"NM" - not meaningful information

We formed the Electrified Power Segment effective January 1, 2018. Our Electrified Power segment provides fully electric and hybrid powertrain solutions along with innovative components and subsystems to serve all our markets as they adopt electrification, meeting the needs of our original equipment manufacturer partners and end customers.

(1) Includes intersegment sales, intersegment profit in inventory eliminations and unallocated corporate expenses.

(2) There were no significant unallocated corporate expenses for the three months ended April 1, 2018 and April 2, 2017.

(3)

Depreciation and amortization as shown on a segment basis excludes the amortization of debt discount and deferred costs included in the Condensed Consolidated Statements of Income as "Interest expense." The amortization of debt discount and deferred costs was \$1 million and less than \$1 million for the three month periods ended April 1, 2018 and April 2, 2017, respectively.

INCOME TAXES

Our effective tax rate for the year is expected to approximate 23.0 percent, excluding any discrete tax items that may arise.

Our effective tax rate for the three months ended April 1, 2018, was 37.9 percent and contained \$78 million, or \$0.47 per share, of unfavorable discrete tax items, primarily related to a 2017 Tax Cuts and Jobs Act (Tax Legislation) adjustment of \$74 million. This includes \$39 million associated with changes related to the Tax Legislation

measurement period adjustment and \$35 million associated with the one-time recognition of deferred tax charges at historical tax rates on intercompany profit in inventory.

Our effective tax rate for the three months ended April 2, 2017, was 26.1 percent and contained only immaterial discrete tax items.

The increase in the effective tax rate for the three months ended April 1, 2018, versus the comparable period in 2017, was primarily due to the unfavorable discrete changes associated with the Tax Legislation passed in December 2017.

ENGINE SYSTEM CAMPAIGN ACCRUAL

During 2017, the California Air Resources Board (CARB) and U.S. Environmental Protection Agency (EPA) selected certain of our pre-2013 model year engine systems for additional emissions testing. Some of these engine systems failed CARB and EPA tests as a result of degradation of an aftertreatment component. We have not been issued an official notice from the CARB or EPA regarding these particular engine systems. We continue to work with the agencies to develop a resolution of these matters. We are developing and testing a variety of solutions to address the technical issues, which could include a combination of calibration changes, additional service practices and hardware changes. We recorded a charge of \$29 million to cost of sales in our Condensed Consolidated Statements of Income in the third quarter of 2017 for the then expected cost of field campaigns to repair some of these engine systems. We have concluded based upon additional emission testing performed, and further discussions with the agencies in the first quarter of 2018, that the field campaigns should be expanded to include a larger population of our engine systems that are subject to the aftertreatment component degradation, including our model years 2010 through 2015. As a result, we recorded an additional charge of \$187 million, or \$0.87 per share, to cost of sales in our Condensed Consolidated Statements of Income in the first quarter of 2018, to reflect our current estimated cost of these expanded campaigns.

For the engine populations under evaluation, we are in the process of finalizing the form and extent of solutions to address the technical matters. The accrual recorded in the first quarter of 2018 represents our current best estimate of the expected cost of our recommended courses of action to address these matters and is based upon certain assumptions about the effectiveness of our proposed solutions and the agencies' acceptance of those solutions. Since there are many variables with respect to these degradation issues, it is difficult to assess whether our future costs will be consistent with our current accrual for this matter. If, through the course of our ongoing internal work to develop and test our proposed solutions, it becomes apparent that more extensive repairs are required for certain populations of engine systems, or if the agencies do not accept our proposed solutions, then further charges may be recorded in the period in which our current assumptions change. It is reasonably possible that such changes in assumption could occur, with a range of zero, if our current proposed solutions are effective and approved, up to an incremental exposure of approximately \$400 million above our recorded accrual at the end of the first quarter.

We do not currently expect any fines or penalties from the EPA or CARB related to this matter.

 FINANCIAL MEASURES THAT SUPPLEMENT GAAP

Reconciliation of Non GAAP measures - Earnings before interest, income taxes, noncontrolling interests, depreciation and amortization (EBITDA)

Effective January 1, 2018, we use EBITDA as a primary basis for the Chief Operating Decision Maker to evaluate the performance of each of our operating segments and our consolidated results. It is also a component in measuring our variable compensation programs. EBITDA assists investors and debt holders in comparing our performance on a consistent basis without regard for depreciation and amortization, which can vary significantly depending upon many factors. Our 2017 and 2016 EBITDA measures, as restated, were as follows:
