---

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes \_\_\_ No X

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes \_\_\_ No X

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes X No \_\_\_

Indicate by check mark if disclosure of delinquent filers, pursuant to Item 405 of Regulation S-K, {section}229.405 of this Chapter, is not contained, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this 10-K or any amendment to the Form 10-K. ☒

## Edgar Filing: FONAR CORP - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐  
Non-accelerated filer ☐ Smaller reporting company ☒

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the shares of Common Stock held by non-affiliates as of December 31, 2008 based on the closing price of \$0.83 per share on such date as reported on the NASDAQ System, was approximately \$4.0 million. The other outstanding classes do not have a readily determinable market value.

As of September 30, 2009, 4,906,275 shares of Common Stock, 158 shares of Class B Common Stock, 382,513 shares of Class C Common Stock and 313,451 shares of Class A Non-voting Preferred Stock of the registrant were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE  
None

### PART I ITEM 1. BUSINESS GENERAL

Fonar Corporation, sometimes referred to as the "Company" or "Fonar", is a Delaware corporation which was incorporated on July 17, 1978. Our address is 110 Marcus Drive, Melville, New York 11747 and our telephone number is 631-694-2929. Fonar also maintains a WEB site at [www.Fonar.com](http://www.Fonar.com). Fonar provides copies of its filings with the Securities and Exchange Commission on Forms 10-K, 10-Q and 8-K and amendments to these reports to stockholders on request.

We conduct our business in two segments. The first, conducted directly through Fonar, is referred to as our medical equipment segment. The second, conducted through our wholly owned subsidiary Health Management Corporation of America, is referred to as the physician management and diagnostic services segment.

#### MEDICAL EQUIPMENT SEGMENT

Fonar is engaged in the business of designing, manufacturing, selling and servicing magnetic resonance imaging, also referred to as "MRI" or "MR", scanners which utilize MRI technology for the detection and diagnosis of human disease. Fonar's founders built the first scanner in 1977 and Fonar introduced the first commercial MRI scanner in 1980. Fonar is the originator of the iron-core non-superconductive and permanent magnet technology.

Fonar's iron frame technology made Fonar the originator of "open" MRI scanners. We introduced the first "open" MRI in 1980. Since that time we have concentrated on further application of our "open" MRI, introducing most recently the Upright(R) Multi-Position(TM) MRI scanner (also referred to as the "Upright(R)" or "Stand-Up(R)" MRI scanner) and the Fonar 360(TM) MRI scanner.

The product we are now most vigorously promoting is our Upright(R) MRI. The Upright(R) MRI is unique in the industry in that it allows patients to be scanned in a fully weight-bearing condition, such as standing, sitting or bending in any position that causes symptoms. This means that an abnormality or injury, such as a slipped disk can be visualized where it may not be visualized with the patient lying down. We are introducing the name "Upright(R)" as an

## Edgar Filing: FONAR CORP - Form 10-K

alternative to "Stand-UP(R)" because of the multiplicity of positions in which the patient may be scanned where the patient is not standing.

### PHYSICIAN MANAGEMENT AND DIAGNOSTIC SERVICES SEGMENT

Health Management Corporation of America, which we sometimes refer to as "HMCA", was formed by Fonar in March 1997 as a wholly-owned subsidiary in order to enable us to expand into the business of providing comprehensive management services to medical providers. HMCA provides management services, administrative services, office space, equipment, repair, maintenance service and clerical and other non-medical personnel to medical providers. Since July 28, 2005, following the sale of HMCA's physical therapy and rehabilitation business, HMCA has elected to provide its services solely to diagnostic imaging centers.

See Note 20 to the Consolidated Financial Statements for separate financial information respecting our medical equipment and physician and diagnostic management services segments.

### FORWARD LOOKING STATEMENTS.

Certain statements made in this Annual Report on Form 10-K are "forward-looking statements", within the meaning of the Private Securities Litigation Reform Act of 1995, regarding the plans and objectives of Management for future operations. Such statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. These forward-looking statements are based on current expectations that involve numerous risks and uncertainties. Our plans and objectives are based, in part, on assumptions involving the expansion of business. These assumptions involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond our control. Although we believe that our assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate and, therefore, there can be no assurance that the forward-looking statements included in this Annual Report will prove to be accurate. In light of the significant uncertainties inherent in our forward-looking statements, the inclusion of such information should not be regarded as a representation by us or any other person that our objectives and plans will be achieved.

### RECENT DEVELOPMENTS AND OVERVIEW.

Our products and works-in-progress are intended to significantly improve our competitive position. Our current products are the Upright(R) MRI and the Fonar 360(TM).

The Upright(R) MRI permits, for the first time, MRI diagnoses to be made in the weight-bearing state. The Upright(R) MRI is the only MRI scanner which allows patients to be scanned while standing, sitting or reclining, either horizontally or at an angle. This means that an abnormality or injury, such as a slipped disk, will be able to be scanned under full weight-bearing conditions and, more often than not, in the position in which the patient experiences pain. A patient handling system built into the floor brings the patients to the desired height in the scanner. An adjustable bed allows the patients to stand, sit or lie on their backs, sides or stomachs at any angle. The Upright(R) MRI may also be useful for MRI guided interventional procedures.

More recently a new application of the Fonar Upright(R) technology is in the evaluation and diagnosis of patients with the Arnold-Chiari syndrome believed to affect from 200,000 to 500,000 Americans. In this syndrome brain stem compression and entrapment of the brain at the base of the skull in the foramen

## Edgar Filing: FONAR CORP - Form 10-K

magnum, which is the circular bony opening at the base of the skull where the spinal cord exits the skull. Classic symptoms of the Chiari syndrome include the "drop attack", where the erect patient unexpectedly experiences an explosive rush or nervous discharge at the base of the brain which rushes down the body to the extremities, causing the patient to collapse in a transient neuromuscular paralysis which then subsides when the patient is in a horizontal position.

The Fonar Upright(R) MRI has recently demonstrated its key value on two patients with Chiari syndrome establishing that the conventional lie- down MRI scanners cannot make an adequate evaluation of their pathology since the patient's pathology is most visible and symptoms are most acute when the patient is upright. It is critical to have an image of the patient in an upright position so that the neurosurgeons can fully evaluate the extent of the brain stem compression which is occurring so they can choose the most appropriate surgical approach for the operative repair.

Another milestone in the sale and utilization of Fonar's Upright(R) technology is the sale in September, 2006 of an Upright(R) MRI scanner to the largest orthopedic hospital in the Netherlands, the St. Maartenskliniek. St. Maartenskliniek has over 300 in- patient beds and an extensive outpatient clinic program that diagnosis and treats 25,000 patients with orthopedic problems annually. In placing their order, St. Maartenskliniek announced from the point of view of their internationally recognized "Spine Center" that "once Fonar made available upright weight-bearing MRI imaging technology, owning one for the St. Maartenskliniek "Spine Center" was not optional but mandatory. For our hospital to continue to engage in spine surgery without it, once this new technology became available, was unacceptable. Once the means were available to make certain we were getting the complete picture of the patient's spine pathology before undertaking surgery, so that we could be certain we were not performing surgery based on a wrong diagnosis and running the risk of doing the wrong surgery, we did not regard the utilization of this new technology, from our patient's perspective as optional. It was mandatory."

We are vigorously promoting sales of the Upright(R) MRI which we regard as our most promising product. The market for the Upright(R) shows strong progress. Revenues recognized from the sale of Upright(R) MRI scanners increased in fiscal 2009 by 48.3% over fiscal 2008 from approximately \$11.2 million in fiscal 2008 to approximately \$16.6 million in fiscal 2009. The following chart shows the revenues attributable to our different model scanners for the fiscal years ended June 30, 2008 and June 30, 2009. Note that we recognize revenue on a percentage of completion basis. Accordingly, revenue is recognized as each sub-assembly of a scanner is manufactured. Consequently the revenues for a fiscal period do not necessarily relate to orders placed in that period.

Model	Revenues Recognized	
	Fiscal 2008	Fiscal 2009
-----	-----	-----
Upright (R)	\$11,203,688	\$16,617,352
Fonar 360 (TM)	\$ 0	\$ 0
Other	\$ 0	\$ 65,965

The Fonar 360(TM) includes the Open Sky(TM) MRI. We received our first order for a Fonar 360(TM) scanner in the first quarter of fiscal 2005. The magnet frame is incorporated into the floor, ceiling and sidewalls of the scan room and is open. Consequently, physicians and family members can walk inside the magnet to approach the patient. The Open Sky(TM) version of the Fonar 360(TM) is decoratively designed so that it is incorporated into the panoramic landscape that decorates the walls of the scan room. The ability of the Fonar 360(TM) to give physicians direct 360 degree access to patients and the availability of MRI compatible interventional instruments such as needles, catheters, probes, scalpels and forceps, will also enable the Fonar 360(TM) to be used for image guided interventions.

## Edgar Filing: FONAR CORP - Form 10-K

Fonar's showcase installation of the first Fonar 360(TM) MRI scanner was completed at the Oxford Nuffield Orthopedic Center in Oxford, United Kingdom. Oxford-Nuffield had two objectives in the choice of the Fonar 360(TM) MRI. The first was to have an open mid-field MRI imaging scanner to meet their medical imaging needs. The second was to have an open scanner that would enable direct image guided surgical intervention. The Oxford-Nuffield scanner is carrying a full diagnostic imaging load daily.

Additionally, development of the works in progress Fonar 360(TM) MRI image guided interventional technology is actively progressing. Fonar software engineers have completed and installed their 2nd generation tracking software at Oxford-Nuffield which is designed to enable the surgeons to insert needles into the patient and accurately advance them under direct visual image guidance to the target tissue, such as a tumor, so that therapeutic agents can be injected.

Health Management Corporation of America ("HMCA"), a wholly-owned subsidiary of Fonar, currently is managing 10 diagnostic imaging centers located principally in New York and Florida.

### MEDICAL EQUIPMENT SEGMENT

#### PRODUCTS

Fonar's principal products are the Upright(R) MRI and the Fonar 360(TM).

The Upright(R) MRI is a whole-body open MRI system that enables positional MRI (pMRI(R)) applications, such as weight-bearing MRI studies. Operating at a magnetic field strength of 0.6 Tesla, the scanner is a powerful, diagnostically versatile and cost-effective open MRI that provides a broad range of clinical capabilities and a complete set of imaging protocols. Patients can be scanned standing, bending, sitting, upright at an intermediate angle or in any of the conventional recumbent positions. This multi-positional MRI system accommodates an unrestricted range of motion for flexion, extension, lateral bending, and rotation studies of the cervical (upper) and lumbar (lower) spine. Previously difficult patient scanning positions can be achieved using the system's MRI-compatible, three-dimensional, motorized patient handling system. Patients, lying horizontally, are placed into the magnet in the conventional manner. The system's lift and tilt functions then deliver the targeted anatomical region to the center of the magnet. The ceiling and floor are recessed to accommodate the full vertical travel of the table. True image orientation is assured, regardless of the rotation angle, via computer read-back of the table's position. Spines and extremities can be scanned in weight-bearing states; brains can be scanned with patients either standing or sitting.

Recently, this capability of the Fonar Upright(R) technology has demonstrated its key value on patients with the Arnold-Chiari syndrome, which is believed to affect 200,000 to 500,000 Americans. In this syndrome, brain stem compression and subsequent severe neurological symptoms occur in these patients, when because of weakness in the support tissues within the skull, the brain stem descends and is compressed at the base of the skull in the foramen magnum, which is the circular bony opening at the base of the skull where the spinal cord exits the skull. Conventional lie-down MRI scanners cannot make an adequate evaluation of the pathology since the patient's pathology is most visible and the symptoms most acute when the patient is scanned in the upright weight-bearing position.

The Upright(R) MRI has also demonstrated its value for patients suffering from scoliosis. Scoliosis patients have been typically subjected to routine x-ray exams for years and must be imaged upright for an adequate evaluation of their scoliosis. Because the patient must be standing for the exam, an x-ray machine has been the only modality that could provide that service. The Upright(R) MRI,

## Edgar Filing: FONAR CORP - Form 10-K

is the only MRI scanner which allows the patient to stand during the MRI exam. Fonar has developed a new RF receiver and scanning protocol that for the first time allows scoliosis patients to obtain diagnostic pictures of their spines without the risks of x-rays. A recent study by the National Cancer Institute (2000) of 5,466 women with scoliosis reported a 70% increase in breast cancer resulting from 24.7 chest x-rays these patients received on the average in the course of their scoliosis treatment.

The Upright(R) MRI is exceptionally open, making it the most non-claustrophobic whole-body MRI scanner. Patients can walk into the magnet, stand or sit for their scans and then walk out. From the patient's point of view, the magnet's front-open and top-open design provides an unprecedented degree of comfort because the scanner allows the patient an unobstructed view of the scanner room from inside the magnet, and there is nothing in front of one's face or over one's head. The only thing in front of the patient's face during the scan is a very large (42") panoramic TV (included with the scanner) mounted on the wall. The bed is tilted back five degrees to stabilize a standing patient. Special coil fixtures, a patient seat, Velcro straps, and transpolar stabilizing bars are available to keep the patient comfortable and motionless throughout the scanning process.

Full-range-of-motion studies of the joints in virtually any direction will be possible, an especially promising feature for sports injuries. Full range of motion cines, or movies, of the lumbar spine will be achieved under full body weight.

The Upright(R) MRI will also be useful for MRI guided interventional procedures as the physician would have unhindered access to the patient with no restrictions in the vertical direction.

This easy-entry, mid-field-strength scanner should be ideal for trauma centers where a quick MRI screening within the first critical hour of treatment will greatly improve patients' chances for survival and optimize the extent of recovery.

The Fonar 360(TM) is an enlarged room sized magnet in which the floor, ceiling and walls of the scan room are part of the magnet frame. This is made possible by Fonar's patented Iron-Frame(TM) technology which allows our engineers to control, contour and direct the magnet's lines of flux in the patient gap where wanted and almost none outside of the steel of the magnet where not wanted. Consequently, this scanner allows 360 degree access to the patient, and physicians and family members are able to enter the scanner and approach the patient.

The Fonar 360(TM) is presently marketed as a diagnostic scanner and is sometimes referred to as the Open Sky(TM) MRI. In its Open Sky(TM) capacity, the Fonar 360(TM) serves as an open patient-friendly scanner which allows 360 degree access to the patient on the scanner bed.

To optimize the patient-friendly character of the Open Sky(TM) MRI, the walls, floor, ceiling and magnet poles are decorated with landscape murals. The patient gap is twenty inches and the magnetic field strength is 0.6 Tesla.

We also expect to enable the Fonar 360(TM) to function as an MRI guided interventional scanner, for the purpose of performing intra-operative, interventional and therapeutic procedures with MR compatible instrumentation. In this capacity, the enlarged room sized magnet and 360 degree access to the patient afforded by the Fonar 360(TM) would permit full-fledged support teams to walk into the magnet and perform MRI guided interventions on the patient inside the magnet. Most importantly, the exceptional quality of the MRI image and its exceptional capacity to exhibit tissue detail on the image, by virtue of the nuclear resonance signal's extraordinary capacity to create image contrast, can

## Edgar Filing: FONAR CORP - Form 10-K

then be obtained very near real time to guide the physician during the MRI guided intervention. Thus MRI compatible instruments, needles, catheters, endoscopes and the like can be introduced directly into the human body and guided to the malignant lesion or other pathology by means of the MRI image. Surgically inoperable lesions could be accessed through MRI guided catheters and needles making it possible to deliver the treatment agent directly to the targeted tissue.

The first Fonar 360(TM) MRI scanner, installed at the Oxford-Nuffield Orthopedic Center in Oxford, United Kingdom, is now carrying a full diagnostic imaging caseload. In addition, however, development of the works in progress Fonar 360(TM) MRI image guided interventional technology is actively progressing. Fonar software engineers have completed and installed their 2nd generation tracking software at Oxford-Nuffield which is designed to enable the surgeons to insert needles into the patient and accurately advance them, under direct visual image guidance, to the target tissue, such as a tumor, so that therapeutic agents can be injected.

With current treatment methods, such as chemotherapy taken by mouth, the therapy must always be restricted in the doses that can be applied to the malignant tissue because of the adverse effects on the healthy tissues. Thus chemotherapies must be limited at the first sign of toxic side effects. The same is the case with radiation therapy. Fonar expects that with the Fonar 360(TM) treatment agents may be administered directly to the malignant tissue through small catheters or needles, thereby allowing much larger doses of chemotherapy, x-rays, laser ablation, microwave and other anti-neoplastic agents to be applied directly and exclusively to the malignant tissue with more effective results. Since the interventional procedure of introducing a treatment needle or catheter under image guidance will be minimally invasive, the procedure can be readily repeated should metastases occur elsewhere, with minimum impact on the patient beyond a straightforward needle injection. The presence of the MRI image during treatment would enable the operator to make assessments during treatment whether the treatment is being effective.

In addition to the patient comfort and new applications, such as MRI directed interventions, made possible by our scanners' open design, the Upright(R) and Fonar 360(TM) scanners are designed to maximize image quality through an optimal combination of signal-to-noise (S/N) and contrast-to-noise (C/N) ratios. The technical improvements realized in these scanners' design over their predecessors also include increased image- processing speed and diagnostic flexibility.

MRI directed interventions are made possible by the scanners' ability to supply images to a monitor positioned next to the patient, enabling the operator to view in process an interventional procedure from an unlimited number of angles. The openness of Fonar's scanners would enable a physician to perform a wide range of interventional procedures inside the magnet.

In the case of breast imaging the access by a physician permits an image guided biopsy to be performed easily which is essential once suspicious lesions are spotted by any diagnostic modality. In addition to being far superior to x-ray in detecting breast lesions because of the MRI's ability to create the soft tissue contrast needed to see them, where x-ray is deficient in its ability to generate the needed contrast between cancer and normal tissue, there is not the painful compression of the breast characteristic of X-ray mammography.

The Upright(R) MRI and Fonar 360(TM) scanners share much of the same fundamental technology and offer the same speed, precision and image quality. Fonar's scanners initiated the new market segment of high-field open MRI in which the Fonar Upright(R) MRI is one of the market leaders. High-field open MRIs operate at significantly higher magnetic field strengths and, therefore, produce more of the MRI image-producing signal needed to make high-quality MRI images (measured

## Edgar Filing: FONAR CORP - Form 10-K

by signal-to-noise ratios, S/N).

The Upright(R) MRI and Fonar 360(TM) scanners utilize a 6000 gauss (0.6 Tesla field strength) iron core electromagnet. The greater field strength of the 6000 gauss magnet, as compared to lower field open MRI scanners that operate at 3,000 gauss (0.3 Tesla) when enhanced by the electronics already utilized by Fonar's scanners, produces images of higher quality and clarity. Fonar's 0.6 Tesla open scanner magnets are among the highest field "open MRI" magnets in the industry.

The Upright(R) MRI and Fonar 360(TM) scanners are designed to maximize image quality through an optimal combination of signal-to-noise (S/N) and contrast-to-noise (C/N) ratios. The technical improvements realized in the scanners' design over their lower field predecessors also include increased image-processing speed and diagnostic flexibility.

Several technological advances have been engineered into the Upright(R) MRI and Fonar 360(TM) scanners for extra improvements in S/N, including: new high-S/N Organ Specific(TM) receiver coils; new advanced front-end electronics featuring high-speed, wide-dynamic-range analog-to-digital conversion and a miniaturized ultra-low-noise pre-amplifier; high-speed automatic tuning, bandwidth-optimized pulse sequences, multi-bandwidth sequences, and off-center FOV imaging capability.

In addition to the signal-to-noise ratio, however, the factor that must be considered when it comes to image quality is contrast, the quality that enables reading physicians to clearly distinguish adjacent, and sometimes minute, anatomical structures from their surroundings. This quality is measured by contrast-to-noise ratios (C/N). Unlike S/N, which increases with increasing field strength, relaxometry studies have shown that C/N peaks in the mid-field range and actually falls off precipitously at higher field strengths. The Upright(R) MRI and Fonar 360(TM) scanners operate squarely in the optimum C/N range.

The Upright(R) MRI and Fonar 360(TM) provide various features allowing for versatile diagnostic capability. For example, SMART(TM) scanning allows for same-scan customization of up to 63 slices, each slice with its own thickness, resolution, angle and position. This is an important feature for scanning parts of the body that include small-structure sub-regions requiring finer slice parameters. There is also Multi-Angle Oblique(TM) (MAO) imaging, and oblique imaging.

The console for these scanners includes a mouse-driven, multi-window interface for easy operation and a 19-inch, 1280 x 1024-pixel, 20-up, high-resolution image monitor with features such as electronic magnifying glass and real-time, continuous zoom and pan.

Prior to the introduction of the Upright(R) MRI and Fonar 360(TM) QUAD(TM) scanner, the Ultimate(TM) 7000 scanner and the Beta(TM) scanner. The Beta(TM) 3000 scanner utilized a permanent magnet and the Beta(TM) earlier Fonar's products included the 3000M scanner utilized an iron core electromagnet. All of our current and earlier model scanners create cross-sectional images of the human body.

During fiscal 2009, sales of our Upright(R) MRI scanners accounted for approximately 41.8% of our total revenues and 56.4% of our medical equipment revenues, as compared to 31.5% of total revenues and 47.6% of medical equipment revenues in fiscal 2008. These sales show the market penetration being achieved by the Upright(R) MRI scanner.

During fiscal 2009 and fiscal 2008, we had no revenues attributable to sales of our Fonar 360(TM) scanner.

## Edgar Filing: FONAR CORP - Form 10-K

Our principal selling, marketing and advertising efforts have been focused on the Upright(R) MRI, which we believe is a particularly unique product, being the only MRI scanner which is both open and allows for weight bearing imaging. Since we perceive that the Upright(R) MRI is successfully penetrating the market and enabled us to achieve profitability in fiscal 2009, we expect to continue our focus on the Upright(R) MRI in the immediate future, notwithstanding the losses incurred in fiscal 2008. We are optimistic that the Fonar 360(TM) and our other products and works in progress will also contribute to increased product sales.

The materials and components used in the manufacture of our products (circuit boards, computer hardware components, electrical components, steel and plastic) are generally available at competitive prices. We have not had difficulty acquiring such materials.

### WORKS-IN-PROGRESS

All of our products and works-in-progress seek to bring to the public MRI products that are expected to provide important advances against serious disease.

MRI takes advantage of the nuclear resonance signal elicited from the body's tissues and the exceptional sensitivity of this signal for detecting disease. Much of the serious disease of the body occurs in the soft tissue of vital organs. The principal diagnostic modality currently in use for detecting disease, as in the case of x-ray mammography, are diagnostic x-rays. X-rays discriminate soft tissues, such as healthy breast tissue and cancerous tissue poorly, because the x-ray particle traverses the various soft tissues almost equally thereby causing target films to be nearly equally exposed by x-rays passing through adjacent soft tissues and creating healthy and cancerous shadows on the film that differ little in brightness. The image contrast between cancerous and healthy breast tissue is poor, making the detection of breast cancers by the x-ray mammogram less than optimal and forcing the mammogram to rely on the presence or absence of microscopic stones called "microcalcifications" instead of being able to "see" the breast cancer itself. If microcalcifications are not present to provide the missing contrast, then the breast cancer goes undetected. They frequently are not present. The maximum contrast available by x-ray with which to discriminate disease is 4%. Brain cancers differ from surrounding healthy brain by only 1.6% while the contrast in the brain by MRI is 25 times greater at 40%. X-ray contrasts among the body's soft tissues are maximally 4%. Their contrast by MRI is 32.5 times greater (130%).

The soft tissue contrasts with which to distinguish cancers on images by MRI are up to 180%. In the case of cancer these contrasts can be even more marked making cancers readily visible and detectable anywhere in the body. This is because the nuclear resonance signals from the body's tissues differ so dramatically. Liver cancer and healthy liver signals differ by 180% for example. Thus there is some urgency to bring to market an MRI based breast scanner that can overcome the x-ray limitation and assure that mammograms do not miss serious lesions. The added benefit of MRI mammography relative to x-ray mammography is the elimination of the need for the patient to disrobe and the painful compression of the breast typical of the x-ray mammogram. The patient is scanned in her street clothes in MRI mammography. Moreover MRI mammogram scans the entire chest wall including the axilla for the presence of nodes which the x-ray mammogram cannot reach.

We view our Upright(R) MRI as having the potential for being an ideal breast examination machine as it permits the patient to be seated for the examination, which would allow easy access for an MRI guided breast biopsy when needed. The Fonar 360(TM) MRI scanner would also be ideal for breast examinations.

### PRODUCT MARKETING

## Edgar Filing: FONAR CORP - Form 10-K

The principal markets for the Company's scanners are private scanning centers and hospitals.

Our internal sales force handles the domestic market, although we also have non-exclusive domestic independent sales representatives. We continue to use independent manufacturer's representatives and distributors for foreign markets. In addition to its internal domestic sales force, Fonar and General Electric Medical Systems, a division of General Electric Company, have entered into an arrangement pursuant to which General Electric Medical Systems is an independent manufacturer's representative for Fonar's Upright(R) MRI scanner in the domestic market as well. Neither General Electric nor any of Fonar's other competitors, however, are entitled to make the Upright(R) MRI scanner. In August 2007, Fonar engaged the services of a second independent sales representative to focus on spine surgeons or groups of spine surgeons pre-approved by Fonar who have a pre-existing relationship with the sales representative.

Fonar's Website includes interactive product information for reaching customers. We plan to commence an online program for providing demonstrations of our products to potential customers on an international basis.

Fonar has exhibited its new products at the annual meeting of the Radiological Society of North America ("RSNA") in Chicago from November 1995 through 2007 and plans to attend RSNA meetings in future years. The RSNA meeting is attended by radiologists from all over the world. Most manufacturers of MRI scanners regularly exhibit at this meeting.

Fonar has targeted orthopedic surgeons and neurosurgeons, particularly spine surgeons, as important markets for the Upright(R) MRI. Accordingly, Fonar has exhibited at annual meetings of The American Academy of Orthopaedic Surgeons (AAOS); the North American Spine Society (NASS); the American Association of Neurological Surgeons (AANS); and the Congress of Neurological Surgeons (CNS). In addition, in 2007, Fonar attended the Global Health Care Expansion Congress and the Abu Dhabi International Surgical Conference abroad.

Fonar's success in targeting surgeons was most evident in the sale, in September 2006, of an Upright(R) MRI scanner to the largest orthopedic hospital in the Netherlands, the St. Maartenskliniek in Nijmegen. In addition to being a key sale to a prestigious hospital, the medical conclusions reached and stated by the buyer and the buyer's intention to conduct research and publish articles concerning the Upright(R) technology, are a vital component to Fonar's objective to prove to the medical community at large, insurers, governmental agencies and others the benefits, if not necessity of Upright(R) scanning. A Director of St. Maartenskliniek and the Chairman of Spine Surgery stated that "We at St. Maartenskliniek, the biggest orthopedic hospital in the Netherlands, are very much looking forward to this new technology from Fonar which will enable us to evaluate the spine anatomy in the fully weight bearing state and in multiple positions. We expect these new multi-position capabilities to lead to more accurate diagnosis and better surgery outcomes for patients. Once our active research program has discovered the benefits of this new Fonar technology for patients, we intend to publish the results in a lot of peer reviewed scientific journals." The Chairman stated further "that once Fonar made available upright weight-bearing MRI imaging technology, owning one for the St. Maartenskliniek "Spine Center" was not optional but mandatory. For our hospital to continue to engage in spine surgery without it, once this new technology became available, was unacceptable".

Fonar's advertising strategy has been designed to reach key purchasing decision makers with information concerning our flagship product, the Upright(R) MRI. This has led to many inquiries and to some sales of the Upright(R) MRI scanner and is intended to increase Fonar's presence in the medical market. Fonar's advertising has been directed at four target audiences: neurosurgeons,

## Edgar Filing: FONAR CORP - Form 10-K

orthopaedic surgeons, radiologists and physicians in general.

1) Neurosurgeons and Orthopaedic Surgeons: These are the surgeons who can most benefit from the superior diagnostic benefits of the Fonar Upright(R) MRI with its Multi-Position(TM) diagnostic ability. Advertisements to them have appeared in the journal Spine, The Journal of Neurosurgery, and the Journal of the American Academy of Orthopedic Surgery.

2) Radiologists: This segment of the campaign is aimed at the physicians who now have a new modality to offer their referring physicians. Our advertisements directed to them have appeared in Radiology and Diagnostic Imaging.

3) All Physicians: These advertising efforts have been directed to the total physician audience, so that the vast number of doctors who send patients for MRI's are aware of the diagnostic advantages of the Fonar Upright(R) Multi-Position(TM) MRI. Advertisements directed to this audience have appeared in the Journal of the American Medical Association, which has a readership of over 350,000 physicians.

This advertising has featured a series of compelling messages. One advertisement pointed out that the AMA book, Guides to the Evaluation of Permanent Impairment, indicates that diagnosis must be performed upright in flexion and extension. Another advertisement was educational and headlined, "Discover the power of Upright Imaging". Fonar realizes that peer-to-peer communications is the most powerful way to speak to physicians. Consequently, testimonials from surgeons and radiologists have been used to promote our Upright(R) MRI scanner. The first such advertisement featured five surgeons and two radiologists, explaining the Multi- Position(TM) diagnostic benefits of the Fonar Upright(R) MRI scanner to them. Another advertisement featured a leading radiologist, telling why he bought 12 Fonar Upright(R) MRI scanners and planned to buy more.

Most recently, we have commenced a telemarketing campaign for the purpose of reaching prospective customers beyond the reach of our existing sales force, so they can be made aware of the medical benefits of Fonar's new Upright(R) MRI imaging technology.

We have an extensive advertising effort on Google, Yahoo and Bing Search Marketing. Enter relevant terms, such as "mri" or "mri for back pain", and an ad for Fonar will very likely appear in the paid search listings on the right side of the results page or along the top of it.

Also, our new advertising for HMCA also serves as advertising for Fonar MRI scanners. We are increasing internet awareness of and driving patient traffic to the Upright(R) scanning centers we manage, by installing new Websites for every location and embarking on a new internet advertising campaign. These websites and advertising give prospective customers of Upright(R) MRI scanners a view of operating Upright(R) MRI centers and the benefits of using an Upright(R) MRI scanner. The success of HMCA-managed sites not only increases management fees to HMCA but encourages new sales for Fonar as well.

To meet the demand for high field open MRI scanners, Fonar plans to devote its principal efforts to marketing the Upright(R) MRI. The Upright(R) MRI is the only scanner in the industry that has the unique capability of scanning patients under weight-bearing conditions and in various positions of pain or other symptoms. In addition we will continue to market our Fonar 360(TM) MRI scanners. Utilizing a 6000 gauss (0.6 Tesla field strength) iron core electromagnet, the Upright(R) MRI and Fonar 360(TM) scanner magnets are among the highest field "open MRI" scanners in the industry. Announcements in the press have reported the occurrence of MRI scanner explosions secondary to entrapped helium gas evaporating from the liquid helium that circulates in conventional MRI scanners to refrigerate the super-conducting wire generating the magnet fields of these

## Edgar Filing: FONAR CORP - Form 10-K

magnets. Fonar's Upright(R) MRI magnet does not utilize liquid Helium and is free of this liability as is the Fonar 360(TM).

The Upright(R) MRI is also suited to fill a demand for better diagnoses of scoliosis patients, who must be standing for the exam. Scoliosis patients are typically subjected to routine x-ray exams for years. In the past, an x-ray machine was the only modality that could provide that service. Typical MRI scanners cannot provide this service because the patient cannot stand up inside of them. The Fonar Upright(R) MRI scanner is the only MRI scanner which allows the patient to stand during the exam. The Fonar Upright(R) Scanner avoids radiation of the x-ray machines currently used for scoliosis, which have been reported by the National Cancer Institute to cause a 70% increase in the risk of breast cancer. Other important new applications are Upright(R) imaging of the pelvic floor and abdomen to image prolapses and inguinal hernias. Fonar has also developed the first non-invasive method to image the prostate: the patient simply sits on a flat, seat-like coil.

We also will seek to introduce new MRI applications for our scanners such as MRI-directed interventions.

Our areas of operations are principally in the United States. During the fiscal year ended June 30, 2009, 13.2% of the Company's revenues were generated by foreign sales, as compared to 2.4% for fiscal 2008.

We are seeking to promote foreign sales and have sold scanners in various foreign countries. Foreign sales, however, have not yet proved to be a significant source of revenue.

### SERVICE AND UPGRADES FOR MRI SCANNERS

Our customer base of installed scanners has been and will continue to be an additional source of income, independent of direct sales.

Income is generated from the installed base in two principal areas namely, service and upgrades. Service and maintenance revenues from our external installed base were approximately \$10.5 million in fiscal 2009 and \$11.0 million in fiscal 2008. We expect service revenues to continue to increase as warranties expire on previously sold scanners, and the customers then enter into service contracts.

We also anticipate that our new scanners will result in upgrades income in future fiscal years. The potential for upgrades income, particularly in the form of new patient supporting upright imaging fixtures and receiver coils, originates in the versatility and productivity of the new Upright(R) Imaging technology. New medical uses for MRI technology are constantly being discovered and are anticipated for the Upright(R) Imaging technology as well. New features can often be added to the scanner by the implementation of little more than versatile new software packages. For example, software can be added to existing MRI angiography applications to synchronize angiograms with the cardiac cycle. By doing so the dynamics of blood vessel filling and emptying can be visualized with movies. Such enhancements are attractive to end users because they extend the useful life of the equipment and enable the user to avoid obsolescence and the expense of having to purchase new equipment. At the present time, however, upgrade revenue is not significant. We had no upgrade revenue in fiscal 2009 and fiscal 2008.

Service and upgrade revenues are expected to increase as sales of scanners and the size of the customer base increases.

### RESEARCH AND DEVELOPMENT

During the fiscal year ended June 30, 2009, we incurred expenditures of

## Edgar Filing: FONAR CORP - Form 10-K

\$4,085,177, \$491,707 of which was capitalized, on research and development, as compared to \$5,463,963, \$457,372 of which was capitalized during the fiscal year ended June 30, 2008.

Research and development activities have focused principally, on the development and enhancement of the Upright(R) and Fonar 360(TM) MRI scanners. The Upright(R) MRI and Fonar 360(TM) involve significant software and hardware development as the new products represent entirely new hardware designs and architecture requiring a new operating software. Our research activity includes developing a multitude of new features for upright scanning made possible by the new high speed data processing power of Fonar's newest scanners. In addition, the Company's research and development efforts include the development of new software, such as its Sympulse(TM) software and hardware upgrade and the designing and continuing introduction of new receiver surface coils for the Upright(R) MRI.

### BACKLOG

Our backlog of unfilled orders at September 30, 2009 was approximately \$25.7 million, as compared to \$36.5 million at September 26, 2008. It is expected that a substantial portion of the existing backlog of orders will be filled within the 2010 fiscal year. Our contracts generally provide that if a customer cancels an order, the customer's initial down payment for the MRI scanner is nonrefundable.

### PATENTS AND LICENSES

We currently have numerous patents in effect which relate to the technology and components of the MRI scanners. We believe that these patents, and the know-how we have developed, are material to our business.

One of our patents, issued in the name of Dr. Damadian and licensed to Fonar, was United States patent No. 3,789,832, Apparatus and Method for Detecting Cancer in Tissue, also referred to as the "1974 Patent". The development of our MRI scanners have been based upon the 1974 Patent, and we believe that the 1974 Patent was the first of its kind to utilize MR to scan the human body and to detect cancer. The 1974 Patent was extended beyond its original 17-year term and expired in February, 1992.

We have significantly enhanced our patent position within the industry and now possesses a substantial patent portfolio which provides us, under the aegis of United States patent law, "the exclusive right to make, use and sell" many of the scanner features which Fonar pioneered and which are now incorporated in most MRI scanners sold by the industry. As of June 30, 2009, Fonar had 153 patents issued and approximately 50 patents pending. A number of Fonar's existing patents specifically relate to protecting Fonar's position in the high-field iron frame open MRI market. The patents further enhance Dr. Damadian's pioneer patent, the 1974 Patent, that initiated the MRI industry and provided the original invention of MRI scanning. The 153 issued patents extend to various times up to 2027.

We also have patent cross-licensing agreements with other MRI manufacturers.

### PRODUCT COMPETITION

#### MRI SCANNERS

A majority of the MRI scanners in use in hospitals and outpatient facilities and at mobile sites in the United States are based on high field air core magnet technology while the balance are based on open iron frame magnet technology. Fonar's open iron frame MRI scanners are competing principally with high-field air core scanners. Fonar's open MRI scanners, however, utilizing a 6,000 gauss

## Edgar Filing: FONAR CORP - Form 10-K

or 0.6 Tesla field strength, iron core electromagnet, were the first "open" MR scanners at high field strength.

Fonar believes that its MRI scanners have significant advantages as compared to the high-field air core scanners of its competitors. These advantages include:

1. There is no expansive fringe magnetic field. High field air core scanners require a more expensive shielded room than is required for the iron frame scanners. The shielded room required for the iron frame scanners is intended to prevent interference from external radio frequencies.
2. They are more open and quiet.
3. They can scan the trauma victim, the cardiac arrest patient, the respirator-supported patient, and premature and newborn babies. This is not possible with high-field air core scanners because their magnetic field interferes with conventional life-support equipment.

The principal competitive disadvantage of our products is that they are not "high field strength", 1.0 Tesla +, magnets. As a general principle, the higher field strength can produce a faster scan. In some parts of the body a faster scan can be traded for a clearer picture. Although we believe that the benefits of "openness" provided by our scanners compensate for the lower field strength, certain customers will still prefer the higher field strength.

Fonar faces competition within the MRI industry from such firms as General Electric Company, Philips N.V., Toshiba Corporation, Hitachi Corporation and Siemens A.G. Most competitors have marketing and financial resources more substantial than those available to us. They have in the past, and may in the future, heavily discount the sales price of their scanners. Such competitors sell both high field air core superconducting MRI scanners and iron frame products. Fonar's original iron frame design, ultimately imitated by Fonar's competitors to duplicate Fonar's origination of "Open" MRI magnets, gave rise to current patient protected Upright(R) MRI technology with the result that Fonar today is the unique and only supplier of the highest field MRI magnets (.6 Tesla) that are not superconducting, do not use liquid helium and are not therefore susceptible to explosion.

The iron frame, because it could control the magnetic lines of force and place them where wanted and remove them from where not wanted, such as in the Fonar 360(TM) where physicians and staff are standing, provide a much more versatile magnet design than is possible with air core magnets. Air core magnets contain no iron but consist entirely of turns of current carrying wire.

For an 11 year period from 1983-1994, Fonar's large competitors, with one exception, generally rejected Fonar's "open" design but by now all have added the iron frame "open" magnet to their MRI product lines. One reason for this market shift, in addition to patient claustrophobia, is the awareness that the open magnet designs permit access to the patient to perform MRI guided procedures, a field which is now growing rapidly and is called "interventional MRI."

The Fonar 360(TM) scanner explicitly addresses this growing market reception of MRI guided interventions, and the first of these scanners was sold to a hospital in England. Fonar's Upright(R) magnet also addresses the growing market reception of MRI guided interventions. Although not enabling a full interventional theater as the Fonar 360(TM) does, the iron frame Upright(R) MRI design permits ready access to the patient and enables a wide range of interventional procedures such as biopsies and needle or catheter delivered therapies to be performed under MRI image guidance. The "tunnel" air core superconductive scanners do not permit access to the patient while the patient is inside the scanner.

## Edgar Filing: FONAR CORP - Form 10-K

Fonar expects to be the leader Upright(R) Multi-Position(TM) MRI for providing dynamic visualization of body parts such as the spine and other joints as well as dynamic visualization of the heart in its upright position when it is sustaining its full normal physiological load. No companies possess the patented Upright(R) MRI technology or the Fonar 360(TM)'s 360 degree full access interventional technology.

### OTHER IMAGING MODALITIES

Fonar's MRI scanners also compete with other diagnostic imaging systems, all of which are based upon the ability of energy waves to penetrate human tissue and to be detected by either photographic film or electronic devices for presentation of an image on a television monitor. Three different kinds of energy waves - X-ray, gamma and sound - are used in medical imaging techniques which compete with MRI medical scanning, the first two of which involve exposing the patient to potentially harmful radiation. These other imaging modalities compete with MRI products on the basis of specific applications.

X-rays are the most common energy source used in imaging the body and are employed in three imaging modalities:

1. Conventional X-ray systems, the oldest method of imaging, are typically used to image bones and teeth. The image resolution of adjacent structures that have high contrast, such as bone adjacent to soft tissue, is excellent, while the discrimination between soft tissue organs is poor because of the nearly equivalent penetration of x-rays.

2. Computerized Tomography, also referred to as "CT", systems couple computers to x-ray instruments to produce cross-sectional images of particular large organs or areas of the body. The CT scanner addresses the need for images, not available by conventional radiography, that display anatomic relationships spatially. However, CT images are generally limited to the transverse plane and cannot readily be obtained in the two other planes, sagittal and coronal. Improved picture resolution is available at the expense of increased exposure to x-rays from multiple projections. Furthermore, the pictures obtained by this method are computer reconstructions of a series of projections and, once diseased tissue has been detected, CT scanning cannot be focused for more detailed pictorial analysis or obtain a chemical analysis.

3. Digital radiography systems add computer image processing capability to conventional x-ray systems. Digital radiography can be used in a number of diagnostic procedures which provide continuous imaging of a particular area with enhanced image quality and reduced patient exposure to radiation.

Nuclear medicine systems, which are based upon the detection of gamma radiation generated by radioactive pharmaceuticals introduced into the body, are used to provide information concerning soft tissue and internal body organs and particularly to examine organ function over time.

Ultrasound systems emit, detect and process high frequency sound waves reflected from organ boundaries and tissue interfaces to generate images of soft tissue and internal body organs. Although the images are substantially less detailed than those obtainable with x-ray methods, ultrasound is generally considered harmless and therefore has found particular use in imaging the pregnant uterus.

X-ray machines, ultrasound machines, digital radiography systems and nuclear medicine compete with the MRI scanners by offering significantly lower price and space requirements. However, Fonar believes that the quality of the images produced by its MRI scanners is generally superior to the quality of the images produced by those other methodologies.

## Edgar Filing: FONAR CORP - Form 10-K

### GOVERNMENT REGULATION

#### FDA Regulation

The Food and Drug Administration in accordance with Title 21 of the Code of Federal Regulations regulates the manufacturing and marketing of Fonar's MRI scanners. The regulations can be classified as either pre-market or post-market. The pre-market requirements include obtaining marketing clearance, proper device labeling, establishment registration and device listing. Once the products are on the market, Fonar must comply with post-market surveillance controls. These requirements include the Quality Systems Regulation, or "QSR", also known as Current Good Manufacturing Practices or CGMPs, and Medical Device Reporting, also referred to as MDR regulations. The QSR is a quality assurance requirement that covers the design, packaging, labeling and manufacturing of a medical device. The MDR regulation is an adverse event-reporting program.

#### Classes of Products

Under the Medical Device Amendments of 1976 to the Federal Food, Drug and Cosmetic Act, all medical devices are classified by the FDA into one of three classes. A Class I device is subject only to general controls, such as labeling requirements and manufacturing practices; a Class II device must comply with certain performance standards established by the FDA; and a Class III device must obtain pre-market approval from the FDA prior to commercial marketing.

Fonar's products are Class II devices. Class I devices are subject to the least regulatory control. They present minimal potential for harm to the user and are often simpler in design than Class II or Class III devices. Class I devices are subject to "General Controls" as are Class II and Class III devices. General Controls include:

1. Establishment registration of companies which are required to register under 21 CFR Part 807.20, such as manufacturers, distributors, re-packagers and re-labelers.
2. Medical device listing with FDA of devices to be marketed.
3. Manufacturing devices in accordance with the Current Good Manufacturing Practices Quality System Regulation in 21 CFR Part 820.
4. Labeling devices in accordance with labeling regulations in 21 CFR Part 801 or 809.
5. Submission of a Premarket Notification, pursuant to 510(k), before marketing a device.

Class II devices are those for which general controls alone are insufficient to assure safety and effectiveness, and existing methods are available to provide such assurances. In addition to complying with general controls, Class II devices are also subject to special controls. Special controls may include special labeling requirements, guidance documents, mandatory performance standards and post-market surveillance.

We received approval to market our Beta(TM) 3000 and Beta(TM) 3000M scanners as Class III devices on September 26, 1984 and November 12, 1985. On July 28, 1988, the Magnetic Resonance Diagnostic Device which includes MR Imaging and MR Spectroscopy was reclassified by the FDA to Class II status. Consequently, Fonar's products are now classified as Class II products. On July 26, 1991, Fonar received FDA clearance to market the Ultimate(TM) Magnetic Resonance Imaging Scanner as a Class II device. Fonar received FDA clearance to market the QUAD(TM) 7000 in April 1995 and the QUAD(TM) 12000 in November 1995. On March 16, 2000, Fonar received FDA clearance to market the Fonar 360(TM) for diagnostic imaging, the Open Sky(TM) version, and on October 3, 2000 received FDA clearance for the Upright(R) MRI.

#### Premarketing Submission

## Edgar Filing: FONAR CORP - Form 10-K

Each person who wants to market Class I, II and some III devices intended for human use in the U.S. must submit a 510(k) to FDA at least 90 days before marketing unless the device is exempt from 510(k) requirements. A 510(k) is a pre-marketing submission made to FDA to demonstrate that the device to be marketed is as safe and effective, that is, substantially equivalent, SE, to a legally marketed device that is not subject to pre-market approval, PMA. Applicants must compare their 510(k) device to one or more similar devices currently on the U.S. market and make and support their substantial equivalency claims.

The FDA is committed to a 90-day clearance after submission of a 510(k), provided the 510(k) is complete and there is no need to submit additional information or data.

The 510(k) is essentially a brief statement and description of the product. As Fonar's scanner products are Class II products, there are no pre-market data requirements and the process is neither lengthy nor expensive.

An investigational device exemption, also referred to as IDE, allows the investigational device to be used in a clinical study pending FDA clearance in order to collect safety and effectiveness data required to support the Premarket Approval, also referred to as PMA, application or a Premarket Notification pursuant to 510(k), submission to the FDA. Clinical studies are most often conducted to support a PMA.

For the most part, however, we have not found it necessary to utilize IDE's. The standard 90 day clearance for our new MRI scanner products classified as Class II products makes the IDE unnecessary, particularly in view of the time and effort involved in compiling the information necessary to support an IDE.

### Quality System Regulation

The Quality Management System is applicable to the design, manufacture, administration of installation and servicing of magnetic resonance imaging scanner systems. The FDA has authority to conduct detailed inspections of manufacturing plants, to establish Good Manufacturing Practices which must be followed in the manufacture of medical devices, to require periodic reporting of product defects and to prohibit the exportation of medical devices that do not comply with the law.

### Medical Device Reporting Regulation

Manufacturers must report all MDR reportable events to the FDA. Each manufacturer must review and evaluate all complaints to determine whether the complaint represents an event which is required to be reported to FDA. Section 820.3(b) of the Quality Systems regulation defines a complaint as, "any written, electronic or oral communication that alleges deficiencies related to the identity, quality, durability, reliability, safety, effectiveness, or performance of a device after it is released for distribution."

A report is required when a manufacturer becomes aware of information that reasonably suggests that one of their marketed devices has or may have caused or contributed to a death, serious injury, or has malfunctioned and that the device or a similar device marketed by the manufacturer would be likely to cause or contribute to a death or serious injury if the malfunction were to recur.

Malfunctions are not reportable if they are not likely to result in a death, serious injury or other significant adverse event experience.

A malfunction which is or can be corrected during routine service or device maintenance still must be reported if the recurrence of the malfunction is

## Edgar Filing: FONAR CORP - Form 10-K

likely to cause or contribute to a death or serious injury if it were to recur.

We have established and maintained written procedures for implementation of the MDR regulation. These procedures include internal systems that:

- provide for timely and effective identification, communication and evaluation of adverse events;

- provide a standardized review process and procedures for determining whether or not an event is reportable; and

- provide procedures to insure the timely transmission of complete reports.

These procedures also include documentation and record keeping requirements for:

- information that was evaluated to determine if an event was reportable;

- all medical device reports and information submitted to the FDA;

- any information that was evaluated during preparation of annual certification reports; and

- systems that ensure access to information that facilitates timely follow up and inspection by FDA.

### FDA Enforcement

FDA may take the following actions to enforce the MDR regulation:

#### FDA-Initiated or Voluntary Recalls

Recalls are regulatory actions that remove a hazardous, potentially hazardous, or a misbranded product from the marketplace. Recalls are also used to convey additional information to the user concerning the safe use of the product. Either FDA or the manufacturer can initiate recalls.

There are three classifications, i.e., I, II, or III, assigned by the Food and Drug Administration to a particular product recall to indicate the relative degree of health hazard presented by the product being recalled.

#### Class I

Is a situation in which there is a reasonable probability that the use of, or exposure to, a violative product will cause serious adverse health consequences or death.

#### Class II

Is a situation in which use of, or exposure to, a violative product may cause temporary or medically reversible adverse health consequences or where the probability of serious adverse health consequences is remote.

#### Class III

Is a situation in which use of, or exposure to, a violative product is not likely to cause adverse health consequences.

Fonar has initiated five voluntary recalls. Four of the recalls were Class II and one was Class III. The recalls involved making minor corrections to the product in the field. Frequently, corrections which are made at the site of the device are called field corrections as opposed to recalls.

### Civil Money Penalties

## Edgar Filing: FONAR CORP - Form 10-K

The FDA, after an appropriate hearing, may impose civil money penalties for violations of the FD&C Act that relate to medical devices. In determining the amount of a civil penalty, FDA will take into account the nature, circumstances, extent, and gravity of the violations, the violator's ability to pay, the effect on the violator's ability to continue to do business, and any history of prior violations. The civil money penalty may not exceed \$15,000 for each violation and may not exceed \$1,000,000 for all violations adjudicated in a single proceeding, per person.

### Warning Letters

FDA issues written communications to a firm, indicating that the firm may incur more severe sanctions if the violations described in the letter are not corrected. Warning letters are issued to cause prompt correction of violations that pose a hazard to health or that involve economic deception. The FDA generally issues the letters before pursuing more severe sanctions.

### Seizure

A seizure is a civil court action against a specific quantity of goods which enables the FDA to remove these goods from commercial channels. After seizure, no one may tamper with the goods except by permission of the court. The court usually gives the owner or claimant of the seized merchandise approximately 30 days to decide a course of action. If they take no action, the court will recommend disposal of the goods. If the owner decides to contest the government's charges, the court will schedule the case for trial. A third option allows the owner of the goods to request permission of the court to bring the goods into compliance with the law. The owner of the goods is required to provide a bond or, security deposit, to assure that they will perform the orders of the court, and the owner must pay for FDA supervision of any activities by the company to bring the goods into compliance.

### Citation

A citation is a formal warning to a firm of intent to prosecute the firm if violations of the FD&C Act are not corrected. It provides the firm an opportunity to convince FDA not to prosecute.

### Injunction

An injunction is a civil action filed by FDA against an individual or company. Usually, FDA files an injunction to stop a company from continuing to manufacture, package or distribute products that are in violation of the law.

### Prosecution

Prosecution is a criminal action filed by FDA against a company or individual charging violation of the law for past practices.

### Foreign and Export Regulation

We obtain approvals as necessary in connection with the sales of our products in foreign countries. In some cases, FDA approval has been sufficient for foreign sales as well. Our standard practice has been to require either the distributor or the customer to obtain any such foreign approvals or licenses which may be required.

Legally marketed devices that comply with the requirements of the Food Drug & Cosmetic Act require a Certificate to Foreign Government issued by the FDA for export. Other devices that do not meet the requirements of the FD&C Act but comply with the laws of a foreign government require a Certificate of

## Edgar Filing: FONAR CORP - Form 10-K

Exportability issued by the FDA. All products which we sell have FDA clearance and would fall into the first category.

Foreign governments have differing requirements concerning the import of medical devices into their respective jurisdictions. The European Union, also referred to as EU, made up of 27 individual countries, has some essential requirements described in the EU's Medical Device Directive, also referred to as MDD. In order to export to one of these countries, we must meet the essential requirements of the MDD and any additional requirements of the importing country. The essential requirements are similar to some of the requirements mandated by the FDA. In addition the MDD requires that we enlist a Notified Body to examine and assess our documentation, a Technical Construction File, and verify that the product has been manufactured in conformity with the documentation. The notified body must carry out or arrange for the inspections and tests necessary to verify that the product complies with the essential requirements of the MDD, including safety performance and Electromagnetic Compatibility, also referred to as EMC. Also required is a Quality System, ISO-9001, assessment by the Notified Body. We were approved for ISO 9001 certification for its Quality Management System in April, 1999.

We received clearances to sell the Fonar 360(TM) and Upright(R) MRI scanners in the EU in May, 2002.

Other countries require that their own testing laboratories perform an evaluation of our devices. This requires that we must bring the foreign agency's personnel to the USA to perform the evaluation at our expense before exporting.

Some countries, including many in Latin America and Africa, have very few regulatory requirements.

To date, Fonar has been able to comply with all foreign regulatory requirements applicable to its export sales.

### Reimbursement to Medical Providers for MRI Scans

Effective November 22, 1985, the Department of Health and Human Services authorized reimbursement of MRI scans under the Federal Medicare program. In addition, most private insurance companies have authorized reimbursement for MRI scans.

### Anti-Kickback and Self-Referral Legislation

Proposed and enacted legislation at the State and Federal levels has restricted referrals by physicians to medical and diagnostic centers in which they or their family members have an interest. In addition, regulations have been adopted by the Secretary of Health and Human Services which provide limited "safe harbors" under the Medicare Anti-Kickback Statute. These safe harbors describe payments and transactions which are permitted between an entity receiving reimbursement under the Medicare program and those having an interest in or dealings with the entity. Although the Company cannot predict the overall effect of the adoption of these regulations on the medical equipment industry, the use and continuation of limited partnerships, where investors may be referring physicians, to own and operate MRI scanners could be greatly diminished.

### Deficit Reduction Act

The Deficit Reduction Act, among other things, limits reimbursements for MRI scans performed at MRI facilities. We believe that these limitations may be having a general negative impact on the market for MRI scanners, but believe that the unique capabilities of our products should counter any such effect on Fonar as our marketing and advertising campaigns reach prospective customers. Our Upright(R) MRI is the only MRI scanner which enables patients to be scanned

## Edgar Filing: FONAR CORP - Form 10-K

in a weight bearing position and the Fonar 360(TM) MRI is the only MRI scanner which allows complete unobstructed 360 degree\* access to the patient.

### HEALTH MANAGEMENT CORPORATION OF AMERICA PHYSICIAN AND DIAGNOSTIC SERVICES MANAGEMENT BUSINESS

Health Management Corporation of America, formed under the name U.S. Health Management Corporation and referred to as "HMCA", was organized by us in March 1997. HMCA is a wholly-owned subsidiary which engages in the business of providing comprehensive management services to imaging facilities. The services we provide include development, administration, leasing of office space, facilities and medical equipment, provision of supplies, staffing and supervision of non-medical personnel, legal services, accounting, billing and collection and the development and implementation of practice growth and marketing strategies.

HMCA currently manages 10 MRI facilities. In April 2003, HMCA sold the portion of its business which managed primary care medical practices, and in July 2005, HMCA sold the portion of its business engaged in the management of physical therapy and rehabilitation practices. This was the result of HMCA's decision to focus on management of MRI facilities, the business in which HMCA is most experienced. For the 2009 fiscal year, the revenues HMCA recognized from the MRI facilities were \$10.3 million. For the 2008 fiscal year, the revenues HMCA recognized from the MRI facilities were \$12.0 million.

### HMCA GROWTH STRATEGY

HMCA's growth strategy focuses on upgrading and expanding the existing facilities it manages and expanding the number of facilities it manages for its clients. Our most important effort in this regard has been to promote and facilitate the replacement of existing MRI scanners with new Fonar Upright(R) MRI scanners. Presently, we have Upright(R) MRI scanners at all of the MRI facilities we manage with the exception of the one in Dublin, Georgia.

In connection with its focus on managing MRI facilities, HMCA decided to sell its business of managing physical therapy and rehabilitation practices. The sale was completed on July 28, 2005, at the beginning of the 2006 fiscal year. The sale was made pursuant to an asset purchase agreement to Health Plus Management Services, L.L.C.

The purchase price under the asset purchase agreement was \$6.6 million, payable pursuant to a promissory note in 120 monthly installments commencing on August 28, 2005. The first twelve installments were interest only and the remaining 108 payments consisted of equal installments of principal and interest in the amount of \$76,014 each. The note is subject to prepayment provisions to the extent Health Plus resells all or part of the assets and business or utilizes the assets sold as collateral in any debt financing.

Pursuant to a Modification Agreement dated August 8, 2008, Health Plus made a prepayment of principal in the amount of \$2,000,000 in consideration for the balance of the note being discounted by \$1,000,000. After taking into account the prepayment of \$2,000,000 and the discount of \$1,000,000, the remaining balance of \$2,378,130, was amortized and made payable over a period of 60 consecutive months, in equal installments of principal and interest of \$47,089 each pursuant to a new replacement promissory note, bearing interest at a rate of 7% per annum.

On July 31, 2007, HMCA sold its 20% equity interest in a non-consolidated entity providing management services to a scanning center in the Bronx, New York for approximately \$600,000 and its 50% equity interest in a consolidated entity providing management services to a scanning center in Orlando, Florida for approximately \$4.3 million.

## Edgar Filing: FONAR CORP - Form 10-K

Effective September 30, 2008, a wholly-owned subsidiary of HMCA sold its 92.3% equity interest in an entity providing management services to a scanning center in Bensonhurst, New York for approximately \$2.3 million.

### PHYSICIAN AND DIAGNOSTIC MANAGEMENT SERVICES

HMCA's services to the facilities it manages encompass substantially all of their business operations. Each facility is controlled, however, by the physician owner, not HMCA, and all medical services are performed by the physicians and other medical personnel under the physician owner's supervision. HMCA is the management company and performs services of a non-professional nature. These services include:

1. **Offices and Equipment.** HMCA identifies, negotiates leases for and/or provides office space and equipment to its clients. This includes technologically sophisticated medical equipment. HMCA also provides improvements to leaseholds, assistance in site selection and advice on improving, updating, expanding and adapting to new technology.
2. **Personnel.** HMCA staffs all the non-medical positions of its clients with its own employees, eliminating the client's need to interview, train and manage non-medical employees. HMCA processes the necessary tax, insurance and other documentation relating to employees.
3. **Administrative.** HMCA assists in the scheduling of patient appointments, purchasing of medical supplies and equipment and handling of reporting, accounting, processing and filing systems. It prepares and files the physician portions of complex forms to enable its clients to participate in managed care programs and to qualify for insurance reimbursement. We assist the clients to implement programs and procedures to ensure full and timely regulatory compliance and appropriate cost reimbursement under no-fault insurance and workers' compensation guidelines, as well as compliance with other applicable governmental requirements and regulations, including HIPAA and other privacy requirements.
4. **Billing and Collections.** HMCA is responsible for the billing and collection of revenues from third-party payors including those governed by no-fault and workers' compensation statutes. HMCA is presently using a third party to perform its billing and collection services for its clients' no-fault and workers' compensation scanning business.
5. **Cost Saving Programs.** Based on available volume discounts, HMCA seeks to obtain favorable pricing for medical supplies, equipment, contrast agents, such as gadolinium, and other inventory for its clients.
6. **Diagnostic Imaging and Ancillary Services.** HMCA can offer access to diagnostic imaging equipment through diagnostic imaging facilities it manages. The Company may expand the ancillary services offered in its network to include CT-scans and x-rays, if it is determined that such additions may be useful to clients.
7. **Marketing Strategies.** HMCA is responsible for developing marketing plans for its clients.
8. **Expansion Plans.** HMCA assists the clients in developing expansion plans including the opening of new or replacement facilities where appropriate.

HMCA advises clients on all aspects of their businesses, including expansion where it is a reasonable objective, on a continuous basis. HMCA's objective is to free physicians from as many non-medical duties as is practicable. Practices can treat patients more efficiently if the physicians can spend less time on

## Edgar Filing: FONAR CORP - Form 10-K

business and administrative matters and more time practicing medicine.

HMCA provides its services pursuant to negotiated contracts with its clients. While HMCA believes it can provide the greatest value to its clients by furnishing the full range of services appropriate to that client, HMCA would also be willing to enter into contracts providing for a more limited spectrum of management services.

The facilities enter into contracts with third party payors, including managed care companies. Neither HMCA's clients nor HMCA participate in any capitated plans or other risk sharing arrangements. Capitated plans are those HMO programs where the provider is paid a flat monthly fee per patient.

As of June 22, 2007, Dr. Robert Diamond purchased the stock of the professional corporations owning the eight New York sites managed by HMCA, previously owned by Dr. Raymond V. Damadian, the President, Chairman of the Board and principal stockholder of Fonar. Dr. Diamond has been reading scans for HMCA managed facilities for more than seven years. In connection with the sale, new management agreements were substituted for the existing management agreements, providing, for the same management services. The fees in fiscal 2008, however, were flat monthly fees in the aggregate amount of \$682,500 per month. The fees in fiscal 2009 were flat monthly fees in the aggregate amount of \$578,500. Fees under the management agreements are subject to adjustment by mutual agreement on an annual basis.

Dr. Damadian still owns the four MRI facilities in Georgia and Florida managed by HMCA. In the case of contracts with these MRI facilities, fees are charged by HMCA based on the number of procedures performed. These fees are also subject to adjustment on an annual basis, based on mutual agreement. The per procedure charges to the MRI facilities during fiscal 2009 ranged from \$300 to \$400 per MRI scan. No MRI facilities or other medical facilities are owned by HMCA.

HMCA entered into an agreement in September, 2007 with Integrity Healthcare Management, Inc., also referred to as "Integrity", which is owned by an unrelated party. Under the terms of the agreement, Integrity supervised and directed HMCA and the management of the facilities including the performance of billing and collection services. The existing management agreements between the facilities and HMCA remained in place. As compensation Integrity was entitled to an annual fee equal to one-half of the increase in the consolidated cash flow of HMCA and the facilities over the period from July 1, 2006 through June 30, 2007. The term of the agreement automatically renewed on a year to year basis, but was terminated by HMCA as of the end of June, 2008.

Commencing upon the termination of this agreement, however, we hired Health Diagnostics, LLC, the parent company of Integrity, to perform all billing and collection procedures for HCMA's clients on HMCA's behalf for a fee of 6% of all adjusted deposits for these services. Effective May 1, 2009, this agreement was terminated. HMCA now contracts with TriTech (Plainview, New York) to perform billing and collection for its clients' no-fault and workers' compensation business for a fee of 6% of all adjusted no-fault and workers' compensation claims. HMCA handles all of its clients' other billings and collections.

### HMCA MARKETING

HMCA's marketing strategy is to expand the business and improve the facilities which it manages. HMCA will seek to increase the number of locations of those facilities where market conditions are promising and to promote growth of its clients' patient volume and revenue.

### DIAGNOSTIC IMAGING FACILITIES AND OTHER ANCILLIARY SERVICES

Diagnostic imaging facilities managed by HMCA provide diagnostic imaging

## Edgar Filing: FONAR CORP - Form 10-K

services to patients referred by physicians who are either in private practice or affiliated with managed care providers or other payor groups. The facilities are operated in a manner which eliminates the admission and other administrative inconveniences of in-hospital diagnostic imaging services. Imaging services are performed in an outpatient setting by trained medical technologists under the direction of physicians. Following diagnostic procedures, the images are reviewed by the interpreting physicians who prepare a report of these tests and their findings. These reports are transcribed by HMCA personnel and then delivered to the referring physician.

HMCA develops marketing programs in an effort to establish and maintain profitable referring physician relationships and to maximize reimbursement yields. These marketing approaches identify and target selected market segments consisting of area physicians with certain desirable medical specialties and reimbursement yields. Corporate and facility managers determine these market segments based upon an analysis of competition, imaging demand, medical specialty and payor mix of each referral from the local market. HMCA also directs marketing efforts at managed care providers.

Managed care providers have become an important factor in the diagnostic imaging industry. To further its position, HMCA will seek to expand the imaging modalities offered at its managed diagnostic imaging facilities.

### HMCA COMPETITION

The physician and diagnostic management services field is highly competitive. A number of large hospitals have acquired medical practices and this trend may continue. HMCA expects that more competition will develop. Many competitors have greater financial and other resources than HMCA.

With respect to the diagnostic imaging facilities managed by HMCA, the outpatient diagnostic imaging industry is highly competitive. Competition focuses primarily on attracting physician referrals at the local market level and increasing referrals through relationships with managed care organizations. HMCA believes that principal competitors for the diagnostic imaging centers are hospitals and independent or management company-owned imaging centers. Competitive factors include quality and timeliness of test results, ability to develop and maintain relationships with managed care organizations and referring physicians, type and quality of equipment, facility location, convenience of scheduling and availability of patient appointment times. HMCA believes that it will be able to effectively meet the competition in the outpatient diagnostic imaging industry with the new Fonar Upright(R) MRI scanners at its facilities.

### GOVERNMENT REGULATION APPLICABLE TO HMCA

#### FEDERAL REGULATION

##### Stark Law

Under the federal Self-Referral Law, also referred to as the "Stark Law", which is applicable to Medicare and Medicaid patients, and the self-referral laws of various States, certain health practitioners, including physicians, chiropractors and podiatrists, are prohibited from referring their patients for the provision of designated health services, including diagnostic imaging and physical therapy services, to any entity with which they or their immediate family members have a financial relationship, unless the referral fits within one of the specific exceptions in the statutes or regulations. Statutory exceptions under the Stark Law include, among others, direct physician services, in-office ancillary services rendered within a group practice, space and equipment rental and services rendered to enrollees of certain prepaid health plans. Some of these exceptions are also available under the State self-referral laws. HMCA believes that it and its clients are in compliance with these laws.

## Edgar Filing: FONAR CORP - Form 10-K

### Anti-kickback Regulation

Under the federal Anti-kickback statute, which is applicable to Medicare and Medicaid, it is illegal, among other things, for a provider of MRI services to pay or offer money or other consideration to induce the referral of MRI scans. Neither HMCA nor its clients engage in this practice.

In fiscal 2009, approximately 16.8% of the revenues of HMCA's clients were attributable to Medicare and 1.5% were attributable to Medicaid. In fiscal 2008, approximately 17.3% of the revenues of HMCA's clients were attributable to Medicare and 1.8% were attributable to Medicaid.

### Deficit Reduction Act

The Deficit Reduction Act, which among other things, places limits on Medicare reimbursements to MRI scanning facilities, has had a negative but not material effect on the Medicare receipts of HMCA's clients.

### State Regulation

In addition to the federal self-referral law and federal Anti-kickback statute, many States, including those in which HMCA and its clients operate, have their own versions of self-referral and anti-kickback laws. These laws are not limited in their applicability, as are the federal laws, to specific programs. HMCA believes that it and its clients are in compliance with these laws.

Various States prohibit business corporations from practicing medicine. Various States also prohibit the sharing of professional fees or fee splitting. Consequently, HMCA leases space and equipment to clients and provides clients with a range of non-medical administrative and managerial services for agreed upon fees. HMCA does not engage in the practice of medicine or establish standards of medical practice or policies for its clients in any State even where permitted.

HMCA's clients generate revenue from patients covered by no-fault insurance and workers' compensation programs. For the fiscal year ended June 30, 2009 approximately 39.6% of our clients' receipts were from patients covered by no-fault insurance and approximately 6.7% of our client's receipts were from patients covered by worker's compensation programs. For the fiscal year ended June 30, 2008, approximately 37.9% of HMCA's clients' receipts were from patients covered by no-fault insurance and approximately 6.5% of HMCA's clients' receipts were from patients covered by workers compensation programs. In the event that changes in these laws alter the fee structures or methods of providing service, or impose additional or different requirements, HMCA could be required to modify its business practices and services in ways that could be more costly to HMCA or in ways that decrease the revenues which HMCA receives from its clients.

HMCA believes that it and its clients are in compliance with applicable Federal, State and local laws. HMCA does not believe that such laws will have any material effect on its business.

### EMPLOYEES

As of July 1, 2009, we employed 292 persons on a full-time and part-time basis. Of such employees, 27 were engaged in marketing and sales, 35 in research and development, 39 in production, 41 in customer support services, 36 in administration, 74 on site at facilities and offices, 18 performing billing and collection functions managed by HMCA and 22 performing transcription services for those facilities.

## Edgar Filing: FONAR CORP - Form 10-K

### ITEM 2. PROPERTIES

Fonar leases approximately 117,000 square feet of office and plant space at its principal offices in Melville, New York and at one other location in Melville, New York at a current aggregate annual rental rate of \$1,194,596, excluding utilities, taxes and other related expenses. The term of one of the leases includes options to renew up through 2016 and the terms of the other leases extend to 2013. Management believes that these premises are adequate for its current needs. HMCA has consolidated its headquarters with those of Fonar as part of Fonar's cost cutting program. HMCA maintains leased office premises for its clients having an aggregate annual rental rate of approximately \$800,000 under leases having various terms.

### ITEM 3. LEGAL PROCEEDINGS

There is no material litigation pending, or to its knowledge, threatened against the Company.

### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

## Part II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our Common Stock is traded in the Nasdaq SmallCap market under the National Association of Securities Dealers Automated Quotation System, also referred to as "NASDAQ", symbol FONR. The following table sets forth the high and low trades reported in NASDAQ System for the periods shown.

Fiscal Quarter		High	Low
-----		----	----
January - March	2007	8.75	5.00
April - June	2007	7.50	4.01
July - September	2007	10.00	4.20
October - December	2007	8.80	5.18
January - March	2008	5.45	2.38
April - June	2008	4.20	2.21
July - September	2008	2.43	1.35
January - March	2009	1.38	0.62
April - June	2009	3.92	0.82
July - September 15, 2009		2.33	1.60

On September 30, 2009, we had approximately 4,392 stockholders of record of our Common Stock, 12 stockholders of record of our Class B Common Stock, 3 stockholders of record of our Class C Common Stock and 3,864 stockholders of record of our Class A Non-voting Preferred Stock.

At the present time, the only class of our securities for which there is a market is the Common Stock.

In July, 2008 we received a notice from NASDAQ that our common stock would be delisted due to failure to hold our annual meeting during fiscal 2008. We appealed and requested a hearing before the Hearing Panel stating that we planned, subject to their approval to hold a joint two-year meeting on November 17, 2008. Fonar held its two-year meeting on November 17, 2008 and accordingly remained listed. Fonar received an additional notice of delisting for failure to

## Edgar Filing: FONAR CORP - Form 10-K

meet certain continuing listing requirements. Fonar appealed again and requested a hearing, asking that Fonar be granted additional time to come into compliance. Fonar was then granted until October 5, 2009 to demonstrate compliance with the criteria.

We paid cash dividends in fiscal 1998 and the first three quarters of fiscal 1999 on monies we received from the enforcement of our patents. Except for these dividends, we have not paid any cash dividends. Except for these dividends, we expect that we will retain earnings to finance the development and expansion of our business.

### Item 6. SELECTED FINANCIAL DATA

The following selected consolidated financial data has been extracted from our consolidated financial statements for the five years ended June 30, 2009. This consolidated selected financial data should be read in conjunction with our consolidated financial statements and the related notes included in Item 8 of this form.

	As of and For the Periods Ended June 30,				
	2009	2008	2007	2006	2005
	-----	-----	-----	-----	-----
STATEMENT OF OPERATIONS					
Revenues	\$ 39,722,000	\$ 35,569,000	\$ 33,212,000	\$ 33,076,000	\$104,899,000
Cost of revenues	\$ 22,123,000	\$ 24,893,000	\$ 26,660,000	\$ 26,950,000	\$ 67,331,000
Research and Development Expenses	\$ 3,593,000	\$ 5,007,000	\$ 5,692,000	\$ 6,868,000	\$ 6,007,000

### ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION.

#### INTRODUCTION.

Fonar was formed in 1978 to engage in the business of designing, manufacturing and selling MRI scanners. In 1997, we formed a wholly-owned subsidiary, Health Management Corporation of America, also referred to as "HMCA", formerly known as U.S. Health Management Corporation, in order to expand into the physician and diagnostic management services business.

Fonar's principal MRI products are its Stand-Up(R)/Upright(R) MRI and Fonar 360(TM) MRI scanners. The Stand-Up(R) MRI allows patients to be scanned for the first time under weight-bearing conditions. The Company has been aggressively seeking new sales. The Stand-Up(R) MRI is the only MRI capable of producing images in the weight bearing state.

At 0.6 Tesla field strength, the Upright(R) MRI and Fonar 360(TM) magnets are among the highest field open MRI scanners in the industry, offering non-claustrophobic MRI together with high-field image quality. Fonar's open MRI scanners were the first high field strength MRI scanners in the industry.

HMCA commenced operations in July, 1997 and generates revenues from providing comprehensive management services, including development, administration, accounting, billing and collection services, together with office space, medical equipment, supplies and non-medical personnel to its clients. Revenues are in the form of fees which are earned under contracts with HMCA's clients. Since July 2005, HMCA has engaged only in the management of MRI facilities.

For the fiscal years ended June 30, 2009 and June 30, 2008, 28.4% and 30.8%, respectively, of HMCA's revenues were derived from contracts with facilities owned by Dr. Raymond V. Damadian, the President of Fonar and HMCA and principal stockholder of Fonar. The agreements with these MRI facilities are for one-year terms which renew automatically on an annual basis, unless terminated. The fees are based on the number of procedures performed and ranged from \$300 to \$400 per MRI scan. The balance of HMCA's revenues are derived from contracts with MRI facilities purchased by Dr. Robert Diamond from Dr. Damadian. The MRI facilities owned by Dr. Diamond are charged a flat fee, pursuant to new contracts executed in connection with the sale of the MRI facilities at the end of fiscal 2007. The fees are reviewed and if appropriate, adjusted on an annual basis by mutual agreement.

#### Critical Accounting Policies -----

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets

## Edgar Filing: FONAR CORP - Form 10-K

and liabilities. On an on-going basis, we evaluate our estimates, including those related to investments, intangible assets, income taxes, contingencies and litigation. We base our estimates on historical experience and on various assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements. We recognize revenue and related costs of revenue from sales contracts for our MRI scanners, under the percentage-of-completion method. Under this method, we recognize revenue and related costs of revenue, as each sub-assembly is completed. Amounts received in advance of our commencement of production are recorded as customer advances.

We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. As of June 30, 2009, we recorded a valuation allowance which reduced our deferred tax assets to equal our deferred tax liability.

We amortize our intangible assets, including patents, purchased management agreements and capitalized software development costs, over the shorter of the contractual/legal life or the estimated economic life. Our amortization life for patents and capitalized software development costs is 15 to 17 years and 5 years, respectively.

We periodically assess the recoverability of long-lived assets, including property and equipment, intangibles and management agreements, when there are indications of potential impairment, based on estimates of undiscounted future cash flows. The amount of impairment is calculated by comparing anticipated discounted future cash flows with the carrying value of the related asset. In performing this analysis, management considers such factors as current results, trends, and future prospects, in addition to other economic factors.

### RESULTS OF OPERATIONS. FISCAL 2009 COMPARED TO FISCAL 2008

In fiscal 2009, we experienced a net income of \$1.1 million on revenues of \$39.7 million, as compared to a net loss of \$13.5 million on revenues of \$35.6 million for fiscal 2008. This represents an increase in revenues of 11.7%. Included in net income for fiscal 2009 is a gain of \$1.4 million recognized by the Company on the sale of a consolidated subsidiary. The impact of increased unrelated party product sales, which increased by 51.6%, was the principal factor accounting for the increased revenues of the Company. Related management fees decreased by 11.9%. In addition, total costs and expenses decreased by 23.0%. Our consolidated operating results improved by \$16.2 million to an operating loss of \$704,000 for fiscal 2009 as compared to an operating loss of \$16.9 million for fiscal 2008.

#### Discussion of Operating Results of Medical Equipment Segment Fiscal 2009 Compared to Fiscal 2008

Revenues attributable to our medical equipment segment increased by 25.3% to \$29.5 million in fiscal 2009 from \$23.5 million in fiscal 2008, with product sales revenues increasing 51.6% from \$11.3 million in fiscal 2008 to \$17.2 million in fiscal 2009, and service revenue decreasing by 4.6%, from \$11.0 million in fiscal 2008 to \$10.5 million in fiscal 2009. This increase in revenues was attributable to an increase in sales of our Upright(R) MRI to unrelated parties, notwithstanding the decrease in service and repair fees.

## Edgar Filing: FONAR CORP - Form 10-K

We anticipate an improvement in our Upright(R) MRI sales because the Upright(R) MRI is unique in that it permits MRI scans to be performed on patients upright in the weight-bearing state and in multiple positions that correlate with symptoms. An important event in our ongoing effort to educate both the medical community and payors about the benefits, if not necessity, of utilizing Upright(R) MRI scanning, occurred in fiscal 2007 when we sold an Upright(R) MRI scanner to the largest orthopedic hospital in the Netherlands, St. Maartenskliniek. Upon placing the order, the Chairman of Spine Surgery at St. Maartenskliniek expressed the view that for their hospital to continue to engage in spine surgery without Fonar's Upright(R) MRI technology, now that it was available was "unacceptable" and that owning the scanner "was not optional, but mandatory". He further stated that "[o]nce our active research program has discovered the benefits of this new Fonar technology for patients, we intend to publish the results in a lot of peer reviewed scientific journals".

In addition, significant progress is being made in developing the Fonar 360(TM) MRI scanner so that it can be used in interventional procedures. At the Oxford-Nuffield site in the United Kingdom, where we installed the first Fonar 360(TM) MRI, Fonar software engineers have completed and installed our 2nd generation tracking software, which is designed to enable the surgeons to insert needles into the patient and accurately advance them under direct visual image guidance to the target tissue, such as a tumor, in order to inject therapeutic agents directly into the tissue.

Product sales to unrelated parties increased by 51.6% in fiscal 2009 from \$11.3 million in fiscal 2008 to \$17.2 million in fiscal 2009. There were no product sales to related parties in fiscal 2009 and 2008.

We believe that one of our principal challenges in achieving greater market penetration is attributable to the better name recognition and larger sales forces of our larger competitors such as General Electric, Siemens, Hitachi, Philips and Toshiba and the ability of some of our competitors to offer attractive financing terms through affiliates, such as G.E. Capital. Nevertheless, no other competitor offers a whole body weight bearing MRI scanner such as the Upright(R) MRI, and the General Electric Medical Systems division of General Electric acts as a manufacturer's representative for the Stand-Up(R) MRI.

We believe that our aggregate product sales to unrelated parties of Upright(R) Scanners shows that we are successfully meeting that challenge.

The operating results for the medical equipment segment improved by \$14.2 million from a loss of \$14.1 million in fiscal 2008 to an income of \$27,000 in fiscal 2009. This improvement is attributable most significantly to an increase in our scanner sales and a decrease in our total costs and expenses.

We recognized revenues of \$16.6 million from the sale of our Upright(R) MRI scanners in fiscal 2009. In fiscal 2008, we recognized revenues of \$11.2 million from the sale of Upright(R) MRI scanners.

None of our revenues for fiscal 2009 and fiscal 2008 were attributable to sales to related parties.

License and royalty revenue in fiscal 2009 increased to \$1.8 million as compared to \$1.2 million in fiscal 2008.

Research and development expenses, net of capitalized costs, decreased by 28.2% to \$3.6 million in fiscal 2009 as compared to \$5.0 million in fiscal 2008. Our expenses for fiscal 2009 represented continued research and development of Fonar's scanners, Fonar's new hardware and software product, Sympulse(TM) and new surface coils to be used with the Upright(R) MRI scanner.

## Edgar Filing: FONAR CORP - Form 10-K

### Discussion of Operating Results of Physician and Diagnostic Services Management Segment.

#### Fiscal 2009 Compared to Fiscal 2008

---

Revenues attributable to the Company's physician and diagnostic services management segment, HMCA, decreased by 14.9% to \$10.3 million in fiscal 2009 from \$12.0 million in fiscal 2008. The decrease in revenues was primarily due to the sale of a 92.3% equity interest in an enterprise managing an MRI center. Presently, nine of the ten MRI facilities managed by HMCA have Upright(R) MRI scanners.

Cost of revenues as a percentage of the related revenues for our physician and diagnostic services management segment decreased from \$8.6 million or 71.3% of related revenues for the year ended June 30, 2008 to \$7.3 million, or 71.2% of related revenue for the year ended June 30, 2009. The decrease in revenues resulted from our sale of a 92.3% equity interest in an enterprising managing an MRI center.

Operating results of this segment improved from an operating loss of \$2.8 million in fiscal 2008 to operating loss of \$731,000 in fiscal 2009. We attribute the improvement to a decrease in our cost of revenues.

#### Discussion of Certain Consolidated Results of Operations Fiscal 2009 Compared to Fiscal 2008

---

Interest and investment income decreased in 2009 compared to 2008. We recognized interest income of \$346,506 in 2009 as compared to \$728,711 in fiscal 2008, representing an decrease of 52.4%.

Interest expense of \$333,229 was recognized in fiscal 2009, as compared to \$535,322 in fiscal 2008, representing an decrease of 37.8%.

Notwithstanding that revenue increased by 11.7%, selling, general and administrative expenses, decreased by 34.2% to \$13.4 million in fiscal 2009 from \$20.4 million in fiscal 2008.

Compensatory element of stock issuances also increased from approximately \$360 in fiscal 2008 to \$4,061 in fiscal 2009. This reflected Fonar's policy to refrain from using its stock bonus plans to pay employees and others, in order to prevent dilution of its outstanding stock.

The lower provision for bad debts of \$1.3 million in fiscal 2009 as compared to \$2.2 million in fiscal 2008, reflected an increase in reserves of certain indebtedness in fiscal 2008 by our physician and diagnostic services management segment. In fiscal 2009, the three Florida sites managed by HMCA jointly and severally guaranteed the payment of their management fees to HMCA, further securing HMCA's management fee receivables.

Service and repair fees have decreased, from \$11.0 million in fiscal 2008 and to \$10.5 million in fiscal 2009.

Continuing our tradition as the originator of MRI, we remain committed to maintaining our position as the leading innovator of the industry through aggressive investing in research and development. In fiscal 2009 we continued our investment in the development of our new MRI scanners, together with software and upgrades, with an investment of \$4,085,177 in research and development, \$491,707 of which was capitalized, as compared to \$5,463,963, \$457,372 of which was capitalized, in fiscal 2008. The research and development expenditures were approximately 12.2% of revenues attributable to our medical equipment segment, and 9.0% of total revenues, in 2009 and 21.3% of medical

## Edgar Filing: FONAR CORP - Form 10-K

equipment segment revenues, and 14.1% of total revenues in fiscal 2008. This represented a 28.2% decrease in research and development expenditures in fiscal 2009 as compared to fiscal 2008. Notwithstanding the decrease in research and development expenditures, in connection with our overall cost cutting programs, the Company remains fully committed to developing new features, software and upgrades to improve its products.

The physician and diagnostic services management segment, HMCA, revenues decreased, from \$12.0 in fiscal 2008 to \$10.3 million in fiscal 2009. This is primarily attributable to the sale of HMCA's 92.3% equity interest in an entity providing management services to a scanning center in Bensonhurst, New York.

We have been taking steps to improve HMCA revenues by our marketing efforts, which focus on the unique capability of our Upright(R) MRI scanners to scan patients in different positions.

Marketing expenditures are likely to increase, as the Company continues its efforts to promote sales.

In the beginning of fiscal 2006, in July of 2005, HMCA sold the portion of its business engaged in the management of physical therapy and rehabilitation facilities to Health Plus Management Services, L.L.C. for a purchase price of \$6.6 million, payable pursuant to a promissory note payable in 120 monthly installments.

The first twelve installments were interest only and the remaining 108 payments were to consist of equal installments of principal and interest in the amount of \$76,014 each. The note was secured by a first lien on all of the assets of Health Plus, including its accounts receivable. The note was subject to prepayment provisions to the extent Health Plus resells all or part of the assets and business or utilizes the assets sold as collateral in any debt financing.

Pursuant to a Modification Agreement dated August 8, 2008, Health Plus made a prepayment of \$2,000,000 on the note and received a discount of \$1,000,000 in return. A new note was executed for the balance of the indebtedness remaining, in the amount of \$2,378,130, providing for 60 consecutive equal monthly payments of principal and interest of \$47,090 each. The security agreement and the mandatory prepayment provisions applicable to the original note are also applicable to the replacement note.

In fiscal 2008 and 2009, HMCA received no revenue from the physical therapy and rehabilitation business.

The Company's management fees are dependent on collection by its clients of fees from reimbursements from Medicare, Medicaid, private insurance, no fault and workers' compensation carriers, self-pay and other third-party payors. The health care industry is experiencing the effects of the federal and state governments' trend toward cost containment, as governments and other third-party payors seek to impose lower reimbursement and utilization rates and negotiate reduced payment schedules with providers. The cost-containment measures, consolidated with the increasing influence of managed-care payors and competition for patients, have resulted in reduced rates of reimbursement for services provided by the Company's clients from time to time. The Company's future revenues and results of operations may be adversely impacted by future reductions in reimbursement rates.

In 2009, the Obama administration announced its intentions for healthcare reform in the United States. The plan includes providing healthcare coverage for some 40 million uninsured Americans. The plan calls for, among other things, more vigilant control of healthcare utilization, including diagnostic imaging services. The use of radiology benefit managers, or RBM's has increased in

## Edgar Filing: FONAR CORP - Form 10-K

recent years. It is common practice for health insurance carriers to contract with RBMs to manage utilization of diagnostic imaging procedures for their insureds. In many cases, this leads to lower utilization of imaging procedures based on a determination of medical necessity. The efficacy of RBMs is still a high controversial topic. The Company cannot predict whether the current administration's healthcare plan and the use of RBMs will negatively impact its business, but it is possible that the Company's financial position and results of operations could be negatively affected by increased utilization of RBMs.

While the Company has prepared certain estimates of the impact of the above discussed changes and proposed changes, it is not possible to fully quantify their impact on its business. There can be no assurance that the impact of these changes will not be greater than estimated or that any future health care legislation or reimbursement changes will not adversely affect the Company's business.

### LIQUIDITY AND CAPITAL RESOURCES

Cash, cash equivalents and marketable securities decreased by 52.1% from \$2.4 million at June 30, 2008 to \$1.2 million at June 30, 2009.

Marketable securities approximated \$23,000 as of June 30, 2009, as compared to \$1.1 million as of June 30, 2008.

Cash used in operating activities for fiscal 2009 approximated \$6.1 million. Cash used in operating activities was attributable to a decrease in customer advances of \$5.0 million and a decrease in billings in excess of costs and estimated earnings on uncompleted contracts of \$3.7 million, offset by the net income of \$1.1 million and an increase in notes receivables of \$508,000.

Cash provided by investing activities for fiscal 2009 approximated \$5.9 million. The principal uses of cash from investing activities were purchases of property and equipment of \$28,000, costs of capitalized software development of \$492,000 and costs of patents and copyrights of \$331,000. The principal source of cash provided by investing activities were the proceeds of approximately \$2.3 million from the sale of a consolidated subsidiary, proceeds from note receivables of \$2.0 million and proceeds of \$1.3 million from the cash surrender value of life insurance.

Cash used in financing activities for fiscal 2009 approximated \$83,000. The principal sources of cash in financing activities were proceeds from the long term debt of \$258,000 and proceeds of \$127,000 from repayment of notes receivable from employee stockholders, offset by the repayment of borrowings and capital lease obligations of \$279,000 and distributions to holders of minority interests of \$23,000.

Total liabilities decreased by 20.5% during fiscal 2009, from approximately \$39.3 million at June 30, 2008 to approximately \$31.2 million at June 30, 2009. The decrease in total liabilities reflected principally an decrease in billings in excess of costs and estimated earnings on uncompleted contracts of 64.9% from \$5.8 million at June 30, 2008 to \$2.0 million at June 30, 2009 and a decrease in customer advances of 35.3% from \$14.3 million at June 30, 2008 to \$9.2 million at June 30, 2009, resulting from our decreased backlog.

Our contractual obligations and the periods in which they are scheduled to become due are set forth in the following table:

		Due in			
		Less	Due	Due	Due
		than 1	in 1-3	in 4-5	after 5
Contractual		Year	years	years	years

leases	\$12,054,134	\$1,994,523	\$4,068,513	\$3,623,430	\$2,367,668
Stipulation					
Agreements	\$ 763,511	\$ 579,343	\$ 184,168	\$ -	\$ -
	-----	-----	-----	-----	-----
Total cash					
Obligations	\$14,094,035	\$2,930,869	\$4,636,384	\$3,623,430	\$2,903,352
	=====	=====	=====	=====	=====

As at June 30, 2009, our obligations included approximately \$2.4 million in various state sales taxes.

At June 30, 2009, however, we had a working capital deficit of approximately \$10.8 million as compared to a working capital deficit of \$16.0 million at June 30, 2008 and a stockholders' deficiency of \$2.9 million at June 30, 2009 as compared to a stockholders' deficiency of \$4.2 million at June 30, 2008. For the year ended June 30, 2009, we realized a net income of \$1.1 million, which included non-cash charges of approximately \$3.1 million. Our net income for fiscal 2009 included a gain of \$1.4 million recognized on the sale of a consolidated subsidiary.

Our principal source of liquidity has been derived from revenues, as well as by cash provided by the sale of marketable securities and other assets.

In July 2007, we sold our 50% interest in a consolidated subsidiary and our 20% interest in a non-consolidated subsidiary, and received proceeds of approximately \$4.8 million.

Effective September 30, 2008, a wholly-owned subsidiary of HMCA sold its 92.3% equity interest in an entity providing management services to a scanning center in Bensonhurst, New York for approximately \$2.3 million.

In August, 2008, the Company entered into a modification agreement with regard to the asset purchase agreement with Health Plus Management Services, L.L.C. The Company received a \$2,000,000 payment on the note issued by Health Plus.

Our business plan includes an aggressive program for manufacturing and selling our Upright(R) MRI scanners. In addition, we are enhancing our revenue by participating in the physician and diagnostic services management business through our subsidiary, HMCA and have upgraded the facilities which it manages, most significantly by the replacement of existing MRI scanners with new Upright(R) MRI scanners. Presently, of the 10 MRI facilities managed by HMCA, 9 are equipped with Upright(R) MRI scanners.

Our business plan also calls for a continuing emphasis on providing our customers with enhanced equipment service and maintenance capabilities and delivering state-of-the-art, innovative and high quality equipment upgrades at competitive prices. Fees for on-going service and maintenance from our installed base of scanners were \$11.0 million for the year ended June 30, 2008 and \$10.5 million for the year ended June 30, 2009.

In order to reduce our net losses and demands on our cash and other liquid reserves, we instituted an aggressive program of cost cutting during and following the end of fiscal 2008. These measures included consolidating HMCA's

## Edgar Filing: FONAR CORP - Form 10-K

office space with Fonar's office space, reductions in the size of our workforce, compensation and benefits, as well as across the board reduction of expenses. The cost reductions were intended to enable us to withstand periods of low volumes of MRI scanner sales, by keeping expenditures at levels which, if necessary, can be supported by service revenues and HMCA revenues. We are also seeking equity and debt financing and have been engaged in discussions with several possible sources.

In order to promote sales, we are continuing to focus on marketing campaigns to strengthen the demand for our products and services. Management anticipates that Fonar's capital resources will improve if Fonar's MRI scanner products gain wider market recognition and acceptance resulting in both increased product sales and scan volumes. If we are not successful with our marketing efforts to increase sales, we will experience a shortfall in cash, and it will be necessary to further reduce operating expenses in a manner or obtain funds through equity or debt financing in sufficient amounts to avoid the need to curtail our operations subsequent to June 30, 2010. Current economic credit conditions have contributed to a slowing business environment. Given such liquidity and credit constraints in the markets, the business may suffer, should the credit markets not improve in the near future. The direct impact of these conditions is not fully known. However, there can be no assurance that we would be able to secure additional funds if needed and that if such funds were available, whether the terms or conditions would be acceptable to us. In such case, the reduction in operating expenses might need to be substantial in order for us to generate positive cash flow to sustain our operations.

If we are unable to meet expenditures with revenues or financing then it will be necessary to reduce expenses further, or seek other sources of funds through the issuance of debt or equity financing in order to conduct operations as now conducted subsequent to fiscal 2010.

Capital expenditures for fiscal 2009 approximated \$28,000. Capitalized software costs were approximately \$492,000, and capitalized patent costs were approximately \$331,000.

Fonar has not committed to making capital expenditures in the 2010 fiscal year other than its plans to continue research and development expenditures at current levels.

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and assume that the Company will continue as a going concern. The Company has suffered recurring losses from operations, continues to generate negative cash flows from operating activities and had negative working capital at June 30, 2009. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### ITEM 7A. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Fonar's investments in fixed rate instruments. None of the fixed rate instruments in which we invest extend beyond June 30, 2010. All of our revenue, expense and capital purchasing activities are transacted in United States dollars.

See [Note 13] to the consolidated Financial Statements for information on long-term debt.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders  
FONAR Corporation and Subsidiaries

We have audited the accompanying consolidated balance sheets of FONAR Corporation and Subsidiaries (the "Company") as of June 30, 2009 and 2008, and the related consolidated statements of operations, comprehensive loss, stockholders' deficiency and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of FONAR Corporation and Subsidiaries at June 30, 2009 and 2008, and the consolidated results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

## Edgar Filing: FONAR CORP - Form 10-K

The accompanying consolidated financial statements have been prepared assuming that FONAR Corporation and Subsidiaries will continue as a going concern. As more fully described in Note 1, the Company has suffered recurring losses from operations, continues to generate negative cash flows from operating activities, has negative working capital at June 30, 2009 and is dependent on asset sales to fund its shortfall from operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 1 - DESCRIPTION OF BUSINESS AND LIQUIDITY AND CAPITAL RESOURCES

##### Description of Business

-----

FONAR Corporation (the "Company" or "FONAR") is a Delaware corporation, which was incorporated on July 17, 1978. FONAR is engaged in the research, development, production and marketing of medical scanning equipment, which uses principles of Magnetic Resonance Imaging ("MRI") for the detection and diagnosis of human diseases. In addition to deriving revenues from the direct sale of MRI equipment, revenue is also generated from its installed-base of customers through its service and upgrade programs.

FONAR, through its wholly-owned subsidiary Health Management Corporation of America ("HMCA") provides comprehensive management services to diagnostic imaging facilities. The services provided by the Company include development, administration, leasing of office space, facilities and medical equipment, provision of supplies, staffing and supervision of non-medical personnel, legal services, accounting, billing and collection and the development and implementation of practice growth and marketing strategies. As of June 30, 2009, HMCA manages 10 diagnostic imaging facilities located in the states of New York, Georgia and Florida.

##### Liquidity and Going Concern

-----

In September 2008, the Company sold to a related party its 92.3% interest in an entity that provided management services to a scanning center in Bensonhurst, New York and received cash proceeds of approximately \$2,300,000. The Company

## Edgar Filing: FONAR CORP - Form 10-K

recorded a gain of \$1,448,196 on the sale of this consolidated subsidiary.

In August 2008, the Company signed a modification agreement with regards to the asset purchase agreement with Health Plus (See Note 10). The Company received a \$2,000,000 payment on the note issued by Health Plus.

At June 30, 2009, the Company had a working capital deficit of \$10,838,323 and a stockholders' deficiency of \$2,940,862. For the year ended June 30, 2009, the Company's net income was \$1,121,267, which included non-cash charges of approximately \$3,070,000. Net cash used in operating activities for the year ended June 30, 2009 was approximately \$6,067,000. The Company funded its cash flow deficit from operations for the year ended June 30, 2009 through cash provided from the sale of marketable securities of approximately \$1,097,000, proceeds from notes receivable of \$2,000,000, loans from life insurance policies of approximately \$1,345,000 and proceeds from the sale of its subsidiary of approximately \$2,293,000. In addition, during June 2008, the Company implemented a restructuring program, including a reduction of its workforce, across the board salary reductions, elimination of manufacturing facilities and restructuring of its diagnostic imaging management service business.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 1 - DESCRIPTION OF BUSINESS AND LIQUIDITY AND CAPITAL RESOURCES

##### Liquidity and Going Concern (Continued)

-----

The Company continues to focus its efforts on increased marketing campaigns to strengthen the demand for its products and services. Management anticipates that its capital resources will improve if Fonar's MRI scanner products gain wider market recognition and acceptance resulting in increased product sales. Current economic credit conditions have contributed to a slowing business environment. Given such liquidity and credit constraints in the markets, the business has and may continue to suffer, should the credit markets not improve in the near future. The direct impact of these conditions is not fully known. However, there can be no assurance that the Company would be able to secure additional funds if needed and that if such funds were available, whether the terms or conditions would be acceptable to the Company. In such case, the further reduction in operating expenses as well as possible sale of other operating subsidiaries might need to be substantial in order for the Company to generate positive cash flow to sustain the operations of the Company.

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("USGAAP") and assume that the Company will continue as a going concern. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

## Edgar Filing: FONAR CORP - Form 10-K

### Principles of Consolidation

-----

The consolidated financial statements include the accounts of FONAR Corporation, its majority and wholly-owned subsidiaries and partnerships. All significant intercompany accounts and transactions have been eliminated in consolidation.

### Use of Estimates

-----

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities in the consolidated financial statements and accompanying notes. The most significant estimates relate to accounts receivable allowances, intangible assets, income taxes, useful lives of property and equipment, contingencies, revenue recognition and litigation. In addition, healthcare industry reforms and reimbursement practices will continue to impact the Company's operations and the determination of contractual and other allowance estimates. Actual results could differ from those estimates.

### Investment in Marketable Securities

-----

The Company accounts for its investments using Statement of Financial Accounting Standards ("SFAS") No. 115, "Accounting for Certain Investments in Debt and Equity Securities" ("SFAS No. 115"). This standard requires that certain debt and equity securities be adjusted to market value at the end of each accounting period. Unrealized market value gains and losses are charged to operations if the securities are traded for short-term profit. Otherwise, such unrealized gains and losses are charged or credited to other comprehensive income (loss).

Management determines the proper classifications of investments in obligations with fixed maturities and marketable equity securities at the time of purchase and re-evaluates such designations as of each balance sheet date. At June 30, 2009 and 2008, all securities covered by SFAS No. 115 were designated as available for sale. Accordingly, these securities are stated at fair market value, with unrealized gains and losses reported in comprehensive income (loss). Realized gains and losses on sales of investments, as determined on a specific identification basis, are included in investment income in the accompanying consolidated statements of operations.

### Inventories

-----

Inventories consist of purchased parts, components and supplies, as well as work-in-process, and are stated at the lower of cost determined on the first-in, first-out method or market.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Property and Equipment

-----

## Edgar Filing: FONAR CORP - Form 10-K

Property and equipment procured in the normal course of business is stated at cost. Property and equipment purchased in connection with an acquisition is stated at its estimated fair value, generally based on an appraisal. Property and equipment is being depreciated for financial accounting purposes using the straight-line method over the shorter of their estimated useful lives, generally five to seven years, or the term of a capital lease, if applicable. Leasehold improvements are being amortized over the shorter of the useful life or the remaining lease term. Upon retirement or other disposition of these assets, the cost and related accumulated depreciation of these assets are removed from the accounts and the resulting gains or losses are reflected in the results of operations. Expenditures for maintenance and repairs are charged to operations. Renewals and betterments are capitalized. Maintenance and repair expenses totaled approximately \$228,000 and \$402,000 for the years ended June 30, 2009 and 2008, respectively.

### Other Intangible Assets

-----

#### 1) Capitalized Software Development Costs

Capitalization of software development costs begins upon the establishment of technological feasibility. Technological feasibility for the Company's computer software is generally based upon achievement of a detail program design free of high risk development issues and the completion of research and development on the product hardware in which it is to be used. The establishment of technological feasibility and the ongoing assessment of recoverability of capitalized computer software development costs require considerable judgment by management with respect to certain external factors, including, but not limited to, technological feasibility, anticipated future gross revenue, estimated economic life and changes in software and hardware technology.

Amortization of capitalized software development costs commences when the related products become available for general release to customers. Amortization is provided on a product by product basis. The annual amortization is the greater of the amount computed using (a) the ratio that current gross revenue for a product bear to the total of current and anticipated future gross revenue for that product, or (b) the straight-line method over the remaining estimated economic life of the product.

The Company periodically performs reviews of the recoverability of such capitalized software development costs. At the time a determination is made that capitalized amounts are not recoverable based on the estimated cash flows to be generated from the applicable software, any remaining capitalized amounts are written off.

#### 2) Patents and Copyrights

Amortization is calculated on the straight-line basis over a period ranging from 15 to 17 years.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Long-Lived Assets

-----

## Edgar Filing: FONAR CORP - Form 10-K

The Company periodically assesses the recoverability of long-lived assets, including property and equipment and intangibles, when there are indications of potential impairment, based on estimates of undiscounted future cash flows. The amount of impairment is calculated by comparing anticipated discounted future cash flows with the carrying value of the related asset. In performing this analysis, management considers such factors as current results, trends, and future prospects, in addition to other economic factors.

### Revenue Recognition

Revenue on sales contracts for scanners, included in "product sales" in the accompanying consolidated statements of operations, is recognized under the percentage-of-completion method. The Company manufactures its scanners under specific contracts that provide for progress payments. Production and installation take approximately three to six months. The percentage of completion is determined by the ratio of costs incurred to date on completed sub-assemblies to the total estimated cost for each scanner. Contract costs include purchased parts and components, direct labor and overhead. Revisions in cost estimates and provisions for estimated losses on uncompleted contracts, if any, are made in the period in which such losses are determined. The asset, "Costs and Estimated Earnings in Excess of Billings on Uncompleted Contracts", represents revenues recognized in excess of amounts billed. The liability, "Billings in Excess of Costs and Estimated Earnings on Uncompleted Contracts", represents amounts billed in excess of revenues recognized.

Revenue on scanner service contracts is recognized on the straight-line method over the related contract period, usually one year.

Revenue from sales of other items is recognized upon shipment.

Revenue under management contracts is recognized based upon contractual agreements for management services rendered by the Company primarily under various long-term agreements with various medical providers (the "PCs"). As of June 30, 2009, the Company has ten management agreements of which four are with PC's owned by Raymond V. Damadian, M.D., President and Chairman of the Board of FONAR ("the Related medical practices") and six are with PC's, which are all located in the state of New York ("the New York PC's"), owned by one unrelated radiologist. The contractual fees for services rendered to the New York PCs consists of fixed monthly fees per diagnostic imaging facility ranging from approximately \$45,000 to \$125,000. The contractual fees for services rendered to the related medical practices are primarily calculated on activity based efforts at pre-determined rates per unit of activity. All fees are re-negotiable at the anniversary of the agreements and each year thereafter.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Research and Development Costs

Research and development costs are charged to expense as incurred. The costs of materials and equipment that are acquired or constructed for research and development activities, and have alternative future uses (either in research and development, marketing or production), are classified as property and equipment and depreciated over their estimated useful lives.

## Edgar Filing: FONAR CORP - Form 10-K

### Advertising Costs

-----  
Advertising costs are expensed as incurred. Advertising expense approximated \$261,000 and \$1,293,000 for the years ended June 30, 2009 and 2008, respectively.

### Shipping Costs

-----  
The Company's shipping and handling costs are included under costs related to product sales.

### Income Taxes

-----  
Deferred tax assets and liabilities are determined based on the difference between the financial statement carrying amounts and tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse.

### Customer Advances

-----  
Cash advances and progress payments received on sales orders are reflected as customer advances until such time as revenue recognition begins.

### Minority Interest

-----  
The Company records adjustments to minority interest for the allocable portion of income or loss that the minority interest holders are entitled based upon their portion of certain of the subsidiaries that they own. Distributions to holders of minority interests are adjusted to the respective minority interest holders' balance.

The Company suspends allocation of losses to minority interest holders when the minority interest balance for a particular minority interest holder is reduced to zero. Any excess loss above the minority interest holders' balance is not charged to minority interest as the minority interest holders have no obligation to fund such losses.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Earnings (Loss) Per Share

-----  
Basic earnings (loss) per share ("EPS") is computed based on weighted average shares outstanding and excludes any potential dilution. In accordance with Emerging Issues Task Force ("EITF 03-6"), "Participating Securities and the Two-Class Method under FASB Statement No. 128" ("EITF 03-6"), the Company uses the two-class method to calculate the effect of the Company's participating convertible securities on basic EPS, which include the Class A Non-voting Preferred stock, Class B common stock and Class C common stock, and the if-

## Edgar Filing: FONAR CORP - Form 10-K

converted method is used to calculate the effect of participating convertible securities on diluted EPS. In addition, these participating convertible securities were not included in the computation of basic EPS for the year ended June 30, 2008 because the participating securities did not have a contractual obligation to share in the losses of the Company. For the year ended June 30, 2009, the Company used the Two-Class method for calculating basic earnings per share and applied the if converted method in calculating diluted earnings per share.

Diluted EPS reflects the potential dilution from the exercise or conversion of all dilutive securities into common stock based on the average market price of common shares outstanding during the period. The number of common shares potentially issuable upon the exercise of options and warrants or conversion of the participating convertible securities that were excluded from the diluted EPS calculation, because they are antidilutive as a result of the net losses, was 267,062 as of June 30, 2008. For the year ended June 30, 2009, the number of common shares potentially issuable upon the exercise of certain options of \$96,014 have not been included in the computation of diluted EPS since the effect would be antidilutive.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Concentration of Credit Risk

-----

Cash: The Company maintains its cash and cash equivalents with various financial institutions, which exceed federally insured limits throughout the year. At June 30, 2009, the Company had cash on deposit of approximately \$483,000 in excess of federally insured limits of \$250,000.

Related Parties: Net revenues from related parties accounted for approximately 8% and 11% of the consolidated net revenues for the years ended June 30, 2009 and 2008, respectively. Net management fee receivables from the related medical practices accounted for approximately 20% and 11% of the consolidated accounts receivable for the years ended June 30, 2009 and 2008, respectively.

#### Fair Value of Financial Instruments

-----

The financial statements include various estimated fair value information at June 30, 2009 and 2008, as required by SFAS No. 107, "Disclosures about Fair Value of Financial Instruments". Such information, which pertains to the Company's financial instruments, is based on the requirements set forth in that Statement and does not purport to represent the aggregate net fair value to the Company.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and cash equivalents: The carrying amount approximates fair value because of the short-term maturity of those instruments.

Accounts receivable and accounts payable: The carrying amounts approximate fair value because of the short maturity of those instruments.

Investments and advances and notes to related medical practices: The carrying amount approximates fair value because the discounted present value of the cash flow generated by the related parties approximates the carrying value of the amounts due to the Company.

Long-term debt, notes payable and accounts payable: The carrying amounts of debt and notes payable approximate fair value due to the length of the maturities, the interest rates being tied to market indices and/or due to the interest rates

## Edgar Filing: FONAR CORP - Form 10-K

not being significantly different from the current market rates available to the Company.

All of the Company's financial instruments are held for purposes other than trading.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Accumulated Other Comprehensive Loss

-----

Accumulated other comprehensive loss generally includes all changes in equity during a period, except those resulting from investments by stockholders and distributions to stockholders.

##### Recent Accounting Pronouncements

-----

In September, 2006, the Financial Accounting Standard Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 157, "Fair Value Measurements", ("SFAS 157"). This statement provides a single definition of fair value, a framework for measuring fair value, and expanded disclosures concerning fair value. Previously, different definitions of fair value were contained in various accounting pronouncements creating inconsistencies in measurement and disclosures. SFAS 157 applies under those previously issued pronouncements that prescribe fair value as the relevant measure of value, except SFAS No. 123(revised 2004), "Share-Based Payment", and related interpretations and pronouncements that require or permit measurement similar to fair value but are not intended to measure fair value. The Company adopted SFAS 157 on July 1, 2008, as required for its financial assets and financial liabilities. However, the FASB issued FSP FAS No. 157-2, which deferred the effective date of SFAS 157 for one year as it relates to liabilities that are not recognized or disclosed as fair value on a recurring basis. FSP FAS No. 157-2 will be effective beginning in fiscal 2010. The adoption of SFAS 157 for the Company's financial assets and financial liabilities did not have a material impact on its consolidated financial statements. The Company is evaluating the effect the implementation of SFAS 157 for its nonfinancial assets and nonfinancial liabilities will have on the Company's consolidated financial statements.

On February 15, 2007, the FASB issued SFAS No. 159, entitled "The Fair Value Option for Financial Assets and Financial Liabilities," ("SFAS 159"). The guidance in SFAS 159 "allows" reporting entities to "choose" to measure many financial instruments and certain other items at fair value. The objective underlying the development of this literature is to improve financial reporting by providing reporting entities with the opportunity to reduce volatility in reported earnings that results from measuring related assets and liabilities differently without having to apply complex hedge accounting provisions, using the guidance in SFAS No. 133, as amended, entitled "Accounting for Derivative Instruments and Hedging Activities." The provisions of SFAS No. 159 are applicable to all reporting entities and are effective as of the beginning of the first fiscal year that begins subsequent to November 15, 2007. The Company adopted SFAS 159 effective July 1, 2008. Upon adoption, the Company did not elect the fair value option for any items within the scope of SFAS 159 and, therefore, the adoption of SFAS 159 did not have an impact on the Company's consolidated financial statements.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Recent Accounting Pronouncements (Continued)

-----

In March 2007, the FASB ratified the Emerging Issues Task Force ("EITF") consensus on EITF Issue No. 06-10, "Accounting for Collateral Assignment Split Dollar Life Insurance". This EITF indicates that an employer should recognize a liability for postretirement benefits related to collateral assignment split-dollar life insurance arrangements. In addition, the EITF provides guidance for the recognition of an asset related to a collateral assignment split-dollar life insurance arrangement. The EITF is effective for fiscal years beginning after December 15, 2007. The Company has adopted the EITF as required and it did not have an impact on the Company's results of operations, financial condition and liquidity.

In December 2007, the FASB issued SFAS No. 141R, "Business Combinations" ("SFAS 141R"), which replaces SFAS No. 141, "Business Combinations". SFAS 141R establishes principles and requirements for determining how an enterprise recognizes and measures the fair value of certain assets and liabilities acquired in a business combination, including noncontrolling interests, contingent consideration, and certain acquired contingencies. SFAS 141R also requires acquisition-related transaction expenses and restructuring costs be expensed as incurred rather than capitalized as a component of the business combination. SFAS 141R will be applicable prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. SFAS 141R would have an impact on accounting for any businesses acquired after the effective date of this pronouncement.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements - An Amendment of ARB No. 51" ("SFAS 160"). SFAS 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary (previously referred to as minority interests). SFAS 160 also requires that a retained noncontrolling interest upon the deconsolidation of a subsidiary be initially measured at its fair value. Upon adoption of SFAS 160, the Company will be required to report its noncontrolling interests as a separate component of stockholders' equity. The Company will also be required to present net income allocable to the noncontrolling interest and net income attributable to the stockholders of the Company separately in its consolidated statements of income. Currently, minority interests are reported as a liability in the Company's consolidated balance sheets and the related income attributable to the minority interests is reflected as an expense in arriving at net loss. SFAS 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. SFAS 160 requires retroactive adoption of the presentation and disclosure requirements for existing minority interests. All other requirements of SFAS 160 shall be applied prospectively. The Company does not believe that adopting SFAS 160 will have a material impact on the Company's financial position, results of operations or cash flows.

## Edgar Filing: FONAR CORP - Form 10-K

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Recent Accounting Pronouncements (Continued)

-----

In October 2008, the FASB issued FASB Staff Position No. FAS 157-3, "Determining the Fair Value of a Financial Asset in a Market That Is Not Active" ("FSP 157-3"), which clarifies the application of SFAS 157 when the market for a financial asset is inactive. Specifically, FSP 157-3 clarifies how (1) management's internal assumptions should be considered in measuring fair value when observable data are not present, (2) observable market information from an inactive market should be taken into account, and (3) the use of broker quotes or pricing services should be considered in assessing the relevance of observable and unobservable data to measure fair value. The guidance in FSP 157-3 is effective immediately and did not have a material impact on the Company's consolidated financial statements.

In June 2008, the FASB ratified Emerging Issue Task Force ("EIFT") 07-5, "Determining Whether an Instrument (or an Embedded Feature) is Indexed to an Entity's Own Stock" ("EIFT 07-5"). EITF 07-5 provides framework for determining whether an instrument is indexed to an entity's own stock. EIFT 07-5 is effective for fiscal years beginning after December 15, 2008. The Company is currently evaluating the impact of the adoption of EIFT 07-5 on its consolidated financial position and results of operations.

In April 2009, the FASB issued FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments (FAS 107-1). SFAS 107-1 amends FASB No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. SFAS also amends APB Opinion No. 28, Interim Financial Reporting, to require those disclosures in summarized financial information at interim reporting periods. SFAS 107-1 is effective for interim reporting periods ending after June 15, 2009. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position, results of operations and cash flows. The carrying value of our cash and cash equivalents approximates fair value because these instruments have original maturities of three months or less.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Recent Accounting Pronouncements (Continued)

-----

In May 2009, the FASB issued SFAS No. 165, "Subsequent Events". ("SFAS No. 165") This Statement establishes general standards of accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date and is effective for interim and annual periods ending after June 15, 2009. The adoption of SFAS No. 165 did not have a material impact on

## Edgar Filing: FONAR CORP - Form 10-K

the Company's consolidated financial statements.

In June 2009, the FASB issued SFAS No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles" ("SFAS No. 168"). SFAS No. 168 will become the single source of authoritative nongovernmental U.S. generally accepted accounting principles ("GAAP"), superseding existing FASB, American Institute of Certified Public Accountants ("AICPA"), EITF, and related accounting literature. SFAS No. 168 reorganizes the thousand of GAAP pronouncements into roughly 90 accounting topics and displays them using a consistent structure. Also included is relevant Securities and Exchange Commission guidance organized using the same topical structure in separate sections. SFAS No. 168 will be effective for financial statements issued for reporting periods that end after September 15, 2009. As the codification was not intended to change or alter existing U.S. GAAP, it will not have any impact on our consolidated financial position, results of operations and cash flows.

In April 2008, the FASB issued FSP FAS 142-3, "Determination of the Useful Life of Intangible Assets" (FAS 142-3). FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of an intangible asset under SFAS No. 142, "Goodwill and Other Intangibles" (SFAS 142). FAS 142-3 aims to improve the consistency between the useful life of an intangible asset as determined under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141, "Business Combinations", and other applicable accounting literature. FAS 142-3 will be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. The adoption of this pronouncement did not have a material impact on the Company's consolidated financial statements.

In June 2009, the FASB issued SFAS No. 166, ("SFAS 166"), "Accounting for Transfers of Financial Assets - an amendment of FASB Statement No. 140, SFAS 166 requires additional disclosures concerning a transferor's continuing involvement with transferred financial assets. SFAS 166 eliminates the concept of a "qualifying special-purpose entity" and changes the requirements for derecognizing financial assets. SFAS 166 is effective for fiscal years beginning after November 15, 2009. The Company is currently evaluating the impact that the adoption of SFAS No. 166 will have on its consolidated financial statements.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Recent Accounting Pronouncements (Continued)

-----  
In June 2009, the FASB issued SFAS No. 167, "Amendments to FASB Interpretation ("FIN") No. 46(R)," which changes how a reporting entity determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance. SFAS No. 167 will require a reporting entity to provide additional disclosures about its involvement with variable interest entities and any significant changes in risk exposure due to that involvement. A reporting entity will be required to disclose how its

## Edgar Filing: FONAR CORP - Form 10-K

involvement with a variable interest entity affects the reporting entity's financial statements. SFAS 167 is effective for fiscal years beginning after November 15, 2009, and interim periods within those fiscal years. Management is currently evaluating the requirements of SFAS No. 167 and has not yet determined the impact on the Company's consolidated financial statements.

In September 2009, the EITF reached final consensus on a new revenue recognition standard, Issue No. 08-1, "Revenue Arrangements with Multiple Deliverables", (EITF 08-1). EITF 08-1 addresses how to determine whether an arrangement involving multiple deliverables contains more than one unit of accounting, and how the arrangement consideration should be allocated among the separate units of accounting. This Issue is effective for fiscal years beginning after June 15, 2010 and may be applied retrospectively or prospectively for new or materially modified arrangements. In addition, early adoption is permitted. The Company is currently evaluating the potential impact of EITF 08-1 on its consolidated financial statements.

In September 2009, the EITF reached final consensus on a new revenue recognition standard, Issue No. 09-3, "Applicability of AICPA Statement of Position 97-2 to Certain Arrangements That Contain Software Elements" (EITF 09-3). EITF 09-3 amends the scope of AICPA Statement of Position 97-2, Software Revenue Recognition to exclude tangible products that include software and non- software components that function together to deliver the product's essential functionality. This Issue shall be applied on a prospective basis for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Earlier application is permitted as of the beginning of a company's fiscal year provided the company has not previously issued financial statements for any period within that year. An entity shall not elect early application of this Issue unless it also elects early application of Issue 08-1. The Company is currently evaluating the potential impact of EITF 09-3 on its consolidated financial statements.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Reclassifications

-----

Certain prior year amounts have been reclassified to conform to the current year presentation. The reclassifications did not have any effect on reported net losses for any periods presented.

#### NOTE 3 - MEDICAL RECEIVABLES

The Company was assigned medical receivables valued at \$11,775,000, in connection with the satisfaction of the management fees and termination fees related to a Termination and Replacement Agreement dated May 23, 2005. The balance of the net medical receivables as of June 30, 2009 and 2008 was \$374,225 and \$1,227,858, respectively. As of June 30, 2009 and June 30, 2008, the Company's allowance for doubtful accounts totaled \$1,343,500 and \$769,000, respectively, on these receivables.

#### NOTE 4 - MARKETABLE SECURITIES

The following is a summary of marketable securities at June 30, 2009 and 2008:

# Edgar Filing: FONAR CORP - Form 10-K

June 30, 2009			
	Cost	Unrealized Loss	Fair Market Value
Equities - other	\$ 43,647	\$ (20,995)	\$ 22,652
	\$ 43,647	\$ ( 20,995)	\$ 22,652
	=====	=====	=====

June 30, 2008			
	Cost	Unrealized Loss	Fair Market Value

	=====	=====	=====

All marketable securities are deemed to be available for sale.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 5 - MANAGEMENT FEE RECEIVABLE AND ACCOUNTS RECEIVABLE

The Company's customers are concentrated in the healthcare industry.

#### Management Fee Receivable

The Company's receivables from the related and non-related professional corporations ("PCs") substantially consists of fees outstanding under management agreements. Payment of the outstanding fees is dependent on collection by the PCs of fees from third party medical reimbursement organizations, principally insurance companies and health management organizations.

Collection by the Company of its management fee receivables may be impaired by the uncollectibility of the PCs' medical fees from third party payors, particularly insurance carriers covering automobile no-fault and workers compensation claims due to longer payment cycles and rigorous informational requirements and certain other disallowed claims. Approximately 46% and 44%, respectively, of the PCs' 2009 and 2008 net revenues were derived from no-fault and personal injury protection claims. The Company considers the aging of its accounts receivable in determining the amount of allowance for doubtful accounts and contractual allowances. The Company generally takes all legally available steps to collect its receivables. Credit losses associated with the receivables are provided for in the consolidated financial statements and have historically been within management's expectations.

Net revenues from management and other fees charged to the related medical practices accounted for approximately 7% and 10%, of the consolidated net

## Edgar Filing: FONAR CORP - Form 10-K

revenues for the years ended June 30, 2009 and 2008, respectively.

Commencing with June 2008, the Company hired Health Diagnostics, LLC, to perform all billing and collection procedures related to the Company's diagnostic imaging facilities. The Company agreed to pay 6% of all adjusted collections for these services. Amounts charged to HMCA during the fiscal year ended June 30, 2009 under this agreement totaled \$880,848. HMCA terminated the billing and collection agreement as of April 30, 2009.

Effective June 30, 2009, Tallahassee Magnetic Resonance Imaging, PA, Stand Up MRI of Boca Raton, PA and Stand Up MRI & Diagnostic Center, PA (all related medical practices) entered in a guaranty for all management fees which were indebted to the Company. Each entity will jointly and severally guarantee to the Company all payments due to the Company which have arisen under each individual management agreement.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 5 - MANAGEMENT FEE RECEIVABLE AND ACCOUNTS RECEIVABLE (Continued)

##### Management Fee Receivable (Continued)

-----

##### Unaudited Financial Information of Unconsolidated Managed Medical Practices

-----

Audited financial information related to the unconsolidated related and unrelated PCs, which the Company provides management services to, is not available. Substantially all of these medical practices' books and records are maintained on a cash basis, their assets are depreciated on an accelerated tax basis and have a December 31st year end.

Summarized unaudited income statement data for the years ended December 31, 2008 and 2007 related to the unconsolidated medical practices managed by the Company are as follows:

	(000's omitted)	
	2008	2007

	=====	=====

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

# Edgar Filing: FONAR CORP - Form 10-K

## NOTE 5 - MANAGEMENT FEE RECEIVABLE AND ACCOUNTS RECEIVABLE (Continued)

### Accounts Receivable

Credit risk with respect to the Company's accounts receivable related to product sales and service and repair fees is limited due to the customer advances received prior to the commencement of work performed and the billing of amounts to customers as sub-assemblies are completed. Service and repair fees are billed on a monthly or quarterly basis and the Company does not continue providing these services if accounts receivable become past due. The Company controls credit risk with respect to accounts receivable from service and repair fees through its credit evaluation process, credit limits, monitoring procedures and reasonably short collection terms. The Company performs ongoing credit authorizations before a product sales contract is entered into or service and repair fees are provided.

## NOTE 6 - COSTS AND ESTIMATED EARNINGS ON UNCOMPLETED CONTRACTS AND CUSTOMER ADVANCES

- 1) Information relating to uncompleted contracts as of June 30, 2009 and 2008 is as follows:

	As of June 30,	
	2009	2008
Costs incurred on uncompleted Contracts	\$10,140,938	\$ 4,031,388
Estimated earnings	7,349,914	1,297,111
	17,490,852	5,328,499
Less: Billings to date	18,041,587	11,095,500
	\$ ( 550,735)	\$ (5,767,001)

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 7 - INVENTORIES

Inventories included in the accompanying consolidated balance sheets consist of:

	As of June 30,	
	-----	
	2009	2008
	-----	-----
Purchased parts, components and supplies	\$ 2,065,528	\$ 1,847,381
Work-in-process	1,106,869	1,408,534
	-----	-----
	\$ 3,172,397	\$ 3,255,915
	=====	=====

### NOTE 8 - PROPERTY AND EQUIPMENT

Property and equipment, at cost, less accumulated depreciation and amortization, at June 30, 2009 and 2008, is comprised of:

	As of June 30,
	-----

# Edgar Filing: FONAR CORP - Form 10-K

	2009	2008
	-----	-----
Diagnostic equipment under capital leases	\$ 633,675	\$ 780,150
Diagnostic equipment	2,878,528	2,783,397
Research, development and Demonstration equipment	9,605,961	9,605,961
Machinery and equipment	3,583,929	3,582,539
Furniture and fixtures	2,066,833	2,164,373
Equipment under capital leases	1,504,123	1,504,123
Leasehold improvements	4,981,658	5,201,350
Building	939,614	939,614
	-----	-----
	26,194,321	26,561,507
Less: Accumulated depreciation and amortization	23,301,941	22,628,974
	-----	-----
	\$ 2,892,380	\$ 3,932,533
	=====	=====

Depreciation and amortization of property and equipment for the years ended June 30, 2009 and 2008 was \$1,067,496 and \$1,570,453, respectively.

Equipment under capital leases has a net book value of \$135,597 and \$295,073 at June 30, 2009 and 2008, respectively.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 9 - OTHER INTANGIBLE ASSETS

Other intangible assets, net of accumulated amortization, at June 30, 2009 and 2008 are comprised of:

	As of June 30,	
	2009	2008
	-----	-----
Capitalized software development costs	\$6,098,057	\$5,606,350
Patents and copyrights	4,170,892	3,885,919
	-----	-----
	10,268,949	9,492,269
Less: Accumulated amortization	5,348,708	4,682,705
	-----	-----
	\$4,920,241	\$4,809,564
	=====	=====

Information related to the above intangible assets for the years ended June 30, 2009 and 2008 is as follows:

	2009	2008
	-----	-----
Balance - Beginning of Year	\$4,809,564	\$5,345,445
Amounts capitalized	823,007	687,258
Abandon patents written off	(46,327)	-

# Edgar Filing: FONAR CORP - Form 10-K

Amortization	(666,003)	(1,223,139)
	-----	-----
Balance - End of Year	\$4,920,241	\$4,809,564
	=====	=====

Amortization of patents and copyrights for the years ended June 30, 2009 and 2008 amounted to \$147,530 and \$592,059, respectively. The Company also recorded a write off of abandon patents in the amount of \$46,327 for the year ended June 30, 2009.

Amortization of capitalized software development costs for the years ended June 30, 2009 and 2008 was \$518,473 and \$631,080, respectively.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 9 - OTHER INTANGIBLE ASSETS (Continued)

The estimated amortization of patents and copyrights and capitalized software development costs for the five years ending June 30, 2014 is as follows:

For the Years Ending June 30,	Total	Patents and Copyrights	Capitalized Software Development Costs
-----	-----	-----	-----
2010	\$ 642,569	\$ 133,716	\$ 508,853

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 10 - NOTES RECEIVABLE

Notes receivable as of June 30, 2009 and 2008 consist of the following:

	June 30, 2009	June 30, 2008
	-----	-----
Note Receivable - Sale of assets (a)	\$ 2,037,100	\$ 4,484,674
Note Receivable - (b)	65,000	65,000
Note Receivable - (c)	259,460	334,276

# Edgar Filing: FONAR CORP - Form 10-K

	-----	-----
Total Notes Receivable	2,361,560	4,883,950
Discount of note receivable	-	(14,084)
Allowance	(65,000)	(65,000)
	-----	-----
Net Notes Receivable	\$ 2,296,560	\$ 4,804,866
	=====	=====
Current Portion	\$ 517,934	\$ 2,508,306
Long-Term Portion	\$ 1,778,626	\$ 2,296,560

a) On August 8, 2008, the Company signed a modification agreement with regards to the Asset Purchase Agreement with Health Plus. Under the modification agreement Health Plus made a \$2,000,000 principal payment on the promissory note in exchange for a discount on the original note of \$1,000,000.

The original promissory note ("Note") was modified to \$2,378,130 payable in 60 consecutive months in equal installments of principal and interest of \$47,090. The Note is secured by a first lien on all of the assets of Health Plus, including its accounts receivable and is subject to prepayment provisions to the extent Health Plus resells all or part of the assets and business or utilizes the assets sold as collateral in any debt financing. The Note provides for interest at 7% per annum. The Company recorded a charge to earnings for the discount on the Note of \$658,351 during the quarter ended June 30, 2008.

b) This note receivable represents a note due from a customer for the purchase of a system. The note is payable over two years. The Company has an allowance for doubtful accounts of \$65,000 as of June 30, 2009 and 2008 on this note.

c) This note receivable represents a note due from a customer for the purchase of an Upright MRI system. The note is payable in 48 consecutive equal monthly payments of principal and interest of \$8,426.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 11 - CAPITAL STOCK

#### Common Stock

-----

Cash dividends payable on the common stock shall, in all cases, be on a per share basis, one hundred twenty percent (120%) of the cash dividend payable on shares of Class B common stock and three hundred sixty percent (360%) of the cash dividend payable on a share of Class C common stock.

#### Class B Common Stock

-----

Class B common stock is convertible into shares of common stock on a one-for-one basis. Class B common stock has 10 votes per share. There were 158 of such shares outstanding at June 30, 2009 and 2008.

#### Class C Common Stock

-----

## Edgar Filing: FONAR CORP - Form 10-K

On April 3, 1995, the stockholders ratified a proposal creating a new Class C common stock and authorized the exchange offering of three shares of Class C common stock for each share of the Company's outstanding Class B common stock. The Class C common stock has 25 votes per share, as compared to 10 votes per share for the Class B common stock and one vote per share for the common stock. The Class C common stock was offered on a three-for-one basis to the holders of the Class B common stock. Although having greater voting power, each share of Class C common stock has only one-third of the rights of a share of Class B common stock to dividends and distributions. Class C common stock is convertible into shares of common stock on a three-for-one basis.

### Class A Non-Voting Preferred Stock

-----

On April 3, 1995, the stockholders ratified a proposal consisting of the creation of a new class of Class A non-voting preferred stock with special dividend rights and the declaration of a stock dividend on the Company's common stock consisting of one share of Class A non-voting preferred stock for every five shares of common stock. The stock dividend was payable to holders of common stock on October 20, 1995. Class A non-voting preferred stock issued pursuant to such stock dividend approximates 313,000 shares.

The Class A non-voting preferred stock is entitled to a special dividend equal to 3-1/4% of first \$10 million, 4-1/2% of next \$20 million and 5-1/2% on amounts in excess of \$30 million of the amount of any cash awards or settlements received by the Company in connection with the enforcement of five of the Company's patents in its patent lawsuits, less the revised special dividend payable on the common stock with respect to one of the Company's patents.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 11 - CAPITAL STOCK (Continued)

#### Class A Non-Voting Preferred Stock (Continued)

-----

The Class A non-voting preferred stock participates on an equal per share basis with the common stock in any dividends declared and ranks equally with the common stock on distribution rights, liquidation rights and other rights and preferences (other than the voting rights).

### Options

-----

The Company has stock option plans, which provide for the awarding of incentive and non-qualified stock options to employees, directors and consultants who may contribute to the success of the Company. The options granted vest either immediately or ratably over a period of time from the date of grant, typically three or four years, at a price determined by the Board of Directors or a committee of the Board of Directors, generally the fair value of the Company's common stock at the date of grant. The options must be exercised within ten years from the date of grant.

FONAR's 1993 Incentive Stock Option Plan (the "FONAR 1993 Plan"), adopted on March 26, 1993, was intended to qualify as an incentive stock option plan under

## Edgar Filing: FONAR CORP - Form 10-K

Section 422A of the Internal Revenue Code of 1954, as amended. The FONAR 1993 Plan permitted the issuance of stock options covering an aggregate of 60,000 shares of common stock of FONAR. The FONAR 1993 Plan terminated on March 25, 2003. No options to purchase shares of common stock remained available for grant under the FONAR 1993 Plan at that time. During the year ended June 30, 2008, 2,360 options expired, therefore, there are no options that were issued under the FONAR 1993 Plan that remain outstanding.

FONAR's 1997 Nonstatutory Stock Option Plan, adopted on May 9, 1997, permits the issuance of stock options covering an aggregate of 200,000 shares of common stock of FONAR. The options may be issued at such prices and upon such terms and conditions as are determined by FONAR. The 1997 Plan terminated on May 8, 2007. During the year ended June 30, 2009, 1,105 options were forfeited, therefore of the options granted under this plan 77,062 remain outstanding.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 11 - CAPITAL STOCK (Continued)

##### Options (Continued)

-----

FONAR's 2002 Incentive Stock Option Plan (the "FONAR 2002 Plan"), adopted on July 1, 2002, is intended to qualify as an incentive stock option plan under Section 422A of the Internal Revenue Code of 1954, as amended. The FONAR 2002 Plan permits the issuance of stock options covering an aggregate of 100,000 shares of common stock of FONAR. The options have an exercise price equal to the fair market value of the underlying stock on the date the option is granted, are nontransferable, are exercisable for a period not exceeding ten years and expire upon the voluntary termination of employment. The FONAR 2002 Plan will terminate on June 30, 2012. As of June 30, 2009, options to purchase 50,943 shares of common stock of FONAR were available for future grant under this plan. During the year ended June 30, 2009, 283 options were forfeited, therefore 18,952 shares remain outstanding.

FONAR's 2005 Incentive Stock Option Plan (the "FONAR 2005 Plan"), adopted on February 16, 2005, is intended to qualify as an incentive stock option plan under Section 422A of the Internal Revenue Code of 1954, as amended. The FONAR 2005 Plan permits the issuance of stock options covering an aggregate of 80,000 shares of common stock of FONAR. The options have an exercise price equal to the fair market value of the underlying stock on the date the option is granted, are non-transferable, are exercisable for a period not exceeding ten years, and expire upon the voluntary termination of employment. The FONAR 2005 Plan will terminate on February 14, 2015. As of June 30, 2009, 80,000 shares of common stock of FONAR were available for future grant under this Plan.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 13 - INCOME TAXES

Effective January 1, 2007, the Company adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109" (FIN 48). FIN 48 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a corporate tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. Differences between tax positions taken or expected to be taken in a tax return and the benefit recognized and measured pursuant to the interpretation are referred to as "unrecognized benefits". A liability is recognized (or amount of net operating loss carryforward or amount of tax refundable is reduced) for an unrecognized tax benefit because it represents an enterprise's potential future obligation to the taxing authority for a tax position that was not recognized as a result of applying the provisions of FIN 48.

In accordance with FIN 48, interest costs related to unrecognized tax benefits are required to be calculated (if applicable) and would be classified as "Interest expense, net". Penalties if incurred would be recognized as a component of "Selling, general and administrative" expenses.

The Company files corporate income tax returns in the United States (federal) and in various state and local jurisdictions. In most instances, the Company is no longer subject to federal, state and local income tax examinations by tax authorities for years prior to 2004.

## Edgar Filing: FONAR CORP - Form 10-K

The adoption of the provisions of FIN 48 did not have a material impact on the Company's consolidated financial position and results of operations. Upon the adoption and as of June 30, 2009, no liability for unrecognized tax benefits was required to be recorded. The Company does not expect its unrecognized tax benefit position to change during the next 12 months.

The Company recognized a deferred tax asset of \$876,868 and a deferred tax liability of \$876,868 as of June 30, 2009, primarily relating to net operating loss carryforwards of approximately \$164,465,000 available to offset future taxable income through 2029. The net operating losses begin to expire in 2012 for federal tax purposes and in 2012 for state income tax purposes.

The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which those temporary differences become deductible. The Company considers projected future taxable income and tax planning strategies in making this assessment. At present, the Company does not have a sufficient history of income to conclude that it is more-likely-than-not that the Company will be able to realize all of its tax benefits in the near future and therefore a valuation allowance was established for the full value of the deferred tax asset.

A valuation allowance will be maintained until sufficient positive evidence exists to support the reversal of any portion or all of the valuation. Should the Company become profitable in future periods with supportable trends, the valuation allowance will be reversed accordingly.

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 13 - INCOME TAXES (Continued)

Components of the current provision (benefit from) for income taxes are as follows:

	Years Ended June 30,	
	2009	2008
Current:		
Federal	\$ -	\$ -
State	35,931	( 6,940)
	<u>\$ 35,931</u>	<u>\$ ( 6,940)</u>
	=====	=====

A reconciliation of the federal statutory income tax rate to the Company's effective tax rate as reported is as follows:

	Years Ended June 30,	
	2009	2008
Taxes at federal statutory rate	34.0%	(34.0)%
State and local income taxes		
(benefit), net of federal benefit	6.0	0.0
Permanent differences	4.1	0.9
(Decrease) increase in the valuation

	<u>\$ 8,460,042</u>	<u>\$ 8,316,263</u>
	=====	=====

## NOTE 15 - COMMITMENTS AND CONTINGENCIES

### Leases

-----

The Company rents its operating facilities and certain equipment, pursuant to operating lease agreements expiring at various dates through December 2013. The leases for certain facilities contain escalation clauses relating to increases in real property taxes as well as certain maintenance costs.

In May 2002, HMCA entered into a sub-lease agreement (as amended in January 2003) with an entity owned by a relative of Raymond V. Damadian. The sub-lease agreement expired on May 31, 2008. As of June 1, 2008, the sub-lease tenant occupied the entire space and paid the monthly rent of \$ 39,064 on a month to month basis. On December 3, 2008, HMCA terminated the lease on these premises and surrendered the property. Rental income under the sub-lease agreement for the years ended June 30, 2009 and 2008 amounted to \$0 and \$99,371, respectively.

In March 2008, HMCA entered into a s sub-lease agreement with a third party. The sub-lease agreement expired on April 30, 2009. Rental income under the sub-lease agreement for the year ended June 30, 2009 amounted to \$131,724. The rental income is included in the consolidated statements of operations under costs related to management and other fees - unrelated medical practices.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

## NOTE 15 - COMMITMENTS AND CONTINGENCIES (Continued)

Future minimum operating lease commitments consisted of the following at June 30, 2009:

Year Ending June 30,	Facilities And Equipment (Operating Lease)
-----	-----
2010	\$ 1,994,523

## Edgar Filing: FONAR CORP - Form 10-K

2011	1,999,245
2012	2,069,268
2013	2,051,651
2014	1,571,779
Thereafter	2,367,668
	-----
Total minimum obligations	\$12,054,134

Rent expense for operating leases approximated \$1,796,000 and \$3,078,000 for the years ended June 30, 2009 and 2008, respectively.

### License Agreements

-----

The Company had a license agreement which requires the Company to pay a royalty on the Company's future sales of certain MRI imaging apparatus. Royalty expense charged to operations for the years ended June 30, 2009 and 2008 approximated \$0 and \$67,000, respectively. In April 2008, the licensor commenced an action in Superior Court, New Castle County, Delaware for the outstanding royalties of \$666,734 plus interest and other costs. The Company answered the complaint raising affirmative defenses including duress, failure of consideration and violation of United States Antitrust Laws. As of June 30, 2009, the Company has accrued \$710,461 for royalties and interest. During September 2009, the Company has entered into an understanding regarding this matter with the licensor. The understanding calls for an initial payment of \$25,000 followed by monthly payments of \$7,520 until the debt is paid.

In July 2000, the Company entered into a non-exclusive sales representative agreement with an unrelated third party. The agreement requires the third party to sell at least two Fonar MRI scanners or if it does not, pay an amount equal to the Company's gross margin on the unsold MRI scanners. The Company received the gross margin payment on two scanners of \$1,158,478 in November 2007 and is included in revenues for the year ended June 30, 2008. The Company received the gross margin payment on one scanner of \$585,493 in November 2008 and applied a previously received deposit for two other gross margin payments for a total of \$1,755,493 which was included in revenue for the year ended June 30, 2009. As of April 2009, this agreement has expired.

#### Employee Benefit Plans

-----

The Company has a non-contributory 401(k) Plan (the "401(k) Plan"). The 401(k) Plan covers all non-union employees who are at least 21 years of age with no minimum service requirements. There were no employer contributions to the Plan for the years ended June 30, 2009 and 2008. (see Other Matters below)

The stockholders of the Company approved the 2000 Employee Stock Purchase Plan ("ESPP") at the Company's annual stockholders' meeting in April 2000. The ESPP provides for eligible employees to acquire common stock of the Company at a discount, not to exceed 15%. This plan has not been put into effect as of June 30, 2009.

#### Litigation

## Edgar Filing: FONAR CORP - Form 10-K

-----

The Company is subject to legal proceedings and claims arising from the ordinary course of its business, including personal injury, customer contract and employment claims. In the opinion of management, the aggregate liability, if any, with respect to such actions, will not have a material adverse effect on the consolidated financial position or results of operations of the Company.

### Stipulation Agreements

-----

The Company has entered into stipulation agreements with a number of its creditors that in the aggregate totals \$763,511 as of June 30, 2009. The monthly payments total \$98,808.

The amounts to be paid over the next two years are as follows:

Year Ending June 30, -----	
2010	\$ 579,343
2011	184,168
	-----
	763,511
	=====

### NASDAQ Notice of Non-compliance

-----

The Company's stockholder's deficiency was \$4.2 million as of June 30, 2008 and \$2.9 million as of June 30, 2009. NASDAQ had granted the Company an extension to October 5, 2009 to evidence compliance with the minimum stockholders' equity requirement or minimum net income requirement for continued listing on the NASDAQ Capital Market. The Company's common stock continues to be listed pending its filing of its Form 10-K for fiscal 2009 to demonstrate compliance with one or more of the continued listing requirements. The Company believes that it is in compliance with the minimum net income requirement of NASDAQ Capital Market.

## FONAR CORPORATION AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2009

#### NOTE 15 - COMMITMENTS AND CONTINGENCIES (Continued)

##### Other Matters

-----

In March 2007, the Company and New York State taxing authorities conducted a conference to discuss a sales tax matter to determine if certain sales transactions are subject to sales tax withholdings. In fiscal 2007, the Company recorded a provision of \$250,000 to cover any potential tax liability including interest. This matter was settled in May of 2009 with no payment required by the Company. The Company reversed the accrual for this matter in the quarter ended June 30, 2009.

The Company is also delinquent in filing sales tax returns for certain states, for which the Company has transacted business. The Company has recorded tax obligations of \$2,062,000 plus interest and penalties of approximately \$1,377,000. The Company is in the process of determining is regulatory

## Edgar Filing: FONAR CORP - Form 10-K

requirements in order to become compliant.

The Company has determined they may not be in compliance with the Department of Labor and Internal Revenue Service regulations concerning the requirements to file Form 5500 to report activity of its 401K Employee Benefit Plan and Flex Plan. The filings do not require the Company to pay tax, however they may be subject to penalty for non-compliance. The Company has recorded provisions for any potential penalties totaling \$250,000. The Company has engaged outside counsel to handle such matters to determine the necessary requirements to ensure compliance. Such non-compliance could impact the eligibility of the plan. At this time the outcome cannot be determined.

The Company management fees are dependent on collection by the PCs of fees from reimbursements from Medicare, Medicaid, private insurance, no fault and workers' compensation carriers, self-pay and other third-party payors. The health care industry is experiencing the effects of the federal and state governments' trend toward cost containment, as government and other third-party payors seek to impose lower reimbursement and utilization rates and negotiate reduced payment schedules with providers. The cost- containment measures, consolidated with the increasing influence of managed-care payors and competition for patients, have resulted in reduced rates of reimbursement for services provided by the Company from time to time. The Company's future revenues and results of operations may be adversely impacted by future reductions in reimbursement rates.

In 2009, the Obama administration announced its intentions for healthcare reform in the United States. The plan includes providing healthcare coverage for some 40 million uninsured Americans. The plan calls for, among other things, more vigilant control of healthcare utilization, including diagnostic imaging services. The use of radiology benefit managers, or RBMs, has increased in recent years. It is common practice for health insurance carriers to contract with RBMs to manage utilization of diagnostic imaging procedures for their insureds. In many cases, this leads to lower utilization of imaging procedures based on a determination of medical necessity. The efficacy of RBMs is still a highly controversial topic. The Company cannot predict whether the current administration's healthcare plan and the use of RBMs will negatively impact its business, but it is possible that the Company's financial position and results of operations could be negatively affected by increased utilization of RBMs.

While the Company has prepared certain estimates of the impact of the above discussed changes and proposed changes, it is not possible to fully quantify their impact on its business. There can be no assurance that the impact of these changes will not be greater than estimated or that any future health care legislation or reimbursement changes will not adversely affect the Company's business.

### NOTE 16 - OTHER INCOME

Other income consists of:

	For the Years Ended June 30,

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 17 - SUPPLEMENTAL CASH FLOW INFORMATION

During the years ended June 30, 2009 and 2008, the Company paid \$308,332 and \$214,394 for interest, respectively. During the years ended June 30, 2009 and 2008, the Company paid \$35,931 and \$0 for income taxes, respectively.

#### NOTE 18 - ADVANCES AND NOTES TO RELATED MEDICAL PRACTICES

Canarsie MRI Associates ("Canarsie"), a joint venture partnership, of which MRI Specialties, Inc. ("Specialties") is an owner. In addition, during fiscal 2001, Canarsie purchased a QUAD MRI scanner from the Company, for a purchase price of \$850,000, payable as follows: (1) \$400,000 downpayment (received April 2001); (2) \$450,000 in 84 equal monthly installments, including interest at 6%, pursuant to a promissory note to be executed upon acceptance of the scanner. Timothy Damadian, the son of Raymond V. Damadian, is the sole stockholder, Director and President of Specialties. The balance due under this note as of June 30, 2009 is \$0. Interest income on this note for the years ended June 30, 2009 and 2008 amounted to \$487 and \$3,852, respectively.

The Company had advanced a former subsidiary, Tallahassee Magnetic Resonance Imaging, P.A., \$546,183. This balance was evidenced by a promissory note and is payable as follows: \$546,183 in 40 monthly installments commencing September 2007, including interest at 6%. The balance due under this note as of June 30, 2009 was \$253,643. Interest income on this note for the years ended June 30, 2009 and 2008 amounted to \$20,818 and \$29,949, respectively.

The maturities of advances and notes to related medical practices over the next two years are as follows:

Years Ending June 30, -----	
2010	\$164,611
2011	89,032
	-----
	\$253,643
	=====

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 19 - SEGMENT AND RELATED INFORMATION

The Company provides segment data in accordance with the provisions of SFAS No. 131, "Disclosures About Segments of an Enterprise and Related Information".

The Company operates in two industry segments - manufacturing and the servicing of medical equipment and management of diagnostic imaging services.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. All intersegment sales are market-based. The Company evaluates performance based on income or loss from operations.

## Edgar Filing: FONAR CORP - Form 10-K

Summarized financial information concerning the Company's reportable segments is shown in the following table:

	FONAR Medical Equipment	Management of Diagnostic Imaging Centers	Totals

	8.1%	7.8%
	=====	=====

The Company does not have any material assets outside of the United States.

## FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

### NOTE 20 - LIFE INSURANCE

During the year ended June 30, 2009, the Company borrowed \$1,344,901 against the cash surrender value of a whole life insurance policy on the life of the Company's Chief Executive Officer.

### NOTE 21 - DUE TO RELATED MEDICAL PRACTICES

In June of 2009, an entity owned by the Company's Chairman of the Board, Tallahassee Scanning Services PA, sold its Upright MRI scanning system to the Company for \$550,000 in exchange for 35 monthly payments of \$18,769 to be made over a three year period, commencing October 18, 2009 including interest at 10.41% per annum. The Company used this scanning system to fulfill a sales order with an unrelated customer.

### NOTE 22 - SALE OF CONSOLIDATED SUBSIDIARY AND INVESTMENT

#### Sale of Consolidated Subsidiary

-----

On September 30, 2008, the Company sold its 92.3% interest (to a related party)

## Edgar Filing: FONAR CORP - Form 10-K

in an entity that provided management services to a diagnostic center in Bensonhurst, NY. The Company continues to manage other diagnostic centers in the New York region.

The related third party purchased all assets and assumed all liabilities of the diagnostic center which included cash, the management fee receivable, furniture and fixtures and other miscellaneous assets. The purchase price for the 92.3% interest was \$2,307,500 all of which was paid in cash at the time of closing.

The following is the calculation of the gain on sale of the 92.3% interest in a consolidated subsidiary:

Selling Price - Net cash paid:	\$ 2,307,500
Assets and liabilities sold:	
Cash	\$ 14,487
Management fee receivable - net	917,406
Property and equipment - net	733
Other assets	34,245
Accounts payable	(16,412)
Minority interest	(91,155)
	-----
Subtotal	859,304
Gain on sale of consolidated subsidiary	\$1,448,196
	=====

### FONAR CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2009

#### NOTE 22 - SALE OF INVESTMENT AND CONSOLIDATED SUBSIDIARY (Continued)

##### Sale of Investment

-----

On July 31, 2007, the Company sold its 20% equity interest in an unconsolidated entity (management company for a diagnostic center) to an unrelated third party. The selling price was \$629,195. The Company realized a gain on the sale of the equity interest of \$571,161.

The gain was calculated as follows:

Selling Price:	\$ 629,195
Less: Closing costs	( 58,034)
	-----
Selling Price - Net	571,161
Basis	0
	-----
Gain on sale of investment	\$ 571,161
	=====

##### Sale of Consolidated Subsidiary

-----

On July 31, 2007, the Company sold its 50% interest (to an unrelated third party) in an entity which provided management services to a diagnostic center in Orlando, FL. The Company continues to manage other diagnostic centers in the

# Edgar Filing: FONAR CORP - Form 10-K

Florida region.

The unrelated third party purchased all assets and assumed all liabilities of the diagnostic center which included cash, the management fee receivable, furniture and fixtures and other miscellaneous assets. The purchase price under the for the 50% interest was \$4,499,768 and after closing costs the amount received was \$4,256,372.

The following is the calculation of the gain on sale of the 50% interest in a consolidated subsidiary:

Selling Price:	\$ 4,499,768
Less: Closing costs	(243,396)
	-----
Selling Price - Net:	\$ 4,256,372
Assets sold:	
Cash	\$ 114,238
Management fee receivable	1,166,100
Property and equipment - net	22,673
Other Assets	14,759
Minority Interest	(456,373)
	-----
Subtotal	861,397
	-----
Gain on sale of consolidated subsidiary	\$ 3,394,975

### NOTE 25 - SUBSEQUENT EVENTS

The Company has evaluated subsequent events through October 5, 2009, which is the date the Company filed its Annual Report on Form 10-K for fiscal 2009 with the Securities and Exchange Commission. There are no further subsequent events for disclosure.

### FONAR CORPORATION AND SUBSIDIARIES

#### ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

There have been no disagreements with our independent registered public accounting firm or other matters requiring disclosure under Regulation S-K, Item 304(b).

#### ITEM 9A. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e) and 15d-15(e)) that are designed to ensure that information required to be disclosed in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our principal financial officer, as appropriate, to allow timely decisions regarding the required disclosures. In designing and evaluating the disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our principal executive and financial officers have concluded that our disclosure controls and procedures over financial reporting were effective as of June 30, 2009. Management's assessment is that our internal control over financial reporting for the year ended June 30, 2009 is effective. There has been no change in our internal control over financial reporting that occurred during the fourth quarter of fiscal year 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

This annual report does not include an attestation report of the company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the company to provide only management's report in this annual report.

### FONAR CORPORATION AND SUBSIDIARIES

#### PART III

#### ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT.

Directors serve from the date of their election until the next annual meeting of stockholders and until their successors are elected and qualify. With the exception of Dr. Raymond V. Damadian, who does not receive any fees for serving

## Edgar Filing: FONAR CORP - Form 10-K

as a director, each director receives \$20,000 per annum for his or her service as a director. Officers serve at the discretion of the Board of Directors.

A majority of our board of directors is composed of independent directors: Robert J. Janoff, Charles N. O'Data and Robert Djerejian. These three individuals also serve as the three members of the audit committee, which is a standing committee of board of directors having a charter describing its responsibilities. Mr. O'Data has been designated as the audit committee financial expert. His relevant experience is described in his biographical information. We have adopted a code of ethics applicable to, among other personnel, our principal executive officer, principal financial officer, controllers and persons performing similar functions. The code is designed to deter wrongdoing and to promote: 1. honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; 2. full, fair, accurate, timely and understandable disclosure in reports and documents that we file or submit to the Securities and Exchange Commission and in other public communications we make; 3. compliance with applicable governmental laws, rules and regulations; 4. the prompt internal reporting of violations of the code to an appropriate person or persons identified in the code and 5. accountability for adherence to the code. We will provide a copy of the code to any person who requests a copy. A person may request a copy by writing to Fonar Corporation, 110 Marcus Drive, Melville, New York 11747, to the attention of the Legal Department or Investor Relations.

The officers and directors of the Company are set forth below:

Raymond V. Damadian, M.D.	73	President, Treasurer, Chairman of the Board and a Director
Claudette J.V. Chan	71	Director and Secretary
Robert J. Janoff	82	Director
Charles N. O'Data	73	Director
Robert Djerejian	78	Director

Raymond V. Damadian, M.D. has been the Chairman of the Board and President of Fonar since its inception in 1978 and Treasurer since February, 2001. Dr. Damadian was employed by the State University of New York, Downstate Medical Center, New York, as an Associate Professor of Biophysics and Associate Professor of Internal Medicine from 1967 until September 1979. Dr. Damadian received an M.D. degree in 1960 from Albert Einstein College of Medicine, New York, and a B.S. degree in mathematics from the University of Wisconsin in 1956. In addition, Dr. Damadian conducted post-graduate work at Harvard University, where he studied extensively in the fields of physics, mathematics and electronics. Dr. Damadian is the author of numerous articles and books on the nuclear magnetic resonance effect in human tissue, which is the theoretical basis for the Fonar MRI scanners. Dr. Damadian is a 1988 recipient of the National Medal of Technology and in 1989 was inducted into the National Inventors Hall of Fame, for his contributions in conceiving and developing the application of magnetic resonance technology to medical applications including whole body scanning and diagnostic imaging. Dr. Damadian is the President, Treasurer and director of HMCA.

Claudette J.V. Chan has been a Director of Fonar since October 1987 and Secretary of Fonar since January 2008. Mrs. Chan was employed from 1992 through 1997 by Raymond V. Damadian, M.D. MR Scanning Centers Management Company and since 1997 by HMCA, as "site inspector," in which capacity she is responsible for supervising and implementing standard procedures and policies for MRI

## Edgar Filing: FONAR CORP - Form 10-K

scanning centers. From 1989 to 1994 Mrs. Chan was employed by St. Matthew's and St. Timothy's Neighborhood Center, Inc., as the director of volunteers in the "Meals on Wheels" program, a program which cares for the elderly. In approximately 1983, Mrs. Chan formed the Claudette Penot Collection, a retail mail-order business specializing in women's apparel and gifts, of which she was the President until she stopped operating the business in approximately 1989. Mrs. Chan practiced and taught in the field of nursing until 1973, when her son was born. She received a bachelor of science degree in nursing from Cornell University in 1960. Mrs. Chan is the sister of Raymond V. Damadian.

Robert J. Janoff has been a Director of Fonar since February 1989. Mr. Janoff has been a self-employed New York State licensed private investigator for more than thirty-five years and was a Senior Adjustor in Empire Insurance Group for more than 15 years until retiring from that position on July 1, 1997. Mr. Janoff also served, from June 1985 to June 1991, as President of Action Data Management Strategies, Ltd., a supplier of computer programs for use by insurance companies. Mr. Janoff was a member of the Board of Directors of Harmony Heights of Oyster Bay, New York for over 25 years, which is a nonprofit residential school for girls with learning disabilities.

Charles N. O'Data has been a Director of Fonar since February 1998. From 1968 to 1997, Mr. O'Data was the Vice President for Development for Geneva College, a liberal arts college located in western Pennsylvania. In that capacity, he acted as the College's chief investment officer. His responsibilities included management of the College's endowment fund and fund raising. In July 1997, Mr. O'Data retired from Geneva College after 36 years of service to assume a position of National Sales Executive for SC Johnson Company's Professional Markets Group, a unit of SC Johnson Wax, and specialized in healthcare and education sales, a position he held until the spring of 1999. In his capacity with SC Johnson he was responsible for sales to the nation's three largest Group Purchasing Organizations which included some 4,000 hospitals. Mr. O'Data presently acts as an independent financial consultant to various entities. Mr. O'Data served on the board of the Medical Center, Beaver, Pennsylvania, now a part of Heritage Valley Health System, a 500 bed acute care facility, for 22 years, three as its Chair. Mr. O'Data also served on the board of the Hospital Council of Western Pennsylvania, a shared-services and group purchasing organization covering seven states. He founded The Beaver County Foundation, a Community Foundation, in 1992, and serves as its President. Mr. O'Data is listed as a finance associate in the Middle States Association, Commission on Higher Education. The commission is the formal accrediting body for higher education in the eastern region of the country. In this capacity he evaluates the financial aspects of educational organizations. Mr. O'Data is a graduate of Geneva College, where he received a B.S. degree in Economics in 1958.

Robert Djerejian has been a Director for Fonar since June 2002. Since 1996 he has served as a senior consultant for Haines, Lundberg & Waehler International (HLW International), an architectural, engineering, planning interior design firm, which among other hi-tech specialties designs hospitals and laboratories. Prior to that time he was the Senior Managing Partner of HLW International for a period of 22 years where he received numerous design awards including the National Honor Award from the Endowment for the Arts and The Design Excellence Award from the NY Society of the American Institute of Architects. During his management of the firm he brought the firm to international prominence with offices in London, Shanghai and Saudi Arabia. He currently consults to private clientele in design management in planning, design and construction services. Mr. Djerejian is an Emeritus member of the Board of Trustees of Pratt Institute since 1992, where he chaired the Nominations Committee and was the Vice Chairman of the Executive Committee. He served as a Board Member coordinating the joint venture of Corcoran College of Art & Design in Washington DC with Pratt Institute as one of the founding directors forming the Delaware College of Art and Design. He is a member of the American Institute of Architects and the NY Society of Architects. Mr. Djerejian is a graduate of Pratt Institute School of

Architecture, where he received his B.A. in Architecture in 1955.

### ITEM 11. EXECUTIVE COMPENSATION.

With the exception of the Chief Executive Officer, the compensation of the Company's executive officers is based on a combination of salary and bonuses based on performance. The Chief Executive Officer's compensation consists of a salary.

The Chief Executive Officer's salary varies only slightly and is by his own decision relatively low. It is not expected to increase materially in the near future. At such time as we become consistently and sufficiently profitable or there is a reconsideration of our compensation policy, the compensation payable to the Chief Executive Officer may be reconsidered. As presently existing, the Chief Executive Officer's compensation package includes no understandings with respect to bonuses, options or other incentives; as such, it is not subject to our general policy later discussed.

The Board of Directors does not have a compensation Committee. Dr. Raymond V. Damadian, President, Chief Executive Officer and Chairman of the Board, controls over 50% of the voting power of our capital stock. Dr. Damadian is the only executive officer who is a member of the Board of Directors. Dr. Damadian participates in the determination of executive compensation for our officers.

The Board of Directors has established an audit committee. The members of the committee are Robert J. Janoff, Charles N. O'Data and Robert Djerejian.

Our compensation policy includes a combination of salary, commissions, bonuses, stock bonuses and stock options, designed to incentivize our employees. There is no universal plan applicable to all of our employees. The fixed and variable components of our employees' compensation tend to be individualized, based on a combination of the employees' performance, responsibilities and position, our assessment of how best to motivate a person in such a position and the needs and preferences of the particular employees, as negotiated between employees and their supervisors or management.

There is set forth in the following Summary Compensation Table the compensation provided by us during fiscal 2008 to our Chief Executive Officer, who also serves as our acting Principal Financial Officer. There is set forth in the following Outstanding Equity Awards Table and Director Compensation Table the required information.

The Company paid premiums for life insurance on its Chief Executive Officer. The insurance policies are owned by a life insurance trust. The cash surrender value of the life insurance policies in the approximate amount of \$1.2 million was contributed to capital during the first fiscal quarter of fiscal 2007 pursuant to a split dollar agreement.

Fonar's 1997 Nonstatutory Stock Option Plan, adopted on May 9, 1997 terminated on May 8, 2007. Of the options granted under this plan, 77,062 remain outstanding.

Fonar's 2002 Incentive Stock Option Plan, adopted on July 1, 2002, is intended to qualify as an incentive stock option plan under Section 422A of the Internal Revenue Code of 1954, as amended. The 2002 Incentive Stock Option Plan permits the issuance of stock options covering an aggregate of 100,000 shares of Common Stock of Fonar. The options have an exercise price equal to the fair market value of the underlying stock on the date the option is granted, are nontransferable, are exercisable for a period not exceeding ten years and expire upon the voluntary termination of employment. The 2002 Stock Option Plan will terminate on June 30, 2012. As of June 30, 2009, options to purchase 50,943 shares of Common Stock of Fonar were available for future grant under the plan. Of the options granted under this plan 18,952 remain outstanding.

Fonar's 2005 Incentive Stock Option Plan, adopted on February 15, 2005, is intended to qualify as an incentive stock option plan under Section 422A of the Internal Revenue code of 1954, as amended. The Plan permits the issuance of stock options covering an aggregate of 80,000 shares of common stock of Fonar. The options have an exercise price equal to the fair market value of the underlying stock on the date the option is granted, are non-transferable, are exercisable for a period not exceeding ten years, and expire upon the voluntary termination of employment. The Plan will terminate on February 14, 2015. As of June 30, 2009, 80,000 shares of common stock of Fonar were available for future grant under this plan.

Fonar adopted its 2007 Stock Bonus Plan, on August 7, 2007. This Plan permits Fonar to issue an aggregate of 100,000 shares of common stock of Fonar as bonus or compensation. As of June 30, 2009, 67,932 shares were available for issuance.

### ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS.

#### Background.

Between 1990 and 1996, Raymond V. Damadian, M.D. MRI Scanning Centers Management Company, also referred to as "RVDC", a Delaware corporation of which Dr. Damadian was the sole stockholder, director and President, purchased and leased scanners from Fonar to establish a network of professional corporations operating MRI scanning centers, also referred to as the "Centers", in New York, Florida, Georgia and other locations. Dr. Raymond V. Damadian is the Chairman, President and principal stockholder of Fonar and was also the owner, director and President of each of these professional corporations. RVDC provided the necessary management and the scanners to the Centers, although in certain situations, a Center would acquire the scanner directly from Fonar.

#### ACQUISITION OF RVDC.

Effective June 30, 1997, Fonar's wholly-owned subsidiary, Health Management Corporation of America, also referred to as "HMCA", formerly known as U.S. Health Management Corporation, acquired RVDC by purchasing all of the issued and outstanding shares of RVDC from Dr. Damadian for 400 shares of the Common Stock of Fonar. The transactions can be rescinded by Dr. Damadian, however, in the event of a change of control in Fonar or the bankruptcy of Fonar. There is no time limit on the right to rescind. In connection with the transaction, Fonar granted RVDC a nonexclusive royalty free license to Fonar's patents and software. These licenses may be terminated by Fonar in the event of the bankruptcy of RVDC or a change in control of RVDC.

#### AGREEMENTS WITH HMCA.

Effective July 1, 1997, new management agreements were entered into by the Centers and HMCA. Since that time certain of the original Centers have been

## Edgar Filing: FONAR CORP - Form 10-K

closed and new Centers opened. Each new Center also entered into a management agreement with HMCA.

Pursuant to the management agreements, HMCA is providing comprehensive management and administrative services and office facilities, including billing and collection of accounts, payroll and accounts payable processing, supplies and utilities to the Centers. Under the management agreements, HMCA provides service through Fonar for the scanners at the Centers. In total, 10 MRI Centers have management agreements with HMCA.

At the end of fiscal 2007, Dr. Damadian sold all of his stock in the MRI Centers located in New York State. The new owner is one of the radiologists who has been reading and interpreting scans performed at those facilities, Dr. Robert A. Diamond. In connection with the sale, HMCA entered into new management agreements with the MRI Centers under which HMCA performs essentially the same services for the MRI Centers as prior to the sale. The fees charged, however, are flat fees charged on a monthly basis.

Dr. Damadian remains the owner of three MRI Centers in Florida and one in Georgia. The fees payable to HMCA for its services to these MRI Centers are based on the number of procedures performed, ranging between \$300 and \$400 per procedure.

During the fiscal years ended June 30, 2009 and June 30, 2008 the net revenues received by HMCA from the MRI Centers owned by Dr. Damadian were approximately \$2.9 million and \$3.7 million respectively.

During April 2009, Fair Haven Services, Inc. loaned the Company \$258,000. The loan bears interest at a rate of 10% per annum and is payable in 36 installments with the final payment due April 30, 2012. Dr. Damadian is the President and sole stockholder of Fair Haven Services, Inc.

In June 2009, Tallahassee Scanning Services, P.A. an entity owned by Dr. Damadian, sold its Upright MRI scanning system to the Company for \$550,000 payable in 35 monthly installments beginning on October 18, 2009.

### OTHER TRANSACTIONS

Robert Janoff, a director of the Company, was a limited partner in a partnership in which we had a 92% partnership interest. The partnership manages an MRI scanning center in Bensonhurst, Brooklyn, New York and was party to a service contract at an annual rate of \$110,000 on its scanner for the period of July 1, 2007 through June 30, 2008. We sold our interest in the partnership at the end of September, 2008.

### ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

#### Audit Fees

The aggregate fees billed by Marcum LLP for the audit of our annual consolidated financial statements for the fiscal year ended June 30, 2009 and the reviews of the financial statements included in our Forms 10-Q for the fiscal year ended June 30, 2009 were \$554,571. An audit of internal controls was not required this year.

The aggregate fees billed by Marcum LLP for the audit of our annual financial statements for the fiscal year ended June 30, 2008 and our internal controls, and the reviews of the financial information included in our Forms 10-Q for the fiscal year ended June 30, 2008 were \$676,576.

#### Audit Related Fees

## Edgar Filing: FONAR CORP - Form 10-K

No fees were billed by Marcum LLP for the fiscal years ended June 30, 2009 or June 30, 2008 for services related to the audit or review of our financial statements that are not included under the caption "Audit Fees".

No fees were billed by Marcum LLP for the fiscal years ended June 30, 2009 or June 30, 2008 for designing, operating, supervising or implementing any of our financial information systems or any hardware or software systems for our financial information.

### Tax Fees

The aggregate fees billed by Marcum LLP for tax compliance, tax advice and tax planning in the fiscal year ended June 30, 2009 were \$206,335.

The aggregate fees billed by Marcum LLP for tax compliance, tax advice and tax planning in the fiscal year ended June 30, 2008 were \$163,918.

### All Other Fees

The aggregate fees billed by Marcum LLP for all other services rendered by them during the fiscal years ended June 30, 2009 and June 30, 2008 were \$31,776 and \$29,035, respectively, which included services in connection with the registration of securities, employee benefit plan audits and reviews and procedures that we requested Marcum LLP to undertake to provide assurances on matters not required by laws or regulations.

Since January 1, 2003, the audit committee has adopted policies and procedures for pre-approving all non-audit work performed by the auditors. Specifically, the committee must pre-approve the use of the auditors for all such services. The audit committee has pre-approved all non-audit work since that time and in making its determination has considered whether the provision of such services was compatible with the independence of the auditors.

Our audit committee believes that the provision by Marcum LLP of services in addition to audit services in fiscal 2009 and 2008 were compatible with maintaining their independence.

## PART IV

### ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES, AND REPORTS ON FORM 8-K.

#### a) FINANCIAL STATEMENTS AND SCHEDULES
