April 30, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended March 31, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-13585

CoreLogic, Inc.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or
organization)

95-1068610
(I.R.S. Employer Identification No.)

4 First American Way, Santa Ana, California
(Address of principal executive offices)

92707-5913
(Zip Code)

(714) 250-6400
(Registrant's telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: CORELOGIC, INC. - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

On April 23, 2012, there were 106,810,407 shares of common stock outstanding.

The accompanying notes are an integral part of these condensed consolidated financial statements.

Note 1 – Basis of Condensed Consolidated Financial Statements

CoreLogic, Inc. and its subsidiaries (collectively "we", "us" or "our") is a leading provider of consumer, financial and property information, analytics and services to mortgage originators and servicers, financial institutions and other businesses, government and government-sponsored enterprises.

Our condensed consolidated financial information included in this report has been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial information pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") including the instructions to Form 10-Q and Article 10 of SEC Regulation S-X. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the condensed consolidated financial statements and accompanying notes. Actual amounts may differ from these estimated amounts. Certain information and disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations. The principles for interim financial information do not require the inclusion of all the information and footnotes required by GAAP for complete financial statements. Therefore, these financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2011.

The accompanying unaudited condensed consolidated interim financial statements reflect all adjustments, consisting of only normal recurring items which, in the opinion of management, are necessary for a fair statement of the results of operations for the periods shown. The results of operations for such periods are not necessarily indicative of the results expected for the full year or for any future periods.

Reclassifications

Our previously issued interim financial statements have been recast to present our marketing services, consumer services, transportation services and appraisal management company businesses as discontinued operations, as described in Note 12 - Discontinued Operations. In addition, the Condensed Consolidated Balance Sheet as of December 31, 2011 has been revised to correct the classification of liabilities for income taxes associated with uncertain tax positions, including interest and penalties and indemnifications in the amount of \$26.6 million, from current to non-current liabilities. The reclassification did not have a material impact on the previously-issued Consolidated Balance Sheets as of December 31, 2011.

Separation Transaction

On June 1, 2010, we completed the separation transactions (the "Separation") under which we spun off our financial services businesses into a new, publicly-traded, New York Stock Exchange-listed company called First American Financial Corporation ("FAFC") through a distribution (the "Distribution") of all of the outstanding shares of FAFC, to the holders of our common shares, par value \$1.00 per share, as of May 26, 2010. After the Distribution, we retained the information solutions businesses.

To effect the Separation, we entered into a Separation and Distribution Agreement (the "Separation and Distribution Agreement") that governs the rights and obligations of the Company and FAFC regarding the Distribution. It also governs the on-going relationship between the Company and FAFC subsequent to the completion of the Separation and provides for the allocation of assets and liabilities between FAFC and the Company. In addition, we also entered into a Restrictive Covenants Agreement and a Tax Sharing Agreement (the "Tax Sharing Agreement") as described in Note 7 – Income Taxes.

While we are a party to the Separation and Distribution Agreement and various other agreements relating to the Separation, we have determined that we have no material continuing involvement in the operations of FAFC.

In connection with the Separation, we issued approximately \$250.0 million, in value, or 12,933,265 shares of our common stock to FAFC. Based on the closing price of our stock on June 1, 2010, the value of the equity issued to FAFC was \$242.6 million. As a result, we made a cash payment to FAFC of \$7.4 million to arrive at the full value of \$250.0 million. FAFC has agreed to dispose of the shares five years after the Separation or to bear any adverse tax consequences arising out of holding the shares for longer than that period. On April 11, 2011, we purchased 4.0 million shares of our common stock from a wholly-owned subsidiary of FAFC for total consideration of \$75.8 million based on a spot market price of our common stock on April 5, 2011 of \$18.95 per share. The price per share was agreed upon by the parties during the trading day on April 5, 2011. See further discussion at Note 13 - Transactions with FAFC.

Prior to the Separation, we operated primarily as a title insurance company regulated under Article 7 of Regulation S-X and were not subject to the requirements of Article 5 of Regulation S-X. Rule 5-03 of Regulation S-X requires Article 5 companies, such as us, to classify expenses in a functional manner. We intend to classify external cost of revenues, salaries and benefits and other operating expenses into cost of revenues and selling, general and administrative ("SG&A") expenses, and expect to present our income statement under this classification with our annual report on Form 10-K for the year ended December 31, 2012 and all periods presented therein. We believe classifying these expenses on a functional basis will not be material to the financial statements as a whole, as there will be no impact to total expenses previously reported, nor will it impact the statement of operations in terms of overall revenues, operating income, net income or earnings per share. In addition, there will be no impact on our balance sheets or statements of cash flow.

Escrow Administration Arrangements

We administer escrow deposits as a service to our customers in connection with our tax services business. These deposits are maintained in segregated accounts for the benefit of our customers. Escrow deposits totaled \$2.0 billion as of March 31, 2012 and \$593.9 million at December 31, 2011. Escrow deposits held on behalf of our customers are not our funds and, therefore, are not included in the accompanying consolidated balance sheets.

Escrow deposits are generally held by the Company for a period of two to five business days and we invest these funds in highly-rated, liquid investments, such as bank deposit products or AAA-rated money market funds. We earn interest income from these investments and bear the risk of any losses. However, we have not historically incurred any investment losses and do not anticipate incurring any future investment losses. As a result, we do not maintain any reserves for losses in value of these investments.

Recent Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board ("FASB") issued updated guidance related to the presentation of offsetting (netting) assets and liabilities in the financial statements. The guidance requires the disclosure of both gross information and net information on instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. This scope would include derivatives, sale and repurchase agreements and reverse sale and repurchase agreements, and securities borrowing and securities lending arrangements. The updated guidance is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. Management does not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In September 2011, the FASB issued updated guidance related to the testing of goodwill for impairment. The guidance provides that an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The updated guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance did not have a material impact on our consolidated financial statements.

In June 2011, the FASB issued updated guidance related to the presentation of comprehensive income. The guidance provides that an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The updated guidance is effective for annual financial reporting periods

beginning after December 15, 2011 and for interim periods within the fiscal year. The adoption of this guidance did not have a material impact on our consolidated financial statements.

In May 2011, the FASB issued updated guidance related to fair value measurements and disclosures. The update provides amendments to achieve common fair value measurements and disclosure requirements in GAAP and International Financial Reporting Standards. The amendments in this update explain how to measure fair value. They do not require additional fair value measurements and are not intended to establish valuation standards or affect valuation practices outside of financial reporting. The updated guidance is effective during interim and annual financial reporting periods beginning after December 15, 2011. The adoption of this guidance did not have a material impact on our consolidated financial statements.

Note 2 – Investment in Affiliates

Investments in affiliates are accounted for under the equity method of accounting as we are deemed to have significant influence over the affiliate but do not control or have a majority voting interest in the affiliate. Investments are carried at the cost of acquisition, including subsequent capital contributions and loans from us, plus our equity in undistributed earnings or losses since inception of investment. We recorded equity in earnings of affiliates net of tax of \$9.5 million and \$6.3 million for the three months ended March 31, 2012 and 2011, respectively. Income tax expense of \$6.0 million and \$4.2 million was recorded on these earnings for the three months ended March 31, 2012 and 2011, respectively.

One of our subsidiaries owns a 50.1% interest in a joint venture that provides products and services used in connection with loan originations. This investment in affiliate contributed 80.7% and 81.1% of our total equity in earnings of affiliates, net of tax, for the three months ended March 31, 2012 and 2011, respectively. Based on the terms and conditions of the joint venture agreement, we have significant influence but do not have control of, nor a majority voting interest in, the joint venture. Accordingly, this investment is accounted for under the equity method. Summarized financial information for this investment (assuming a 100% ownership interest) is as follows:

(in thousands)	For the Three Months Ended	
	March 31, 2012	2011
Statement of operations		
Net revenues	\$123,329	\$84,694
Expenses	97,720	67,467
Income before income taxes	\$25,609	\$17,227
Net income	\$25,468	\$17,078
CoreLogic equity in earnings of affiliate, pre-tax	\$12,734	\$8,556

Note 3 – Marketable Securities

Our marketable securities consist primarily of investments in preferred stock of \$21.0 million and \$20.9 million as of March 31, 2012 and December 31, 2011, respectively. We classify our marketable securities as available-for-sale and carry them at fair value with unrealized gains or losses classified as a component of accumulated other comprehensive income. During the first quarter of 2011, we sold marketable securities resulting in a realized pre-tax gain of \$24.9 million. There were no gains or losses recognized on sales of marketable securities for the three months ended March 31, 2012.

Note 4 – Goodwill

A reconciliation of the changes in the carrying amount of goodwill and accumulated impairment losses, by reporting unit, for the three months ended March 31, 2012, is as follows:

(in thousands)	Data and Analytics	Mortgage Origination Services	Default Services	Consolidated
Balance at January 1, 2012				
Goodwill	\$649,648	\$680,674	\$149,409	\$1,479,731

Goodwill, net	\$651,949	\$673,749	\$149,409	\$1,475,107
---------------	-----------	-----------	-----------	-------------

We have reclassified \$3.4 million and \$17.3 million of goodwill, net, to assets of discontinued operations as of March 31, 2012 and December 31, 2011, respectively.

10

Note 5 – Other Intangible Assets, net

Other intangible assets consist of the following:

(in thousands)	March 31, 2012	December 31, 2011
Customer lists	\$260,520	\$276,112
Noncompete agreements	6,783	7,898
Trade names and licenses	24,575	24,402
	291,878	308,412
Less accumulated amortization	(133,437) (144,047
Other intangible assets, net	\$158,441	\$164,365

Amortization expense for other intangible assets was \$6.7 million and \$4.8 million for the three months ended March 31, 2012 and 2011, respectively. We have reclassified \$2.5 million and \$2.6 million of other intangible assets, net, to assets of discontinued operations as of March 31, 2012 and December 31, 2011, respectively.

Estimated amortization expense for other intangible assets anticipated for the next five years is as follows:

(in thousands)	
Remainder of 2012	\$20,061
2013	24,778
2014	17,902
2015	16,420
2016	15,321
Thereafter	63,959
	\$158,441

Note 6 – Long-Term Debt

Our long-term debt consists of the following:

(in thousands)	March 31, 2012	December 31, 2011
Acquisition related notes:		
Non-interest bearing acquisition note due in \$5.0 million installments March 2012, 2014 and 2016	\$8,378	\$13,209
Notes:		
7.25% senior notes due June 2021	393,000	400,000
5.7% senior debentures due August 2014	1,175	1,175
7.55% senior debentures due April 2028	59,645	59,645
8.5% deferrable interest subordinated notes due April 2012	34,768	34,768
Bank debt:		
Revolving line of credit borrowings due March 2016, weighted average interest rate of 6.8%	51,730	51,045
Term loan facility borrowings through March 2016, weighted average interest rate of 4.0%	306,250	341,250
Other debt:		
Various interest rates with maturities through 2013	1,787	7,203
Total long-term debt	856,733	908,295
Less current portion of long-term debt	36,377	62,268
Long-term debt, net of current portion	\$820,356	\$846,027

For the three months ended March 2012, we repaid in total \$52.2 million of our debt obligations. In April 2012 we repaid in full all amounts outstanding under the 8.5% deferrable interest subordinated notes due April 2012 upon the final maturity thereof.

Senior Notes

On May 20, 2011, we issued \$400.0 million aggregate principal amount of 7.25% senior notes due 2021 (the "Notes"). Separate financial statements for each guarantor subsidiary are not included in this filing because each guarantor subsidiary is wholly-owned and the guarantees of the Notes are full and unconditional and joint and several. There are no significant restrictions on the ability of the parent company or any guarantor subsidiary to obtain funds from its subsidiaries by dividend or loan. The Notes bear interest at 7.25% per annum and mature on June 1, 2021. Interest is payable semi-annually in arrears on June 1 and December 1 of each year, beginning on December 1, 2011. For the three months ended March 31, 2012, we repurchased \$7.0 million of the Notes.

Credit Agreement

On May 23, 2011, the Company, CoreLogic Australia Pty Limited and the guarantors named therein entered into a senior secured credit facility agreement (the "Credit Agreement") with Bank of America, N.A. as administrative agent and other financial institutions. The Credit Agreement provides for a \$350.0 million five-year term loan facility (the "Term Facility") and a \$550.0 million revolving credit facility (the "Revolving Facility"). The Revolving Facility includes a \$100.0 million multicurrency revolving sub-facility and a \$50.0 million letter of credit sub-facility. As of March 31, 2012, A\$50.0 million, or \$51.7 million, is outstanding under the multicurrency revolving sub-facility related to our acquisition of RP Data. The Credit Agreement also provides for the ability to increase the Term Facility and Revolving Facility commitments provided that the total credit exposure under the Credit Agreement does not

exceed \$1.4 billion in the aggregate. For the three months ended March 31, 2012, we paid \$35.0 million of outstanding indebtedness under the Term Facility of which \$30.6 million was a prepayment. This prepayment was applied to the most current portion of the term loan amortization schedule.

As of March 31, 2012 and December 31, 2011, we have recorded \$13.4 million and \$4.4 million, respectively, of accrued interest expense. For the three months ended March 31, 2012, debt prepayments resulted in \$0.3 million of incremental

interest expense in the accompanying condensed consolidated statements of income due to the write-off of unamortized debt issuance costs.

Acquisition-Related Notes

In March 2011, we entered into a new settlement services joint venture called STARS. Our initial investment in STARS was \$20.0 million and we also issued a note payable for an additional \$15.0 million of consideration, which is non-interest bearing and due in three equal installments. As of March 31, 2012, the discounted balance outstanding under the note was \$8.4 million.

Interest Rate Swaps

In June 2011, we entered into amortizing interest rate swap transactions (“Swaps”) that have a termination date of May 2016. The Swaps are for an initial balance of \$200.0 million, with a fixed interest rate of 1.73% and amortize quarterly by \$2.5 million through September 30, 2013, \$5.0 million from October 1, 2013 through September 30, 2014 and \$7.5 million from October 1, 2014 through May 16, 2016, with a notional amount of \$107.5 million.

We entered into the Swaps in order to convert a portion of our interest rate exposure on the Term Facility floating rate borrowings from variable to fixed. We have designated the Swaps as cash flow hedges. The estimated fair value of these cash flow hedges resulted in a liability of \$5.2 million and \$5.1 million at March 31, 2012 and December 31, 2011, respectively, which is included in the accompanying condensed consolidated balance sheets as a component of other assets.

For the three months ended March 31, 2012 and March 31, 2011, unrealized losses of \$0.1 million (net of \$0.1 million in deferred taxes) and unrealized gains of \$0.8 million (net of \$0.6 million in deferred taxes) were recognized in other comprehensive income/(loss) related to the Swaps.

Note 7 – Income Taxes

The effective income tax rate (provision for income taxes as a percentage of income from continuing operations before equity in earnings of affiliates and income taxes) was 40.5% and 67.8% for the three months ended March 31, 2012 and 2011, respectively. The change in the effective rate is primarily attributable to the \$14.0 million reversal of deferred taxes related to our interest in Dorado when it was held as an equity method investment during the quarter ended March 31, 2011. Income taxes included in equity in earnings of affiliates were \$6.0 million and \$4.2 million for the three months ended March 31, 2012 and 2011. For the purpose of segment reporting, these amounts are not reflected at the segment level but are recorded as a component of the corporate and eliminations group.

As of March 31, 2012 and December 31, 2011, the liability for income taxes associated with uncertain tax positions was \$56.3 million and \$19.3 million, respectively. The increase in the liability as of March 31, 2012 relates primarily to the Company's claim, on behalf of FAFC, for a timing adjustment in a prior year tax return. The claim is for FAFC losses reported and is subject to indemnification from FAFC under the Tax Sharing Agreement. As of March 31, 2012, the liability can be reduced by \$1.9 million of offsets related to state income taxes and timing adjustments. The net amount of \$54.4 million, if recognized, would favorably affect the Company's effective tax rate and after considering the impact of the agreement with FAFC, the impact to net income would be \$6.8 million.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, various state jurisdictions, and various non-U.S. jurisdictions. With a few exceptions, we are no longer subject to U.S. federal, state, and non-U.S. income tax examinations by taxing authorities for years prior to 2007.

It is reasonably possible that the amount of the unrecognized benefit with respect to certain of our unrecognized tax positions could significantly increase or decrease within the next 12 months. These changes may be the result of items such as ongoing audits, competent authority proceedings related to transfer pricing, or the expiration of federal and state statutes of limitation for the assessment of taxes.

We entered into a Tax Sharing Agreement with FAFC in connection with the Separation. The Tax Sharing Agreement governs ours and FAFC's respective rights, responsibilities and obligations after the Distribution with respect to taxes, including ordinary course of business taxes and taxes, if any, incurred as a result of any failure of the Distribution to qualify as a tax-free distribution for U.S. federal income tax purposes within the meaning of Section 355 of the Internal Revenue Code of 1986, as amended, and taxes incurred in connection with certain internal transactions undertaken in anticipation of the

Separation. Our rights, responsibilities and obligations under the Tax Sharing Agreement are discussed in our Annual Report on Form 10-K filed with the SEC on February 29, 2012.

Note 8 – Earnings Per Share

The following is a reconciliation of net income per share, using the treasury-stock method:

	For the Three Months Ended March 31,	
	2012	2011
(in thousands, except per share amounts)		
Numerator for basic and diluted net income/(loss) per share:		
Net income from continuing operations	\$29,052	\$21,605
(Loss)/income from discontinued operations, net of tax	(8,967) 1,651
Loss from sale of discontinued operations, net of tax	(3,454) —
Net income attributable to CoreLogic	\$16,631	\$23,256
Denominator:		
Weighted-average shares for basic income/(loss) per share	106,594	115,545
Dilutive effect of stock options and restricted stock units	733	761
Weighted-average shares for diluted income/(loss) per share	107,327	116,306
Income/(loss) per share		
Basic:		
Net income from continuing operations	\$0.27	\$0.19
(Loss)/income from discontinued operations, net of tax	(0.08) 0.01
Loss from sale of discontinued operations, net of tax	(0.03) —
Net income attributable to CoreLogic	\$0.16	\$0.20
Diluted:		
Net income from continuing operations	\$0.27	\$0.19
(Loss)/income from discontinued operations, net of tax	(0.08) 0.01
Loss from sale of discontinued operations, net of tax	(0.03) —
Net income attributable to CoreLogic	\$0.16	\$0.20

For the three months ended March 31, 2012 and 2011, 5.3 million and 4.8 million stock options and restricted stock units, respectively, were excluded from the computation of diluted earnings per share due to their antidilutive effect.

Note 9 – Fair Value of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). We utilize market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable.

The market approach is applied for recurring fair value measurements and endeavors to utilize the best available information. Accordingly, we utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Fair value balances are classified based on the observability of those inputs.

A fair value hierarchy prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest

priority to unobservable inputs (Level 3 measurement). Level 2 measurements utilize observable inputs in markets other than active markets.

In estimating the fair value of the financial instruments presented, we used the following methods and assumptions:

Cash and cash equivalents

For cash and cash equivalents, we believe that the carrying value is a reasonable estimate of fair value due to the short-term nature of the instruments.

Restricted cash

Restricted cash is comprised of certificates of deposit that are pledged for various letters of credit secured by the Company; we deem the carrying value to be a reasonable estimate of fair value due to the nature of these instruments.

Marketable securities

Equity securities are classified as available-for-sale securities and are valued using quoted prices in active markets.

Long-term debt

The fair value of long-term debt was estimated based on the current rates available to us for debt of the same remaining maturities and consideration of our default and credit risk.

Interest rate swap agreements and foreign currency purchase agreements

The fair value of the interest rate swap agreements and forward currency purchase agreements were estimated based on market value quotes received from the counter parties to the agreements.

The fair values of our financial instruments as of March 31, 2012 are presented in the following table:

(in thousands)	Fair Value Measurements Using			Fair Value
	Level 1	Level 2	Level 3	
Financial Assets:				
Cash and cash equivalents	\$256,359	\$—	\$—	\$256,359
Restricted cash	—	22,072	—	22,072
Equity securities	20,964	—	—	20,964
Total Financial Assets	\$277,323	\$22,072	\$—	\$299,395
Financial Liabilities:				
Total debt	—	853,682	—	853,682
Total Financial Liabilities	\$—	\$853,682	\$—	\$853,682
Derivatives:				
Interest rate swap agreements	\$—	\$(5,202)) \$—	\$(5,202)

The fair values of our financial instruments as of December 31, 2011 are presented in the following table:

(in thousands)	Fair Value Measurements Using			Fair Value

Note 10 – Stock-Based Compensation

We currently issue equity awards under the CoreLogic, Inc. 2011 Performance Incentive Plan (the “Plan”) which was approved by our stockholders at our Annual Meeting held on May 19, 2011. The Plan permits the grant of restricted stock units (“RSUs”), performance-based awards, stock options (“PBRs”), stock appreciation rights, stock bonuses and other forms of awards granted or denominated in our common stock, as well as cash bonus awards. The Plan was adopted, in part, to make an additional 18,000,000 shares of the Company's common stock available for award grants, so that the Company will have sufficient authority and flexibility to adequately provide for future incentives. Prior to the approval of the Plan, we issued share-based awards under the CoreLogic, Inc. 2006 Incentive Plan (the “2006 Plan”).

We primarily utilize RSUs, PBRs and stock options as our share-based compensation instruments for employees and directors. The fair value of any share-based compensation instrument grant is based on the market value of our shares on the date of grant and is recognized as compensation expense over the vesting period.

Restricted Stock Units

For the three months ended March 31, 2012, we awarded 640,667 RSUs with an estimated value of \$10.5 million. The RSU awards will vest ratably over three years.

RSU activity for the three months ended March 31, 2012, is as follows:

(in thousands, except weighted average fair value prices)	Number of	Weighted
	Shares	Average
		Grant-Date
		Fair Value
Unvested RSUs outstanding at December 31, 2011	1,193	\$17.74
RSUs granted	641	\$16.35
RSUs vested	(265)) \$18.13
RSUs forfeited	(11)) \$17.71
Unvested RSUs outstanding at March 31, 2012	1,558	\$17.10

As of March 31, 2012, there was \$18.5 million of total unrecognized compensation cost related to unvested RSUs that is expected to be recognized over a weighted-average period of 2.6 years. The fair value of RSUs is based on the market value of the Company's common stock on the date of grant.

Performance-Based Restricted Stock Units

For the three months ended March 31, 2012, we awarded 345,348 PBRsUs with an estimated value of \$5.5 million. These awards are subject to both service-based and performance-based vesting. The performance period is from January 1, 2012 to December 31, 2012 and the performance metric is adjusted EPS. To the extent the performance criteria are satisfied, the awards vest on December 31, 2014.

PBRsU activity for the three months ended March 31, 2012, is as follows:

(in thousands, except weighted average fair value prices)	Number of Shares	Weighted Average Grant-Date Fair Value
Unvested PBRsUs outstanding at December 31, 2011	988	\$17.71
PBRsUs granted	345	\$16.05
PBRsUs vested	(103)) \$17.76
PBRsUs forfeited	(16)) \$18.44
Unvested PBRsUs outstanding at March 31, 2012	1,214	\$17.23

As of March 31, 2012, there was \$16.9 million of total unrecognized compensation cost related to unvested PBRsUs that is expected to be recognized over a weighted-average period of 2.4 years. The fair value of PBRsUs is based on the market value of the Company's common stock on the date of grant.

Stock Options

In 2012 and 2011, we issued stock options as incentive compensation for certain key employees. The exercise price of each stock option is the closing market price of our common stock on the date of grant. The 2012 and 2011 options will vest in three equal annual installments on the first, second and third anniversaries of grant and expire ten years after the grant date. The fair values of these stock options were estimated using the Black-Scholes valuation model with the following weighted-average assumptions:

	For the Three Months Ended March 31,			
	2012	2011		
Expected dividend yield	—	%	—	%
Risk-free interest rate ⁽¹⁾	1.00	%	2.01	%
Expected volatility ⁽²⁾	42.81	%	32.02	%
Expected life ⁽³⁾	5.5		5.5	

(1) The risk-free interest rate for the periods within the contractual term of the options is based on the U.S. Treasury yield curve in effect at the time of the grant.

(2) The expected volatility is a measure of the amount by which a stock price has fluctuated or is expected to fluctuate based primarily on our and our peers' historical data.

(3) The expected life is the period of time, on average, that participants are expected to hold their options before exercise based primarily on our historical data.

Option activity for the three months ended March 31, 2012 is as follows:

(in thousands, except weighted average price)	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Options outstanding at December 31, 2011	4,601	\$20.78		
Options granted	581	\$16.00		
Options exercised	(14)	\$13.54		
Options canceled	(524)	\$19.99		
Options outstanding at March 31, 2012	4,644	\$20.08	5.7	\$1,652
Options vested and expected to vest at March 31, 2012	4,575	\$20.13	5.6	\$1,616
Options exercisable at March 31, 2012	2,747	\$22.08	3.4	\$755

As of March 31, 2012, there was \$9.0 million of total unrecognized compensation cost related to unvested stock options that is expected to be recognized over a weighted-average period of 2.5 years.

The intrinsic value of options exercised was less than \$0.1 million and \$0.3 million for the three months ended March 31, 2012 and 2011, respectively. This intrinsic value represents the difference between the fair market value of the Company's common stock on the date of exercise and the exercise price of each option.

Employee Stock Purchase Plan

The employee stock purchase plan allowed eligible employees to purchase our common stock at 85.0% of the closing price on the last day of each quarter. The employee stock purchase plan expired in September 2011. We recognized an expense for the amount equal to the discount.

The following table sets forth the stock-based compensation expense recognized for the three months ended March 31, 2012 and 2011.

(in thousands)	For the Three Months Ended March 31,	
	2012	2011
RSUs	\$2,213	\$1,742
PBRsUs	1,360	585
Stock options	781	707
Employee stock purchase plan	—	76
	\$4,354	\$3,110

Note 11 – Litigation and Regulatory Contingencies

We have been named in various lawsuits. Also, we may from time to time be subject to audit or investigation by governmental agencies. Currently, governmental agencies are auditing or investigating certain of our operations. We do not believe the results of these audits or investigations will be material at this time. We are also in litigation with governmental agencies regarding certain appraisal matters.

With respect to matters where we have determined that a loss is both probable and reasonably estimable, we have recorded a liability representing our best estimate of the financial exposure based on known facts. While the ultimate disposition of each such audit, or investigation or lawsuit is not yet determinable, we do not believe that the ultimate resolution of these matters, either individually or in the aggregate, will have a material adverse effect on our financial condition, results of operations or cash flows. In addition, we do not believe there is a reasonable possibility that a material loss exceeding amounts already accrued may have been incurred. We record expenses for legal fees as incurred.

We have \$3.3 million as of March 31, 2012 and \$6.9 million as of December 31, 2011 reserved for litigation and regulatory contingency matters.

FDIC

On May 9, 2011, the Federal Deposit Insurance Corporation (the "FDIC"), as Receiver of Washington Mutual Bank ("WaMu"), filed a complaint in the United States District Court for the Central District of California (the "Court") against CoreLogic Valuation Services, LLC ("CVS"), f/k/a eAppraiseIT, LLC ("eAppraiseIT") and several of its current and former affiliates (the "defendants").

The FDIC complaint alleged that eAppraiseIT was grossly negligent and breached its contract with WaMu in the provision of appraisal services in 2006 and 2007 relating to 194 residential mortgage loans. On November 14, 2011, the Court granted the defendants' motion to dismiss the FDIC's gross negligence, alter ego, single business enterprise and joint venture claims, and a portion of the breach of contract claim. On November 30, 2011, the FDIC filed its first amended complaint, alleging only breach of contract claims and naming only CVS f/k/a eAppraiseIT and its parent CoreLogic Real Estate Solutions, LLC f/k/a First American Real Estate Solutions, LLC as Defendants. FDIC seeks to recover losses of at least \$129.0 million it alleges WaMu suffered on loans allegedly related to the appraisal services. On February 6, 2012, the Court granted the defendants' motion to dismiss the FDIC's \$16.0 million breach of contract claim related to 26 appraisal services allegedly provided before the effective date of the WaMu - eAppraiseIT Agreement. On February 16, 2012, the FDIC filed a second amended complaint reasserting that claim. On April 25, 2012, the Court granted the defendants' motion to dismiss that \$16.0 million claim with prejudice.

The Company intends to defend against the remaining claims vigorously; however, we may not be successful. At this time, we cannot predict the ultimate outcome of this claim or the potential range of damages, if any.

New York Attorney General

On November 1, 2007, the New York Attorney General filed a complaint in New York state court against First American Corporation ("First American") and eAppraiseIT, LLC ("eAppraiseIT"). CoreLogic and its subsidiary, CoreLogic Valuation Services, LLC ("CVS"), are the successors in interest to First American and EA.

The lawsuit concerns appraisal services eAppraiseIT obtained for Washington Mutual Bank ("WaMu") in New York in 2006-2007. The Attorney General asserts that eAppraiseIT acceded to pressure from WaMu in the spring of 2007 and agreed to use a panel of appraisers chosen by WaMu's loan origination staff because they allegedly provided opinions of value that would allow loans to close and that First American and eAppraiseIT falsely represented to the public that the appraisals produced through their efforts were independent of the lender and in compliance with Uniform Standards of Professional Appraisal Practice. The Attorney General subsequently dropped its damages claims, but continues to seek civil penalties, restitution, disgorgement, and unspecified injunctive relief. On November 22, 2011, the Court of Appeals of New York issued a divided ruling affirming lower court decisions denying the defendants' motion to dismiss the complaint on grounds that the Attorney General's claims are pre-empted by federal law. On April 16, 2012, the United States Supreme Court declined to review the Court of Appeals decision. The case has been set for trial beginning June 11, 2012 in New York state trial court.

The Company intends to defend against these claims vigorously; however, we may not be successful. At this time, we cannot predict the ultimate outcome of this claim.

RESPA Class Action

On February 8, 2008, a purported class action was filed in the United States District Court for the Northern District of California, San Jose Division, against Washington Mutual Bank (“WaMu”) and First American eAppraiseIT (“eAppraiseIT”) alleging breach of contract, unjust enrichment, and violations of the Real Estate Settlement Procedures Act (“RESPA”), the California Unfair Competition Law and the California Consumers Legal Remedies Act. The complaint was largely based on the above-described complaint filed by the New York Attorney General and alleged conspiracies between WaMu and eAppraiseIT to allow WaMu to direct appraisers to artificially inflate appraisals in order to qualify higher value loans that WaMu could then sell in the secondary market. Plaintiffs subsequently voluntarily dismissed WaMu and on March 9, 2009 and August 30, 2009, the Court dismissed all claims against eAppraiseIT except the RESPA claim.

On July 2, 2010, the Court denied plaintiff's first motion for class certification. On November 19, 2010, the plaintiffs filed a renewed motion for class certification. On April 25, 2012, the Court granted plaintiffs' renewed motion and certified a

nationwide class of all persons who, on or after June 1, 2006, received home loans from WaMu in connection with appraisals that were obtained through eAppraiseIT. CoreLogic Valuation Services, LLC (“CVS”), as the successor to eAppraiseIT, intends to seek appeal of that decision.

CVS intends to defend against this claim vigorously; however, we may not be successful. At this time we cannot predict the ultimate outcome of this claim or the potential range of damages, if any.

FCRA Class Action

On June 30, 2011, a purported class action was filed in the United States District Court for the Northern District of Illinois against Teletrack, Inc. ("Teletrack"), one of our subsidiaries. The complaint alleges that Teletrack has been furnishing consumer reports to third parties who did not have a permissible purpose to obtain them in violation of the Fair Credit Reporting Act, 15 U.S.C. §1681 et seq., and seeks to recover actual, punitive and statutory damages, as well as attorney's fees, litigation expenses and cost of suit. On September 20, 2011, we filed a Motion to Dismiss the complaint on grounds that the plaintiffs lacked standing. That motion was denied on March 7, 2012. We have denied the allegations and are defending against this claim vigorously; however, we may not be successful. At this time, we cannot predict the ultimate outcome of this claim or the potential range of damages, if any.

Separation

As part of the Separation, we are responsible for a portion of FAFC's contingent and other corporate liabilities.

In the Separation and Distribution Agreement, we agreed with FAFC to share equally in the cost of resolution of a small number of corporate-level lawsuits, including certain consolidated securities litigation matters from which we have since been dropped. There were no liabilities incurred in connection with the consolidated securities matters. Responsibility to manage each case has been assigned to either FAFC or us, with the managing party required to update the other party regularly and consult with the other party prior to certain important decisions such as settlement. The managing party will also have primary responsibility for determining the ultimate total liability, if any, related to the applicable case. We will record our share of any such liability when the responsible party determines a reserve is necessary in accordance with GAAP.

At March 31, 2012, no reserves were considered necessary.

In addition, the Separation and Distribution Agreement provides for cross-indemnities principally designed to place financial responsibility for the obligations and liabilities of FAC's financial services business with FAFC and financial responsibility for the obligations and liabilities of FAC's information solutions business with us. Specifically, each party will, and will cause its subsidiaries and affiliates to, indemnify, defend and hold harmless the other party, its respective affiliates and subsidiaries and each of its respective officers, directors, employees and agents for any losses arising out of or otherwise in connection with the liabilities each such party assumed or retained pursuant to the Separation and Distribution Agreement; and any breach by such party of the Separation and Distribution Agreement.

Note 12 – Discontinued Operations

As of September 30, 2011, we closed our marketing services business (LeadClick) and concluded we would actively pursue the sale of our consumer services (Consumer Credit Monitoring Services), transportation services (comprised of our American Driving Records and CompuNet Credit Services business units) and our wholly-owned appraisal management company businesses. As a result, each of these businesses is reflected in our consolidated financial statements as discontinued operations and the results of these businesses in the prior years have been recast to conform to the 2012 presentation.

On December 22, 2010, we entered into a purchase agreement with an affiliate of Symphony Technology Group, pursuant to which we sold our employer and litigation services businesses. For the three months ended March 31, 2012, we recognized a loss on sale of discontinued operations, net of tax of \$3.5 million for changes in tax related accruals due to expenses incurred in the first quarter of 2012.

As of March 31, 2012, we determined to wind down our wholly-owned appraisal management company business in lieu of a sale which resulted in a pre-tax write-down of the remaining goodwill of \$13.9 million in the first quarter of 2012.

Summarized below are certain assets and liabilities classified as discontinued operation as of March 31, 2012 and December 31, 2011:

(in thousands)	Data Analytics		Mortgage Origination	Default	Total
	Marketing	Consumer	Appraisal	Transportation

(Loss)/income from discontinued operations, net of tax	\$(37)	\$2,415	\$(1,119)	\$392	\$1,651

Note 13 – Transactions with FAFC

In connection with the Separation, we entered into various transition services agreements with FAFC effective June 1, 2010. The agreements include transitional services in the areas of information technology, tax, accounting and finance, employee benefits and internal audit. Except for the information technology services agreements, the transition services agreements are short-term in nature. For the three months ended March 31, 2012 and 2011, the net amount of \$1.7 million and \$1.7 million, respectively, (reflecting services provided by us to FAFC and from FAFC to us) was recognized as a reduction of other operating expenses in connection with the transition services agreements.

In the Separation and Distribution Agreement, we and FAFC agreed to share equally in the cost of resolution of a small number of corporate-level lawsuits, including certain consolidated securities litigation matters from which we have since been dropped. There were no liabilities incurred in connection with the consolidated securities matters. Responsibility to manage each case has been assigned to either FAFC or us, with the managing party required to update the other party regularly and consult with the other party prior to certain important decisions such as settlement. The managing party will also have primary responsibility for determining the ultimate total liability, if any, related to the cases. We will record our share of any such liability when the responsible party determines a reserve is necessary in accordance with GAAP. At March 31, 2012, no reserves were considered necessary. See further discussion at Note 11 – Litigation and Regulatory Contingencies.

Additionally, as part of the Separation, we entered into a Tax Sharing Agreement whereby FAFC is contingently liable for certain tax liabilities. We recorded a receivable for these contingent tax obligations from FAFC of \$41.3 million and \$34.4 million as of March 31, 2012 and December 31, 2011, respectively. The liability for income taxes associated with uncertain tax positions was \$47.6 million and \$10.4 million as of March 31, 2012 and December 31, 2011, respectively. See further discussion at Note 7 – Income Taxes.

In connection with the Separation transactions, we issued approximately \$250.0 million in value, or 12,933,265 shares of our common stock, to FAFC. Based on the closing price of our stock on June 1, 2010, the value of the equity issued

to FAFC was \$242.6 million. As a result, we made a cash payment to FAFC of \$7.4 million to arrive at the full value of \$250.0 million. FAFC has agreed to dispose of the shares five years after the Separation or to bear any adverse tax consequences arising out of holding the shares for longer than that period. On April 11, 2011, we purchased 4.0 million shares of our common stock from a wholly-owned subsidiary of FAFC for total consideration of \$75.8 million based on a spot market price of our common stock on April 5, 2011 of \$18.95 per share. The price per share was agreed upon by the parties during the trading day on April 5, 2011.

FAFC owns two office buildings that are leased to us under the terms of certain lease agreements. Rental expense associated with these properties totaled \$1.1 million and \$1.1 million for the three months ended March 31, 2012 and 2011.

During the three months ended March 31, 2012 and 2011, we entered into commercial transactions with affiliates of FAFC. The revenue associated with these transactions, which primarily relate to sales of data and other settlement services totaled \$3.7 million and \$3.9 million for the three months ended March 31, 2012 and 2011, respectively. The expenses related to these transactions, which primarily related to purchase of data and other settlement services, totaled \$0.3 million and \$2.5 million for the three months ended March 31, 2012 and 2011, respectively.

Note 14 – Segment Information

We have organized our reportable segments into the following three segments: data and analytics, mortgage origination services and default services.

Data and Analytics. Our data and analytics segment owns or licenses data assets including loan information, criminal and eviction records, employment verification, property characteristic information and information on mortgage-backed securities. We both license our data directly to our customers and provide our customers with analytical products for risk management, collateral assessment, loan quality reviews and fraud assessment. Our primary customers are commercial banks, mortgage lenders and brokers, investment banks, fixed-income investors, real estate agents, property and casualty insurance companies, title insurance companies and government-sponsored enterprises.

Our data and analytics segment includes inter-company revenues of \$4.0 million and \$4.2 million for the three months ended March 31, 2012 and 2011, respectively. The segment also includes inter-company expenses of \$1.6 million and \$3.3 million for the three months ended March 31, 2012 and 2011, respectively.

Mortgage Origination Services. Our mortgage origination services segment provides tax monitoring, flood zone certification and monitoring, credit services, mortgage loan administration and production services, lending solutions and mortgage-related business process outsourcing. We are also a provider of geospatial proprietary software and databases combining geographic mapping and data. The segment's primary customers are large, national mortgage lenders and servicers, but we also serve regional mortgage lenders and brokers, credit unions, commercial banks, government agencies and property and casualty insurance companies.

Our mortgage origination services segment includes intercompany revenues of \$0.7 million and \$1.1 million for the three months ended March 31, 2012 and 2011, respectively. The segment also includes inter-company expenses of \$4.0 million and \$10.3 million for the three months ended March 31, 2012 and 2011, respectively.

Default Services. Our default services segment provides mortgage default management services, loss mitigation services, claims management, property valuation and management services. The segment's primary customers are large, national mortgage lenders and servicers, but we also serve regional mortgage lenders and brokers, credit unions, commercial banks, and government agencies.

Our default services segment includes intercompany revenues of \$0.6 million and \$0.1 million for the three months ended March 31, 2012 and 2011, respectively. The segment also includes inter-company expenses of \$0.1 million and \$4.4 million for the three months ended March 31, 2012 and 2011, respectively.

Corporate and Eliminations consists primarily of investment gains and losses, corporate personnel, and other operating expenses associated with our corporate facilities, certain technology initiatives, income taxes included in equity in earnings of affiliates, unallocated interest expense and elimination of inter-company revenues included in the results of the reportable segments.

Selected financial information by reportable segment is as follows:

Note 15 - Guarantor Subsidiaries

As discussed in Note 6 - Long-Term Debt, the Notes are guaranteed on a senior unsecured basis by each of our existing and future direct and indirect subsidiaries that guarantee our Credit Agreement. These guarantees are required in support of the Notes, are coterminous with the terms of the Notes and would require performance upon certain events of default referred to in the respective guarantees. The maximum potential amounts that could be required to be paid under the domestic guarantees are essentially equal to the outstanding principal and interest under the Notes. The following condensed consolidating financial information reflects CoreLogic, Inc.'s (the "Parent's") separate accounts, the combined accounts of the guarantor subsidiaries, the combined accounts of the non-guarantor subsidiaries, the combined consolidating adjustments and eliminations and the Parent's consolidated accounts for the dates and periods indicated.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q and certain information incorporated herein by reference contain forward-looking statements within the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. All statements included or incorporated by reference in this Quarterly Report, other than statements that are purely historical, are forward-looking statements. Words such as "anticipate," "expect," "intend," "plan," "believe," "seek," "estimate," "should," "would," "could," "may," and similar expressions also identify forward-looking statements. The forward-looking statements include, without limitation, statements regarding our overall financial performance, including future revenue and earnings growth, future operations, financial condition and prospects, operating results, future cost savings and the impact of our cost-savings initiatives; our ability to satisfy anticipated operational cash requirements, debt service and other contractual obligations; mortgage market trends; reduction in indebtedness and share repurchase amounts and timing; our access to liquidity sources for new borrowings; our estimated income tax rate, unrecognized tax positions, amortization expenses; the impact of recent accounting pronouncements; our plans to maintain significant cash balances outside of the U.S.; the planned divestiture of our consumer services, transportation services and appraisal management companies businesses; our long-term strategy regarding acquisitions, divestitures and joint ventures; the potential outcome and estimates related to our litigation; the level of aggregate U.S. mortgage originations and applications and inventory of delinquent mortgage loans and loans in foreclosure, the effect of the disposition or work-out of delinquent mortgage loans and loans in foreclosure; customer concentration and customer macro-economic factors; estimates related to our purchase price allocations; our ability to access additional liquidity; and the reasonableness of the carrying value related to specific financial assets and liabilities.

Our expectations, beliefs, objectives, intentions and strategies regarding the future results are not guarantees of future performance and are subject to risks and uncertainties that could cause actual results to differ materially from results contemplated by our forward-looking statements. These risks and uncertainties include, but are not limited to:

- limitations on access to or increase in prices for data from external sources, including government and public record sources;

- changes in applicable government legislation, regulations and the level of regulatory scrutiny affecting our customers or us, including with respect to consumer financial services and the use of public records and consumer data;

- compromises in the security of our data transmissions, including the transmission of confidential information or systems interruptions;

- difficult conditions in the mortgage and consumer lending industries and the economy generally, together with our customer concentration and the impact of these factors thereon;

- our ability to protect proprietary technology rights;

- our significant indebtedness and the restrictions in our various debt agreements;

- our cost reduction plan and our ability to significantly decrease future allocated costs and other amounts in connection therewith;

- risks related to the outsourcing of services and our international operations;

- impairments in our goodwill or other intangible assets; and

the inability to realize the benefits of the Separation as a result of the factors described immediately above, as well as, among other factors, increased borrowing costs, competition between the resulting companies, increased operating or other expenses or the triggering of rights and obligations by the transaction or any litigation arising out of or related to the Separation.

The forward-looking statements in this Quarterly Report on Form 10-Q are subject to additional risks and uncertainties set forth in Item 1A of Part II below, and are based on information available to us on the date hereof. Because of these risk factors, as well as other variables affecting our financial condition, results of operations or cash flows, past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results

or trends in future periods. We assume no obligation to update any forward-looking statements. You are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date of the filing of this Quarterly Report on Form 10-Q.

Separation Transaction

On June 1, 2010, we completed the Separation under which we spun off our financial services businesses into a new, publicly-traded, New York Stock Exchange-listed company called First American Financial Corporation (“FAFC”) through a distribution (the “Distribution”) of all of the outstanding shares of FAFC to the holders of our common shares, par value \$1.00 per share, as of May 26, 2010. After the Distribution, we retained the information solutions businesses.

To effect the Separation, we entered into a Separation and Distribution Agreement (the “Separation and Distribution Agreement”) that governs the rights and obligations of the Company and FAFC regarding the Distribution. It also governs the on-going relationship between the Company and FAFC subsequent to the completion of the Separation and provides for the allocation of assets and liabilities between FAFC and the Company. In addition, we also entered into a Restrictive Covenants Agreement and a Tax Sharing Agreement as described in Note 7 – Income Taxes.

While we are a party to the Separation and Distribution Agreement and various other agreements relating to the Separation, we have determined that we have no material continuing involvement in the operations of FAFC.

In connection with the Separation transactions, we issued approximately \$250.0 million in value, or 12,933,265 shares of our common stock to FAFC. Based on the closing price of our stock on June 1, 2010, the value of the equity issued to FAFC was \$242.6 million. As a result, we made a cash payment to FAFC of \$7.4 million to arrive at the full value of \$250.0 million. FAFC has agreed to dispose of the shares five years after the Separation or to bear any adverse tax consequences arising out of holding the shares for longer than that period. On April 11, 2011, we purchased 4.0 million shares of our common stock from a wholly-owned subsidiary of FAFC for total consideration of \$75.8 million based on a spot market price of our common stock on April 5, 2011 of \$18.95 per share. The price per share was agreed upon by the parties during the trading day on April 5, 2011. See further discussion at Note 13 - Transactions with FAFC.

Business Overview

We are a leading provider of consumer, financial and property information, analytics and services to mortgage originators and servicers, financial institutions and other businesses, government and government-sponsored enterprises.

Our data, query, analytical and business outsourcing services help our customers to identify, manage and mitigate credit and interest rate risk. We have more than one million users who rely on our data and predictive decision analytics to reduce risk, enhance transparency and improve the performance of their businesses.

We believe that we offer our customers access to among the most comprehensive databases of public, contributory and proprietary data covering real property and mortgage information, judgments and liens, parcel and geospatial data, criminal background records, national coverage eviction information, non-prime lending records, credit information, and tax information, among other data types. Our databases include over 700 million historical property transactions, over 93 million mortgage applications and property-specific data covering approximately 99% of U.S. residential properties exceeding 145 million records. We believe that the quality of the data we offer is distinguished by our broad range of data sources and our core expertise in aggregating, organizing, normalizing, processing and delivering data to our customers.

With our data as a foundation, we have built strong analytics capabilities and a variety of value-added business services to meet our customers' needs for mortgage and automotive credit reporting, property tax, property valuation, flood plain location determination and other geospatial data, data, analytics and related services.

Reportable Segments

We have organized our reportable segments into the following three segments: data and analytics, mortgage origination services and default services.

Data and Analytics

Our data and analytics segment offers access to data assets including real estate information (such as property characteristic information, mortgage information, collateral information, and images of publicly recorded documents relating to real property), mortgage-backed securities information, criminal and eviction records, employment verification, and under-

banked credit information. We license our data directly to our customers and provide our customers with analytical products and services for risk management, collateral assessment and fraud prediction. We also provide consumer screening and risk management for the multi-family housing and under-banked credit services industries. Our primary customers are commercial banks, mortgage lenders and brokers, investment banks, fixed-income investors, real estate agents, property and casualty insurance companies, title insurance companies, property management companies and government-sponsored enterprises.

Mortgage Origination Services

We provide loan origination and closing-related services and solutions to mortgage originators, including tax services and flood and data services. The segment's primary customers are large, national mortgage lenders and servicers, but we also serve regional mortgage lenders and brokers, credit unions, commercial banks, government agencies and property and casualty insurance companies. We are also a member in several joint ventures that provide settlement services in connection with residential mortgage loans.

Default Services

We provide mortgage default management services, loss mitigation services, claims management, property valuation and management services. The segment's primary customers are large, national mortgage lenders and servicers, but we also serve regional mortgage lenders and brokers, credit unions, commercial banks, government agencies and property and casualty insurance companies.

RESULTS OF OPERATIONS

Summary

The majority of our revenues are associated with U.S. residential real estate and mortgage transactions and ongoing servicing related to such transactions. We believe the volume of real estate transactions is primarily affected by real estate prices, the availability of funds for mortgage loans, mortgage interest rates, employment levels and the overall state of the U.S. economy. Historically, the greatest volume of mortgage and real estate activity, particularly residential resale, has occurred in the spring and summer months.

For the three months ended March 31, 2012, 69.3% of our revenues were related to real estate mortgage origination and non-default related servicing. Approximately 39.1% of our operating revenues for the three months ended March 31, 2012 were generated from the ten largest United States mortgage originators. Based on statistics published by the Mortgage Bankers' Association ("MBA") and data from significant mortgage originators, we estimate that total mortgage originations increased approximately 5.3% in the first quarter of 2012 relative to the same period of 2011. MBA estimates that mortgage applications increased 21.1% in the first quarter of 2012 relative to the same period of 2011. Given that many of our origination-related products and services are provided early in the origination cycle, application volumes are a leading indicator of demand for these products and services. Due to continued economic weakness, the specter of regulatory change, tighter lending standards, and continued weak housing markets, we expect the level of aggregate United States mortgage originations to remain under pressure for the foreseeable future.

Based on our internal estimates, the level of loans seriously delinquent (loans delinquent 90 days or more) or in foreclosure decreased approximately 10.2% in the quarter ending March 31, 2012 relative to quarter ending March 31, 2011. Additionally, based on our internal analysis and market estimates, we believe that the inventory of seriously delinquent mortgage loans and loans in foreclosure is decreasing and the market is continuing to experience a delay in processing these troubled loans.

On a consolidated basis, our operating revenues increased \$41.8 million, or 13.2%, for the three months ended March 31, 2012, when compared to the same period of the prior year. Data and analytics segment operating revenues increased \$23.8 million, or 20.3% for the three months ended March 31, 2012, when compared to the same period of the prior year, due to higher analytics and licensing revenues and the impact of acquisition activity. Mortgage origination services segment operating revenues increased \$26.3 million, or 21.6% for the three months ended March 31, 2012, when compared to the same period of the previous year, due to higher mortgage origination volumes and the impact of acquisition activity. Default services segment operating revenues decreased \$8.1 million, or 9.7% for the three months ended March 31, 2012, when compared to the same period of the previous year, due to lower technology and business process outsourcing revenues and lower default volumes.

Our total operating expense increased \$23.2 million, or 8.0%, for the three months ended March 31, 2012, when compared to the same period of the prior year due to higher external cost of revenue of \$16.4 million, higher depreciation and amortization of \$6.5 million and higher other operating expenses of \$3.5 million primarily from acquisitions, partially offset by lower salaries and benefits of \$3.3 million.

Total interest expense, net increased \$6.6 million, or 87.3%, for the three months ended March 31, 2012, when compared to the same period of the prior year, due to increased levels of total debt in 2012 compared to 2011.

Gain on investments and other income decreased \$29.2 million, or 94.7%, for the three months ended March 31, 2012, when compared to the same period of the prior year. Lower gain on investments and other income in the first quarter of 2012 is primarily due to the \$24.9 million pre-tax gain on the sale of our remaining investment in DealerTrack Holdings, Inc. recorded for the three months ended March 31, 2011.

Net income decreased \$6.6 million, or 28.5%, for the three months ended March 31, 2012, when compared to the same period of the prior year, primarily due to losses from discontinued operations of \$10.6 million mainly attributable to a pre-tax impairment charge to goodwill of \$13.9 million, higher loss from sale of discontinued operations of \$3.5 million due to changes in tax-related accruals, and lower non-controlling interests of \$0.9 million, partially offset by an increase in net income from continuing operations of \$6.5 million.

The ongoing tightening of mortgage credit, general economic and regulatory uncertainty continue to negatively affect the demand for many of our products and services. These conditions also continue to affect many of our customers. If these challenges persist for us and our customers, they could negatively affect our revenue, earnings and liquidity. For additional

information related to our results of operations for each of our reportable segments please see the discussions under “Data and Analytics,” “Mortgage Origination Services” and “Default Services” below.

Unless otherwise indicated, the Management’s Discussion and Analysis of Financial Condition and Results of Operations in this Quarterly Report on Form 10-Q relate solely to the discussion of our continuing operations.

Data and Analytics

(in thousands, except percentages)	For the Three Months Ended			
	March 31, 2012	March 31, 2011	\$ Change	% Change
Operating revenues	\$141,135	\$117,361	\$23,774	20.3 %

Operating Revenues

Data and analytics segment operating revenues were \$141.1 million for the three months ended March 31, 2012, an increase of \$23.8 million, or 20.3%, when compared to the same period of the prior year. Acquisition activity contributed revenues of \$19.9 million for the three months ended March 31, 2012. Excluding acquisition activity, the increase of \$3.9 million was due to growth in analytical revenues of \$5.7 million and increased data licensing revenues of \$1.1 million, partially offset by lower MLS solution revenues of \$1.1 million due to lower Realtor counts and lower information reports and other revenues of \$1.8 million resulting from the contraction in the real estate market.

External Cost of Revenues

Data and analytics segment external cost of revenues was \$10.4 million, for the three months ended March 31, 2012, a decrease of \$0.4 million, or 3.4%, when compared to the same period of the prior year. Acquisition activity totaled \$1.8 million for the three months ended March 31, 2012. Excluding acquisition activity, the decrease of \$2.1 million was due to a shift in product mix primarily related to higher analytics revenues.

Salaries and Benefits

Data and analytics segment salaries and benefits were \$51.7 million for the three months ended March 31, 2012, an increase of \$10.4 million, or 25.1%, when compared to the same period of the prior year. Acquisition activity accounted for \$9.3 million of the increase for the three months ended March 31, 2012. Excluding acquisition activity, the increase of \$1.1 million was due to higher commission and incentives of \$0.6 million, higher salaries of \$0.4 million and higher other expenses of \$0.1 million.

Other Operating Expenses

Data and analytics segment other operating expenses were \$39.4 million for the three months ended March 31, 2012, an increase of \$3.0 million, or 8.1%, when compared to the same period of the prior year. Acquisition activity

accounted for \$4.6 million of the increase for the three months ended March 31, 2012. Excluding acquisition activity, the decrease of \$1.6 million was due to lower professional fees of \$0.7 and lower other expenses of \$0.9 million.

Depreciation and Amortization

Data and analytics segment depreciation and amortization expense was \$17.4 million for the three months ended

36

March 31, 2012, an increase of \$5.7 million, or 48.3%, when compared to the same period of the prior year. Acquisition activity accounted for \$5.6 million of the increase for the three months ended March 31, 2012.

Loss on Investments and Other Income

Data and analytics segment loss on investments and other income was \$0.1 million for the three months ended March 31, 2011. There were no gains or losses and other income for the three months ended March 31, 2012. The variance relative to the prior year was not meaningful.

Equity in Earnings of Affiliates

Data and analytics segment equity in earnings of affiliates was \$0.6 million for the three months ended March 31, 2012, a decrease of \$0.6 million, or 46.9%, when compared to the same period of the prior year. Acquisition activity totaled \$0.3 million in equity in earnings of affiliates for the three months ended March 31, 2012. Excluding acquisition activity, the decrease of \$0.9 million was due to lower volumes in minority investments related to market conditions and the acquisition of the remaining controlling interest in RP Data Limited in May 2011.

Mortgage Origination Services

(in thousands, except percentages)	For the Three Months Ended			
	March 31, 2012	March 31, 2011	\$ Change	% Change
Operating revenues	\$147,685	\$121,412	\$26,273	21.6 %
External cost of revenues	33,428	19,829	13,599	68.6 %
Salaries and benefits	40,757	37,934	2,823	7.4 %
Other operating expenses	33,665	40,947	(7,282)	(17.8)%
Depreciation and amortization	7,418	5,138	2,280	44.4 %
Total operating expenses	115,268	103,848	11,420	11.0 %
Income from operations	32,417	17,564	14,853	84.6 %
Total interest (expense)/income, net	(298)	837	(1,135)	(135.6)%
Gain on investments and other income	—	24,907	(24,907)	(100.0)%
Income from continuing operations before income taxes	32,119	43,308	(11,189)	(25.8)%
Provision for income taxes	—	—	—	— %
Income from continuing operations before equity in earnings of affiliates	32,119	43,308	(11,189)	(25.8)%
Equity in earnings of affiliates	14,856	9,294	5,562	59.8 %
Income from continuing operations	\$46,975	\$52,602	\$(5,627)	(10.7)%

Operating Revenues

Mortgage origination services segment operating revenues were \$147.7 million for the three months ended March 31, 2012, an increase of \$26.3 million, or 21.6%, when compared to the same period of the prior year. Acquisition activity increased revenues by \$7.7 million for the three months ended March 31, 2012. Excluding acquisition activity, the increase of \$18.6 million was due to higher mortgage origination volumes, which increased credit services revenues by \$11.0 million, flood certifications revenues by \$4.6 million, tax services revenues by \$1.6 million and other revenues by \$0.7 million. Credit services also benefited from increased volumes in automobile-related credit services of \$0.7 million.

External Cost of Revenues

Mortgage origination services segment external cost of revenues was \$33.4 million for the three months ended March 31, 2012, an increase of \$13.6 million, or 68.6%, when compared to the same period of the prior year. Acquisition activity accounted for \$2.4 million of the increase for the three months ended March 31, 2012. Excluding acquisition activity, the increase of \$11.2 million was due to higher credit bureau expense of \$6.5 million, expense from the change in expense classification of our former India-based captive operations from other operating expense to external cost of revenues of \$3.9 million and higher other expenses of \$0.8 million. In August 2011, we sold CoreLogic Global Services Private Limited ("CoreLogic India"), our India-based captive operations, to an affiliate of Cognizant Technology Solutions Corporation ("Cognizant") and subsequently we began to recognize certain expenses in external cost of revenues.

Salaries and Benefits

Mortgage origination services segment salaries and benefits were \$40.8 million for the three months ended March 31, 2012, an increase of \$2.8 million, or 7.4%, when compared to the same period of the prior year. Acquisition activity increased salaries and benefits by \$4.5 million for the three months ended March 31, 2012. Excluding acquisition activity, the decrease of \$1.6 million was due to lower costs at the tax servicing business of \$1.6 million due to the

impact of lower headcount in connection with our tax transformation initiative.

Other Operating Expenses

Mortgage origination services segment other operating expenses were \$33.7 million for the three months ended March 31, 2012, a decrease of \$7.3 million, or 17.8%, when compared to the same period of the prior year. Acquisition activity increased other operating expenses by \$0.3 million for the three months ended March 31, 2012. Excluding acquisition activity,

38

the decrease of \$7.6 million is due to lower net allocated costs of \$3.1 million, lower expense from the change in expense classification of our former India-based captive operations from other operating expense to external cost of revenues of \$3.9 million, lower facilities costs of \$2.0 million, partially offset by higher other expenses of \$1.4 million.

Depreciation and Amortization

Mortgage origination services segment depreciation and amortization expense was \$7.4 million for the three months ended March 31, 2012, an increase of \$2.3 million, or 44.4%, when compared to the same period of the prior year. Acquisition activity accounted for \$1.4 million of the increase for the three months ended March 31, 2012. The remaining variance of \$0.9 million relative to the prior year was primarily due to impairment losses on internally developed software.

Gain on Investments and Other Income

Mortgage origination services segment gain on investments and other income was \$24.9 million for the three months ended March 31, 2011 and reflects the pre-tax gain on the sale of our remaining investment in DealerTrack Holdings, Inc. There were no gains or losses and other income for the three months ended March 31, 2012.

Equity in Earnings of Affiliates

Mortgage origination services segment equity in earnings of affiliates totaled \$14.9 million for the three months ended March 31, 2012, an increase of \$5.6 million, or 59.8%, when compared to the same period of the prior year. The variance is primarily due to higher equity earnings of affiliates from increased loan origination activity.

Default Services

(in thousands, except percentages)	For the Three Months Ended			
	March 31, 2012	March 31, 2011	\$ Change	% Change
Operating revenues	\$74,984	\$83,064	\$(8,080)	(9.7)%
External cost of revenues	36,546	32,954	3,592	10.9%

Other operating expenses	15,630	19,768	(4,138)	(20.9)%
Depreciation and amortization	795	1,317	(522)	(39.6)%
Total operating expenses	64,566	68,417	(3,851)	(5.6)%
Income from operations	10,418	14,647	(4,229)	(28.9)%
Total interest income, net	74	17	57	335.3%
Loss on investments and other income	—	(490)	490	(100.0)%
Income from continuing operations before income taxes	10,492	14,174	(3,682)	(26.0)%
Provision for income taxes	—	—	—	—%
Income from continuing operations before equity in losses of affiliates	10,492	14,174	(3,682)	(26.0)%
Equity in losses of affiliates	—	(18)	18	(100.0)%
Income from continuing operations	\$10,492	\$14,156	\$(3,664)	(25.9)%

Operating Revenues

Default services segment operating revenues were \$75.0 million for the three months ended March 31, 2012, a decrease of \$8.1 million, or 9.7%, when compared the same period of the prior year. The decrease was primarily due to lower technology revenues of \$6.1 million, lower real estate owned asset management revenues of \$1.2 million and lower other revenues of \$3.0 million for the three months ended March 31, 2012. These decreases were partially offset by higher field services revenues of \$2.2 million.

External Cost of Revenues

Default services segment external cost of revenues was \$36.5 million for the three months ended March 31, 2012, an increase of \$3.6 million, or 10.9%, when compared the same period of the prior year. The increase was primarily due to higher expense from the change in expense classification of our former India-based captive operations from other operating expense to external cost of revenues of \$3.7 million and increased costs from higher volumes in field services of \$1.7 million, partially offset by lower other expenses of \$1.8 million due to lower volumes in default services.

Salaries and Benefits

Default services segment salaries and benefits were \$11.6 million for the three months ended March 31, 2012, a decrease of \$2.8 million, or 19.4%, when compared the same period of the prior year. The decrease is predominantly due to the impact of lower headcount and higher efficiency in connection with our cost reduction initiative.

Other Operating Expenses

Default services segment other operating expenses were \$15.6 million for the three months ended March 31, 2012, a decrease of \$4.1 million, or 20.9%, when compared the same period of the prior year. The decrease is primarily due to lower expense from the change in expense classification of our former India-based captive operations from other

operating expense to external cost of revenues of \$3.7 million, lower marketing expenses of \$1.0 million and lower other expenses of \$0.4 million, partially offset by higher net allocated costs of \$1.0 million.

Depreciation and Amortization

Default services segment depreciation and amortization expense was \$0.8 million for the three months ended March 31, 2012, a decrease of \$0.5 million, or 39.6%, when compared the same period of the prior year. The variance is due to

previously recognized impairment losses primarily on internally developed software.

Loss on Investments and Other Income

Default services segment loss on investments and other income was \$0.5 million for the three months ended March 31, 2011, which reflects the loss incurred on the sale of our second lien outsourcing business. There were no gains or losses and other income for the three months ended March 31, 2012.

Equity in Earnings of Affiliates

Default services segment equity in earnings of affiliates totaled \$18.0 thousand for the three months ended March 31, 2011. There were no equity in earnings nor losses in earnings of affiliates for the three months ended March 31, 2012. The variance relative to the prior year was not meaningful.

Corporate and Eliminations

(in thousands, except percentages)	For the Three Months Ended			
	March 31, 2012	March 31, 2011	\$ Change	% Change
Operating revenues	\$(5,703)	\$(5,555)	\$(148)	2.7 %
External cost of revenues	—	387	(387)	(100.0)%
Salaries and benefits	33,642	47,332	(13,690)	(28.9)%
Other operating expenses	(23,484)	(35,481)	11,997	(33.8)%
Depreciation and amortization	3,870	4,847	(977)	(20.2)%
Total operating expenses	14,028	17,085	(3,057)	(17.9)%
Loss from operations	(19,731)	(22,640)	2,909	(12.8)%
Total interest expense, net	(13,620)	(9,067)	(4,553)	50.2 %
Gain on investments and other income	1,641	6,527	(4,886)	(74.9)%
Loss from continuing operations before income taxes	(31,710)	(25,180)	(6,530)	25.9 %
Provision for income taxes	13,238	33,799	(20,561)	(60.8)%
Loss from continuing operations before equity in losses of affiliates	(44,948)	(58,979)	14,031	(23.8)%
Equity in losses of affiliates, net of tax	(6,030)	(4,155)	(1,875)	45.1 %
Loss from continuing operations	\$(50,978)	\$(63,134)	\$12,156	(19.3)%

Operating Revenues

Corporate and eliminations operating revenue was \$(5.7) million for the three months ended March 31, 2012. The elimination of revenues between our operating businesses for the three months ended March 31, 2012 has been relatively comparable to the prior period.

External Cost of Revenues

Corporate and eliminations external cost of revenues was not a meaningful balance.

Salaries and Benefits

Corporate and eliminations salaries and benefits were \$33.6 million for the three months ended March 31, 2012, a decrease of \$13.7 million, or 28.9%, when compared the same period of the prior year. Corporate salaries and benefits decreased \$10.7 million over the prior year due to the sale of CoreLogic India, our India-based captive back office operation to Cognizant in August 2011. The remaining decrease of \$3.0 million is due to the impact of lower headcount.

Other Operating Expenses

Corporate and eliminations other operating expenses were \$(23.5) million for the three months ended March 31, 2012, a variance of \$12.0 million, or 33.8%, when compared the same period of the prior year. Other operating expenses includes eliminations for internal cost of sales between our business segments and expense allocations to our business segments for various shared service costs such as human resources, legal, accounting and finance, and technology infrastructure cost. The increase in corporate and eliminations other operating expenses for the three months ended March 31, 2012, over the prior year was due to reduced salaries and benefit allocations out to our operating segments of \$13.2 million as a result of workforce reductions in corporate shared services and information technology and the outsourcing of certain IT and business process functions in connection with the sale of CoreLogic India, our India-based captive operations to Cognizant in August 2011. See Salaries and Benefits above. The decrease in allocations out to the operating segments was offset by expense reductions in outside services of \$0.8 million and

other expenses of \$0.4 million driven by various corporate cost saving initiatives.

Depreciation and Amortization

Corporate and eliminations depreciation and amortization expense was \$3.9 million for the three months ended March 31, 2012, an increase of \$1.0 million, or 20.2%, when compared the same period of the prior year, primarily due to the

42

amortization in the prior year of certain other deferred assets with useful lives that have since expired.

Total Interest Expense, net

Corporate and eliminations net interest expense was \$13.6 million for the three months ended March 31, 2012, an increase of \$4.6 million, or 50.2%, when compared the same period of the prior year. The increase is primarily due to higher average outstanding debt balances as a result of new credit facilities and the issuance of \$400.0 million new Notes in May of 2011.

Gain on Investments and Other Income

Corporate and eliminations gain on investments and other income was \$1.6 million for the three months ended March 31, 2012, a decrease of \$4.9 million, or 74.9%, when compared the same period in the prior year. The decrease year-over-year reflects realized gains in the prior year upon the sale of various investments held in the Company's marketable securities portfolio.

Equity in Losses of Affiliates, net of tax

Corporate and eliminations equity in losses of affiliates was \$6.0 million for the three months ended March 31, 2012, an increase of \$1.9 million, or 45.1%, when compared the same period of the prior year. We record income tax expense on the earnings from our investments in affiliates in corporate and eliminations. The increase is primarily attributable to higher income tax expense based on higher earnings in affiliates contained in our operating segments.

Income Taxes

The effective income tax rate (provision for income taxes as a percentage of income from continuing operations before equity in earnings of affiliates and income taxes) was 40.5% and 67.8% for the three months ended March 31, 2012 and 2011, respectively. The change in the effective rate is primarily attributable to the \$14.0 million reversal of deferred taxes related to our interest in Dorado when it was held as an equity method investment during the quarter ended March 31, 2011. Income taxes included in equity in earnings of affiliates were \$6.0 million and \$4.2 million for the three months ended March 31, 2012 and 2011. For the purpose of segment reporting, these amounts are not reflected at the segment level but are recorded within corporate and eliminations.

As of March 31, 2012 and December 31, 2011, the liability for income taxes associated with uncertain tax positions was \$56.3 million and \$19.3 million, respectively. The increase in the liability as of March 31, 2012 relates primarily to the Company's claim, on behalf of FAFC, for a timing adjustment in a prior year tax return. The claim is for FAFC losses reported and is subject to indemnification from FAFC under the Tax Sharing Agreement. As of March 31, 2012, the liability can be reduced by \$1.9 million of offsets related to state income taxes and timing adjustments. The net amount of \$54.4 million, if recognized, would favorably affect the Company's effective tax rate and after considering the impact of the agreement with FAFC, the impact to net income would be \$6.8 million.

Our income attributable to noncontrolling interests is attributable to a limited liability company subsidiary, which for tax purposes, is treated as a partnership. Accordingly, no income taxes have been provided for the portion of the partnership income attributable to noncontrolling interests.

We evaluate the realizability of our deferred tax assets by assessing our valuation allowance and by adjusting the amount of such allowance, if necessary. The factors used to assess the likelihood of realization are our forecast of future taxable income and available tax planning strategies that could be implemented to realize the deferred tax assets. Failure to achieve forecasted taxable income in the applicable taxing jurisdictions could affect the ultimate

realization of deferred tax assets and could result in an increase in our effective tax rate on future earnings.

LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents at March 31, 2012 totaled \$256.4 million, a decrease of \$2.9 million from December 31, 2011. We hold our cash balances inside and outside of the U.S. Our cash balances held outside of the U.S. are primarily related to our international operations and at March 31, 2012 totaled \$26.1 million. Most of the amounts held outside of the U.S. could be repatriated to the U.S. but, under current law, would be subject to U.S. federal income taxes, less applicable foreign tax credits. We plan to maintain significant cash balances outside the U.S. for the foreseeable future.

Restricted cash of \$22.1 million at March 31, 2012 and \$22.0 million at December 31, 2011, represents cash pledged for various letters of credit secured by the Company.

Cash Flow

Operating Activities. Cash provided by operating activities reflects net income adjusted for certain non-cash items and changes in certain assets and liabilities. Cash provided by operating activities was approximately \$65.0 million and \$22.6 million during the three months ended March 31, 2012 and 2011, respectively. The increase in cash provided by operating activities was primarily due to higher profitability levels in the current period, higher tax-related refunds, higher dividends received from investments in affiliates and timing in accounts receivable and accounts payable and accrued expenses.

Investing Activities. Cash flows from investing activities consist primarily of capital expenditures, acquisitions and dispositions. Cash used in investing activities was approximately \$20.4 million and \$91.8 million during the three months ended March 31, 2012 and 2011, respectively.

Cash used in investing activities for the three months ended March 31, 2012 was primarily related to investments in property and equipment and capitalized data of \$13.5 million and \$7.0 million, respectively. Cash used in investing activities for the three months ended March 31, 2011 was primarily due to the acquisition of the remaining noncontrolling interest in CoreLogic Information Solutions Holdings, Inc. for \$72.0 million in February 2011, the acquisition of Dorado for \$31.6 million in cash in March 2011, the cash investment in STARS of \$20.0 million in March 2011, investments in property and equipment of \$9.7 million, and investments in capitalized data of \$6.3 million. The 2011 increase in cash used in investing activities was offset by proceeds from the sale of our marketable securities investments of \$53.8 million, primarily our investment in DealerTrack Holdings, Inc.

Financing Activities. Net cash used in financing activities was approximately \$52.0 million for the three months ended March 31, 2012, which was primarily comprised of repayment of long-term debt of \$52.2 million. Net cash used in financing activities was \$228.3 million during the three months ended March 31, 2011. During 2011, we repurchased \$15.1 million of our common stock and repaid \$211.3 million under the revolving portion of our credit agreement and certain acquisition-related notes.

Financing and Financing Capacity

At March 31, 2012, we had total debt outstanding of \$856.7 million, compared to \$908.3 million at December 31, 2011. Our significant debt instruments are described below.

Senior Notes

On May 20, 2011, we issued \$400.0 million aggregate principal amount of 7.25% senior notes due June 1, 2021 (the "Notes"). The Notes are guaranteed on a senior unsecured basis by each of the Company's existing and future direct

and indirect subsidiaries that guarantee the Company's Credit Agreement. Interest is payable semi-annually in arrears on June 1 and December 1 of each year, beginning on December 1, 2011.

The Notes are redeemable by the Company, in whole or in part on or after June 1, 2016 at a price up to 103.63% of the aggregate principal amount of the Notes, plus accrued and unpaid interest, if any, to the applicable redemption date, subject to other limitations. The Company may also redeem up to 35.0% of the original aggregate principal amount of the Notes at any time prior to June 1, 2014 with the proceeds from certain equity offerings at a price equal to 107.25% of the aggregate principal amount of the Notes, together with accrued and unpaid interest, if any, to the applicable redemption date, subject to certain other limitations. The Company may also redeem some or all of the Notes before June 1, 2016 at a redemption price equal to 100.0% of the aggregate principal amount of the Notes, plus a "make-whole premium," plus accrued and unpaid interest, if any, to the date of purchase.

Upon the occurrence of specific kinds of change of control events, holders of the Notes have the right to cause us to purchase some or all of the Notes at 101.0% of their principal amount, plus accrued and unpaid interest, if any, to the date of purchase.

The indenture governing the Notes contains restrictive covenants that limit, among other things, the ability of the Company and its restricted subsidiaries to incur additional indebtedness or issue certain preferred equity, pay dividends or make other distributions or other restricted payments, make certain investments, create restrictions on distributions from restricted subsidiaries, create liens on certain properties and assets to secure debt, sell certain assets, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets, enter into certain transactions with affiliates and designate the Company's subsidiaries as unrestricted subsidiaries. At March 31, 2012, we were in compliance with the covenants of the Notes.

If we have a significant increase in our outstanding debt or if our EBITDA decreases significantly, we may be unable to incur additional amounts of indebtedness, and the holders of the Notes may be unwilling to permit us to amend the restrictive covenants to provide additional flexibility. In addition, the indenture contains a financial covenant for the incurrence of additional indebtedness that requires that the interest coverage ratio be at least 2:00 to 1:00 on a pro forma basis after giving effect to any new indebtedness. There are carve-outs that permit us to incur certain indebtedness notwithstanding satisfaction of this ratio, but they are limited. Based on our EBITDA and interest charges as of March 31, 2012, we would be able to incur additional indebtedness without breaching the limitation on indebtedness covenant contained in the indenture.

Credit Agreement

On May 23, 2011, we entered into a senior secured credit facility (the "Credit Agreement") with Bank of America, N.A. as administrative agent and other financial institutions. The Credit Agreement provides for a \$350.0 million five-year term loan facility (the "Term Facility") and a \$550.0 million revolving credit facility (the "Revolving Facility"). The Revolving Facility includes a \$100.0 million multicurrency revolving sub-facility and a \$50.0 million letter of credit sub-facility. As of March 31, 2012, A\$50.0 million, or \$51.7 million, is outstanding under the multicurrency revolving sub-facility related to our acquisition of RP Data. The Credit Agreement also provides for the ability to increase the Term Facility and Revolving Facility commitments provided that the total credit exposure under the Credit Agreement does not exceed \$1.4 billion in the aggregate.

The obligations under the Credit Agreement are senior secured obligations of the Company and the guarantors. The loans under the Credit Agreement bear interest at LIBOR plus a spread ranging from 1.75% to 2.75%. The Credit Agreement also requires the Company to pay a commitment fee for the unused portion of the Revolving Facility, which will be a minimum of 0.30% and a maximum of 0.50%, depending on the Company's leverage ratio.

The Credit Agreement provides that loans under the Term Facility shall be repaid in equal quarterly installments, commencing on September 30, 2011 and continuing on each three-month anniversary thereafter until and including March 31, 2016 in an amount equal to \$4.4 million on each repayment date from September 30, 2011 through June 30, 2013, \$8.8 million on each repayment date from September 30, 2013 through June 30, 2014 and \$13.1 million on each repayment date from September 30, 2014 through March 31, 2016. The remaining outstanding balance of loans under the Term Facility will be due on May 23, 2016. For the three months ended March 31, 2012, we prepaid \$30.6 million of outstanding indebtedness under the Term Facility. This prepayment was applied to the most current portion of the term loan amortization schedule.

The Credit Agreement contains customary financial maintenance covenants, including a (i) maximum total leverage ratio as of the last date of any fiscal quarter not to exceed 4.25 to 1.00 (stepping down to 4.00 to 1.00 starting in the fourth quarter of 2012, with a further step down to 3.50 to 1.00 starting in the fourth quarter of 2013); (ii) a minimum

interest coverage ratio of at least 3.00 to 1.00; and (iii) a maximum senior secured leverage ratio not to exceed 3.25 to 1.00 (stepping down to 3.00 to 1.00 starting in the fourth quarter of 2012). At March 31, 2012, we were in compliance with these financial covenants and the restrictive covenants described below.

The Credit Agreement also contains restrictive covenants that limit among other things, the ability of the Company and its subsidiaries, to incur additional indebtedness or issue certain preferred equity, pay dividends or make other distributions or other restricted payments, make certain investments, create restrictions on distributions from subsidiaries, to enter into sale-leaseback transactions, amend the terms of certain other indebtedness, create liens on certain assets to secure debt, sell certain assets, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets and enter into certain transactions with affiliates.

At March 31, 2012, we had additional borrowing capacity under the revolving lines of credit of \$498.3 million, and were in compliance with the financial covenants of our loan agreements. However, if we have a significant increase in our outstanding debt or if our EBITDA decreases significantly, we may be unable to incur additional indebtedness, and the lenders

under the Credit Agreement may be unwilling to permit us to amend the financial or restrictive covenants described above to provide additional flexibility.

Interest Rate Swaps

In June 2011, we entered into amortizing interest rate swap transactions (“Swaps”) that have a termination date of May 2016. The Swaps are for an initial notional balance of \$200.0 million, with a fixed interest rate of 1.73% and amortize quarterly by \$2.5 million through September 30, 2013, \$5.0 million from October 1, 2013 through September 30, 2014 and \$7.5 million from October 1, 2014 through May 16, 2016, with a notional amount of \$107.5 million. For the three months ended March 31, 2012, unrealized loss was \$0.1 million (net of \$0.1 million in deferred taxes).

Availability of Additional Liquidity

Our access to additional capital, whether from private capital sources (including financial institutions) or the public capital markets, fluctuates as market conditions change. There may be times when the private capital markets and the public debt or equity markets lack sufficient liquidity or when our securities cannot be sold at attractive prices, in which case we would not be able to access capital from these sources. Based on current market conditions and our financial condition (including our ability to satisfy the conditions contained in our Credit Agreement and the indenture governing the Notes that are required to be satisfied to permit us to incur additional indebtedness as further described above), we believe that we have the ability to effectively access these liquidity sources for new borrowings. However, a weakening of our financial condition or strength, including a significant decrease in our profitability or cash flows or a material increase in our leverage could adversely affect our ability to access these markets and/or increase our cost of borrowings. Due to our liquid-asset position and our ability to generate cash flows from operations, we believe that our resources are sufficient to satisfy our anticipated operational cash requirements, debt service and other contractual obligations (including acquisition-related commitments) through the next twelve months.

Liquidity and Capital Strategy

The Company strives to pursue a balanced long term approach to capital allocation and will consider the repurchase of common shares and the retirement of outstanding debt on an opportunistic basis. In February of 2012, the Company announced it would reduce its debt by at least \$100 million during the first half of 2012. In April of 2012, the Company announced it expects to repurchase at least 5 million shares of its common stock over the balance of 2012 as part of the existing Board of Directors authorization.

For the three months ended March 2012, we repaid in total \$52.2 million of our debt obligations. In April 2012 we repaid in full all amounts outstanding under our 8.5% deferrable interest subordinated notes of \$34.8 million upon the final maturity thereof.

Critical Accounting Policies And Estimates

For additional information with respect to the Company's critical accounting policies which the Company believes could have the most significant effect on the Company's reported results and require subjective or complex judgments by management see pages 30-33 in Item 7, “Management's Discussion and Analysis of Financial Condition and Results of Operations,” of the Company's Annual Report on Form 10-K for the year ended December 31, 2011. Management believes that at March 31, 2012, there had been no material changes to this information.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our primary exposure to market risk relates to interest-rate risk associated with certain financial instruments. Although we monitor our risk associated with fluctuations in interest rates, we do not currently use derivative financial instruments on any material scale to hedge these risks.

As of March 31, 2012, we had approximately \$856.7 million in long-term debt outstanding, of which approximately \$358.0 million was variable interest rate debt. We have entered into interest rate swaps, which converted the interest rate exposure on \$192.5 million of our floating rate debt from variable to fixed rate as of March 31, 2012. A hypothetical 1% increase or decrease in interest rates would have resulted in an approximately \$0.4 million change to interest expense for the quarter ended March 31, 2012.

We are also subject to equity price risk related to our equity securities portfolio. At March 31, 2012, we had equity

securities with a cost and fair value of \$21.0 million.

Although we are subject to foreign currency exchange rate risk as a result of our operations in certain foreign countries, the foreign exchange exposure related to these operations, in the aggregate, is not material to our financial condition or results of operations.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our chief executive officer and chief financial officer have concluded that, as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q, our disclosure controls and procedures, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended, were effective, based on the evaluation of these controls and procedures required by Rule 13a-15(b) thereunder.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal controls over financial reporting during the quarter ended March 31, 2012, that have materially affected, or are reasonably likely to materially affect our internal controls over financial reporting.

PART II: OTHER INFORMATION

Item 1. Legal Proceedings.

For a description of our legal proceedings, see Note 11 – Litigation and Regulatory Contingencies of our condensed consolidated financial statements, which is incorporated by reference in response to this item.

Item 1A. Risk Factors.

A restated description of the risk factors associated with our business is set forth below. This description includes any material changes to and supersedes the description of the risk factors associated with our business previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2011. The risks discussed below are not the only ones facing our business. Please read the cautionary notice regarding forward-looking statements under the heading “Management's Discussion and Analysis of Financial Condition and Results of Operations.”

Risks Related to Our Business

We depend on our ability to access data from external sources to maintain and grow our businesses. If we are unable to access needed data from these sources or if the prices charged for these services increase, the quality, pricing and availability of our products and services may be adversely affected, which could have a material adverse impact on our business, financial condition, and results of operations.

We rely extensively upon data from a variety of external sources to maintain our proprietary and non-proprietary databases, including data from third-party suppliers, various government and public record sources and data contributed by our customers. Our data sources could withdraw their data from us, increase the price we pay for their data, or limit our use of their data for a variety of reasons, including legislatively or judicially imposed restrictions on use. If a number of suppliers are no longer able or are unwilling to provide us with certain data, or if our public record sources of data become unavailable or the cost becomes economically unfeasible, we may need to find alternative

sources. If we are unable to identify and contract with suitable alternative data suppliers and efficiently and effectively integrate these data sources into our service offerings, we could experience service disruptions, increased costs and reduced quality of our services. Additionally, if one or more of our suppliers terminates our existing agreements with them, there is no assurance that we will obtain new agreements with other suppliers on terms favorable to us, if at all. Loss of such access or the availability of data in the future on commercially reasonable terms or at all may reduce the quality and availability of our services and products, which could have a material adverse effect on our business, financial condition and results of operations.

Moreover, some of our suppliers compete with us in certain product offerings, which may make us vulnerable to unpredictable price increases. Significant price increases could have a material adverse effect on our operating margins and our financial position, in particular if we are unable to arrange for substitute sources of data on more favorable economic terms.

Failure to comply with government regulations or changes in government regulations could result in regulatory penalties, restrict or limit our or our customers' operations or make it more burdensome to conduct such operations, which could have a material adverse effect on revenues, earnings and cash flows.

Many of our and our customers' businesses are subject to various federal, state, local and foreign laws and regulations. Our failure to comply with laws and regulations applicable to us could result in restrictions on our ability to provide certain services, imposition of civil fines and criminal penalties, substantial regulatory and compliance costs, litigation expense, adverse publicity and loss of revenue. Likewise, our failure to provide certain products and services in a manner that is compliant with the laws and regulations applicable to our customers' business could increase our litigation expense, result in adverse publicity or otherwise cause our customers to lose confidence in us, any of which could have an adverse affect on our revenues, earnings and cash flows. In addition, independent auditors annually review several of our operations to provide reports on internal controls for our customers and our customers' auditors and regulators. Moreover, since we provide a variety of key services to federally regulated financial institutions, it appears more likely that federal financial institution regulators will also seek to perform examinations on various parts of our operations. In addition, several of our largest bank customers are subject to consent orders with the Office of the Comptroller of the Currency and/or are parties to the National Mortgage Settlement, both of which require them to exercise greater oversight and perform more rigorous audits of their key vendors such as us.

Additional changes in the applicable regulatory environment or interpretations of existing regulations or statutes or enhanced governmental oversight of us or our customers could negatively affect our operations. These changes may compel us to increase our prices in certain situations or decrease our prices in other situations, may restrict our ability to implement price increases, and may limit the manner in which we conduct our business or otherwise may have a negative impact on our ability to generate revenues, earnings and cash flows.

In addition, the Dodd-Frank Act and the extensive regulations being promulgated thereunder materially alter consumer and financial markets regulation. The Dodd-Frank Act expands regulation of real estate appraisals, appraisal management companies, BPOs and AVMs. We also believe it is likely that some of our activities, such as our credit reporting businesses, will be subject to examination and more active oversight by the Consumer Financial Protection Bureau created by the Dodd-Frank Act. If we are unable to adapt our products and services to conform to the new laws and regulations, or if these laws and regulations have a negative impact on our customers, we may experience customer losses or increased operating costs, and our business and results of operations could be negatively affected.

3. Regulatory developments with respect to use of consumer data and public records could have a material adverse effect on our business, financial condition and results of operations.

Because our databases include certain public and non-public personal information concerning consumers, we are subject to government regulation and potential adverse publicity concerning our use of consumer data. We acquire, store, use and provide many types of consumer data and related services that already are subject to regulation under the FCRA, the GLBA, and the Driver's Privacy Protection Act and, to a lesser extent, various other federal, state, and local laws and regulations. These laws and regulations are designed to protect the privacy of consumers and to prevent the unauthorized access and misuse of personal information in the marketplace. Failure to comply with these laws by us could result in substantial regulatory penalties, litigation expense and loss of revenue.

In addition, some of our data suppliers face similar regulatory requirements and, consequently, they may cease to be able to provide data to us or may substantially increase the fees they charge us for this data which may make it financially burdensome or impossible for us to acquire data that is necessary to offer our products and services. Further, many consumer advocates, privacy advocates and government regulators believe that existing laws and regulations do not adequately protect privacy or ensure the accuracy of consumer-related data. As a result, they are seeking further restrictions on the dissemination or commercial use of personal information to the public and private

sectors as well as contemplating requirements relative to data accuracy and the ability of consumers to opt to have their personal data removed from databases such as ours. Any such restrictions may reduce the quality and availability of our products and services, which could have a material adverse effect on our business, financial condition and results of operations.

If we are unable to protect our information systems against data corruption, cyber-based attacks or network security breaches, or if we are unable to provide adequate security in the electronic transmission of sensitive data, it could have a material adverse effect on our business, financial condition and results of operations.

We are highly dependent on information technology networks and systems, including the Internet, to securely process, transmit and store electronic information. In particular, we depend on our information technology infrastructure for business-to-

business and business-to-consumer electronic commerce. Security breaches of this infrastructure, including physical or electronic break-ins, computer viruses, attacks by hackers and similar breaches, can create system disruptions, shutdowns or unauthorized disclosure of confidential information. Unauthorized access could jeopardize the security of information stored in our systems and can lead to "phishing" schemes whereby unauthorized persons pose as employees or other valid personnel and seek to obtain personal or confidential information from our systems. In addition, malware or viruses could jeopardize the security of information stored or used in a user's computer. If we are unable to prevent such security or privacy breaches, our operations could be disrupted, or we may suffer loss of reputation, financial loss and other regulatory penalties because of lost or misappropriated information, including sensitive consumer data.

Likewise, our customers are increasingly imposing more stringent contractual obligations on us relating to our information security protections. If we are unable to maintain protections and processes at a level commensurate with that required by our large customers, it could negatively affect our relationships with those customers or increase our operating costs, which could harm our business or reputation.

5. Systems interruptions may impair the delivery of our products and services, causing potential customer and revenue loss.

System interruptions may impair the delivery of our products and services, resulting in a loss of customers and a corresponding loss in revenue. We depend heavily upon computer systems located in our data centers, including our centers in Santa Ana, California and Westlake, Texas. Certain events beyond our control, including natural disasters and telecommunications failures, could interrupt the delivery of products and services. These interruptions also may interfere with our suppliers' ability to provide necessary data and our employees' ability to attend work and perform their responsibilities. Such interruptions and intrusions may cause a loss of customers or a loss in revenue.

Our revenue from customers in the mortgage and consumer lending industries is affected by the volume of real estate transactions. As a result, declines in transaction volumes in these industries may materially adversely affect our business and results of operations.

A significant portion of our revenue is generated from solutions we provide to the mortgage and consumer lending industries. These industries have been affected by decreased volumes in mortgage origination and residential real estate transactions. Reductions in these transaction volumes could materially adversely affect our business, financial condition and results of operations. In addition, declines in the level of loans seriously delinquent (loans delinquent 90 days or more) or loans in foreclosure and delays in the default cycle continue to negatively affect the demand for many of our products and services in our default services segment. These economic conditions have also had an impact on and continue to affect the performance and financial condition of some of our customers in many of our businesses, which may lead to negative effects on our revenue, earnings and liquidity.

We do not solely control the operations and dividend policies of our partially-owned affiliates, including our 7. National Joint Ventures. A decrease in earnings or dividends from these joint ventures could have a negative impact on our earnings and cash flow.

In our National Joint Ventures with some of our largest customers, we share control of the management of the operations of the joint venture with the other partner. As a result, we cannot solely dictate the business strategy, operations or dividend policies of these joint ventures without the cooperation of the respective partners. A decrease in earnings and dividends derived from these joint ventures could have a negative impact on our earnings and cash flow, and we may not have the ability to prevent such a decrease. In addition, our joint venture partners could decide to exit the joint venture or otherwise terminate the operations, which could have a material adverse effect on our business and results of operations.

8. We rely on our top customers for a significant portion of our revenue and profit, which makes us susceptible to the same macro-economic factors that our customers face. If these customers are negatively impacted by current economic conditions or otherwise experience financial hardship or stress, or if the terms of our relationships with these customers change, our business, financial condition and results of operations could be adversely affected.

The ten largest U.S. mortgage originators generated 39.1% of our 2011 operating revenues for the year ended December 31, 2011, and one customer, Wells Fargo, N.A., accounted for 9.1% of our 2011 operating revenues. These customers face continued pressure in the current economic and regulatory climate. Many of our relationships with these customers are long-standing and are important to our future operating results, but there is no guarantee that we will be able to retain or renew existing agreements or maintain our relationships on acceptable terms or at all. Deterioration in or termination of any of these relationships could significantly reduce our revenue and could adversely affect our business, financial condition

and results of operations.

9. We rely upon proprietary technology and information rights, and if we are unable to protect our rights, our business, financial condition and results of operations could be harmed.

Our success depends, in part, upon our intellectual property rights. We rely primarily on a combination of patents, copyrights, trade secrets, and trademark laws and nondisclosure and other contractual restrictions on copying and distribution to protect our proprietary technology and information. This protection is limited, and our intellectual property could be used by others without our consent. In addition, patents may not be issued with respect to our pending or future patent applications, and our patents may not be upheld as valid or may not prevent the development of competitive products. Any infringement, disclosure, loss, invalidity of, or failure to protect our intellectual property could negatively impact our competitive position, and ultimately, our business. Moreover, litigation may be necessary to enforce or protect our intellectual property rights, to protect our trade secrets, or to determine the validity and scope of the proprietary rights of others. Such litigation could be time-consuming, result in substantial costs and diversion of resources and could harm our business, financial condition, results of operations and cash flows.

10. If our products or services are found to infringe on the proprietary rights of others, we may be required to change our business practices and may also become subject to significant costs and monetary penalties.

As we continue to develop and expand our products and services, we may become increasingly subject to infringement claims from third parties such as non-practicing entities, software providers or suppliers of data. Likewise, if we are unable to maintain adequate controls over how third-party software and data are used we may be subject to claims of infringement. Any claims, whether with or without merit, could:

- be expensive and time-consuming to defend;
- cause us to cease making, licensing or using applications that incorporate the challenged intellectual property;
- require us to redesign our applications, if feasible;
- divert management's attention and resources; and
- require us to enter into royalty or licensing agreements in order to obtain the right to use necessary technologies.

11. Our substantial indebtedness could adversely affect our financial condition and prevent us from fulfilling our obligations under our outstanding debt.

We have a significant amount of indebtedness. As of March 31, 2012, our total debt is approximately \$856.7 million, and we have unused commitments of approximately \$498.3 million under our credit facilities.

Subject to the limitations contained in the credit agreement governing our credit facilities, the indenture governing the 7.25% senior notes and our other debt instruments, we may incur substantial additional debt from time to time to finance working capital, capital expenditures, investments or acquisitions, or for other general corporate purposes. If we do so, the risks related to our high level of debt could intensify. Specifically, our high level of debt could have important consequences, including:

- making it more difficult for us to satisfy our obligations with respect to the notes, our credit facilities and our other debt;
- limiting our ability to obtain additional financing to fund future working capital, capital expenditures and investments or acquisitions or other general corporate purposes;
- requiring a substantial portion of our cash flows to be dedicated to debt service payments instead of other purposes, thereby reducing the amount of cash flows available for working capital, capital expenditures, investments or acquisitions and other general corporate purposes;

- increasing our vulnerability to general adverse economic and industry conditions;
- exposing us to the risk of increased rates as certain of our borrowings, in particular the borrowings under our credit facilities, are at variable rates of interest;
- limiting our flexibility in planning for and reacting to changes in the industries in which we compete;
- placing us at a disadvantage compared to other less leveraged competitors; and
- increasing our cost of borrowing.

12. The instruments governing our indebtedness subject us to various restrictions that could limit our operating flexibility.

The indenture governing the notes and the credit agreement governing our credit facilities each impose operating and financial restrictions on our activities. These restrictions include the financial covenants in our credit facilities which require on-going compliance with certain financial tests and ratios, including a minimum interest coverage ratio and maximum leverage ratio. The operating and financial restrictions in the indenture or the credit agreement could limit or prohibit our ability to, among other things:

- create, incur or assume additional debt;
- create, incur or assume certain liens;
- redeem and/or prepay certain subordinated debt we might issue in the future;
- pay dividends on our stock or repurchase stock;
- make certain investments and acquisitions, including joint ventures;
- enter into or permit to exist contractual limits on the ability of our subsidiaries to pay dividends to us;
- enter into new lines of business;
- engage in consolidations, mergers and acquisitions;
- engage in specified sales of assets; and
- enter into transactions with affiliates.

These restrictions on our ability to operate our business could impact our business by, among other things, limiting our ability to take advantage of financing, merger and acquisition or other corporate opportunities that might otherwise be beneficial to us. Our failure to comply with these restrictions could result in an event of default which, if not cured or waived, could result in the acceleration of substantially all our debt.

13. We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments on or refinance our debt obligations depends on our financial condition and operating performance, which are subject to prevailing economic and competitive conditions and to certain financial, business, legislative, regulatory and other factors beyond our control. We may be unable to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal, premium, if any, and interest on our indebtedness. Our inability to generate sufficient cash flows to satisfy our debt obligations, or to refinance our indebtedness on commercially reasonable terms or at all, would materially and adversely affect our financial position and results of operations. If we cannot make scheduled payments on our debt, we will be in default and holders of the notes or the lenders under our credit facilities could declare all outstanding principal and interest to be due and payable, and the lenders under our credit facilities could terminate their revolving commitments to loan money and foreclose against the assets securing their borrowings, and we could be forced into bankruptcy or liquidation.

14. Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

Borrowings under our credit facilities are at variable rates of interest and expose us to interest rate risk. If interest rates increase, our debt service obligations on the variable rate indebtedness will increase even though the amount borrowed remained the same, and our net income and cash flows, including cash available for servicing our indebtedness, will correspondingly decrease. As of March 31, 2012, we had approximately \$856.7 million in long-term debt outstanding, of which approximately \$358.0 million was variable interest rate debt. We have entered into interest rate swaps, which converted the interest rate exposure on \$192.5 million of our floating rate debt from variable to fixed rate as of March 31, 2012. A hypothetical 1% increase or decrease in interest rates would have resulted in an approximately \$0.4 million change to interest expense for the quarter ended March 31, 2012.

15. We operate in a competitive business environment, and if we are unable to compete effectively our results of operations and financial condition may be adversely affected.

The markets for our products and services are intensely competitive. Our competitors vary in size and in the scope and breadth of the services they offer. We compete for existing and new customers against both third parties and the in-house capabilities of our customers. Some of our competitors, such as the credit bureaus, have substantial resources. Some have widely-used technology platforms that they seek to use as a competitive advantage to drive sales of other products and services. In addition, we expect that the markets in which we compete will continue to attract new competitors and new technologies. These competitors and new technologies may render our existing technology obsolete, resulting in operating inefficiencies and increased competitive pressure. We cannot assure you that we will be able to compete successfully against current or future competitors or that competitive pressures we face in the markets in which we operate will not materially adversely affect our

51

business, financial condition and results of operations.

16. The acquisition and integration or divestiture of businesses by us may not produce the desired financial or operating results.

During 2011, we completed the acquisitions of various businesses in separate transactions, and announced the planned divestiture of certain other businesses to better align with our strategic focus. Expected benefits, synergies and growth from these initiatives may not materialize as planned. In addition, we may have difficulty integrating our completed or any future acquisitions into our operations. If we fail to properly integrate acquired businesses, products, technologies and personnel, it could impair relationships with employees, customers and strategic partners, distract management attention, result in control failures and otherwise disrupt our ongoing business and harm our results of operations. We also may not be able to retain key management and other critical employees after an acquisition. In addition, our future business strategy may include growth through strategic acquisitions, and we may not be able to identify suitable acquisition candidates, obtain the capital necessary to pursue acquisitions or complete acquisitions on satisfactory terms.

Our international outsourcing service providers and our own international operations subject us to additional risks, 17. which could have an adverse effect on our results of operations. Dependence on these operations, in particular our outsourcing arrangements, may impair our ability to operate effectively.

Over the last few years, we have reduced our costs by utilizing lower cost labor outside the U.S. in countries such as India and the Philippines, primarily through outsourcing arrangements. These countries are subject to relatively higher degrees of political and social instability than the U.S. and may lack the infrastructure to withstand political unrest or natural disasters. Such disruptions can impact our ability to deliver our products and services on a timely basis if at all, and to a lesser extent can decrease efficiency and increase our costs. Weakness of the U.S. dollar in relation to the currencies used and higher inflation rates experienced in these countries may also reduce the savings we planned to achieve through this strategy. Furthermore, the practice of utilizing labor based in foreign countries has come under increased scrutiny in the United States and, as a result, some of our customers may require us to use labor based in the U.S. We may not be able to pass on the increased costs of higher-priced U.S.-based labor to our customers, which ultimately could have an adverse effect on our results of operations.

There is a possibility that the foreign countries in which we have outsourcing arrangements or operate could adopt new legislation or regulations that would adversely affect our business by making it difficult, more costly or impossible for us to continue our foreign activities as currently being conducted. In addition, in many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by laws and regulations applicable to us, such as the Foreign Corrupt Practices Act or FCPA. Any violations of FCPA or local anti-corruption laws by us, our subsidiaries or our local agents, could have an adverse effect on our business and reputation and result in substantial financial penalties or other sanctions.

18. We may not realize the full benefit of our outsourcing arrangements, which may result in increased costs, or may adversely affect our service levels for our customers.

We outsource various business process and information technology services to various third parties, including the outsourcing arrangement we entered into with a subsidiary of Cognizant Technology Solutions, and may outsource additional functions to third-party providers in the future. Under our outsourcing arrangements, we rely on the outsource partners to provide services on a timely and effective basis. Although we have service level arrangements governing the performance of these third parties, we do not ultimately control the performance of our outsourcing partners. To the extent our customers object to the outsourcing of services we provide for them either because the services are provided offshore or because of quality issues, we may be required to perform such services directly at a

higher cost. The failure of our outsourcing partners to perform as expected or as contractually required could result in significant disruptions and costs to our operations, and to the services we provide to our customers, which could materially and adversely affect our business, customer relationships, financial condition, operating results and cash flow.

Our outsourcing arrangement with Cognizant Technology Solutions subjects us to a net cumulative minimum commitment of approximately \$303.5 million, plus applicable inflation adjustments, over the next five years, which we are required to pay regardless of the actual value of the services it provides. This minimum commitment could negatively affect our cost structure and our ability to divest operations which utilize services under this outsourcing agreement.

We may not be able to attract and retain qualified management or develop current management to keep pace with 19. company growth, which could have an adverse effect on our ability to maintain or increase our product and service offerings.

We rely on skilled management and our success depends on our ability to attract, train and retain a sufficient number of such individuals. If our attrition rate increases, our operating efficiency and productivity may decrease. We compete for talented individuals not only with other companies in our industry but also with companies in other industries, such as software services, engineering services and financial services companies, and there is a limited pool of individuals who have the skills and training needed to grow our company. Increased attrition or competition for qualified management could have an adverse effect on our ability to expand our business and product offerings, as well as cause us to incur greater personnel expenses and training costs.

20. We have substantial investments in recorded goodwill as a result of prior acquisitions and an impairment of these investments would require a write-down that would reduce our net income.

In accordance with generally accepted accounting principles, or GAAP, existing goodwill is not amortized but instead is required to be assessed for impairment annually or sooner if circumstances indicate a possible impairment. Factors that could lead to impairment of goodwill include significant underperformance relative to historical or projected future operating results, a significant decline in our stock price and market capitalization and negative industry or economic trends. In the event that the book value of goodwill is impaired, any such impairment would be charged to earnings in the period of impairment. In the event of significant volatility in the capital markets or a worsening of current economic conditions, we may be required to record an impairment charge, which would negatively impact our results of operations. Possible future impairment of goodwill under accounting guidance may have a material adverse effect on our business, financial condition and results of operations.

21. The impact and results of the announcement that we were evaluating strategic alternatives, and the subsequent announcement that the review has terminated, are uncertain.

On August 29, 2011, we announced that our Board of Directors formed a committee of independent directors to explore a wide range of strategic alternatives aimed at enhancing stockholder value including, but not limited to, cost savings initiatives, an evaluation of our capital structure, possible repurchases of debt and common stock, the potential disposition of business lines, the potential sale or business combination of us and other alternatives. On February 27, 2012, we announced that the independent committee had concluded its review of strategic alternatives. The independent committee determined that, after a thorough review of the various alternatives, it would be in the best interest of CoreLogic and its stockholders for the Company to continue its present strategic course toward increased value creation for stockholders. Although now concluded, the strategic review process added a level of uncertainty to our business and operations, including in the customer purchase and renewal and employee hiring and retention contexts. In addition to the business risks, the market price of our common stock could continue to be subject to fluctuation.

22. We may not be able to effectively achieve our cost-containment or growth strategies, which could adversely affect our financial condition or results of operations.

Our cost-containment and growth strategies include strategic outsourcing, labor management, streamlining functions and improving overall processes. Although we have implemented many of these plans, we cannot guarantee that we will be able to realize all of the projected benefits of our cost-containment and growth strategies. Our cost-containment efforts could impair our ability to attract and retain resources and can also prohibit us from being able to execute effectively and efficiently on our plans.

Risks Relating to the Separation of FAFC

1. Our historical financial information may not be indicative of our future results as a stand-alone company.

The historical financial information we have included in prior filings for periods ending prior to June 1, 2010, and the unaudited pro forma consolidated financial statements as of and for the twelve months ended December 31, 2009 filed on Form 8-K on March 22, 2010, may not reflect what our results of operations, financial condition and cash flows would have been had we been a stand-alone company during the periods presented and may not be indicative of what our results of operations, financial condition and cash flows may be in the future now that we are a stand-alone company. Specifically, the pro forma financial information and the financial information does not reflect any increased costs associated with being a stand-alone company, including changes in our cost structure and personnel needs.

² The Separation could give rise to liabilities, increased operating expense or other unfavorable effects that may not have otherwise arisen.

The Separation may lead to increased operating and other expenses, both of a non-recurring and a recurring nature, and changes to certain operations, which expenses or changes could arise pursuant to arrangements made with FAFC or the triggering of rights and obligations to other parties. In addition, the Separation may provide more competition in our business than it would have if the companies remained together. For example, FAFC has a small offering of appraisal-related services that may compete with certain of our products and services. With the exception of a noncompetition agreement related to the tax services business, there will be no prohibition on either us or FAFC competing with each other. Litigation with FAFC or other parties could also arise out of the transaction.

3. We are responsible for a portion of FAFC's contingent and other corporate liabilities.

Under the Separation and Distribution Agreement we entered into with FAFC and related agreements, subject to certain exceptions contained in the Tax Sharing Agreement, we and FAFC are each responsible for 50% of certain of FAC's contingent and other corporate liabilities. External costs and expenses associated with the management of these contingent and other corporate liabilities are shared equally. These contingent and other corporate liabilities primarily relate to any third party claims related to the Separation or the Distribution. Contingent and other corporate liabilities that relate only to the information solutions business were generally allocated to us and those that relate only to the financial services business were generally allocated to FAFC.

If FAFC were to default on a payment obligation related to these liabilities, we may be required to pay the amount in default. Accordingly, under certain circumstances, we may be obligated to pay amounts in excess of the agreed-upon share of the contingent and other corporate liabilities, including associated expenses.

4. We share responsibility with FAFC for certain income tax liabilities for tax periods prior to and including the date of the Distribution.

Under the Tax Sharing Agreement, we are generally responsible for taxes attributable to members of the information solutions group of companies or the assets, liabilities or businesses of the information group of companies and FAFC is generally responsible for all taxes attributable to members of the FAFC group of companies or the assets, liabilities or businesses of the FAFC group of companies. Generally, any liabilities arising from adjustments to prior year (or partial year with respect to 2010) consolidated tax returns will be shared in proportion to each company's percentage of the tax liability for the relevant year (or partial year with respect to 2010), unless the adjustment is attributable to either party, in which case the adjustment will generally be for the account of such party. In addition to this potential liability associated with adjustments for prior periods, if FAFC were to fail to pay any tax liability it is required to pay under the Tax Sharing Agreement, we could be legally liable under applicable tax law for such liabilities and required to make additional tax payments. Accordingly, under certain circumstances, we may be obligated to pay amounts in excess of our agreed-upon share of tax liabilities.

If the Distribution or certain internal transactions undertaken in anticipation of the Separation are determined to be taxable for U.S. federal income tax purposes, we, our stockholders that are subject to U.S. federal income tax and FAFC will incur significant U.S. federal income tax liabilities.

In connection with the Separation we received a private letter ruling from the IRS to the effect that, among other things, certain internal transactions undertaken in anticipation of the Separation will qualify for favorable treatment under the Code, the contribution by us of certain assets of the financial services businesses to FAFC, and the pro-rata distribution to our shareholders of the common stock of FAFC will, except for cash received in lieu of fractional shares, qualify as a tax-free transaction for U.S. federal income tax purposes under Sections 355 and 368(a)(1)(D) of the Code. In addition, we received opinions of tax counsel to similar effect. The ruling and opinions relied on certain facts, assumptions, representations and undertakings from us and FAFC regarding the past and future conduct of the companies' respective businesses and other matters. If any of these facts, assumptions, representations or undertakings

is incorrect or not otherwise satisfied, we and our stockholders may not be able to rely on the ruling or the opinions of tax counsel and could be subject to significant tax liabilities. Notwithstanding the private letter ruling and opinions of tax counsel, the IRS could determine on audit that the Separation is taxable if it determines that any of these facts, assumptions, representations or undertakings were not correct or have been violated or if it disagrees with the conclusions in the opinions that were not covered by the private letter ruling, or for other reasons, including as a result of certain significant changes in the stock ownership of us or FAFC after the Separation. If the Separation is determined to be taxable for U.S. federal income tax purposes, we and our stockholders that are subject to U.S. federal income tax could incur significant U.S. federal income tax liabilities.

In addition, under the terms of the Tax Sharing Agreement, in the event the Distribution were determined to be taxable and such determination were the result of actions taken after the Distribution by us or FAFC, the party responsible for such failure would be responsible for all taxes imposed on us or FAFC as a result thereof.

In connection with the Separation, we entered into a number of agreements with FAFC setting forth rights and obligations of the parties post Separation. In addition, certain provisions of these agreements provide protection to 6. FAFC in the event of a change of control of us, which could reduce the likelihood of a potential change of control that our stockholders may consider favorable.

In connection with the Separation, we and FAFC entered into a number of agreements that set forth certain rights and obligations of the parties post-Separation, including the Separation and Distribution Agreement, the Tax Sharing Agreement, the Restrictive Covenants Agreement, certain transition services agreements and leases for our data center and headquarters facilities in Santa Ana. We possess certain rights under those agreements, including without limitation indemnity rights from certain liabilities allocated to FAFC. The failure of FAFC to perform its obligations under the agreements could have an adverse effect on our financial condition, results of operations and cash flows.

In addition, the Separation and Distribution Agreement gives FAFC the right to purchase the equity or assets of our entity or entities directly or indirectly owning the real property databases that we currently own upon the occurrence of certain triggering events. The triggering events include the direct or indirect purchase of the databases by a title insurance underwriter (or its affiliate) or an entity licensed as a title insurance underwriter, including a transaction where a title insurance underwriter (or its affiliate) acquires 25% or more of us. Such a triggering event also triggers the ability of FAFC to terminate our data center and headquarters leases upon 30 days notice. The purchase right expires June 1, 2020. Until the expiration of the purchase right, this provision could have the effect of limiting or discouraging an acquisition of us or preventing a change of control that our stockholders might consider favorable. Likewise, if a triggering event occurs, the loss of ownership of our real property database and our need to move our headquarters and data center very abruptly could have a material adverse effect on our financial condition, business and results of operations.

7. We might not be able to engage in desirable strategic transactions and equity issuances following the Separation because of restrictions relating to U.S. federal income tax requirements for tax-free distributions.

Our ability to engage in significant equity transactions could be limited or restricted in order to preserve for U.S. federal income tax purposes the tax-free nature of the Distribution by FAC. Even if the Distribution otherwise qualified for tax-free treatment under Sections 368(a)(1)(D) and 355 of the Code, it may result in corporate level taxable gain to us under Section 355(e) of the Code if 50% or more, by vote or value, of our common stock or FAFC's common stock are acquired or issued as part of a plan or series of related transactions that includes the Distribution. For this purpose, any acquisitions or issuances of shares of FAC's common stock within two years before the Distribution, and any acquisitions or issuances of our common stock or FAFC's common stock within two years after the Distribution generally are presumed to be part of such a plan, although FAFC or we may be able to rebut that presumption.

Prior to the Distribution, FAC issued to FAFC and FAFC's principal title insurance subsidiary a total of approximately 13 million shares of common stock, which represented approximately 11% of FAC's shares outstanding at the time of the issuance. In addition, in November 2009 FAC issued approximately 9.5 million shares of common stock in connection with its acquisition of the minority interest shares of its then publicly traded subsidiary, First Advantage Corporation. This represented approximately 9% of FAC's shares currently outstanding. Both of these issuances could count towards the 50% limitation, which could hinder our ability to issue additional shares during the two year period following the Distribution. If an acquisition or issuance of our common stock or FAFC's common stock triggers the application of Section 355(e) of the Code, we would recognize taxable gain for which FAF could be wholly or partially liable as described above.

Under the Tax Sharing Agreement, there are restrictions on our ability and FAFC's ability to take actions that could cause the Distribution to fail to qualify as a tax-free transaction, including redemption of equity securities, a sale or other disposition of a substantial portion of assets, and an acquisition of a business or assets with equity securities. These restrictions will apply for 25 months following the Distribution, unless the party seeking to engage in such activity obtains the consent of the other party or obtains a private letter ruling from the IRS or an unqualified opinion of a nationally recognized firm that such action will not cause the Distribution to fail to qualify as a tax-free transaction, and such letter ruling or opinion, as the case may be, is acceptable to each party.

Moreover, the Tax Sharing Agreement generally provides that each party thereto is responsible for any taxes imposed on the other party as a result of the failure of the distribution to qualify as a tax-free transaction under the Code if such failure is attributable to post-Distribution actions taken by or in respect of the responsible party or its stockholders, regardless of when the actions occur after the Distribution, the other party consents to such actions or such party obtains a favorable letter ruling or opinion of tax counsel as described above. For example, we would be responsible for a third party's acquisition of us at a time and in a manner that would cause a failure of the Distribution to qualify as a tax-free transaction under the Code. These

restrictions may prevent us from entering into transactions which might be advantageous to our stockholders.

8. If there are substantial sales of our common stock, our stock price could decline.

Pursuant to the private letter ruling received from the IRS in connection with the Separation, FAFC and its wholly-owned subsidiary First American Title Insurance Company ("FATICO") will be required, respectively, to dispose of the retained shares of our common stock by June 1, 2015. As a result, FAFC and FATICO, respectively, may be required to sell some or all of its retained shares of our common stock at a time when it might not otherwise choose to do so. Furthermore, any such disposition by FAFC or FATICO, respectively, of its shares of our common stock in the public market, or the perception that such dispositions could occur, could adversely affect prevailing market prices of our common stock. On April 11, 2011, we repurchased 4.0 million shares of our common stock from FATICO for an aggregate cash purchase price of \$75.8 million.

The market price of our common stock could decline as a result of sales of a large number of shares of common stock in the market, or the perception that these sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem attractive.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Unregistered Sales of Equity Securities

During the quarter ended March 31, 2012, we did not issue any unregistered common shares.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

During the quarter ended March 31, 2012, we did not make any purchases of our common shares. Our stock repurchase plan was initially approved by the Board of Directors and announced by us on May 18, 2004, which was amended to add additional amounts to the repurchase authorization as subsequently amended on May 19, 2005, June 26, 2006, and January 15, 2008. The stock repurchase plan has no expiration date. This plan provided for the repurchase up to \$800 million shares of our common stock.

Under our May 2011 credit agreement, our stock repurchase capacity is restricted to \$100.0 million per fiscal year, with the ability to undertake an additional amount of repurchases in such fiscal year provided that, on a pro forma basis after giving effect to the stock repurchase, our senior secured leverage ratio does not exceed 2.25:1.0 or our total leverage ratio does not exceed 3.25:1.0. In addition, our stock repurchase capacity is limited by the restricted payments covenant in the indenture governing our 7.25% senior notes. While we continue to preserve the capacity to execute share repurchases under our existing share repurchase authorization, going forward we will consider the repurchase of common shares and retirement of outstanding debt on an opportunistic basis.

Item 3. Defaults Upon Senior Securities. None.

Item 4. Mine Safety Disclosures. Not applicable.

Item 5. Other Information. None.

Item 6. Exhibits.

See Exhibit Index.
