(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

OR  
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number: 001-14206

El Paso Electric Company  
(Exact name of registrant as specified in its charter)  
Texas  
(State or other jurisdiction of incorporation or organization)

74-0607870  
(I.R.S. Employer Identification No.)

Stanton Tower, 100 North Stanton, El Paso, Texas  
(Address of principal executive offices)  
(915) 543-5711

79901  
(Zip Code)

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES  NO

Indicate by check mark whether the registrant has submitted electronically, every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). YES  NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES  NO

As of July 31, 2018, there were 40,691,320 shares of the Company's no par value common stock outstanding.

EL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

A. Principles of Preparation

These condensed financial statements should be read in conjunction with the financial statements and notes thereto in the Annual Report of El Paso Electric Company on Form 10-K for the fiscal year ended December 31, 2017 ("2017 Form 10-K"). Capitalized terms used in this report and not defined herein have the meaning ascribed to such terms in the 2017 Form 10-K. In the opinion of the Company's management, the accompanying financial statements contain all adjustments necessary to present fairly the financial position of the Company at June 30, 2018 and December 31, 2017; the results of its operations and comprehensive operations for the three, six and twelve months ended June 30, 2018 and 2017; and its cash flows for the six months ended June 30, 2018 and 2017. The results of operations and comprehensive operations for the three, six and twelve months ended June 30, 2018 and 2017, and the cash flows for the six months ended June 30, 2018 and 2017, are not necessarily indicative of the results to be expected for the full calendar year.

Pursuant to the rules and regulations of the U.S. Securities Exchange Commission ("SEC"), certain financial information has been condensed and certain footnote disclosures have been omitted. Such information and disclosures are normally included in financial statements prepared in accordance with U.S. Generally Accepted Accounting Principles ("GAAP").

Reclassification. Certain amounts in the financial statements for 2017 have been reclassified to conform with the 2018 presentation. The Company implemented Accounting Standards Update ("ASU") 2017-07, Compensation - Retirement Benefits, and ASU 2016-15, Statement of Cash Flows, in the first quarter of 2018, retrospective to all periods presented in the Company's financial statements. See "New Accounting Standards Adopted" below for further details.

Use of Estimates. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company evaluates its estimates on an on-going basis, including those related to depreciation, unbilled revenue, income taxes, fuel costs, pension and other post-retirement obligations and asset retirement obligations ("AROs"). Actual results could differ from those estimates.

Revenues. The Company recognizes revenue associated with contracts with customers when performance obligations under the terms of the contract with the customer are satisfied. Revenue is measured as the amount of consideration the Company receives in exchange for transferring goods or providing services to the customer. Taxes collected concurrently with revenue producing activities are excluded from revenue. Unbilled revenues are recorded for estimated amounts of energy delivered in the period following the customer's last billing cycle to the end of the reporting period. Unbilled revenues are estimated based on monthly generation volumes and by applying an average revenue/kilowatt-hour ("kWh") to the number of estimated kWhs delivered but not billed. Accounts receivable included accrued unbilled revenues of \$38.3 million at June 30, 2018 and \$22.2 million at December 31, 2017. The Company presents revenues net of sales taxes in its statements of operations.

Depreciation. The Company routinely evaluates the depreciable service lives, cost of removal and salvage values of its property, plant and equipment. Depreciation is provided on a straight-line basis over the estimated remaining lives of the assets (ranging in average from 5 to 48 years). When property subject to composite depreciation is retired or otherwise disposed of in the normal course of business, its cost together with the cost of removal, less salvage is charged to accumulated depreciation. For other property dispositions, the applicable cost and accumulated depreciation is removed from the balance sheet accounts and a gain or loss is recognized.

New Accounting Standards Adopted

In March 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-09, Compensation - Stock Compensation (Topic 718) Improvements to Employee Share-Based Payment Accounting, to simplify the accounting for share-based payment transactions, including the income tax consequences, classification of awards either as equity

or liabilities, and classification on the statements of cash flows. The Company adopted the new standard effective January 1, 2017. The adoption of the new standard did not have a material impact on the Company's financial condition, results of operations or cash flows. The

7

Table of Contents

EL PASO ELECTRIC COMPANY

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

cumulative effect of the adoption of the new standard was to increase net operating loss carryforward deferred tax assets and retained earnings by \$0.2 million on January 1, 2017.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), to provide a framework that replaces the existing revenue recognition guidance, and has since modified the standard with several ASUs. The standard provides that an entity should recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. On January 1, 2018, the Company adopted the new accounting standard using the modified retrospective method. There was no cumulative effect adjustment at the initial application of the new standard. In addition, comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. The Company expects the ongoing impact of the new standard to be immaterial to net income. As required by the standard, revenues of \$3.8 million related to reimbursed costs of energy efficiency programs approved by the Company's regulators are reported in year-to-date operating revenues from customers prospectively, as opposed to being offset with associated costs within operations and maintenance. Related expenses of an equal amount are reported in operations and maintenance expenses. See Note B, Revenues, for additional information.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Liabilities, to enhance the reporting model for financial instruments by addressing certain aspects of recognition, measurement, presentation and disclosure. The Company adopted the new standard effective January 1, 2018. The adoption of ASU 2016-01 eliminates the requirements to classify investments in equity securities with readily determinable fair values into trading or available for sale and requires entities to measure equity investments at fair value and recognize any changes in fair value in the Statements of Operations. ASU 2016-01 requires a modified-retrospective approach and therefore comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. Upon adoption of the new standard, the Company recorded a cumulative effect adjustment, net of income taxes, to increase retained earnings by \$41.0 million with an offset to accumulated other comprehensive income ("AOCI"). In addition, the Company recorded net losses of \$2.8 million related to equity securities still held at June 30, 2018. In March 2018, the FASB issued ASU 2018-04, Investments - Debt Securities (Topic 320) and Regulated Operations (Topic 980), which provides clarification to ASU 2016-01.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230) Classification of Certain Cash Receipts and Cash Payments, to reduce diversity in practice in how certain cash receipts and cash payments are classified in the statement of cash flows. The Company adopted the new standard effective January 1, 2018. ASU 2016-15 was applied using a retrospective transition method to each period presented. Accordingly, the Company presented in the Statement of Cash Flows insurance proceeds received for equipment of \$5.4 million and \$1.7 million, respectively, for the six months ended June 30, 2018 and 2017 as cash inflows from investing activities.

In March 2017, the FASB issued ASU 2017-07, Compensation-Retirement Benefits (Topic 715) Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. ASU 2017-07 amends Accounting Standards Codification ("ASC") 715, Compensation - Retirement Benefits, to require companies to present the service cost component of net benefit cost in the income statement line items where compensation cost is reported. Companies will present all other components of net benefit cost separately from the line item(s) that includes the service cost and outside of any subtotal of operating income. In addition, only the service cost component will be eligible for capitalization in assets. The Company adopted the new standard effective January 1, 2018. The amendments in ASU 2017-07 were applied retrospectively for the income statement presentation of the service cost component and the other components of net benefit costs. The Company elected to apply the practical expedient and used the amounts disclosed in its pension and other postretirement benefit plan note for the 2017 comparative period as the estimation basis for applying the retrospective presentation requirements. See Note J, Employee Benefits, for additional information.

In March 2018, the FASB issued ASU 2018-05, Income Taxes (Topic 740) Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118 ("SAB 118"), to add various SEC paragraphs for clarification due to the Federal Tax Cuts and Jobs Act of 2017 ("TCJA"). The Company adopted ASU 2018-05 upon issuance and implemented SAB 118 in December of 2017 in conjunction with the enactment of the TCJA.

New Accounting Standards to be Adopted in the Future

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and requiring qualitative and quantitative disclosures on leasing agreements. ASU 2016-02 maintains a distinction between finance leases and operating leases similar to the distinction under previous lease guidance for capital leases and operating leases. The impact of leases reported in the Company's operating results and statement of cash flows is expected to be similar to previous GAAP. ASU 2016-02 requires the recognition

Table of Contents

EL PASO ELECTRIC COMPANY

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

in the statement of financial position, by the lessee, of a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. How leases are recorded in regard to financial position represents a significant change from previous GAAP guidance. The lessee is permitted to make an accounting policy election to not recognize lease assets and lease liabilities for short-term leases. Implementation of the standard will be required for reporting periods beginning after December 15, 2018. Adoption of the new lease accounting standard will require the Company to apply the new standard to the earliest period using a modified retrospective approach. The Company is currently in the process of evaluating the impact of the new standard, which includes continuing to monitor activities of the FASB, including the impact of ASU 2018-01, Land Easement Practical expedient for Transition to Topic 842 and ASU 2018-11, Targeted Improvements. ASU 2018-11 allows entities to adopt the standard with a cumulative effect adjustment as of the beginning of the adoption year, while maintaining prior year comparative financial information and disclosures as reported. ASU 2018-01 provides an optional practical expedient to not evaluate existing or expired land easements under Topic 842, if those land easements were not previously accounted for as leases under ASC Topic 840. The Company currently anticipates that it will apply the practical expedient under ASU 2018-01 to its existing or expired land easements as part of its transition to Topic 842. The Company's evaluation process also includes evaluating the impact, if any, on changes to business processes, systems and controls to support recognition and disclosure under the new guidance; however, at this time the Company is unable to determine the impact this standard will have on the financial statements and related disclosures.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326). ASU 2016-13 changes how companies measure and recognize credit impairment for many financial assets. The new current expected credit loss model will require companies to immediately recognize an estimate of credit losses expected to occur over the remaining life of the financial assets that are in the scope of the standard. The ASU also makes targeted amendments to the current impairment model for available-for-sale debt securities. ASU 2016-13 will be required for reporting periods beginning after December 15, 2019. ASU 2016-13 will be applied in a modified retrospective approach through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is implemented. The Company is currently assessing the future impact of ASU 2016-13.

In February 2018, the FASB issued ASU 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220), as a result of concerns raised due to the TCJA. More specifically, because the remeasurement of deferred taxes due to the change in the federal corporate income tax rate is required to be included in income from continuing operations, the tax effects of items within AOCI (referred to as stranded tax effects) do not reflect the appropriate tax rate. ASU 2018-02 generally allows companies to reclassify stranded taxes from AOCI to retained earnings. The amount of the adjustment would be the difference between the historical federal corporate income tax rate of 35% and the newly enacted 21% federal corporate income tax rate. The provisions of ASU 2018-02 are effective for fiscal years and interim periods within that reporting period beginning after December 15, 2018. Early adoption is permitted, including adoption in any interim periods for reporting periods for which financial statements have not been issued. The Company is currently evaluating the impact of ASU 2018-02 and its impact on regulated utilities. At June 30, 2018, stranded taxes in AOCI are approximately \$7.2 million.

## B. Revenues

On January 1, 2018, the Company adopted ASU 2014-09, Revenue from Contracts with Customers (Topic 606), for all of its contracts using the modified retrospective method. There was no cumulative effect adjustment at the initial application of the new standard. In addition, comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. The Company expects the ongoing impact of the new standard to be immaterial to net income and no significant changes in the Company's business processes and internal controls were necessary upon adoption of the new standard.

The following table disaggregates revenue from contracts with customers, for the three, six and twelve months ended June 30, 2018 (in thousands):

	June 30, 2018		
	Three Months Ended	Six Months Ended	Twelve Months Ended
Retail	\$220,980	\$367,607	\$812,522
Wholesale	10,957	35,101	71,610
Wheeling (transmission)	4,147	8,433	17,732
Total revenues from contracts with customers	236,084	411,141	901,864
Other	712	1,368	4,264
Total operating revenues	\$236,796	\$412,509	\$906,128

The Company recognizes revenue when performance obligations under the terms of the contract with the customer are satisfied. Revenue is measured as the amount of consideration the Company receives in exchange for transferring goods or providing services to the customer. Taxes collected concurrently with revenue producing activities are excluded from revenue. The Company has elected the optional invoice practical expedient for Wholesale and Wheeling revenues, as the invoice amount will correspond directly to the value provided by the Company's performance to date.

**Retail.** Retail contracts represent the Company's primary revenue source. The Company has determined that retail electric service to residential, commercial and industrial, and public authority customers represents an implied daily contract with the customer. The contract is comprised of an obligation to supply and distribute electricity and related capacity. Revenue is recognized, over time, equal to the product of the applicable tariff rates, as approved by the Public Utility Commission of Texas (the "PUCT") and the New Mexico Public Regulation Commission, (the "NMPRC"), and the volume of the electricity delivered to the customer, or through the passage of time based upon providing the service of standing ready. Unbilled revenues are recognized at month end based on estimated monthly generation volumes and by applying an average revenue per kWh to the number of estimated kWhs delivered but not billed to customers, and recorded as a receivable for the period following the last billing cycle to the end of the reporting period. Retail customers receive a bill monthly, with payment due sixteen days after issuance.

**Wholesale.** Wholesale contracts primarily include forward power sales into markets outside the Company's service territory when the Company has competitive generation capacity available, after meeting its regulated service obligations. Pricing is either fixed or based on an index rate with consideration potentially including variable components. Uncertainties regarding the variable consideration will be resolved when the transaction price is known at the point of delivering the energy. The obligation to deliver the electricity is satisfied over time as the customer receives and consumes the electricity. Wholesale customers are invoiced on the 10<sup>th</sup> day of each month, with payment due by the 20<sup>th</sup> day of the month. In the case of the sale of renewable energy certificates, the transaction price is allocated to the performance obligation to deliver the confirmed quantity of the certificates based on the stand alone selling price of each certificate. Revenue is recognized as control of the certificates is transferred to the customer. The customer is invoiced upon the completed transfer of the certificates, with payment due within ten business days.

Wholesale also includes an annual agreement between the Company and one of its wholesale customers, Rio Grande Electric Cooperative ("RGEC"), which involves the provision of full requirements electric service from the Company to RGEC. The rates for this service are recalculated annually and require Federal Energy Regulatory Commission ("FERC") approval.

Wheeling (transmission). Wheeling involves the Company providing point-to-point transmission service, which includes the receipt of capacity and energy at designated point(s) and the transfer of such capacity and energy to designated point(s) of delivery on either a firm or non-firm basis for periods of one year or less. The performance obligation to provide capacity and transmit

Table of Contents

EL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

energy is satisfied over time as the Company performs. Transmission customers are invoiced on a monthly basis, with payment due within twenty days of receipt of the invoice.

Other. Other includes alternative revenue program revenue relating to the Company's potential bonus awards from the PUCT and the NMPRC mandated energy efficiency programs. Both the PUCT and the NMPRC allow for the potential to earn an incentive bonus if the Company achieves its approved energy efficiency goals under the applicable programs. The Company recognizes revenue related to the energy efficiency program incentives at the point in time that the amount is objectively determinable generally based upon an approved order from the regulator, is probable of recovery, and if it is expected to be collected within 24 months. Other revenue also includes (i) late payment fees, (ii) leasing income, and (iii) the Company's allocated share, based on ownership, of sales of surplus effluent water from Palo Verde Generating Station ("Palo Verde").

Accounts receivable. Accounts receivable is principally comprised of revenue from contracts with customers. The Company recognizes expense for accounts that are deemed uncollectible in operating expense. The Company recognized \$0.5 million, \$1.0 million and \$3.2 million of uncollectible expense for the three, six and twelve months ended June 30, 2018, respectively.

## C. Accumulated Other Comprehensive Income (Loss)

Upon adoption of ASU 2016-01, Financial Instruments-Overall, the Company recorded, on January 1, 2018, a cumulative effect adjustment, net of income taxes, to increase retained earnings by \$41.0 million with an offset to AOCI. Changes in Accumulated Other Comprehensive Income (Loss) (net of tax) by component are presented below (in thousands):

D. Regulation

General

The rates and services of the Company are regulated by incorporated municipalities in Texas, the PUCT, the NMPRC, and the FERC. Municipal orders, ordinances and other agreements regarding rates and services adopted by Texas municipalities are subject to review and approval by the PUCT. The FERC has jurisdiction over the Company's wholesale (sales for resale) transactions, transmission service and compliance with federally-mandated reliability standards. The decisions of the PUCT, the NMPRC and the FERC are subject to judicial review.

Texas Regulatory Matters

**2015 Texas Retail Rate Case Filing.** On August 10, 2015, the Company filed with the City of El Paso, other municipalities incorporated in its Texas service territory, and the PUCT in Docket No. 44941, a request for an annual increase in non-fuel base revenues ("2015 Texas Retail Rate Case"). On July 21, 2016, the parties to PUCT Docket No. 44941 filed the Joint Motion to Implement Uncontested Amended and Restated Stipulation and Agreement which was unopposed by the parties. On August 25, 2016, the PUCT issued the PUCT Final Order in Docket No. 44941 ("2016 PUCT Final Order"). Interim rates associated with the annual non-fuel base rate increase became effective on April 1, 2016. The additional surcharges associated with the incremental Four Corners Generating Station ("Four Corners") costs, rate case expenses and the relate back of rates to consumption on and after January 12, 2016 through March 31, 2016, were implemented on October 1, 2016.

For financial reporting purposes, the Company deferred any recognition of the Company's request in its 2015 Texas Retail Rate Case until it received the 2016 PUCT Final Order on August 25, 2016. Accordingly, it reported in the third quarter of 2016 the cumulative effect of the 2016 PUCT Final Order, which related back to January 12, 2016.

**2017 Texas Retail Rate Case Filing.** On February 13, 2017, the Company filed with the City of El Paso, other municipalities incorporated in the Company's Texas service territory and the PUCT in Docket No. 46831, a request for an increase in non-fuel base revenues ("2017 Texas Retail Rate Case"). On November 2, 2017, the Company filed the Joint Motion to Implement Uncontested Stipulation and Agreement with the Administrative Law Judges for the 2017 Texas Retail Rate Case.

On December 18, 2017, the PUCT issued the PUCT Final Order in Docket No. 46831 ("2017 PUCT Final Order"), which provides, among other things, for the following: (i) an annual non-fuel base rate increase of \$14.5 million; (ii) a return on equity of 9.65%; (iii) all new plant in service as filed in the Company's rate filing package was prudent and used and useful and therefore is included in rate base; (iv) recovery of the costs of decommissioning Four Corners in the amount of \$5.5 million over a seven year period beginning August 1, 2017; (v) the Company to recover reasonable rate case expenses of approximately \$3.4 million through a separate surcharge over a three year period; and (vi) a requirement that the Company file a refund tariff if the federal statutory income tax rate, as it relates to the Company, is decreased before the Company files its next rate case. The 2017 PUCT Final Order also established baseline revenue requirements for recovery of future transmission and distribution investment costs and includes a minimum monthly bill of \$30.00 for new residential customers with distributed generation, such as private rooftop solar. Additionally, the 2017 PUCT Final Order allows for the annual recovery of \$2.1 million of nuclear decommissioning funding and establishes annual depreciation expense that is approximately \$1.9 million lower than the annual amount requested by the Company in its initial filing. Finally, the 2017 PUCT Final Order allows for the Company to recover revenues associated with the relate back of rates to consumption on and after July 18, 2017 through a separate surcharge.

New base rates, including additional surcharges associated with rate case expenses and the relate back of rates to consumption on and after July 18, 2017 through December 31, 2017, were implemented in January 2018.

For financial reporting purposes, the Company deferred any recognition of the Company's request in its 2017 Texas Retail Rate Case until it received the 2017 PUCT Final Order on December 18, 2017. Accordingly, it reported in the fourth quarter of 2017 the cumulative effect of the 2017 PUCT Final Order, which related back to July 18, 2017.

The 2017 PUCT Final Order required the Company to file a refund tariff if the federal statutory income tax rate, as it relates to the Company, were decreased before the Company files its next rate case. Following the enactment of the TCJA on December 22, 2017, and in compliance with the 2017 PUCT Final Order, on March 1, 2018, the Company filed with the PUCT and each of its municipalities a proposed refund tariff designed to reduce base charges for Texas customers equivalent to the expected annual decrease of \$22.7 million in federal income tax expense resulting from the tax law changes. This filing was assigned PUCT Docket No. 48124. On March 27, 2018, the PUCT approved the Company's proposed refund tariff on an interim basis, subject to refund

Table of Contents

EL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

or surcharge, for customer billing effective April 1, 2018. Each of the Company's municipalities also implemented the Company's proposed tax credits on an interim basis effective April 1, 2018. The refund will be reflected in rates over a period of a year and will be updated annually until new base rates are implemented pursuant to the Company's next rate case filing. No party requested a hearing in the case before the PUCT by the deadline of April 16, 2018, and on April 18, 2018, the PUCT Staff filed its final recommendation supporting approval of the Company's application. The Company filed an agreed proposed order for final approval on behalf of all parties except the City of El Paso on April 30, 2018, and on May 31, 2018, the City of El Paso filed a notice with the PUCT stating that the City Council had authorized agreement with the proposed order. The refund tariff case is pending with the refund tariff subject to a final order from the PUCT.

Energy Efficiency Cost Recovery Factor. On May 1, 2017, the Company filed its annual application, which was assigned PUCT Docket No. 47125, to establish its energy efficiency cost recovery factor for 2018. In addition to projected energy efficiency costs for 2018 and a reconciliation of collections to prior year actual costs, the Company requested approval of an incentive bonus for the 2016 energy efficiency program results in accordance with PUCT rules. Interim rates were approved effective January 1, 2018. The Company, the PUCT Staff, and the City of El Paso reached an agreement that includes an incentive bonus of \$0.8 million. The agreement was filed on January 25, 2018, and was approved by the PUCT on February 15, 2018.

On May 1, 2018, the Company filed its annual application, which was assigned PUCT Docket No. 48332, to establish its energy efficiency cost recovery factor for 2019. In addition to projected energy efficiency costs for 2019 and a reconciliation to prior year actual costs, the Company requested approval of a \$1.0 million incentive bonus for the 2017 energy efficiency program results in accordance with PUCT rules. A hearing on the merits of this case is scheduled to begin on September 5, 2018. The Company cannot predict the outcome of this matter at this time.

Fuel and Purchased Power Costs. The Company's actual fuel costs, including purchased power energy costs, are recovered from customers through a fixed fuel factor. The PUCT has adopted the fuel cost recovery rule (the "Texas Fuel Rule") that allows the Company to seek periodic adjustments to its fixed fuel factor. The Company can seek to revise its fixed fuel factor based upon the approved formula at least four months after its last revision except in the month of December. The Texas Fuel Rule requires the Company to request to refund fuel costs in any month when the over-recovery balance exceeds a threshold material amount and it expects fuel costs to continue to be materially over-recovered. The Texas Fuel Rule also permits the Company to seek to surcharge fuel under-recoveries in any month the balance exceeds a threshold material amount and it expects fuel cost recovery to continue to be materially under-recovered. Fuel over and under-recoveries are considered material when they exceed 4% of the previous twelve months' fuel costs. All such fuel revenue and expense activities are subject to periodic final review by the PUCT in periodic fuel reconciliation proceedings.

On November 30, 2016, the Company filed a request, which was assigned PUCT Docket No. 46610, to increase its fixed fuel factor by approximately 28.8% to reflect increased fuel expenses primarily related to an increase in the price of natural gas used to generate power. The increase in the fixed fuel factor was effective on an interim basis January 1, 2017 and approved by the PUCT on January 10, 2017.

On October 13, 2017, the Company filed a request, which was assigned PUCT Docket No. 47692, to decrease the Texas fixed fuel factor by approximately 19% to reflect decreased fuel expenses primarily related to a decrease in the price of natural gas used to generate power. The decrease in the Texas fixed fuel factor became effective beginning with the November 2017 billing month.

On April 13, 2018, the Company filed a request with the PUCT, which was assigned Docket No. 48264, to decrease the Texas fixed fuel factor by approximately 29% to reflect decreased fuel expenses primarily related to a decrease in the price of natural gas used to generate power. On April 25, 2018, the Company's proposed fuel factors were approved on an interim basis effective for the first billing cycle of the May 2018 billing month. The revised factor was approved by the PUCT and the docket closed on May 22, 2018. The Texas fixed fuel factor will continue thereafter until changed by the PUCT. As of June 30, 2018, the Company had a net fuel over-recovery balance of approximately

\$8.2 million in Texas.

Fuel Reconciliation Proceeding. On September 27, 2016, the Company filed an application with the PUCT, designated as PUCT Docket No. 46308, to reconcile \$436.6 million of Texas fuel and purchased power expenses incurred during the period of April 1, 2013 through March 31, 2016. On June 29, 2017, the PUCT approved a settlement in this proceeding. The settlement provides for the reconciliation of fuel and purchased power costs incurred from April 1, 2013 through March 31, 2016. Additionally, the settlement modifies and tightens the Palo Verde performance rewards measurement bands beginning with the 2018 performance period. The financial results for each of the three, six and twelve-month periods ended June 30, 2017 include a \$5.0 million, pre-tax increase to income reflecting the settlement of the Texas fuel reconciliation proceeding. This amount represents Palo Verde performance rewards associated with the 2013 to 2015 performance periods net of disallowed fuel and purchased power costs as

Table of Contents

EL PASO ELECTRIC COMPANY

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

approved in the settlement. The April 1, 2016 through June 30, 2018 Texas jurisdictional fuel and purchased power costs subject to prudence review total approximately \$304.3 million.

Community Solar. On June 8, 2015, the Company filed a petition with the PUCT to initiate a community solar program that includes the construction and ownership of a 3 Megawatts ("MW") solar photovoltaic system located at Montana Power Station ("MPS"). Participation is on a voluntary basis, and customers contract for a set capacity (Kilowatt ("kW")) amount and receive all energy produced. This case was assigned PUCT Docket No. 44800. The Company filed a settlement agreement among all parties on July 1, 2016, approving the program, and the PUCT approved the settlement agreement and program on September 1, 2016. On April 19, 2017, the Company announced that the entire 3 MW program was fully subscribed by approximately 1,500 Texas customers. The community solar facility began commercial operation on May 31, 2017.

On March 20, 2018, the Company filed a petition with the PUCT and each of its regulatory authorities to expand its community solar program to include 2 MW of solar powered generation from the 10 MW solar photovoltaic facility located at Newman Power Station ("Newman") and to reduce rates under the community solar tariff. The case before the PUCT was assigned Docket No. 48181 and is currently pending. The Company cannot predict the outcome of the case at this time.

Other Required Approvals. The Company has obtained other required approvals for tariffs and other approvals required by the Texas Public Utility Regulatory Act and the PUCT.

New Mexico Regulatory Matters

2015 New Mexico Rate Case Filing. On May 11, 2015, the Company filed a request with the NMPRC, in Case No. 15-00127-UT, for an annual increase in non-fuel base rates. On June 8, 2016, the NMPRC issued the NMPRC Final Order in Case No. 15-00127-UT (the "NMPRC Final Order"), which approved an annual increase in non-fuel base rates of approximately \$0.6 million, an increase of approximately \$0.5 million in other service fees and a decrease in the Company's allowed return on equity to 9.48%. The NMPRC Final Order concluded that all of the Company's new plant in service was reasonable and necessary and therefore would be recoverable in rates. The Company's rates were approved by the NMPRC effective July 1, 2016, and implemented at such time.

Future New Mexico Rate Case Filing. On April 12, 2017, the NMPRC issued an order in Case No. 15-00109-UT requiring the Company to make a rate filing in New Mexico no later than July 31, 2019, using an appropriate historical test year period.

New Mexico Order Commencing Review of the Effects of the TCJA on Regulated New Mexico Utilities. On January 24, 2018, the NMPRC initiated a proceeding in Case No. 18-00016-UT into the impact of the TCJA on New Mexico regulated utilities. On February 23, 2018, the Company responded to a NMPRC Staff inquiry regarding the proceeding. On April 4, 2018, the NMPRC issued an order requiring the Company to file a proposed interim rate rider to adjust the Company's New Mexico base revenues in amounts equivalent to the Company's reduced income tax expense for New Mexico customers resulting from the TCJA, to be implemented on or before May 1, 2018. The NMPRC order further requires that the Company record and track a regulatory liability for the excess accumulated deferred income taxes created by the change in the federal corporate income tax rate, consistent with the effective date of the TCJA, and subject to amortization determined by the NMPRC in the Company's next general rate case. The Company recorded such a regulatory liability during the quarter ended December 31, 2017. On April 16, 2018, after consultation with the New Mexico Attorney General pursuant to the NMPRC order, the Company filed an interim rate rider with a proposed effective date of May 1, 2018. The annualized credits expected to be refunded to New Mexico customers approximate \$4.9 million. On April 25, 2018, the NMPRC approved the Company's interim rate rider, which was implemented in customer bills beginning May 1, 2018.

Fuel and Purchased Power Costs. Historically, fuel and purchased power costs were recovered through base rates and a Fuel and Purchased Power Cost Adjustment Clause (the "FPPCAC") that accounts for changes in the costs of fuel relative to the amount included in base rates. Effective July 1, 2016, with the implementation of the NMPRC Final Order, fuel and purchased power costs are no longer recovered through base rates but are recovered through the

FPPCAC. The Company's request to reconcile its fuel and purchased power costs for the period January 1, 2013 through December 31, 2014, also was approved in the NMPRC Final Order. New Mexico jurisdictional costs subject to prudence review are costs from January 1, 2015 through June 30, 2018 that total approximately \$190.4 million. At June 30, 2018, the Company had a net fuel under-recovery balance of approximately \$1.0 million in New Mexico. As required, the Company filed a request to continue use of its FPPCAC with the NMPRC on January 5, 2018, which was assigned Case No. 18-00006-UT. Hearings in the case began on July 30, 2018. The Company cannot predict the outcome of this case at this time.

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

5 MW Holloman Air Force Base ("HAFB") Facility Certificate of Convenience and Necessity ("CCN"). On October 7, 2015, in Case No. 15-00185-UT, the NMPRC issued a final order approving a CCN for a 5 MW solar power generation facility located on HAFB in the Company's service territory in New Mexico. The Company and HAFB negotiated a retail contract, which includes a power sales agreement for the facility, to replace the existing load retention agreement which was approved by NMPRC final order issued October 5, 2016 in Case No. 16-00224-UT. Construction of the solar generation facility is expected to be completed in the third quarter of 2018.

New Mexico Efficient Use of Energy Recovery Factor. On July 1, 2016, the Company filed its annual application requesting approval of its 2017 Energy Efficiency and Load Management Plan and to establish energy efficiency cost recovery factors for 2017. In addition to projected energy efficiency costs for 2017, the Company requested approval of a \$0.4 million incentive for 2017 energy efficiency programs in accordance with NMPRC rules. This application was assigned Case No. 16-00185-UT. On February 22, 2017, the NMPRC issued a final order approving the Company's 2017 Energy Efficiency and Load Management Plan and authorizing recovery in 2017 of a base incentive of \$0.4 million. The Company's energy efficiency cost recovery factors were approved and effective in customer bills beginning on March 1, 2017. NMPRC rules authorize continuation of the energy efficiency programs and incentive approved in Case No. 16-00185-UT through 2018.

On July 1, 2016, the Company filed its 2015 Annual Report for Energy Efficiency Programs, which included an incentive for verified 2015 program performance of \$0.3 million, which was approved in Case No. 13-00176-UT. The Company recorded the \$0.3 million approved incentive in operating revenues in the first quarter of 2017. In addition, on June 30, 2017, the Company filed its 2016 Annual Report for Energy Efficiency Programs, which included an incentive for verified 2016 program performance of \$0.4 million that was approved in Case No. 13-00176-UT. The Company recorded the \$0.4 million approved incentive in operating revenues in the third quarter of 2017.

On July 2, 2018, the Company filed its required application for approval of its 2019-2021 Energy Efficiency and Load Management Plan and cost recovery factor. The application includes a request for a base incentive of 7.1% of program expenditures, or approximately \$0.4 million annually for 2019-2021. The application was assigned Case No. 18-00116-UT and is currently pending. The Company cannot predict the outcome of this case at this time.

Community Solar. On April 24, 2018, the Company filed an application with the NMPRC to initiate a community solar program to include construction and ownership of a 2 MW solar photovoltaic system located in Doña Ana County near the City of Las Cruces. Customer participation will be on a voluntary basis, and customers will contract for a set capacity (kW) amount and receive all energy produced by their subscribed capacity. The application was assigned Case No. 18-00099-UT and is currently pending. The Company cannot predict the outcome of this case at this time.

Issuance of Long-Term Debt, Securities Financing, and Guarantee of Debt. On October 7, 2015, the Company received approval in NMPRC Case No. 15-00280-UT to guarantee the issuance of up to \$65.0 million of long-term debt by the Rio Grande Resources Trust II (the "RGRT") to finance future purchases of nuclear fuel and to refinance existing nuclear fuel debt obligations, which remains effective. Under this authorization, on June 28, 2018, the RGRT completed the sale of \$65.0 million in aggregate principal amount of 4.07% Senior Notes due August 15, 2025 (the "RGRT Notes"). On October 4, 2017, the Company received additional approval in NMPRC Case No. 17-00217-UT to amend and extend the Company's Revolving Credit Facility (the "RCF"), issue up to \$350.0 million in long-term debt and to redeem and refinance the \$63.5 million 2009 Series A 7.25% Pollution Control Bonds and the \$37.1 million 2009 Series B 7.25% Pollution Control Bonds, which have optional redemptions beginning in 2019. The NMPRC approval to issue \$350.0 million in long-term debt supersedes its prior approval. Under this authorization, on June 28, 2018, the Company issued \$125.0 million in aggregate principal amount of 4.22% Senior Notes due August 15, 2028. See Note L, Long-Term Debt and Financing Obligations.

Other Required Approvals. The Company has obtained other required approvals for tariffs and other approvals as required by the New Mexico Public Utility Act and the NMPRC.

Federal Regulatory Matters

Inquiry Regarding the Effect of the TCJA on Commission-Jurisdictional Rates and Order to Show Cause. On March 15, 2018, the FERC issued two show cause orders under Section 206 of the Federal Power Act and Rule 209(a) of the FERC's Rules of Practice and Procedure, directing 48 individual public utilities with stated transmission rates or transmission formula rates with a fixed line item of 35% for the federal income tax component to, within 60 days of the date of the orders, either (1) propose revisions to their transmission rates under their open access transmission tariffs or transmission owner tariffs on file with the FERC, or (2) show cause why they should not be required to do so. The Company was included in the list of public utilities impacted by the FERC orders. On May 14, 2018, the Company submitted its response, as required by the FERC order, which demonstrated

Table of Contents

EL PASO ELECTRIC COMPANY

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

that the reduced annual income tax does not cause the Company's total transmission revenues to become excessive and therefore no rate reduction was justified. Instead, the Company stated in its response that it will make preparations for a future filing in which it will seek approval for revised Open Access Transmission Tariff ("OATT") rates that would include the recovery of an increased total transmission revenue requirement from OATT customers based on current circumstances and appropriate forward-looking adjustments. The Company cannot predict the outcome of this matter at this time.

**Issuance of Long-Term Debt, Securities Financing, and Guarantee of Debt.** On October 31, 2017, the FERC issued an order in Docket No. ES17-54-000 approving the Company's filing to (i) amend and extend the RCF; (ii) issue up to \$350.0 million in long-term debt; (iii) guarantee the issuance of up to \$65.0 million of long-term debt by the RGRT; and (iv) redeem and refinance the \$63.5 million 2009 Series A 7.25% Pollution Control Bonds and the \$37.1 million 2009 Series B 7.25% Pollution Control Bonds, which have optional redemptions beginning in 2019. The order also approved the Company's request to continue to utilize the Company's existing RCF with the ability to amend and extend at a future date. The authorization is effective from November 15, 2017 through November 14, 2019 and supersedes prior FERC approvals. Under this authorization, on June 28, 2018, the Company issued \$125.0 million in aggregate principal amount of 4.22% Senior Notes due August 15, 2028 and the RGRT completed the sale of \$65.0 million in aggregate principal amount of 4.07% Senior Notes due August 15, 2025. See Note L, Long-Term Debt and Financing Obligations.

**Other Required Approvals.** The Company has obtained required approvals for rates, tariffs and other approvals as required by the FERC.

**E. Palo Verde**

**Spent Fuel and Waste Disposal.** Pursuant to the Nuclear Waste Policy Act of 1982, as amended in 1987, the U.S. Department of Energy ("DOE") is legally obligated to accept and dispose of all spent nuclear fuel and other high-level radioactive waste generated by all domestic power reactors by 1998. The DOE's obligations are reflected in a contract for Disposal of Spent Nuclear Fuel and/or High Level Radioactive Waste with each nuclear power plant. The DOE failed to begin accepting spent nuclear fuel by 1998. Pursuant to the terms of the August 18, 2014 settlement agreement, and as amended with the DOE, Arizona Public Service Company ("APS") files annual claims for the period July 1 of the then-previous year to June 30 of the then-current year on behalf of itself and those utilities that share in power and energy entitlements, and bear certain allocated costs, with respect to Palo Verde pursuant to the Arizona Nuclear Power Project Participation Agreement dated August 23, 1973, as amended ("ANPP Participation Agreement").

**Palo Verde Operations and Maintenance Expense.** Included in "Operations and maintenance" in the Company's Statements of Operations are expenses associated with Palo Verde as follows (in thousands):

	2018	2017
Three months ended June 30,	\$24,977	\$25,931
Six months ended June 30,	47,152	47,539
Twelve months ended June 30,	98,977	98,062

## F. Common Stock

Dividends. The Company paid \$14.6 million and \$13.6 million in quarterly cash dividends during the three months ended June 30, 2018 and 2017, respectively. The Company paid a total of \$28.3 million and \$55.4 million in quarterly cash dividends during the six and twelve months ended June 30, 2018, respectively. The Company paid a total of \$26.2 million and \$51.3 million in quarterly cash dividends during the six and twelve months ended June 30, 2017, respectively. On July 19, 2018 the Board of Directors declared a quarterly cash dividend of \$0.36 per share payable on September 28, 2018 to shareholders of record as of the close of business on September 14, 2018.

EL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

G. Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction and in the states of Texas, New Mexico and Arizona. The Company is no longer subject to tax examination by the taxing authorities in the federal, Texas, Arizona, and New Mexico jurisdictions for years prior to 2013.

For the three months ended June 30, 2018 and 2017, the Company's effective tax rate was 24.4% and 35.4%, respectively. For the six months ended June 30, 2018 and 2017, the Company's effective tax rate was 22.7% and 35.3%, respectively. For the twelve months ended June 30, 2018 and 2017, the Company's effective tax rate was 30.8% and 36.0%, respectively. The federal statutory tax rate is 21% in 2018 and 35% in 2017. The Company's effective tax rates for all periods in 2018 and 2017 differ from the federal statutory tax rate primarily due to capital gains in the decommissioning trusts which are taxed at the federal rate of 20%, the tax benefit of stock incentive plans, the allowance for equity funds used during construction ("AEFUDC"), and state taxes.

The results for the three, six and twelve months ended June 30, 2018, contain provisional estimates of the impact of the TCJA. These amounts are considered provisional because they use estimates for which tax returns have not yet been filed and because estimated amounts may be impacted by future regulatory and accounting guidance if and when issued. The Company will adjust these provisional amounts as further information becomes available and as we refine our calculations. As permitted by recent guidance issued by the SEC, these adjustments will occur during a reasonable "measurement period" not to exceed twelve months from the date of enactment.

In February 2018, the FASB issued ASU 2018-02. The Company is currently evaluating the impact of ASU 2018-02 and its impact on regulated utilities. See Note A, Principles of Preparation - New Accounting Standards to be Adopted in the Future, for additional information.

H. Commitments, Contingencies and Uncertainties

For a full discussion of commitments and contingencies, see Note K of the Notes to Financial Statements in the 2017 Form 10-K. In addition, see Notes D and E above and Notes C and E of the Notes to Financial Statements in the 2017 Form 10-K regarding matters related to wholesale power sales contracts and transmission contracts subject to regulation and Palo Verde, including decommissioning, spent nuclear fuel and waste disposal, and liability and insurance matters.

Power Purchase and Sale Contracts

To supplement its own generation and operating reserve requirements and to meet required renewable portfolio standards, the Company engages in power purchase arrangements that may vary in duration and amount based on an evaluation of the Company's resource needs, the economics of the transactions and specific renewable portfolio requirements. For a discussion of power purchase and sale contracts that the Company has entered into with various counterparties, see Note K of the Notes to Financial Statements in the 2017 Form 10-K.

Environmental Matters

General. The Company is subject to extensive laws, regulations and permit requirements with respect to air and greenhouse gas emissions, water discharges, soil and water quality, waste management and disposal, natural resources and other environmental matters by federal, state, regional, tribal and local authorities. Failure to comply with such laws, regulations and requirements can result in actions by authorities or other third parties that might seek to impose on the Company administrative, civil and/or criminal penalties or other sanctions. In addition, releases of pollutants or contaminants into the environment can result in costly cleanup liabilities. These laws, regulations and requirements are subject to change through modification or reinterpretation, or the introduction of new laws and regulations, and as a result, the Company may face additional capital and operating costs to comply.

Table of Contents

EL PASO ELECTRIC COMPANY

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

I. Litigation

The Company is involved in various legal, environmental, tax and regulatory proceedings before various courts, regulatory commissions and governmental agencies regarding matters arising in the ordinary course of business. In many of these matters, the Company has excess casualty liability insurance that covers the various claims, actions and complaints. The Company regularly analyzes current information and, as necessary, makes provisions in its financial statements for probable liabilities for the eventual disposition of these matters. While the outcome of these matters cannot be predicted with certainty, based upon a review of the matters and applicable insurance coverage, the Company believes that none of these matters will have a material adverse effect on the financial position, results of operations or cash flows of the Company. The Company expenses legal costs, including expenses related to loss contingencies, as they are incurred.

See Notes D and H above and Notes C and K of the Notes to Financial Statements in the 2017 Form 10-K for discussion of the effects of government legislation and regulation on the Company.

J. Employee Benefits

The Company adopted ASU 2017-07, Compensation-Retirement Benefits, effective January 1, 2018. Upon adoption of the new standard, the service cost is included in "Operations and maintenance" in the Company's Statements of Operations. The expected return on plan assets is included in "Investment and interest income, net". The amortization of prior service benefit and amortization of gains are included in "Miscellaneous non-operating income". The amortization of prior service cost and amortization of losses are included in "Miscellaneous non-operating deductions". The interest cost component of net periodic benefit cost is included in "Other interest".

The provisions in ASU 2017-07 were applied retrospectively for the income statement presentation of the service cost component and the other components of net benefit costs. The Company elected to apply the practical expedient and used the amounts disclosed in its pension and other postretirement benefit plan note for the 2017 comparative period as the estimation basis for applying the retrospective presentation requirements. The Company reclassified \$2.0 million to "Operations and maintenance" in the Company's Statement of Operations for the three months ended June 30, 2017 by increasing (i) "Investment and interest income, net" by \$5.2 million, (ii) "Miscellaneous non-operating income" by \$2.9 million, (iii) "Miscellaneous non-operating deductions" by \$2.1 million, and (iv) "Other interest" by \$4.0 million. As a result of the reclassifications, "Operations and maintenance" increased to \$2.5 million in service cost from the \$0.5 million in net periodic benefit cost previously reported.

The Company reclassified \$4.1 million to "Operations and maintenance" in the Company's Statement of Operations for the six months ended June 30, 2017 by increasing (i) "Investment and interest income, net" by \$10.5 million, (ii) "Miscellaneous non-operating income" by \$5.7 million, (iii) "Miscellaneous non-operating deductions" by \$4.2 million, and (iv) "Other interest" by \$7.9 million. As a result of the reclassifications, "Operations and maintenance" increased to \$5.4 million in service cost from the \$1.3 million in net periodic benefit cost previously reported.

The Company reclassified \$8.1 million to "Operations and maintenance" in the Company's Statement of Operations for the twelve months ended June 30, 2017 by increasing (i) "Investment and interest income, net" by \$20.9 million, (ii) "Miscellaneous non-operating income" by \$10.8 million, (iii) "Miscellaneous non-operating deductions" by \$7.8 million, and (iv) "Other interest" by \$15.8 million. As a result of the reclassifications, "Operations and maintenance" increased to \$10.9 million in service cost from the \$2.8 million in net periodic benefit cost previously reported.

## Retirement Plans

The net periodic benefit cost recognized for the three, six and twelve months ended June 30, 2018 and 2017, is made up of the components listed below as determined using the projected unit credit actuarial cost method (in thousands):

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2017		Twelve Months Ended June 30, 2018	
Components of net periodic benefit cost:						
Service cost	\$2,757	\$1,989	\$5,515	\$4,259	\$9,774	\$8,450
Interest cost	3,222	3,282	6,445	6,530	12,974	13,039
Expected return on plan assets	(5,315 )	(4,787 )	(10,630)	(9,595 )	(20,224)	(19,049)
Amortization of:						
Net loss	2,100	2,138	4,200	4,227	8,427	7,791
Prior service benefit	(877 )	(875 )	(1,755 )	(1,753 )	(3,508 )	(3,504 )
Net periodic benefit cost	\$1,887	\$1,747	\$3,775	\$3,668	\$7,443	\$6,727

During the six months ended June 30, 2018, the Company contributed \$5.8 million of its projected \$9.4 million 2018 annual contribution to its retirement plans.

## Other Postretirement Benefits

The net periodic benefit recognized for the three, six and twelve months ended June 30, 2018 and 2017, is made up of the components listed below (in thousands):

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2017		Twelve Months Ended June 30, 2018	
Components of net periodic benefit:						
Service cost	\$700	\$530	\$1,400	\$1,118	\$2,518	\$2,457
Interest cost	565	684	1,130	1,362	2,491	2,784
Expected return on plan assets	(612 )	(483 )	(1,225 )	(953 )	(2,179 )	(1,868 )
Amortization of:						
Prior service benefit	(1,537 )	(1,538 )	(3,075 )	(3,076 )	(6,150 )	(5,402 )
Net gain	(525 )	(444 )	(1,050 )	(839 )	(1,889 )	(1,883 )
Net periodic benefit	\$(1,409)	\$(1,251)	\$(2,820)	\$(2,388)	\$(5,209)	\$(3,912)

During the six months ended June 30, 2018, the Company contributed \$0.2 million of its projected \$0.5 million 2018 annual contribution to its other postretirement benefits plan.

## K. Financial Instruments and Investments

The FASB guidance requires the Company to disclose estimated fair values for its financial instruments. The Company has determined that cash and temporary investments, investment in debt securities, accounts receivable, decommissioning trust funds, long-term debt, short-term borrowings under the Company's RCF, accounts payable and customer deposits meet the definition of financial instruments. The carrying amounts of cash and temporary investments, accounts receivable, accounts payable and customer deposits approximate fair value because of the short maturity of these items. Investments in debt securities and decommissioning trust funds are carried at estimated fair value.

Table of ContentsEL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

Long-Term Debt and Short-Term Borrowings Under the RCF. The fair values of the Company's long-term debt and short-term borrowings under the RCF are based on estimated market prices for similar issues and are presented below (in thousands):

	June 30, 2018		December 31, 2017	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Pollution Control Bonds	\$ 157,723	\$ 165,349	\$ 157,676	\$ 169,186
Senior Notes (1)	1,117,914	1,252,149	993,426	1,211,922
RGRT Senior Notes (1)(2)	109,517	111,650	44,886	47,070
RCF (2)	80,445	80,445	173,533	173,533
Total	\$ 1,465,599	\$ 1,609,593	\$ 1,369,521	\$ 1,601,711

On June 28, 2018, the Company issued \$125 million in aggregate principal amount of 4.22% Senior Notes due (1) August 15, 2028 and guaranteed the issuance by the RGRT of \$65 million in aggregate principal amount of 4.07% Senior Notes due August 15, 2025. See Note L, Long-Term Debt and Financing Obligations.

Nuclear fuel financing, as of June 30, 2018 and December 31, 2017, is funded through \$110 million and \$45 million RGRT Senior Notes and \$24.4 million and \$88.5 million, respectively, under the RCF. As of June 30, 2018 (2) and December 31, 2017, \$56.0 million and \$85.0 million, respectively, was outstanding under the RCF for working capital or general corporate purposes. The interest rate on the Company's borrowings under the RCF is reset throughout the quarter reflecting current market rates. Consequently, the carrying value approximates fair value. Marketable Securities. The Company's marketable securities, included in decommissioning trust funds in the balance sheets, are reported at fair value which was \$287.1 million and \$286.9 million at June 30, 2018 and December 31, 2017, respectively. The investments in the Company's Palo Verde nuclear decommissioning trust funds ("NDT") are classified as available for sale debt securities, equity securities and cash and cash equivalents. These investments are recorded at their estimated fair value in accordance with FASB guidance for certain investments in debt and equity securities. On January 1, 2018, the Company adopted ASU 2016-01, Financial Instruments-Overall, which eliminates the requirements to classify investments in equity securities with readily determinable fair values as trading or available for sale and requires entities to recognize changes in fair value for these securities in net income as reported in the Statements of Operations. ASU 2016-01 requires a modified-retrospective approach and therefore, comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods.

The reported fair values include gross unrealized losses on securities classified as available for sale whose impairment the Company has deemed to be temporary. The tables below present the gross unrealized losses and the fair value of these securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position (in thousands):

Description of Securities (1):	June 30, 2018

Domestic Equity Securities	962	(210 )	—	—	962	(210 )
Total	\$49,503	\$ (852 )	\$42,496	\$ (2,207 )	\$91,999	\$ (3,059 )

(2)Includes 146 securities.

The Company monitors the length of time specific securities trade below their cost basis along with the amount and percentage of the unrealized loss in determining if a decline in fair value below recorded cost of debt securities classified as available for sale is considered to be other than temporary. The Company recognizes impairment losses on certain of its available for sale debt securities deemed to be other than temporary. In accordance with the FASB guidance, these impairment losses are recognized in net income, and a lower cost basis is established for these securities. In addition, the Company will research the future prospects of individual securities as necessary. The Company does not anticipate expending monies held in trust before 2044 or a later period when decommissioning of Palo Verde begins.

For the three, six and twelve months ended June 30, 2018 and 2017, the Company recognized other than temporary impairment losses on its available-for-sale securities as follows (in thousands):

	Three Months Ended June 30, 2018	Six Months Ended June 30, 2018	Twelve Months Ended June 30, 2017
Unrealized holding losses included in pre-tax income	\$ —	\$ —	\$ —
			—(196)

Investments categorized as available for sale securities also include gross unrealized gains which have not been recognized in the Company's net income. The table below presents the unrecognized gross unrealized gains and the fair value of these securities, aggregated by investment category (in thousands):

Description of Securities:	June 30, 2018		December 31, 2017

Corporate Debt Obligations	37,502	—	17,303	8,471	11,728

The Company's available for sale securities in the NDT are sold from time to time and the Company uses the specific identification basis to determine the amount to reclassify from AOCI into net income. The proceeds from the sale of these securities during the three, six and twelve months ended June 30, 2018 and 2017, and the related effects on pre-tax income are as follows (in thousands):

	Three Months Ended June 30, 2018		Six Months Ended June 30, 2018		Twelve Months Ended June 30, 2018	
Proceeds from sales or maturities of available-for-sale securities	\$2,608	\$36,476	\$14,365	\$62,531	\$48,871	\$113,087

Gross realized losses included in pre-tax income	(147 )	(156 )	(674 )	(552 )	(1,269 )	(1,185 )
Gross unrealized losses included in pre-tax income	—	—	—	—	—	(196 )
Net gains (losses) included in pre-tax income	\$(147 )	\$5,166	\$(665 )	\$7,357	\$2,604	\$11,499

Upon the adoption of ASU 2016-01, Financial Instruments-Overall, on January 1, 2018, the Company records, on a modified-retrospective basis, changes in fair market value for equity securities held in the NDT in the Statements of Operations. The unrealized gains and losses recognized during the three and six months ended, June 30, 2018 and related effects on pre-tax income are as follows (in thousands):

	Three Months Ended June 30, 2018	Six Months Ended June 30, 2018
Net gains and (losses) recognized on equity securities	\$3,249	\$1,258
Less: Net gains and (losses) recognized on equity securities sold	2,266	4,056
Unrealized gains and (losses) recognized on equity securities still held at reporting date	\$983	\$(2,798)

Fair Value Measurements. The FASB guidance requires the Company to provide expanded quantitative disclosures for financial assets and liabilities recorded on the balance sheet at fair value. Financial assets carried at fair value include the Company's decommissioning trust investments and investments in debt securities which are included in deferred charges and other assets on the Balance Sheets. The Company has no liabilities that are measured at fair value on a recurring basis. The FASB guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

- Level 1 – Observable inputs that reflect quoted market prices for identical assets and liabilities in active markets. Financial assets utilizing Level 1 inputs include the NDT investments in active exchange-traded equity securities, mutual funds and U.S. Treasury securities that are in a highly liquid and active market. The Institutional Funds are valued using the

Table of ContentsEL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

Net Asset Value ("NAV") provided by the administrator of the fund. The NAV price is quoted on a restrictive market although the underlying investments are traded on active markets. The NAV used for determining the fair value of the Institutional Funds-International Equity investments have readily determinable fair values. Accordingly, such fund values are categorized as Level 1.

Level 2 – Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability either directly or indirectly. Financial assets utilizing Level 2 inputs include the NDT investments in fixed income securities. The fair value of these financial instruments is based on evaluated prices that reflect observable market information, such as actual trade information of similar securities, adjusted for observable differences.

Level 3 – Unobservable inputs using data that is not corroborated by market data and primarily based on internal Company analysis using models and various other analysis. Financial assets utilizing Level 3 inputs are the Company's investment in debt securities.

The securities in the NDT are valued using prices and other relevant information generated by market transactions involving identical or comparable securities. The FASB guidance identifies this valuation technique as the "market approach" with observable inputs. The Company analyzes available-for-sale securities to determine if losses are other than temporary.

The fair value of the NDT and investments in debt securities at June 30, 2018 and December 31, 2017, and the level within the three levels of the fair value hierarchy defined by the FASB guidance are presented in the table below (in thousands):

Description of Securities	Fair Value as of June 30, 2018	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

EL PASO ELECTRIC COMPANY  
NOTES TO FINANCIAL STATEMENTS  
(Unaudited)

L. Long-Term Debt and Financing Obligations

\$125 Million Senior Notes. On June 28, 2018, the Company entered into a Note Purchase Agreement (the "Agreement") with several institutional purchasers under which the Company issued and sold \$125 million aggregate principal amount of 4.22% Senior Notes due August 15, 2028 (the "Notes"). The net proceeds from the issuance of these senior notes were used to repay outstanding short-term borrowings under the RCF for working capital and general corporate purposes. The Company will pay interest on the Notes semi-annually on February 15 and August 15 of each year until maturity, beginning on February 15, 2019.

The Company may redeem the Notes, in whole or in part, at any time at a redemption price equal to 100% of the principal amount to be redeemed together with the interest on such principal amount accrued to the date of redemption, plus a make-whole amount based on the prevailing market interest rates.

\$65 Million RGRT Senior Notes. On June 28, 2018, the RGRT, a Texas grantor trust through which the Company finances its portion of nuclear fuel for Palo Verde, and the Company entered into a Note Purchase Agreement (the "RGRT Agreement") with several institutional purchasers. Under the terms of the RGRT Agreement, the RGRT issued and sold \$65 million aggregate principal amount of 4.07% Senior Notes due August 15, 2025 (the "RGRT Notes"). The net proceeds from the RGRT Notes were used to repay outstanding short-term borrowings under the RCF to finance nuclear fuel purchases. The Company guaranteed the payment of principal and interest on the RGRT Notes. RGRT's assets, liabilities and operations are consolidated in the Company's financial statements and the RGRT Notes are included as long-term debt on the balance sheet. The RGRT will pay interest on the RGRT Notes semi-annually on February 15 and August 15 of each year until maturity, beginning on February 15, 2019.

The RGRT may redeem the RGRT Notes, in whole or in part, at any time at a redemption price equal to 100% of the principal amount to be redeemed together with the interest on such principal amount accrued to the date of redemption, plus a make-whole amount based on the prevailing market interest rates.

The issuance sale of both the Notes and the RGRT Notes was made in reliance on a private placement exemption from the registration provisions of the Securities Act of 1933, as amended.

Report of Independent Registered Public Accounting Firm  
To the Shareholders and Board of Directors  
El Paso Electric Company:

Results of Review of Interim Financial Information

We have reviewed the balance sheet of El Paso Electric Company (the "Company") as of June 30, 2018, the related statements of operations and comprehensive operations for the three-month, six-month, and twelve-month periods ended June 30, 2018 and 2017, the related statements of cash flows for the six-month periods ended June 30, 2018 and 2017, and the related notes (collectively, the interim financial information). Based on our reviews, we are not aware of any material modifications that should be made to the interim financial information for it to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the balance sheet of the Company as of December 31, 2017, and the related statements of operations and comprehensive operations, changes in common stock equity, and cash flows for the year then ended (not presented herein); and in our report dated February 28, 2018, we expressed an unqualified opinion on those financial statements. In our opinion, the information set forth in the accompanying balance sheet as of December 31, 2017, is fairly stated, in all material respects, in relation to the balance sheet from which it has been derived.

Basis for Review Results

This interim financial information is the responsibility of the Company's management. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our reviews in accordance with the standards of the PCAOB. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this Item 2 updates, and should be read in conjunction with, the information set forth in Part II, Item 7 of the 2017 Form 10-K.

**FORWARD-LOOKING STATEMENTS**

Certain matters discussed in this Quarterly Report on Form 10-Q, other than statements of historical fact, are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Forward-looking statements often include words like "believe", "anticipate", "target", "project", "expect", "predict", "pro forma", "estimate", "intend", "will", "is designed to", "plan", and words of similar meaning, or are indicated by the Company's discussion of strategies or trends. Forward-looking statements describe the Company's future plans, objectives, expectations or goals. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, no assurances can be given that these expectations will prove to be correct. Such statements address future events and conditions and include, but are not limited to:

- capital expenditures,
- earnings,
- liquidity and capital resources,
- ratemaking/regulatory matters,
- litigation,
- accounting matters, including accounting for taxes,
- possible corporate restructurings, acquisitions and dispositions,
- compliance with debt and other restrictive covenants,
- interest rates and dividends,
- environmental matters,
- nuclear operations,
- operation of the Company's generating units and its transmission and distribution systems, and
- the overall economy of the Company's service area.

These forward-looking statements are based on assumptions and analyses in light of the Company's experience and perception of historical trends, current conditions, expected future developments, and other factors the Company believes were appropriate in the circumstances when the statements were made. Forward-looking statements by their nature involve substantial risks and uncertainties that could significantly impact expected results, and actual future results could differ materially from those described in such statements. While it is not possible to identify all factors, the Company continues to face many risks and uncertainties. Factors that would cause or contribute to such differences include, but are not limited to:

- actions of the Company's regulators,
- the Company's ability to fully and timely recover its costs and earn a reasonable rate of return on its invested capital through the rates that it is permitted to charge,
- rates, cost recovery mechanisms and other regulatory matters including the ability to recover fuel costs on a timely basis,
- the ability of the Company's operating partners to maintain plant operations and manage O&M costs at Palo Verde, including costs to comply with any new or expanded regulatory or environmental requirements,
- reductions in output at generation plants operated by the Company,
- the size of the Company's construction program and its ability to complete construction on budget and on time,
- the Company's reliance on significant customers,
- the credit worthiness of the Company's customers,

unscheduled outages of generating units including outages at Palo Verde, changes in customers' demand for electricity as a result of energy efficiency initiatives and emerging competing services and technologies, including distributed generation and battery storage, individual customer groups, including distributed generation customers, may not pay their full cost of service, and other customers may or may not be required to pay the difference, changes in, and the assumptions used for, pension and other post-retirement and post-employment benefit liability calculations, as well as actual and assumed investment returns on pension plan and other post-retirement plan assets, the impact of changing cost escalation and other assumptions on the Company's nuclear decommissioning liability for Palo Verde, as well as actual and assumed investment returns on assets in the NDT, disruptions in the Company's transmission system, and in particular the lines that deliver power from its remote generating facilities, the sufficiency of the Company's insurance coverage, including availability, cost, coverage and terms, electric utility deregulation or re-regulation, regulated and competitive markets, ongoing municipal, state and federal activities, cuts in military spending or prolonged shutdowns of the federal government that reduce demand for the Company's services from military and governmental customers, political, legislative, judicial and regulatory developments, homeland security considerations, including those associated with the U.S./Mexico border region and the energy industry, changes in environmental laws and regulations and the enforcement or interpretation thereof, including those related to air, water or greenhouse gas emissions or other environmental matters, economic, commercial bank, financial and capital market conditions, actions by credit rating agencies, changes in accounting requirements and other accounting matters, changing weather trends and the impact of severe weather conditions, possible physical or cyber attacks, intrusions or other catastrophic events, the impact of lawsuits filed against the Company, the impact of changes in interest rates or rates of inflation, Texas, New Mexico and electric industry utility service reliability standards, uranium, natural gas, oil and wholesale electricity prices and availability, possible income tax and interest payments as a result of audit adjustments proposed by the U.S. Internal Revenue Service ("IRS") or state taxing authorities, the impact of recent changes to U.S. tax laws, the impact of U.S. health care reform legislation, the effectiveness of the Company's risk management activities, loss of key personnel, the Company's ability to recruit and retain qualified employees and the Company's ability to successfully implement succession planning, and other circumstances affecting anticipated operations, sales and costs.

These lists are not all-inclusive because it is not possible to predict all factors. A discussion of some of these factors is included in the 2017 Form 10-K under the headings "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations - Summary of Critical Accounting Policies and Estimates" and "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources". This Quarterly Report on Form

10-Q should be read in its entirety. Management cautions against putting undue reliance on forward-looking statements or projecting any future results based on such statements or present or prior earnings levels. Any forward-looking statement speaks only as of the date such statement was made, and the Company is not obligated to update any forward-looking statement to reflect events or circumstances after the date on which such statement was made, except as required by applicable laws or regulations.

#### Summary of Critical Accounting Policies and Estimates

The preparation of our financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and related notes for the periods presented and actual results could differ in future periods from those estimates. Critical accounting policies and estimates are both important to the portrayal of our financial condition and results of operations and require complex, subjective judgments and are more fully described in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the 2017 Form 10-K.

#### Summary

The following is an overview of our results of operations for the three, six and twelve-month periods ended June 30, 2018 and 2017. Net income and basic earnings per share for the three, six and twelve-month periods ended June 30, 2018 and 2017, are shown below:

	Three Months Ended June 30,		Six Months Ended June 30,		Twelve Months Ended June 30,	
	2018	2017	2018	2017	2018	2017
Net income (in thousands)	\$ 33,295	\$ 36,066	\$ 26,329	\$ 32,077	\$ 92,513	\$ 112,369
Basic earnings per share	0.82	0.89	0.65	0.79	2.28	2.77

The following table shows the primary factors affecting the after-tax change in net income between the 2018 and 2017 periods presented (in thousands):

	Three Months Ended June 30, 2018	Six Months Ended June 30, 2018	Twelve Months Ended June 30, 2018
June 30, 2017 net income	\$ 36,066	\$ 32,077	\$ 112,369
Change in (net of tax at 21%):			
Palo Verde performance rewards, net (a)	(3,954)	(3,954)	(3,954)
Increased operation and maintenance at fossil-fuel generating plants (b)	(3,668)	(1,042)	(456)
Decreased investment and interest income, NDT (c)	(1,474)	(5,105)	(5,653)
Increased depreciation and amortization (d)	(1,156)	(2,641)	(9,942)
Deregulated Palo Verde Unit 3 (e)	(509)	(762)	(725)
Decreased wheeling revenues (f)	(316)	(301)	(2,784)
(Increased) decreased taxes other than income taxes (g)	(91)	85	(1,865)
Effective tax rate, other (h)	6,500	6,460	13,270
Increased (decreased) retail non-fuel base revenues (i)	1,765	2,023	(6,205)
Other	132	(511)	(1,542)
June 30, 2018 net income	\$ 33,295	\$ 26,329	\$ 92,513

All information presented below is expressed in pre-tax amounts except when stated otherwise.

(a) Palo Verde performance rewards of \$5.0 million, associated with the 2013 to 2015 performance periods, net of disallowed fuel and purchased power costs related to the resolution of the Texas fuel reconciliation proceeding designated as PUCT Docket No. 46308 for the period from April 2013 through March 2016, were recorded in June

2017, with no comparable amount in the three, six and twelve months ended June 30, 2018.

Operations and maintenance ("O&M") expenses at our fossil fuel generating plants increased for the three months ended June 30, 2018, compared to the three months ended June 30, 2017, primarily due to maintenance and outage (b) costs related to Newman Power Station ("Newman") Units 2 & 4 and Rio Grande Power Station ("Rio Grande") Unit 8 in 2018. These increases were partially offset by outage costs incurred at Newman Unit 5 in the three months ended June 30, 2017, with no comparable amount in the three months ended June 30, 2018.

O&M expenses at our fossil fuel generating plants increased for the six months ended June 30, 2018, compared to the six months ended June 30, 2017, primarily due to outage costs at Rio Grande Unit 8 in 2018. This increase was partially offset by net reductions in maintenance and outage costs at Newman in the six months ended June 30, 2018, compared to the six months ended June 30, 2017.

Investment and interest income decreased for the three, six and twelve months ended June 30, 2018, compared to the three, six and twelve months ended June 30, 2017, primarily due to a decrease in realized and unrealized net (c) gains on securities held in the NDT. Beginning on January 1, 2018, the Company adopted ASU 2016-01, Financial Instruments, and began recording unrealized gains and losses on equity securities held in the NDT directly in earnings. Refer to "Impact of New Accounting Standard and Use of Non-GAAP Financial Measures" below for further details.

(d) Depreciation and amortization increased for the three and six months ended June 30, 2018, compared to the three and six months ended June 30, 2017, primarily due to increased plant balances.

Depreciation and amortization increased for the twelve months ended June 30, 2018, compared to the twelve months ended June 30, 2017, primarily due to (i) increased plant balances and (ii) approximately \$5.0 million of depreciation reduction for the first half of 2016, which was recognized when the 2016 PUCT Final Order was approved in August 2016.

(e) Deregulated Palo Verde Unit 3 revenues decreased for the three and six months ended June 30, 2018, compared to the three and six months ended June 30, 2017, primarily due to decreases in generation of 29.5% and 14.0%, respectively, caused by a spring refueling outage at Unit 3 completed in May 2018, with no comparable outage in the three and six months ended June 30, 2017.

Deregulated Palo Verde Unit 3 revenues decreased for the twelve months ended June 30, 2018, compared to the twelve months ended June 30, 2017, primarily due to a 9.0% decrease in proxy market prices, reflecting a decline in the price of natural gas.

(f) Wheeling revenues decreased for the twelve months ended June 30, 2018, compared to the twelve months ended June 30, 2017, primarily due to the expiration of a contract.

(g) Taxes other than income taxes increased for the twelve months ended June 30, 2018, compared to the twelve months ended June 30, 2017, primarily due to increased property valuations in Texas and New Mexico.

(h) The effective tax rate, other changed for the three months ended June 30, 2018, compared to the three months ended June 30, 2017, primarily due to a decrease in the federal corporate income tax rate from 35% to 21%, excluding the tax impact of other items in the table above.

The effective tax rate, other changed for the six months ended June 30, 2018, compared to the six months ended June 30, 2017, primarily due to (i) a decrease in the federal corporate income tax rate from 35% to 21%, excluding the tax impact of other items in the table above, and (ii) tax benefits from stock incentive plans.

The effective tax rate, other changed for the twelve months ended June 30, 2018, compared to the twelve months ended June 30, 2017, primarily due to (i) a decrease in the federal corporate income tax rate from 35% to 21%, excluding the tax impact of other items in the table above, (ii) state income taxes, and (iii) the allowance for equity funds used during construction ("AEFUDC").

Retail non-fuel base revenues increased for the three months ended June 30, 2018, compared to the three months ended June 30, 2017, primarily due to increased revenues from residential customers of \$5.6 million caused by increased kWh sales that resulted from favorable weather and an increase in the average number of residential (i) customers served compared to the three months ended June 30, 2017, and a \$4.1 million non-fuel base rate increase approved in the 2017 PUCT Final Order. These increases were partially offset by refunds of approximately \$7.7 million to customers for the reduction in the federal corporate income tax rate for the period April 1, 2018 through June 30, 2018.

Retail non-fuel base revenues increased for the six months ended June 30, 2018, compared to the six months ended June 30, 2017, primarily due to increased revenues from residential customers of \$7.2 million caused by increased kWh sales that resulted from favorable weather and an increase in the average number of residential customers served compared to the six months ended June 30, 2017, and a \$6.9 million non-fuel base rate increase approved in the 2017 PUCT Final Order. These increases were partially offset by refunds of approximately \$11.8 million to customers for the reduction in the federal corporate income tax rate for the period January 1, 2018 through June 30, 2018.

Retail non-fuel base revenues decreased for the twelve months ended June 30, 2018, compared to the twelve months ended June 30, 2017, primarily due to (i) approximately \$17.2 million of retail non-fuel base revenues for the first half of 2016, which were recognized when the 2016 PUCT Final Order was approved in August 2016 and (ii) a refunds of approximately \$12.6 million to customers for the reduction in the federal corporate income tax rate for the twelve months ended June 30, 2018. These decreases were partially offset by (i) a \$13.8 million non-fuel base rate increase for the period from July 18, 2017 through June 30, 2018 approved in the 2017 PUCT Final Order and (ii) increased revenues from residential customers of \$7.9 million caused by increased kWh sales that resulted from an increase in the average number of residential customers.

#### Impact of New Accounting Standard and Use of Non-GAAP Financial Measures

Upon adoption of ASU 2016-01, Financial Instruments - Recognition and Measurement of Financial Assets and Financial Liabilities, the Company recorded, as of January 1, 2018, a cumulative effect adjustment to retained earnings of \$41.0 million, net of tax, for the unrealized gains (losses) related to equity securities held in the NDT. As required by ASU 2016-01, changes in the fair value of equity securities are now recognized in the Company's Statements of Operations. The adoption of the new standard added the potential for significant volatility to the Company's reported results of operations as changes in the fair value of equity securities may occur. Furthermore, the equity investments included in the NDT are significant and are expected to increase significantly during the remaining life (estimated to be 27 to 30 years) of Palo Verde. Accordingly, the Company has provided the following non-GAAP financial measures, which reconcile GAAP net income to non-GAAP adjusted net income and GAAP basic earnings per share to non-GAAP adjusted basic earnings per share, to exclude the impact of changes in fair value of equity securities and realized gains (losses) from the sale of both equity and fixed income securities.

	Three Months Ended June 30, 2018      2017	
	(In thousands except for per share data)

Income taxes on above adjustments	773	2,299
Adjusting items, net of income taxes	(3,089 )	(9,200 )
Adjusted net income (non-GAAP)	\$89,424	\$103,169
Basic earnings per share (GAAP)	\$2.28	\$2.77
Adjusted basic earnings per share (non-GAAP)	\$2.20	\$2.55

Adjusted net income and adjusted basic earnings per share are not measures of financial performance under GAAP and should not be considered as an alternative to net income and earnings per share, respectively. Furthermore, the Company's presentation of any non-GAAP financial measure may not be comparable to similarly titled measures used by other companies. The Company believes adjusted net income and adjusted basic earnings per share are useful financial measures for investors and analysts in understanding the Company's core operating performance because each measure removes the effects of variances reported in the Company's results of operations that are not indicative of fundamental changes in the earnings capacity of the Company.

### Historical Results of Operations

The following discussion includes detailed descriptions of factors affecting individual line items in the results of operations. The amounts presented below are presented on a pre-tax basis.

#### Operating revenues

We realize revenue from the sale of electricity to retail customers at regulated rates and the sale of energy in the wholesale power market generally at market-based prices. Sales for resale (which are FERC regulated cost-based wholesale sales within our service territory) accounted for less than 1% of revenues.

Revenues from the sale of electricity include fuel costs that are recovered from our customers through fuel adjustment mechanisms. We record deferred fuel revenues for the difference between actual fuel costs and recoverable fuel revenues until such amounts are collected from or refunded to customers. "Non-fuel base revenues" refers to our revenues from the sale of electricity excluding such fuel costs.

No retail customer accounted for more than 3% of our non-fuel base revenues for the three, six and twelve months ended June 30, 2018. Residential and small commercial customers represent approximately 79% of our non-fuel base revenues for the three, six and twelve months ended June 30, 2018. While this customer base is more stable, it is also more sensitive to changes in weather conditions. The current rate structures in Texas and New Mexico reflect higher base rates during the peak summer season of May through October and lower base rates during November through April for our residential and small commercial and industrial customers. As a result, our business is seasonal, with higher kWh sales and revenues during the summer cooling season.

Weather significantly impacts our residential, small commercial and industrial customers, and to a lesser extent, our sales to public authorities. Heating and cooling degree days can be used to evaluate the effect of weather on energy use. For each degree the average outdoor temperature varies from a standard of 65 degrees Fahrenheit, a degree day is recorded. For the three, six and twelve months ended June 30, 2018, retail non-fuel base revenues were positively impacted by favorable weather when compared to the three, six and twelve months ended June 30, 2017. Cooling degree days for the three, six and twelve months ended June 30, 2018 increased 19.0%, 14.9% and 3.0% when compared to the three, six and twelve months ended June 30, 2017, and were 20.9%, 20.4% and 11.5% above the 10-year average, respectively. The table below shows heating and cooling degree days compared to a 10-year average.

	Three Months Ended June 30,			Six Months Ended June 30,			Twelve Months Ended June 30,		
	2018	2017	10-Year Average	2018	2017	10-Year Average	2018	2017	10-Year Average*
Heating degree days	11	45	60	976	855	1,173	1,643	1,577	2,081
Cooling degree days	1,319	1,108	1,091	1,356	1,180	1,126	3,093	3,003	2,773

\* Calendar year basis.

Customer growth is a key driver of the growth of retail sales. The average number of retail customers grew 1.5% for the three and six months ended June 30, 2018 when compared to the three and six months ended June 30, 2017, and 1.6% for the twelve months ended June 30, 2018 when compared to the twelve months ended June 30, 2017. See the tables presented on pages 41, 42 and 43, which provide detail on the average number of retail customers and the related revenues and kWh sales.

Retail non-fuel base revenues. Retail non-fuel base revenues for the three months ended June 30, 2018 increased \$2.2 million, or 1.3%, compared to the three months ended June 30, 2017, primarily due to a \$4.1 million non-fuel base rate increase approved in the 2017 PUCT Final Order. Retail non-fuel base revenues decreased by refunds of approximately \$7.7 million to customers for the reduction in the federal corporate income tax rate for the period April 1, 2018 through June 30 2018. Excluding the \$4.1 million 2017 PUCT Final Order impact and the \$7.7 million federal corporate income tax rate refund, retail non-fuel base revenues for the three months ended June 30, 2018, increased by \$5.9 million, or 3.5%, compared to the three months ended June 30, 2017. This increase primarily includes a \$5.6 million increase in revenues from residential customers caused by an 8.1% increase in kWh sales driven by favorable weather and a 1.5% increase in the average number of residential customers served compared to the three months ended June 30, 2017. The Company set a new kWh sales record in the second quarter of 2018, which was 4.2% higher

than the previous record for a second quarter.

Retail non-fuel base revenues for the six months ended June 30, 2018 increased \$2.6 million, or 0.9%, compared to the six months ended June 30, 2017, primarily due to a \$6.9 million non-fuel base rate increase approved in the 2017 PUCT Final Order. Retail non-fuel base revenues decreased by refunds of approximately \$11.8 million to customers for the reduction in the federal corporate income tax rate for the period January 1, 2018 through June 30, 2018.

Excluding the \$6.9 million 2017 PUCT Final

Order impact and the \$11.8 million federal corporate income tax rate refund, retail non-fuel base revenues for the six months ended June 30, 2018 increased by \$7.5 million, or 2.7%, compared to the six months ended June 30, 2017. This increase primarily includes a \$7.2 million increase in revenues from residential customers caused by a 5.8% increase in kWh sales driven by favorable weather and a 1.6% increase in the average number of residential customers served compared to the six months ended June 30, 2017.

For the twelve months ended June 30, 2018, retail non-fuel base revenues decreased \$7.9 million, or 1.2%, compared to the twelve months ended June 30, 2017, primarily due to (i) approximately \$17.2 million of retail non-fuel base revenues for the period from January 12, 2016 through June 30, 2016, which were recognized when the 2016 PUCT Final Order was approved in August 2016 and (ii) refunds of approximately \$12.6 million to customers for the reduction in the federal corporate income tax rate for the twelve months ended June 30, 2018. These decreases were partially offset by (i) a \$13.8 million non-fuel base rate increase for the period from July 18, 2017 through June 30, 2018 approved in the 2017 PUCT Final Order and (ii) increased revenues from residential customers of \$7.9 million caused by a 2.4% increase in kWh sales that resulted from an increase in the average number of residential customers. Fuel revenues. Fuel revenues consist of revenues collected from customers under fuel recovery mechanisms approved by the state commissions and the FERC, and deferred fuel revenues which are comprised of the difference between fuel costs and fuel revenues collected from customers. In New Mexico, fuel and purchased power costs are reconciled to actual costs on a monthly basis and recovered or refunded to customers the second succeeding month. In Texas, fuel costs are recovered through a fixed fuel factor. We can seek to revise our fixed fuel factor based upon an approved formula at least four months after our last revision except in the month of December. In addition, if we materially over-recover fuel costs, we must seek to refund the over-recovery, and if we materially under-recover fuel costs, we may seek a surcharge to recover those costs. Fuel over- and under-recoveries are defined as material when they exceed 4% of the previous twelve months' fuel costs.

In the three and six months ended June 30, 2018, we under-recovered our fuel costs by \$7.6 million and over-recovered our fuel costs by \$0.4 million, respectively. In the twelve months ended June 30, 2018, we over-recovered our fuel costs by \$14.8 million. In March 2018 and March 2017, \$1.1 million and \$1.4 million, respectively, were credited to customers through the applicable fuel adjustment clauses as the result of a reimbursement from the DOE related to spent nuclear fuel storage. At June 30, 2018, we had a net fuel over-recovery balance of \$7.2 million, including an over-recovery of \$8.2 million in Texas, offset by an under-recovery of \$1.0 million in New Mexico. On October 13, 2017, we filed a request to decrease our Texas fixed fuel factor by approximately 19% to reflect decreased fuel expenses primarily related to a decrease in the price of natural gas used to generate power. The decrease in our Texas fixed fuel factor became effective beginning with the November 2017 billing month. On April 13, 2018, we filed a request with the PUCT, which was assigned Docket No. 48264, to decrease the Texas fixed fuel factor by approximately 29% to reflect decreased fuel expenses primarily related to a decrease in the price of natural gas used to generate power. On April 25, 2018, our proposed fuel factors were approved on an interim basis effective for the first billing cycle of the May 2018 billing month. No party to the case requested a hearing by May 14, 2018, and the tariff was approved and the docket closed on May 22, 2018. The Texas fuel factor will continue until changed by the PUCT.

Off-system sales. Off-system sales are wholesale sales into markets outside our service territory. Off-system sales are primarily made in off-peak periods when we have competitive generation capacity available after meeting our regulated service obligations. We have shared 100% of margins on non-arbitrage sales (as defined by the settlement in PUCT Docket No. 41852) and 50% of margins on arbitrage sales with our Texas customers since April 1, 2014. We are currently sharing 90% of off-system sales margins with our New Mexico customers (as reaffirmed in NMPRC Case No. 09-00171-UT), and 25% of our off-system sales margins with our sales for resale customer under the terms of their contract. Palo Verde's availability is an important factor in realizing these off-system sales margins.

Off-system sales revenues decreased \$0.6 million, or 5.8%, for the three months ended June 30, 2018 compared to the three months ended June 30, 2017, primarily as a result of lower average market prices for power. Off-system sales revenues increased \$8.3 million, or 33.6%, for the six months ended June 30, 2018, when compared to the six months ended June 30, 2017, primarily as a result of a 32.8% increase in kWh sales due to additional available power.

Off-system sales revenues increased \$17.9 million, or 36.2%, for the twelve months ended June 30, 2018, when

compared to the twelve months ended June 30, 2017, primarily as a result of a 26.3% increase in kWh sales due to additional available power, and higher average market prices for power.

Comparisons of kWh sales and operating revenues are shown below (in thousands):

Three Months Ended June 30:	2018	2017	Increase (Decrease)	
			Amount	Percent
kWh sales:

(1)2018 includes a \$4.1 million base rate increase related to the 2017 PUCT Final Order received in December 2017.

(2) 2018 includes a \$7.7 million base rate decrease related to the reduction in federal statutory income tax rate approved in the TCJA.

(3) 2017 includes \$5.0 million related to the Palo Verde performance rewards, net.

(4) Includes deregulated Palo Verde Unit 3 revenues for the New Mexico jurisdiction of \$1.6 million and \$2.2 million in 2018 and 2017, respectively.

(5) Includes retained margins of \$0.4 million in 2018 and 2017.

(6) Represents revenues with no related kWh sales.

(7) The Company implemented ASU 2014-09, Revenue from Contracts with Customers, in the first quarter of 2018, and as required by the standard, revenues related to reimbursed costs of energy efficiency programs approved by the Company's regulators are reported in operating revenues from customers. Related expenses are reported in operations and maintenance expenses.

(8) The number of retail customers presented is based on the number of service locations.

Comparisons of kWh sales and operating revenues are shown below

- (10) The number of retail customers presented is based on the number of service locations.

### Fuel and purchased power expense

Our sources of energy include electricity generated from our nuclear and natural gas generating plants and purchased power. Palo Verde represents approximately 30% of our net dependable generating capacity and approximately 48%, 53% and 53% of our Company-generated energy for the three, six and twelve months ended June 30, 2018, respectively. Fluctuations in the price of natural gas, which also is the primary factor influencing the price of purchased power, have had a significant impact on our cost of energy.

Fuel and purchased power expense decreased \$12.4 million, or 18.9%, for the three months ended June 30, 2018 compared to the three months ended June 30, 2017, primarily due to (i) decreased natural gas costs of \$8.7 million due to a 34.9% decrease in the average cost of Megawatt-hours ("MWhs") generated, partially offset by an 19.0% increase in MWhs generated with natural gas, (ii) decreased total purchased power costs of \$3.0 million due to an 18.3% decrease in the MWhs purchased, and (iii) decreased nuclear costs of \$0.8 million primarily due to a reduction in the price of uranium.

Fuel Type	Three Months Ended June 30, 2018			2017		
	Cost	MWh	Cost per MWh	Cost	MWh	Cost per MWh
	(in thousands)			(in thousands)		
Natural gas	\$29,904	1,256,393	\$ 23.80	\$38,602	1,055,911	\$ 36.56
Coal (a)	165	—	—	37	—	—

(a) Costs related to amortization of deferred coal mine reclamation obligations.

Fuel and purchased power expense decreased \$10.5 million, or 9.1%, for the six months ended June 30, 2018 compared to the six months ended June 30, 2017, primarily due to (i) decreased total purchased power costs of \$5.6 million due to a 25.5% decrease in the MWhs purchased partially offset by a 9.7% increase in the average cost of MWhs purchased, (ii) decreased natural gas costs of \$3.7 million due to a 31.5% decrease in the average cost of MWhs generated, partially offset by a 37.8% increase in MWhs generated with natural gas, and (iii) decreased nuclear costs of \$1.4 million primarily due to a reduction in the price of uranium.

Fuel Type	Six Months Ended June 30, 2018			2017		
	Cost	MWh	Cost per MWh	Cost	MWh	Cost per MWh
	(in thousands)			(in thousands)		
Natural gas	\$61,049	2,241,500	\$ 27.24	\$64,708	1,626,736	\$ 39.78

Total fuel and purchased power	\$105,651	5,344,497	19.99	\$116,173	\$4,969,728	23.69

(a) Costs related to amortization of deferred coal mine reclamation obligations.

(b) Costs include a DOE refund related to spent fuel storage of \$1.2 million and \$1.6 million recorded in March 2018 and 2017, respectively.

Cost per MWh excludes these refunds.

Fuel and purchased power expense decreased \$14.7 million, or 5.9%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to (i) decreased total purchased power costs of \$12.7 million due to a 25.3% decrease in the MWhs purchased partially offset by an 8.3% increase in the average cost of MWhs purchased, and (ii) decreased nuclear costs of \$2.3 million primarily due to a 6.3% decrease in the average cost of MWhs generated with nuclear fuel partially offset by a \$0.4 million reduction in the 2018 DOE refund compared to 2017. These decreases in energy expenses were partially offset by increased natural gas costs of \$0.6 million primarily due to a 27.0% increase in the MWhs generated with natural gas, partially offset by a 21.0% decrease in the average cost of MWhs generated.

Fuel Type	Twelve Months Ended June 30, 2018			2017		
	Cost	MWh	Cost per MWh	Cost	MWh	Cost per MWh
	(in thousands)			(in thousands)

Total fuel and purchased power	\$234,229	10,866,485	21.66	\$248,920	10,361,996	24.17

(a) The sale of our interest in Four Corners, coal-fired generation station, closed on July 6, 2016. The costs include amortization of deferred

coal mine reclamation obligations.

(b) Costs include a DOE refund related to spent fuel storage of \$1.2 million and \$1.6 million recorded in March 2018 and 2017, respectively.

Cost per MWh excludes these refunds.

#### Operations and maintenance expense

Operations and maintenance expense increased \$6.6 million, or 8.0%, for the three months ended June 30, 2018 compared to the three months ended June 30, 2017, primarily due to increases of (i) \$4.6 million in maintenance and outage costs related to Newman Units 2 and 4 and Rio Grande Unit 8, and (ii) \$1.9 million related to energy efficiency program costs previously offset by the related revenues prior to the adoption of ASU 2014-09. These increases were partially offset by a \$1.4 million decrease in outage costs incurred at Newman Unit 5 during the three months ended June 30, 2017.

Operations and maintenance expense increased \$7.6 million, or 4.7%, for the six months ended June 30, 2018 compared to the six months ended June 30, 2017, primarily due to increases of (i) \$4.1 million in outage costs at Rio Grande Unit 8, (ii) \$3.8 million related to energy efficiency program costs previously offset by the related revenues prior to the adoption of ASU 2014-09, and (iii) \$1.9 million in Four Corners operating expenses due to an adjustment in estimated pension and benefit costs and post-closing purchase price adjustments recorded in the six months ended June 30, 2017. These increases were partially offset by a \$3.3 million net reduction in maintenance and outage costs at Newman during the six months ended June 30, 2017.

Operations and maintenance expense increased \$6.8 million, or 2.1%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to increases of (i) \$3.8 million related to energy efficiency program costs previously offset by the related revenues prior to the adoption of ASU 2014-09, (ii) \$3.7 million in outage costs at Rio Grande Unit 8, and (iii) \$0.9 million in Four Corners operating expenses due to a post-closing purchase price adjustment recorded in the twelve months ended June 30, 2017. These increases were partially offset by a \$3.1 million net reduction in maintenance and outage costs at Newman during the twelve months

ended June 30, 2017.

Depreciation and amortization expense

Depreciation and amortization expense increased \$1.5 million, or 6.5%, and \$3.3 million, or 7.5% for the three and six months ended June 30, 2018 compared to the three and six months ended June 30, 2017, primarily due to increased plant balances.

Depreciation and amortization expense increased \$12.6 million, or 15.4%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to (i) increased plant balances and (ii) approximately \$5.0

45

---

million of depreciation reduction for the first half of 2016, which was recognized when the 2016 PUCT Final Order was approved in August 2016.

#### Taxes other than income taxes

Taxes other than income taxes remained relatively unchanged for the three and six months ended June 30, 2018 compared to the three and six months ended June 30, 2017. Taxes other than income taxes increased \$2.4 million, or 3.5%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to increased property valuations in Texas and New Mexico.

#### Other income (deductions)

Other income (deductions) decreased \$0.9 million, or 7.0%, for the three months ended June 30, 2018 compared to the three months ended June 30, 2017, primarily due to a \$1.9 million decrease in realized and unrealized net gains on securities held in the NDT, partially offset by a \$0.7 million increase in the expected return on benefit plan assets.

Other income (deductions) decreased \$4.6 million, or 19.8%, for the six months ended June 30, 2018 compared to the six months ended June 30, 2017, primarily due to a \$6.5 million decrease in realized and unrealized net gains on securities held in the NDT, partially offset by a \$1.3 million increase in the expected return on benefit plan assets.

Other income (deductions) decreased \$5.6 million, or 12.9%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to (i) a \$7.2 million decrease in realized and unrealized net gains on securities held in the NDT, and (ii) a \$ 1.0 million decrease in the AEFUDC resulting from lower average balances of construction work in progress ("CWIP") and a reduction in the AEFUDC rate. These decreases were partially offset by a \$1.5 million increase in the expected return on benefit plan assets.

See Note A, Principles of Preparation - New Accounting Standards Adopted, for additional information.

#### Interest charges (credits)

Interest charges (credits) remained relatively unchanged for the three and six months ended June 30, 2018 compared to the three and six months ended June 30, 2017. Interest charges (credits) increased by \$0.8 million, or 1.0%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to (i) an increase in short-term borrowings for working capital purposes and (ii) decreased allowance for borrowed funds used during construction ("ABFUDC") as a result of lower average balances of CWIP and a reduction in the ABFUDC rate. These increases were partially offset by a decrease due to the retirement at maturity of the \$50.0 million Series B 4.47% Senior Notes during the third quarter of 2017.

#### Income tax expense

Income tax expense decreased \$9.0 million, or 45.6%, and \$9.8 million, or 55.9%, for the three and six months ended June 30, 2018, respectively. The decreases compared to the three and six months ended June 30, 2017, are primarily due to decreases in pre-tax income and a decrease in the federal income tax rate.

Income tax expense decreased \$21.9 million, or 34.7%, for the twelve months ended June 30, 2018 compared to the twelve months ended June 30, 2017, primarily due to (i) a decrease in pre-tax income, (ii) a decrease in the federal income tax rate, and (iii) a decrease in state income taxes.

#### New Accounting Standards

See Notes to Financial Statements Note A for a discussion of new accounting standards.

#### Inflation

For the last several years, inflation has been relatively low and, therefore, has had minimal impact on our results of operations and financial condition.

### Liquidity and Capital Resources

We continue to maintain a strong capital structure in which common stock equity represented 43.7% of our capitalization (common stock equity, long-term debt, current maturities of long-term debt and short-term borrowings under the RCF) as of June 30, 2018. At June 30, 2018, we had a balance of \$11.9 million in cash and cash equivalents. Based on current projections, we believe that we will have adequate liquidity through our current cash balances, cash from operations and available borrowings under the RCF to meet all of our anticipated cash requirements for the next twelve months.

Our principal liquidity requirements in the near-term are expected to consist of capital expenditures to expand and support electric service obligations, expenditures for nuclear fuel inventory, interest payments on our indebtedness, cash dividend payments, operating expenses including fuel costs, maintenance costs, cyber-security, security, compliance initiatives and taxes.

**Capital Requirements.** During the six months ended June 30, 2018, our primary capital requirements were for the construction and purchase of electric utility plant, payment of common stock dividends and purchases of nuclear fuel. Capital expenditures for new electric utility plant were \$117.3 million in the six months ended June 30, 2018 compared to \$108.1 million in the six months ended June 30, 2017. Capital expenditures for 2018 are expected to be approximately \$236 million. Capital requirements for purchases of nuclear fuel were \$18.9 million in the six months ended June 30, 2018 compared to \$20.6 million in the six months ended June 30, 2017.

On June 29, 2018, we paid a quarterly cash dividend of \$0.36 per share, or \$14.6 million, to shareholders of record as of the close of business on June 15, 2018. We paid a total of \$28.3 million in cash dividends during the six months ended June 30, 2018. At the current dividend rate, we expect to pay cash dividends of approximately \$57.6 million during 2018. In addition, while we do not currently anticipate repurchasing shares of our common stock in 2018, we may repurchase shares of our common stock in the future. Under our repurchase program, purchases can be made at open market prices or in private transactions, and repurchased shares are available for issuance under employee benefit and stock incentive plans, or may be retired. No shares of common stock were repurchased during the six months ended June 30, 2018. As of June 30, 2018, a total of 393,816 shares remain eligible for repurchase under the repurchase program.

We expect to continue to maintain a prudent level of liquidity and monitor market conditions for debt and equity securities. Our liquidity needs can fluctuate quickly based on fuel prices and other factors and we are continuing to make investments in new electric plant and other assets in order to reliably serve our customers.

Our cash requirements for federal and state income taxes vary from year to year based on taxable income, which is influenced by the timing of revenues and expenses recognized for income tax purposes. The following summary describes the major impacts of the TCJA on our liquidity. We continue to evaluate the TCJA and have made assumptions based on information currently available.

The TCJA discontinued bonus depreciation for regulated utilities which reduced tax deductions previously available to us for 2017, 2018 and 2019. The decrease in tax deductions will result in the utilization of our net operating loss carryforwards ("NOL carryforwards") approximately two years earlier than previously anticipated and is expected to result in higher income tax payments beginning in 2019, after the full utilization of NOL carryforwards. However, due to the lower federal corporate income tax rate enacted by the TCJA, our future federal corporate income tax payments will be made at the reduced rate of 21% beginning in 2018. Due to NOL carryforwards, minimal tax payments are expected for 2018, which are mostly related to state income taxes.

The effect of the TCJA on our rates will be beneficial to our customers. Following the enactment of the TCJA and the reduction of the federal corporate income tax rate, revenues collected from our customers in 2018 are reduced in an amount that approximates the savings in tax expense. This reduction in revenues is expected to negatively impact our cash flows by approximately \$26 million to \$31 million during 2018.

We continually evaluate our funding requirements related to our retirement plans, other post-retirement benefit plans and the NDT. During the six months ended June 30, 2018, we contributed \$5.8 million and \$0.2 million to our retirement plans and other post-retirement benefits plan, respectively, and \$1.1 million to the NDT. We are in compliance with the funding requirements of the federal government for our benefit plans. In addition, with respect to our nuclear plant decommissioning trust, we are in compliance with the funding requirements of the federal law and

the ANPP Participation Agreement. We will continue to review our funding for these plans in order to meet our future obligations.

Capital Resources. Cash provided by operations, \$74.4 million for the six months ended June 30, 2018 and \$68.0 million for the six months ended June 30, 2017, is a significant source for funding capital requirements. A component of cash flows from operations is the change in net over-collection and under-collection of fuel revenues. The difference between fuel revenues collected and fuel expense incurred is deferred to be either refunded (over-recoveries) or surcharged (under-recoveries) to customers in the future. During the six months ended June 30, 2018, we had fuel over-recoveries of \$1.0 million compared to over-recoveries of

fuel costs of \$2.7 million during the six months ended June 30, 2017. At June 30, 2018, we had a net fuel over-recovery balance of \$7.2 million, including an over-recovery of \$8.2 million in Texas and an under-recovery of \$1.0 million in New Mexico. On April 13, 2018, we filed a request with the PUCT to decrease our Texas fixed fuel factor by approximately 29% to reflect decreased fuel expenses primarily related to a decrease in the price of natural gas used to generate power. On April 25, 2018, the Company's proposed fuel factors were approved on an interim basis effective for the first billing cycle of the May 2018 billing month. The revised factor was approved by the PUCT and the docket closed on May 22, 2018. The Texas fixed fuel factor will continue thereafter until changed by the PUCT.

We maintain the RCF for working capital and general corporate purposes and financing of nuclear fuel through the RGRT. The RGRT, the trust through which we finance our portion of nuclear fuel for Palo Verde, is consolidated in our financial statements. The RCF has a term ending on January 14, 2020. The maximum aggregate unsecured borrowing currently available under the RCF is \$350.0 million. We may increase the RCF by up to \$50.0 million (to a total of \$400.0 million) during the term of the RCF, upon the satisfaction of certain conditions more fully set forth in the agreement, including obtaining commitments from lenders or third party financial institutions. We also have the option to extend the term of the RCF by one additional year to January 14, 2021, in accordance with the terms of the agreement. The total amount borrowed for nuclear fuel by the RGRT, excluding debt issuance costs, was \$134.4 million at June 30, 2018, of which \$24.4 million had been borrowed under the RCF, and \$110.0 million was borrowed through the issuance of senior notes. Borrowings by the RGRT for nuclear fuel, excluding debt issuance costs, were \$133.9 million as of June 30, 2017, of which \$38.9 million had been borrowed under the RCF and \$95.0 million was borrowed through the issuance of senior notes. Interest costs on borrowings to finance nuclear fuel are accumulated by the RGRT and charged to us as fuel is consumed and recovered through fuel recovery charges. At June 30, 2018, \$56.0 million was outstanding under the RCF for working capital and general corporate purposes, which may include funding capital expenditures. At June 30, 2017, \$140.0 million was outstanding under the RCF for working capital and general corporate purposes. Total aggregate borrowings under the RCF at June 30, 2018 were \$80.4 million with an additional \$269.5 million available to borrow.

We received approval from the NMPRC on October 7, 2015, to guarantee the issuance of up to \$65.0 million of long-term debt by the RGRT to finance future purchases of nuclear fuel and to refinance existing nuclear fuel debt obligations. We received additional approval from the NMPRC on October 4, 2017 to amend and extend the RCF, issue up to \$350.0 million in long-term debt and to redeem and refinance the \$63.5 million 2009 Series A 7.25% Pollution Control Bonds and the \$37.1 million 2009 Series B 7.25% Pollution Control Bonds, which are subject to optional redemption in 2019. The NMPRC approval to issue up to \$350.0 million in long-term debt supersedes its prior approval. We requested similar approval from the FERC on September 1, 2017 and received approval on October 31, 2017. The FERC approval also included permission to guarantee the issuance of up to \$65.0 million of long-term debt by the RGRT and to continue to utilize our existing RCF with the ability to amend and extend the RCF at a future date. The authorization approved by the FERC is effective from November 15, 2017 through November 14, 2019 and supersedes its prior approvals. Under these authorizations, on June 28, 2018, the Company issued \$125 million in aggregate principal amount of 4.22% Senior Notes due August 15, 2028 and guaranteed the issuance by the RGRT of \$65 million in aggregate principal amount of 4.07% Senior Notes due August 15, 2025. The net proceeds from the sale of these senior notes were used to repay outstanding short-term borrowings under the RCF.

#### Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk due to changes in interest rates, equity prices and commodity prices. See the 2017 Form 10-K, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," for a complete discussion of the market risks we face and our market risk sensitive assets and liabilities. As of June 30, 2018, there have been no material changes in the market risks we face or the fair values of assets and liabilities disclosed in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," in the 2017 Form 10-K.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Under the supervision and with the participation of our management, including our chief executive officer and our chief financial officer, we conducted an evaluation pursuant to Rule 13a-15(b) under the Exchange Act of our disclosure controls and procedures as defined in Rule 13a-15(e) under the Exchange Act. Based on that evaluation, our chief executive officer and our chief financial officer concluded that, as of June 30, 2018, our disclosure controls and procedures are effective.

Changes in internal control over financial reporting. There were no changes in our internal control over financial reporting in connection with the evaluation required by paragraph (d) of the Exchange Act Rules 13a-15 or 15d-15, that occurred during the quarter ended June 30, 2018, that materially affected, or that were reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

## Item 1. Legal Proceedings

We hereby incorporate by reference the information set forth in Part I of this report under Notes D and I of the Notes to Financial Statements.

## Item 1A. Risk Factors

Our 2017 Form 10-K and our Quarterly Report on Form 10-Q for the quarter ended March 30, 2018 include a detailed discussion of our risk factors.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

## (c) Issuer Purchases of Equity Securities.

Period	Total Number of Shares Purchased	Average Price Paid per Share (Including Commissions)	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 to April 30, 2018	—	\$	—	393,816
May 1 to May 31, 2018	—	—	—	393,816
June 1 to June 30, 2018	—	—	—	393,816

## Item 5. Other Information

Investors should note that we announce material financial information in SEC filings, press releases and public conference calls. Based on new guidance from the SEC, we may also use the Investor Relations section of our website ([www.epelectric.com](http://www.epelectric.com)) to communicate with investors about our company. It is possible that the financial and other information we post there could be deemed to be material information. The information on our website is not part of this document.

Item 6. Exhibits

Exhibit  
Number Exhibit

- 10.01\* Form of Restricted Stock Award Agreement (for non-employee directors) between the Company and certain directors of the Company. (Identical in all material respects to Exhibit 10.5 to the Company's Current Report on Form 8-K, filed on February 5, 2018).
- 10.02 Amendment dated June 29, 2018, to the Franchise Agreement between the Company and the City of El Paso, dated July 12, 2005.
- 10.03\* Note Purchase Agreement, dated as of June 28, 2018, between El Paso Electric Company, Rio Grande Resources Trust II and the purchasers named therein. (Exhibit 10.1 to the Company's Current Report Form 8-K, filed on June 29, 2018).
- 10.04\* Note Purchase Agreement, dated as of June 28, 2018, between El Paso Electric Company and the purchasers named therein. (Exhibit 10.2 to the Company's Current Report Form 8-K, filed on June 29, 2018).
- 15 Letter re Unaudited Interim Financial Information
- 31.01 Certifications pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 32.01 Certifications pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
