service cost	\$46	\$39	\$29	\$28	\$25	\$20	
Interest cost	151	162	39	46	46	53	
Expected return on plan assets ¹	(220)	(221)	(67)	(65)	(13)	(13)	
Amortization of:							
Prior service cost (credit) ²	—	4	—	—	(13)	(13)	
Net actuarial loss (gain) ³	127	98	25	22	13	10	
Net periodic benefit cost	104	82	26	31	58	57	
Curtailments, settlements and termination benefits ⁴	—	—	1	—	—	—	
Total cost included in operating profit	\$104	\$82	\$27	\$31	\$58	\$57	
Weighted-average assumptions used to determine net cost:							
Discount rate	3.8	% 4.6	% 3.3	% 4.1	% 3.9	% 4.6	%
Expected rate of return on plan assets	7.4	% 7.8	% 6.8	% 6.9	% 7.8	% 7.8	%
Rate of compensation increase	4.0	% 4.0	% 4.0	% 4.2	% 4.0	% 4.0	%

¹ Expected return on plan assets developed using calculated market-related value of plan assets which recognizes differences in expected and actual returns over a three-year period.

Prior service cost (credit) for both pension and other postretirement benefits are generally amortized using the straight-line method over the average remaining service period of active employees expected to receive benefits from the plan. For pension plans in which all or almost all of the plan's participants are inactive and other postretirement benefit plans in which all or almost all of the plan's participants are fully eligible for benefits under the plan, prior service cost (credit) are amortized using the straight-line method over the remaining life expectancy of those participants.

³ Net actuarial loss (gain) for pension and other postretirement benefit plans are generally amortized using the straight-line method over the average remaining service period of active employees expected to receive benefits from the plan. For plans in which all or almost all of the plan's participants are inactive, net actuarial loss (gain) are amortized using the straight-line method over the remaining life expectancy of the inactive participants.

⁴ Curtailments, settlements and termination benefits were recognized in Other operating (income) expenses in the Consolidated Statement of Results of Operations.

We made \$77 million of contributions to our pension plans during the three months ended March 31, 2015. We currently anticipate full-year 2015 contributions of approximately \$180 million, all of which are required. We made \$279 million of contributions to our pension plans during the three months ended March 31, 2014.

B. Defined contribution benefit costs

Total company costs related to our defined contribution plans were as follows:

(Millions of dollars)	Three Months Ended	
	March 31,	
	2015	2014
U.S. Plans	\$83	\$81
Non-U.S. Plans	18	20
	\$101	\$101

Table of Contents

10. Guarantees and product warranty

We have provided an indemnity to a third-party insurance company for potential losses related to performance bonds issued on behalf of Caterpillar dealers. The bonds are issued to insure governmental agencies against nonperformance by certain dealers. We also provided guarantees to a third-party related to the performance of contractual obligations by certain Caterpillar dealers. The guarantees cover potential financial losses incurred by the third-party resulting from the dealers' nonperformance.

We provide loan guarantees to third-party lenders for financing associated with machinery purchased by customers. These guarantees have varying terms and are secured by the machinery. In addition, Cat Financial participates in standby letters of credit issued to third parties on behalf of their customers. These standby letters of credit have varying terms and beneficiaries and are secured by customer assets.

We have provided a guarantee to one of our customers in Brazil related to the performance of contractual obligations by a supplier consortium to which one of our Caterpillar subsidiaries is a member. The guarantees cover potential damages (some of them capped) incurred by the customer resulting from the supplier consortium's non-performance. The guarantee will expire when the supplier consortium performs all its contractual obligations, which is expected to be completed in 2025.

We have provided guarantees to third-party lessors for certain properties leased by a third party logistics business, formerly Caterpillar Logistics Services LCC, in which we sold our 35 percent equity interest in the first quarter of 2015 (see Note 18). The guarantees are for the possibility that the third party logistics business would default on real estate lease payments. The guarantees were granted at lease inception and generally will expire at the end of the lease terms.

No significant loss has been experienced or is anticipated under any of these guarantees. At March 31, 2015 and December 31, 2014, the related liability was \$13 million and \$12 million, respectively. The maximum potential amount of future payments (undiscounted and without reduction for any amounts that may possibly be recovered under recourse or collateralized provisions) we could be required to make under the guarantees are as follows:

(Millions of dollars)	March 31, 2015	December 31, 2014
Caterpillar dealer guarantees	\$198	\$209
Customer guarantees	58	49
Customer guarantees – supplier consortium	284	321
Third party logistics business guarantees	123	129
Other guarantees	27	32
Total guarantees	\$690	\$740

Cat Financial provides guarantees to repurchase certain loans of Caterpillar dealers from a special-purpose corporation (SPC) that qualifies as a variable interest entity. The purpose of the SPC is to provide short-term working capital loans to Caterpillar dealers. This SPC issues commercial paper and uses the proceeds to fund its loan program. Cat Financial has a loan purchase agreement with the SPC that obligates Cat Financial to purchase certain loans that are not paid at maturity. Cat Financial receives a fee for providing this guarantee, which provides a source of liquidity for the SPC. Cat Financial is the primary beneficiary of the SPC as its guarantees result in Cat Financial having both the power to direct the activities that most significantly impact the SPC's economic performance and the obligation to absorb losses, and therefore Cat Financial has consolidated the financial statements of the SPC. As of March 31, 2015 and December 31, 2014, the SPC's assets of \$1,144 million and \$1,086 million, respectively, are primarily comprised

of loans to dealers and the SPC's liabilities of \$1,144 million and \$1,085 million, respectively, are primarily comprised of commercial paper. The assets of the SPC are not available to pay Cat Financial's creditors. Cat Financial may be obligated to perform under the guarantee if the SPC experiences losses. No loss has been experienced or is anticipated under this loan purchase agreement.

Our product warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). Specific rates are developed for each product shipment month and are updated monthly based on actual warranty claim experience.

Table of Contents

(Millions of dollars)	2015	
Warranty liability, January 1	\$1,426	
Reduction in liability (payments)	(225)
Increase in liability (new warranties)	188	
Warranty liability, March 31	\$1,389	
(Millions of dollars)	2014	
Warranty liability, January 1	\$1,367	
Reduction in liability (payments)	(1,071)
Increase in liability (new warranties)	1,130	¹
Warranty liability, December 31	\$1,426	

¹ The increase in liability includes approximately \$170 million for changes in estimates for pre-existing warranties due to higher than expected actual warranty claim experience.

11. Profit per share

Computations of profit per share:	Three Months Ended	
(Dollars in millions except per share data)	March 31,	
	2015	2014
Profit for the period (A) ¹	\$1,111	\$922
Determination of shares (in millions):		
Weighted-average number of common shares outstanding (B)	604.9	626.7
Shares issuable on exercise of stock awards, net of shares assumed to be purchased out of proceeds at average market price	7.8	12.6
Average common shares outstanding for fully diluted computation (C) ²	612.7	639.3
Profit per share of common stock:		
Assuming no dilution (A/B)	\$1.84	\$1.47
Assuming full dilution (A/C) ²	\$1.81	\$1.44
Shares outstanding as of March 31 (in millions)	603.6	624.2

¹ Profit attributable to common stockholders.

² Diluted by assumed exercise of stock-based compensation awards using the treasury stock method.

SARs and stock options to purchase 22,360,627 and 10,415,733 common shares were outstanding for the three months ended March 31, 2015 and 2014, respectively, which were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

In February 2007, the Board of Directors authorized the repurchase of \$7.5 billion of Caterpillar common stock (the 2007 Authorization), and in December 2011, the 2007 Authorization was extended through December 2015. In January 2014, we completed the 2007 Authorization and entered into a definitive agreement with Citibank, N.A. to purchase shares of our common stock under an accelerated stock repurchase transaction (January 2014 ASR Agreement), which was completed in March 2014. In accordance with the terms of the January 2014 ASR Agreement, a total of approximately 18.1 million shares of our common stock were repurchased at an aggregate cost to Caterpillar

of approximately \$1.7 billion.

In January 2014, the Board approved a new authorization to repurchase up to \$10.0 billion of Caterpillar common stock, which will expire on December 31, 2018. During the first quarter of 2015, a total of 4.8 million shares of our common

23

Table of Contents

stock were repurchased at an aggregate cost to Caterpillar of \$400 million. Through the end of the first quarter of 2015, \$2.9 billion of the \$10.0 billion authorization was spent.

12. Accumulated other comprehensive income (loss)

Comprehensive income and its components are presented in the Consolidated Statement of Comprehensive Income. Changes in Accumulated other comprehensive income (loss), net of tax, included in the Consolidated Statement of Changes in Stockholders' Equity, consisted of the following:

(Millions of dollars)	Foreign currency translation	Pension and other postretirement benefits	Derivative financial instruments	Available-for-sale securities	Total
Three Months Ended March 31, 2015					
Balance at December 31, 2014	\$ (988)) \$ (5,407)) \$ (119)) \$ 83	\$ (6,431)
Other comprehensive income (loss) before reclassifications	(791)) 5	(14)) 8	(792)
Amounts reclassified from accumulated other comprehensive (income) loss	—	100	24	(2)) 122
Other comprehensive income (loss)	(791)) 105	10	6	(670)
Balance at March 31, 2015	\$ (1,779)) \$ (5,302)) \$ (109)) \$ 89	\$ (7,101)
Three Months Ended March 31, 2014					
Balance at December 31, 2013	\$ 176) \$ (4,152)) \$ (5)) \$ 83	\$ (3,898)
Other comprehensive income (loss) before reclassifications	40	—	(16)) 8	32
Amounts reclassified from accumulated other comprehensive (income) loss	—	80	(5)) (10)) 65
Other comprehensive income (loss)	40	80	(21)) (2)) 97
Balance at March 31, 2014	\$ 216) \$ (4,072)) \$ (26)) \$ 81	\$ (3,801)

Table of Contents

The effect of the reclassifications out of Accumulated other comprehensive income (loss) on the Consolidated Statement of Results of Operations is as follows:

(Millions of dollars)	Classification of income (expense)	Three Months Ended March 31,	
		2015	2014
Pension and other postretirement benefits:			
Amortization of actuarial gain (loss)	Note 9 ¹	\$ (165) \$ (130
Amortization of prior service credit (cost)	Note 9 ¹	13	9
Reclassifications before tax		(152) (121
Tax (provision) benefit		52	41
Reclassifications net of tax		\$ (100) \$ (80
Derivative financial instruments:			
Foreign exchange contracts	Other income (expense)	\$ (35) \$ 10
Interest rate contracts	Interest expense excluding Financial Products	(2) —
Interest rate contracts	Other income (expense)	—	(1
Interest rate contracts	Interest expense of Financial Products	(1) (1
Reclassifications before tax		(38) 8
Tax (provision) benefit		14	(3
Reclassifications net of tax		\$ (24) \$ 5
Available-for-sale securities:			
Realized gain (loss)	Other income (expense)	\$ 3	\$ 14
Tax (provision) benefit		(1) (4
Reclassifications net of tax		\$ 2	\$ 10
Total reclassifications from Accumulated other comprehensive income (loss)		\$ (122) \$ (65

¹ Amounts are included in the calculation of net periodic benefit cost. See Note 9 for additional information.

13. Environmental and legal matters

The Company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs are accrued against our earnings. Costs are accrued

based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses in the Consolidated Statement of Financial Position. There is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

Table of Contents

On January 8, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requests documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company received an additional subpoena relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries. The Company is cooperating with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On September 12, 2014, the SEC notified the Company that it was conducting an informal investigation relating to Caterpillar SARL and related structures. The SEC asked the Company to preserve relevant documents and, on a voluntary basis, the Company made a presentation to the staff of the SEC on these topics and is producing documents responsive to a voluntary request made by the SEC. The Company is cooperating with the SEC regarding this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On September 10, 2014, the SEC issued to Caterpillar a subpoena seeking information concerning the Company's accounting for the goodwill relating to its acquisition of Bucyrus International Inc. in 2011 and related matters. The Company is cooperating with the SEC regarding this subpoena and its ongoing investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On March 20, 2014, Brazil's Administrative Council for Economic Defense (CADE) published a Technical Opinion which named 18 companies and over 100 individuals as defendants, including two subsidiaries of Caterpillar Inc., MGE - Equipamentos e Serviços Ferroviários Ltda. (MGE) and Caterpillar Brasil Ltda. The publication of the Technical Opinion opened CADE's official administrative investigation into allegations that the defendants participated in anticompetitive bid activity for the construction and maintenance of metro and train networks in Brazil. While companies cannot be held criminally liable for anticompetitive conduct in Brazil, criminal charges have been brought against two current employees of MGE and one former employee of MGE involving the same conduct alleged by CADE. The Company has responded to all requests for information from the authorities. The Company is unable to predict the outcome or reasonably estimate the potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On October 24, 2013, Progress Rail received a grand jury subpoena from the U.S. District Court for the Central District of California. The subpoena requests documents and information from Progress Rail, United Industries Corporation, a wholly-owned subsidiary of Progress Rail, and Caterpillar Inc. relating to allegations that Progress Rail conducted improper or unnecessary railcar inspections and repairs and improperly disposed of parts, equipment, tools and other items. In connection with this subpoena, Progress Rail was informed by the U.S. Attorney for the Central District of California that it is a target of a criminal investigation into potential violations of environmental laws and alleged improper business practices. The Company is cooperating with the authorities and is currently in discussions regarding a potential resolution of the matter. Although the Company believes a loss is probable, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental

matters or intellectual property rights. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

Table of Contents

14. Income taxes

The provision for income taxes for the first quarter of 2015 reflects an estimated annual effective tax rate of 28.5 percent compared with 29.5 percent for the first quarter of 2014, excluding the items discussed below. The decrease is primarily due to a more favorable expected geographic mix of profits from a tax perspective in 2015. The impact of the U.S. research and development tax credit is not included in either the first quarter of 2015 or 2014 as it was renewed for 2014 in the fourth quarter of 2014 and has not been renewed for 2015.

The provision for income taxes in the first quarter of 2014 also included a net charge of \$22 million consisting of a \$55 million charge to correct for an error which resulted in an understatement of tax liabilities for prior years offset by a \$33 million benefit to reflect a settlement with the U.S. Internal Revenue Service (IRS) related to 1992 through 1994.

On January 30, 2015, we received a Revenue Agent's Report (RAR) from the IRS indicating the end of the field examination of our U.S. tax returns for 2007 to 2009 including the impact of a loss carryback to 2005. The RAR proposed tax increases and penalties for these years of approximately \$1 billion primarily related to two significant areas that we are vigorously contesting through the IRS Appeals process. In the first area, the IRS has proposed to tax in the United States profits earned from certain parts transactions by one of our non-U.S. subsidiaries, Caterpillar SARL (CSARL), based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. We have filed U.S. tax returns on this same basis for years after 2009. In the second area, the IRS disallowed approximately \$125 million of foreign tax credits that arose as a result of certain financings unrelated to CSARL. Based on the information currently available, we do not anticipate a significant increase or decrease to our unrecognized tax benefits for these matters within the next 12 months. We currently believe the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

15. Segment information

A. Basis for segment information

Our Executive Office is comprised of five Group Presidents, a Senior Vice President, an Executive Vice President and a CEO. Group Presidents are accountable for a related set of end-to-end businesses that they manage. The Senior Vice President leads the Caterpillar Enterprise System Group and the Executive Vice President leads the Law and Public Policy Division. The CEO allocates resources and manages performance at the Group President level. As such, the CEO serves as our Chief Operating Decision Maker and operating segments are primarily based on the Group President reporting structure.

Three of our operating segments, Construction Industries, Resource Industries and Energy & Transportation are led by Group Presidents. One operating segment, Financial Products, is led by a Group President who also has responsibility for Corporate Services. Corporate Services is a cost center primarily responsible for the performance of certain support functions globally and to provide centralized services; it does not meet the definition of an operating segment. One Group President leads three smaller operating segments that are included in the All Other operating segments. The Caterpillar Enterprise System Group and Law and Public Policy Division are cost centers and do not meet the definition of an operating segment.

Effective January 1, 2015, responsibility for product management for certain components moved from Resource Industries to Energy & Transportation. Segment information for 2014 has been retrospectively adjusted to conform to the 2015 presentation.

B. Description of segments

We have seven operating segments, of which four are reportable segments. Following is a brief description of our reportable segments and the business activities included in the All Other operating segments:

Construction Industries: A segment primarily responsible for supporting customers using machinery in infrastructure and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes backhoe loaders, small wheel loaders, small track-type tractors, skid steer loaders, multi-terrain loaders, mini excavators, compact wheel loaders, telehandlers, select work tools, small, medium and large track excavators, wheel excavators, medium

Table of Contents

wheel loaders, compact track loaders, medium track-type tractors, track-type loaders, motor graders, pipelayers, and mid-tier soil compactors. In addition, Construction Industries has responsibility for an integrated manufacturing cost center. Inter-segment sales are a source of revenue for this segment.

Resource Industries: A segment primarily responsible for supporting customers using machinery in mining and quarrying applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors, large mining trucks, hard rock vehicles, longwall miners, electric rope shovels, draglines, hydraulic shovels, drills, highwall miners, large wheel loaders, off-highway trucks, articulated trucks, wheel tractor scrapers, wheel dozers, select work tools, machinery components and electronics and control systems. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development. In addition, segment profit includes the impact from divestiture of portions of the Bucyrus distribution business. Inter-segment sales are a source of revenue for this segment.

Energy & Transportation: A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving power generation, industrial, oil and gas and transportation applications, including marine and rail-related businesses. Responsibilities include business strategy, product design, product management, development, manufacturing, marketing, sales and product support of turbines and turbine-related services, reciprocating engine powered generator sets, integrated systems used in the electric power generation industry, reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Caterpillar machinery; the business strategy, product design, product management, development, manufacturing, remanufacturing, leasing, and service of diesel-electric locomotives and components and other rail-related products and services. Inter-segment sales are a source of revenue for this segment.

Financial Products Segment: Provides financing to customers and dealers for the purchase and lease of Caterpillar and other equipment, as well as some financing for Caterpillar sales to dealers. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides various forms of insurance to customers and dealers to help support the purchase and lease of our equipment.

All Other operating segments: Primarily includes activities such as: the remanufacturing of Cat® engines and components and remanufacturing services for other companies as well as the business strategy, product management, development, manufacturing, marketing and product support of undercarriage, specialty products, hardened bar stock components and ground engaging tools primarily for Cat products, paving products, forestry products, and industrial and waste products; the product management, development, marketing, sales and product support of on-highway vocational trucks for North America; parts distribution; distribution services responsible for dealer development and administration including a wholly-owned dealer in Japan, dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts. Results for the All Other operating segments are included as a reconciling item between reportable segments and consolidated external reporting.

C. Segment measurement and reconciliations

There are several methodology differences between our segment reporting and our external reporting. The following is a list of the more significant methodology differences:

Machinery, Energy & Transportation segment net assets generally include inventories, receivables, property, plant and equipment, goodwill, intangibles, accounts payable, and customer advances. Liabilities other than accounts payable and customer advances are generally managed at the corporate level and are not included in segment operations. Financial Products Segment assets generally include all categories of assets.

Segment inventories and cost of sales are valued using a current cost methodology.

Goodwill allocated to segments is amortized using a fixed amount based on a 20 year useful life. This methodology difference only impacts segment assets; no goodwill amortization expense is included in segment profit. In addition, only a portion of goodwill for certain acquisitions made in 2011 or later has been allocated to segments.

The present value of future lease payments for certain Machinery, Energy & Transportation operating leases is included in segment assets. The estimated financing component of the lease payments is excluded.

Table of Contents

Currency exposures for Machinery, Energy & Transportation are generally managed at the corporate level and the effects of changes in exchange rates on results of operations within the year are not included in segment profit. The net difference created in the translation of revenues and costs between exchange rates used for U.S. GAAP reporting and exchange rates used for segment reporting is recorded as a methodology difference.

Postretirement benefit expenses are split; segments are generally responsible for service and prior service costs, with the remaining elements of net periodic benefit cost included as a methodology difference.

Machinery, Energy & Transportation segment profit is determined on a pretax basis and excludes interest expense and other income/expense items. Financial Products Segment profit is determined on a pretax basis and includes other income/expense items.

Reconciling items are created based on accounting differences between segment reporting and our consolidated external reporting. Please refer to pages 30 to 34 for financial information regarding significant reconciling items. Most of our reconciling items are self-explanatory given the above explanations. For the reconciliation of profit, we have grouped the reconciling items as follows:

Corporate costs: These costs are related to corporate requirements and strategies that are considered to be for the benefit of the entire organization.

Restructuring costs: Primarily costs for employee separation costs and long-lived asset impairments. A table, Reconciliation of Restructuring Costs on page 32, has been included to illustrate how segment profit would have been impacted by the restructuring costs. See Note 19 for more information.

Methodology differences: See previous discussion of significant accounting differences between segment reporting and consolidated external reporting.

Timing: Timing differences in the recognition of costs between segment reporting and consolidated external reporting. For example, certain costs are reported on the cash basis for segment reporting and the accrual basis for consolidated external reporting.

16. Cat Financial financing activities

Credit quality of finance receivables and allowance for credit losses

Cat Financial applies a systematic methodology to determine the allowance for credit losses for finance receivables. Based upon Cat Financial's analysis of credit losses and risk factors, portfolio segments are as follows:

Customer – Finance receivables with retail customers.

Dealer – Finance receivables with Caterpillar dealers.

Cat Financial further evaluates portfolio segments by the class of finance receivables, which is defined as a level of information (below a portfolio segment) in which the finance receivables have the same initial measurement attribute and a similar method for assessing and monitoring credit risk. Typically, Cat Financial's finance receivables within a geographic area have similar credit risk profiles and methods for assessing and monitoring credit risk. Cat Financial's classes, which align with management reporting for credit losses, are as follows:

North America – Finance receivables originated in the United States or Canada.

Europe – Finance receivables originated in Europe, Africa, Middle East and the Commonwealth of Independent States.

Asia Pacific – Finance receivables originated in Australia, New Zealand, China, Japan, South Korea and Southeast Asia.

Mining – Finance receivables related to large mining customers worldwide.

Latin America – Finance receivables originated in Central and South American countries and Mexico.

Caterpillar Power Finance – Finance receivables related to marine vessels with Caterpillar engines worldwide and Caterpillar electrical power generation, gas compression and co-generation systems and non-Caterpillar equipment that is powered by these systems worldwide.

Impaired finance receivables

For all classes, a finance receivable is considered impaired, based on current information and events, if it is probable that Cat Financial will be unable to collect all amounts due according to the contractual terms of the finance receivable. Finance receivables reviewed for impairment include those that are past due, non-performing or in bankruptcy. Recognition of income is suspended and the finance receivable is placed on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due except in locations where local regulatory requirements dictate a different method, or in instances in which relevant information is known that warrants placing the finance receivable on non-accrual status). Accrual is resumed, and previously suspended income is recognized, when the finance receivable becomes contractually current and/or collection doubts are removed. Cash receipts on impaired finance receivables are recorded against the receivable and then to any unrecognized income.

There were no impaired finance receivables as of March 31, 2015 or December 31, 2014, for the Dealer portfolio segment. The average recorded investment for impaired finance receivables within the Dealer portfolio segment was zero for the three months ended March 31, 2015 and 2014.

Table of Contents

Individually impaired finance receivables for the Customer portfolio segment were as follows:

Non-accrual and past due finance receivables

For all classes, Cat Financial considers a finance receivable past due if any portion of a contractual payment is due and unpaid for more than 30 days. Recognition of income is suspended and the finance receivable is placed on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due except in locations where local regulatory requirements dictate a different method, or in instances in which relevant information is known that warrants placing the finance receivable on non-accrual status). Accrual is resumed, and previously suspended income is recognized, when the finance receivable becomes contractually current and/or collection doubts are removed.

As of March 31, 2015 and December 31, 2014, there were no finance receivables on non-accrual status for the Dealer portfolio segment.

Credit quality of finance receivables

The credit quality of finance receivables is reviewed on a monthly basis. Credit quality indicators include performing and non-performing. Non-performing is defined as finance receivables currently over 120 days past due and/or on non-accrual status or in bankruptcy. Finance receivables not meeting the criteria listed above are considered performing. Non-performing finance receivables have the highest probability for credit loss. The allowance for credit losses attributable to non-performing finance receivables is based on the most probable source of repayment, which is

normally the liquidation of collateral. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. In addition, Cat Financial considers credit enhancements such as additional collateral and contractual third-party guarantees in determining the allowance for credit losses attributable to non-performing finance receivables.

Table of Contents

Troubled Debt Restructurings

A restructuring of a finance receivable constitutes a troubled debt restructuring (TDR) when the lender grants a concession it would not otherwise consider to a borrower experiencing financial difficulties. Concessions granted may include extended contract maturities, inclusion of interest only periods, below market interest rates, extended skip payment periods and reduction of principal and/or accrued interest.

TDRs are reviewed along with other finance receivables as part of management's ongoing evaluation of the adequacy of the allowance for credit losses. The allowance for credit losses attributable to TDRs is based on the most probable source of repayment, which is normally the liquidation of collateral. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. In addition, Cat Financial considers credit enhancements such as additional collateral and contractual third-party guarantees in determining the allowance for credit losses attributable to TDRs. There were no remaining commitments to lend additional funds to a borrower whose terms have been modified in a TDR as of March 31, 2015 and December 31, 2014.

There were no finance receivables modified as TDRs during the three months ended March 31, 2015 or 2014 for the Dealer portfolio segment.

Table of Contents

Finance receivables in the Customer portfolio segment modified as TDRs during the three months ended March 31, 2015 and 2014, were as follows:

17. Fair value disclosures

A. Fair value measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

Level 1 – Quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers

are observable in active markets.

Level 3 – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, we use quoted market prices to determine fair value, and we classify such measurements within Level 1. In some cases where market prices are not available, we make use of observable market based inputs to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not

Table of Contents

available, fair value is based upon internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

Fair value measurements are classified according to the lowest level input or value-driver that is significant to the valuation. A measurement may therefore be classified within Level 3 even though there may be significant inputs that are readily observable.

Fair value measurement includes the consideration of nonperformance risk. Nonperformance risk refers to the risk that an obligation (either by a counterparty or Caterpillar) will not be fulfilled. For financial assets traded in an active market (Level 1 and certain Level 2), the nonperformance risk is included in the market price. For certain other financial assets and liabilities (certain Level 2 and Level 3), our fair value calculations have been adjusted accordingly.

Available-for-sale securities

Our available-for-sale securities, primarily at Insurance Services, include a mix of equity and debt instruments (see Note 8 for additional information). Fair values for our U.S. treasury bonds and equity securities are based upon valuations for identical instruments in active markets. Fair values for other government bonds, corporate bonds and mortgage-backed debt securities are based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.

Derivative financial instruments

The fair value of interest rate swap derivatives is primarily based on models that utilize the appropriate market-based forward swap curves and zero-coupon interest rates to determine discounted cash flows. The fair value of foreign currency and commodity forward, option and cross currency contracts is based on a valuation model that discounts cash flows resulting from the differential between the contract price and the market-based forward rate.

Guarantees

The fair value of guarantees is based upon our estimate of the premium a market participant would require to issue the same guarantee in a stand-alone arms-length transaction with an unrelated party. If quoted or observable market prices are not available, fair value is based upon internally developed models that utilize current market-based assumptions.

Table of Contents

Assets and liabilities measured on a recurring basis at fair value, primarily related to Financial Products, included in our Consolidated Statement of Financial Position as of March 31, 2015 and December 31, 2014 are summarized below:

In addition to the amounts above, Cat Financial impaired loans are subject to measurement at fair value on a nonrecurring basis. A loan is considered impaired when management determines that collection of contractual amounts due is not probable. In these cases, an allowance for credit losses may be established based primarily on the fair value of associated collateral. As the collateral's fair value is based on observable market prices and/or current appraised values, the impaired loans are classified as Level 2 measurements. Cat Financial had impaired loans with a

fair value of \$151 million and \$248 million as of March 31, 2015 and December 31, 2014, respectively.

Table of Contents

B. Fair values of financial instruments

In addition to the methods and assumptions we use to record the fair value of financial instruments as discussed in the Fair value measurements section above, we used the following methods and assumptions to estimate the fair value of our financial instruments:

Cash and short-term investments

Carrying amount approximated fair value.

Restricted cash and short-term investments

Carrying amount approximated fair value. Restricted cash and short-term investments are included in Prepaid expenses and other current assets in the Consolidated Statement of Financial Position.

Finance receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Wholesale inventory receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Short-term borrowings

Carrying amount approximated fair value.

Long-term debt

Fair value for fixed and floating rate debt was estimated based on quoted market prices.

Table of Contents

Please refer to the table below for the fair values of our financial instruments.

(Millions of dollars)	Fair Value of Financial Instruments				Fair Value Levels	Reference

18. Divestitures

Third Party Logistics Business Divestiture

In February 2015, we sold our 35 percent equity interest in the third party logistics business, formerly Caterpillar Logistics Services LLC, to an affiliate of The Goldman Sachs Group, Inc. and investment funds affiliated with Rhône Capital LLC for \$177 million, which was comprised of \$167 million in cash and a \$10 million note receivable included in Long-term receivables - trade and other in the Consolidated Statement of Financial Position. As a result of the sale, we recognized a pretax gain of \$120 million (included in Other income (expense)) and derecognized the carrying value of our noncontrolling interest of \$57 million, which was previously included in Investments in unconsolidated affiliated companies in the Consolidated Statement of Financial Position. The gain on the disposal is included as a reconciling item between Segment profit and Consolidated profit before taxes. The sale of this investment supports Caterpillar's increased focus on growth opportunities in its core businesses.

19. Restructuring costs

For the three months ended March 31, 2015, we recognized \$36 million of restructuring costs in Other operating (income) expenses in the Consolidated Statement of Results of Operations, which included \$34 million of employee separation costs and \$2 million of long-lived asset impairments and other restructuring costs. The restructuring costs in 2015 were primarily related to facility closures and workforce reductions in Europe. For the three months ended

March 31, 2014, we recognized \$149 million of restructuring costs, which included \$142 million of employee separation costs and \$7 million of long-lived asset impairments. For the first three months of 2014, the restructuring costs were primarily related to a reduction in workforce at our Gosselies, Belgium, facility.

Table of Contents

Restructuring costs for the year ended December 31, 2014 were \$441 million which included \$382 million of employee separation costs, \$33 million of long-lived asset impairments and \$26 million of other restructuring costs. The restructuring costs in 2014 were primarily related to a reduction in workforce at our Gosselies, Belgium, facility.

Restructuring costs are a reconciling item between Segment profit and Consolidated profit before taxes. See Note 15 for more information.

Our accounting for separations was dependent upon how the particular program was designed. For voluntary programs, eligible separation costs were recognized at the time of employee acceptance. For involuntary programs, eligible costs were recognized when management had approved the program, the affected employees had been properly notified and the costs were estimable.

The following table summarizes the 2014 and 2015 employee separation activity:

(Millions of dollars)	Total
Liability balance at December 31, 2013	\$89
Increase in liability (separation charges)	382
Reduction in liability (payments and other adjustments)	(289)
Liability balance at December 31, 2014	\$182
Increase in liability (separation charges)	34
Reduction in liability (payments and other adjustments)	(87)
Liability balance at March 31, 2015	\$129

The remaining liability balance as of March 31, 2015 represents costs for employees who have either not yet separated from the Company or whose full severance has not yet been paid. The majority of these remaining costs are expected to be paid in 2015.

In December 2013, we announced a restructuring plan for our Gosselies, Belgium, facility. This restructuring plan was designed to improve the competitiveness of our European manufacturing footprint and achieve competitiveness in our European operations by refocusing our current Gosselies operations on final machine assembly, test and paint with limited component and fabrication operations. This action includes reshaping our supply base for more efficient sourcing, improving factory efficiencies and workforce reductions and was approved by the Belgian Minister of Employment in February 2014. We estimate the total employee cash separation costs to be about \$300 million before tax, which represents substantially all of the restructuring costs to be incurred under the restructuring plan. In 2014, we recognized \$273 million of these separation-related charges. For the three months ended March 31, 2015, we recognized \$7 million of employee separation costs relating to this restructuring plan. The remaining costs are expected to be recognized in 2015.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

First-quarter 2015 sales and revenues were \$12.702 billion, compared with \$13.241 billion in the first quarter of 2014. Profit per share for the first quarter of 2015 was \$1.81, a 26 percent increase from first-quarter 2014 profit per share of \$1.44. Profit was \$1.111 billion in the first quarter of 2015, an increase of 20 percent from \$922 million in the first quarter of 2014.

Highlights for the first quarter of 2015 include:

- First-quarter sales and revenues were \$12.702 billion, down 4 percent from the first quarter of 2014.
- Restructuring costs were \$36 million in the first quarter of 2015, with an after-tax impact of \$0.05 per share.
- First-quarter 2015 profit includes a pre-tax gain of \$120 million, or about \$0.14 per share, on the sale of the remaining interest in our former third party logistics business.
 - Profit per share was \$1.81 in the first quarter of 2015 and \$1.86 per share excluding restructuring costs. Profit in the first quarter of 2014 was \$1.44 per share and \$1.61 per share excluding restructuring costs.
- Machinery, Energy & Transportation (ME&T) operating cash flow was \$1.042 billion in the first quarter of 2015, compared with \$1.878 billion in the first quarter of 2014.
- ME&T debt-to-capital ratio was 37.1 percent, compared with 37.4 percent at the end of 2014.

Restructuring Costs

In 2014, we continued our focus on structural cost reduction and worked on a large number of restructuring activities to help improve our long-term results, incurring \$441 million in restructuring charges. We are taking additional restructuring actions in 2015 and anticipate that these actions will result in charges of about \$250 million.

Notes:

Effective January 1, 2015, responsibility for product management for certain components moved from Resource Industries to Energy & Transportation. Segment information for 2014 has been retrospectively adjusted to conform to the 2015 presentation.

Glossary of terms is included on pages 56-57; first occurrence of terms shown in bold italics.

Information on non-GAAP financial measures is included on page 67.

Table of Contents

Consolidated Results of Operations

THREE MONTHS ENDED MARCH 31, 2015 COMPARED WITH THREE MONTHS ENDED MARCH 31, 2014

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in Consolidated Sales and Revenues between the first quarter of 2014 (at left) and the first quarter of 2015 (at right). Items favorably impacting sales and revenues appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting sales and revenues appear as downward stair steps with dollar amounts reflected in parentheses above each bar. Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Sales and Revenues

Total sales and revenues were \$12.702 billion in the first quarter of 2015, compared with \$13.241 billion in the first quarter of 2014, a decline of \$539 million or 4 percent. The decrease was primarily due to the unfavorable impact of currency, resulting from the weakening of the euro and Japanese yen, and lower sales volume. These unfavorable impacts were partially offset by slightly favorable price realization. Sales declined for both new equipment and aftermarket parts.

Dealer machine and engine inventories increased about \$900 million in the first quarter of 2015 and about \$700 million in the first quarter of 2014. Dealers are independent, and there could be many reasons for changes in their inventory levels. In general, dealers adjust inventory based on their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers. However, dealers generally increase inventory in the first quarter in anticipation of seasonal demand. We expect dealer inventory at the end of 2015 to be lower than the end of 2014.

Sales declined in all regions except North America. In EAME, sales declined 11 percent primarily due to lower end-user demand and the unfavorable impact of currency, as our sales in euros translated into fewer U.S. dollars, partially offset by the favorable impact of changes in dealer inventory. Asia/Pacific sales declined 13 percent, primarily due to lower end-user demand for construction equipment and the unfavorable impact of currency as our sales in Japanese yen translated into fewer U.S. dollars. Sales decreased 19 percent in Latin America, primarily due to lower end-user demand for construction equipment. In North America, sales increased 9 percent, primarily due to the favorable impact of changes in dealer inventory and higher end-user demand primarily for oil and gas applications and construction equipment.

Sales decreased in Construction Industries and Resource Industries and were about flat in Energy & Transportation. Construction Industries' sales decreased 7 percent, primarily due to lower end-user demand. Resource Industries' sales declined 9 percent, primarily due to lower end-user demand in mining. Financial Products' segment revenues were about flat.

Table of Contents

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in Consolidated Operating Profit between the first quarter of 2014 (at left) and the first quarter of 2015 (at right). Items favorably impacting operating profit appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting operating profit appear as downward stair steps with dollar amounts reflected in parentheses above each bar. Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit for the first quarter of 2015 was \$1.527 billion, compared with \$1.398 billion in the first quarter of 2014. The improvement was primarily due to lower restructuring costs, improved price realization and the favorable impact of currency, partially offset by lower volume and increased selling, general and administrative and research and development (SG&A and R&D) expenses. The impact of lower sales volume was partially offset by a favorable mix of products.

Restructuring costs of \$36 million in the first quarter of 2015 were related to several restructuring programs across the company. In the first quarter of 2014, restructuring costs were \$149 million, primarily related to a workforce reduction at the Gosselies, Belgium, facility.

The favorable impact of currency was due to the strengthening of the U.S. dollar in relation to most currencies. Due to our sizable manufacturing presence outside of the United States, the stronger U.S. dollar resulted in a favorable impact to operating profit. About half of the favorable currency impact was due to the Japanese yen, as we are a net exporter from Japan.

Manufacturing costs were about flat as lower material costs were nearly offset by the unfavorable impact of cost absorption, as inventory decreased in the first quarter of 2015, compared to an increase in the first quarter of 2014. SG&A and R&D expenses increased primarily due to stock-based compensation expense and higher spending for new product introduction programs.

Stock-based compensation expense for the first quarter of 2015 was \$135 million, compared to \$53 million in the first quarter of 2014. The increase of \$82 million was primarily related to timing. Beginning with the 2015 annual equity award, we changed the vesting policy to permit immediate vesting upon separation for participants who meet certain criteria (generally, 55 years of age or older and at least five years of service with the company). Stock-based compensation expense for these individuals is now recognized in the first quarter, rather than over a six month period. This change will not impact stock-based compensation expense for the year, but does impact the quarterly expense pattern.

Short-term incentive compensation expense for the first quarter of 2015 was about \$215 million, and we expect the full-year expense will be about \$860 million. Short-term incentive compensation expense in the first quarter of 2014 was about \$260 million, and the full-year 2014 was about \$1.3 billion.

We believe profit will be lower in the remaining quarters of 2015 as we expect slightly lower sales, unfavorable sales mix and higher costs. We expect sales to decrease primarily as a result of lower oil prices which negatively impact Energy & Transportation and Construction Industries' sales in oil-producing countries around the world. In addition, continued weak economic conditions

Table of Contents

and a strong U.S. dollar are creating an increasingly competitive environment. We expect Energy & Transportation sales mix will be unfavorable due to sales declines in oil & gas applications, and Construction Industries sales mix will be negatively impacted from proportionally higher sales of smaller equipment. The first quarter is usually a low cost quarter, and we expect increases in spending during the remainder of the year including higher R&D expense.

Other Profit/Loss Items

Other income/expense was income of \$157 million, compared with income of \$54 million in the first quarter of 2014. The favorable change was primarily due to a gain of \$120 million on the sale of the remaining 35 percent interest in our former third party logistics business.

The provision for income taxes for the first quarter of 2015 reflects an estimated annual tax rate of 28.5 percent compared with 29.5 percent for the first quarter of 2014, excluding the item discussed below. The decrease is primarily due to a more favorable expected geographic mix of profits from a tax perspective in 2015. The impact of the U.S. research and development tax credit is not included in either the first quarter of 2015 or 2014 as it was renewed for 2014 in the fourth quarter of 2014 and has not been renewed for 2015.

The provision for income taxes in the first quarter of 2014 also included a net charge of \$22 million consisting of a \$55 million charge to correct for an error which resulted in an understatement of tax liabilities for prior years offset by a \$33 million benefit to reflect a settlement with the U.S. Internal Revenue Service (IRS) related to 1992 through 1994.

Construction Industries

Construction Industries' sales were \$4.695 billion in the first quarter of 2015, a decrease of \$369 million, or 7 percent, from the first quarter of 2014. The decrease in sales was due to lower volume in all regions except North America and the unfavorable impact of currency, primarily from the euro and the Japanese yen, partially offset by improved price realization. Sales of new equipment decreased, and sales of aftermarket parts were about flat.

• Sales volume declined primarily due to lower deliveries to end users.

• Price realization improved in all regions.

Sales decreased in all regions except North America.

In Asia/Pacific, the sales decline was primarily due to lower sales in China and Japan. In China, the lower sales primarily resulted from continued weak construction activity. Sales in Japan declined due to a weaker Japanese yen, as sales in yen translated into fewer U.S. dollars and lower end-user demand due to weaker economic conditions.

Sales declined in EAME primarily due to the unfavorable impact of changes in dealer inventories, as dealers increased inventory more during the first quarter of 2014 than in the first quarter of 2015. In addition, the impact of currency was unfavorable as sales in euros translated into fewer U.S. dollars.

Decreases in Latin America were primarily related to the absence of a large government order in Brazil that occurred during the first quarter of 2014 and continued weak construction activity.

Sales increased in North America primarily due to the favorable impact of changes in dealer inventories, as dealers increased inventory more during the first quarter of 2015 than in the first quarter of 2014. In addition, price realization was favorable and end-user demand increased modestly. Although still below prior peaks, construction-related activity continues to improve.

Table of Contents

Construction Industries' profit was \$740 million in the first quarter of 2015, compared with \$688 million in the first quarter of 2014. The improvement was mostly due to the favorable impacts of price realization and currency, primarily from the Japanese yen, partially offset by lower volume.

Resource Industries

Resource Industries' sales were \$1.928 billion in the first quarter of 2015, a decrease of \$195 million, or 9 percent from the first quarter of 2014, primarily due to lower sales volume, unfavorable price realization resulting from a competitive pricing environment and the unfavorable impact of currency primarily due to the euro. While sales declined for both new equipment and aftermarket parts, the decline for new equipment was more significant.

The sales volume decrease was primarily related to lower end-user demand, partially offset by the favorable impact of changes in dealer inventories. While dealers continued to reduce inventories during the first quarter of 2015, the reductions were less significant than in the first quarter of 2014.

Worldwide end-user demand continued to be weak and resulted in lower sales in all regions except North America. Sales in North America were about flat as lower mining equipment sales were about offset by an increase in sales for quarry and aggregate equipment.

Commodity prices remained weak and mining customers continued to focus on improving productivity in existing mines and reducing their total capital expenditures as they have for the last several quarters. As a result, both sales and new orders in Resource Industries continued to be weak.

Resource Industries' profit was \$85 million in the first quarter of 2015, compared with \$143 million in the first quarter of 2014. The decrease was primarily the result of unfavorable price realization. The impact of lower sales volume was about offset by a favorable mix of products. Manufacturing costs were about flat as the unfavorable impact from cost absorption was about offset by lower material costs. SG&A and R&D expenses were about flat as increases in new product introduction spending were about offset by cost cutting measures.

Energy & Transportation

Energy & Transportation's sales were \$4.762 billion in the first quarter of 2015, or about flat with the first quarter of 2014. The impact of higher sales volume and improved price realization were about offset by the unfavorable impact of currency. Currency negatively impacted sales in all applications, primarily in EAME. Sales decreases for industrial applications were about offset by increases for transportation applications. Sales of power generation and oil and gas applications were about flat.

Industrial - Sales decreased in EAME and were about flat in all other geographic regions. In EAME, sales decreased primarily due to lower demand for engines used by original equipment manufacturers for most industrial applications.

Transportation - Sales increased in Asia/Pacific due to a large locomotive project and were about flat in all other regions of the world.

Power Generation - Sales were about flat in all regions.

Oil and Gas - Sales were about flat, as increases in North America were about offset by declines in Latin America. In North America, sales increased primarily due to higher end-user demand for equipment used in well servicing and gas compression applications. In Latin America, sales were lower due to the absence of a large project.

Caterpillar sells products that are used in a variety of oil and gas applications, including offshore and land drilling, well servicing, oil and gas production and gas compression. The products we sell to the oil and gas industry include gas turbines and centrifugal natural gas compressors, reciprocating engines, transmissions and well stimulation pumps. Although we are confident in the long-term fundamentals of the oil and gas industry, in the near term and especially in the latter part of 2015, we expect the decline in oil prices will have a negative impact on our sales. We expect that well servicing and drilling will be impacted the earliest and to the greatest magnitude. Sales for gas compression are expected to remain relatively strong in 2015 due to the continued need for global infrastructure build, and sales related to large projects that take years to execute will likely be impacted to a lesser extent in the short term.

In addition to Energy & Transportation, we support the oil and gas industry directly with construction and mining equipment-such as sales of equipment for drill site preparation and infrastructure development and sales of mining equipment to the Canadian oil sands. There are also a variety of indirect exposures, as countries that depend on oil

revenues may reduce expenditures for roads and other infrastructure projects.

Energy & Transportation's profit was \$986 million in the first quarter of 2015, compared with \$833 million in the first quarter of 2014. The improvement was primarily due to higher sales volume, including a favorable mix of products, and improved price realization. Manufacturing costs were about flat, as lower material costs were nearly offset by the unfavorable impact of cost absorption.

Table of Contents

Financial Products Segment

Financial Products' revenues were \$795 million in the first quarter of 2015, a decrease of \$22 million, or 3 percent, from the first quarter of 2014. The decline was mostly due to lower average financing rates primarily in North America, and lower average earning assets in Asia/Pacific, EAME and Latin America, partially offset by higher average earning assets in North America.

Financial Products' profit was \$227 million in the first quarter of 2015, compared with \$240 million in the first quarter of 2014. The unfavorable change was primarily due to a \$10 million decrease in gains on sales of securities at Caterpillar Financial Insurance Services and a \$7 million decrease in net yield on average earning assets, partially offset by a \$15 million decrease in the provision for credit losses at Cat Financial.

At the end of the first quarter of 2015, past dues at Cat Financial were 3.08 percent, compared with 2.17 percent at the end of 2014. The increase in past dues compared to year end 2014 was primarily due to the performance of the Latin American and mining portfolios and seasonality impacts. At the end of the first quarter of 2014, past dues were 2.44 percent. Write-offs, net of recoveries, were \$12 million for the first quarter of 2015, compared with \$38 million for the first quarter of 2014.

As of March 31, 2015, Cat Financial's allowance for credit losses totaled \$392 million, or 1.38 percent of net finance receivables, compared with \$401 million, or 1.36 percent of net finance receivables at year end 2014. The allowance for credit losses as of March 31, 2014, was \$373 million or 1.25 percent of net finance receivables.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$669 million in the first quarter of 2015, about flat with the first quarter of 2014. Corporate items and eliminations include: corporate-level expenses; restructuring costs; timing differences, as some expenses are reported in segment profit on a cash basis; retirement benefit costs other than service cost; currency differences for ME&T, as segment profit is reported using annual fixed exchange rates, and inter-segment eliminations.

Corporate items and eliminations were about flat as lower restructuring costs were about offset by increased stock-based compensation expense.

RESTRUCTURING COSTS

For the three months ended March 31, 2015, we recognized \$36 million of restructuring costs, which included \$34 million of employee separation costs and \$2 million of long-lived asset impairments and other restructuring costs. The restructuring costs in 2015 were primarily related to facility closures and workforce reductions in Europe. For the three months ended March 31, 2014, we recognized \$149 million of restructuring costs, which included \$142 million of employee separation costs and \$7 million of long-lived asset impairments. For the first three months of 2014, the restructuring costs were primarily related to a reduction in workforce at our Gosselies, Belgium, facility.

Restructuring costs for the year ended December 31, 2014 were \$441 million which included \$382 million of employee separation costs, \$33 million of long-lived asset impairments and \$26 million of other restructuring costs. The restructuring costs in 2014 were primarily related to a reduction in workforce at our Gosselies, Belgium, facility.

Restructuring costs are a reconciling item between Segment profit and Consolidated profit before taxes.

The following table summarizes the 2014 and 2015 employee separation activity:

(Millions of dollars)	Total	
Liability balance at December 31, 2013	\$89	
Increase in liability (separation charges)	382	
Reduction in liability (payments and other adjustments)	(289)
Liability balance at December 31, 2014	\$182	

Increase in liability (separation charges)	34	
Reduction in liability (payments and other adjustments)	(87)
Liability balance at March 31, 2015	\$129	

The remaining liability balance as of March 31, 2015 represents costs for employees who have either not yet separated from the Company or whose full severance has not yet been paid. The majority of these remaining costs are expected to be paid in 2015.

55

Table of Contents

In December 2013, we announced a restructuring plan for our Gosselies, Belgium, facility. This restructuring plan was designed to improve the competitiveness of our European manufacturing footprint and achieve competitiveness in our European operations by refocusing our current Gosselies operations on final machine assembly, test and paint with limited component and fabrication operations. This action includes reshaping our supply base for more efficient sourcing, improving factory efficiencies and workforce reductions and was approved by the Belgian Minister of Employment in February 2014. We estimate the total employee cash separation costs to be about \$300 million before tax, which represents substantially all of the restructuring costs to be incurred under the restructuring plan. In 2014, we recognized \$273 million of these separation-related charges. For the three months ended March 31, 2015, we recognized \$7 million of employee separation costs relating to this restructuring plan. The remaining costs are expected to be recognized in 2015.

For the full year, we will continue to incur costs related to programs started in 2014 and we expect to take additional actions to further improve our long-term cost structure. In total, we expect the cost of these restructuring actions to be about \$250 million, or \$0.30 per share during 2015. We expect the majority of the charges will be related to employee cash separation costs. We expect that restructuring actions will result in a benefit to costs of about \$100 million in 2015 compared with 2014.

GLOSSARY OF TERMS

1. All Other Segments - Primarily includes activities such as: the remanufacturing of Cat® engines and components and remanufacturing services for other companies as well as the business strategy, product management, development, manufacturing, marketing and product support of undercarriage, specialty products, hardened bar stock components and ground engaging tools primarily for Cat products, paving products, forestry products and industrial and waste products; the product management, development, marketing, sales and product support of on-highway vocational trucks for North America; parts distribution; distribution services responsible for dealer development and administration including a wholly owned dealer in Japan, dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts.

2. Consolidating Adjustments - Eliminations of transactions between Machinery, Energy & Transportation and Financial Products.

3. Construction Industries - A segment primarily responsible for supporting customers using machinery in infrastructure and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes backhoe loaders, small wheel loaders, small track-type tractors, skid steer loaders, multi-terrain loaders, mini excavators, compact wheel loaders, telehandlers, select work tools, small, medium and large track excavators, wheel excavators, medium wheel loaders, compact track loaders, medium track-type tractors, track-type loaders, motor graders, pipelayers and mid-tier soil compactors. In addition, Construction Industries has responsibility for an integrated manufacturing cost center.

4. Currency - With respect to sales and revenues, currency represents the translation impact on sales resulting from changes in foreign currency exchange rates versus the U.S. dollar. With respect to operating profit, currency represents the net translation impact on sales and operating costs resulting from changes in foreign currency exchange rates versus the U.S. dollar. Currency includes the impact on sales and operating profit for the Machinery, Energy & Transportation lines of business only; currency impacts on Financial Products' revenues and operating profit are included in the Financial Products' portions of the respective analyses. With respect to other income/expense, currency represents the effects of forward and option contracts entered into by the company to reduce the risk of fluctuations in exchange rates (hedging) and the net effect of changes in foreign currency

exchange rates on our foreign currency assets and liabilities for consolidated results (translation).

Debt-to-Capital Ratio - A key measure of Machinery, Energy & Transportation's financial strength used by both management and our credit rating agencies. The metric is defined as Machinery, Energy & Transportation's short-term borrowings, long-term debt due within one year and long-term debt due after one year (debt) divided by the sum of Machinery, Energy & Transportation's debt and stockholders' equity. Debt also includes Machinery, Energy & Transportation's borrowings from Financial Products.

EAME - A geographic region including Europe, Africa, the Middle East and the Commonwealth of Independent States (CIS).

Earning Assets - Assets consisting primarily of total finance receivables net of unearned income, plus equipment on operating leases, less accumulated depreciation at Cat Financial.

Table of Contents

Energy & Transportation - A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving power generation, industrial, oil and gas and transportation applications, including marine and rail-related businesses. Responsibilities include business strategy, product design, product management, development, manufacturing, marketing, sales and product support

8. of turbines and turbine-related services, reciprocating engine powered generator sets, integrated systems used in the electric power generation industry, reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; the business strategy, product design, product management, development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services.

Financial Products Segment - Provides financing to customers and dealers for the purchase and lease of Cat and other equipment, as well as some financing for Caterpillar sales to dealers. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also

9. provides various forms of insurance to customers and dealers to help support the purchase and lease of our equipment. Financial Products Segment profit is determined on a pretax basis and includes other income/expense items.

10. Latin America - A geographic region including Central and South American countries and Mexico.

Machinery, Energy & Transportation (ME&T) - Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation and All Other Segments and related corporate items and eliminations.

11.

Machinery, Energy & Transportation Other Operating (Income) Expenses - Comprised primarily of gains/losses on disposal of long-lived assets, gains/losses on divestitures, long-lived asset impairment charges and legal settlements. Restructuring costs, which are classified as other operating expenses on the Results of Operations, are presented separately on the Operating Profit Comparison.

12.

Manufacturing Costs - Manufacturing costs exclude the impacts of currency and represent the volume-adjusted change for variable costs and the absolute dollar change for period manufacturing costs. Variable manufacturing costs are defined as having a direct relationship with the volume of production. This includes material costs, direct labor and other costs that vary directly with production volume such as freight, power to operate machines and supplies that are consumed in the manufacturing process. Period manufacturing costs support production but are defined as generally not having a direct relationship to short-term changes in volume. Examples include machinery and equipment repair, depreciation on manufacturing assets, facility support, procurement, factory scheduling, manufacturing planning and operations management.

13.

Price Realization - The impact of net price changes excluding currency and new product introductions.

14. Consolidated price realization includes the impact of changes in the relative weighting of sales between geographic regions.

Resource Industries - A segment primarily responsible for supporting customers using machinery in mining and quarrying applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors, large mining trucks, hard rock vehicles, longwall miners, electric rope shovels, draglines, hydraulic shovels, drills, highwall miners, large wheel loaders, off-highway trucks, articulated trucks, wheel tractor scrapers, wheel dozers, select work tools, machinery components and electronics and control systems. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development. In addition, segment profit includes the impact from divestiture of

portions of the Bucyrus distribution business.

16. Restructuring Costs - Primarily costs for employee separation costs and long-lived asset impairments.

Sales Volume - With respect to sales and revenues, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation as well as the incremental revenue impact of new product introductions, including emissions-related product updates. With respect to operating profit, sales volume

17. represents the impact of changes in the quantities sold for Machinery, Energy & Transportation combined with product mix as well as the net operating profit impact of new product introductions, including emissions-related product updates. Product mix represents the net operating profit impact of changes in the relative weighting of Machinery, Energy & Transportation sales with respect to total sales.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Sources of funds

We generate significant capital resources from operating activities, which are the primary source of funding for our Machinery, Energy & Transportation operations. Funding for these businesses is also available from commercial paper and long-term debt issuances. Financial Products' operations are funded primarily from commercial paper, term debt issuances and collections from the existing portfolio. Throughout the first quarter of 2015, we experienced favorable liquidity conditions globally in both our Machinery, Energy & Transportation and Financial Products' operations. On a consolidated basis, we ended the first quarter of 2015 with \$7.56 billion of cash, an increase of \$222 million from year-end 2014. We intend to maintain a strong cash and liquidity position. Our cash balances are held in numerous locations throughout the world with approximately \$5.9 billion held by our non-U.S. subsidiaries. Amounts held by non-U.S. subsidiaries are available for general corporate use and could be used in the United States without incurring significant additional U.S. taxes.

Consolidated operating cash flow for the first quarter of 2015 was \$1.27 billion, down from \$1.90 billion for the same period a year ago. The decrease was primarily due to higher short-term incentive compensation payments of about \$1.3 billion in 2015, compared to about \$500 million in 2014, as well as less favorable changes in accounts payable. Partially offsetting these items were lower contributions to pension plans and smaller increases to inventories compared to the same period a year ago. See further discussion of operating cash flow under Machinery, Energy & Transportation and Financial Products.

Total debt as of March 31, 2015 was \$38.78 billion, a decrease of \$510 million from year-end 2014. Debt related to Financial Products decreased \$514 million, reflecting decreasing portfolio balances. Debt related to Machinery, Energy & Transportation increased \$4 million in the first quarter of 2015.

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to Machinery, Energy & Transportation as of March 31, 2015 was \$2.75 billion. Our three Global Credit Facilities are:

- The 364-day facility of \$3.15 billion (of which \$0.82 billion is available to Machinery, Energy & Transportation) expires in September 2015.

- The 2010 four-year facility, as amended in September 2014, of \$2.73 billion (of which \$0.72 billion is available to Machinery, Energy & Transportation) expires in September 2017.

- The 2011 five-year facility, as amended in September 2014, of \$4.62 billion (of which \$1.21 billion is available to Machinery, Energy & Transportation) expires in September 2019.

At March 31, 2015, Caterpillar's consolidated net worth was \$22.34 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated stockholders' equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At March 31, 2015, Cat Financial's covenant interest coverage ratio was 2.22 to 1. This is above the 1.15 to 1 minimum ratio calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at March 31, 2015, Cat Financial's covenant leverage ratio was 7.69 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility. In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable, may, at their election, choose to pursue remedies under those loan agreements, including accelerating the

repayment of outstanding borrowings. At March 31, 2015, there were no borrowings under the Credit Facility.

58

Table of Contents

Our total credit commitments and available credit as of March 31, 2015 were:

(Millions of dollars)	March 31, 2015		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$10,500	\$2,750	\$7,750
Other external	4,026	193	3,833
Total credit lines available	14,526	2,943	11,583
Less: Commercial paper outstanding	(4,365)) —	(4,365)
Less: Utilized credit	(1,550)) (8) (1,542)
Available credit	\$8,611	\$2,935	\$5,676

The other external consolidated credit lines with banks as of March 31, 2015 totaled \$4.03 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

In the event that Caterpillar or Cat Financial, or any of their debt securities, experiences a credit rating downgrade, it would likely result in an increase in our borrowing costs and make access to certain credit markets more difficult. In the event economic conditions deteriorate such that access to debt markets becomes unavailable, our Machinery, Energy & Transportation's operations would rely on cash flow from operations, use of existing cash balances, borrowings from Cat Financial and access to our Credit Facility. Our Financial Products' operations would rely on cash flow from its existing portfolio, existing cash balances, access to our Credit Facility and other credit line facilities of Cat Financial and potential borrowings from Caterpillar. In addition, we maintain a support agreement with Cat Financial, which requires Caterpillar to remain the sole owner of Cat Financial and may, under certain circumstances, require Caterpillar to make payments to Cat Financial should Cat Financial fail to maintain certain financial ratios.

Machinery, Energy & Transportation

Net cash provided by operating activities was \$1.04 billion in the first quarter of 2015, compared with \$1.88 billion for the same period in 2014. The decrease was primarily due to higher short-term incentive compensation payments in 2015 as well as less favorable changes in accounts receivable and accounts payable. Partially offsetting these items were lower contributions to pension plans and smaller increases to inventories compared to the same period a year ago. While our inventory was relatively flat in the first quarter, we expect some decline in 2015 due to slightly lower sales and as a result of our continued focus on operational improvements.

Net cash used for investing activities in the first quarter of 2015 was \$331 million, compared with net cash used of \$420 million in the first quarter of 2014. The favorable change was primarily due to the proceeds from the sale of our 35 percent equity interest in our former third party logistics business during the first quarter of 2015.

Net cash used for financing activities during the first quarter of 2015 was \$786 million, compared with net cash used of \$1.97 billion in the first quarter of 2014. The change was primarily due to a smaller amount of common stock repurchased in the first quarter of 2015, as compared with the first quarter of 2014.

Our priorities for the use of cash are to maintain a strong financial position in support of our credit rating, provide capital to support growth, appropriately fund employee benefit plans, pay dividends and repurchase common stock.

Strong financial position – A key measure of Machinery, Energy & Transportation's financial strength used by both management and our credit rating agencies is Machinery, Energy & Transportation's debt-to-capital ratio.

Debt-to-capital is defined as short-term borrowings, long-term debt due within one year and long-term debt due after one year (debt) divided by the sum of debt and stockholders' equity. Debt also includes Machinery, Energy & Transportation borrowings from Financial Products. The debt-to-capital ratio for Machinery, Energy & Transportation was 37.1 percent at March 31, 2015, within our target range of 30 to 45 percent. The Machinery, Energy & Transportation's debt-to-capital ratio was 37.4 percent at December 31, 2014. The decrease in the debt-to-capital ratio was due to the increase in equity related to profit from the first quarter of 2015.

Capital to support growth – Capital expenditures were \$477 million during the first quarter of 2015, compared to \$469 million for the same period in 2014. We expect capital expenditures in 2015 to be about the same as 2014 capital expenditures of about \$1.6 billion.

Table of Contents

Appropriately funded employee benefit plans – We made \$77 million of contributions to our pension plans during the first quarter of 2015. We currently anticipate full-year 2015 contributions of approximately \$180 million, all of which are required. We made \$279 million of contributions to our pension plans during the first quarter of 2014.

Paying dividends – Dividends paid totaled \$424 million in the first quarter of 2015, representing 70 cents per share paid. Each quarter, our Board of Directors reviews the company's dividend for the applicable quarter. The Board evaluates the financial condition of the company and considers the economic outlook, corporate cash flow, the company's liquidity needs, and the health and stability of global credit markets to determine whether to maintain or change the quarterly dividend.

Common stock repurchases – In January 2014, the Board of Directors approved an authorization to repurchase up to \$10 billion of Caterpillar common stock (the 2014 Authorization), which will expire on December 31, 2018. As of January 1, 2015, \$7.5 billion remained available under the 2014 Authorization, and in the first quarter of 2015, we repurchased \$400 million of Caterpillar common stock, leaving \$7.1 billion in the 2014 Authorization. Given our expectations for cash flow and capital expenditures in 2015, we currently expect to continue to repurchase stock this year. However, our stock repurchase plans are always subject to the company's cash deployment priorities and can change based on business and market conditions. Caterpillar's basic shares outstanding as of March 31, 2015 were approximately 604 million.

Financial Products

Financial Products' operating cash flow was \$276 million in the first quarter of 2015, compared with \$353 million for the same period a year ago. Net cash used for investing activities was \$9 million for the first quarter of 2015, compared with \$811 million for the same period in 2014. The change was primarily due to the net impact of intercompany purchased receivables and lower levels of new retail financing at Cat Financial. Net cash provided by financing activities was \$72 million for the first quarter of 2015, compared with \$265 million for the same period in 2014. The change was primarily due to lower funding requirements.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets, fair values for goodwill impairment tests, impairment of available-for-sale securities, warranty liability, stock-based compensation, reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes. We have incorporated many years of data into the determination of each of these estimates and we have not historically experienced significant adjustments. These assumptions are reviewed at least annually with the Audit Committee of the Board of Directors. Following are the methods and assumptions used in determining our estimates and an indication of the risks inherent in each.

Residual values for leased assets – The residual values for Cat Financial's leased assets, which are an estimate of the market value of leased equipment at the end of the lease term, are based on an analysis of historical wholesale market sales prices, projected forward on a level trend line without consideration for inflation or possible future pricing action. At the inception of the lease, residual values are estimated with consideration of the following critical factors: market size and demand, any known significant market/product trends, total expected hours of usage, machine configuration, application, location, model changes, quantities and past re-marketing experience, third-party residual guarantees and contractual customer purchase options. Many of these factors are gathered in an application survey that is completed prior to quotation. The lease agreement also clearly defines applicable return conditions and remedies for non-compliance, to ensure that the leased equipment will be in good operating condition upon return. Model changes and updates, as well as market strength and product acceptance, are monitored and adjustments are made to residual values in accordance with the significance of any such changes. Remarketing sales staff works closely with customers and dealers to manage the sale of lease returns and the recovery of residual exposure.

During the term of the leases, residual values are monitored. If estimated end-of-term market values of leased equipment reflect a non-temporary impairment due to economic factors, obsolescence or other adverse circumstances,

the residual value of the leased equipment is adjusted so that the carrying value at end of lease term will approximate the estimated end-of-term market value. For equipment on operating leases, adjustments are made on a straight-line basis over the remaining term of the lease through depreciation expense. For finance leases, adjustments are recognized at the time of assessment through a reduction of finance revenue.

Fair values for goodwill impairment tests – We test goodwill for impairment annually, at the reporting unit level, and whenever events or circumstances make it likely that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell all or a portion of a reporting unit. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis.

Table of Contents

Goodwill is reviewed for impairment utilizing a qualitative assessment or a two-step process. We have an option to make a qualitative assessment of a reporting unit's goodwill for impairment. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the two-step process, the first step requires us to compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, the goodwill is not considered impaired. If the carrying value is higher than the fair value, there is an indication that an impairment may exist and the second step is required. In step two, the implied fair value of goodwill is calculated as the excess of the fair value of a reporting unit over the fair values assigned to its assets and liabilities. If the implied fair value of goodwill is less than the carrying value of the reporting unit's goodwill, the difference is recognized as an impairment loss.

The impairment test process requires valuation of the respective reporting unit, which we primarily determine using an income approach based on a discounted five year forecasted cash flow with a year-five residual value. The residual value is computed using the constant growth method, which values the forecasted cash flows in perpetuity. The income approach is supported by a reconciliation of our calculated fair value for Caterpillar to the company's market capitalization. The assumptions about future cash flows and growth rates are based on each reporting unit's long-term forecast and are subject to review and approval by senior management. The discount rate is a risk-adjusted weighted average cost of capital, which we believe approximates the rate from a market participant's perspective. The estimated fair value could be impacted by changes in market conditions, interest rates, growth rates, tax rates, costs, pricing and capital expenditures.

A prolonged economic downturn resulting in lower long-term growth rates and reduced long-term profitability may reduce the fair value of our reporting units. Industry specific events or circumstances that have a negative impact to the valuation assumptions may also reduce the fair value of our reporting units. Should such events occur and it becomes more likely than not that a reporting unit's fair value has fallen below its carrying value, we will perform an interim goodwill impairment test(s), in addition to the annual impairment test. Future impairment tests may result in a goodwill impairment, depending on the outcome of both step one and step two of the impairment review process. A goodwill impairment would be reported as a non-cash charge to earnings.

Impairment of available-for-sale securities – Available-for-sale securities, primarily at Insurance Services, are reviewed at least quarterly to identify fair values below cost which may indicate that a security is impaired and should be written down to fair value.

For debt securities, once a security's fair value is below cost we utilize data gathered by investment managers, external sources and internal research to monitor the performance of the security to determine whether an other-than-temporary impairment has occurred. These reviews, which include an analysis of whether it is more likely than not that we will be required to sell the security before its anticipated recovery, consist of both quantitative and qualitative analysis and require a degree of management judgment. Securities in a loss position are monitored and assessed at least quarterly based on severity and timing of loss and may be deemed other-than-temporarily impaired at any time. Once a security's fair value has been 20 percent or more below its original cost for six consecutive months, the security will be other-than-temporarily impaired unless there are sufficient facts and circumstances supporting otherwise.

For equity securities in a loss position, determining whether a security is other-than-temporarily impaired requires an analysis of that security's historical sector return as well as the volatility of that return. This information is utilized to estimate a security's future fair value and to assess whether the security has the ability to recover to its original cost over a reasonable period of time. Both historical annualized sector returns and the volatility of those returns are applied over a two year period to arrive at these estimates.

For both debt and equity securities, qualitative factors are also considered in determining whether a security is other-than-temporarily impaired. These include reviews of the following: significant changes in the regulatory, economic or technological environment of the investee, significant changes in the general market condition of either the geographic area or the industry in which the investee operates, and length of time and the extent to which the fair value has been less than cost. These qualitative factors are subjective and require a degree of management judgment.

Warranty liability – At the time a sale is recognized, we record estimated future warranty costs. The warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). Specific rates are developed for each product shipment month and are updated monthly based on actual warranty claim experience. Warranty costs may differ from those estimated if actual claim rates are higher or lower than our historical rates.

Table of Contents

Stock-based compensation – We use a lattice-based option-pricing model to calculate the fair value of our stock options and SARs. The calculation of the fair value of the awards using the lattice-based option-pricing model is affected by our stock price on the date of grant as well as assumptions regarding the following:

Volatility is a measure of the amount by which the stock price is expected to fluctuate each year during the expected term of the award and is based on historical Caterpillar stock price movement and current implied volatilities from traded options on Caterpillar stock. The implied volatilities from traded options are impacted by changes in market conditions. An increase in the volatility would result in an increase in our expense.

The expected term represents the period of time that awards granted are expected to be outstanding and is an output of the lattice-based option-pricing model. In determining the expected term of the award, future exercise and forfeiture patterns are estimated from Caterpillar employee historical exercise behavior. These patterns are also affected by the vesting conditions of the award. Changes in the future exercise behavior of employees or in the vesting period of the award could result in a change in the expected term. An increase in the expected term would result in an increase to our expense.

The weighted-average dividend yield is based on Caterpillar's historical dividend yields. As holders of stock options and SARs do not receive dividend payments, this could result in employees retaining the award for a longer period of time if dividend yields decrease or exercising the award sooner if dividend yields increase. A decrease in the dividend yield would result in an increase in our expense.

The risk-free interest rate is based on the U.S. Treasury yield curve in effect at time of grant. As the risk-free interest rate increases, the expected term increases, resulting in an increase in our expense.

The fair value of our RSUs is determined by reducing the stock price on the date of grant by the present value of the estimated dividends to be paid during the vesting period. The estimated dividends are based on Caterpillar's dividend yield at the time of grant. A decrease in the dividend yield would result in an increase in our expense.

Stock-based compensation expense recognized during the period is based on the value of the number of awards that are expected to vest. In determining the stock-based compensation expense to be recognized, a forfeiture rate is applied to the fair value of the award. This rate represents the number of awards that are expected to be forfeited prior to vesting and is based on Caterpillar employee historical behavior. Changes in the future behavior of employees could impact this rate. A decrease in this rate would result in an increase in our expense.

Product liability and insurance loss reserve – We determine these reserves based upon reported claims in process of settlement and actuarial estimates for losses incurred but not reported. Loss reserves, including incurred but not reported reserves, are based on estimates and ultimate settlements may vary significantly from such estimates due to increased claims frequency or severity over historical levels.

Postretirement benefits – Primary actuarial assumptions were determined as follows:

The U.S. expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our plan assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. A similar process is used to determine the rate for our non-U.S. pension plans. This rate is impacted by changes in general market conditions, but because it represents a long-term rate, it is not significantly impacted by short-term market swings. Changes in our allocation of plan assets would also impact this rate. For example, a shift to more fixed income securities would lower the rate. A decrease in the rate would increase our expense.

The assumed discount rate is used to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows against a high quality bond yield curve, calculated using a wide

population of corporate Aa bonds available on the measurement date. The very highest and lowest yielding bonds (top and bottom 10 percent) are excluded from the analysis. A similar approach is used to determine the assumed discount rate for our most significant non-U.S. plans. This rate is sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

The expected rate of compensation increase is used to develop benefit obligations using projected pay at retirement. It represents average long-term salary increases. This rate is influenced by our long-term compensation policies. An increase in the rate would increase our obligation and expense.

The assumed health care trend rate represents the rate at which health care costs are assumed to increase and is based on historical and expected experience. Changes in our projections of future health care costs due to general economic

Table of Contents

conditions and those specific to health care (e.g., technology driven cost changes) will impact this trend rate. An increase in the trend rate would increase our obligation and expense.

The effects of actual results differing from our assumptions and the effects of changing assumptions are considered actuarial gains or losses. Actuarial gains or losses are recorded in Accumulated other comprehensive income (loss). When the unamortized actuarial gains or losses for an individual plan exceed 10 percent of the higher of the projected benefit obligation or 10 percent of market-related value of plans assets at the beginning of the year, the excess is amortized as a component of net periodic benefit cost using the straight-line method. The amortization period is generally the average remaining service period of active employees expected to receive benefits from the plan. For plans in which all or almost all of the plan's participants are inactive, actuarial gains or losses are amortized over the remaining life expectancy of the inactive participants.

Post-sale discount reserve – We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. The amount of accrued post-sale discounts was \$1.29 billion and \$1.27 billion as of March 31, 2015 and December 31, 2014, respectively. The reserve represents discounts that we expect to pay on previously sold units and is reviewed at least quarterly. The reserve is adjusted if discounts paid differ from those estimated. Historically, those adjustments have not been material.

Credit loss reserve – The allowance for credit losses is an estimate of the losses inherent in our finance receivable portfolio and includes consideration of accounts that have been individually identified as impaired, as well as pools of finance receivables where it is probable that certain receivables in the pool are impaired but the individual accounts cannot yet be identified. In identifying and measuring impairment, management takes into consideration past loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of underlying collateral and current economic conditions. In estimating probable credit losses, we review accounts that are past due, non-performing, in bankruptcy or otherwise identified as at-risk for potential credit loss including accounts which have been modified. Accounts are identified as at-risk for potential credit loss using information available about the customer, such as financial statements, news reports and published credit ratings, as well as general information regarding industry trends and the economic environment in which our customers operate.

The allowance for credit losses attributable to specific accounts is based on the most probable source of repayment, which is normally the liquidation of collateral. In determining collateral value, we estimate the current fair market value of the collateral less selling costs. We also consider credit enhancements such as additional collateral and contractual third-party guarantees. The allowance for credit losses attributable to the remaining accounts not yet individually identified as impaired is estimated utilizing probabilities of default and the estimated loss given default. In addition, qualitative factors not able to be fully captured in previous analysis including industry trends, macroeconomic factors and model imprecision are considered in the evaluation of the adequacy of the allowance for credit losses. These qualitative factors are subjective and require a degree of management judgment.

While management believes it has exercised prudent judgment and applied reasonable assumptions, there can be no assurance that in the future, changes in economic conditions or other factors would not cause changes in the financial health of our customers. If the financial health of our customers deteriorates, the timing and level of payments received could be impacted and therefore, could result in a change to our estimated losses.

Income taxes – We are subject to the income tax laws of the many jurisdictions in which we operate. These tax laws are complex, and the manner in which they apply to our facts is sometimes open to interpretation. In establishing the provision for income taxes, we must make judgments about the application of these inherently complex tax laws.

Despite our belief that our tax return positions are consistent with applicable tax laws, we believe that taxing authorities could challenge certain positions. Settlement of any challenge can result in no change, a complete disallowance, or some partial adjustment reached through negotiations or litigation. We record tax benefits for uncertain tax positions based upon management's evaluation of the information available at the reporting date. To be recognized in the financial statements, a tax benefit must be at least more likely than not of being sustained based on the technical merits of the position. The benefit for positions meeting the recognition threshold is measured as the largest benefit more likely than not of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Significant judgment is required in making these determinations and adjustments to unrecognized tax benefits may be necessary to reflect actual taxes payable upon settlement. Adjustments related to positions impacting the effective tax rate affect the provision for income taxes. Adjustments related to positions impacting the timing of income or deductions impact deferred tax assets and liabilities.

Our income tax positions and analysis are based on currently enacted tax law. Future changes in tax law could significantly impact the provision for income taxes, the amount of taxes payable, and the deferred tax asset and liability balances. Deferred tax assets

Table of Contents

generally represent tax benefits for tax deductions or credits available in future tax returns. Certain estimates and assumptions are required to determine whether it is more likely than not that all or some portion of the benefit of a deferred tax asset will not be realized. In making this assessment, management analyzes and estimates the impact of future taxable income, reversing temporary differences and available prudent and feasible tax planning strategies. Should a change in facts or circumstances lead to a change in judgment about the realizability of a deferred tax asset, we record or adjust the related valuation allowance in the period that the change in facts and circumstances occurs, along with a corresponding increase or decrease in the provision for income taxes.

A provision for U.S. income taxes has not been recorded on undistributed profits of our non-U.S. subsidiaries that we have determined to be indefinitely reinvested outside the U.S. If management intentions or U.S. tax law changes in the future, there may be a significant negative impact on the provision for income taxes to record an incremental tax liability in the period the change occurs. A deferred tax asset is recognized only if we have definite plans to generate a U.S. tax benefit by repatriating earnings in the foreseeable future.

Income taxes are based on the statutory tax rate of the jurisdiction where earnings are subject to taxation which may differ from the jurisdiction where that entity is incorporated. Taxes are paid in the jurisdictions where earnings are subject to taxation. The effective tax rate differs from the U.S. statutory rate in part due to results of non-U.S. subsidiaries being subject to statutory tax rates which are generally lower than the U.S. rate of 35 percent. The indefinitely reinvested profits of Caterpillar SARL (CSARL), primarily taxable in Switzerland, contribute the most significant amount of this difference. On January 30, 2015, we received a Revenue Agent's Report (RAR) from the Internal Revenue Service (IRS) indicating the end of the field examination of our U.S. tax returns for 2007 to 2009 including the impact of a loss carryback to 2005. The IRS has proposed to tax in the United States profits earned from certain parts transactions by CSARL based on the IRS examination team's application of "substance-over-form" or "assignment-of-income" judicial doctrines. We are vigorously contesting this adjustment through the IRS appeals process. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. The purchase of parts by CSARL from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the United States have substantial legal, commercial, and economic consequences for the parties involved. We have filed U.S. tax returns on this same basis for years after 2009. We currently believe the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

GLOBAL WORKFORCE

Caterpillar worldwide full-time employment was 113,322 at the end of the first quarter of 2015, compared with 116,579 at the end of the first quarter of 2014, a decrease of 3,257 full-time employees. The flexible workforce increased 772, resulting in a total decrease in the global workforce of 2,485. The decrease was primarily the result of restructuring programs.

OTHER MATTERS

Environmental and Legal Matters

The Company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. There is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 8, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requests documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement

Table of Contents

of cash among U.S. and non-U.S. subsidiaries). The Company received an additional subpoena relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries. The Company is cooperating with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On September 12, 2014, the SEC notified the Company that it was conducting an informal investigation relating to Caterpillar SARL and related structures. The SEC asked the Company to preserve relevant documents and, on a voluntary basis, the Company made a presentation to the staff of the SEC on these topics and is producing documents responsive to a voluntary request made by the SEC. The Company is cooperating with the SEC regarding this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On September 10, 2014, the SEC issued to Caterpillar a subpoena seeking information concerning the Company's accounting for the goodwill relating to its acquisition of Bucyrus International Inc. in 2011 and related matters. The Company is cooperating with the SEC regarding this subpoena and its ongoing investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On March 20, 2014, Brazil's Administrative Council for Economic Defense (CADE) published a Technical Opinion which named 18 companies and over 100 individuals as defendants, including two subsidiaries of Caterpillar Inc., MGE - Equipamentos e Serviços Ferroviários Ltda. (MGE) and Caterpillar Brasil Ltda. The publication of the Technical Opinion opened CADE's official administrative investigation into allegations that the defendants participated in anticompetitive bid activity for the construction and maintenance of metro and train networks in Brazil. While companies cannot be held criminally liable for anticompetitive conduct in Brazil, criminal charges have been brought against two current employees of MGE and one former employee of MGE involving the same conduct alleged by CADE. The Company has responded to all requests for information from the authorities. The Company is unable to predict the outcome or reasonably estimate the potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On October 24, 2013, Progress Rail received a grand jury subpoena from the U.S. District Court for the Central District of California. The subpoena requests documents and information from Progress Rail, United Industries Corporation, a wholly-owned subsidiary of Progress Rail, and Caterpillar Inc. relating to allegations that Progress Rail conducted improper or unnecessary railcar inspections and repairs and improperly disposed of parts, equipment, tools and other items. In connection with this subpoena, Progress Rail was informed by the U.S. Attorney for the Central District of California that it is a target of a criminal investigation into potential violations of environmental laws and alleged improper business practices. The Company is cooperating with the authorities and is currently in discussions regarding a potential resolution of the matter. Although the Company believes a loss is probable, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental matters or intellectual property rights. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably

estimate a range of loss because there is insufficient information regarding the matter. However, there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

Retirement Benefits

We recognized pension expense of \$131 million for the three months ended March 31, 2015, as compared to \$113 million for the three months ended March 31, 2014. The increase in expense is primarily due to higher amortization of net actuarial losses primarily due to lower discount rates at the end of 2014 compared to 2013 and changes made to our U.S. mortality assumption. Accounting guidance on retirement benefits requires companies to discount future benefit obligations back to today's dollars using a discount rate that is based on high-quality fixed income investments. A decrease in the discount rate increases the pension benefit obligation, while an increase in the discount rate decreases the pension benefit obligation. This increase or decrease in the pension benefit obligation is recognized in Accumulated other comprehensive income (loss) and subsequently amortized into earnings as an

Table of Contents

actuarial gain or loss. The guidance also requires companies to use an expected long-term rate of return on plan assets for computing current year pension expense. Differences between the actual and expected returns are also recognized in Accumulated other comprehensive income (loss) and subsequently amortized into earnings as actuarial gains and losses. As of March 31, 2015, total actuarial losses, recognized in Accumulated other comprehensive income (loss), related to pensions were \$7.69 billion. The majority of the actuarial losses are due to changes in discount rates, losses from demographic assumptions over the past several years and plan asset losses. In the fourth quarter of 2014, the mortality assumption for our U.S. pension and other postretirement plans was reviewed to consider the use of tables that were released by the Society of Actuaries. As of December 31, 2014, the company adopted the tables with modifications to reflect historical company specific mortality experience and its best estimate of future mortality improvements. The adoption of the tables resulted in an increase in the life expectancy of plan participants and therefore an increase in our Liability for postemployment benefits of approximately \$400 million.

Other postretirement benefit expense was \$58 million for the three months ended March 31, 2015, as compared to \$57 million for the three months ended March 31, 2014. Actuarial losses that were recognized in Accumulated other comprehensive income (loss) for other postretirement benefit plans were \$0.81 billion at March 31, 2015. These losses mainly reflect the impact of discount rates, changes in our health care trend assumption and plan asset losses, partially offset by gains from lower than expected health care costs.

Actuarial losses will be impacted in future periods by actual asset returns, actual health care inflation, discount rate changes, actual demographic experience and other factors that impact these expenses. These losses, reported in Accumulated other comprehensive income (loss), will generally be amortized as a component of net periodic benefit cost on a straight-line basis over the average remaining service period of active employees expected to receive benefits from the plan. For plans in which all or almost all of the plan's participants are inactive, actuarial losses are amortized using the straight-line method over the remaining life expectancy of the inactive participants. At the end of 2014, the average remaining service period of active employees or life expectancy for inactive participants was 9 years for our U.S. pension plans, 12 years for non-U.S. pension plans and 9 years for other postretirement benefit plans. We expect our amortization of net actuarial losses to increase approximately \$140 million in 2015 as compared to 2014, primarily due to the decrease in discount rates and changes to our mortality assumption, partially offset by gains from lower than expected health care costs and plan assets gains in 2014. We expect our total pension and other postretirement benefits expense to increase approximately \$80 million in 2015 which is primarily due to an increase in amortization of net actuarial losses.

We made \$77 million of contributions to our pension plans during the three months ended March 31, 2015. We currently anticipate full-year 2015 contributions of approximately \$180 million, all of which are required. We made \$279 million of contributions to our pension plans during the three months ended March 31, 2014.

Order Backlog

The dollar amount of backlog believed to be firm was approximately \$16.5 billion at March 31, 2015 and \$17.3 billion at December 31, 2014. This represents about a \$0.8 billion reduction from the end of the fourth quarter of 2014. The decrease was primarily in Construction Industries and Resource Industries. While the backlog for Energy & Transportation was about flat, an increase in a backlog for locomotives was about offset by a decrease for oil and gas related product. Of the total backlog, approximately \$3.3 billion at March 31, 2015 was not expected to be filled in the following twelve months.

Table of Contents

NON-GAAP FINANCIAL MEASURES

The following definitions are provided for the non-GAAP financial measures used in this report. These non-GAAP financial measures have no standardized meaning prescribed by U.S. GAAP and therefore are unlikely to be comparable to the calculation of similar measures for other companies. Management does not intend for these items to be considered in isolation or as a substitute for the related GAAP measures.

We have incurred restructuring costs in the first quarter of 2015 and 2014. We believe it is important to separately quantify the profit-per-share impact of restructuring costs in order for our results to be meaningful to our readers. Reconciliation of profit per share excluding restructuring costs to the most directly comparable GAAP measure, profit per share - diluted is as follows:

	Three Months Ended March 31,	
	2015	2014
Profit per share - diluted	\$1.81	\$1.44
Per share restructuring costs	\$0.05	\$0.17
Profit per share excluding restructuring costs	\$1.86	\$1.61

Supplemental Consolidating Data

We are providing supplemental consolidating data for the purpose of additional analysis. The data has been grouped as follows:

Consolidated – Caterpillar Inc. and its subsidiaries.

Machinery, Energy & Transportation – Caterpillar defines Machinery, Energy & Transportation as it is presented in the supplemental data as Caterpillar Inc. and its subsidiaries with Financial Products accounted for on the equity basis. Machinery, Energy & Transportation information relates to our design, manufacturing, and marketing of our products. Financial Products information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment. The nature of these businesses is different, especially with regard to the financial position and cash flow items. Caterpillar management utilizes this presentation internally to highlight these differences. We also believe this presentation will assist readers in understanding our business.

Financial Products – Our finance and insurance subsidiaries, primarily Cat Financial and Insurance Services.

Consolidating Adjustments – Eliminations of transactions between Machinery, Energy & Transportation and Financial Products.

Pages 68 to 73 reconcile Machinery, Energy & Transportation with Financial Products on the equity basis to Caterpillar Inc. consolidated financial information.

Forward-looking Statements

Certain statements in this Form 10-Q relate to future events and expectations and are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “believe,” “estimate,” “will be,” “will,” “would,” “expect,” “anticipate,” “plan,” “project,” “intend,” “could,” “should” or other similar words or expressions of forward-looking statements. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding our outlook, projections, forecasts or trend descriptions. These statements do not guarantee future performance, and we do not undertake to update our forward-looking statements.

Caterpillar’s actual results may differ materially from those described or implied in our forward-looking statements based on a number of factors, including, but not limited to: (i) global and regional economic conditions and economic conditions in the industries we serve; (ii) government monetary or fiscal policies and infrastructure spending; (iii) commodity price changes, component price increases, fluctuations in demand for our products or significant shortages of component products; (iv) disruptions or volatility in global financial markets limiting our sources of liquidity or the liquidity of our customers, dealers and suppliers; (v) political and economic risks, commercial instability and events beyond our control in the countries in which we operate; (vi) failure to maintain our credit ratings and potential resulting increases to our cost of borrowing and adverse effects on our cost of funds, liquidity, competitive position and access to capital markets; (vii) our Financial Products segment’s risks associated with the financial services industry; (viii) changes in interest rates or market liquidity conditions; (ix) an increase in delinquencies, repossessions or net losses of Cat Financial’s customers; (x) new regulations or changes in financial services regulations; (xi) a failure to realize, or a delay in realizing, all of the anticipated benefits of our acquisitions, joint ventures or divestitures; (xii) international trade policies and their impact on demand for our products and our competitive position; (xiii) our ability to develop, produce and market quality products that meet our customers’ needs; (xiv) the impact of the highly competitive environment in which we operate on our sales and pricing; (xv) failure to realize all of the anticipated benefits from initiatives to increase our productivity, efficiency and cash flow and to reduce costs; (xvi) additional restructuring costs or a failure to realize anticipated savings or benefits from past or future cost reduction actions; (xvii) inventory management decisions and sourcing practices of our dealers and our OEM customers; (xviii) compliance with environmental laws and regulations; (xix) alleged or actual violations of trade or anti-corruption laws and regulations; (xx) additional tax expense or exposure; (xxi) currency fluctuations; (xxii) our or Cat Financial’s compliance with financial covenants; (xxiii) increased pension plan funding obligations; (xxiv) union disputes or other employee relations issues; (xxv) significant legal proceedings, claims, lawsuits or government investigations; (xxvi) changes in accounting standards; (xxvii) failure or breach of IT security; (xxviii) adverse effects of unexpected events including natural disasters; and (xxix) other factors described in more detail under “Item 1A. Risk Factors” in our Form 10-K filed with the SEC on February 17, 2015 for the year ended December 31, 2014.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The information required by this Item is incorporated by reference from Note 4 – “Derivative Financial Instruments and Risk Management” included in Part I, Item 1 and Management’s Discussion and Analysis included in Part I, Item 2 of this Form 10-Q.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures

An evaluation was performed under the supervision and with the participation of the company’s management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of the company’s disclosure controls and procedures, as that term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this quarterly report. Based on

that evaluation, the CEO and CFO concluded that the company's disclosure controls and procedures are effective as of the end of the period covered by this quarterly report.

Changes in internal control over financial reporting

During the first quarter of 2015, there has been no change in the company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information required by this Item is incorporated by reference from Note 13 included in Part I, Item 1 of this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased Under the Program	Approximate Dollar Value of Shares that may yet be Purchased under the Program (in billions) ¹
January 1-31, 2015	—	\$—	—	\$7.500
February 1-28, 2015	4,779,963	\$83.68	4,779,963	\$7.100
March 1-31, 2015	—	\$—	—	\$7.100
Total	4,779,963	\$83.68	4,779,963	

In January 2014, the Board of Directors authorized the repurchase of \$10.0 billion of Caterpillar common stock, ¹ which will expire on December 31, 2018 (the 2014 Authorization). As of March 31, 2015, \$7.1 billion remained available under the 2014 Authorization.

Share repurchases in the table above are reported based on the trade dates.

Other Purchases of Equity Securities

Period	Total Number of Shares Purchased ¹	Average Price Paid per Share	Total Number of Shares Purchased Under the Program	Approximate Dollar Value of Shares that may yet be Purchased under the Program
January 1-31, 2015	10,365	\$87.76	N/A	N/A
February 1-28, 2015	776	\$85.20	N/A	N/A
March 1-31, 2015	364,205	\$80.82	N/A	N/A
Total	375,346	\$81.02		

¹ Represents shares delivered back to issuer for the payment of taxes resulting from the vesting of restricted stock units for employees and Directors.

Non-U.S. Employee Stock Purchase Plans

We have 28 employee stock purchase plans administered outside the United States for our non-U.S. employees. As of March 31, 2015, those plans had approximately 13,700 active participants in the aggregate. During the first quarter of 2015, approximately 309,000 shares of Caterpillar common stock or foreign denominated equivalents were distributed under the plans. Participants in some foreign plans have the option of receiving non-U.S. share certificates (foreign-denominated equivalents) in lieu of U.S. shares of Caterpillar common stock upon withdrawal from the plan. These equivalent certificates are tradable only on the local stock market and are included in our determination of shares outstanding.
