NEWS RELEASE

INDEPENDENCE HOLDING COMPANY ANNOUNCES

2013 SECOND-QUARTER AND SIX-MONTH RESULTS

Stamford, Connecticut, August 7, 2013. Independence Holding Company (NYSE: IHC) today reported 2013 second-quarter and six-month results.

Financial Results

Net income per share attributable to IHC increased to \$.21 per share, diluted, or \$3,691,000, for the three months ended June 30, 2013 compared to \$.20 per share, diluted, or \$3,531,000, for the three months ended June 30, 2012. Revenues increased 50% to \$151,900,000 for the three months ended June 30, 2013 compared to revenues for the three months ended June 30, 2012 of \$101,443,000, primarily due to increases in premium revenue, fee income and net realized investment gains.

Net income per share attributable to IHC increased to \$.47 per share, diluted, or \$8,392,000, for the six months ended June 30, 2013 compared to \$.41 per share, diluted, or \$7,453,000, for the six months ended June 30, 2012. Revenues increased 42% to \$289,782,000 for the six months ended June 30, 2013 compared to revenues for the six months ended June 30, 2012 of \$203,599,000, primarily due to an increase in premium revenue, fee income and net realized investment gains.

During the quarter, Madison National Life entered into a coinsurance agreement to cede approximately \$219 million of reserves, primarily annuities. As a result of this transaction, the Company wrote off approximately \$9.3 million of deferred acquisition costs. However, those costs were more than offset by the gains realized by the Company in the transaction, most of which resulted from the required sale and transfer of invested assets.

Chief Executive Officer's Comments

Roy Thung, Chief Executive Officer, commented, "Earned premium for medical stop-loss, which is by far our largest line of business, grew 25% over the same quarter last year, driven by annual growth rates in excess of 28% in our direct-written segment. Profitability of this line continues at expected levels. We see a significant portion of this growth arising from employer groups moving from fully insured to self-funding as they consider alternatives under

health care reform. We expect a continuation of these trends through the remainder of this year and into 2014. We are also encouraged by the performance of our existing group-life, disability and DBL business lines and our expansion into new business lines.

We have made the decision to exit major-medical for individuals and families in the majority of states in which we do business due to changes brought about under health care reform. In addition, in the first two quarters of 2013, the Company experienced an increase in loss ratios in our fully insured segment from business produced by certain of our major-medical distributors. Accordingly, we either have terminated, or soon will be terminating, all small-group producers that were hindering our performance. In order to leverage our expertise in fully insured health, we are concentrating on expanding our products in markets not adversely affected by reform, including: short-term medical, dental, small-group stop-loss; non-subscriber occupational accident, insurance for overseas employees and travelers, and pet insurance. We expect that the loss in underwriting income from

substantially exiting the individual major-medical market in 2014 will be offset by an increase in underwriting income from growth in these other areas.

Our overall investment portfolio continues to be very highly rated (on average, AA) and has a duration of approximately six years. Our book value has decreased to \$15.44 per share at June 30, 2013 from \$15.93 per share at December 31, 2012 and our total stockholders' equity is \$273 million. These declines are primarily attributable to sharp increases in ten-year treasury interest rates experienced during the quarter that caused a downward valuation in our bond portfolio. Were rates to continue to increase, we would expect a positive effect on future earnings as cash flows could be invested at higher rates.
