Restricted Stock Unit vesting in four equal annual installments commencing on 3/10/2020. The number of RSUs to be awarded is a function of base pay, a long-term incentive (LTI) percentage and the fair value of an RSU. The fair value of an RSU is calculated as the

- (1) stock price as of the effective date less the present value of Company stock dividends over the vesting period. This calculation requires the input of certain assumptions, including the risk-free interest rate and the expected Company stock dividends. The formula for determining the number of RSUs granted is: $\text{number of RSUs} = (\text{base pay} \times \text{LTI}\%) / \text{RSU fair value}$.

Each Performance Share Unit (PSU) represents a contingent right to receive one share of the Company's common stock. The percentage

- (2) of PSUs granted that will actually be earned at the end of the three-year period is based upon the Company's free cash flow growth, earnings before interest and tax (EBIT) margin percent, and market share results over that same period.

Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, *see* Instruction 6 for procedure.
