

KAMAN Corp
Form 10-Q
May 03, 2017

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2017

Or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-35419

KAMAN CORPORATION

(Exact name of registrant as specified in its charter)

Connecticut 06-0613548
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

1332 Blue Hills Avenue
Bloomfield, Connecticut 06002
(Address of principal executive offices) (Zip Code)
(860) 243-7100
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter)

during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: KAMAN Corp - Form 10-Q

Large accelerated filer Accelerated filer Non-accelerated filer
Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At April 28, 2017, there were 27,188,116 shares of Common Stock outstanding.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month fiscal periods ended March 31, 2017 and April 1, 2016

(Unaudited)

1. BASIS OF PRESENTATION

The December 31, 2016, Condensed Consolidated Balance Sheet amounts have been derived from the previously audited Consolidated Balance Sheet of Kaman Corporation and subsidiaries (collectively, the "Company"), but do not include all disclosures required by accounting principles generally accepted in the United States of America ("US GAAP"). In the opinion of management, the condensed consolidated financial information reflects all adjustments necessary for a fair statement of the Company's financial position, results of operations and cash flows for the interim periods presented. All such adjustments are of a normal recurring nature, unless otherwise disclosed in this report. The statements should be read in conjunction with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016. The results of operations for the interim periods presented are not necessarily indicative of trends or of results to be expected for the entire year.

The Company has a calendar year-end; however, its first three fiscal quarters follow a 13-week convention, with each quarter ending on a Friday. The first quarters for 2017 and 2016 ended on March 31, 2017, and April 1, 2016, respectively.

2. RECENT ACCOUNTING STANDARDS

In March 2017, the FASB issued Accounting Standards Update ("ASU") 2017-08, "Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20) - Premium Amortization on Purchased Callable Debt Securities". Under this ASU, the amortization period for certain callable debt securities held at a premium is shortened to more closely align the amortization period with expectations incorporated in market pricing on the underlying securities. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company is currently assessing the potential impact this standard update might have on its consolidated financial statements.

In March 2017, the FASB issued ASU 2017-07, "Compensation - Retirement Benefits (Topic 715) - Improving the Net Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost". The objective of this standard update is to improve the presentation of net periodic pension cost and net periodic postretirement benefit cost. This standard update requires employers to disaggregate the service cost component from the other components of net benefit cost. This ASU also provides guidance on how to present the service cost component and the other components of net benefit cost in the income statement and allows only the service cost component of net benefit cost to be eligible for capitalization. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. The Company is currently assessing the potential impact this standard update might have on its consolidated financial statements.

In February 2017, the FASB issued ASU 2017-05, "Other Income - Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20)". The objective of this standard update is to clarify the scope of asset derecognition guidance and to provide new guidance for partial sales of nonfinancial assets. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted, however, an entity is required to apply the amendments in this ASU in the same period that it applies the amendments for ASU 2014-09. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment". The objective of this standard update is to simplify the subsequent measurement of goodwill, eliminating Step 2 from the goodwill impairment test. Under this ASU, an entity should perform its annual goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity would recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value,

assuming the loss recognized does not exceed the total amount of goodwill for the reporting unit. The standard update is effective for fiscal years beginning after December 15, 2019. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In November 2016, the FASB issued ASU 2016-18, "Statement of Cash Flows (Topic 230) - Restricted Cash". The objective of this standard update is to address the diversity in classification and presentation of changes in restricted cash on the statement of cash flows. Under this ASU, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
(Unaudited)

2. RECENT ACCOUNTING STANDARDS (CONTINUED)

In October 2016, the FASB issued ASU 2016-16, "Income Taxes (Topic 740) - Intra-Entity Transfers of Assets Other Than Inventory". Under this ASU, income tax consequences of an intra-entity transfer of an asset other than inventory will be recognized when the transfer occurs. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230) - Classification of Certain Cash Receipts and Cash Payments". This standard update was issued to address diversity in practice in how certain cash receipts and cash payments are presented and classified. The provisions of ASU 2016-15 will be effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted. The adoption of this standard update is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-07, "Investments - Equity Method and Joint Ventures (Topic 323) - Simplifying the Transition to the Equity Method of Accounting". This standard update eliminates the requirement to retroactively adopt the equity method of accounting when an investment qualifies for use of the equity method. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-06, "Derivatives and Hedging (Topic 815) - Contingent Put and Call Options in Debt Instruments". The objective of this standard update is to eliminate inconsistent practices with regards to assessing embedded contingent put and call options in debt instruments. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU 2016-05, "Derivatives and Hedging (Topic 815) - Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships". The objective of this standard update is to clarify whether a change in the counterparty to a derivative instrument results in a requirement to dedesignate that hedging relationship and discontinue the application of hedge accounting. The standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)". Under this ASU as amended, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: (i) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (ii) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessor accounting is largely unchanged under this ASU as amended. This standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company is developing a project plan to implement this standard update and is currently assessing the potential impact this standard update might have on its consolidated financial statements. The Company anticipates the ASU will have a material impact on its assets and liabilities due to the addition of right-of-use assets and lease liabilities to the balance sheet, however it does not expect the ASU to have a material impact on the Company's cash flows or results of operations.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall (Subtopic 825-10) - Recognition and Measurement of Financial Assets and Financial Liabilities". The objective of this standard update is to remove inconsistent practices with regards to the accounting for financial instruments between Generally Accepted Accounting Principles ("US GAAP") and International Financial Reporting Standards ("IFRS"). The standard update intends to improve the reporting model for financial instruments to provide users of financial statements with more decision-useful information. The provisions of this standard update are effective for interim and annual periods beginning after December 15, 2017. The Company does not expect these changes to have a material impact on its consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, "Inventory (Topic 330) - Simplifying the Measurement of Inventory". ASU 2015-11 requires an entity to measure inventory within the scope of the standard at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The standard update is effective for fiscal years beginning after December 15, 2016, including interim periods within those years. The adoption of this standard update did not have a material impact on the Company's consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
(Unaudited)

2. RECENT ACCOUNTING STANDARDS (CONTINUED)

Revenue Recognition

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)". The objective of this standard update is to remove inconsistent practices with regard to revenue recognition between US GAAP and IFRS. The standard intends to improve comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. The provisions of ASU No. 2014-09 will be effective for interim and annual periods beginning after December 15, 2017, with early adoption permitted for annual periods beginning after December 15, 2016. The Company has developed a project plan that includes a three-phase approach to implementing this standard update. Phase one, the assessment phase, was completed in early 2016. The Company concluded the second phase of the project, which included conversion activities such as establishing policies, identifying system impacts and developing a basic understanding of the impact this standard update will have on the Company's consolidated financial statements, during the fourth quarter of 2016. Phase three, which began during the first quarter of 2017, includes the integration of the standard update into financial reporting processes and systems, and developing a more robust understanding of the financial impact of this standard update on the Company's consolidated financial statements. The Company anticipates the transition to the new standard could have a material impact on the Company's consolidated financial statements but will be unable to quantify that impact until the third phase of the project has been completed. The Company expects the cost of the activities it is undertaking to transition to the new standard will result in an increase in selling, general and administrative expenses in 2017 and beyond.

The Company intends to transition using the modified retrospective method upon adoption of this standard update. The Distribution segment currently recognizes the majority of its revenue at a point in time, whereas the new standard will result in certain revenue streams moving to an over time revenue recognition model. The majority of our long-term contracts in the Aerospace segment are currently accounted for under the percentage-of-completion method using units-of-delivery as a measurement basis. For these programs, early-contract unit costs in excess of the average expected cost over the life of the contract are capitalized and amortized over the number of units in the contract. With the adoption of this standard update, some deferred unit costs in excess of the contract average will be eliminated through retained earnings and will not be amortized into future earnings. The Company anticipates that many of these contracts will move to an over time revenue model under the percentage-of-completion method. For example, revenue for the Company's Joint Programmable Fuze ("JPF") program with the U.S. Government ("USG") will move from percentage-of-completion using units-of-delivery as the measurement basis to the over time revenue recognition model using input costs as the basis for recognizing progress to completion. Conversely, revenue for the K-MAX® program will move from cost-to-cost revenue recognition to point in time, with revenue on these aircraft being recognized upon delivery to the end customer. The Company is currently working to quantify the impact these changes will have on the financial statements; however, the ultimate impact cannot currently be determined as it will be dependent upon the terms of contracts with customers at such time and the Company's progress to completion.

Subsequent to the issuance of ASU 2014-09, the FASB has issued the following updates: ASU 2015-14, "Revenue from Contracts with Customers (Topic 606) - "Deferral of the Effective Date"; ASU 2016-08, "Revenue from Contracts with Customers (Topic 606) - Principal versus Agent Considerations (Reporting Revenue Gross versus Net)"; ASU 2016-10, "Revenue from Contracts with Customers (Topic 606) - Identifying Performance Obligations and Licensing"; ASU 2016-12, "Revenue from Contracts with Customers (Topic 606) - Narrow-Scope Improvements and Practical Expedients"; and ASU 2016-20, "Technical Corrections and Improvements to Topic 606". The amendments in these updates affect the guidance contained within ASU 2014-09 and will be assessed as part of the Company's revenue recognition project plan.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
 For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
 (Unaudited)

3. ACCOUNTS RECEIVABLE, NET

Accounts receivable, net consists of the following:

	March 31, 2017	December 31, 2016
In thousands		
Trade receivables	\$ 154,003	\$ 143,471
U.S. Government contracts:		
Billed	17,007	17,244
Costs and accrued profit – not billed	3,326	1,478
Commercial and other government contracts:		
Billed	50,812	50,560
Costs and accrued profit – not billed	35,009	22,234
Less allowance for doubtful accounts	(3,997)	(4,123)
Accounts receivable, net	\$ 256,160	\$ 230,864

The increase in commercial and other government contracts unbilled costs and accrued profits is primarily related to receivables under the K-MAX® program. The increase in trade receivables is primarily due to an increase in receivables at the Distribution segment.

Additionally, \$4.5 million and \$3.7 million of unbilled receivables and accrued profit for the K-MAX® program were included in Other assets on the Company's Condensed Consolidated Balance Sheet as of March 31, 2017, and December 31, 2016, as the amounts due are expected to be collected more than one year after the balance sheet date.

Accounts receivable, net includes amounts for matters such as contract changes, negotiated settlements and claims for unanticipated contract costs. These amounts are as follows:

	March 31, 2017	December 31, 2016
In thousands		
Contract changes, negotiated settlements and claims for unanticipated contract costs	\$ 900	\$ 900

4. FAIR VALUE MEASUREMENTS

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

The Company uses a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 — Quoted prices in active markets for identical assets or liabilities.

Level 2 — Observable inputs other than quoted prices included in Level 1, such as quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data.

Level 3 — Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
 For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
 (Unaudited)

4. FAIR VALUE MEASUREMENTS (CONTINUED)

The following table presents the carrying value and fair value of financial instruments that are not carried at fair value:

	March 31, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
In thousands				
Debt:				
Level 1	\$113,756	\$170,935	\$113,203	\$170,935
Level 2	317,966	295,397	303,855	279,582
Total	\$431,722	\$466,332	\$417,058	\$450,517

The above fair values were computed based on quoted market prices (Level 1) and discounted future cash flows (Level 2 observable inputs), as applicable. Differences from carrying values are attributable to interest rate changes subsequent to when the transactions occurred.

The fair values of Cash and cash equivalents, Accounts receivable, net and Accounts payable - trade approximate their carrying amounts due to the short-term maturities of these instruments.

Recurring Fair Value Measurements

The Company holds derivative instruments for foreign exchange contracts and interest rate swaps that are measured at fair value using observable market inputs such as forward rates and our counterparties' credit risks. Based on these inputs, the derivative instruments are classified within Level 2 of the valuation hierarchy and have been included in other accruals and payables and other long-term liabilities on the Condensed Consolidated Balance Sheets at March 31, 2017, and December 31, 2016. Based on the Company's continued ability to trade and enter into forward contracts and interest rate swaps, we consider the markets for our fair value instruments to be active.

The Company evaluated the credit risk associated with the counterparties to these derivative instruments and determined that as of March 31, 2017, such credit risks have not had an adverse impact on the fair value of these instruments.

5. DERIVATIVE FINANCIAL INSTRUMENTS

The Company is exposed to certain risks relating to its ongoing business operations, including market risks relating to fluctuations in foreign currency exchange rates and interest rates. Derivative financial instruments are recognized on the Condensed Consolidated Balance Sheets as either assets or liabilities and are measured at fair value. Changes in the fair values of derivatives are recorded each period in earnings or accumulated other comprehensive income, depending on whether a derivative is effective as part of a hedged transaction. Gains and losses on derivative instruments reported in accumulated other comprehensive income are subsequently included in earnings in the periods in which earnings are affected by the hedged item. The Company does not use derivative instruments for speculative purposes.

Forward Exchange Contracts

The Company holds forward exchange contracts designed to hedge forecasted transactions denominated in foreign currencies and to minimize the impact of foreign currency fluctuations on the Company's earnings and cash flows.

Some of these contracts are designated as cash flow hedges. The Company will include in earnings amounts currently included in accumulated other comprehensive income upon recognition of cost of sales related to the underlying transaction. These contracts were not material to the Company's Condensed Consolidated Financial Statements as of and for the three-month fiscal periods ended March 31, 2017, and April 1, 2016.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
 For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
 (Unaudited)

5. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

Interest Rate Swaps

The Term Loan Facility of the Company's Credit Agreement ("Term Loan") contains floating rate obligations and is subject to interest rate fluctuations. During 2015, the Company entered into interest rate swap agreements for the purposes of hedging the eight quarterly variable-rate Term Loan interest payments due in 2016 and 2017. Additionally, the Company entered into interest rate swap agreements to effectively convert \$83.8 million of its variable rate revolving credit facility debt to a fixed interest rate. These interest rate swap agreements were designated as cash flow hedges and intended to manage interest rate risk associated with the Company's variable-rate borrowings and minimize the impact on its earnings and cash flows of interest rate fluctuations attributable to changes in LIBOR rates. These agreements were not material to the Company's Condensed Consolidated Balance Sheets for the three-month fiscal periods ended March 31, 2017 and December 31, 2016.

The activity related to these contracts was not material to the Company's Condensed Consolidated Financial Statements for the three-month fiscal periods ended March 31, 2017 and April 1, 2016. Over the next twelve months, the income related to cash flow hedges expected to be reclassified from other comprehensive income is \$0.2 million.

6. INVENTORIES

Inventories consist of the following:

	March 31, 2017	December 31, 2016
In thousands		
Merchandise for resale	\$ 154,397	\$ 158,618
Raw materials	18,977	20,592
Contracts and other work in process (including certain general stock materials)	187,716	189,295
Finished goods	29,057	25,309
Total	\$ 390,147	\$ 393,814

Inventories include amounts associated with matters such as contract changes, negotiated settlements and claims for unanticipated contract costs. These amounts are as follows:

	March 31, 2017	December 31, 2016
In thousands		
Contract changes, negotiated settlements and claims for unanticipated contract costs	\$ 3,788	\$ 3,629

K-MAX® inventory of \$16.3 million and \$15.9 million as of March 31, 2017, and December 31, 2016, respectively, was included in contracts and other work in process inventory and finished goods on the Company's Condensed Consolidated Balance Sheet. These amounts exclude the inventory associated with our new build aircraft currently under contract. Management believes that a significant portion of this K-MAX® inventory will be sold after March 31, 2018, based upon the anticipation of additional aircraft manufacturing and supporting the fleet for the foreseeable future.

At March 31, 2017, and December 31, 2016, \$7.0 million and \$7.2 million, respectively, of SH-2G(I) inventory was included in contracts and other work in process inventory on the Company's Condensed Consolidated Balance Sheet. Management believes that approximately \$3.7 million of the SH-2G(I) inventory will be sold after March 31, 2018.

This balance represents spares requirements and inventory to be used on SH-2G programs.

For the three-month fiscal periods ended March 31, 2017 and April 1, 2016

(Unaudited)

6. INVENTORIES (CONTINUED)

At March 31, 2017, backlog for the A-10 program with Boeing was \$3.8 million, representing 8 shipsets, and total program inventory was \$11.1 million, of which \$8.2 million is associated with nonrecurring costs. Through March 31, 2017, the Company has delivered 165 shipsets over the life of the program. During 2016, the U.S. Air Force ("USAF") indicated that they would delay the retirement of the A-10 fleet due to its vital close air support, search and rescue capabilities and the lack of a suitable replacement. The Company continues to monitor the defense budget and understands that despite this positive indication, the future of this program could be at risk without the continued support of Congress. The Company has not received any orders for additional shipsets in 2017, and as such, expects a break in production as it completes the units currently on order and waits for follow-on orders from the customer. The customer has not given any indication that this program will be terminated. Final production and deliveries of existing orders under this contract are anticipated to be completed during the second quarter of 2017. Tooling and nonrecurring costs on this program are being amortized over 242 shipsets, the number of shipsets under the program of record. These nonrecurring costs may not be recoverable in the event of an extended break in production or contract termination prior to the completion of the 242 shipsets.

Long-term Contracts

For long-term aerospace contracts, the Company generally recognizes revenue and cost of sales using the percentage-of-completion method of accounting, which allows for recognition of revenue as work on a contract progresses. The Company recognizes revenues and cost of sales based on either (1) the cost-to-cost method, in which case sales and profit are recorded based upon the ratio of costs incurred to estimated total costs to complete the contract, or (2) the units-of-delivery method, in which case sales are recognized as deliveries are made and cost of sales is computed on the basis of the estimated ratio of total cost to total sales.

Revenue and cost estimates for all significant long-term contracts for which revenue is recognized using the percentage-of-completion method of accounting are reviewed and reassessed quarterly. Based upon these reviews, the Company records the effects of adjustments in profit estimates each period. If at any time the Company determines that in the case of a particular contract total costs will exceed total contract revenue, the Company will record a provision for the entire anticipated contract loss at that time. For the three-month fiscal period ended March 31, 2017, there was a net increase in the Company's operating income attributable to changes in contract estimates of \$1.0 million. This increase was primarily a result of improved performance on the JPF and AH-1Z programs. These improvements were partially offset by cost growth on the K-MAX® program. There was a net decrease in the Company's operating income from changes in contract estimates of \$1.0 million for the three-month fiscal period ended April 1, 2016. This decrease was primarily a result of cost growth on the Boeing 767/777 program.

7. GOODWILL AND OTHER INTANGIBLE ASSETS, NET

Goodwill

The following table sets forth the change in the carrying amount of goodwill for each reportable segment and for the Company:

	Distribution Aerospace Total		
In thousands			
Gross balance at December 31, 2016	\$ 149,204	\$ 204,942	\$ 354,146
Accumulated impairment	—	(16,252)	(16,252)
Net balance at December 31, 2016	149,204	188,690	337,894

7. GOODWILL AND OTHER INTANGIBLE ASSETS, NET (CONTINUED)

Other intangible assets consisted of:

	Amortization Period	At March 31, 2017		At December 31, 2016	
		Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
In thousands					
Customer lists / relationships	6-26 years	\$155,297	\$ (54,934)	\$154,745	\$ (51,800)
Developed technologies	10-20 years	19,143	(1,709)	19,049	(1,394)
Trademarks / trade names	3-15 years	8,400	(3,410)	8,344	(3,250)
Non-compete agreements and other	1-9 years	8,121	(7,697)	8,096	(7,444)
Patents	17 years	523	(428)	523	(425)
Total		\$191,484	\$ (68,178)	\$190,757	\$ (64,313)

The changes in other intangible assets are primarily attributable to changes in foreign currency exchange rates.

In accordance with ASC 360 - Property, Plant, and Equipment ("ASC 360"), the Company is required to evaluate long-lived intangible assets for possible impairment whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. We are continuing to monitor the ongoing operating performance of our UK Composites facility, including an ongoing assessment for potential triggering events that would require further evaluation. The total amount of intangible assets at our U.K. Composites business at March 31, 2017, is, \$11.2 million.

8. DEBT

Convertible Notes

In November 2010, the Company issued convertible unsecured notes due on November 15, 2017, in the aggregate principal amount of \$115.0 million in a private placement offering (the "Convertible Notes"). These notes bear 3.25% interest per annum on the principal amount, payable semiannually in arrears on May 15 and November 15 of each year, beginning in 2011. The Convertible Notes will mature on November 15, 2017, unless earlier redeemed, repurchased by the Company or converted. Upon conversion, the Convertible Notes require net share settlement, where the aggregate principal amount of the notes will be paid in cash and remaining amounts due, if any, will be settled in cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election. During the quarter ended March 31, 2017, the market value of the Company's Common Stock exceeded 130% of the conversion price of the notes for 20 or more of the last 30 consecutive trading days preceding the quarter end. As a result, the Convertible Notes are convertible at the option of the noteholders throughout the second fiscal quarter, and will remain convertible until the close of business on the second Scheduled Trading Day (as defined in the Convertible Notes indenture) immediately preceding the maturity date. Accordingly, the carrying amount of the Convertible Notes was reclassified to current liabilities and a portion of the equity component, representing the unamortized debt discount, was reclassified to temporary equity on the Company's Condensed Consolidated Balance Sheet as of March 31, 2017. The Notes will remain in current liabilities due to their scheduled maturity.

As of March 31, 2017, and December 31, 2016, the Convertible Notes consisted of the following:

Edgar Filing: KAMAN Corp - Form 10-Q

March 31, December 31,
2017 2016

In thousands

Carrying value, current portion	\$ 113,756	\$ 113,203
Unamortized discount	1,244	1,797
Principal amount	\$ 115,000	\$ 115,000

13

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
 For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
 (Unaudited)

9. PENSION PLANS

Components of net pension cost for the Qualified Pension Plan and Supplemental Employees' Retirement Plan ("SERP") are as follows:

	For the Three Months Ended			
	Qualified Pension Plan		SERP	
In thousands	March 31, 2017	April 1, 2016	March 31, 2017	April 1, 2016
Service cost	\$1,198	\$1,149	\$—	\$—
Interest cost on projected benefit obligation	6,089	6,122	61	64
Expected return on plan assets	(10,512)	(10,192)	—	—
Amortization of net loss	3,486	3,173	58	45
Additional amount recognized due to curtailment/settlement	—	—	99	—
Net pension cost	\$261	\$252	\$218	\$109

The Company contributed \$10.0 million to the qualified pension plan and \$1.0 million to the SERP through the end of the first quarter of 2017. No further contributions are expected to be made to the qualified pension plan during 2017. The Company plans to contribute an additional \$2.1 million to the SERP in 2017. For the 2016 plan year, the Company contributed \$10.0 million to the qualified pension plan and \$0.5 million to the SERP.

10. COMMITMENTS AND CONTINGENCIES

Pension Freeze

Effective December 31, 2015, the Company's qualified pension plan was frozen with respect to future benefit accruals. Under USG Cost Accounting Standard ("CAS") 413 the Company must determine the USG's share of any pension curtailment adjustment calculated in accordance with CAS. Such adjustments can result in an amount due to the USG for pension plans that are in a surplus position or an amount due to the contractor for plans that are in a deficit position. During the fourth quarter of 2016, the Company accrued a \$0.3 million liability representing our estimate of the amount due to the USG based on our pension curtailment adjustment calculation, which was submitted to the USG for review in December 2016. Through the date of this filing there has been no response from the USG on this matter. There can be no assurance that the ultimate resolution of this matter will not have a material adverse effect on the Company's results of operations, financial position and cash flows.

New Hartford Property

In connection with the sale of the Company's Music segment in 2007, the Company assumed responsibility for meeting certain requirements of the Connecticut Transfer Act (the "Transfer Act") that applied to the transfer of the New Hartford, Connecticut, facility leased by that segment for guitar manufacturing purposes ("Ovation"). Under the Transfer Act, those responsibilities essentially consist of assessing the site's environmental conditions and remediating environmental impairments, if any, caused by Ovation's operations prior to the sale. The site is a multi-tenant industrial park, in which Ovation and other unrelated entities lease space. The environmental assessment process, which began in 2008, has been completed and site remediation is in process.

The Company's estimate of its portion of the cost to assess the environmental conditions and remediate this site is \$2.3 million, all of which has been accrued. The total amount paid to date in connection with these environmental

remediation activities is \$1.6 million. A portion (\$0.1 million) of the accrual related to this property is included in other accruals and payables and the balance is included in other long-term liabilities. The remaining balance of the accrual reflects the total anticipated cost of completing these environmental remediation activities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
(Unaudited)

10. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Bloomfield Property

In connection with the Company's 2008 purchase of the portion of the Bloomfield campus that Kaman Aerospace Corporation had leased from NAVAIR, the Company assumed responsibility for environmental remediation at the facility as may be required under the Transfer Act and continues the effort to define the scope of the remediation that will be required by the Connecticut Department of Environmental Protection ("CTDEP"). The assumed environmental liability of \$10.3 million was determined by taking the undiscounted estimated remediation liability of \$20.8 million and discounting it at a rate of 8%. This remediation process will take many years to complete. The total amount paid to date in connection with these environmental remediation activities is \$12.6 million. At March 31, 2017, the Company had \$2.5 million accrued for these environmental remediation activities. A portion (\$1.1 million) of the accrual related to this property is included in other accruals and payables, and the balance is included in other long-term liabilities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

Rimpar Property

In connection with the Company's purchase of GRW, the Company assumed responsibility for the environmental remediation at the Rimpar, Germany facility. As part of the purchase price allocation, the Company initially accrued approximately \$4.2 million during the year ended December 31, 2015. In 2016, the Company completed a Phase II assessment in order to better understand the extent of the environmental effort necessary to remediate the facility. Based on this assessment, the Company adjusted the accrual to \$0.5 million, as results of the assessment indicate a lower level of remediation effort will be required. The total amount paid to date in connection with these environmental remediation activities is \$0.2 million. The balance (\$0.3 million) of the accrual related to this property is included in other current liabilities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

Aerospace Claim Matter

On June 29, 2016, the Company received notification from a customer of their intent to file a claim for recovery of costs and expenses related to rework on certain aerospace components previously delivered by the Company to the customer. The notification did not indicate the extent of the rework undertaken by the customer, the cost or expenses incurred by the customer, or the time frame in which the customer anticipated filing its formal claim. Based on initial discussions with the customer, the Company believes the customer is seeking recovery of \$12.4 million associated with the rework of these components and related costs incurred by the customer. The Company estimates the cost to rework the aerospace components delivered to the customer over the time period in question is approximately \$0.2 million. Based on this analysis, the Company has accrued \$0.2 million, the estimated cost to rework the aerospace components, as of March 31, 2017.

 (Unaudited)

11. COMPUTATION OF EARNINGS PER SHARE

The computation of basic earnings per share is based on net earnings divided by the weighted average number of shares of common stock outstanding for each period. The computation of diluted earnings per share reflects the common stock equivalency of dilutive options granted to employees under the Company's stock incentive plan, shares issuable on redemption of its Convertible Notes, and shares issuable upon redemption of outstanding warrants.

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
In thousands, except per share amounts		
Net earnings	\$6,291	\$9,777
Basic:		
Weighted average number of shares outstanding	27,144	27,059
Basic earnings per share	\$0.23	\$0.36
Diluted:		
Weighted average number of shares outstanding	27,144	27,059
Weighted average shares issuable on exercise of dilutive stock options	168	135
Weighted average shares issuable on redemption of convertible notes	1,146	612
Weighted average shares issuable on redemption of warrants	439	—
Total	28,897	27,806
Diluted earnings per share	\$0.22	\$0.35

Equity awards

For the three-month fiscal periods ended March 31, 2017, and April 1, 2016, respectively, 222,037 and 663,302 shares issuable under equity awards granted to employees were excluded from the calculation of diluted earnings per share as they were anti-dilutive based on the average stock price during the period.

Convertible Notes

For the three-month fiscal periods ended March 31, 2017, and April 1, 2016, respectively, shares issuable under the Convertible Notes that were dilutive during the period were included in the calculation of earnings per share as the conversion price for the Convertible Notes was less than the average share price of the Company's stock.

Warrants

Excluded from the diluted earnings per share calculation for the three-month fiscal periods ended March 31, 2017, and April 1, 2016, were 3,005,660 and 3,430,992, respectively, shares issuable under the warrants sold in connection with the Company's Convertible Note offering as they would be anti-dilutive.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued
 For the three-month fiscal periods ended March 31, 2017 and April 1, 2016
 (Unaudited)

12. SHARE-BASED ARRANGEMENTS

General

The Company accounts for stock options, restricted stock awards, restricted stock units and performance shares as equity awards and measures the cost of all share-based payments, including stock options, at fair value on the grant date and recognizes this cost in the statement of operations. The Company also has an employee stock purchase plan which is accounted for as a liability award.

Compensation expense for stock options, restricted stock awards and restricted stock units is recognized on a straight-line basis over the vesting period of the awards. Share-based compensation expense recorded for the three-month fiscal periods ended March 31, 2017, and April 1, 2016, was \$1.4 million and \$1.5 million, respectively.

During the first quarter of 2016, the Company issued stock awards with market and performance based conditions, bringing the total of these shares to 8,979, assuming a 100% achievement level. The Company measures the cost of these awards based on their grant date fair value to the extent of the probable number of shares to be earned upon vesting. Amortization of this cost is recorded on a straight-line basis over the requisite service period. Throughout the course of the requisite service period, the Company monitors the level of achievement compared to the target and adjusts the number of shares expected to be earned, and the related compensation expense recorded thereafter, to reflect the updated most probable outcome. Compensation expense for these awards for the three-month fiscal periods ended March 31, 2017, and April 1, 2016, was not material.

Stock option activity was as follows:

	For the Three Months Ended March 31, 2017	
	Options	Weighted - average exercise price
Options outstanding at beginning of period	958,679	\$ 36.18
Granted	226,315	\$ 51.97
Exercised	(58,141)	\$ 31.26
Forfeited or expired	(39,217)	\$ 43.90
Options outstanding at March 31, 2017	1,087,636	\$ 39.45

The fair value of each option award is estimated on the date of grant using the Black-Scholes option valuation model. The following table indicates the weighted-average assumptions used in estimating fair value:

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
Expected option term (years)	5.0	5.2
Expected volatility	19.9 %	26.0 %
Risk-free interest rate	1.9 %	1.2 %
Expected dividend yield	1.6 %	1.8 %
Per share fair value of options granted	\$8.61	\$8.63

12. SHARE-BASED ARRANGEMENTS (CONTINUED)

Restricted Stock Award and Restricted Stock Unit activity was as follows:

	For the Three Months Ended March 31, 2017	
	Restricted Stock	Weighted- average grant date fair value
Restricted Stock outstanding at beginning of period	167,674	\$ 40.27
Granted	49,735	\$ 51.79
Vested	(46,085)	\$ 38.88
Forfeited or expired	(8,914)	\$ 42.56
Restricted Stock outstanding at March 31, 2017	162,410	\$ 44.07

13. SEGMENT AND GEOGRAPHIC INFORMATION

The Company is organized based upon the nature of its products and services, and is composed of two operating segments each overseen by a segment manager. These segments are reflective of how the Company's Chief Executive Officer, who is its Chief Operating Decision Maker ("CODM"), reviews operating results for the purposes of allocating resources and assessing performance. The Company has not aggregated operating segments for purposes of identifying reportable segments.

The Distribution segment is a leading power transmission, automation and fluid power industrial distributor with operations throughout the United States. The segment provides electro-mechanical products, bearings, power transmission, motion control and electrical and fluid power components to a broad spectrum of industrial markets serving both maintenance, repair and overhaul ("MRO") and original equipment manufacturer ("OEM") customers.

The Aerospace segment produces and markets proprietary aircraft bearings and components; super precision, miniature ball bearings; complex metallic and composite aerostructures for commercial, military and general aviation fixed and rotary wing aircraft; and safe and arming solutions for missile and bomb systems for the U.S. and allied militaries. The segment also markets the design and supply of aftermarket parts to businesses performing MRO in aerospace markets; performs helicopter subcontract work; restores, modifies and supports the Company's SH-2G Super Seasprite maritime helicopters; manufactures and supports the Company's K-MAX® manned and unmanned medium-to-heavy lift helicopters; and provides engineering design, analysis and certification services.

 Months Ended
 March 31, 2017
 April 1, 2016

Effective Income Tax Rate 38.4% 32.4%

The effective income tax rate represents the combined federal, state and foreign tax effects attributable to pretax earnings for the period. The increase in the effective tax rate for the three-month fiscal period ended March 31, 2017, compared to the rate for the corresponding quarter in the prior year, is primarily due to a projected foreign loss in the current period for which no tax benefit has been provided and certain discrete items which were present for the quarter ended April 1, 2016, most notably favorable differences between foreign provisions for taxes and actual foreign returns filed.

A valuation allowance for deferred tax assets, including those associated with net operating loss carryforwards, is recognized when it is more likely than not that some or all of the benefit from the deferred tax asset will not be realized. To assess that likelihood, the Company uses estimates and judgment regarding future taxable income, and considers the tax consequences in the jurisdiction where such taxable income is generated, to determine whether a valuation allowance is required. Such evidence can include current financial position, results of operations, both actual and forecasted, the reversal of deferred tax liabilities, and tax planning strategies, as well as the current and forecasted business economics.

The Company has assessed both positive and negative evidence to estimate whether sufficient future taxable income will be generated to utilize operating loss carryforwards associated with certain foreign operations that will permit the Company to use \$2.3 million of deferred tax assets associated with these foreign operations as of March 31, 2017. Through the end of the first quarter of 2017, the Company believes it is more likely than not that only \$1.3 million of these deferred tax assets will be realized and, as such, has recorded a valuation allowance of \$1.0 million. Going forward, management will continue to assess the available positive and negative evidence to determine whether it is likely sufficient future taxable income will be generated to permit the use of these deferred tax assets. The amount of the deferred tax asset considered realizable could be adjusted if estimates of future taxable income are reduced or increased, or if additional weight is given to subjective evidence such as future expected growth because objective negative evidence in the form of cumulative losses is no longer present.

16. SUBSEQUENT EVENTS

The Company has evaluated subsequent events through the issuance date of these financial statements. No material subsequent events were identified that are required to be disclosed.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide readers of our condensed consolidated financial statements with the perspectives of management. It presents, in narrative and tabular form, information regarding our financial condition, results of operations, liquidity and certain other factors that may affect our future results, and is designed to enable the readers of this report to obtain an understanding of our businesses, strategies, current trends and future prospects. It should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2016 ("2016 Form 10-K") and the condensed consolidated financial statements included in Item 1 of this Form 10-Q.

OVERVIEW OF BUSINESS

Kaman Corporation (the "Company") is comprised of two business segments:

The Distribution segment is a leading power transmission, automation and fluid power industrial distributor with operations throughout the United States. The segment provides electro-mechanical products, bearings, power transmission, motion control and electrical and fluid power components to a broad spectrum of industrial markets serving both maintenance, repair and overhaul ("MRO") and original equipment manufacturer ("OEM") customers. The Aerospace segment produces and markets proprietary aircraft bearings and components; super precision, miniature ball bearings; complex metallic and composite aerostructures for commercial, military and general aviation fixed and rotary wing aircraft; and safe and arming solutions for missile and bomb systems for the U.S. and allied militaries. The segment also markets the design and supply of aftermarket parts to businesses performing MRO in aerospace markets; performs helicopter subcontract work; restores, modifies and supports our SH-2G Super Seasprite maritime helicopters; manufactures and supports our K-MAX® manned and unmanned medium-to-heavy lift helicopters; and provides engineering design, analysis and certification services.

Financial performance

Net sales decreased 3.4% for the three-month fiscal period ended March 31, 2017, compared to the comparable fiscal period in the prior year.

Net earnings decreased 35.7% for the three-month fiscal period ended March 31, 2017, compared to the comparable fiscal period in the prior year.

Diluted earnings per share decreased to \$0.22 for the three-month fiscal period ended March 31, 2017, compared to \$0.35 in the comparable fiscal period in the prior year.

Cash used in operating activities during the three-month fiscal period ended March 31, 2017, was \$18.4 million, compared to cash provided by operating activities for the comparable fiscal period in the prior year of \$5.7 million.

Recent events

On April 4, 2017, our Aerospace segment announced it had received two orders from ROTAK Helicopter Services for our K-MAX® helicopters. Delivery of these orders is anticipated in 2018.

On March 30, 2017, our Aerospace segment announced it had increased its stake in our Indian manufacturing joint venture Kineco Kaman Composites India Pvt. Ltd. to 49% from 26%.

On February 21, 2017, the Board of Directors raised the quarterly dividend from \$0.18 per share to \$0.20 per share, an 11% increase to our quarterly dividend.

RESULTS OF OPERATIONS

Consolidated Results

Net Sales

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
	(in thousands)	
Net sales	\$435,941	\$451,198
\$ change	(15,257)	8,416
% change	(3.4)%	1.9 %

Net sales decreased for the three-month fiscal period ended March 31, 2017, as compared to the corresponding period in 2016. This was a result of a decrease in net sales at our Distribution segment and the unfavorable impact on sales of foreign currency exchange rates of \$2.3 million. These decreases were partially offset by an increase in net sales at our Aerospace segment, mostly attributable to sales under our K-MAX® program. (See segment discussion below for additional information.)

Gross Profit

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
	(in thousands)	
Gross profit	\$124,816	\$134,430
\$ change	(9,614)	6,519
% change	(7.2)%	5.1 %
% of net sales	28.6 %	29.8 %

Gross profit decreased for the three-month fiscal period ended March 31, 2017, as compared to the corresponding period in 2016. This was a result of lower gross profit at both our Aerospace and Distribution segments. The decrease in gross profit at our Aerospace segment was primarily associated with our JPF program product mix, shifting to solely USG sales from both direct sales to foreign militaries and USG sales in the corresponding period in 2016, and lower pricing under Option 12 of our JPF program with the USG, which was negotiated at a lower selling price than Option 11 sold in 2016. Lower gross profit at our Distribution segment was primarily attributable to lower sales and a loss of \$0.7 million on a project within our fluid power product line.

Gross profit as a percentage of net sales decreased for the three-month fiscal period ended March 31, 2017, as compared to the corresponding period in 2016, primarily due to the product mix under our JPF program described in the preceding paragraph. Partially offsetting this decrease for the three-month fiscal period ended March 31, 2017, was an increase in gross profit as a percentage of net sales due to management's continued productivity and efficiency initiative to improve operating performance at our Distribution segment.

Selling, General & Administrative Expenses (S,G&A)

	For the Three Months Ended	
	March 31, 2017	April 1, 2016

	(in thousands)		
S,G&A	\$110,628		\$116,108
\$ change	(5,480)	10,554
% change	(4.7)%	10.0 %
% of net sales	25.4	%	25.7 %

The decrease in S,G&A for the three-month fiscal period ended March 31, 2017, compared to the corresponding period in 2016, resulted from lower expenses at both of our segments. The decrease in expenses at our Distribution segment primarily related to the absence of \$3.1 million in expenses associated with the 2016 implementation of our productivity and efficiency initiative to improve operating performance and lower compensation expenses. The Aerospace segment experienced lower costs associated with the sale of government contract program inventory which included previously capitalized general and administrative expenses. These decreases were partially offset by higher compensation costs at our Aerospace segment and Corporate headquarters.

Operating Income

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
	(in thousands)	
Operating income	\$14,208	\$18,350
\$ change	(4,142)	(3,980)
% change	(22.6)%	(17.8)%
% of net sales	3.3 %	4.1 %

The decrease in operating income for the three-month fiscal period ended March 31, 2017, versus the comparable period in 2016, was primarily attributable to lower operating income at our Aerospace segment, mostly due to a decrease in sales and lower gross profit under our JPF program due to the shift in product mix, and higher corporate expenses. These changes were partially offset by higher operating income at our Distribution segment. (See segment discussion below for additional information.)

Interest Expense, Net

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
	(in thousands)	
Interest expense, net	\$4,160	\$3,807

Interest expense, net, generally consists of interest charged on our Credit Agreement, which includes a revolving credit facility and a term loan facility, and other borrowings and the amortization of debt issuance costs, offset by interest income. The increase in interest expense, net for the three-month fiscal period ended March 31, 2017, compared to the corresponding period in 2016, was primarily attributable to a higher interest rate for outstanding amounts under the Credit Agreement. At March 31, 2017, the interest rate for outstanding amounts under the Credit Agreement was 2.38% compared to 1.69% at April 1, 2016. This increase was partially offset by lower average borrowings, as compared to the comparable period ended April 1, 2016. (See Liquidity and Capital Resources section below for information on our borrowings.)

Effective Income Tax Rate

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
Effective income tax rate	38.4%	32.4 %

The effective income tax rate represents the combined federal, state and foreign tax effects attributable to pretax earnings for the period. The increase in the effective tax rate for the three-month fiscal period ended March 31, 2017, compared to the rate for the corresponding quarter in the prior year is primarily due to a projected foreign loss in the current period for which no tax benefit has been provided and certain discrete items which were present for the quarter ended April 1, 2016, most notably favorable differences between foreign provisions for taxes and actual foreign returns filed.

Distribution Segment

Results of Operations

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
	(in thousands)	
Net sales	\$271,618	\$288,664
\$ change	(17,046)	(22,807)
% change	(5.9)%	(7.3)%
Operating income	\$11,694	\$10,469
\$ change	1,225	(2,495)
% change	11.7 %	(19.2)%
% of net sales	4.3 %	3.6 %

Net sales

The decrease in net sales for the three-month fiscal period ended March 31, 2017, compared to the corresponding period in 2016, was mainly due to one less sales day and lower organic sales, primarily driven by a decrease in sales of \$9.0 million associated with our bearings and power transmission product line and less significant decreases in our automation, control and energy and fluid power product lines. These decreases were mostly attributable to \$12.8 million in lower sales volume to our MRO customers. Looking at the markets we serve, sales were lower in the paper manufacturing, chemical manufacturing and transportation equipment manufacturing markets. Partially offsetting these decreases, were higher sales in the machinery manufacturing and mining markets.

"Organic Sales per Sales Day" is a metric management uses to evaluate performance trends at our Distribution segment and is calculated by taking Organic Sales divided by the number of Sales Days in the period. The following table illustrates the calculation of Organic Sales per Sales Day.

	For the Three Months Ended	
	March 31, 2017	April 1, 2016
	(in thousands)	
Current period		
Net sales	\$271,618	\$288,664
Acquisition sales ⁽¹⁾	—	2,659
Organic sales	271,618	286,005
Sales days	64	65
Organic Sales per Sales Day for the current period a	\$4,244	\$4,400
Prior period		
Net sales from the prior year	\$288,664	\$311,471
Sales days from the prior year	65	66
Sales per sales day from the prior year b	\$4,441	\$4,719
% change	(a-b)÷b(4.4)%	(6.8)%

⁽¹⁾ Sales contributed by an acquisition are included in Organic Sales beginning with the thirteenth month following the date of acquisition. Prior period information is adjusted to reflect acquisition sales for that period as Organic Sales when calculating the change in Organic Sales per Sales Day for the current period.

Operating income

The Distribution segment's operating income for the three-month fiscal period ended March 31, 2017, increased as compared to the corresponding period in the prior year. This was primarily attributable to the decrease in S,G&A expenses at our Distribution segment mostly related to the absence of \$3.1 million in expenses associated with the 2016 implementation of our productivity and efficiency initiative and the benefits received from these activities. The initiative included operational process improvements and data analytics, primarily focused on expanding operating margins. These gains were partially offset by a decrease in organic sales and related gross profit and a loss of \$0.7 million on a project within our fluid power product line.

Other Matters

Enterprise Resource Planning System

In July 2012, we announced a decision to invest in a new ERP business system for our Distribution segment with an estimated total cost of \$45.0 million. Since our announcement in 2012, Distribution has acquired nine businesses. To date, we have implemented the new ERP system at four acquired entities, of which two were not included in the original project scope. Additionally, an upgraded version of the software was released during the early stages of our initial implementation plan and Distribution elected to install this major upgrade because of the increased functionality, enhanced features and new user interface it offered. Recently, we completed another upgrade to the latest commercially available version of the software, which resulted in improved performance and functionality at the four locations currently on the ERP system. In order to accomplish full deployment to the bearings and transmission platform, there remains a significant amount of effort to ensure the systems will operate to our specifications and provide expected benefits, while limiting any potential disruption to our business and ancillary information technology systems. As a result of the unplanned implementations at the acquired businesses and the software upgrades, our implementation timeline has been extended. With the extension of our implementation timeline, the estimated total project cost has increased to \$51.1 million.

For the three-month fiscal periods ended March 31, 2017, and April 1, 2016, ERP system expenses incurred totaled \$0.3 million and \$0.2 million, respectively, and ERP system capital expenditures totaled \$0.9 million and \$1.0 million, respectively. Total to date ERP system capital expenditures as of March 31, 2017, were \$35.4 million. Depreciation expense for the ERP system for the three-month fiscal periods ended March 31, 2017, and April 1, 2016, totaled \$0.7 million each period.

Aerospace Segment

Results of Operations

	For the Three Months Ended			
	March 31, 2017		April 1, 2016	
	(in thousands)			
Net sales	\$164,323		\$162,534	
\$ change	1,789		31,223	
% change	1.1	%	23.8	%
Operating income	\$16,589		\$21,297	
\$ change	(4,708)	(524)
% change	(22.1)%	(2.4)%
% of net sales	10.1	%	13.1	%

Net sales

Sales increased for the three-month fiscal period ended March 31, 2017, as compared to the corresponding period in 2016, primarily due to an increase in sales generated by our commercial product programs of \$6.0 million. The increase is primarily attributable to higher sales associated with the K-MAX® program, partially offset by a slight decline in sales volume on our commercial bearing products.

Offsetting the increase in commercial sales for the three-month fiscal period ended March 31, 2017, was a \$4.2 million decrease in sales generated by our military product programs. The decrease was primarily attributable to lower sales under our JPF program and legacy missile fuze programs. These decreases, totaling \$9.5 million, were partially offset by \$6.1 million in increases, driven by higher sales under our AH-1Z program, an increase in military bearing product sales and higher sales on our SH-2G program with Peru.

Foreign currency exchange rates relative to the U.S. dollar had an unfavorable impact of \$2.3 million on net sales.

Operating income

Operating income decreased for the three-month fiscal period ended March 31, 2017, compared to the corresponding period in 2016. The decrease was primarily attributable to a decrease in sales and lower gross profit under our JPF program due to the shift in product mix to deliveries of solely USG fuzes, as opposed to the sale of both USG fuzes and direct sales to foreign militaries made during the corresponding period in 2016, and lower sales volume and corresponding gross profit on our legacy missile fuze programs. These decreases, totaling \$9.8 million, for the three-month period ended March 31, 2017, were partially offset by an increase in gross margin on our commercial and military bearings products and higher gross profit on various other programs that individually were not a significant portion of the overall change for the period.

Additionally offsetting some of the decrease in operating income was lower S,G&A expenses associated with the sale of government contract program inventory which included previously capitalized general and administrative expenses. See the table below for the expense recorded associated with S,G&A expenses previously capitalized in inventory for certain government contracts.

	For the Three Months Ended March/April, 2017 2016 (in thousands)	
S,G&A expensed (capitalized), net	\$ 732	\$ 3,149

Long-Term Contracts

For long-term aerospace contracts, we generally recognize sales and cost of sales based on the percentage-of-completion method of accounting, which allows for recognition of revenue as work on a contract progresses. We recognize sales and profit based on either (1) the cost-to-cost method, in which case sales and profit are recorded based upon the ratio of costs incurred to estimated total costs to complete the contract, or (2) the units-of-delivery method, in which case sales are recognized as deliveries are made and cost of sales is computed on the basis of the estimated ratio of total cost to total sales.

Revenue and cost estimates for all significant long-term contracts for which revenue is recognized using the percentage-of-completion method of accounting are reviewed and reassessed quarterly. Based upon these reviews, we record the effects of adjustments in profit estimates each period. If at any time we determine that for a particular contract total costs will exceed total contract revenue, we will record a provision for the entire anticipated contract loss at that time. For the three-month fiscal period ended March 31, 2017, there was a net increase in our operating income attributable to changes in contract estimates of \$1.0 million resulting from the reassessment of long-term contracts. This increase was primarily a result of improved performance on the JPF and AH-1Z programs. These improvements were partially offset by cost growth on the K-MAX® program. There was a net decrease in our operating income from changes in contract estimates of \$1.0 million for the three-month fiscal period ended April 1,

2016. This was primarily a result of cost growth on the Boeing 767/777 program.

Backlog

March 31, December 31,
2017 2016
(in thousands)

Backlog \$571,738 \$ 581,619

Backlog decreased during the first three months of 2017 primarily due to deliveries under our JPF program to the USG and the absence of new orders under the JPF program in 2017. This decrease was partially offset by orders under our commercial and military bearing product programs and certain composite structure programs.

Major Programs/Product Lines

Below is a discussion of significant changes in the Aerospace segment's major programs during the first three months of 2017. See our 2016 Form 10-K for a complete discussion of our Aerospace segment's programs.

A-10

The segment has contracted with Boeing to produce the wing control surfaces (inboard and outboard flaps, slats and deceleron assemblies) for the USAF's A-10 fleet. This contract has a potential value of over \$110.0 million; however, annual quantities will vary, as they are dependent upon the orders Boeing receives from the USAF. Initial deliveries under this program began in the third quarter of 2010 and full rate production began during the fourth quarter of 2012. Through March 31, 2017, 165 shipsets have been delivered over the life of the program, and approximately 8 shipsets remain in backlog. In 2016, the USAF indicated that they would delay the retirement of the A-10 fleet due to its vital close air support, search and rescue capabilities and the lack of a suitable replacement. We continue to monitor the defense budget and understand that despite this positive indication, the future of this program could be at risk without the continued support of Congress. We have not received any orders for additional shipsets in 2017, and as such, we expect a break in production as we complete the units we currently have on order and wait for follow-on orders from our customer. We have not received any indication from our customer that this program will be terminated. Final production and deliveries of existing orders under this contract are anticipated to be completed during the second quarter of 2017. Tooling and nonrecurring costs on this program are being amortized over 242 shipsets, the number of shipsets under the USG program of record. At March 31, 2017 and December 31, 2016, our program backlog was \$3.8 million and \$5.3 million, respectively, and total program inventory was \$11.1 million and \$12.8 million, respectively. The current total program inventory includes nonrecurring costs of \$8.2 million, which may not be recoverable in the event of an extended break in production or contract termination prior to the completion of the 242 shipsets.

FMU-152 A/B – Joint Programmable Fuze (“JPF”)

We manufacture the JPF, an electro-mechanical bomb safe and arming device, which allows the settings of a weapon to be programmed in flight. We occasionally experience lot acceptance test failures due to the complexity of the product and the extreme parameters of the acceptance test. Given the maturity of the product, we now generally experience isolated failures, rather than systemic ones. As a result, identifying a root cause can take longer and result in inconsistent delivery quantities from quarter to quarter.

Sales of these fuzes can be direct to the USG, Foreign Military Sales ("FMS") through the USG and direct commercial sales ("DCS") to foreign militaries that, although not funded by the USG, require regulatory approvals from the USG. During 2016, we were awarded DCS contracts totaling \$93.0 million. The delay in receipt of government approvals has shifted the anticipated deliveries for this JPF DCS award into the fourth quarter of 2017.

A total of 8,128 fuzes passed acceptance testing and were delivered to our customers during the first quarter of 2017, representing \$27.4 million of sales. We expect to deliver 33,000 to 37,000 fuzes in 2017. A significant portion of these deliveries will be under Option 12 of our JPF program with the USG. Fuzes under Option 12 were negotiated at a lower selling price than Option 11 and the transition to Option 12 is expected to have an unfavorable margin impact of approximately \$6.5 million in 2017.

The Company currently provides the FMU-152 A/B to the USAF and twenty-eight other nations, but the U.S. Navy currently utilizes a different fuze - the FMU-139. In 2015, NAVAIR solicited proposals for a firm fixed price production contract to implement improvements to the performance characteristics of the FMU-139 (such improved fuze having been designated the FMU-139 D/B), and the USAF has stated that, if and when a contract is awarded and production begins, the funds associated with the FMU-152 A/B will be redirected to the FMU-139 D/B. During the

third quarter of 2015, the U.S. Navy announced that a competitor was awarded the contract for the FMU-139 D/B. In the event the FMU-139 D/B program proceeds as planned and the USAF redirects the funds associated with the FMU-152 A/B to the FMU-139 D/B, our business, financial condition, results of operations and cash flows may be materially adversely impacted. The timing of the impact on our financial statements is dependent on the ability of our competitor to complete the design and qualification phase of the program and other factors. Our competitor has publicly stated that this program is expected to have a 32-month qualification phase, preceding production. Therefore, the earliest the Company may see an impact on its financial statements is 2019; however, due to the complexity of this program, the uncertainty associated with the successful completion of each phase in accordance with the planned schedule and the pending status of the USAF's final decision to redirect funds to the FMU-139 D/B, the timing and magnitude of the impact on the Company's financial statements is not certain. The Company believes there remains strong foreign demand for the FMU-152 A/B. Total JPF backlog at March 31, 2017 and December 31, 2016, was \$147.6 million and \$175.0 million, respectively, consisting of orders for delivery into 2018.

LIQUIDITY AND CAPITAL RESOURCES

Discussion and Analysis of Cash Flows

We assess liquidity in terms of our ability to generate cash to fund working capital requirements and investing and financing activities. Significant factors affecting liquidity include: cash flows generated from or used by operating activities, capital expenditures, investments in our business segments and their programs, acquisitions, divestitures, dividends, availability of future credit, adequacy of available bank lines of credit, and factors that might otherwise affect the company's business and operations generally, as described under the heading "Risk Factors" and "Forward-Looking Statements" in Item 1A of Part I of our 2016 Form 10-K.

We continue to rely upon bank financing as an important source of liquidity for our business activities including acquisitions. We believe this, when combined with cash generated from operating activities, will be sufficient to support our anticipated cash requirements for the foreseeable future; however, we may decide to borrow additional funds or raise additional equity capital to support other business activities including potential future acquisitions. We anticipate our capital expenditures will be approximately \$35.0 million in 2017, primarily related to machinery and equipment and information technology infrastructure.

We anticipate a variety of items will have an impact on our liquidity during the next 12 months, in addition to our working capital requirements. These could include one or more of the following:

- the matters described in Note 10, Commitments and Contingencies, in the Notes to Condensed Consolidated Financial Statements, including the cost of existing environmental remediation matters and deposits required to be made to the environmental escrow for our former Moosup facility;
- deferred compensation payments to former directors and officers;
- contributions to our qualified pension plan and Supplemental Employees' Retirement Plan ("SERP");
- repurchase of common stock under the 2015 Share Repurchase Program;
- payment of dividends;
- costs associated with the start-up of new aerospace programs; and
- the extension of payment terms by our customers.

In addition, our \$115.0 million Convertible Notes have been convertible since the third quarter of 2016, and will continue to be convertible until the close of business on the second Scheduled Trading Day (as defined in the Convertible Notes indenture) immediately preceding the scheduled maturity date of November 15, 2017, unless earlier redeemed, repurchased or converted. We are currently assessing potential alternatives for the refinancing of these instruments prior to their scheduled maturity; however, there is sufficient borrowing capacity under our revolving credit agreement to provide the cash that would be required should the noteholders elect to convert their notes or to fund the settlement of the notes. We do not believe any of these matters will lead to a shortage of capital resources or liquidity that would adversely impact our business or results of operations.

We regularly monitor credit market conditions to identify potential issues that may adversely affect, or provide opportunities for, the securing and/or advantageous pricing of additional financing, if any, that may be necessary to continue with our growth strategy and finance working capital requirements.

Management regularly monitors pension plan asset performance and the assumptions used in the determination of our benefit obligation, comparing them to actual performance. We continue to believe the assumptions selected are valid due to the long-term nature of our benefit obligation.

Effective December 31, 2015, our qualified pension plan was frozen with respect to future benefit accruals. Under U.S. Government Cost Accounting Standard ("CAS") 413 we must calculate the USG's share of any pension curtailment

adjustment calculated resulting from the freeze. Such adjustments can result in an amount due to the USG for pension plans that are in a surplus position or an amount due to the contractor for plans that are in a deficit position. During the fourth quarter of 2016, the Company accrued a \$0.3 million liability representing our estimate of the amount due to the USG based on our pension curtailment calculation which was submitted to the USG for review in December. Through the date of this filing there has been no response from the USG on this matter. There can be no assurance that the ultimate settlement of this matter will not have a material adverse effect on our results of operations, financial position and cash flows.

Edgar Filing: KAMAN Corp - Form 10-Q

A summary of our consolidated cash flows is as follows:

	For the Three Months Ended		
	March 31, 2017	April 1, 2016	2017 vs. 2016
	(in thousands)		
Total cash provided by (used in):			
Operating activities	\$(18,449)	\$5,727	\$ (24,176)
Investing activities	(8,254)	(8,073)	(181)
Financing activities	9,954	3,579	6,375
Free Cash Flow (a):			
Net cash provided by operating activities	\$(18,449)	\$5,727	\$ (24,176)
Expenditures for property, plant and equipment	(7,409)	(7,624)	215
Free cash flow	\$(25,858)	\$(1,897)	\$ (23,961)

(a) Free Cash Flow, a non-GAAP financial measure, is defined as net cash provided by operating activities less expenditures for property, plant and equipment, both of which are presented in our Condensed Consolidated Statements of Cash Flows. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Non-GAAP Financial Measures for more information regarding Free Cash Flow.

Net cash used in operating activities for the three-month fiscal period ended March 31, 2017, was \$18.4 million, compared to net cash provided by operating activities for the comparable period in 2016 of \$5.7 million. This change is primarily due to increased investments in our K-MAX® program, lower accounts payable due to the timing of payments and lower accrued expenses due to the timing of payments associated with the 2016 implementation of the productivity and efficiency initiative at our Distribution segment.

Net cash used in investing activities remained relatively flat for the three-month fiscal period ended March 31, 2017, versus the comparable period in 2016.

Net cash provided by financing activities increased for the three-month fiscal period ended March 31, 2017, versus the comparable period in 2016, primarily due to an increase in borrowings under our revolving credit facility.

Financing Arrangements

On May 6, 2015, we closed on an amended and restated \$700.0 million Credit Agreement. Capitalized terms used in this discussion of the Credit Agreement but not defined herein have the meanings ascribed thereto in the Credit Agreement. The Credit Agreement amends and restates our previously existing credit facility to, among other things: (i) extend the maturity date to May 6, 2020; (ii) increase the aggregate amount of revolving commitments from \$400.0 million to \$600.0 million; (iii) reinstate the aggregate amount of outstanding Term Loans to \$100.0 million; (iv) modify the affirmative and negative covenants set forth in the facility; and (v) effectuate a number of additional modifications to the terms and provisions of the facility, including its pricing. The term loan commitment requires quarterly payments of principal (which commenced on June 30, 2015) at the rate of \$1.25 million, increasing to \$1.875 million on June 30, 2017, and then to \$2.5 million on June 30, 2019, with \$65.0 million payable in the final quarter of the facility's term. The facility includes an accordion feature that allows us to increase the aggregate amount available to up to \$900.0 million with additional commitments from the Lenders.

Interest rates on amounts outstanding under the Credit Agreement are variable, and are determined based on the Consolidated Senior Secured Leverage Ratio. At March 31, 2017, the interest rate for the outstanding amounts on both the revolving credit facility and term loan commitment was 2.38%. In addition, we are required to pay a quarterly commitment fee on the unused revolving loan commitment amount at a rate ranging from 0.175% to 0.300% per

annum, based on the Consolidated Senior Secured Leverage Ratio. Fees for outstanding letters of credit range from 1.25% to 2.00%, based on the Consolidated Senior Secured Leverage Ratio.

The financial covenants associated with the Credit Agreement include a requirement that (i) the Consolidated Senior Secured Leverage Ratio cannot be greater than 3.50 to 1.00, with an available election to increase the maximum to 3.75 to 1.00 for four consecutive quarters in connection with a Permitted Acquisition with consideration in excess of \$125.0 million; (ii) the Consolidated Total Leverage Ratio cannot be greater than 4.00 to 1.00, with an available election to increase the maximum to

4.25 to 1.00 for four consecutive quarters in connection with a Permitted Acquisition with consideration in excess of \$125.0 million; (iii) the Consolidated Interest Coverage Ratio cannot be less than 4.00 to 1.00; and (iv) Liquidity: (a) as of the last day of the fiscal quarter of the Company ending two full fiscal quarters prior to the stated maturity of the Specified Convertible Notes, cannot be less than an amount equal to 50% of the outstanding principal amount of the Specified Convertible Notes, and (b) as of the last day of each fiscal quarter of the Company ending thereafter, cannot be less than an amount equal to the outstanding principal amount of the Specified Convertible Notes as of such day. We were in compliance with the financial covenants as of and for the quarter ended March 31, 2017, and do not anticipate noncompliance in the foreseeable future.

In November 2010, we issued convertible unsecured notes due on November 15, 2017, in the aggregate principal amount of \$115.0 million in a private placement offering (the "Convertible Notes"). These notes bear 3.25% interest per annum on the principal amount, payable semiannually in arrears on May 15 and November 15 of each year, beginning on May 15, 2011. The Convertible Notes will mature on November 15, 2017, unless earlier redeemed, repurchased by the Company or converted. Upon conversion, the Convertible Notes require net share settlement, where the aggregate principal amount of the notes will be paid in cash and remaining amounts due, if any, will be settled in cash, shares of our common stock or a combination of cash and shares of common stock, at our election. At March 31, 2017, the market value of the Company's common stock was greater than 130% of the Convertible Notes conversion price for 20 or more of the last 30 consecutive trading days preceding the quarter end. As a result, the Convertible Notes are convertible at the option of the noteholder throughout the second fiscal quarter, and will remain convertible until the close of business on the second Scheduled Trading Day (as defined in the Convertible Notes indenture) immediately preceding the maturity date. Accordingly, the carrying amount of the Convertible Notes was reclassified to current liabilities and a portion of the equity component, representing the unamortized debt discount, was reclassified to temporary equity on our Condensed Consolidated Balance Sheet as of March 31, 2017.

Total average bank borrowings during the quarter ended March 31, 2017, were \$305.9 million compared to \$315.6 million for the year ended December 31, 2016. As of March 31, 2017, and December 31, 2016, there was \$176.0 million and \$209.5 million available for borrowing, respectively, under the Revolving Credit Facility, net of letters of credit. Letters of credit are generally considered borrowings for purposes of the Revolving Credit Facility. A total of \$6.7 million and \$5.9 million in letters of credit was outstanding under the Revolving Credit Facility as of March 31, 2017, and December 31, 2016, respectively.

Other Sources/Uses of Capital

We contributed \$10.0 million to the qualified pension plan and \$1.0 million to the SERP through the end of the first quarter. We do not expect to make any further contributions to the qualified pension plan during 2017. We plan to contribute an additional \$2.1 million to the SERP in 2017. For the 2016 plan year, we contributed \$10.0 million to the qualified pension plan and \$0.5 million to the SERP.

On April 29, 2015, we announced that our Board of Directors approved a share repurchase program ("2015 Share Repurchase Program") authorizing the repurchase of up to \$100.0 million of the common stock, par value \$1.00 per share, of the Company. This new program replaced our 2000 Stock Repurchase Program. We currently intend to repurchase shares to offset the annual issuance of shares under our employee stock plans, but the timing and actual number of shares repurchased will depend on a variety of factors including stock price, market conditions, corporate and regulatory requirements, capital availability and other factors, including acquisition opportunities. As of March 31, 2017, we had repurchased 635,000 shares under the 2015 Share Repurchase Program and approximately \$73.1 million remained available for repurchases under this authorization.

NON-GAAP FINANCIAL MEASURES

Management believes the non-GAAP (Generally Accepted Accounting Principles) measures used in this report provide investors with important perspectives into our ongoing business performance. We do not intend for the information to be considered in isolation or as a substitute for the related GAAP measures. Other companies may define the measures differently. We define the non-GAAP measures used in this report and other disclosures as follows:

Organic Sales

Organic Sales is defined as "Net Sales" less sales derived from acquisitions completed during the preceding twelve months. We believe that this measure provides management and investors with a more complete understanding of underlying operating results and trends of established, ongoing operations by excluding the effect of acquisitions, which can obscure underlying trends. We also believe that presenting Organic Sales separately for our segments provides management and investors with useful information about the trends impacting our segments and enables a more direct comparison to other businesses and companies in similar industries. Management recognizes that the term "Organic Sales" may be interpreted differently by other companies and under different circumstances. The following table illustrates the calculation of Organic Sales using the GAAP measure, "Net Sales".

Organic Sales (in thousands)

	For the Three Months Ended March 31, April 1, 2017 2016	
Distribution		
Net sales	\$271,618	\$288,664
Acquisition Sales	—	2,659
Organic Sales	\$271,618	\$286,005
Aerospace		
Net sales	\$164,323	\$162,534
Acquisition Sales	—	—
Organic Sales	\$164,323	\$162,534
Consolidated		
Net sales	\$435,941	\$451,198
Acquisition Sales	—	2,659
Organic Sales	\$435,941	\$448,539

Organic Sales per Sales Day

Organic Sales per Sales Day is defined as GAAP "Net sales of the Distribution segment" less sales derived from acquisitions completed during the preceding twelve months divided by the number of Sales Days in a given period. Sales Days are the days that the Distribution segment's branch locations were open for business and exclude weekends and holidays. Management believes Organic Sales per Sales Day provides an important perspective on how net sales may be impacted by the number of days the segment is open for business and provides a basis for comparing periods in which the number of sales days differs.

Free Cash Flow

Free Cash Flow is defined as GAAP "Net cash provided by (used in) operating activities" in a period less "Expenditures for property, plant & equipment" in the same period. Management believes Free Cash Flow provides an important perspective on our ability to generate cash from our business operations and, as such, that it is an important financial

measure for use in evaluating the Company's financial performance. Free Cash Flow should not be viewed as representing the residual cash flow available for discretionary expenditures such as dividends to shareholders or acquisitions, as it may exclude certain mandatory expenditures such as repayment of maturing debt and other contractual obligations. Management uses Free Cash Flow internally to assess overall liquidity.

CONTRACTUAL OBLIGATIONS AND OFF-BALANCE SHEET ARRANGEMENTS

There have been no material changes outside the ordinary course of business in our contractual obligations or off-balance sheet arrangements during the first three months of 2017. See our 2016 Form 10-K for a discussion of our contractual obligations and off-balance sheet arrangements.

CRITICAL ACCOUNTING ESTIMATES

Preparation of the Company's financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Management believes the most complex and sensitive judgments, because of their significance to the Consolidated Financial Statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis and the Notes to Consolidated Financial Statements in the Company's 2016 Form 10-K describe the critical accounting estimates and significant accounting policies used in preparing the Consolidated Financial Statements. Actual results in these areas could differ from management's estimates. There have been no significant changes in the Company's critical accounting estimates and significant accounting policies in 2017.

RECENT ACCOUNTING STANDARDS

Information regarding recent changes in accounting standards is included in Note 2, Recent Accounting Standards, of the Notes to Condensed Consolidated Financial Statements in this report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no significant changes in the Company's exposure to market risk during the first three months of 2017. See the Company's 2016 Form 10-K for a discussion of the Company's exposure to market risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We have carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2017. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2017, our disclosure controls and procedures were effective.

Changes in Internal Controls

There was no change in our internal control over financial reporting that occurred during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

We are in the process of implementing a new enterprise-wide business system for our Distribution segment. In order to minimize disruptions to our ongoing operations we have developed a project plan that takes a phased approach to implementation and includes appropriate contingency plans. The implementation of the new ERP system will likely affect the processes that constitute our internal control over financial reporting for the Distribution segment.

PART II

Item 1. Legal Proceedings

General

From time to time, as a normal incident of the nature and kinds of businesses in which the Company and its subsidiaries are, and were, engaged, various claims or charges are asserted and legal proceedings are commenced by or against the Company and/or one or more of its subsidiaries. Claimed amounts may be substantial but may not bear any reasonable relationship to the merits of the claim or the extent of any real risk of court or arbitral awards. We record accruals for losses related to those matters that we consider to be probable and that can be reasonably estimated. Gain contingencies, if any, are recognized when they are realized and legal costs generally are expensed when incurred.

We evaluate, on a quarterly basis, developments in legal proceedings that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. Our loss contingencies are subject to substantial uncertainties, however, including for each such contingency the following, among other factors: (i) the procedural status of the case; (ii) whether the case has or may be certified as a class action suit; (iii) the outcome of preliminary motions; (iv) the impact of discovery; (v) whether there are significant factual issues to be determined or resolved; (vi) whether the proceedings involve a large number of parties and/or claims in multiple jurisdictions or jurisdictions in which the relevant laws are complex or unclear; (vii) the extent of potential damages, which are often unspecified or indeterminate; and (viii) the status of settlement discussions, if any, and the settlement postures of the parties. Because of these uncertainties, management has determined that, except as otherwise noted below, the amount of loss or range of loss that is reasonably possible in respect of each matter described below (including any reasonably possible losses in excess of amounts already accrued), is not reasonably estimable.

While it is not possible to predict the outcome of these matters with certainty, based upon available information, management believes that all settlements, arbitration awards and final judgments, if any, which are considered probable of being rendered against us in legal proceedings and that can be reasonably estimated are accrued for at March 31, 2017. Despite this analysis, there can be no assurance that the final outcome of these matters will not have a material adverse effect on our business, financial condition, results of operations or cash flows.

As of March 31, 2017, neither the Company nor any of its subsidiaries is a party, nor is any of its or their property subject, to any material pending legal proceedings, other than ordinary routine litigation incidental to the business of the Company and its subsidiaries. Additional information relating to certain of these matters is set forth in Note 10, Commitments and Contingencies of the Notes to Condensed Consolidated Financial Statements.

Environmental Matters

The Company and its subsidiaries are subject to numerous U.S. Federal, state and international environmental laws and regulatory requirements and are involved from time to time in investigations or litigation of various potential environmental issues concerning activities at our facilities or former facilities or remediation as a result of past activities (including past activities of companies we have acquired). From time to time, we receive notices from the U.S. Environmental Protection Agency or equivalent state or international environmental agencies that we are a potentially responsible party under the Comprehensive Environmental Response, Compensation and Liability Act (commonly known as the "Superfund Act") and/or equivalent laws. Such notices assert potential liability for cleanup costs at various sites, which may include sites owned by us, sites we previously owned and treatment or disposal sites not owned by us, allegedly containing hazardous substances attributable to us from past operations. We are currently named as a potentially responsible party at one site. While it is not possible to predict the outcome of these proceedings, in the opinion of management, any payments we may be required to make as a result of all such claims in existence at March 31, 2017, will not have a material adverse effect on our business, financial condition and results of

operations or cash flows.

Asbestos Litigation

Like many other industrial companies, the Company and/or one of its subsidiaries may be named as a defendant in lawsuits alleging personal injury as a result of exposure to asbestos integrated into certain products sold or distributed by the Company and/or the named subsidiary. A substantial majority of these asbestos-related claims have been covered by insurance or other forms of indemnity or have been dismissed without payment. The rest have been resolved for amounts that are not material to the Company, either individually or in the aggregate. Based on information currently available, we do not believe that the resolution of any currently pending asbestos-related matters will have a material adverse effect on our business, financial condition, results of operations or cash flows.

33

Item 1A. Risk Factors

Investors should carefully review and consider the information regarding certain factors that could materially affect our business, results of operations, financial condition and cash flows as set forth under Item 1A. "Risk Factors" in our 2016 Form 10-K. From time to time we disclose changes to risk factors that have been previously disclosed. See below for information regarding changes to our risk factors since the filing of our 2016 Form 10-K. Other than the information presented below, we do not believe there have been any material changes to the risk factors previously disclosed in our 2016 Form 10-K. Additional risks and uncertainties not presently known to us or that we currently believe not to be material may also adversely impact our business, results of operations, financial position and cash flows.

Certain of our operations are conducted through joint ventures, which entail special risks.

The Company has a 49% equity interest in Kineco-Kaman Composites - India Private Limited, a composites manufacturing joint venture located in Goa, India. The Company relies significantly on the services and skills of its joint venture partner to manage and conduct the local business operations of the joint venture and ensure compliance with all applicable laws and regulations. If our joint venture partner fails to perform these functions adequately, it may adversely affect our business, financial condition, results of operations and cash flows. Moreover, if our joint venture partner fails to honor its financial obligations to commit capital, equity or credit support to the joint venture as a result of financial or other difficulties or for any other reason, the joint venture may be unable to perform contracted services or deliver contracted products unless we provide the necessary capital, equity or credit support.

Economic conditions and regulatory changes leading up to and following the United Kingdom's ("UK") likely exit from the European Union ("EU") could have a material adverse effect on our business, financial condition and results of operations.

We have business operations in both the UK and the broader EU. In June 2016, a majority of voters in the UK elected to withdraw from the EU in a national referendum, and in March 2017, the UK gave notice to the EU that it was formally initiating the withdrawal process. The terms of any withdrawal are subject to a negotiation period that could last up to two years from that date, unless the time period is extended. The referendum and withdrawal process have created significant uncertainty about the future relationship between the UK and the EU, and have given rise to calls for the governments of other EU member states to consider withdrawal.

These developments, or the perception that any of them could occur, may have a material adverse effect on global economic conditions and the stability of global financial markets, and could significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Asset valuations, currency exchange rates and credit ratings may be especially subject to increased market volatility. Lack of clarity about future UK laws and regulations as the UK determines which EU laws to replace or replicate in the course of its withdrawal, including financial laws and regulations, tax and free trade agreements, intellectual property rights, supply chain logistics, environmental, health and safety laws and regulations, immigration laws and employment laws, could decrease foreign direct investment in the UK, increase costs, depress economic activity and restrict our access to capital. If the UK and the EU are unable to negotiate acceptable withdrawal terms or if other EU member states pursue withdrawal, barrier-free access between the UK and other EU member states or among the European economic area overall could be diminished or eliminated. Any of these factors could have a direct or indirect impact on our business in the UK and EU, our customers and suppliers in the UK and EU and our business outside the UK and EU. Any of these factors could have a material adverse effect on our business, financial condition and results of operations and reduce the price of our common stock.

Exports of certain of our products are subject to various export control regulations and authorizations, and we may not be successful in obtaining the necessary U.S. Government approvals and resultant export licenses for proposed sales

to certain foreign customers.

We must comply with various laws and regulations relating to the export of our products and technology, including a requirement to obtain the necessary export approvals and/or other licenses or authorizations from the U.S. Government before we are permitted to sell certain products and technologies outside of the United States. We can give no assurance that we will be successful in obtaining the necessary licenses or authorizations in a timely manner or at all. Any significant delay in, or impairment of, our ability to sell products or technologies outside of the United States could have a material adverse effect on our business, financial condition and results of operations.

FORWARD-LOOKING STATEMENTS

This report contains "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements also may be included in other publicly available documents issued by the Company and in oral statements made by our officers and representatives from time to time. These forward-looking statements are intended to provide management's current expectations or plans for our future operating and financial performance, based on assumptions currently believed to be valid. They can be identified by the use of words such as "anticipate," "intend," "plan," "goal," "seek," "believe," "project," "estimate," "expect," "strategy," "future," "likely," "may," "should," "would," "could," "will" and other words of similar meaning in connection with a discussion of future operating or financial performance. Examples of forward looking statements include, among others, statements relating to future sales, earnings, cash flows, results of operations, uses of cash and other measures of financial performance.

Because forward-looking statements relate to the future, they are subject to inherent risks, uncertainties and other factors that may cause the Company's actual results and financial condition to differ materially from those expressed or implied in the forward-looking statements. Such risks, uncertainties and other factors include, among others: (i) changes in domestic and foreign economic and competitive conditions in markets served by the Company, particularly the defense, commercial aviation and industrial production markets; (ii) changes in government and customer priorities and requirements (including cost-cutting initiatives, government and customer shut-downs, the potential deferral of awards, terminations or reductions of expenditures to respond to the priorities of Congress and the Administration, or budgetary cuts resulting from Congressional actions or automatic sequestration); (iii) changes in geopolitical conditions in countries where the Company does or intends to do business; (iv) the successful conclusion of competitions for government programs (including new, follow-on and successor programs) and thereafter successful contract negotiations with government authorities (both foreign and domestic) for the terms and conditions of the programs; (v) the timely receipt of any necessary export approvals and/or other licenses or authorizations from the U.S. Government; (vi) the existence of standard government contract provisions permitting renegotiation of terms and termination for the convenience of the government; (vii) the successful resolution of government inquiries or investigations relating to our businesses and programs; (viii) risks and uncertainties associated with the successful implementation and ramp up of significant new programs, including the ability to manufacture the products to the detailed specifications required and recover start-up costs and other investments in the programs; (ix) potential difficulties associated with variable acceptance test results, given sensitive production materials and extreme test parameters; (x) the receipt and successful execution of production orders under the Company's existing U.S. government JPF contract, including the exercise of all contract options and receipt of orders from allied militaries, but excluding any next generation programmable fuze programs, as all have been assumed in connection with goodwill impairment evaluations; (xi) the continued support of the existing K-MAX® helicopter fleet, including sale of existing K-MAX® spare parts inventory and the receipt of orders for new aircraft sufficient to recover our investment in the restart of the K-MAX® production line; (xii) the accuracy of current cost estimates associated with environmental remediation activities; (xiii) the profitable integration of acquired businesses into the Company's operations; (xiv) the ability to implement our ERP systems in a cost-effective and efficient manner, limiting disruption to our business, and allowing us to capture their planned benefits while maintaining an adequate internal control environment; (xv) changes in supplier sales or vendor incentive policies; (xvi) the effects of price increases or decreases; (xvii) the effects of pension regulations, pension plan assumptions, pension plan asset performance, future contributions and the pension freeze, including the ultimate determination of the U.S. Government's share of any pension curtailment adjustment calculated in accordance with CAS 413; (xviii) future levels of indebtedness and capital expenditures; (xix) the continued availability of raw materials and other commodities in adequate supplies and the effect of increased costs for such items; (xx) the effects of currency exchange rates and foreign competition on future operations; (xxi) changes in laws and regulations, taxes, interest rates, inflation rates and general business conditions; (xxii) the effects, if any, of the UK's exit from the EU; (xxiii) future repurchases and/or issuances of common stock; (xxiv) the incurrence of unanticipated restructuring costs or the failure to realize anticipated savings or benefits from past or future expense reduction actions; and (xxv) other risks and uncertainties set forth herein and in our 2016 Form

10-K.

Any forward-looking information provided in this report should be considered with these factors in mind. We assume no obligation to update any forward-looking statements contained in this report.

35

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information about purchases of Common Stock by the Company during the three-month fiscal period ended March 31, 2017:

Period	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan (b)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plan (in thousands)
January 1, 2017 – January 27, 2017	21,508	\$ 50.14	21,508	\$73,798
January 28, 2017 – February 24, 2017	13,492	\$ 50.83	13,492	\$73,113
February 25, 2017 – March 31, 2017	14,423	\$ 51.79	—	\$73,113
Total	49,423		35,000	

(a) During the quarter the Company purchased 14,423 shares in connection with employee tax withholding obligations as permitted by our equity compensation plans, which are SEC Rule 16b-3 qualified compensation plans. These were not purchases under our publicly announced program.

(b) On April 29, 2015, the Company announced that its Board of Directors approved a \$100.0 million share repurchase program.

Item 4. Mine Safety Disclosure

Information concerning mine safety violations required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") and Item 104 of Regulation S-K was not required for this quarterly report on Form 10-Q as there were no reportable violations during the quarter.
