

Edgar Filing: Coeur Mining, Inc. - Form 10-Q

Coeur Mining, Inc.

Form 10-Q

July 27, 2016

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 10-Q

☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2016

OR

☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number 001-08641

COEUR MINING, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

82-0109423

(I.R.S. Employer
Identification No.)

104 S. Michigan Ave., Suite 900 Chicago, Illinois

(Address of principal executive offices)

60603

(Zip Code)

(312) 489-5800

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.) Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐ Accelerated filer ☐

Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The Company has 300,000,000 shares of common stock, par value of \$0.01, authorized of which 162,364,657 shares were issued and outstanding as of July 25, 2016.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 1 - BASIS OF PRESENTATION

The interim condensed consolidated financial statements of Coeur Mining, Inc. and its subsidiaries (collectively "Coeur" or "the Company") are unaudited. In the opinion of management, all adjustments and disclosures necessary for the fair presentation of these interim statements have been included. The results reported in these interim statements may not be indicative of the results which will be reported for the year ending December 31, 2016. The condensed consolidated December 31, 2015 balance sheet data was derived from audited consolidated financial statements. Accordingly, these unaudited interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Recent Accounting Standards

In March 2016, the FASB issued ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting," which amends several aspects of the accounting for share-based payment transaction, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. These changes become effective for the Company's fiscal year beginning January 1, 2018. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated financial position, results of operations, and cash flows.

In February 2016, the FASB issued ASU 2016-02, "Leases," which will require lessees to recognize assets and liabilities for the rights and obligations created by most leases on the balance sheet. These changes become effective for the Company's fiscal year beginning January 1, 2019. Modified retrospective adoption for all leases existing at, or entered into after, the date of initial application, is required with an option to use certain transition relief. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated financial position, results of operations, and cash flows.

In November 2015, the FASB issued ASU 2015-17, "Balance Sheet Classification of Deferred Taxes," which requires entities with a classified balance sheet to present all deferred tax assets and liabilities as non-current. The updated guidance became effective under early adoption for the Company's fiscal year beginning January 1, 2015, and resulted in a reclassification of amounts from Current deferred tax assets to Non-current deferred tax assets and Current deferred tax liabilities to Non-current deferred tax liabilities in the current and prior periods.

In September 2015, the FASB issued ASU 2015-16, "Simplifying the Accounting for Measurement-Period Adjustments," which eliminates the requirement for an acquirer to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. These changes become effective for the Company's fiscal year beginning January 1, 2016. The Company's adoption had no impact on the Company's consolidated financial position, results of operations, and cash flows.

In August 2015, the FASB issued ASU 2015-14, "Deferral of the Effective Date", which defers the effective date of ASU 2014-09, "Revenue from Contracts with Customers" to January 1, 2018. The Company is currently evaluating the potential impact of adopting the prescribed changes on the Company's consolidated financial position, results of operations, and cash flows.

In July 2015, the FASB issued ASU 2015-11, "Simplifying the Measurement of Inventory," which provides a revised, simpler measurement for inventory to be measured at the lower of cost and net realizable value. These changes become effective for the Company's fiscal year beginning January 1, 2018. The Company is currently evaluating the potential impact of implementing these changes on the Company's consolidated financial position, results of operations, and cash flows.

In April 2015, the FASB issued ASU 2015-03, "Simplifying the Presentation of Debt Issuance Costs," which requires that debt issuance costs related to a recognized debt liability be presented as a reduction to the carrying amount of that debt liability, not as an asset. The updated guidance became effective under early adoption for the Company's fiscal year beginning January 1, 2015, and resulted in a reclassification of amounts from Other Non-current Assets to Debt in the current and prior periods.

In February 2015, the FASB issued ASU 2015-02, "Amendments to the Consolidation Analysis," which amends the consolidation requirements in ASC 810. These changes become effective for the Company's fiscal year beginning January 1, 2016. The Company's adoption had no impact on the Company's consolidated financial position, results of operations, and cash flows.

Coeur Mining, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements

NOTE 3 – SEGMENT REPORTING

The Company's operating segments include the Palmarejo complex, Rochester, Kensington, Wharf, and San Bartolomé mines, and Coeur Capital. All operating segments are engaged in the discovery and mining of gold and silver and generate the majority of their revenues from the sale of these precious metals with the exception of Coeur Capital, which holds the Endeavor silver stream and other precious metals royalties. Other includes the La Preciosa project, Joaquin project, corporate office, elimination of intersegment transactions, and other items necessary to reconcile to consolidated amounts.

NOTE 4 – RECLAMATION

Reclamation and mine closure costs are based principally on legal and regulatory requirements. Management estimates costs associated with reclamation of mining properties. On an ongoing basis, management evaluates its estimates and assumptions, and future expenditures could differ from current estimates.

Changes to the Company's asset retirement obligations for operating sites are as follows:

In thousands	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Asset retirement obligation - Beginning	\$83,974	\$86,059	\$82,072	\$67,214
Accretion	2,009	1,990	3,968	3,614
Additions and changes in estimates	(130)	—	121	18,270
Settlements	(308)	(448)	(616)	(1,497)
Asset retirement obligation - Ending	\$85,545	\$87,601	\$85,545	\$87,601

The Company has accrued \$1.3 million and \$3.2 million at June 30, 2016 and December 31, 2015, respectively, for reclamation liabilities related to former mining activities, which are included in Reclamation.

NOTE 5 – STOCK-BASED COMPENSATION

The Company has stock incentive plans for executives and eligible employees. Stock awards include stock options, restricted stock, and performance shares. Stock-based compensation expense for the three and six months ended June 30, 2016 and 2015 was \$2.3 million and \$2.6 million and \$5.2 million and \$4.8 million, respectively. At June 30, 2016, there was \$9.5 million of unrecognized stock-based compensation cost which is expected to be recognized over a weighted-average remaining vesting period of 1.5 years. During the six months ended June 30, 2016, the supplemental incentive accrual increased \$0.4 million to \$1.6 million.

Coeur Mining, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

The following table summarizes the grants awarded during the six months ended June 30, 2016:

Grant date	Restricted stock	Grant date fair value of restricted stock	Stock options	Grant date fair value of stock options	Performance shares	Grant date fair value of performance shares
January 20, 2016	1,030,833	\$ 1.81	165,479	\$ 0.86	1,428,314	\$ 1.78
March 21, 2016	685,633	\$ 5.76	17,772	\$ 2.84	8,763	\$ 3.76

The following options and stock appreciation rights were exercisable during the six months ended June 30, 2016:

Award Type	Number of Exercised Units	Weighted Average Exercised Price	Number of Exercisable Units	Weighted Average Exercisable Price
Stock options	—	\$	423,706	\$ 15.15
Stock appreciation rights	—	\$	46,572	\$ 14.06

NOTE 6 – RETIREMENT SAVINGS PLAN

The Company has a 401(k) retirement savings plan that covers all eligible U.S. employees. Eligible employees may elect to contribute up to 75% of base salary, subject to ERISA limitations. In addition, the Company has a deferred compensation plan for employees whose benefits under the 401(k) plan are limited by federal regulations. The Company generally makes matching contributions equal to 100% of the employee's contribution up to 4% of the employee's salary. The Company may also provide an additional contribution based on an eligible employee's salary. Total plan expenses recognized for the three and six months ended June 30, 2016 and 2015 were \$0.9 million and \$1.6 million and \$1.9 million and \$3.2 million, respectively.

The Company's effective tax rate is impacted by recurring items, such as foreign exchange rates on deferred tax balances, uncertain tax position and mining tax expense accruals, and the full valuation allowance on the deferred tax assets relating to losses in the United States and certain foreign jurisdictions. In addition, the Company's consolidated effective income and mining

Coeur Mining, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and foreign exchange rates result in significant fluctuations in our consolidated effective tax rate.

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related tax benefits will not be realized. Each quarter, the Company analyzes its deferred tax assets and, if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company will ultimately be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize its deferred tax assets. For additional information, see Part II, Item 1A of this Report.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. The statute of limitations remains open from 2012 forward for the U.S. federal jurisdiction and from 2008 forward for certain other foreign jurisdictions. As a result of statutes of limitation that will begin to expire within the next 12 months in various jurisdictions and possible settlements of audit-related issues with taxing authorities in various jurisdictions with respect to which none of the issues are individually significant, the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will decrease between \$3.5 million and \$4.5 million in the next 12 months.

At June 30, 2016 and December 31, 2015, the Company had \$23.0 million and \$17.9 million of total gross unrecognized tax benefits, respectively. If recognized, these unrecognized tax benefits would positively impact the Company's effective income tax rate. The Company's continuing practice is to recognize potential interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At June 30, 2016 and December 31, 2015, the amount of accrued income-tax-related interest and penalties was \$14.7 million and \$9.2 million, respectively.

NOTE 9 – NET INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share reflects the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock.

For the three and six months ended June 30, 2016 and 2015, 439,721 and 3,375,337 shares and 1,600,669 and 3,415,129 shares, respectively, of common stock equivalents related to equity-based awards were not included in the diluted per share calculation as the shares would be antidilutive.

The 3.25% Convertible Senior Notes ("Convertible Notes") were not included in the computation of diluted net income (loss) per share for the three and six months ended June 30, 2016 and 2015 because there is no excess value upon conversion over the principal amount of the Convertible Notes.

	Three months ended June 30,		Six months ended June 30,	
In thousands except per share amounts	2016	2015	2016	2015

Notes to Consolidated Financial Statements

NOTE 10 – FAIR VALUE MEASUREMENTS

In thousands	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Palmarejo royalty obligation embedded derivative	\$(878)	\$385	\$(5,756)	\$(1,160)
Rochester net smelter returns ("NSR") royalty obligation	(2,687)	1,137	(4,936)	(1,155)
Silver and gold options	(14)	1,232	(1,582)	185
Fair value adjustments, net	\$(3,579)	\$2,754	\$(12,274)	\$(2,130)

Accounting standards establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1), secondary priority to quoted prices in inactive markets or observable inputs (Level 2), and the lowest priority to unobservable inputs (Level 3).

The following table presents the Company's financial assets and liabilities measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

Fair Value at June 30, 2016				
In thousands	Total	Level 1	Level 2	Level 3
Assets:				
Equity securities	\$11,250	\$11,243	\$—	\$7
Other derivative instruments, net	655	—	655	—
	\$11,905	\$11,243	\$655	\$7
Liabilities:				
Palmarejo royalty obligation embedded derivative	\$3,317	\$—	\$—	\$3,317
Rochester NSR royalty obligation	12,559	—	—	12,559
	\$15,876	\$—	\$—	\$15,876

Fair Value at December 31, 2015				
In thousands	Total	Level 1	Level 2	Level 3
Assets:				
Equity securities	\$2,766	\$2,756	\$—	\$10
Liabilities:				
Palmarejo royalty obligation embedded derivative	\$4,957	\$—	\$—	\$4,957
Rochester NSR royalty obligation	9,593	—	—	9,593
Other derivative instruments, net	508	—	508	—
	\$15,058	\$—	\$508	\$14,550

The Company's investments in equity securities are recorded at fair market value in the financial statements based primarily on quoted market prices. Such instruments are classified within Level 1 of the fair value hierarchy. Quoted market prices are not available for certain equity securities; these securities are valued using pricing models, which require the use of observable and unobservable inputs, and are classified within Level 3 of the fair value hierarchy. The Company's silver and gold options and other derivative instruments, net, which relate to concentrate and certain doré sales contracts and foreign exchange contracts, are valued using pricing models, which require inputs that are derived from observable market data, including contractual terms, forward market prices, yield curves, credit spreads, and other unobservable inputs. The model inputs can generally be verified and do not involve significant management judgment. Such instruments are classified within Level 2 of the fair value hierarchy.

The fair values of the Palmarejo royalty obligation embedded derivative and Rochester NSR royalty obligation were estimated based on observable market data including contractual terms, forward silver and gold prices, yield curves, and credit spreads, as well as the Company's current mine plan which is considered a significant unobservable input. Therefore, the Company has classified these obligations as Level 3 financial liabilities. Based on current mine plans, 2.1 years was used to estimate the fair value of the Rochester NSR royalty obligation at June 30, 2016.

Coeur Mining, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

No assets or liabilities were transferred between fair value levels in the six months ended June 30, 2016.

The following tables present the changes in the fair value of the Company's Level 3 financial assets and liabilities for the three and six months ended June 30, 2016:

In thousands	Three Months Ended June 30, 2016			
	Balance at the beginning of the period	Revaluation	Settlements	Balance at the end of the period
Assets:				
Equity securities	\$7	\$ —	\$ —	\$7
Liabilities:

Assets:				
Equity securities	\$10	\$ —	\$ (3)	\$7
Liabilities:				
Palmarejo royalty obligation embedded derivative	\$4,957	\$ 5,756	\$ (7,396)	\$3,317
Rochester NSR royalty obligation	\$9,593	\$ 4,936	\$ (1,970)	\$12,559

The fair value of financial assets and liabilities carried at book value in the financial statements at June 30, 2016 and December 31, 2015 is presented in the following table:

In thousands	June 30, 2016				
	Book Value	Fair Value	Level 1	Level 2	Level 3
Liabilities:					
3.25% Convertible Senior Notes due 2028	\$712	\$ 706	\$ —	\$ 706	\$ —
7.875% Senior Notes due 2021 ⁽¹⁾	373,957	362,650	—	362,650	—
Term Loan due 2020 ⁽²⁾	94,545	94,545	—	94,545	—
Palmarejo gold production royalty obligation	4,108	4,144	—	—	4,144

(1)Net of unamortized debt issuance costs and premium received of \$4.8 million.

(2)Net of unamortized debt issuance costs of \$4.5 million.

In thousands	December 31, 2015				
	Book Value	Fair Value	Level 1	Level 2	Level 3
Liabilities:					
3.25% Convertible Senior Notes due 2028	\$712	\$ 693	\$ —	\$ 693	\$ —
7.875% Senior Notes due 2021 ⁽¹⁾	373,432	227,487	—	227,487	—
Term Loan due 2020 ⁽²⁾	94,489	99,500	—	99,500	—
San Bartolomé Lines of Credit	4,571	4,571	—	4,571	—
Palmarejo gold production royalty obligation	15,207	15,580	—	—	15,580

(1)Net of unamortized debt issuance costs and premium received of \$5.3 million.

(2)Net of unamortized debt issuance costs of \$5.0 million.

The fair values of the Convertible Notes and 7.875% Senior Notes due 2021 (the "Senior Notes") outstanding were estimated using quoted market prices. The fair value of the Term Loan due 2020 (the "Term Loan") approximates book value (excluding unamortized debt issuance costs) as the liability is secured, has a variable interest rate, and lacks significant credit

Coeur Mining, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

concerns. The fair value of the San Bartolomé line of credit approximates book value due to the short-term nature of the liability and absence of significant interest rate or credit concerns. The fair value of the Palmarejo gold production royalty obligation is estimated based on observable market data including contractual terms, forward silver and gold prices, yield curves, and credit spreads, as well as the Company's current mine plan which is considered a significant unobservable input.

NOTE 11 – DERIVATIVE FINANCIAL INSTRUMENTS

Palmarejo Gold Production Royalty

On January 21, 2009, the Company's subsidiary, Coeur Mexicana S.A. de C.V. ("Coeur Mexicana"), entered into a gold production royalty agreement with a subsidiary of Franco-Nevada Corporation. The royalty covers 50% of the life of mine production from the Palmarejo mine and legacy adjacent properties, excluding production from the recently acquired Paramount Gold and Silver Corp. ("Paramount") properties. The royalty transaction includes a minimum obligation of 4,167 gold ounces per month and terminates when payments on 400,000 gold ounces have been made. At June 30, 2016, a total of 8,493 gold ounces remain outstanding under the obligation.

The price volatility associated with the minimum royalty obligation is considered an embedded derivative. The Company is required to recognize the change in fair value of the remaining minimum obligation due to changing gold prices. Unrealized gains are recognized in periods when the gold price has decreased from the previous period and unrealized losses are recognized in periods when the gold price increases. The fair value of the embedded derivative is reflected net of the Company's current credit adjusted risk free rate, which was 8.3% and 19.9% at June 30, 2016 and December 31, 2015, respectively. The fair value of the embedded derivative at June 30, 2016 and December 31, 2015 was a liability of \$3.3 million and \$5.0 million, respectively. For the three and six months ended June 30, 2016 and 2015, the mark-to-market adjustments were losses of \$0.9 million and gains of \$0.4 million and losses of \$5.8 million and \$1.2 million, respectively.

Payments on the royalty obligation decrease the carrying amount of the minimum obligation and the derivative liability. Each monthly payment is an amount equal to the greater of the minimum of 4,167 ounces of gold or 50% of actual gold production multiplied by the excess of the monthly average market price of gold above \$416 per ounce, subject to a 1% annual inflation adjustment. For the three and six months ended June 30, 2016 and 2015, realized losses on settlement of the liabilities were \$4.3 million and \$3.6 million and \$7.3 million and \$11.7 million, respectively. The mark-to-market adjustments and realized losses are included in Fair value adjustments, net.

Provisional Silver and Gold Sales

The Company enters into sales contracts with third-party smelters and refiners which, in some cases, provide for a provisional payment based upon preliminary assays and quoted metal prices. The provisionally priced sales contracts contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable recorded at the forward price at the time of sale. The embedded derivatives do not qualify for hedge accounting and are marked to market through earnings each period until final settlement. Changes in silver and gold prices resulted in provisional pricing mark-to-market gains of \$0.6 million and losses of \$0.6 million and gains of \$1.2 million and \$0.3 million in the three and six months ended June 30, 2016 and 2015, respectively. At June 30, 2016, the Company had outstanding provisionally priced sales of 0.5 million ounces of silver and 34,876 ounces of gold at prices of \$18.28 and \$1,257, respectively.

Silver and Gold Options

During the three and six months ended June 30, 2016, the Company had no unrealized gains or losses and during 2015, the Company recorded unrealized gains of \$1.2 million and \$1.0 million, respectively, related to outstanding options which were included in Fair value adjustments, net. The Company recognized realized losses of \$51 thousand and no realized losses or gains during the three months ended June 30, 2016 and 2015, respectively, and realized losses of \$1.6 million and realized gains of \$0.8 million during the six months ended June 30, 2016 and 2015, respectively, from settled contracts. At June 30, 2016, the Company had no outstanding gold and silver options contracts.

Edgar Filing: Coeur Mining, Inc. - Form 10-Q

Coeur Mining, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements

At June 30, 2016, the Company had the following derivative instruments that settle as follows:

In thousands except average prices and notional ounces	2016	Thereafter

Credit Risk

The credit risk exposure related to any derivative instrument is limited to the unrealized gains, if any, on outstanding contracts based on current market prices. To reduce counter-party credit exposure, the Company enters into contracts with institutions management deems credit worthy and limits credit exposure to each institution. The Company does not anticipate non-performance by any of its counterparties.

NOTE 12 – ACQUISITIONS

On February 20, 2015, the Company completed its acquisition of the Wharf gold mine located near Lead, South Dakota, for \$99.4 million in cash. The transaction was accounted for as a business combination which requires that assets acquired and liabilities assumed be recognized at their respective fair values at the acquisition date. The Company incurred \$2.1 million of acquisition costs, which are included in Pre-development, reclamation, and other on the Condensed Consolidated Statements of Comprehensive Income (Loss).

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

The following table presents the unaudited pro forma summary of the Company's Condensed Consolidated Statements of Comprehensive Income (Loss) for the three and six months ended June 30, 2016 and 2015, as if the acquisition had occurred on January 1, 2015. The following unaudited pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations as they would have been had the transaction occurred on the assumed date, nor is it necessarily an indication of trends in future results for a number of reasons, including, but not limited to, differences between the assumptions used to prepare the pro forma information, potential synergies, and cost savings from operating efficiencies.

	Three months ended June 30,		Six Months Ended June 30, 2016	
In thousands	2016	2015	2016	2015 (Pro Forma)

NOTE 13 – INVESTMENTS

The Company invests in equity securities of silver and gold exploration and development companies. These investments are classified as available-for-sale and are measured at fair value in the financial statements with unrealized gains and losses recorded in Other comprehensive income (loss).

At June 30, 2016

In thousands	Cost	Gross Unrealized Losses	Gross Unrealized Gains	Estimated Fair Value
Equity securities	6,257	(180)	5,173	11,250

At December 31, 2015

In thousands	Cost	Gross Unrealized Losses	Gross Unrealized Gains	Estimated Fair Value
Equity securities	\$3,386	\$ (1,179)	\$ 559	\$ 2,766

The Company performs a quarterly assessment on each of its equity securities with unrealized losses to determine if the security is other than temporarily impaired. The Company recorded pre-tax other-than-temporary impairment losses of \$1.5 million in the six months ended June 30, 2015, in Other, net. The following table summarizes the gross unrealized losses on equity securities for which other-than-temporary impairments have not been recognized and the fair values of those securities, aggregated by the length of time the individual securities have been in a continuous unrealized loss position, at June 30, 2016:

	Less than twelve months	Twelve months or more	Total
In thousands	Unrealized Losses	Unrealized Losses	Unrealized Losses
Equity securities	\$ (180)	\$ 2,979	\$ 2,799

In March 2016, Coeur sold its 2.0% NSR royalty on the Cerro Bayo mine to the operator, a subsidiary of Mandalay Resources Corporation ("Mandalay"), for total consideration of approximately \$5.7 million, consisting of \$4.0 million in cash and 2.5 million Mandalay shares. The Company recognized a \$1.9 million pre-tax gain on this sale. The mineral interest associated with the Cerro Bayo mine was included in the Coeur Capital segment.

The operator of the Endeavor mine in Australia, on which the Company has a 100% silver stream, announced in early 2016 a significant curtailment of production due to low lead and zinc prices. As a result, Coeur recorded a \$2.5 million write-down of the mineral interest associated with the Endeavor silver stream within the Coeur Capital segment at March 31, 2016.

In April 2016, Coeur sold its tiered NSR royalty on the El Gallo mine to the operator, a subsidiary of McEwen Mining Inc., for total consideration of approximately \$6.3 million, including \$1 million in contingent consideration payable in mid-2018. In anticipation of this sale, the Company recorded a \$1.9 million write-down of the mineral interest within the Coeur Capital segment at March 31, 2016.

In April 2016, Coeur closed the sale of its 2.5% NSR royalty on the La Cigarra project to Kootenay Silver Inc. for total consideration of approximately \$3.6 million, consisting of \$500,000 in cash and 9.6 million Kootenay shares. The Company recognized a \$1.2 pre-tax gain on this sale. The mineral interest associated with La Cigarra was included in the Coeur Capital segment.

In May 2016, Coeur closed on the sale of its Martha assets and related liabilities in Argentina to Hunt Mining Corp. for total cash consideration of \$3.0 million, including \$1.5 million received at closing and \$1.5 million receivable on the one-year anniversary of the closing. The Company recognized a \$5.3 million pre-tax gain on this sale.

7.875% Senior Notes due 2021

At any time prior to February 1, 2017, the Company may redeem all or part of the Senior Notes upon not less than 30 nor more than 60 days' prior notice at a redemption price equal to the sum of 100% of the principal amount thereof, a make-whole premium as of the date of redemption, and accrued and unpaid interest and additional interest, if any, thereon, to the date of redemption. In addition, the Company may redeem some or all of the Senior Notes on or after February 1, 2017, at redemption prices set forth in the Indenture for the Senior Notes, together with accrued and unpaid interest.

3.25% Convertible Senior Notes due 2028

In accordance with the indenture governing the 3.25% Convertible Senior Notes due 2028 (the "Convertible Notes"), the Company announced on February 12, 2015 that it was offering to repurchase all of the Convertible Notes. At June 30, 2016, \$0.7 million of the Convertible Notes remained outstanding. The Convertible Notes are classified as current liabilities at June 30, 2016 as a result of the Company's intent to repurchase the notes in the next twelve months.

Term Loan due 2020

On June 23, 2015, the Company and certain of its subsidiaries entered into a credit agreement for the Term Loan with Barclays Bank PLC, as administrative agent (the "Term Loan Credit Agreement"). The Term Loan Credit Agreement provides for a five year \$100.0 million term loan to the Company, of which a portion of the proceeds were used to repay the Short-term Loan, and the remaining proceeds were used to be used for general corporate purposes. The Term Loan contains no financial maintenance covenants and at June 30, 2016 bears interest at 9.0% on \$24.75 million of principal based on a Eurodollar rate plus a margin of 8.00% (at no time will the adjusted Eurodollar rate be deemed to be less than 1.00% per annum) and at a U.S. Prime Rate-based rate equal to 10.5% on \$74.25 million of principal. Voluntary prepayments of the Term Loan under the Term Loan Credit Agreement are permitted, subject to the payment of a make-whole premium if such prepayment occurs prior to the first anniversary of the closing date, a premium of 105.0% of the principal amount between the first anniversary and the second anniversary of the closing date and a premium of 103.0% if such prepayment occurs on or after the second anniversary but prior to the third anniversary of the closing date. The Term Loan Credit Agreement requires amortization payments equal to 1.0% of the principal amount of the Term Loan per annum and also required net cash proceeds of debt issuances, excess cash flow, asset sales and casualty insurance recoveries (in each case, subject to certain exceptions) to either be reinvested in long-term assets used in the Company's business or be applied as a mandatory prepayment of the Term Loan. At June 30, 2016, the Company has made amortization payments totaling \$1.0 million. The obligations under the Term Loan are secured by substantially all of the assets of the Company and its domestic subsidiaries, including the land, mineral rights and infrastructure at the Kensington, Rochester and Wharf mines, as well as a pledge of the shares of certain of the Company's subsidiaries. The Term Loan Credit Agreement contains customary representations and warranties, events of default, and affirmative and negative covenants.

Lines of Credit

San Bartolomé had two available lines of credit for an aggregate amount of \$27.0 million, both of which were undrawn at June 30, 2016.

Short-term Loan

On March 31, 2015, the Company entered into a credit agreement (the "Short-term Credit Agreement") with The Bank of Nova Scotia. The Short-term Credit Agreement provided for a \$50.0 million loan (the "Short-term Loan") to the Company. The Short-term Loan generally bore interest at a rate equal to an adjusted Eurocurrency rate plus a margin of 2.50%. On June 25, 2015, the Short-term Loan was repaid in full, the security for the Short-term Loan was released, and the Short-term Credit Agreement was terminated.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

Capital Lease Obligations

From time to time, the Company acquires mining equipment under capital lease agreements. During the six months ended June 30, 2016, the Company entered into new lease financing arrangements primarily for a haul truck fleet at its Rochester mine and mining equipment to support the continued underground mine expansion at the Palmarejo complex. All capital lease obligations are recorded, upon lease inception, at the present value of future minimum lease payments.

Palmarejo Gold Production Royalty Obligation

On January 21, 2009, Coeur Mexicana entered into a gold production royalty transaction with a subsidiary of Franco-Nevada Corporation under which the subsidiary of Franco-Nevada Corporation purchased a royalty covering 50% of the life of mine gold to be produced from the Palmarejo silver and gold mine in Mexico. This royalty excludes production from the recently acquired Paramount properties.

The royalty agreement provides for a minimum obligation to be paid monthly on a total of 400,000 ounces of gold, or 4,167 ounces per month over an initial eight year period. Each monthly payment is an amount equal to the greater of 4,167 ounces of gold or 50% of actual gold production multiplied by the excess of the monthly average market price of gold above \$416 per ounce, subject to a 1% annual inflation compounding adjustment. Payments under the royalty agreement are made in cash or gold bullion. During the three months ended June 30, 2016 and 2015, the Company paid \$10.5 million and \$9.8 million, respectively and the Company paid \$19.6 million and \$20.1 million during the six months ended June 30, 2016 and 2015, respectively. At June 30, 2016, payments had been made on a total of 391,507 ounces of gold with further payments to be made on an additional 8,493 ounces of gold.

The Company used an implicit interest rate of 30.5% to discount the original royalty obligation, based on the fair value of the consideration received projected over the expected future cash flows at inception of the obligation. The discounted obligation is accreted to its expected future value over the expected minimum payment period based on the implicit interest rate. The Company recognized accretion expense for the three months ended June 30, 2016 and 2015 of \$0.4 million and \$1.8 million, respectively, and \$1.2 million and \$3.8 million for the six months ended June 30, 2016 and 2015, respectively. At June 30, 2016 and December 31, 2015, the remaining minimum obligation under the royalty agreement was \$4.1 million and \$15.2 million, respectively.

NOTE 19 - SUPPLEMENTAL GUARANTOR INFORMATION

The following Condensed Consolidating Financial Statements are presented to satisfy disclosure requirements of Rule 3-10 of Regulation S-X resulting from the guarantees by Coeur Alaska, Inc., Coeur Explorations, Inc., Coeur Rochester, Inc., Coeur South America Corp., Wharf Resources (U.S.A.), Inc. and subsidiaries, and Coeur Capital, Inc. (collectively, the “Subsidiary Guarantors”) of the Senior Notes. The following schedules present Condensed Consolidating Financial Statements of (a) Coeur, the parent company; (b) the Subsidiary Guarantors; and (c) certain wholly-owned domestic and foreign subsidiaries of the Company (collectively, the “Non-Guarantor Subsidiaries”). Each of the Subsidiary Guarantors is 100% owned by Coeur and the guarantees are full and unconditional. There are no restrictions on the ability of Coeur to obtain funds from its subsidiaries by dividend or loan.

NOTE 20 – COMMITMENTS AND CONTINGENCIES

Labor Union Contract

The Company maintains a labor agreement with Sindicato de Trabajadores Mineros de la Empresa Manquiri S.A. at the San Bartolomé mine in Bolivia. The San Bartolomé mine labor agreement, which became effective January 28, 2010, is currently active and does not have a fixed term. At June 30, 2016, approximately 11% of the Company's global labor force was covered by this collective bargaining agreement. The Company cannot predict whether this agreement will be renewed on similar terms or at all, whether future labor disruptions will occur or, if disruptions do occur, how long they will last.

Rochester Production Royalty

Commencing January 1, 2014, Coeur Rochester is obligated to pay a 3.4% net smelter returns royalty on up to 39.4 million silver equivalent ounces produced and sold from a portion of the Rochester mine, payable on a quarterly basis. For each calendar quarter, the royalty is payable on the actual sales prices received (exclusive of gains or losses associated with trading activities), less refining and related costs, of gold and silver produced and sold from the applicable portions of the Rochester mine. Changes in the Company's mine plan and silver and gold prices result in the recognition of mark-to-market gains or losses in Fair value adjustments, net. At June 30, 2016, a total of 22.1 million silver equivalent ounces remain outstanding under the obligation.

Palmarejo Gold Production Royalty and Gold Stream

On January 21, 2009, Coeur Mexicana entered into a gold production royalty agreement with a subsidiary of Franco-Nevada Corporation under which the subsidiary of Franco-Nevada Corporation purchased a royalty covering 50% of the life of mine gold to be produced from its Palmarejo silver and gold mine in Mexico (excluding production from the recently acquired Paramount properties). The royalty agreement provides for a minimum obligation of 4,167 ounces per month over an initial eight-year period for a total of 400,000 ounces of gold. At June 30, 2016, a total of 8,493 gold ounces remain outstanding under the obligation.

On October 2, 2014, Coeur Mexicana terminated the Palmarejo gold production royalty in exchange for a termination payment of \$2.0 million, effective upon completion of the minimum ounce delivery requirement. Subsequently, Coeur Mexicana entered into a gold stream agreement with a subsidiary of Franco-Nevada Corporation whereby Coeur Mexicana will sell 50% of Palmarejo gold production (excluding production from the recently acquired Paramount properties) upon completion of the gold production royalty minimum ounce delivery requirement, for the lesser of \$800 or spot price per ounce. Under the gold stream agreement, Coeur Mexicana received a \$22.0 million deposit toward future deliveries under the gold stream agreement.

Sites Related to Callahan Mining Corporation

In 1991, the Company acquired all of the outstanding common stock of Callahan Mining Corporation. The Company has received requests for information or notices of potential liability from state or federal agencies with regard to Callahan's operations at sites in Maine, Colorado and Washington. The Company did not make any decisions with respect to generation, transport or disposal of hazardous waste at these sites. Therefore, the Company believes that it is not liable for any potential cleanup costs either directly as an operator or indirectly as a parent. The Company anticipates that further agency interaction may occur with respect to these sites.

Callahan operated a mine and mill in Brooksville, Maine from 1968 until 1972 and subsequently disposed of the property. In 2000, the U.S. Environmental Protection Agency, or EPA, made a formal request to the Company for information regarding the site. The site was placed on the National Priorities List on September 5, 2002, and the Maine Department of Transportation, a partial owner of the property, signed a consent order in 2005. In January 2009, the EPA and the State of Maine made additional formal requests to the Company for information relating to the site, to which the Company responded. The first phase of cleanup at the site began in April 2011.

The Van Stone Mine in Stevens County, Washington consists of several parcels of land and was mined from 1926 until 1993 by multiple owners. Callahan sold its parcel in 1990. In February 2010, the State of Washington Department of Ecology notified Callahan that it, among others, is a potentially liable person (PLP) under Washington

law.

Under lease and option agreements with several owners, Callahan was involved with the Akron Mine located in Gunnison County, Colorado from 1937-1960. The United States Forest Service (“USFS”) made formal requests for information to Callahan regarding the site in December 2003, February 2007, March 2013, and November 2013. Callahan timely responded to each request. In August 2014, Callahan received a notice of potential CERCLA liability from the USFS regarding environmental contamination at the Akron Mine.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

Bolivian Temporary Restriction on Mining above 4,400 Meters

On October 14, 2009, the Bolivian state-owned mining organization, COMIBOL, announced by resolution that it was temporarily suspending mining activities above the elevation of 4,400 meters above sea level while stability studies of Cerro Rico mountain are undertaken. The Company holds rights to mine above this elevation under valid contracts with COMIBOL as well as under authorized contracts with local mining cooperatives that hold their rights under contract themselves with COMIBOL. The stability studies have been completed and officially submitted to the Bolivian mining technical authorities. Accordingly, the COMIBOL suspension has expired in accordance with the terms of the resolution. As a result of the resolution, the Company temporarily adjusted its mine plan to confine mining activities to the ore deposits below 4,400 meters above sea level and timely notified COMIBOL of the need to lift the restriction. The Cooperative Reserva Fiscal, with whom the Company has one of those contracts, subsequently interpreted the COMIBOL resolution and determined that the Huacajchi deposit was not covered by such resolution. In March 2010, the Cooperative Reserva Fiscal notified COMIBOL that, based on its interpretation, it was resuming mining of high grade material above the 4,400 meter level in the Huacajchi deposit. In December 2011, the Cooperative Reserva Fiscal sent a similar notification to COMIBOL with respect to a further area above the 4,400 meter level known as Huacajchi Sur. Based on these notifications and on the absence of any objection from COMIBOL, the Company resumed limited mining operations at the San Bartolomé mine on the Huacajchi deposit and Huacajchi Sur. Despite the fact that the COMIBOL suspension has expired, the Company has not resumed mining in other areas above the 4,400 meter level due to community relations concerns and the current political climate in Bolivia.

While the COMIBOL suspension has expired, it is uncertain at this time how long the Company will continue to suspend its mining operations in areas above the 4,400 meter level other than at Huacajchi and Huacajchi Sur. If COMIBOL decides to affirmatively adopt a new resolution to restrict access above the 4,400 meter level on a permanent basis, the Company may need to further write down the carrying value of the asset. While a portion of the Company's proven and probable reserves relate to material above the 4,400 meter level at San Bartolomé, so long as operations remain suspended, there is a risk that silver may not be produced from this material at expected levels or at all, particularly given the remaining anticipated mine life of this asset. It is also uncertain if any new mining or investment policies or shifts in political attitude may affect mining in Bolivia.

NOTE 21 – SUBSEQUENT EVENTS

On July 15, 2016, the Company voluntarily terminated the Term Loan due 2020 for \$103.4 million including the \$99.0 million remaining principal balance and a \$4.4 million prepayment premium.

All of the outstanding Convertible Notes were redeemed on July 25, 2016 for \$0.7 million.

On July 25, 2016, the Company completed the sale of its NSR royalty on the Correnso mine in New Zealand to the operator, a subsidiary of OceanaGold Corporation, for total consideration of \$5.2 million, including \$0.7 million in contingent consideration payable in 2017.

On July 26, 2016, the remaining minimum obligation under the Palmarejo royalty agreement was satisfied and the termination of the Palmarejo royalty agreement became effective.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Coeur Mining, Inc. and its subsidiaries (collectively "the Company", "our", or "we"). We use certain non-GAAP financial performance measures in Management's Discussion and Analysis ("MD&A") such as costs applicable to sales, all-in sustaining costs, adjusted net income (loss), EBITDA, and adjusted EBITDA. For a detailed description of each of these non-GAAP measures, please see "Non-GAAP Financial Performance Measures" at the end of this item. We believe it is important to read this item in conjunction with our interim unaudited Condensed Consolidated Financial Statements and the notes thereto included in this quarterly report and our Annual Report on Form 10-K for the year ended December 31, 2015 (the "2015 10-K"), as well as other information we file with the Securities and Exchange Commission. We provide certain operational and financial data on a silver equivalent basis, converting gold to silver at a 60:1 ratio of silver ounces to gold ounces. We also provide silver equivalent data using a ratio determined by average realized silver and gold prices during the relevant period. Silver and gold equivalence are stated at a 60:1 ratio unless otherwise noted.

Overview

We are a gold and silver producer with mines located in the United States, Mexico, and Bolivia and exploration projects in the United States, Mexico and Argentina. The Palmarejo complex, Rochester, Kensington, Wharf, and San Bartolomé mines constitute our principal sources of revenue. The Company also owns Coeur Capital, which is primarily comprised of the Endeavor silver stream.

The Company's strategy is to discover, acquire, develop and operate low-cost silver and gold mines that produce long-term cash flow, provide opportunities for growth through continued exploration, and generate superior and sustainable returns for stockholders. Management focuses on maximizing net cash flow through identifying and implementing revenue enhancement opportunities, reducing operating and non-operating costs, exercising consistent capital discipline, and efficient working capital management.

Second Quarter Highlights

Net income of \$14.5 million (\$0.09 per share) and adjusted net income of \$17.3 million (\$0.11 per share) (see "Non-GAAP Financial Performance Measures")

Metal sales of \$180.2 million

Production of 9.6 million silver equivalent ounces, consisting of 4.0 million silver ounces and 92,727 gold ounces

Costs applicable to sales were \$10.82 per silver equivalent ounce (\$10.15 per realized silver equivalent ounce) and \$649 per gold equivalent ounce (see "Non-GAAP Financial Performance Measures")

All-in sustaining costs were \$14.92 per silver equivalent ounce (\$13.36 per realized silver equivalent ounce) (see "Non-GAAP Financial Performance Measures")

General and administrative expenses reduced 12% from 2015 to \$7.4 million

Capital expenditures of \$23.3 million, primarily for the development of the Jualin deposit at Kensington and Guadalupe and Independencia underground deposits at Palmarejo

Received regulatory approval for the construction of an additional 120 million tons of leach capacity at Rochester

Completed a \$75.0 million "at the market" stock offering

Sale of non-core assets completed for total consideration of \$12.9 million

Cash and cash equivalents of \$257.6 million at June 30, 2016

(1) See "Non-GAAP Financial Performance Measures."

Consolidated Financial Results

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Net Income (Loss)

Net income was \$14.5 million (\$0.09 per share) compared to Net loss of \$16.7 million (\$(0.12) per share). The increase in Net income is primarily due to higher gold production, higher average realized silver and gold prices, lower costs applicable to sales per silver and gold ounce, and lower general and administrative expenses, partially offset by lower silver production and unfavorable fair value adjustments.

Revenue

Metal sales increased 10% due to higher average realized silver and gold prices and higher gold ounces sold. The Company's average realized silver and gold prices increased by 7% and 6%, respectively. The Company sold 4.0 million silver ounces and 88,543 gold ounces, compared to sales of 4.0 million silver ounces and 84,312 gold ounces. Gold contributed 62% of sales and silver contributed 38%, compared to 60% of sales from gold and 40% from silver. Royalty revenue was consistent as higher attributable production and metal prices were offset by the divestiture of several royalties.

Costs Applicable to Sales

Costs applicable to sales were lower due to lower unit costs at all mine sites and lower silver ounces sold, partially offset by higher gold ounces sold. For a complete discussion of costs applicable to sales, see Results of Operations below.

Amortization

Amortization decreased by \$1.5 million, or 4%, primarily due to lower silver production and lower amortizable mineral interests and mining equipment.

Expenses

General and administrative expenses decreased 12% due to lower compensation and professional services costs.

Exploration expense decreased \$1.3 million, or 38%, due to less drilling activity at Palmarejo and Rochester.

Pre-development, reclamation, and other expenses increased 93% to \$4.4 million due to higher legal and transaction related costs.

Other Income and Expenses

Non-cash fair value adjustments, net, were a loss of \$3.6 million compared to a gain of \$2.8 million, primarily due to the impact of changes in future metal prices on the Palmarejo gold production royalty and the Rochester 3.4% NSR royalty obligation.

Interest expense (net of capitalized interest of \$0.2 million) increased to \$10.9 million from \$10.7 million primarily due to interest expense associated with additional borrowings, partially offset by lower accretion of the Palmarejo gold production royalty obligation.

Other, net decreased by \$1.0 million, primarily due to the \$5.3 million gain on the sale of Martha assets and the \$1.2 million gains on the sale of non-core royalty assets, partially offset by higher foreign exchange losses

Income and Mining Taxes

During the second quarter of 2016, the Company reported estimated income and mining tax benefit of approximately \$0.8 million, for an effective tax rate of 5.6%. Estimated income and mining tax benefit during the second quarter of 2015 was \$0.26 million, for an effective tax rate of 1.5%. The following table summarizes the components of the Company's income (loss) before tax and income and mining tax (expense) benefit:

In thousands	Three months ended June 30, 2016		Three months ended June 30, 2015	
	Income (loss) before tax	Tax (expense) benefit	Income (loss) before tax	Tax (expense) benefit
United States	\$119	\$ (1,810)	\$ (9,764)	\$ 319
Argentina	4,453	(1,793)	(656)	(1)
Mexico	3,353	4,316	(5,582)	548
Bolivia	4,016	848	(1,219)	196
Other jurisdictions	1,788	(793)	284	(802)
	\$13,729	\$ 768	\$ (16,937)	\$ 260

The Company's effective tax rate is impacted by recurring items, such as foreign exchange rates on deferred tax balances, uncertain tax position and mining tax expense accruals, and the full valuation allowance on the deferred tax assets relating to losses in the United States and certain foreign jurisdictions. In addition, the Company's consolidated effective income tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and foreign exchange rates result in significant fluctuations in its consolidated effective tax rate.

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related benefits will not be realized. Each quarter, the Company analyzes its deferred tax assets and if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company will ultimately be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize its deferred tax assets.

Likewise, there are a number of factors that can potentially impact the Company's effective tax, including the geographic distribution of income, the non-recognition of tax assets, changes in tax laws, and the impact of specific transactions.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Net Income (Loss)

Net loss was \$5.9 million (\$(0.04) per share) compared to \$50.0 million (\$(0.42) per share). The lower Net loss is primarily due to higher gold production, higher average realized gold prices, lower costs applicable to sales per silver and gold ounce, lower exploration costs, and lower general and administrative expenses, partially offset by lower average realized silver prices, lower silver production, and more unfavorable fair value adjustments.

Revenue

Metal sales increased 4% due to higher average realized gold prices and higher gold ounces sold as a result of a full six months of Wharf production in the current period, partially offset by lower average realized silver prices and lower silver ounces sold. The Company's average realized silver and gold prices decreased by 1% and increased by 2%, respectively. The Company sold 7.5 million silver ounces and 167,634 gold ounces, compared to sales of 8.1 million silver ounces and 152,733 gold ounces. Gold contributed 62% of sales and silver contributed 38%, compared to 58% of sales from gold and 42% from silver. Royalty revenue was consistent with the prior year as higher attributable production and higher metal prices were offset by the divestitures of several royalties.

Costs Applicable to Sales

Costs applicable to sales were lower due to lower unit costs at all mine sites and lower silver ounces sold partially offset by higher gold ounces sold. For a complete discussion of costs applicable to sales, see Results of Operations below.

Amortization

Amortization decreased by \$6.6 million, or 9%, due to lower silver production and lower amortizable mineral interests and mining equipment.

Expenses

General and administrative expenses decreased \$1.6 million, or 9%, due to lower compensation and professional services costs.

Exploration expense decreased \$3.9 million, or 49%, due to less drilling activity at Palmarejo, Kensington, and Rochester.

Pre-development, reclamation, and other expenses decreased 5% to \$8.6 million, primarily due to prior year Wharf acquisition costs.

Write-downs were \$4.4 million (\$3.9 million net of tax) related to the Company's silver stream on the Endeavor mine in Australia as a result of the decision by the mine operator to significantly curtail production due to low lead and zinc prices. In addition, the anticipated sale of the Company's NSR royalty on the El Gallo mine contributed to the write-down.

Other Income and Expenses

Non-cash fair value adjustments, net, were a loss of \$12.3 million compared to a loss of \$2.1 million, primarily due to the impact of changes in future metal prices on the Palmarejo gold production royalty and the Rochester 3.4% NSR royalty obligation.

Interest expense (net of capitalized interest of \$0.4 million) increased to \$22.0 million from \$21.5 million primarily due to interest expense associated with additional borrowings, partially offset by lower accretion of the Palmarejo gold production royalty obligation.

Other, net increased by \$4.8 million, primarily due to the \$5.3 million gain on the sale of Martha assets and the \$3.1 million gain on the sale of non-core royalty assets, partially offset by changes in higher foreign exchange losses.

Income and Mining Taxes

During the first half of 2016, the Company reported estimated income and mining tax expense of approximately \$1.3 million, for an effective tax rate of 29.3%. Estimated income and mining tax benefit during the first half of 2015 was \$0.2 million, for an effective tax rate of 0.4%.

The following table summarizes the components of the Company's income (loss) before tax and income and mining tax (expense) benefit:

	Six months ended June 30, 2016		Six months ended June 30, 2015	
	Income (loss) before tax	Tax (expense) benefit	Income (loss) before tax	Tax (expense) benefit
In thousands				
United States	\$(9,242)	\$(2,342)	\$(30,471)	\$ 2,204
Argentina	3,438	(250)	(1,352)	(2)
Mexico	(4,155)	4,333	(15,255)	(716)
Bolivia	6,062	(722)	(3,598)	(1,211)
Other jurisdictions	(664)	(2,357)	519	(83)
	\$(4,561)	\$(1,338)	\$(50,157)	\$ 192

The Company's effective tax rate is impacted by recurring items, such as foreign exchange rates on deferred tax balances, uncertain tax position and mining tax expense accruals, and the full valuation allowance on the deferred tax assets relating to losses in the United States and certain foreign jurisdictions. In addition, the Company's consolidated effective income tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and foreign exchange rates result in significant fluctuations in its consolidated effective tax rate.

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related benefits will not be realized. Each quarter, the Company analyzes its deferred tax assets and if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company will ultimately be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize its deferred tax assets.

Likewise, there are a number of factors that can potentially impact the Company's effective tax, including the geographic distribution of income, the non-recognition of tax assets, changes in tax laws, and the impact of specific transactions.

Results of Operations

The Company produced 4.0 million ounces of silver and 92,727 ounces of gold in the three months ended June 30, 2016, compared to 4.3 million ounces of silver and 80,855 ounces of gold in the three months ended June 30, 2015. Silver production decreased due to timing of leach pad recoveries at Rochester, lower mill throughput at San Bartolomé, and lower silver production at Endeavor, partially offset by higher grades and recovery at Palmarejo. Gold production increased 15% in the three months ended June 30, 2016, primarily due to higher grade and recovery at Wharf.

The Company produced 7.4 million ounces of silver and 170,799 ounces of gold in the six months ended June 30, 2016, compared to 8.1 million ounces of silver and 150,589 ounces of gold in the six months ended June 30, 2015. Silver production decreased 9% due to lower mill throughput at Palmarejo as the mine completed its transition to a lower tonnage, higher grade underground operation, timing of leach pad recoveries at Rochester, and lower silver production at Endeavor. Gold production increased 13% in the six months ended June 30, 2016 primarily due to a full six months of production of Wharf and higher grade at Kensington.

Costs applicable to sales were \$10.82 per silver equivalent ounce and \$649 per gold ounce in the three months ended June 30, 2016 compared to \$12.84 per silver equivalent ounce and \$820 per gold ounce in the three months ended June 30, 2015. Costs applicable to sales per silver equivalent ounce decreased 16% in the three months ended June 30, 2016 due to lower unit costs at Palmarejo, Rochester, and San Bartolomé. Costs applicable to sales per gold equivalent ounce decreased 21% in the three months ended June 30, 2016 due to lower unit costs at Wharf and Kensington.

Costs applicable to sales were \$11.53 per silver equivalent ounce and \$688 per gold ounce in the six months ended June 30, 2016 compared to \$13.59 per silver equivalent ounce and \$811 per gold ounce in the six months ended June 30, 2015. Costs applicable to sales per silver equivalent ounce decreased 15% in the six months ended June 30, 2016 due to lower unit costs at Palmarejo and San Bartolomé. Costs applicable to sales per gold equivalent ounce decreased 15% in the six months ended June 30, 2016 due to lower unit costs at Kensington and Wharf.

All-in sustaining costs were \$14.92 per silver equivalent ounce in the three months ended June 30, 2016 compared to \$16.80 per silver equivalent ounce in the three months ended June 30, 2015. The 11% reduction in all-in sustaining costs per silver equivalent ounce in the three months ended June 30, 2016 was primarily due to higher production, lower costs applicable to sales per Company-wide silver equivalent ounce, and lower general and administrative expenses, partially offset by higher sustaining capital expenditures.

All-in sustaining costs were \$15.56 per silver equivalent ounce in the six months ended June 30, 2016 compared to \$17.18 per silver equivalent ounce in the six months ended June 30, 2015. The 9% reduction in all-in sustaining costs per silver equivalent ounce in the six months ended June 30, 2016 was primarily due to higher production and lower costs applicable to sales per Company-wide silver equivalent ounce, lower general and administrative expenses and exploration expenses, partially offset by higher sustaining capital expenditures.

Palmarejo

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Silver equivalent production increased 4% due to significantly higher silver and gold grades and higher recoveries. Metal sales were \$48.3 million, or 27% of Coeur's metal sales, compared with \$38.9 million, or 24% of Coeur's metal sales. Costs applicable to sales per ounce decreased 34% as a result of lower waste tons mined, lower milling, diesel, and consumables costs, favorable currency exchange rates, and lower maintenance costs. Amortization increased to \$14.8 million compared to \$9.0 million, primarily due to the ramp-up of production at Guadalupe and Independencia. Capital expenditures remained comparable at \$8.9 million as the Company continues to develop the Guadalupe and Independencia underground operations.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Silver equivalent production decreased 8% due to planned lower mill throughput primarily sourced from underground operations, partially offset by higher silver and gold grades and recovery. Metal sales were \$78.1 million, or 24% of Coeur's metal sales, compared with \$78.3 million, or 26% of Coeur's metal sales. Costs applicable to sales per ounce decreased 30% as a result of reduced mining and ore haulage costs, lower waste tons mined, lower milling, diesel, and consumables costs, favorable currency exchange rates, and lower maintenance costs. Amortization increased to \$22.1 million, primarily due to the ramp-up of production at Guadalupe and Independencia. Capital expenditures remained comparable at \$17.7 million as the Company continues to develop the underground operations.

Edgar Filing: Coeur Mining, Inc. - Form 10-Q

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Silver equivalent production decreased 11% due to the timing of recoveries and lower silver grade, partially offset by higher tons placed. Metal sales were \$35.8 million, or 20% of Coeur's metal sales, compared with \$36.3 million, or 22% of Coeur's metal sales, due to lower production. Costs applicable to sales per silver equivalent ounce decreased 6% due to lower diesel, maintenance, and processing costs. Amortization was \$5.4 million in both periods. Capital expenditures decreased to \$3.9 million compared to \$5.9 million.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Silver equivalent production decreased 15% due to the timing of recoveries and lower silver grade, partially offset by higher tons placed. Metal sales were \$65.7 million, or 20% of Coeur's metal sales, compared with \$80.4 million, or 25% of Coeur's metal sales, due to lower production. Costs applicable to sales per silver equivalent ounce decreased 5% due to lower diesel, maintenance and processing costs. Amortization was \$10.8 million compared to \$12.2 million due to lower production. Capital expenditures decreased to \$7.2 million compared to \$9.2 million.

Kensington

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Tons milled	157,117	170,649	316,473	335,600
Gold ounces produced	32,210	29,845	64,183	63,754
Costs applicable to sales/oz ⁽¹⁾	\$ 749	\$ 750	\$ 761	\$ 774

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Gold production increased 8% due to 22% higher grade, partially offset by lower mill throughput. Metal sales were \$36.5 million, or 20% of Coeur's metal sales, compared to \$42.5 million, or 26% of Coeur's metal sales due to fewer gold ounces sold. Costs applicable to sales per ounce were mostly unchanged. Amortization was \$9.8 million compared to \$12.7 million due to higher pebble reject production. Capital expenditures were \$7.5 million compared to \$4.7 million, due to the continued development of the high-grade Jualin deposit.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Gold production increased due to higher grade, partially offset by lower mill throughput. Metal sales were \$72.2 million, or 22% of Coeur's metal sales, compared to \$86.5 million, or 27% of Coeur's metal sales, due to lower gold ounces sold. Costs applicable to sales per ounce decreased 2% due to lower mining and equipment rental costs. Amortization was \$18.2 million compared to \$24.2 million due to higher pebble reject production. Capital expenditures were \$15.6 million compared to \$8.9 million, due to the underground development of the high-grade Jualin deposit.

(2) See Non-GAAP Financial Performance Measures.

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Gold equivalent production increased 69% due to timing of recoveries and higher gold grade. Metal sales were \$34.0 million, or 19% of Coeur's metal sales compared to \$20.4 million, or 12% of Coeur's metal sales, due to higher gold ounces sold. Costs applicable to sales per gold equivalent ounce decreased primarily due to lower mining and diesel costs. Amortization was \$5.1 million compared to \$3.5 million due to higher production. Capital expenditures were \$1.5 million compared to \$1.2 million.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Gold equivalent production increased 112% due to a full six-months of production, higher gold grade and timing of recoveries. Metal sales were \$61.9 million, or 19% of Coeur's metal sales, compared to \$20.4 million, or 6% of Coeur's metal sales, due to higher gold ounces sold. Costs applicable to sales per gold equivalent ounce decreased primarily due to lower mining and diesel costs. Amortization was \$9.2 million compared to \$3.5 million due to higher production. Capital expenditures were \$2.9 million compared to \$1.3 million.

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Silver production decreased 2% due to lower mill throughput partially offset by higher grade supplemental ore purchases. Silver sales were \$25.2 million, or 14% of Coeur's metal sales, compared with \$23.4 million, or 14% of Coeur's metal sales. Costs applicable to sales per ounce declined to \$13.14 due to the supplemental ore purchases and lower processing costs. Amortization was \$1.9 million compared to \$5.3 million due to lower amortizable mineral interest and mining equipment. Capital expenditures were \$1.3 million compared to \$1.0 million.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Silver production increased 5% primarily due to higher recovery rates and higher grade supplemental ore purchases. Silver sales were \$46.5 million, or 14% of Coeur's metal sales, compared with \$44.9 million, or 14% of Coeur's metal sales. Costs applicable to sales per ounce declined 8% to \$12.89 due to the supplemental ore purchases and lower processing costs. Amortization was \$3.6 million compared to \$10.0 million due to lower amortizable mineral interest and mining equipment. Capital expenditures were \$1.8 million compared to \$1.9 million.

Three Months Ended June 30, 2016 compared to Three Months Ended June 30, 2015

Silver production at Endeavor decreased as a result of the mine operator's decision to significantly curtail production due to low lead and zinc prices. Costs applicable to sales per ounce increased due to the impact of silver prices on the Company's silver price sharing agreement with the Endeavor mine operator. Royalty revenue was \$1.8 million in both periods. Amortization was

38

\$0.1 million compared to \$2.6 million due to lower production and the impact of lower amortizable mineral interest. In the second quarter of 2016, Coeur completed the sale of non-core royalty assets for total consideration of \$9.9 million. The Company recognized a gain of \$1.2 million, which is recorded in Other, net, related to the sale of these non-core assets.

Six Months Ended June 30, 2016 compared to Six Months Ended June 30, 2015

Silver production at Endeavor decreased as a result of the mine operator's decision to significantly curtail production due to low lead and zinc prices. Costs applicable to sales per ounce was mostly consistent. Royalty revenue was \$3.6 million compared to \$3.8 million. Amortization was \$0.9 million compared to \$4.8 million due to lower production, and the impact of lower amortizable mineral interest. In the first half of 2016, Coeur completed the sale of non-core royalty assets for total consideration of \$15.6 million. The Company recognized a gain of \$3.1 million, which is recorded in Other, net, related to the sale of these non-core assets.

Liquidity and Capital Resources

Cash Provided by Operating Activities

Net cash provided by operating activities for the three and six months ended June 30, 2016 was \$45.9 million and \$52.6 million, respectively, compared to net cash provided by operating activities of \$37.0 million and \$33.6 million, respectively, for the three and six months ended June 30, 2015, and was impacted by the following key factors:

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Consolidated silver equivalent ounces sold	9,286,033	9,067,614	17,561,041	17,261,499
Average realized price per silver equivalent ounce	\$19.41	\$18.14	\$18.61	\$18.28
Costs applicable to sales per consolidated silver equivalent ounce ⁽¹⁾	(10.82)	(13.13)	(11.50)	(13.57)
Operating margin per consolidated silver equivalent ounce	\$8.59	\$5.01	\$7.11	\$4.71

(1) See Non-GAAP Financial Performance Measures.

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
In thousands				
Cash flow before changes in operating assets and liabilities	\$47,496	\$24,875	\$70,749	\$35,270
Changes in operating assets and liabilities:				
Receivables	(12,402)	(2,342)	(8,921)	214
Prepaid expenses and other	(898)	160	381	(1,167)
Inventories	(7,686)	4,649	(15,508)	5,333
Accounts payable and accrued liabilities	19,429	9,662	5,855	(6,095)
CASH PROVIDED BY OPERATING ACTIVITIES	\$45,939	\$37,004	\$52,556	\$33,555

Cash provided by operating activities increased \$8.9 million for the three months ended June 30, 2016 compared to the three months ended June 30, 2015 due to higher average realized prices, higher silver equivalent ounces sold and lower costs applicable to sales per silver equivalent ounce, partially offset by unfavorable working capital adjustments. Metal sales for the three months ended June 30, 2016 increased \$15.7 million of which \$11.0 million was due to higher average realized prices and \$4.7 million was due to higher silver equivalent ounces sold. The \$1.6 million working capital increase for the three months ended June 30, 2016 was primarily due to an increase in trade receivables and ore on leach pads, partially offset by an increase in accounts payable, compared to the \$12.1 million working capital decrease for the three months ended June 30, 2015, primarily due to an increase in accrued interest, payroll, and other benefits.

Cash provided by operating activities increased \$19.0 million for the six months ended June 30, 2016 compared to the six months ended June 30, 2015 due to higher average realized prices, higher silver equivalent ounces sold and lower costs applicable to sales per silver equivalent ounce, partially offset by unfavorable working capital adjustments. Metal sales for the six months ended June 30, 2016 increased \$11.2 million of which \$2.8 million was due to higher

average realized prices and \$8.4 million was due to higher silver equivalent ounces sold. The \$18.2 million working capital increase for the six months ended June

30, 2016 was primarily due to an increase in ore on leach pads and trade receivables, partially offset by an increase in accounts payable, compared to the \$1.7 million working capital increase for the six months ended June 30, 2015, primarily due to payment of payroll and other benefits.

Cash Used in Investing Activities

Net cash used in investing activities in the three months ended June 30, 2016 was \$16.9 million compared to \$34.1 million in the three months ended June 30, 2015, primarily due to proceeds from the sale of non-core assets in 2016 and the acquisition of Paramount in 2015. The Company had capital expenditures of \$23.3 million for the three months ended June 30, 2016 compared with \$23.7 million in the three months ended June 30, 2015. Capital expenditures in both periods were primarily related to underground development at Palmarejo and Kensington. Net cash used in investing activities in the six months ended June 30, 2016 was \$35.5 million compared to \$155.5 million in the six months ended June 30, 2015, primarily due to proceeds from the sale of non-core assets in 2016 and the acquisition of the Wharf gold mine for \$99.4 million in February 2015. The Company had capital expenditures of \$45.5 million for the six months ended June 30, 2016 compared with \$41.3 million in the six months ended June 30, 2015. Capital expenditures in both periods were primarily related to underground development at Palmarejo and Kensington.

Cash Provided by Financing Activities

Net cash provided by financing activities for the three months ended June 30, 2016 was \$55.5 million compared to \$23.5 million in the three months ended June 30, 2015. During the three months ended June 30, 2016, the Company received net proceeds of \$73.1 million from the sale of 9.3 million shares of its common stock in connection with \$75.0 million “at the market” stock offering. During the three months ended June 30, 2015, the Company entered into the \$100.0 million Term Loan due 2020, partially offset by the simultaneous repayment of a \$50.0 million short-term loan entered into in connection with the Wharf acquisition and \$9.4 million of debt repayment at San Bartolome.

Net cash provided by financing activities for the six months ended June 30, 2016 was \$40.1 million compared to \$57.7 million in the six months ended June 30, 2015. During the six months ended June 30, 2016, the Company received net proceeds of approximately \$73.1 million from the sale of 9.3 million shares of its common stock. During the six months ended June 30, 2015, the Company entered into a \$50.0 million Short-term Loan which was subsequently repaid upon entering into the \$100.0 million Term Loan due 2020 and \$9.4 million of debt repayment at San Bartolome.

On July 15, 2016, the Company voluntarily terminated the Term Loan due 2020 for \$103.4 million including the \$99.0 million remaining principal balance and a \$4.4 million prepayment premium.

Other Liquidity Matters

The Company has asserted indefinite reinvestment of certain foreign subsidiary earnings as determined by management’s judgment about and intentions concerning the future operations of the Company. The Company does not believe that the amounts reinvested will have a material impact on liquidity.

We believe that our liquidity and capital resources are adequate to fund our operations and corporate activities. In order to reduce future cash interest payments, and/or amounts due at maturity or upon redemption, from time to time we may repurchase certain of our debt securities for cash or in exchange for other securities, which may include secured or unsecured notes or equity, in each case in open market or privately negotiated transactions. We regularly engage in conversations with our bondholders and evaluate any such transactions in light of prevailing market conditions, liquidity requirements, contractual restrictions, and other factors. The amounts involved may be significant and any such transactions may occur at a substantial discount to the debt securities' face amount.

Critical Accounting Policies and Accounting Developments

Please see Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES contained in the Company's Form 10-K for the year ended December 31, 2015 for the Company's critical accounting policies and estimates.

Non-GAAP Financial Performance Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by generally accepted accounting principles ("GAAP"). These measures should not be considered in isolation or as a substitute for performance measures prepared in accordance with GAAP.

Adjusted Net Income (Loss)

Management uses Adjusted net income (loss) to evaluate the Company's operating performance, and to plan and forecast its operations. The Company believes the use of Adjusted net income (loss) reflects the underlying operating performance of our core mining business and allows investors and analysts to compare results of the Company to similar results of other mining companies. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and are based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Adjusted net income (loss) is reconciled to Net income (loss) in the table below:

	Three months ended June 30,		Six months ended June 30,	
In thousands except per share amounts	2016	2015	2016	2015
Net income (loss)	\$ 14,497	\$(16,677)	\$(5,899)	\$(49,965)
Fair value adjustments	3,579	(2,754)	12,274	2,130
Impairment of marketable securities	20	31	20	1,545
Write-downs	—	—	4,446	—
Gain on sale of assets	(2,812)	(107)	(4,486)	(63)
(Gain) loss on debt extinguishments	—	524	—	271
Transaction-related costs	792	38	1,172	2,013
Tax effect of adjustments	3,996	136	2,621	(409)
Foreign exchange (gain) loss	(2,810)	751	(3,933)	2,028
Adjusted net income (loss)	\$ 17,262	\$(18,058)	\$ 6,215	\$(42,450)
Adjusted net income (loss) per share	\$0.11	\$(0.13)	\$0.04	\$(0.36)

EBITDA and Adjusted EBITDA

Management uses EBITDA to evaluate the Company's operating performance, to plan and forecast its operations, and assess leverage levels and liquidity measures. The Company believes the use of EBITDA reflects the underlying operating performance of our core mining business and allows investors and analysts to compare results of the Company to similar results of other mining companies. In addition, Adjusted EBITDA is a measure used in the Company's Senior Notes due 2021 indenture to determine our ability to make certain payments and incur additional indebtedness. EBITDA and Adjusted EBITDA do not represent, and should not be considered an alternative to, Net income (Loss) or Cash Flow from Operations as determined under GAAP. Other companies may calculate Adjusted EBITDA differently and those calculations may not be comparable to our presentation. Adjusted EBITDA is reconciled to Net income (loss) in the table below:

	Three months ended		Six months ended	
	June 30,		June 30,	
In thousands except per share amounts	2016	2015	2016	2015
Net income (loss)	\$14,497	\$(16,677)	\$(5,899)	\$(49,965)
Interest expense, net of capitalized interest	10,875	10,734	21,995	21,499
Income tax provision (benefit)	(768)	(260)	1,338	(192)

Asset retirement obligation accretion	2,066	2,078	4,125	3,787
Inventory adjustments	946	1,805	1,863	5,490
Write-downs	—	—	4,446	—
Adjusted EBITDA	\$72,355	\$36,442	\$108,138	\$63,092
Costs Applicable to Sales and All-in Sustaining Costs				

Management uses Costs applicable to sales ("CAS") and All-in sustaining costs ("AISC") to evaluate the Company's current operating performance and life of mine performance from discovery through reclamation. We believe these measures assist analysts, investors and other stakeholders in understanding the costs associated with producing silver and gold, assessing our operating performance and ability to generate free cash flow from operations and sustaining production. These measures may not be indicative of operating profit or cash flow from operations as determined under GAAP. Management believes converting the benefit from selling gold into silver equivalent ounces best allows management, analysts, investors and other stakeholders to evaluate the operating performance of the Company. Other companies may calculate CAS and AISC differently as a result of reflecting the benefit from selling non-silver metals as a by-product credit rather than converting to silver equivalent ounces, differences in the determination of sustaining capital expenditures, and differences in underlying accounting principles and accounting frameworks such as in International Financial Reporting Standards.

Cautionary Statement Concerning Forward-Looking Statements

This report contains numerous forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") relating to the Company's gold and silver mining business, including statements regarding strategies to produce long-term cash flow, provide opportunities for growth through continued exploration, and generate superior and sustainable returns for stockholders, maximizing net cash flow, reducing operating and non-operating costs, demonstrating consistent capital discipline, efficient management of working capital, tax positions, efforts to mitigate risks associated with gold and silver price and foreign currency fluctuations and the adequacy of liquidity and capital resources. Such forward-looking statements are identified by the use of words such as "believes," "intends," "expects," "hopes," "may," "should," "plan," "projected," "contemplates," "anticipates," and similar words. Actual results could differ materially from those projected in the forward-looking statements. The factors that could cause actual results to differ materially from those projected in the forward-looking statements include (i) the risk factors set forth in the "Risk Factors" section of the 2015 10-K and in this Quarterly Report on Form 10-Q and the risks and uncertainties discussed in this MD&A, (ii) the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), (iii) changes in the market prices of gold and silver and a sustained lower price environment, including the resulting impact on cash flows and debt covenant compliance, (iv) the uncertainties inherent in the Company's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions and grade variability, (v) any future labor disputes or work stoppages (involving the Company and its subsidiaries or third parties), (vi) the uncertainties inherent in the estimation of gold and silver reserves and mineralized material, (vii) changes that could result from the Company's future acquisition of new mining properties or businesses, (viii) the absence of control over and reliance on third parties to operate mines in which the Company or any of its subsidiaries holds royalty or streaming interests and risks related to these mining operations (including results of mining and exploration activities, environmental, economic and political risks, and changes in mine plans and project parameters); (ix) the loss of access to any third-party smelter to which the Company markets silver and gold, (x) the effects of environmental and other governmental regulations, (xi) the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, and (xii) the Company's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt. Readers are cautioned not to put undue reliance on forward-looking statements. The Company disclaims any intent or obligation to update publicly these forward-looking statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to various market risks as a part of its operations and engages in risk management strategies to mitigate these risks. The Company continually evaluates the potential benefits of engaging in these strategies based on current market conditions. The Company does not actively engage in the practice of trading derivative instruments for profit. Additional information about the Company's derivative financial instruments may be found in Note 11 -- Derivative Financial Instruments in the notes to the condensed consolidated financial statements. This discussion of the Company's market risk assessments contains "forward looking statements". For additional information regarding forward-looking statements and risks and uncertainties that could impact the Company, please refer to Item 2 of this Report - Cautionary Statement Concerning Forward-Looking Statements. Actual results and actions could differ materially from those discussed below.

Gold and Silver Price

Gold and silver prices may fluctuate widely due to numerous factors such as U.S. dollar strength or weakness, demand, investor sentiment, inflation or deflation, and global mine production. The Company's profitability and cash flow may be significantly impacted by changes in the market price of gold and silver.

Gold and Silver Hedging

To mitigate the risks associated with gold and silver price fluctuations, the Company may enter into option contracts to hedge future production.

If the market price of silver were to average less than the high strike price but more than the low strike price during the contract period, the Company would receive the difference between the average market price and the high strike price for the contracted volume over the contract period. If the market price of silver were to average less than the low strike price during the contract period, the Company would receive the difference between the average market price and the high strike price for the contracted volume over the contract period, and the Company would be required to pay the difference between the average market price and the low strike price for the contracted volume over the contract period. The Company may be exposed to non-performance risk by counterparties as a result of its hedging activities. This exposure would be limited to the amount that the spot price of the metal falls short of the contract price. The Company had no outstanding gold and silver hedging contracts at June 30, 2016.

Provisional Silver and Gold Sales

The Company enters into sales contracts with third-party smelters and refiners which, in some cases, provide for a provisional payment based upon preliminary assays and quoted metal prices. The provisionally priced sales contracts contain an embedded derivative that is required to be separated from the host contract. Depending on the difference between the price at the time of sale and the final settlement price, embedded derivatives are recorded as either a derivative asset or liability. The embedded derivatives do not qualify for hedge accounting and, as a result, are marked to the market gold and silver price at the end of each period from the provisional sale date to the date of final settlement. The mark-to-market gains and losses are recorded in earnings. Changes in silver and gold pricing resulted in provisional pricing mark-to-market gains of \$1.2 million in the six months ended June 30, 2016.

At June 30, 2016, the Company had outstanding provisionally priced sales of 0.5 million ounces of silver and 34,876 ounces of gold at prices of \$18.28 and \$1,257, respectively. A 10% change in realized silver price would cause revenue to vary by \$1.0 million and a 10% change in realized gold price would cause revenue to vary by \$4.4 million.

Palmarejo Gold Production Royalty

On January 21, 2009, Coeur Mexicana entered into a gold production royalty transaction with a subsidiary of Franco-Nevada Corporation. The royalty covers 50% of the life of mine production from the Palmarejo mine and adjacent properties and includes a minimum obligation of 4,167 gold ounces per month which terminates when payments in respect of 400,000 gold ounces have been made. The minimum royalty obligation is considered an embedded derivative financial instrument due to the impact of fluctuating gold prices on the underlying gold ounces. At June 30, 2016, a total of 8,493 ounces of gold remain outstanding under the minimum royalty obligation. The fair value of the embedded derivative is reflected net of the Company's current credit adjusted risk free rate, which was 8.3% at June 30, 2016. The fair value of the embedded derivative at June 30, 2016 was a liability of \$3.3 million. A 10% change in the price of gold would result in a change in the fair value of the net derivative liability at June 30, 2016 to vary by \$0.6 million. On July 26, 2016, payments on the remaining ounces under the minimum royalty obligation were made and termination of the royalty was effective.

Foreign Currency

The Company operates, or has mineral interests, in several foreign countries including Australia, Bolivia, Chile, Mexico, Argentina, Ecuador, and New Zealand, which exposes it to foreign currency exchange rate risks. Foreign currency exchange rates are influenced by world market factors beyond the Company's control such as supply and demand for U.S. and foreign currencies and related monetary and fiscal policies. Fluctuations in local currency exchange rates in relation to the U.S. dollar may significantly impact profitability and cash flow.

Foreign Exchange Hedging

To manage foreign currency risk, the Company may enter into forward foreign exchange contracts and option contracts when the Company believes such contracts would be beneficial. The Company had no outstanding foreign exchange contracts at June 30, 2016.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures

As of the end of the period covered by this quarterly report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature, can provide only reasonable assurance regarding management's control objectives. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events. Based upon the foregoing, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective and operating to provide reasonable assurance that information required to be disclosed by it in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and to provide reasonable assurance that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Report on Internal Control Over Financial Reporting

Based on an evaluation by the Company's Chief Executive Officer and Chief Financial Officer, such officers concluded that there was no change in the Company's internal control over financial reporting during the three months ended June 30, 2016 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

Item 1. Legal Proceedings

For a discussion of legal proceedings, see Note 20 -- Commitments and Contingencies in the notes to the condensed consolidated financial statements included herein.

Item 1A. Risk Factors

Item 1A -- Risk Factors of the 2015 10-K sets forth information relating to important risks and uncertainties that could materially adversely affect the Company's business, financial condition or operating results. Those risk factors have been supplemented and updated in this Form 10-Q. Additional risks and uncertainties that the Company does not presently know or that it currently deems immaterial also may impair our business operations.

The Company is an international company and is exposed to political and social risks in the countries in which it has significant operations or interests.

A significant portion of the Company's revenues are generated by operations outside the United States, and it is subject to significant risks inherent in mineral extraction by foreign companies and contracts with government owned entities. Exploration, development, production and closure activities in many countries are potentially subject to heightened political and social risks that are beyond the Company's control. These risks include the possible unilateral cancellation or forced renegotiation of contracts, unfavorable changes in foreign laws and regulations, royalty and tax increases, risks associated with the value-added tax ("VAT") and income tax refund recovery and collection process, claims by governmental entities or indigenous communities, expropriation or nationalization of property and other risks arising out of foreign sovereignty over areas in which operations are conducted. The right to export silver and gold may depend on obtaining certain licenses and quotas, which could be delayed or denied at the discretion of the relevant regulatory authorities. In addition, the Company's rights under local law may be less secure in countries where judicial systems are susceptible to manipulation and intimidation by government agencies, non-governmental organizations or civic groups.

Any of these developments could require the Company to curtail or terminate operations at its mines, incur significant costs to meet newly-imposed environmental or other standards, pay greater royalties or higher prices for labor or services and recognize higher taxes, or experience significant delays or obstacles in the recovery of VAT or income tax refunds owed, which could materially and adversely affect financial condition, results of operations and cash flows.

These risks may be higher in developing countries in which the Company may expand its exploration for and development of mineral deposits. Potential operations in these areas increase the Company's exposure to risks of war, local economic conditions, political disruption, civil disturbance and governmental policies that may disrupt its operations.

The Company's ongoing and future success depends on developing and maintaining productive relationships with the communities, including indigenous peoples, and other stakeholders in its operating locations. The Company believes its operations can provide valuable benefits to surrounding communities, in terms of direct employment, training and skills development and other benefits associated with ongoing payment of taxes. In addition, the Company seeks to maintain its partnerships and relationships with local communities and stakeholders in a variety of ways, including in-kind contributions, volunteer time, sponsorships and donations. Notwithstanding the Company's ongoing efforts, local communities and stakeholders can become dissatisfied with its activities or the level of benefits provided, which may result in civil unrest, protests, direct action or campaigns against it. Any such occurrences could materially and adversely affect the Company's financial condition, results of operations and cash flows.

The Company's future operating performance may not generate cash flows sufficient to meet debt payment obligations.

As of July 26, 2016, the Company had approximately \$420.6 million of outstanding indebtedness. The Company's ability to make scheduled debt payments on outstanding indebtedness will depend on future results of operations and cash flows. The Company's results of operations and cash flows, in part, are subject to economic factors beyond its control, including the market prices of silver and gold. The Company may not be able to generate enough cash flow to meet obligations and commitments under outstanding debt instruments. If the Company cannot generate sufficient cash flow from operations to service debt, it may need to further refinance debt, dispose of assets or issue equity to obtain the necessary funds.

The Company cannot predict whether it would be able to refinance debt, issue equity or dispose of assets to raise funds on a timely basis or on satisfactory terms. In a rising interest rate environment, the costs of borrowing additional funds or refinancing outstanding indebtedness would also be expected to increase.

Compliance with environmental regulations and litigation based on environmental regulations could require significant expenditures.

Environmental regulations mandate, among other things, the maintenance of air and water quality standards, land development and land reclamation, and set forth limitations on the generation, transportation, storage and disposal of solid and hazardous waste. Environmental legislation is evolving in a manner that may require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects, and a heightened degree of responsibility (financial and otherwise) for mining companies and their officers, directors and employees. The Company may incur environmental costs that could have a material adverse effect on financial condition and results of operations. Any failure to remedy an environmental problem could require it to suspend operations or enter into interim compliance measures pending completion of the required remedy. The environmental standards that ultimately may be imposed at a mine site affect the cost of remediation and could exceed the financial accruals that the Company has made for such remediation. The potential exposure may be significant and could have a material adverse effect on the Company's financial condition and results of operations.

Moreover, governmental authorities and private parties may bring lawsuits based upon damage to property and injury to persons resulting from the environmental, health and safety impacts of prior and current operations, including operations conducted by other mining companies many years ago at sites located on properties that the Company currently or formerly owned. These lawsuits could lead to the imposition of substantial fines, remediation costs, penalties and other civil and criminal sanctions. Substantial costs and liabilities, including for restoring the environment after the closure of mines, are inherent in the Company's operations. The Company cannot assure that any such law, regulation, enforcement or private claim would not have a material adverse effect on its financial condition, results of operations or cash flows.

Some of the mining wastes from the Company's U.S. mines currently are exempt to a limited extent from the extensive set of EPA regulations governing hazardous waste under the RCRA. If the EPA were to repeal this exemption, and designate these mining wastes as hazardous under RCRA, the Company would be required to expend additional amounts on the handling of such wastes and to make significant expenditures to construct hazardous waste storage or disposal facilities. In addition, if any of these wastes causes contamination in or damage to the environment at a U.S. mining facility, that facility could be designated as a "Superfund" site under CERCLA. Under CERCLA, any present owner or operator of a Superfund site or the owner or operator at the time of contamination may be held jointly and severally liable regardless of fault, and may be forced to undertake extensive remedial cleanup action or to pay for the cleanup efforts. The owner or operator also may be liable to federal, state and tribal governmental entities for the cost of damages to natural resources, which could be substantial. Additional regulations or requirements also are imposed on the Company's tailings and waste disposal areas in Alaska under the federal Clean Water Act ("CWA"), in Nevada under the Nevada Water Pollution Control Law which implements the CWA, and in South Dakota under the South Dakota Water Pollution Control Act and the Administrative Rules of the State of South Dakota.

Airborne emissions are subject to controls under air pollution statutes implementing the Clean Air Act in Nevada, Alaska and South Dakota. In addition, there are numerous legislative and regulatory proposals related to climate change, including legislation pending in the U.S. Congress to require reductions in greenhouse gas emissions. Adoption of these proposals could have a material adverse effect on results of operations and cash flows.

The Company is required to obtain and renew governmental permits in order to conduct operations, a process which is often costly and time-consuming. The Company's ability to obtain necessary government permits to expand operations or begin new operations can be materially affected by third party activists.

In the normal course of its business, the Company is required to obtain and renew governmental permits for exploration, operations and expansion of existing operations and for the development of new projects. Obtaining and renewing governmental permits is a complex and time-consuming process. The timeliness and success of permitting

efforts are contingent upon many variables not within the Company's control, including the interpretation of permit approval requirements administered by the applicable permitting authority. The Company may not be able to obtain or renew permits that are necessary to its operations or the cost and time required to obtain or renew permits may exceed the Company's expectations. Any unexpected delays or costs associated with the permitting process could delay the development or impede the operation of a mine, which in turn could materially adversely affect the Company's revenues and future growth. In addition, key permits and approvals may be revoked or suspended or may be changed in a manner that adversely affects the Company's operations.

Private parties such as environmental activists frequently attempt to intervene in the permitting process and to persuade regulators to deny necessary permits or seek to overturn permits that have been issued. Obtaining the necessary governmental permits is a complex and time-consuming process involving numerous jurisdictions and often involving public hearings and costly undertakings. These third party actions can materially increase the costs and cause delays in the permitting process and could cause the Company to not proceed with the development or expansion of a mine. In addition, the Company's ability to successfully

obtain key permits and approvals to explore for, develop, operate and expand mines and to conduct its operations will likely depend on the Company's ability to develop, operate, expand and close mines in a manner that is consistent with the creation of social and economic benefits in the surrounding communities, which may or may not be required by law. The Company's ability to obtain permits and approvals and to successfully operate in particular communities may be adversely impacted by real or perceived detrimental events associated with its activities or those of other mining companies affecting the environment, human health and safety of communities in which it operates.

Item 4. Mine Safety Disclosures

Information pertaining to mine safety matters is reported in accordance with Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act in Exhibit 95.1 attached to this Form 10-Q.
